GLOSSARY OF TERMS

The following is a glossary of frequently used abbreviations that are found throughout this Form 10-Q.

Abbreviation	Definition
2011 Form 10-K	Annual Report on Form 10-K for the year ended December 31, 2011
APSC	Arkansas Public Service Commission
ArcLight group	Bronco Midstream Holdings, LLC, Bronco Midstream Holdings II, LLC, collectively
Atoka	Atoka Midstream LLC joint venture
BART	Best available retrofit technology
Chesapeake Company	Chesapeake Energy Marketing, Inc. and Chesapeake Exploration, L.L.C. OGE Energy, collectively with its subsidiaries
Dodd-Frank Act	Dodd-Frank Wall Street Reform and Consumer Protection Act
Dry Scrubbers	Dry flue gas desulfurization units with spray dryer absorber
EBITDA	Enogex Holdings earnings before interest, taxes, depreciation and amortization
EER	Enogex Energy Resources LLC, wholly-owned subsidiary of Enogex LLC (prior to June 30, 2012, the legal name was OGE Energy Resources LLC)
Enogex	OGE Holdings, collectively with its subsidiaries
Enogex LLC	Enogex LLC, collectively with its subsidiaries
Enogex Holdings	Enogex Holdings LLC, the parent company of Enogex LLC and a majority-owned subsidiary of OGE Holdings
EPA	U.S. Environmental Protection Agency
FERC	Federal Energy Regulatory Commission
FIP	Federal implementation plan
GAAP	Accounting principles generally accepted in the United States
MMBtu	Million British thermal unit
MMcf/d	Million cubic feet per day
NGLs	Natural gas liquids
NOX	Nitrogen oxide
NYMEX	New York Mercantile Exchange
OCC	Oklahoma Corporation Commission
Off-system sales	Sales to other utilities and power marketers
OG&E	Oklahoma Gas and Electric Company
OGE Holdings	OGE Enogex Holdings, LLC, wholly-owned subsidiary of OGE Energy and parent company of Enogex Holdings
Pension Plan	Qualified defined benefit retirement plan
PRM	Price risk management
SIP	State implementation plan
SO ₂	Sulfur dioxide
SPP	Southwest Power Pool
System sales	Sales to OG&E's customers
TBtu/d	Trillion British thermal units per day

FORWARD-LOOKING STATEMENTS

Except for the historical statements contained herein, the matters discussed in this Form 10-Q, including those matters discussed in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations," are forward-looking statements that are subject to certain risks, uncertainties and assumptions. Such forward-looking statements are intended to be identified in this document by the words "anticipate", "believe", "estimate", "expect", "intend", "objective", "plan", "possible", "potential", "project" and similar expressions. Actual results may vary materially from those expressed in forward-looking statements. In addition to the specific risk factors discussed in "Item 1A. Risk Factors" in the Company's 2011 Form 10-K and "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" herein, factors that could cause actual results to differ materially from the forward-looking statements include, but are not limited to:

- general economic conditions, including the availability of credit, access to existing lines of credit, access to the commercial paper markets, actions of rating agencies and their impact on capital expenditures;
- the ability of the Company and its subsidiaries to access the capital markets and obtain financing on favorable terms;
- prices and availability of electricity, coal, natural gas and NGLs, each on a stand-alone basis and in relation to each other as well as the processing contract mix between percent-of-liquids, percent-of-proceeds, keep-whole and fixed-fee;
- business conditions in the energy and natural gas midstream industries;
- competitive factors including the extent and timing of the entry of additional competition in the markets served by the Company;
- unusual weather;
- availability and prices of raw materials for current and future construction projects;
- Federal or state legislation and regulatory decisions and initiatives that affect cost and investment recovery, have an impact on rate structures or affect the speed and degree to which competition enters the Company's markets;
- environmental laws and regulations that may impact the Company's operations;
- changes in accounting standards, rules or guidelines;
- the discontinuance of accounting principles for certain types of rate-regulated activities;
- the cost of protecting assets against, or damage due to, terrorism or cyber attacks and other catastrophic events;
- advances in technology;
- creditworthiness of suppliers, customers and other contractual parties;
- the higher degree of risk associated with the Company's nonregulated business compared with the Company's regulated utility business; and
- other risk factors listed in the reports filed by the Company with the Securities and Exchange Commission including those listed in "Item 1A. Risk Factors" and in Exhibit 99.01 to the Company's 2011 Form 10-K.

The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OGE ENERGY CORP.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Summary of Significant Accounting Policies

Organization

The Company is an energy and energy services provider offering physical delivery and related services for both electricity and natural gas primarily in the south central United States. The Company conducts these activities through three business segments: (i) electric utility, (ii) natural gas transportation and storage and (iii) natural gas gathering and processing. All significant intercompany transactions have been eliminated in consolidation.

The electric utility segment generates, transmits, distributes and sells electric energy in Oklahoma and western Arkansas. Its operations are conducted through OG&E and are subject to regulation by the OCC, the APSC and the FERC. OG&E was incorporated in 1902 under the laws of the Oklahoma Territory. OG&E is the largest electric utility in Oklahoma and its franchised service territory includes the Fort Smith, Arkansas area. OG&E sold its retail natural gas business in 1928 and is no longer engaged in the natural gas distribution business.

Enogex is a provider of integrated natural gas midstream services. Enogex is engaged in the business of gathering, processing, transporting and storing natural gas. Most of Enogex's natural gas gathering, processing, transportation and storage assets are strategically located in the Arkoma and Anadarko basins of Oklahoma and the Texas Panhandle. During the third quarter of 2012, the operations and activities of EER were fully integrated with those of Enogex through the creation of a new commodity management organization. This new organization is intended to facilitate the execution of Enogex's strategy through an enhanced focus on asset optimization and active management of its growing natural gas, NGLs and condensate positions. The operations of EER, including marketing and trading activities, have been included in the natural gas transportation and storage segment and have been restated for all prior periods presented. Enogex's operations are now organized into two business segments: (i) natural gas transportation and storage and (ii) natural gas gathering and processing. At September 30, 2012, the Company indirectly owns an 81.3 percent membership interest in Enogex Holdings, which in turn owns all of the membership interests in Enogex LLC, a Delaware single-member limited liability company. The Company consolidates Enogex Holdings in its Condensed Consolidated Financial Statements as OGE Energy has a controlling financial interest over the operations of Enogex Holdings. Also, Enogex LLC holds a 50 percent ownership interest in Atoka. The Company consolidates Atoka in its Condensed Consolidated Financial Statements as Enogex acts as the managing member of Atoka and has control over the operations of Atoka.

Basis of Presentation

The Condensed Consolidated Financial Statements included herein have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations; however, the Company believes that the disclosures are adequate to prevent the information presented from being misleading.

In the opinion of management, all adjustments necessary to fairly present the consolidated financial position of the Company at September 30, 2012 and December 31, 2011, the results of its operations for the three and nine months ended September 30, 2012 and 2011 and the results of its cash flows for the nine months ended September 30, 2012 and 2011, have been included and are of a normal recurring nature except as otherwise disclosed.

Due to seasonal fluctuations and other factors, the Company's operating results for the three and nine months ended September 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012 or for any future period. The Condensed Consolidated Financial Statements and Notes thereto should be read in conjunction with the audited Consolidated Financial Statements and Notes thereto included in the Company's 2011 Form 10-K.

Accounting Records

The accounting records of OG&E are maintained in accordance with the Uniform System of Accounts prescribed by the FERC and adopted by the OCC and the APSC. Additionally, OG&E, as a regulated utility, is subject to accounting principles for certain types of rate-regulated activities, which provide that certain actual or anticipated costs that would otherwise be charged to expense can be deferred as regulatory assets, based on the expected recovery from customers in future rates. Likewise, certain actual or anticipated credits that would otherwise reduce expense can be deferred as regulatory liabilities, based on the expected

flowback to customers in future rates. Management's expected recovery of deferred costs and flowback of deferred credits generally results from specific decisions by regulators granting such ratemaking treatment.

OG&E records certain actual or anticipated costs and obligations as regulatory assets or liabilities if it is probable, based on regulatory orders or other available evidence, that the cost or obligation will be included in amounts allowable for recovery or refund in future rates.

The following table is a summary of OG&E's regulatory assets and liabilities at:

(In millions)	September 30, 2012	December 31, 2011
Regulatory Assets		
Current		
Crossroads rider under recovery (A)	\$13.8	\$2.5
Oklahoma demand program rider under recovery (A)	9.8	8.1
Fuel clause under recoveries	0.8	1.8
Other (A)	10.5	3.6
Total Current Regulatory Assets	\$34.9	\$16.0
Non-Current		
Benefit obligations regulatory asset	\$338.1	\$359.2
Income taxes recoverable from customers, net	54.7	54.0
Smart Grid	42.2	37.2
Deferred storm expenses	14.4	23.8
Unamortized loss on reacquired debt	13.3	14.2
Deferred pension expenses	5.7	9.1
Other	12.5	10.4
Total Non-Current Regulatory Assets	\$480.9	\$507.9
Regulatory Liabilities		
Current		
Fuel clause over recoveries	\$107.1	\$7.7
Smart Grid rider over recovery (B)	29.3	24.3
Other (B)	17.3	13.7
Total Current Regulatory Liabilities	\$153.7	\$45.7
Non-Current		
Accrued removal obligations, net	\$214.6	\$208.2
Pension tracker	29.0	22.5
Total Non-Current Regulatory Liabilities	\$243.6	\$230.7

(A)Included in Other Current Assets on the Condensed Consolidated Balance Sheets.

(B)Included in Other Current Liabilities on the Condensed Consolidated Balance Sheets.

In accordance with the OCC order received by OG&E in July 2012 in its Oklahoma rate case, OG&E was allowed to begin amortizing a certain amount of Pension Plan expenses over a two-year period. These amounts have been included in the Pension tracker in the regulatory assets and liabilities table above.

Management continuously monitors the future recoverability of regulatory assets. When in management's judgment future recovery becomes impaired, the amount of the regulatory asset is adjusted, as appropriate. If OG&E were required to discontinue the application of accounting principles for certain types of rate-regulated activities for some or all of its operations, it could result in writing off the related regulatory assets, which could have significant financial effects.

Property, Plant and Equipment

Enogex Cox City Plant Fire

On December 8, 2010, a fire occurred at Enogex's Cox City natural gas processing plant destroying major components of one of the four processing trains, representing 120 MMcf/d of the total 180 MMcf/d of capacity, at that facility. The damaged train was replaced and the facility was returned to full service in September 2011. The total cost necessary to return the facility back to full service was \$29.6 million. In the fourth quarter of 2011, Enogex received a partial insurance reimbursement of \$7.4

million and recognized a gain of \$3.0 million on insurance proceeds. In March 2012, Enogex reached a settlement agreement with its insurers in this matter. As a result of the settlement agreement, Enogex received additional reimbursements of \$7.6 million during the nine months ended September 30, 2012. Enogex recognized a gain of \$7.5 million on insurance proceeds during the nine months ended September 30, 2012.

