### RMR Funds June 30, 2008

#### To our shareholders,

August 27, 2008

We are pleased to present you with our 2008 semi-annual report for our seven closed end funds:

RMR Real Estate Fund (AMEX: RMR), which began operations in December 2003, beginning on page 2;

RMR Hospitality and Real Estate Fund (AMEX: RHR), which began operations in April 2004, beginning on page 20;

RMR F.I.R.E. Fund (AMEX: RFR), which began operations in November 2004, beginning on page 38;

RMR Preferred Dividend Fund (AMEX: RDR), which began operations in May 2005, beginning on page 56;

RMR Asia Pacific Real Estate Fund (AMEX: RAP), which began operations in May 2006, beginning on page 72;

RMR Asia Real Estate Fund (AMEX: RAF), which began operations in May 2007, beginning on page 87; and

RMR Dividend Capture Fund (AMEX: RCR), which began operations in December 2007, beginning on page 102.

We invite you to read through the information contained in this report and to view our website at www.rmrfunds.com.

Sincerely,

Adam D. Portnoy President

### RMR Real Estate Fund June 30, 2008

To our shareholders,

In the pages that follow, you will find data summarizing our financial results for the six months ended June 30, 2008, and our financial position as of June 30, 2008.

#### **Relevant Market Conditions**

*Real Estate Industry Fundamentals.* Despite a slowing economy and negative sentiment regarding the direction of the financial markets, real estate fundamentals remained stable during the first half of 2008. Occupancy levels held up and rents continued to increase, albeit at a slower pace. Property sales, however, slowed substantially as a result of tighter lending standards and wide differences between buyers and sellers regarding valuations. With limited transactions taking place, it is hard to estimate how much commercial property values have declined. Some estimates put the figure somewhere between negative 10% to negative 15%. What is clear, however, is that property values are no longer at levels seen in early 2007. Over the next six to twelve months, we expect downward pricing pressure to continue on commercial real estate.

For the balance of the year, we believe the economy will likely continue to struggle due to higher food and energy prices, lack of employment growth and a weak housing market. Lending will continue to be restricted, hampering overall economic growth as financial institutions continue to strengthen their balance sheets.

*Real Estate Industry Technicals.* Throughout the first half of the year, the REIT market continued to exhibit high volatility. REITs started the year on a negative note, down almost 12% in mid-January, and rebounded sharply during March and April (up 6% during each month) following the Fed's and J.P. Morgan's rescue of Bear Stearns. Concern about additional write-offs from financial institutions sent the REIT market, along with other financial services companies, into negative territory during the month of June. REITs were down 11% in June and finished the first half of the year down 3.5%. Despite the volatility, REIT dedicated funds saw \$3 billion of inflows during the first six months of the year, an encouraging sign after outflows of more than \$9 billion from the period March to December 2007.

#### Fund Strategies, Techniques and Performance

Our primary investment objective is to earn and pay a high level of current income to our common shareholders by investing in real estate companies, including REITs. Our secondary investment objective is capital appreciation. There can be no assurances that we will meet our investment objectives.

During the six months ended June 30, 2008, our total return on net asset value, or NAV (including NAV changes and assuming a hypothetical reinvestment of distributions at NAV), was negative 8.1%. During that same period, the total return for the MSCI US REIT Total Return Index (an unmanaged index of REIT common stocks) was negative 3.5% and the total return for the Merrill Lynch REIT Preferred Index (an unmanaged index of REIT preferred stocks) was 7.6%. We believe these two indices are relevant to us because

our investments, excluding short term investments, as of June 30, 2008, included 61.9% REIT common stocks and 22.5% REIT preferred stocks. The S&P 500 Index (an unmanaged index published as Standard and Poor's Composite Index of 500 common stocks) total return for the six months ended June 30, 2008 was negative 11.9%.

Our investment allocation to the apartment REITs contributed positively to the fund's performance, perhaps because this subsector has benefited from a downturn in the housing market, which has resulted in more people renting rather than buying homes. Our holdings in the hotel real estate subsector detracted from performance based on expectations of lower earnings growth.

#### **Recent Developments**

Recently, credit markets, including the market for auction rate securities, such as the Fund's \$50 million of preferred shares, have experienced a liquidity crisis. To date, no auctions for the Fund's preferred shares have failed; however, an affiliate of the Fund's lead broker dealer for its preferred shares has purchased a significant amount of the Fund's preferred shares in the auctions. Please see the notes to the financial statements for more information.

