Rate of Change (%)	-4.7	-21.4	-12.5
Actual Figures for the Previous Term	430,270	11,281	7,222

III. Reasons for the Revision

In the construction and mining equipment business, domestic demand for construction equipment is anticipated to significantly decrease from that previously forecast due to the adverse effect of curtailed construction investment led by sluggish public outlays. Overseas, although sales in China made gains and the mining equipment market experienced a rebound, in the key North America market, demand continued to decline, and in Southeast Asia, market recovery was delayed. All in all, these developments led to lower than expected earnings being forecast.

## Edgar Filing: KOMATSU LTD - Form 6-K

In the electronics business, a steep recession in the global semiconductor industry impacted the silicon wafer industry, causing the market to remain very soft. As a result, the performance of Komatsu Electronic Metals Co., Ltd. is expected to deteriorate more than previously forecast. Even demand for thermoelectric modules for optical communications, which grew significantly in the pervious term, declined sharply, and the situation is expected to continue. Thus, earnings are seen falling from those initially forecast.

In future, Komatsu will strive to secure earnings through full-scale marketing of its GALEO series of construction equipment in Japan and make company-wide efforts to further reduce fixed costs. However, given the outlook for a continued difficult management environment, the consolidated and non-consolidated forecasts for the interim- and full-year terms have also been revised downward as stated earlier.