Asset Retirement Obligation

The following table summarizes changes to the Company's asset retirement obligations during the nine months ended September 30, 2012.

(In millions)

Balance at January 1, 2012	\$24.8
Liabilities incurred (A)	0.3
Accretion expense	1.6
Revisions in estimated cash flows (B)	26.7
Balance at September 30, 2012	\$53.4

(A) Due to certain Enogex compression assets.

(B) Due to changes to OG&E's asset retirement obligations related to its wind farms due to a change in the assumption related to the timing of removal used in the valuation of the asset retirement obligations.

Accumulated Other Comprehensive Income (Loss)

The following table summarizes the components of accumulated other comprehensive loss at September 30, 2012 and December 31, 2011 attributable to OGE Energy. At both September 30, 2012 and December 31, 2011, there was no accumulated other comprehensive loss related to Enogex's noncontrolling interest in Atoka.

(In millions)	September 30, 2012	December 31, 2011
Pension Plan and Restoration of Retirement Income Plan:		
Net loss	\$(39.8)	\$(42.1)
Prior service cost	—	(0.1)
Postretirement plans:		
Net loss	(13.9)	(15.4)
Prior service cost	7.6	9.0
Net transition obligation	—	(0.1)
Deferred commodity contracts hedging gains (losses)	(0.8))3.3
Deferred interest rate swap hedging losses	(0.5))(0.7)
Total accumulated other comprehensive loss	(47.4))(46.1)
Less: Accumulated other comprehensive loss attributable to noncontrolling interests	(6.4))(5.5)
Accumulated other comprehensive loss, net of tax	\$(41.0))(40.6)

Reclassifications

As discussed in Note 12, during the third quarter of 2012, the operations and activities of EER were fully integrated with those of Enogex through the creation of a new commodity management organization. The operations of EER, including marketing and trading activities, have been included in the natural gas transportation and storage segment and have been restated for all prior periods presented to conform to the 2012 presentation.

2. Gas Gathering Acquisitions

On August 1, 2012, Enogex entered into agreements with Chesapeake Midstream Gas Services, L.L.C. and Mid-America Midstream Gas Services, L.L.C., wholly-owned subsidiaries of Access Midstream Partners, L.P. and

Chesapeake Midstream Development, L.P., respectively, pursuant to which Enogex agreed to acquire approximately 235 miles of natural gas gathering pipelines, right-of-ways and certain other midstream assets that provide natural gas gathering services in the greater Granite Wash area. The transactions closed on August 31, 2012. The aggregate purchase price for these transactions was approximately \$80.5

million, including reimbursement for certain permitted capital expenditures incurred during the period beginning June 1, 2012 and ending August 31, 2012. Enogex utilized cash generated from operations and bank borrowings to fund the purchase. The purchase price is subject to certain post-closing adjustments. Enogex expects to complete the purchase price allocation for these transactions in the fourth quarter of 2012. In addition, Enogex also incurred acquisition-related costs of \$3.8 million for sales tax, which are included in taxes other than income. Certain of the required accounting disclosures related to this transaction have been excluded from this Form 10-Q because it is impracticable to provide such disclosures when certain information is not yet available.

In connection with these agreements, Enogex entered into a gas gathering and processing agreement with Chesapeake effective September 1, 2012 pursuant to which Enogex will provide fee-based natural gas gathering, compression, processing and transportation services to Chesapeake with respect to certain acreage dedicated by Chesapeake. Enogex projects additional capital expenditures for the construction of gathering and compression assets associated with these agreements through the remainder of 2012 and 2013.

3. Noncontrolling Interests

There were no contributions by OGE Holdings or the ArcLight group during the nine months ended September 30, 2012. The following table summarizes changes in OGE Holdings' and the ArcLight group's membership interest in Enogex Holdings for the 10 months ended October 31, 2012.

(In millions)	OGE Holdings	ArcLight group	Total	
Balance at December 31, 2011 (units)	93.8	21.6	115.4	
Ownership percentage at December 31, 2011	81.3	% 18.7	% 100.0	%
Issuance of 5,294,118 units of Enogex Holdings (A)	2.7	2.6	5.3	
Balance at October 31, 2012 (units)	96.5	24.2	120.7	
Ownership percentage at October 31, 2012	79.9	% 20.1	% 100.0	%

(A) Effective October 1, 2012, OGE Energy and the ArcLight group made contributions of \$45.0 million each to fund a portion of Enogex LLC's 2012 capital requirements.

Pursuant to the Enogex Holdings LLC Agreement, Enogex Holdings makes quarterly distributions to its partners. The following table summarizes the quarterly distributions during the nine months ended September 30, 2012.

(In millions)	OGE Holdings Portion	ArcLight group's Portion	Total Distribution
First quarter 2012	\$24.4	\$5.6	\$30.0
Second quarter 2012	10.1	2.4	12.5
Third quarter 2012	10.2	2.3	12.5
Total	\$44.7	\$10.3	\$55.0

During the nine months ended September 30, 2012, Atoka's noncontrolling interest partner made contributions of \$1.0 million to Atoka. Enogex LLC made no distributions during the nine months ended September 30, 2012 to its Atoka partner, as there is no minimum distribution requirement related to Atoka.

4. Fair Value Measurements

The classification of the Company's fair value measurements requires judgment regarding the degree to which market data is observable or corroborated by observable market data. GAAP establishes a fair value hierarchy that prioritizes the inputs used to measure fair value based on observable and unobservable data. The hierarchy categorizes the inputs into three levels, with the highest priority given to quoted prices in active markets for identical unrestricted assets or liabilities (Level 1) and the lowest priority given to unobservable inputs (Level 3). Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The

three levels defined in the fair value hierarchy and examples of each are as follows:

Level 1 inputs are quoted prices in active markets for identical unrestricted assets or liabilities that are accessible at the measurement date. Instruments classified as Level 1 include natural gas futures, swaps and options transactions for contracts traded on the NYMEX and settled through a NYMEX clearing broker.

Level 2 inputs are inputs other than quoted prices in active markets included within Level 1 that are either directly or indirectly observable at the reporting date for the asset or liability for substantially the full term of the asset or liability. Level 2 inputs include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active. Instruments classified as Level 2 include over-the-counter NYMEX natural gas swaps, natural gas basis swaps and natural gas purchase and sales transactions in markets such that the pricing is closely related to the NYMEX pricing.

Level 3 inputs are prices or valuation techniques for the asset or liability that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity). Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The Company utilizes the market approach in determining the fair value of its derivative positions by using either NYMEX published market prices, independent broker pricing data or broker/dealer valuations. The valuations of derivatives with pricing based on NYMEX published market prices may be considered Level 1 if they are settled through a NYMEX clearing broker account with daily margining. Over-the-counter derivatives with NYMEX based prices are considered Level 2 due to the impact of counterparty credit risk. Valuations based on independent broker pricing or broker/dealer valuations may be classified as Level 2 only to the extent they may be validated by an additional source of independent market data for an identical or closely related active market. In certain less liquid markets or for longer-term contracts, forward prices are not as readily available. In these circumstances, contracts are valued using internally developed methodologies that consider historical relationships among various quoted prices in active markets that result in management's best estimate of fair value. These contracts are classified as Level 3.

The impact to the fair value of derivatives due to credit risk is calculated using the probability of default based on Standard & Poor's Ratings Services and/or internally generated ratings. The fair value of derivative assets is adjusted for credit risk. The fair value of derivative liabilities is adjusted for credit risk only if the impact is deemed material.

Contracts with Master Netting Arrangements

Fair value amounts recognized for forward, interest rate swap, option and other conditional or exchange contracts executed with the same counterparty under a master netting arrangement may be offset. The reporting entity's choice to offset or not must be applied consistently. A master netting arrangement exists if the reporting entity has multiple contracts, whether for the same type of conditional or exchange contract or for different types of contracts, with a single counterparty that are subject to a contractual agreement that provides for the net settlement of all contracts through a single payment in a single currency in the event of default on or termination of any one contract. Offsetting the fair values recognized for forward, interest rate swap, option and other conditional or exchange contracts outstanding with a single counterparty results in the net fair value of the transactions being reported as an asset or a liability in the Condensed Consolidated Balance Sheets. The Company has presented the fair values of its derivative contracts under master netting agreements using a net fair value presentation.

The following tables summarize the Company's assets and liabilities that are measured at fair value on a recurring basis at September 30, 2012 and December 31, 2011 as well as reconcile the Company's commodity contracts fair value to PRM Assets and Liabilities on the Company's Condensed Consolidated Balance Sheets at September 30, 2012 and December 31, 2011. The Company held no Level 3 investments at September 30, 2012 or December 31, 2011.

September 30, 2012

(In millions)	Commodity Contracts		Gas Imbalances (A)	
	Assets	Liabilities	Assets (B)	Liabilities (C)

Total fair value	13.9	15.1	5.3	0.9
Netting adjustments	(12.8)(14.7)—	—
Total	\$1.1	\$0.4	\$5.3	\$0.9

December 31, 2011

(In millions)	Commodity Contracts		Gas Imbalances (A)	
	Assets	Liabilities	Assets	Liabilities (C)
Quoted market prices in active market for identical assets (Level 1)	\$57.1	\$52.3	\$—	\$—
Significant other observable inputs (Level 2)	4.2	1.2	1.8	7.8
Total fair value	61.3	53.5	1.8	7.8
Netting adjustments	(57.5)(53.0)—	—
Total	\$3.8	\$0.5	\$1.8	\$7.8

The Company uses the market approach to fair value its gas imbalance assets and liabilities, using an average of (A) the Inside FERC Gas Market Report for Panhandle Eastern Pipe Line Co. (Texas, Oklahoma Mainline), ONEOK (Oklahoma) and ANR Pipeline (Oklahoma) indices.

Gas imbalance assets exclude fuel reserves for under retained fuel due from shippers of \$2.6 million at (B) September 30, 2012 with no comparable item at December 31, 2011, which fuel reserves are based on the value of natural gas at the time the imbalance was created and which are not subject to revaluation at fair market value.

Gas imbalance liabilities exclude fuel reserves for over retained fuel due to shippers of \$1.1 million and \$2.0 (C) million at September 30, 2012 and December 31, 2011, respectively, which fuel reserves are based on the value of natural gas at the time the imbalance was created and which are not subject to revaluation at fair market value.

The following table summarizes the Company's assets that are measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the nine months ended September 30, 2011. There were no Level 3 investments held at September 30, 2012 or December 31, 2011.

(In millions)	Commodity Contracts

Balance at September 30	\$1.5	

13

The following table summarizes the fair value and carrying amount of the Company's financial instruments, including derivative contracts related to the Company's PRM activities, at September 30, 2012 and December 31, 2011.