Because of the decline in NAV during the last 15 months and the Fund's relatively small size, the Fund's Board of Trustees is currently considering actions to reduce its expenses and otherwise enhance value for the Fund's shareholders. To this end, on August 26, 2008 we filed a preliminary joint proxy statement / prospectus with the Securities and Exchange Commission in connection with a proposed combination of the Fund with two other closed end RMR funds (RMR Hospitality and Real Estate Fund and RMR F.I.R.E. Fund). Both are managed by our advisor, RMR Advisors, Inc. If the combinations receive all shareholder approvals that are required and proceed, all three funds will become one new fund, RMR Real Estate Income Fund, a newly formed Delaware statutory trust which also will be managed by our advisor. The process of seeking approvals and completing the proposed combinations may take several months, and the combinations may or may not occur for various reasons.

Thank you for your continued support. For more information, please view our website, at www.rmrfunds.com.

Sincerely,

Adam D. Portnoy President

August 27, 2008

Portfolio holdings by sub-sector as a percentage of investments (as of June 30, 2008)\*

REITs	
Health care	19%
Hospitality	18%

Asset coverage per share equals net assets attributable to common shares plus the liquidation preference of the preferred shares divided by the total number of preferred shares outstanding at the end of the period.

See notes to financial statements.

### **RMR Real Estate Fund** Notes to Financial Statements

#### June 30, 2008 (unaudited)

### Note A

#### (1) Organization

RMR Real Estate Fund, or the Fund, was organized as a Massachusetts business trust on July 2, 2002, and is registered under the Investment Company Act of 1940, as amended, or the 1940 Act, as a diversified closed-end management investment company. The Fund had no operations prior to December 18, 2003, other than matters relating to the Fund's establishment and registration of the Fund's common shares under the Securities Act of 1933.

#### (2) Interim Financial Statements

The accompanying June 30, 2008 financial statements have been prepared without audit. The Fund believes that disclosures made are adequate to make the information presented not misleading. In the opinion of the Fund's management, all adjustments, which include normal recurring adjustments considered necessary for a fair presentation, have been included. The Fund's operating results for this interim period are not necessarily indicative of the results that may be expected on an annual basis in the future.

#### (3) Use of Estimates

Preparation of these financial statements in conformity with accounting principles generally accepted in the United States requires the Fund's management to make estimates and assumptions that may affect the amounts reported in the financial statements and related notes. The actual results could differ from these estimates particularly for reasons described in Note A (8), and for other reasons.

#### (4) Portfolio Valuation

Investment securities of the Fund are valued at the latest sales price whenever that price is readily available on that day; securities for which no sales were reported on that day, unless otherwise noted, are valued at the average of the closing bid and ask prices on that day. Securities traded primarily on the NASDAQ Stock Market, or NASDAQ, are normally valued by the Fund at the NASDAQ Official Closing Price, or NOCP, provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., eastern time, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Some fixed income securities may be valued using pricing provided by a pricing service. Any of the Fund's securities which are not readily marketable, which are not traded or which have other characteristics of illiquidity are valued by the Fund at fair value as determined in good faith under the supervision of the Fund's board of trustees. Numerous factors may be considered when determining fair value of a security, including cost at date of purchase, type of security, the nature and duration of restrictions on disposition of the security and whether the issuer of the security being fair valued has other securities of the same type outstanding. Short term debt securities with less than 60 days until maturity may be valued at cost plus interest accrued, which approximates market value.

(5) Fair Value Measurements

The Fund has adopted the provisions of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements, or FAS 157, effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an

investment in a timely transaction to an independent buyer in the principal or most advantageous market for the investment. FAS 157 established a three tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk; for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the six months ended June 30, 2008 maximized the use of observable inputs and minimized the use of unobservable inputs. The Fund utilized broker quotes, company financial information and other market indicators to value the securities whose prices were not readily available.

The following is a summary of the inputs used as of June 30, 2008, in valuing the Fund's investments carried at value:

Valuatio	on Inputs	Investments in Securities
Level 1 Level 2 Level 3	Quoted prices Other significant observable inputs Significant unobservable inputs	\$ 122,325,546 280,000 3,256,000
Total		\$ 125,861,546

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining value:

	Investments in Securities Characterized as Level 3
Balance as of 12/31/07 Accrued discounts/premiums	\$ 4,378,000
Realized gain/loss and change in unrealized appreciation/depreciation Net purchases/sales Net transfers in and/or out of Level 3	(1,122,000)
Balance, as of 06/30/08	\$ 3,256,000
Net change in unrealized appreciation/depreciation from investments still held as of 06/30/08	\$ (1,122,000)

#### (6) Securities Transactions and Investment Income

Securities transactions are recorded on a trade date basis. Dividend income is recorded on the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and accretion of discount on short term investments, is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on an identified cost basis.