(In millions)	September 30, 2012		December 31, 2011	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
PRM Assets				
Energy Derivative Contracts	\$1.1	\$1.1	\$3.8	\$3.8
PRM Liabilities				
Energy Derivative Contracts	\$0.4	\$0.4	\$0.5	\$0.5
Long-Term Debt				
OG&E Senior Notes	\$1,904.1	\$2,394.3	\$1,903.8	\$2,383.8
OG&E Industrial Authority Bonds	135.4	135.4	135.4	135.4
OG&E Tinker Debt (A)	10.7	10.4	—	—
OGE Energy Senior Notes	99.8	106.5	99.8	108.5
Enogex LLC Senior Notes	448.4	491.4	448.1	497.9
Enogex LLC Revolving Credit Agreement	—	—	150.0	150.0
Enogex LLC Term Loan	250.0	250.0	—	—

(A) In September 2012, OG&E purchased the electric distribution system at Tinker Air Force Base for \$10.7 million and will begin making installment payments over a 50-year term. The fair value of this debt is based on calculating the net present value of the monthly payments discounted by OG&E's current borrowing rate. Since the debt is valued using unobservable inputs, it is classified as Level 3 in the fair value hierarchy. This is a non-cash investing and financing activity.

The carrying value of the financial instruments included in the Condensed Consolidated Balance Sheets approximates fair value except for long-term debt which is valued at the carrying amount. The valuation of the Company's energy derivative contracts was determined generally based on quoted market prices. However, in certain instances where market quotes are not available, other valuation techniques or models are used to estimate market values. The valuation of instruments also considers the credit risk of the counterparties. The fair value of the Company's long-term debt is based on quoted market prices and estimates of current rates available for similar issues with similar maturities and is classified as Level 2 in the fair value hierarchy.

5. Derivative Instruments and Hedging Activities

The Company is exposed to certain risks relating to its ongoing business operations. The primary risks managed using derivatives instruments are commodity price risk and interest rate risk. The Company is also exposed to credit risk in its business operations.

Commodity Price Risk

The Company primarily uses forward physical contracts, commodity price swap contracts and commodity price option features to manage the Company's commodity price risk exposures. Commodity derivative instruments used by the Company are as follows:

- NGLs put options and NGLs swaps are used to manage Enogex's NGLs exposure associated with its processing agreements;
- natural gas swaps are used to manage Enogex's keep-whole natural gas exposure associated with its processing operations and Enogex's natural gas exposure associated with operating its gathering, transportation and storage assets; and
-

natural gas futures and swaps, natural gas options and natural gas commodity purchases and sales are used to manage Enogex's natural gas exposure associated with its storage and transportation contracts and marketing and trading activities.

Normal purchases and normal sales contracts are not recorded in PRM Assets or Liabilities in the Condensed Consolidated Balance Sheets and earnings are recognized in the period in which physical delivery of the commodity occurs. Management applies normal purchases and normal sales treatment to: (i) commodity contracts for the purchase and sale of natural gas used in or produced by Enogex's operations, (ii) commodity contracts for the sale of NGLs produced by Enogex's gathering and processing business, (iii) electric power contracts by OG&E and (iv) fuel procurement by OG&E.

The Company recognizes its non-exchange traded derivative instruments as PRM Assets or Liabilities in the Condensed Consolidated Balance Sheets at fair value with such amounts classified as current or long-term based on their anticipated settlement. Exchange traded transactions are settled on a net basis daily through margin accounts with a clearing broker and, therefore, are recorded at fair value on a net basis in Other Current Assets in the Condensed Consolidated Balance Sheets.

Interest Rate Risk

The Company's exposure to changes in interest rates primarily relates to short-term variable-rate debt and commercial paper. The Company manages its interest rate exposure by monitoring and limiting the effects of market changes in interest rates. The Company utilizes interest rate derivatives to alter interest rate exposure in an attempt to reduce the effects of these changes. Interest rate derivatives are used solely to modify interest rate exposure and not to modify the overall leverage of the debt portfolio.

Credit Risk

The Company is exposed to certain credit risks relating to its ongoing business operations. Credit risk includes the risk that counterparties that owe the Company money or energy will breach their obligations. If the counterparties to these arrangements fail to perform, the Company may be forced to enter into alternative arrangements. In that event, the Company's financial results could be adversely affected and the Company could incur losses.

Cash Flow Hedges

For derivatives that are designated and qualify as a cash flow hedge, the effective portion of the change in fair value of the derivative instrument is reported as a component of Accumulated Other Comprehensive Income (Loss) and recognized into earnings in the same period during which the hedged transaction affects earnings. The ineffective portion of a derivative's change in fair value or hedge components excluded from the assessment of effectiveness is recognized currently in earnings. The Company measures the ineffectiveness of commodity cash flow hedges using the change in fair value method whereby the change in the expected future cash flows designated as the hedge transaction are compared to the change in fair value of the hedging instrument. Forecasted transactions, which are designated as the hedged transaction in a cash flow hedge, are regularly evaluated to assess whether they continue to be probable of occurring. If the forecasted transactions are no longer probable of occurring, hedge accounting will cease on a prospective basis and all future changes in the fair value of the derivative will be recognized directly in earnings.

The Company designates as cash flow hedges derivatives used to manage commodity price risk exposure for Enogex's NGLs volumes and corresponding keep-whole natural gas resulting from its natural gas processing contracts (processing hedges) and natural gas positions resulting from its natural gas gathering and processing, pipeline and storage operations (operational gas hedges). The Company also designates as cash flow hedges certain derivatives used to manage natural gas commodity exposure for certain natural gas storage inventory positions. Enogex's cash flow hedges at September 30, 2012 mature by the end of the first quarter of 2013.

Fair Value Hedges

For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedge risk are recognized currently in earnings. The Company includes the gain or loss on the hedged items in Operating Revenues as the offsetting loss or gain on the related hedging derivative.

At September 30, 2012 and December 31, 2011, the Company had no derivative instruments that were designated as fair value hedges.

Derivatives Not Designated as Hedging Instruments

Derivative instruments not designated as hedging instruments are utilized in Enogex's asset management, marketing and trading activities. For derivative instruments not designated as hedging instruments, the gain or loss on the derivative is recognized currently in earnings.

Quantitative Disclosures Related to Derivative Instruments

At September 30, 2012, the Company had the following derivative instruments that were designated as cash flow hedges.

(In millions)	2012 Gross Notional Volume (A)
Enogex hedges	
Natural gas sales	2.9
(A) Natural gas in MMBtu's.	

At September 30, 2012, the Company had the following derivative instruments that were not designated as hedging instruments.

(In millions)	Gross Notional Volume (A)	
	Purchases	Sales
Natural gas (B)		
Physical (C)(D)	5.1	36.5
Fixed Swaps/Futures	30.6	31.8
Options	1.8	1.8
Basis Swaps	7.1	7.2

(A) Natural gas in MMBtu's.

(B) 95.1 percent of the natural gas contracts have durations of one year or less, 2.9 percent have durations of more than one year and less than two years and 2.0 percent have durations of more than two years.

(C) Of the natural gas physical purchases and sales volumes not designated as hedges, the majority are priced based on a monthly or daily index and the fair value is subject to little or no market price risk.

(D) Natural gas physical sales volumes exceed natural gas physical purchase volumes due to the marketing of natural gas volumes purchased via Enogex's processing contracts, which are not derivative instruments and are excluded from the table above.

Balance Sheet Presentation Related to Derivative Instruments

The fair value of the derivative instruments that are presented in the Company's Condensed Consolidated Balance Sheet at September 30, 2012 are as follows:

Instrument	Balance Sheet Location	Fair Value	
		Assets	Liabilities
		(In millions)	
Derivatives Designated as Hedging Instruments			
Natural Gas

Derivatives Not Designated as Hedging Instruments

(In millions)	Amount Recognized in Income
Natural Gas Physical Purchases/Sales	\$(7.1)
Natural Gas Financial Futures/Swaps	(0.2)
Total	\$(7.3)

For derivatives designated as cash flow hedges in the tables above, amounts reclassified from Accumulated Other Comprehensive Income (Loss) into income (effective portion) and amounts recognized in income (ineffective portion) for the three and nine months ended September 30, 2012 and 2011, if any, are reported in Operating Revenues. For derivatives not designated as hedges in the tables above, amounts recognized in income for the three and nine months ended September 30, 2012 and 2011, if any, are reported in Operating Revenues.

Credit-Risk Related Contingent Features in Derivative Instruments

In the event Moody's Investors Services or Standard & Poor's Ratings Services were to lower the Company's senior unsecured debt rating to a below investment grade rating, at September 30, 2012, the Company would have been required to post less than \$0.1 million of cash collateral to satisfy its obligation under its financial and physical contracts relating to derivative instruments that are in a net liability position at September 30, 2012. In addition, the Company could be required to provide additional credit assurances in future dealings with third parties, which could include letters of credit or cash collateral.

6. Stock-Based Compensation

The following table summarizes the Company's pre-tax compensation expense and related income tax benefit during the three and nine months ended September 30, 2012 and 2011 related to the Company's performance units and restricted stock.

(In millions)	Three Months Ended		Nine Months Ended	
	September 30, 2012	2011	September 30, 2012	2011
Performance units				
Total shareholder return	\$1.9	\$1.9	\$5.7	\$5.6
Earnings per share	0.7	0.8	2.0	3.7
Total performance units	2.6	2.7	7.7	9.3
Restricted stock	0.1	0.2	0.5	0.7
Total compensation expense	\$2.7	\$2.9	\$8.2	\$10.0
Income tax benefit	\$1.0	\$1.1	\$3.2	\$3.9

During the three and nine months ended September 30, 2012, there were 30,000 shares and 422,700 shares, respectively, of new common stock issued pursuant to the Company's stock incentive plans related to exercised stock options, restricted stock grants (net of forfeitures) and payouts of earned performance units. In November 2011, the Company purchased 120,000 shares of its common stock on the open market. During the three months ended March 31, 2012, 114,949 of these shares were used to payout Enogex's portion of earned performance units. During the three and nine months ended September 30, 2012, there were 2,622 shares and 5,554 shares, respectively, of restricted stock returned to the Company to satisfy tax liabilities. The Company received \$0.7 million and \$0.8 million during the three and nine months ended September 30, 2012, respectively, related to exercised stock options. The Company did not realize an income tax benefit for the tax deductions from the exercised stock options during the three and nine months ended September 30, 2012 due to the Company being in a tax net operating loss position in 2012.

7. Income Taxes

The Company files consolidated income tax returns in the U.S. Federal jurisdiction and various state jurisdictions. With few exceptions, the Company is no longer subject to U.S. Federal tax examinations by tax authorities for years prior to 2009 or state and local tax examinations by tax authorities for years prior to 2005. Income taxes are generally allocated to each company in the affiliated group based on its stand-alone taxable income or loss. Federal investment tax credits previously claimed on electric utility property have been deferred and are being amortized to income over the life of the related property. OG&E continues to amortize its Federal investment tax credits on a ratable basis throughout the year. OG&E earns both Federal and Oklahoma state tax credits associated with production from its wind farms. In addition, OG&E and Enogex earn Oklahoma state tax credits associated with their investments in electric generating and natural gas processing facilities which further reduce the Company's effective tax rate.

8. Common Equity

Automatic Dividend Reinvestment and Stock Purchase Plan

The Company issued 58,674 shares and 187,786 shares, respectively, of common stock under its Automatic Dividend Reinvestment and Stock Purchase Plan during the three and nine months ended September 30, 2012 and received proceeds of \$3.1 million and \$10.0 million, respectively. The Company may, from time to time, issue additional shares under its Automatic Dividend Reinvestment and Stock Purchase Plan to fund capital requirements or working capital needs. At September 30, 2012, there were 2,181,257 shares of unissued common stock reserved for issuance under the Company's Automatic Dividend Reinvestment and Stock Purchase Plan.

Earnings Per Share

Basic earnings per share is calculated by dividing net income attributable to OGE Energy by the weighted average number of the Company's common shares outstanding during the period. In the calculation of diluted earnings per share, weighted average shares outstanding are increased for additional shares that would be outstanding if potentially dilutive securities were converted to common stock. Potentially dilutive securities for the Company consist of performance units. Basic and diluted earnings per share for the Company were calculated as follows:

(In millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2012	2011	2012	2011
Net Income Attributable to OGE Energy	\$185.5	\$178.7	\$316.5	\$306.5
Average Common Shares Outstanding				
Basic average common shares outstanding	98.7	98.0	98.5	97.9
Effect of dilutive securities:				
Contingently issuable shares (performance units)	0.4	1.3	0.4	1.3
Diluted average common shares outstanding	99.1	99.3	98.9	99.2
Basic Earnings Per Average Common Share Attributable to OGE Energy Common Shareholders	\$1.88	\$1.82	\$3.21	\$3.13
Diluted Earnings Per Average Common Share Attributable to OGE Energy Common Shareholders	\$1.87	\$1.80	\$3.20	\$3.09
Anti-dilutive shares excluded from earnings per share calculation	—	—	—	—

9. Long-Term Debt

At September 30, 2012, the Company was in compliance with all of its debt agreements.

OG&E Industrial Authority Bonds

OG&E has tax-exempt pollution control bonds with optional redemption provisions that allow the holders to request repayment of the bonds on any business day. The bonds, which can be tendered at the option of the holder during the next 12 months, are as follows:

SERIES	DATE DUE	AMOUNT (In millions)
0.22% - 0.40%	Garfield Industrial Authority, January 1, 2025	\$47.0
0.21% - 0.41%	Muskogee Industrial Authority, January 1, 2025	32.4
0.20% - 0.47%	Muskogee Industrial Authority, June 1, 2027	56.0
Total (redeemable during next 12 months)		\$135.4

All of these bonds are subject to an optional tender at the request of the holders, at 100 percent of the principal amount, together with accrued and unpaid interest to the date of purchase. The bond holders, on any business day, can request repayment of the bond by delivering an irrevocable notice to the tender agent stating the principal amount of the bond, payment instructions for the purchase price and the business day the bond is to be purchased. The repayment option may only be exercised by the holder of a bond for the principal amount. When a tender notice has been received by the trustee, a third party remarketing agent for the bonds will attempt to remarket any bonds tendered for purchase. This process occurs once per week. Since the original issuance of these series of bonds in 1995 and 1997, the remarketing agent has successfully remarketed all tendered bonds. If the

remarketing agent is unable to remarket any such bonds, OG&E is obligated to repurchase such unremarketed bonds. As OG&E has both the intent and ability to refinance the bonds on a long-term basis and such ability is supported by an ability to consummate the refinancing, the bonds are classified as long-term debt in the Company's Condensed Consolidated Financial Statements. OG&E believes that it has sufficient liquidity to meet these obligations.

Enogex Term Loan Agreement

On August 2, 2012, Enogex entered into a \$250 million, three-year term loan agreement with a maturity date of August 2, 2015. The loan was used to fund capital expenditures and for working capital purposes.

10. Short-Term Debt and Credit Facilities

The Company borrows on a short-term basis, as necessary, by the issuance of commercial paper and by borrowings under its revolving credit agreements. The short-term debt balance was \$455.6 million and \$277.1 million at September 30, 2012 and December 31, 2011, respectively. The following table provides information regarding the Company's revolving credit agreements and available cash at September 30, 2012.

Revolving Credit Agreements and Available Cash

Entity	Aggregate Commitment (In millions)	Amount Outstanding (A)	Weighted-Average Interest Rate	Maturity
OGE Energy (B)	\$750.0	\$455.6	0.44	% (E) December 13, 2016
OG&E (C)	400.0	2.2	0.53	% (E) December 13, 2016
Enogex LLC (D)	400.0	—	—	% (E) December 13, 2016
	1,550.0	457.8	0.44	%
Cash	10.2	N/A	N/A	N/A
Total	\$1,560.2	\$457.8	0.44	%

(A) Includes direct borrowings under the revolving credit agreements, commercial paper borrowings and letters of credit at September 30, 2012.

This bank facility is available to back up OGE Energy's commercial paper borrowings and to provide revolving (B) credit borrowings. This bank facility can also be used as a letter of credit facility. At September 30, 2012, there was \$455.6 million in outstanding commercial paper borrowings.

This bank facility is available to back up OG&E's commercial paper borrowings and to provide revolving credit (C) borrowings. This bank facility can also be used as a letter of credit facility. At September 30, 2012, there was \$2.2 million in letters of credit.

This bank facility is available to provide revolving credit borrowings for Enogex LLC. As Enogex LLC's credit (D) agreement matures on December 13, 2016, along with its intent in utilizing its credit agreement, borrowings thereunder are classified as long-term debt in the Company's Condensed Consolidated Balance Sheets.

(E) Represents the weighted-average interest rate for the outstanding borrowings under the revolving credit agreements, commercial paper borrowings and letters of credit.

The Company's ability to access the commercial paper market could be adversely impacted by a credit ratings downgrade or major market disruptions. Pricing grids associated with the Company's credit facilities could cause annual fees and borrowing rates to increase if an adverse ratings impact occurs. The impact of any future downgrade could include an increase in the costs of the Company's short-term borrowings, but a reduction in the Company's credit ratings would not result in any defaults or accelerations. Any future downgrade of the Company could also lead to higher long-term borrowing costs and, if below investment grade, would require the Company to post cash collateral or letters of credit.

OG&E must obtain regulatory approval from the FERC in order to borrow on a short-term basis. OG&E has the necessary regulatory approvals to incur up to \$800 million in short-term borrowings at any one time for a two-year period beginning January 1, 2011 and ending December 31, 2012.

11. Retirement Plans and Postretirement Benefit Plans

The details of net periodic benefit cost of the Company's Pension Plan, the Restoration of Retirement Income Plan and the postretirement benefit plans included in the Condensed Consolidated Financial Statements are as follows:

Net Periodic Benefit Cost

(In millions)	Pension Plan				Restoration of Retirement Income Plan			
	Three Months Ended		Nine Months Ended		Three Months Ended		Nine Months Ended	
	September 30, 2012 (B)	2011 (B)	September 30, 2012 (C)	2011 (C)	September 30, 2012 (B)	2011 (B)	September 30, 2012 (C)	2011 (C)
Service cost	\$4.5	\$4.4	\$13.5	\$13.2	\$0.3	\$0.3	\$0.8	\$0.8
Interest cost	7.5	8.4	22.5	25.0	0.1	0.1	0.4	0.4
Expected return on plan assets	(11.5)	(11.4)	(34.5)	(34.1)	—	—	—	—
Amortization of net loss	6.0	4.8	17.9	14.4	0.1	0.1	0.3	0.3
Amortization of unrecognized prior service cost (A)	0.5	0.6	1.6	1.8	0.2	0.1	0.5	0.5
Net periodic benefit cost	\$7.0	\$6.8	\$21.0	\$20.3	\$0.7	\$0.6	\$2.0	\$2.0

Unamortized prior service cost is amortized on a straight-line basis over the average remaining service period to (A) the first eligibility age of participants who are expected to receive a benefit and are active at the date of the plan amendment.

In addition to the \$7.7 million and \$7.4 million of net periodic benefit cost recognized by the Company during the three months ended September 30, 2012 and 2011, respectively, OG&E recognized an increase in pension expense (B) during the three months ended September 30, 2012 and 2011 of \$1.9 million and \$2.7 million, respectively, to maintain the allowable amount to be recovered for pension expense in the Oklahoma jurisdiction which are included in the Pension tracker regulatory liability (see Note 1).

In addition to the \$23.0 million and \$22.3 million of net periodic benefit cost recognized by the Company during the nine months ended September 30, 2012 and 2011, respectively, OG&E recognized an increase in pension (C) expense during the nine months ended September 30, 2012 and 2011 of \$7.6 million and \$8.0 million, respectively, to maintain the allowable amount to be recovered for pension expense in the Oklahoma jurisdiction which are included in the Pension tracker regulatory liability (see Note 1).

(In millions)	Postretirement Benefit Plans			
	Three Months Ended		Nine Months Ended	
	September 30, 2012 (B)	2011 (B)	September 30, 2012 (C)	2011 (C)
Service cost	\$1.0	\$0.8	\$3.1	\$2.6
Interest cost	2.9	3.2	8.9	9.4
Expected return on plan assets	(0.8)	(1.2)	(2.3)	(3.8)
Amortization of transition obligation	0.7	0.7	2.1	2.1
Amortization of net loss	5.2	4.6	15.4	13.7
Amortization of unrecognized prior service cost (A)	(4.1)	(4.2)	(12.4)	(12.4)
Net periodic benefit cost	\$4.9	\$3.9	\$14.8	\$11.6

Unamortized prior service cost is amortized on a straight-line basis over the average remaining service period to (A) the first eligibility age of participants who are expected to receive a benefit and are active at the date of the plan amendment.

(B) In addition to the \$4.9 million and \$3.9 million of net periodic benefit cost recognized by the Company during the three months ended September 30, 2012 and 2011, respectively, OG&E recognized an increase in postretirement

medical expense during the three months ended September 30, 2012 and 2011 of \$0.1 million and \$0.8 million, respectively, to maintain the allowable amount to be recovered for postretirement medical expense in the Oklahoma jurisdiction which are included in the Pension tracker regulatory liability (see Note 1).

In addition to the \$14.8 million and \$11.6 million of net periodic benefit cost recognized by the Company during the nine months ended September 30, 2012 and 2011, respectively, OG&E recognized an increase in (C) postretirement medical expense during each of the nine months ended September 30, 2012 and 2011 of \$0.8 million to maintain the allowable amount to be recovered for postretirement medical expense in the Oklahoma jurisdiction which are included in the Pension tracker regulatory liability (see Note 1).