#### (7) Taxes

The Fund has qualified and intends to qualify in the future as a "regulated investment company" and to comply with the applicable provisions of subchapter M of the Internal Revenue Code of 1986, as amended, so that it will generally not be subject to federal income tax. However, the Fund may be subject to a 4% excise tax to the extent the Fund does not distribute substantially all taxable earnings each year.

Some foreign governments may subject the Fund's investment income and securities sales to withholding or other taxes. For the six months ended June 30, 2008, \$420 of foreign taxes has been withheld from distributions to the Fund and has been recorded as a reduction of dividend income

#### (8) Distributable Earnings

The Fund earns income, net of expenses, daily on its investments. It is the policy of the Fund to pay a stable distribution amount to common shareholders on a monthly basis and distributions to Fund shareholders are declared pursuant to this policy. On July 11, 2008, the Fund declared regular monthly distributions of \$0.10 per common share payable in July, August and September 2008. Distributions to shareholders are recorded on the ex-dividend date. The Fund's distributions may consist of ordinary income (net investment income and short term capital gains), long term capital gains and return of capital. To the extent the Fund's net realized capital gains, if any, can be offset by capital loss carry-forwards, it is the policy of the Fund not to distribute such gains. Distributions to preferred shareholders are determined as described in Note D.

The Fund has substantial investments in real estate investment trusts, or REITs, which are generally not subject to federal income taxes. Distributions that the Fund receives from REITs can be classified as ordinary income, capital gain income or return of capital by the REITs that make these distributions to the Fund. However, it is not possible to characterize distributions received from REITs during interim periods because the issuers do not report their tax characterization until subsequent to year end. Final characterization of the Fund's 2008 distributions to shareholders is also dependent upon the magnitude or timing of the Fund's securities transactions prior to year end. Therefore it is likely that some portion of the Fund's 2008 investment income and distributions to shareholders will be recharacterized as long term capital gain and return of capital for financial statement and federal income tax purposes subsequent to year end and reflected accordingly in the Fund's year end financial statements.

Although subject to adjustments, the cost, gross unrealized appreciation and unrealized depreciation of the Fund's investments for federal income tax purposes as of June 30, 2008, are as follows:

Cost	\$ 147,497,227
Gross unrealized appreciation Gross unrealized depreciation	\$ 7,678,991 (29,314,672)
Net unrealized appreciation/(depreciation)	\$ (21,635,681)

#### (9) Concentration of Risk

Under normal market conditions, the Fund's investments are concentrated in income producing common shares, preferred shares and debt securities, including convertible preferred and debt securities, issued by real estate companies and REITS. The value of Fund shares may fluctuate more than the shares of a fund not concentrated in the real estate industry due to economic, legal, regulatory, technological or other developments affecting the United States real estate industry.

#### Note B

#### Advisory and Administration Agreements and Other Transactions with Affiliates

The Fund has an advisory agreement with RMR Advisors, Inc., or RMR Advisors, to provide the Fund with a continuous investment program, to make day-to-day investment decisions and to generally manage the business affairs of the Fund in accordance with its investment objectives and policies. Pursuant to the agreement, RMR Advisors is compensated at an annual rate of 0.85% of the Fund's average daily managed assets. Managed assets means the total assets of the Fund less liabilities other than any indebtedness entered into for purposes of leverage. For purposes of calculating managed assets, the liquidation preference of preferred shares is not considered a liability.

RMR Advisors has contractually agreed to waive a portion of its annual fee equal to 0.25% of the Fund's average daily managed assets from December 18, 2003, until December 18, 2008. The Fund incurred net advisory fees of \$405,971 during the six months ended June 30, 2008. The amount of fees waived by the Advisor was \$169,154 for the six months ended June 30, 2008.

RMR Advisors also performs administrative functions for Fund pursuant to an administration agreement with the Fund. RMR Advisors has entered into a subadministration agreement with State Street Bank and

Trust Company, or State Street, to perform substantially all fund accounting and other administrative services. Under the administration agreement, RMR Advisors is entitled to reimbursement of the cost of providing administrative services. The Fund reimbursed RMR Advisors for \$46,627 of subadministrative fees charged by State Street for the six months ended June 30, 2008.