12. Report of Business Segments

Previously, the Company's business was divided into four segments as follows: (i) electric utility, which is engaged in the generation, transmission, distribution and sale of electric energy, (ii) natural gas transportation and storage, (iii) natural gas gathering and processing and (iv) natural gas marketing. During the third quarter of 2012, the operations and activities of EER were fully integrated with those of Enogex through the creation of a new commodity management organization. The operations of EER, including marketing and trading activities, have been included in the natural gas transportation and storage segment and have been restated for all prior periods presented. As a result of this change, the Company's business is now divided into three segments for financial reporting purposes as follows: (i) electric utility, (ii) natural gas transportation and storage and (iii) natural gas gathering and processing. Other Operations primarily includes the operations of the holding company. Intersegment revenues are recorded at prices comparable to those of unaffiliated customers and are affected by regulatory considerations. In reviewing its segment operating results, the Company focuses on operating income as its measure of segment profit and loss, and, therefore, has presented this information below. The following tables summarize the results of the Company's business segments during the three and nine months ended September 30, 2012 and 2011.

Three Months Ended September 30, 2012	Electric Utility	Transportation and Storage	Gathering and Processing	Other Operations	Eliminations	Total
(In millions)						
Operating revenues	\$721.0	\$180.9	\$326.2	\$—	\$(114.7)	\$1,113.4

13. Commitments and Contingencies

Except as set forth below and in Note 14, the circumstances set forth in Notes 16 and 17 to the Company's Consolidated Financial Statements included in the Company's 2011 Form 10-K appropriately represent, in all material respects, the current status of the Company's material commitments and contingent liabilities.

OG&E Railcar Lease Agreement

OG&E has a noncancellable operating lease with purchase options, covering 1,389 coal hopper railcars to transport coal from Wyoming to OG&E's coal-fired generation units. Rental payments are charged to Fuel Expense and are recovered through OG&E's tariffs and fuel adjustment clauses. On December 15, 2010, OG&E renewed the lease agreement effective February 1, 2011. At the end of the new lease term, which is February 1, 2016, OG&E has the option to either purchase the railcars at a stipulated fair market value or renew the lease. If OG&E chooses not to purchase the railcars or renew the lease agreement and the actual fair value of the railcars is less than the stipulated fair market value, OG&E would be responsible for the difference in those values up to a maximum of \$22.8 million.

On January 11, 2012, OG&E executed a five-year lease agreement for 135 railcars to replace railcars that have been taken out of service or destroyed. OG&E is also required to maintain all of the railcars it has under lease to transport coal from Wyoming and has entered into agreements with Progress Rail Services and WATCO, both of which are non-affiliated companies, to furnish this maintenance.

OGE Energy Noncancellable Operating Lease

On August 29, 2012, OGE Energy executed a five-year lease agreement for office space from September 1, 2013 to August 31, 2018. Future minimum payments for this operating lease are as follows:

(In millions)	2012	2013	2014	2015	2016	2017 and Beyond	Total
OGE Energy noncancellable operating lease	\$—	\$0.3	\$0.8	\$0.8	\$0.8	\$1.5	\$4.2

OG&E Minimum Fuel Purchase Commitments

In 2012, through multiple requests for proposal, OG&E entered into various natural gas purchase contracts for natural gas supply covering November and December 2012 and multiple months in 2013. For the two-month period of November and December 2012, OG&E entered into contracts for 10 percent of its remaining 2012 annual forecasted natural gas requirements. OG&E has entered into multiple month term natural gas contracts for 25 percent of its 2013 annual forecasted natural gas requirements. Additional gas supplies to fulfill OG&E's remaining 2013 natural gas requirements will be acquired through additional requests for proposal in early to mid-2013, along with monthly and daily purchases, all of which are expected to be made at market prices.

During the three months ended September 30, 2012, OG&E entered into coal contracts for minimum purchases from January 2013 through December 2013 for \$23.4 million.

OG&E Wind Farm Land Lease Agreements

OG&E has wind farm land operating leases for its Centennial, OU Spirit and Crossroads wind farms expiring at various dates. Although the leases are cancellable, OG&E is required to make annual lease payments as long as the wind turbines are located on the land. OG&E does not expect to terminate the leases until the wind turbines reach the end of their economic life. Future minimum payments for these operating leases are as follows:

(In millions)	2012	2013	2014	2015	2016	2017 and Beyond	Total
OG&E wind farm land leases	\$2.0	\$2.0	\$2.1	\$2.1	\$2.1	\$53.9	\$64.2

Natural Gas Measurement Cases

Will Price, et al. v. El Paso Natural Gas Co., et al. (Price I). On September 24, 1999, various subsidiaries of OGE Energy were served with a class action petition filed in the District Court of Stevens County, Kansas by Quinque Operating Company and other named plaintiffs alleging the mismeasurement of natural gas on non-Federal lands. On April 10, 2003, the court entered an order denying class certification. On May 12, 2003, the plaintiffs (now Will Price, Stixon Petroleum, Inc., Thomas F. Boles and the Cooper Clark Foundation, on behalf of themselves and other royalty interest owners) filed a motion seeking to file an amended class action petition, and the court granted the motion on July 28, 2003. In its amended petition, OG&E and Enogex Inc. were omitted from the case but two of OGE Energy's other subsidiary entities remained as defendants. The plaintiffs' amended petition seeks class certification and alleges that 60 defendants, including two of OGE Energy's subsidiary entities, have improperly measured the volume of natural gas. The amended petition asserts theories of civil conspiracy, aiding and abetting, accounting and unjust enrichment. In their briefing on class certification, the plaintiffs seek to also allege a claim for conversion. The plaintiffs seek unspecified actual damages, attorneys' fees, costs and pre-judgment and post-judgment interest. The plaintiffs also reserved the right to seek punitive damages.

On September 18, 2009, the court entered its order denying class certification. On October 2, 2009, the plaintiffs filed for a rehearing of the court's denial of class certification. On March 31, 2010, the court denied the plaintiffs' request

for rehearing. On July 20, 2011, Enogex LLC and EER filed motions for summary judgment. On January 25, 2012, the court denied portions of the motions for summary judgment related to the legal issue of the plaintiffs' claims regarding civil conspiracy. In an order dated January 23, 2012, the court granted the plaintiffs additional time to perform discovery prior to the consideration of the motions for summary judgment as they relate to the plaintiffs' other claims. On February 7, 2012, Enogex LLC and EER filed an application in the Kansas Court of Appeals seeking appeal of the trial court's denial of their motions for summary judgment. On February 23, 2012, the Kansas Court of Appeals denied this application. On March 23, 2012, Enogex LLC and EER filed an application with the Kansas Supreme Court seeking appeal of the Kansas Court of Appeals' decision. On July 19, 2012, the plaintiffs filed a motion to dismiss Enogex LLC and EER from the action. On September 19, 2012, the court issued a final order dismissing Enogex LLC and EER from this case. OGE Energy considers this case closed.

Will Price, et al. v. El Paso Natural Gas Co., et al. (Price II). On May 12, 2003, the plaintiffs (same as those in the amended petition in Price I above) filed a new class action petition in the District Court of Stevens County, Kansas naming the same defendants and asserting substantially identical legal and/or equitable theories as in the amended petition of the Price I case. OG&E and Enogex Inc. were not named in this case, but two of OGE Energy's other subsidiary entities were named in this case. The plaintiffs allege that the defendants mismeasured the British thermal unit content of natural gas obtained from or measured for the plaintiffs. In their briefing on class certification, the plaintiffs seek to also allege a claim for conversion. The plaintiffs seek unspecified actual damages, attorneys' fees, costs and pre-judgment and post-judgment interest. The plaintiffs also reserved the right to seek punitive damages.

On September 18, 2009, the court entered its order denying class certification. On October 2, 2009, the plaintiffs filed for a rehearing of the court's denial of class certification. On March 31, 2010, the court denied the plaintiffs' request for rehearing. On July 20, 2011, Enogex LLC and EER filed motions for summary judgment. On January 25, 2012, the court denied portions of the motions for summary judgment related to the legal issue of the plaintiffs' claims regarding civil conspiracy. In an order dated January 23, 2012, the court granted the plaintiffs additional time to perform discovery prior to the consideration of the motions for summary judgment as they relate to the plaintiffs' other claims. On February 7, 2012, Enogex LLC and EER filed an application in the Kansas Court of Appeals seeking appeal of the trial court's denial of their motions for summary judgment. On February 23, 2012, the Kansas Court of Appeals denied this application. On March 23, 2012, Enogex LLC and EER filed an application with the Kansas Supreme Court seeking appeal of the Kansas Court of Appeals' decision. On July 19, 2012, the plaintiffs filed a motion to dismiss Enogex LLC and EER from the action. On September 19, 2012, the court issued a final order dismissing Enogex LLC and EER from this case. OGE Energy considers this case closed.

Other

In the normal course of business, the Company is confronted with issues or events that may result in a contingent liability. These generally relate to lawsuits or claims made by third parties, including governmental agencies. When appropriate, management consults with legal counsel and other appropriate experts to assess the claim. If, in management's opinion, the Company has incurred a probable loss as set forth by GAAP, an estimate is made of the loss and the appropriate accounting entries are reflected in the Company's Condensed Consolidated Financial Statements. At the present time, based on currently available information, except as otherwise stated above, in Note 14 below, under "Environmental Laws and Regulations" in Item 2 of Part 1 and in Item 1 of Part II of this Form 10-Q, in Notes 16 and 17 of Notes to Consolidated Financial Statements and Item 3 of Part I of the Company's 2011 Form 10-K, the Company believes that any reasonably possible losses in excess of accrued amounts arising out of pending or threatened lawsuits or claims would not be quantitatively material to its financial statements and would not have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

14. Rate Matters and Regulation

Except as set forth below, the circumstances set forth in Note 17 to the Company's Consolidated Financial Statements included in the Company's 2011 Form 10-K appropriately represent, in all material respects, the current status of the Company's regulatory matters.

Completed Regulatory Matters

OG&E Contract and Wind Energy Purchase Agreement Filing

On December 1, 2011, OG&E filed an application with the OCC requesting approval of a 20-year agreement that is intended to provide wind power to help meet the current and future power generation needs of Oklahoma State

University. The project calls for OG&E to contract with NextEra Energy to build a 60 megawatt wind farm near Blackwell, Oklahoma, to support the Oklahoma State University project in which NextEra Energy will build, own and operate the wind farm and OG&E will purchase the electric output. The wind farm is expected to be in service by the end of 2012. On February 22, 2012, OG&E, the Attorney General and the Public Utility Division of the OCC signed a settlement agreement whereby the stipulating parties requested that the OCC issue an order approving the agreement for electric service with Oklahoma State University. On March 12, 2012, OG&E received an order from the OCC approving the settlement agreement. Pursuant to the terms of the power purchase agreement between OG&E and NextEra Energy, OG&E will purchase the electric output of the wind farm and use that power to provide service to Oklahoma State University and its other retail customers.

OG&E SPP Transmission Projects

In 2007, the SPP notified OG&E to construct 44 miles of a new 345 kilovolt transmission line originating at OG&E's existing Sooner 345 kilovolt substation and proceeding generally in a northerly direction to the Oklahoma/Kansas Stateline (referred to as the Sooner-Rose Hill project). At the Oklahoma/Kansas Stateline, the line connects to the companion line constructed in

Kansas by Westar Energy. The transmission line was placed in service in April 2012. The total capital expenditures associated with this project were \$45 million.

In January 2009, OG&E received notification from the SPP to begin construction on 50 miles of a new 345 kilovolt transmission line and substation upgrades at OG&E's Sunnyside substation, among other projects. In April 2009, Western Farmers Electric Cooperative assigned to OG&E the construction of 50 miles of line designated by the SPP to be built by Western Farmers Electric Cooperative. The new line extends from OG&E's Sunnyside substation near Ardmore, Oklahoma, 123.5 miles to the Hugo substation owned by Western Farmers Electric Cooperative near Hugo, Oklahoma. The transmission line was completed in April 2012. The total capital expenditures associated with this project were \$157 million.

As discussed below, the OCC approved a settlement agreement in OG&E's 2011 Oklahoma rate case filing that included an expedited procedure for recovering the costs of the two projects. On July 31, 2012, OG&E filed an application with the OCC requesting an order authorizing recovery for the two projects through the SPP transmission systems additions rider. On October 2, 2012, all parties signed a settlement agreement in this matter which stated: (i) the parties agree not to oppose requested relief sought by OG&E, (ii) OG&E will host meetings to discuss the SPP's transmission planning process, including any future transmission projects for which OG&E has received a notice to construct from the SPP, and (iii) there will be opportunities for parties to provide input related to transmission planning studies that the SPP performs to identify future transmission projects. On October 25, 2012, the OCC issued an order approving the settlement agreement and granting OG&E cost recovery for the two projects. OG&E initiated cost recovery beginning with the first billing cycle in November 2012.

OG&E 2011 Oklahoma Rate Case Filing

As previously reported in the Company's 2011 Form 10-K, on July 28, 2011, OG&E filed its application with the OCC requesting an annual rate increase of \$73.3 million, or a 4.3 percent increase in its rates. OG&E requested a return on equity of 11.0 percent based on a common equity percentage of 53.0 percent. In its application, OG&E requested recovery of increases in its operating costs and to begin earning on approximately \$500 million of new capital investments made on behalf of its Oklahoma customers during the previous two and one-half years. On July 2, 2012, OG&E and other parties associated with its rate increase reached a settlement agreement in this matter. Key terms of the settlement agreement include: (i) an annual net increase of approximately \$4.3 million in OG&E's rates to its Oklahoma retail customers, (ii) OG&E's Oklahoma retail authorized return on equity will be 10.2 percent, (iii) the rate of return to be used under various recovery riders previously approved by the OCC, including riders for OG&E's smart grid implementation and Crossroads wind farm will be based on OG&E's actual debt and equity ratios as reflected in OG&E's application and a 10.2 percent return on equity, (iv) depreciation rates proposed by OG&E will be implemented in the same month new customer rates go into effect, (v) the pension and postretirement medical cost tracker will remain in effect, (vi) a procedure was established to expedite the recovery of the cost of specified high-voltage transmission projects and (vii) extension of funding for OG&E's system hardening program. On July 9, 2012, the OCC issued an order approving the settlement agreement in this matter. OG&E expects the impact of the rate increase on its customers and service territory to be minimal as the rate increase will be more than offset by lower fuel costs attributable to prior fuel over recoveries from lower than forecasted fuel costs. OG&E implemented the new rates effective in early August.

OG&E Smart Grid Project

As previously reported, OG&E filed an application with the APSC requesting pre-approval for system-wide deployment of smart grid technology and a recovery rider, including a credit for the Smart Grid grant awarded by the U.S. Department of Energy under the American Recovery and Reinvestment Act of 2009. On August 3, 2011, the APSC issued an order in this matter approving the settlement agreement. On August 31, 2012, the APSC issued an

order authorizing implementation of the rider beginning with the first billing cycle in September 2012 through December 2012.

OG&E Request for Prudence Determination and Waiver of Competitive Bid Rules for One-Year Extension of Enogex Gas Transportation and Storage Agreement

On August 9, 2012, OG&E filed an application with the OCC requesting: (i) an order finding that a one-year extension of OG&E's gas transportation and storage agreement with Enogex is prudent, (ii) a waiver of the OCC's competitive procurement rules and (iii) finding that the one-year extension of the gas transportation and storage agreement complies with the OCC's affiliate transaction rules. On September 14, 2012, OG&E filed a settlement agreement in which all parties to this matter agreed to the one-year extension of the Enogex contract and cost recovery from ratepayers at the rates currently in effect. On October 25, 2012, the OCC issued an order approving the settlement agreement.

Enogex 2011 Fuel Filing

On February 28, 2011, Enogex submitted its annual fuel filing to establish the fixed fuel percentages for its East Zone and West for the 2011 fuel year (April 1, 2011 through March 31, 2012). Along with the revised fuel percentages, Enogex also requested authority to revise its statement of operating conditions to permanently change the annual filing date to February 28. The deadline for interventions and protests to Enogex's filing was March 15, 2011, and no protests were filed. On July 6, 2012, Enogex submitted a compliance filing to synchronize the 2011 fuel filing with the revised statement of operating conditions filed on May 31, 2012 in compliance with the FERC's order approving Enogex's 2011 Section 311 rate case settlement discussed above. In October 2012, the FERC accepted Enogex's proposed zonal fuel percentages.

Enogex 2012 Fuel Filing

On February 24, 2012, Enogex submitted its annual fuel filing to establish the fixed fuel percentages for its East Zone and West Zone for the 2012 fuel year (April 1, 2012 through March 31, 2013). The deadline for interventions and protests on the filing was March 27, 2012. Two parties intervened in the proceeding. On July 6, 2012, Enogex submitted a compliance filing to synchronize the 2012 fuel filing with the revised statement of operating conditions filed on May 31, 2012 in compliance with the FERC's order approving Enogex's 2011 Section 311 rate case settlement discussed above. In October 2012, the FERC accepted Enogex's proposed zonal fuel percentages.

Pending Regulatory Matters

OG&E Fuel Adjustment Clause Review for Calendar Year 2010

The OCC routinely reviews the costs recovered from customers through OG&E's fuel adjustment clause. On August 19, 2011, the OCC Staff filed an application to review OG&E's fuel adjustment clause for calendar year 2010, including the prudence of OG&E's electric generation, purchased power and fuel procurement costs. OG&E responded by filing direct testimony and the minimum filing review package on October 18, 2011. On April 6, 2012 witnesses for the OCC Staff, the Oklahoma Attorney General and the Oklahoma Industrial Energy Consumers association filed responsive testimony. The witness for the Oklahoma Industrial Energy Consumers recommended that the OCC disallow recovery of approximately \$44 million of costs previously recovered through OG&E's fuel adjustment clause. These recommendations were based on allegations that OG&E's lower cost coal-fired generation was underutilized, that OG&E failed to aggressively pursue purchasing power at a cost lower than its marginal cost of generation and that OG&E should be found imprudent related to an unplanned outage at OG&E's Sooner 2 coal unit in November and December 2010. The witnesses for the OCC Staff and the Oklahoma Attorney General recommended that OG&E should provide additional information to allow them to reach a conclusion on their prudence review. On May 8, 2012, OG&E filed rebuttal testimony supporting the appropriateness of OG&E's use of coal-fired generation during 2010, OG&E's practice regarding purchasing power and the appropriateness of OG&E's management actions related to the Sooner 2 outage. A hearing on the merits was conducted on July 17 and 18, 2012. The witness for the Oklahoma Attorney General offered no further testimony. The witness for the OCC Staff recommended approval of OG&E's actions related to utilization of coal plants and practices related to purchasing power but recommended that OG&E refund \$3 million to customers because of the Sooner 2 outage. On September 26, 2012, the administrative law judge recommended that the OCC find that for the calendar year 2010 OG&E's generation, purchase power and fuel procurement processes and costs, including the cost of replacement power for the Sooner 2 outage, were prudent and no disallowance for any of these expenses is warranted. A hearing in this matter is scheduled on November 8, 2012. OG&E expects to receive an order from the OCC in November 2012.

OG&E SPP Transmission Projects

On January 31, 2012, the SPP approved the Integrated Transmission Plan Near Term and Integrated Transmission Plan 10-year projects. These plans include two projects to be built by OG&E: (i) construction of 47 miles of transmission line from OG&E's Gracemont substation in a northwestern direction to a companion transmission line to be built by American Electric Power to its Elk City substation at an estimated cost of \$75 million for OG&E, which is expected to be in service by early 2018, and (ii) construction of 126 miles of transmission line from OG&E's Woodward District Extra High Voltage substation in a southeastern direction to OG&E's Cimarron substation and construction of a new substation on this transmission line, the Mathewson substation, at an estimated cost of \$210 million for OG&E, which is expected to be in service by early 2021. On April 9, 2012, OG&E received a notice to construct these projects from the SPP. On June 26, 2012, OG&E responded to the SPP that OG&E will construct the projects discussed above and is moving forward with more detailed cost estimates that must be reviewed and approved by the SPP.

Market-Based Rate Authority

On June 29, 2012, OG&E filed its triennial market power update with the FERC to retain its market-based rate authorization in the SPP's energy imbalance service market but to surrender its market-based rate authorization for any market-based rate sales outside the SPP's energy imbalance service market. A FERC order is pending.

OG&E Fuel Adjustment Clause Review for Calendar Year 2011

On July 31, 2012, the OCC Staff filed an application for a public hearing to review and monitor OG&E's application of the 2011 fuel adjustment clause. OG&E filed the necessary information and documents needed to satisfy the OCC's minimum filing requirement rules on October 1, 2012. A procedural schedule has not been established in this matter.

OG&E Crossroads Wind Farm

As previously reported, OG&E signed memoranda of understanding in February 2010 for approximately 197.8 megawatts of wind turbine generators and certain related balance of plant engineering, procurement and construction services associated with the Crossroads wind farm. On August 31, 2012, OG&E filed an application with the APSC requesting approval to recover the Arkansas portion of the costs of the Crossroads wind farm through a rider until such costs are included in OG&E's base rates as part of its next general rate proceeding. A hearing in this matter is scheduled to begin January 18, 2013. The OCC had previously authorized recovery of the Oklahoma portion of these costs.

Enogex FERC Section 311 2011 Rate Case

Enogex currently has two zones under its Section 311 rate structure - an East Zone and a West Zone. On January 28, 2011, Enogex submitted a new rate filing to the FERC to set the maximum rate for a new firm Section 311 transportation service in the West Zone of its system and to revise the currently effective maximum rates for Section 311 interruptible transportation service in the East Zone and West Zone. Along with establishing the rate for a new firm service in the West Zone, Enogex's filing requested a decrease in the maximum interruptible zonal rates in the West Zone and to retain the currently effective rates for firm and interruptible services in the East Zone. Enogex reserved the right to implement the higher rates for firm and interruptible services in the East Zone supported by the cost of service to the extent an expeditious settlement agreement in this matter cannot be reached in the proceeding. Enogex proposed that the rates be placed into effect on March 1, 2011. On January 10, 2012, Enogex filed a settlement agreement in this matter with the FERC. On May 4, 2012, the FERC issued an order approving the settlement agreement in this matter, subject to the submission of a compliance filing to place the settlement rates into effect as of March 1, 2011, which compliance filing was subsequently filed on May 31, 2012. The FERC also requested that Enogex file a revised statement of operating conditions, which was subsequently filed on May 31, 2012. As part of the settlement agreement in this matter, Enogex made refunds of \$0.2 million to affected customers on June 15, 2012 and submitted a report to the FERC on July 6, 2012 showing the refund payment calculation. A FERC order is pending.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Introduction

The Company is an energy and energy services provider offering physical delivery and related services for both electricity and natural gas primarily in the south central United States. The Company conducts these activities through three business segments: (i) electric utility, (ii) natural gas transportation and storage and (iii) natural gas gathering and processing.