Each trustee who is not a director, officer or employee of RMR Advisors and who is not an "interested person" of the Fund as defined under the 1940 Act is considered to be a "disinterested trustee". Disinterested trustees are each paid by the Fund an annual fee plus attendance fees for board and committee meetings. The Fund incurred \$8,900 of trustee fees and expenses during the six months ended June 30, 2008.

The Fund's board of trustees and separately the disinterested trustees authorized the Fund to make reimbursement payments to RMR Advisors for costs related to the Fund's compliance and internal audit programs. The Fund incurred \$17,344 of compliance and internal audit expense during the six months ended June 30, 2008. The Fund also participates in pooled insurance programs with RMR Advisors and other funds managed by RMR Advisors and makes payments of allocated portions of related premiums. The Fund incurred \$7,409 of insurance expense during the six months ended June 30, 2008.

### Note C

#### **Securities Transactions**

During the six months ended June 30, 2008, there were purchases and sales transactions (excluding short term securities) of \$3,398,213 and \$6,311,719 respectively. Brokerage commissions on securities transactions amounted to \$12,718 during the six months ended June 30, 2008.

### Note D

#### **Preferred Shares**

The Fund's 2,000 outstanding Series T auction preferred shares have a liquidation preference of \$25,000 per share plus an amount equal to accumulated but unpaid distributions. The preferred shares are senior to the Fund's common shares and rank on parity with any other class or series of preferred shares of the Fund as to the payment of periodic distributions, including distribution of assets upon liquidation. If the Fund does not timely cure a failure to (1) maintain asset coverage for the preferred shares as required by rating agencies, or (2) maintain asset coverage, as defined in the 1940 Act, of at least 200%, the preferred shares will be subject to redemption in an amount equal to their liquidation preference plus accumulated but unpaid distributions. The holders of the preferred shares have voting rights equal to the holders of the Fund's common shares and generally vote together with the holders of the common shares as a single class. Holders of the preferred shares, voting as a separate class, also are entitled to elect two of the Fund's trustees. The Fund pays distributions on the preferred shares at a rate set at auctions held generally every seven days. Distributions are generally payable every seven days, on the first business day following the end of a distribution period. The preferred share distribution rate was 4.13% per annum as of June 30, 2008.

To date, no auctions for preferred securities of the Fund have failed to attract sufficient clearing bids. However, an affiliate of the Fund's lead broker-dealer for its preferred securities has purchased a significant amount of the Fund's preferred securities in the auctions. If this affiliate of the Fund's lead broker-dealer had not been supporting the Fund's auctions, the auctions likely would have failed and holders of the Fund's

preferred shares would not have been able to sell their preferred shares in the auctions. There can be no assurance that this or any other affiliate of the Fund's lead broker-dealer would purchase Fund preferred shares in any future auction of Fund preferred securities or that the Fund will not have any auction for its preferred securities fail. If an auction of the Fund's preferred shares should fail, the dividend rate for the next succeeding dividend period is set according to a pre-determined formula, and the resulting rate may be higher than the rate which the Fund would otherwise pay as a result of a successful auction. In addition, if an auction fails, holders of the Fund's preferred shares may not be able to sell their preferred shares in that auction. If auctions for the Fund's preferred shares fail, or if market conditions generally frustrate the Fund's ability to enhance investment results through the investment of capital attributable to its outstanding preferred shares, such factors may necessitate a change in the form and/or amount of investment leverage used by the Fund. The Fund has no current intention to change the form or degree of investment leverage that it uses. The use of alternative forms of leverage and/or a reduction in the degree of investment leverage used by the Fund in its investment program could result in reduced investment returns for common shareholders as compared to the returns that historically have been achieved by the Fund through the use of preferred share leverage in favorable market conditions. The Fund proactively manages compliance with asset coverage and other financial ratio requirements applicable to the preferred shares. In order to facilitate compliance with such requirements, and without further notice of its intention to do so, the Fund may from time to time purchase or otherwise acquire its outstanding preferred shares in the open market, in other nondiscriminatory secondary market transactions, pursuant to tender offers or other offers to repurchase preferred shares, or in other permissible purchase transactions, and also may from time to time call or redeem preferred shares in accordance with their terms.