The electric utility segment generates, transmits, distributes and sells electric energy in Oklahoma and western Arkansas. Its operations are conducted through OG&E and are subject to regulation by the OCC, the APSC and the FERC. OG&E was incorporated in 1902 under the laws of the Oklahoma Territory. OG&E is the largest electric utility in Oklahoma and its franchised service territory includes the Fort Smith, Arkansas area. OG&E sold its retail natural gas business in 1928 and is no longer engaged in the natural gas distribution business.

Enogex is a provider of integrated natural gas midstream services. Enogex is engaged in the business of gathering, processing, transporting and storing natural gas. Most of Enogex's natural gas gathering, processing, transportation and storage assets are strategically located in the Arkoma and Anadarko basins of Oklahoma and the Texas Panhandle. During the third quarter of 2012, the operations and activities of EER were fully integrated with those of Enogex through the creation of a new commodity management organization. This new organization is intended to facilitate the execution of Enogex's strategy through an enhanced focus on asset optimization and active management of its growing natural gas, NGLs and condensate positions. The operations of EER, including marketing and trading activities, have been included in the natural gas transportation and storage segment and

have been restated for all prior periods presented. Enogex's operations are now organized into two business segments: (i) natural gas transportation and storage and (ii) natural gas gathering and processing. At September 30, 2012, the Company indirectly owns an 81.3 percent membership interest in Enogex Holdings, which in turn owns all of the membership interests in Enogex LLC. As a result of contributions made by OGE Energy and the ArcLight group subsequent to September 30, 2012, the Company indirectly owns a 79.9 percent membership interest in Enogex Holdings at October 31, 2012.

Overview

Company Strategy

The Company's mission is to fulfill its critical role in the nation's electric utility and natural gas midstream pipeline infrastructure and meet individual customers' needs for energy and related services in a safe, reliable and efficient manner. The Company's corporate strategy is to continue to maintain its existing business mix and diversified asset position of its regulated electric utility business and unregulated natural gas midstream business while providing competitive energy products and services to customers primarily in the south central United States as well as seeking growth opportunities in both businesses. Additionally, the Company wants to achieve a premium valuation of its businesses relative to its peers, grow earnings per share with a stable earnings pattern, create a high performance culture and achieve desired outcomes with target stakeholders. The Company's financial objectives include a long-term annual earnings growth rate of five to seven percent on a weather-normalized basis, maintaining a strong credit rating as well as increasing the dividend to meet the Company's dividend payout objectives. The Company's target payout ratio is to pay out dividends no more than 60 percent of its normalized earnings on an annual basis. The target payout ratio has been determined after consideration of numerous factors, including the largely retail composition of the Company's shareholder base, the Company's financial position, the Company's growth targets, the composition of the Company's assets and investment opportunities. The Company believes it can accomplish these financial objectives by, among other things, pursuing multiple avenues to build its business, maintaining a diversified asset position, continuing to develop a wide range of skills to succeed with changes in its industries, providing products and services to customers efficiently, managing risks effectively and maintaining strong regulatory and legislative relationships.

Summary of Operating Results

Three Months Ended September 30, 2012 as Compared to Three Months Ended September 30, 2011

Net income attributable to OGE Energy was \$185.5 million, or \$1.87 per diluted share, during the three months ended September 30, 2012 as compared to \$178.7 million, or \$1.80 per diluted share, during the same period in 2011. The increase in net income attributable to OGE Energy of \$6.8 million, or 3.8 percent, during the three months ended September 30, 2012 as compared to the same period in 2011 was primarily due to:

- an increase in net income at OG&E of \$8.6 million, or 5.4 percent, or \$0.09 per diluted share of the Company's common stock, primarily due to a higher gross margin and lower income tax expense. The higher gross margin was primarily due to increased recovery of investments, increased transmission revenue and new customer growth partially offset by milder weather in OG&E's service territory. The increase in gross margin was partially offset by higher other operation and maintenance expense, higher depreciation and amortization expense and lower allowance for equity funds used during construction; and
- a decrease in net income attributable to Enogex of \$1.4 million, or 7.3 percent, or \$0.01 per diluted share of the Company's common stock, primarily due to higher depreciation and amortization expense, higher taxes other than income, higher interest expense and OGE Energy's membership interest in Enogex Holdings partially offset by a higher gross margin related to (i) increased gathering rates associated with ongoing expansion projects and from acquired gas gathering assets effective in November 2011 and September 2012 and (ii) increased inlet volumes

partially offset by lower average natural gas prices and lower average NGLs prices. Also contributing to the increase in net income was an impairment related to the Atoka processing plant in 2011.

Non-Recurring Item. During the three months ended September 30, 2012, Enogex had a decrease in net income of \$2.3 million related to sales taxes on the gas gathering acquisitions in August 2012, as discussed in Note 2 of Notes to Condensed Consolidated Financial Statements, which Enogex does not consider to be reflective of its ongoing performance.

Nine Months Ended September 30, 2012 as Compared to Nine Months Ended September 30, 2011

Net income attributable to OGE Energy was \$316.5 million, or \$3.20 per diluted share, during the nine months ended September 30, 2012 as compared to \$306.5 million, or \$3.09 per diluted share, during the same period in 2011. The increase in net income attributable to OGE Energy of \$10.0 million, or 3.3 percent, during the nine months ended September 30, 2012 as compared to the same period in 2011 was primarily due to:

an increase in net income at OG&E of \$9.1 million, or 3.7 percent, or \$0.09 per diluted share of the Company's common stock, primarily due to a higher gross margin and lower income tax expense. The higher gross margin was primarily due to increased recovery of investments and increased transmission revenue partially offset by milder weather in OG&E's service territory. The increase in gross margin was partially offset by higher other operation and maintenance expense, higher depreciation and amortization expense, higher interest expense and lower allowance for equity funds used during construction; and

an increase in net income attributable to Enogex of \$0.7 million, or 1.1 percent, or \$0.01 per diluted share of the Company's common stock, primarily due to a higher gross margin related to (i) increased gathering rates and volumes associated with ongoing expansion projects and increased volumes from acquired gas gathering assets effective in November 2011 and September 2012 and (ii) increased inlet volumes partially offset by lower average natural gas prices and lower average NGLs prices. Also contributing to the increase in net income was a gain on insurance proceeds in 2012 and an impairment related to the Atoka processing plant in 2011. These increases in net income were partially offset by higher other operation and maintenance expense, higher depreciation and amortization expense, lower other income primarily due to the recognition of a gain related to the sale of the Harrah processing plant and the associated Wellston and Davenport gathering assets in 2011, higher interest expense and OGE Energy's membership interest in Enogex Holdings.

Non-Recurring Items. During the nine months ended September 30, 2012, Enogex had an increase in net income of \$4.6 million due to a gain on insurance proceeds related to the reimbursement of costs incurred to replace the damaged train at the Cox City natural gas processing plant partially offset by a decrease in net income of \$2.3 million related to sales taxes on the gas gathering acquisitions in August 2012, as discussed in Note 2 of Notes to Condensed Consolidated Financial Statements, which Enogex does not consider to be reflective of its ongoing performance. During the nine months ended September 30, 2011, Enogex had an increase in net income of \$2.3 million relating to the sale of the Harrah processing plant and the associated Wellston and Davenport gathering assets in April 2011, which Enogex does not consider to be reflective of its ongoing performance.

Recent Developments and Regulatory Matters

OG&E SPP Transmission Projects

In 2007, the SPP notified OG&E to construct 44 miles of a new 345 kilovolt transmission line originating at OG&E's existing Sooner 345 kilovolt substation and proceeding generally in a northerly direction to the Oklahoma/Kansas Stateline (referred to as the Sooner-Rose Hill project). At the Oklahoma/Kansas Stateline, the line connects to the companion line constructed in Kansas by Westar Energy. The transmission line was placed in service in April 2012. The total capital expenditures associated with this project were \$45 million.

In January 2009, OG&E received notification from the SPP to begin construction on 50 miles of a new 345 kilovolt transmission line and substation upgrades at OG&E's Sunnyside substation, among other projects. In April 2009, Western Farmers Electric Cooperative assigned to OG&E the construction of 50 miles of line designated by the SPP to be built by Western Farmers Electric Cooperative. The new line extends from OG&E's Sunnyside substation near Ardmore, Oklahoma, 123.5 miles to the Hugo substation owned by Western Farmers Electric Cooperative near Hugo, Oklahoma. The transmission line was completed in April 2012. The total capital expenditures associated with this

project were \$157 million.

As discussed in Note 14 of Notes to Condensed Consolidated Financial Statements, the OCC approved a settlement agreement in OG&E's 2011 Oklahoma rate case filing that included an expedited procedure for recovering the costs of the two projects. On July 31, 2012, OG&E filed an application with the OCC requesting an order authorizing recovery for the two projects through the SPP transmission systems additions rider. On October 2, 2012, all parties signed a settlement agreement in this matter which stated: (i) the parties agree not to oppose requested relief sought by OG&E, (ii) OG&E will host meetings to discuss the SPP's transmission planning process, including any future transmission projects for which OG&E has received a notice to construct from the SPP, and (iii) there will be opportunities for parties to provide input related to transmission planning studies that the SPP performs to identify future transmission projects. On October 25, 2012, the OCC issued an order approving the settlement agreement and granting OG&E cost recovery for the two projects. OG&E initiated cost recovery beginning with the first billing cycle in November 2012.

31

OG&E Request for Prudence Determination and Waiver of Competitive Bid Rules for One-Year Extension of Enogex Gas Transportation and Storage Agreement

On August 9, 2012, OG&E filed an application with the OCC requesting: (i) an order finding that a one-year extension of OG&E's gas transportation and storage agreement with Enogex is prudent, (ii) a waiver of the OCC's competitive procurement rules and (iii) finding that the one-year extension of the gas transportation and storage agreement complies with the OCC's affiliate transaction rules. On September 14, 2012, OG&E filed a settlement agreement in which all parties to this matter agreed to the one-year extension of the Enogex contract and cost recovery from ratepayers at the rates currently in effect. On October 25, 2012, the OCC issued an order approving the settlement agreement.

OG&E Fuel Adjustment Clause Review for Calendar Year 2010

The OCC routinely reviews the costs recovered from customers through OG&E's fuel adjustment clause. On August 19, 2011, the OCC Staff filed an application to review OG&E's fuel adjustment clause for calendar year 2010, including the prudence of OG&E's electric generation, purchased power and fuel procurement costs. OG&E responded by filing direct testimony and the minimum filing review package on October 18, 2011. On April 6, 2012 witnesses for the OCC Staff, the Oklahoma Attorney General and the Oklahoma Industrial Energy Consumers association filed responsive testimony. The witness for the Oklahoma Industrial Energy Consumers recommended that the OCC disallow recovery of approximately \$44 million of costs previously recovered through OG&E's fuel adjustment clause. These recommendations were based on allegations that OG&E's lower cost coal-fired generation was underutilized, that OG&E failed to aggressively pursue purchasing power at a cost lower than its marginal cost of generation and that OG&E should be found imprudent related to an unplanned outage at OG&E's Sooner 2 coal unit in November and December 2010. The witnesses for the OCC Staff and the Oklahoma Attorney General recommended that OG&E should provide additional information to allow them to reach a conclusion on their prudence review. On May 8, 2012, OG&E filed rebuttal testimony supporting the appropriateness of OG&E's use of coal-fired generation during 2010, OG&E's practice regarding purchasing power and the appropriateness of OG&E's management actions related to the Sooner 2 outage. A hearing on the merits was conducted on July 17 and 18, 2012. The witness for the Oklahoma Attorney General offered no further testimony. The witness for the OCC Staff recommended approval of OG&E's actions related to utilization of coal plants and practices related to purchasing power but recommended that OG&E refund \$3 million to customers because of the Sooner 2 outage. On September 26, 2012, the administrative law judge recommended that the OCC find that for the calendar year 2010 OG&E's generation, purchase power and fuel procurement processes and costs, including the cost of replacement power for the Sooner 2 outage, were prudent and no disallowance for any of these expenses is warranted. A hearing in this matter is scheduled on November 8, 2012. OG&E expects to receive an order from the OCC in November 2012.

OG&E Smart Grid Project

As previously reported, OG&E filed an application with the APSC requesting pre-approval for system-wide deployment of smart grid technology and a recovery rider, including a credit for the Smart Grid grant awarded by the U.S. Department of Energy under the American Recovery and Reinvestment Act of 2009. On August 3, 2011, the APSC issued an order in this matter approving the settlement agreement. On August 31, 2012, the APSC issued an order authorizing implementation of the rider beginning with the first billing cycle in September 2012 through December 2012.

Enogex Western Oklahoma / Texas Panhandle Gathering and Processing System Expansions

In August 2012, Enogex completed construction of its cryogenic processing plant in Wheeler County, Texas, which added 200 MMcf/d of rich gas processing capacity to Enogex's system, and is supported by the installation of 9,400

horsepower of field compression, as well as 6,000 horsepower of inlet compression to facilitate additional flexibility in the operation of Enogex's "super-header" gathering system. The remainder of the inlet compression facilities is expected to be in service during the second quarter of 2013.

In support of significant long-term acreage dedications from its customers in the area, Enogex has expanded its gathering infrastructure in western Oklahoma. These expansions include the installation of 39,700 horsepower of low pressure compression and 235 miles of gathering pipe across the area, which was completed during the third quarter of 2012.

In support of significant long-term acreage dedications from its customers in the area, Enogex is expanding its gathering infrastructure in southern Oklahoma. These expansions include approximately 90 miles of gathering pipeline and 22,000 horsepower of compression, which are expected to be in service by the end of the first quarter of 2013.

Enogex is constructing a 200 MMcf/d cryogenic processing plant in Custer County, Oklahoma. The new plant will be supported by 6,000 horsepower of inlet compression and four miles of transmission pipeline. This plant will be connected to the Enogex "super-header" gathering system and is expected to be in service by the end of 2013.

The capital expenditures related to the above projects are presented in the summary of capital expenditures for known and committed projects in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources - Future Capital Requirements and Financing Activities."

Gas Gathering Acquisitions

On August 1, 2012, Enogex entered into agreements with Chesapeake Midstream Gas Services, L.L.C. and Mid-America Midstream Gas Services, L.L.C., wholly-owned subsidiaries of Access Midstream Partners, L.P. and Chesapeake Midstream Development, L.P., respectively, pursuant to which Enogex agreed to acquire approximately 235 miles of natural gas gathering pipelines, right-of-ways and certain other midstream assets that provide natural gas gathering services in the greater Granite Wash area. The transactions closed on August 31, 2012. The aggregate purchase price for these transactions was approximately \$80.5 million including reimbursement for certain permitted capital expenditures incurred during the period beginning June 1, 2012 and ending August 31, 2012. Enogex utilized cash generated from operations and bank borrowings to fund the purchase. The purchase price is subject to certain post-closing adjustments. Enogex expects to complete the purchase price allocation for these transactions in the fourth quarter of 2012. In addition, Enogex also incurred acquisition-related costs of \$3.8 million for sales tax, which are included in taxes other than income. The Company believes that the transactions will provide Enogex with key new opportunities in the greater Granite Wash area.

In connection with these agreements, Enogex entered into a gas gathering and processing agreement with Chesapeake effective September 1, 2012 pursuant to which Enogex will provide fee-based natural gas gathering, compression, processing and transportation services to Chesapeake with respect to certain acreage dedicated by Chesapeake. Enogex projects additional capital expenditures for the construction of gathering and compression assets associated with these agreements through the remainder of 2012 and 2013.

The capital expenditures related to the above agreements are presented in the summary of capital expenditures for known and committed projects in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources - Future Capital Requirements and Financing Activities."

2012 Outlook

The Company's 2012 earnings guidance is unchanged between approximately \$337 million and \$357 million of net income, or \$3.40 to \$3.60 per average diluted share. Certain key factors and assumptions previously disclosed have changed and are listed below. All other factors and assumptions are unchanged from those included in the earnings guidance in the Company's Form 10-Q for the quarters ended March 31, 2012 and June 30, 2012.

Key assumptions for 2012 include:

OG&E

The Company projects OG&E to earn at the upper end of the earnings guidance range between approximately \$258 million to \$268 million of net income, or \$2.60 to \$2.70 per average diluted share in 2012 assuming normal weather patterns for the remainder of the year. The primary reason for the change to the upper end of the earnings guidance was favorable weather experienced in the third quarter of 2012, which increased the gross margin by approximately \$11 million.

OG&E has significant seasonality in its earnings. OG&E typically shows minimal earnings in the first and fourth quarters with a majority of earnings in the third quarter due to the seasonal nature of air conditioning demand.

Enogex

The Company's 2012 earnings projection for Enogex is unchanged and is between approximately \$80 million to \$95 million of net income, or \$0.80 to \$0.95 per average diluted share, net of noncontrolling interest, and is based on the following assumptions:

Key factors affecting the gathering gross margin forecast are:

33

Assumed increase of four to six percent (down from the previous forecast) of 10 to 12 percent in gathered volumes over 2011 due primarily to the delay in natural gas volume production from wells on certain Enogex acreage dedications.

EBITDA is a supplemental non-GAAP financial measure used by external users of the Company's financial statements such as investors, commercial banks and others; therefore, the Company has included the table below which provides a reconciliation of projected EBITDA to projected net income attributable to Enogex Holdings at the midpoint of Enogex Holdings' earnings assumptions for 2012, which does not include the effect of income taxes whereas OGE Energy's portion of Enogex Holdings' net income included in OGE Energy's earnings guidance does reflect the effect of income taxes. Enogex Holding's net income shown in the EBITDA table does not include the effect of income taxes because Enogex Holdings is a partnership and is not subject to income taxes. Each partner is responsible for paying their own income taxes. For a discussion of the reasons for the use of EBITDA, as well as its limitations as an analytical tool, see "Non-GAAP Financial Measure" below.

Reconciliation of projected EBITDA to projected net income attributable to Enogex Holdings

(In millions)	Twelve Months Ended December 31, 2012 (A)(B)
Net income attributable to Enogex Holdings	\$ 176
Add:	
Interest expense, net	32
Depreciation and amortization expense (C)	100
EBITDA	\$ 308
OGE Energy's portion	\$ 250

(A) Based on midpoint of 2012 guidance.

(B) As of November 1, 2010, Enogex Holdings' earnings are no longer subject to tax (other than Texas state margin taxes) and are taxable at the individual partner level.

(C) Includes amortization of certain customer-based intangible assets associated with the acquisition from Cordillera Energy Partners III, LLC in November 2011, which is included in gross margin for financial reporting purposes.

Results of Operations

The following discussion and analysis presents factors that affected the Company's consolidated results of operations for the three and nine months ended September 30, 2012 as compared to the same period in 2011 and the Company's consolidated financial position at September 30, 2012. Due to seasonal fluctuations and other factors, the Company's operating results for the three and nine months ended September 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012 or for any future period. The following information should be read in conjunction with the Condensed Consolidated Financial Statements and Notes thereto. Known trends and contingencies of a material nature are discussed to the extent considered relevant.

(In millions except per share data)	Three Months Ended		Nine Months Ended	
	September 30, 2012	2011	September 30, 2012	2011
Operating income	\$304.0	\$299.7	\$579.6	\$549.8
Net income attributable to OGE Energy	\$185.5	\$178.7	\$316.5	\$306.5
Basic average common shares outstanding	98.7	98.0	98.5	97.9
Diluted average common shares outstanding	99.1	99.3	98.9	99.2
Basic earnings per average common share attributable to OGE Energy common shareholders	\$1.88	\$1.82	\$3.21	\$3.13
Diluted earnings per average common share attributable to OGE Energy common shareholders	\$1.87	\$1.80	\$3.20	\$3.09
Dividends declared per common share	\$0.3925	\$0.3750	\$1.1775	\$1.1250

In reviewing its consolidated operating results, the Company believes that it is appropriate to focus on operating income as reported in its Condensed Consolidated Statements of Income, as operating income indicates the ongoing profitability of the Company excluding the cost of capital and income taxes.

Operating Income (Loss) by Business Segment

(In millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2012	2011	2012	2011
OG&E (Electric Utility)	\$258.0	\$258.7	\$425.6	\$418.0
Enogex (Natural Gas Midstream Operations)				
Transportation and storage (A)	14.5	18.4	41.1	43.9
Gathering and processing	30.7	22.7	111.3	87.7
Other Operations (B)	0.8	(0.1)	1.6	0.2
Consolidated operating income	\$304.0	\$299.7	\$579.6	\$549.8

(A) During the third quarter of 2012, the operations and activities of EER were fully integrated with those of Enogex through the creation of a new commodity management organization. The operations of EER, including marketing and trading activities, have been included in the natural gas transportation and storage segment and have been restated for all prior periods presented.

(B) Other Operations primarily includes the operations of the holding company and consolidating eliminations.

The following operating income analysis by business segment includes intercompany transactions that are eliminated in the Condensed Consolidated Financial Statements.