### Note E

#### Submission of Proposals to a Vote of Shareholders

The annual meeting of Fund shareholders was held on April 7, 2008. Following is a summary of the proposal submitted to shareholders for vote at the meeting and votes cast:

Proposal	Votes for	Votes withheld	Votes abstained	
Common and Preferred Shares				
Election of John L. Harrington as an Independent Trustee				
until the 2011 annual meeting.	6,299,696	95,660		
The following trustees' terms of office as trustee continued after	the Fund's annual	meeting: Barry M	. Portnoy, Gerard M	. Martin, Frank .
Bailey and Arthur G. Koumantzelis.

### **RMR** Hospitality and Real Estate Fund

June 30, 2008

To our shareholders,

In the pages that follow, you will find data summarizing our financial results for the six months ended June 30, 2008, and our financial position as of June 30, 2008.

#### **Relevant Market Conditions**

*Hospitality Industry Fundamentals.* Operating fundamentals for hotels experienced a greater than previously anticipated slowdown during the first half of the year. Coming into the year, industry-wide expectations for annual growth in revenue per available room, or RevPar, were in the range of 5% to 7%. However, with a slowing economy, higher fuel costs and planned reduced airline capacity, RevPar expectations are now generally flat for the full year 2008.

*Real Estate Industry Fundamentals.* Despite a slowing economy and negative sentiment regarding the direction of the financial markets, real estate fundamentals remained stable during the first half of 2008. Occupancy levels held up and rents continued to increase, albeit at a slower pace. Property sales, however, slowed substantially as a result of tighter lending standards and wide differences between buyers and sellers regarding valuations. With limited transactions taking place, it is hard to estimate how much commercial property values have declined. Some estimates put the figure somewhere between negative 10% to negative 15%. What is clear, however, is that property values are no longer at levels seen in early 2007. Over the next six to twelve months, we expect downward pricing pressure to continue on commercial real estate.

For the balance of the year, we believe the economy will likely continue to struggle due to higher food and energy prices, lack of employment growth and a weak housing market. Lending will continue to be restricted, hampering overall economic growth as financial institutions continue to strengthen their balance sheets.

*Real Estate Industry Technicals.* Throughout the first half of the year, the REIT market continued to exhibit high volatility. REITs started the year on a negative note, down almost 12% in mid-January, and rebounded sharply during March and April (up 6% during each month) following the Fed's and J.P. Morgan's rescue of Bear Stearns. Concern about additional write-offs from financial institutions sent the REIT market, along with other financial services companies, into negative territory during the month of June. REITs were down 11% in June and finished the first half of the year down 3.5%. Despite the volatility, REIT dedicated funds saw \$3 billion of inflows during the first six months of the year, an encouraging sign after outflows of more than \$9 billion from the period March to December 2007.

#### Fund Strategies, Techniques and Performance

Our primary objective is to earn and pay to our common shareholders a high level of current income by investing in hospitality and real estate companies. Our secondary objective is capital appreciation. There can be no assurance that we will achieve our investment objectives.

During the six months ended June 30, 2008, our total return on net asset value, or NAV (including NAV changes and assuming a hypothetical reinvestment of distributions at NAV), was negative 8.7%. During that same period, the total return for the MSCI US REIT Total Return Index (an unmanaged index of REIT common stocks) was negative 3.5% and the total return for the Merrill Lynch REIT Preferred Index (an unmanaged index of REIT preferred stocks) was 7.6%. We believe these two indices are relevant to us because our investments, excluding short term investments, as of June 30, 2008, included 51.4% REIT common stocks and 30.8% REIT preferred stocks. The S&P 500 Index (an unmanaged index published as Standard and Poor's Composite Index of 500 common stocks) total return for the six months ended June 30, 2008 was negative 11.9%.

As a result of the Fund's erosion in NAV and income from its investments during 2007 and 2008, the Fund's Board decided to lower the distribution rate to common shareholders in April in an effort to bring the distribution more in line with the Fund's earnings potential. During the past two years, the Fund's performance also has been impacted by the cost of litigation with a shareholder. This litigation has since been resolved.

#### **Recent Developments**

The Fund had recently been involved in litigation with one of its shareholders. The parties to this litigation entered into a settlement agreement in June 2008, and on July 1, 2008, the court granted the parties' joint motion to dismiss this litigation, effectively ending the litigation and its continuing costs to the Fund.

Recently, credit markets, including the market for auction rate securities, such as the Fund's \$28 million of preferred shares, have experienced a liquidity crisis. To date, no auctions for the Fund's preferred shares have failed; however, an affiliate of the Fund's lead broker dealer for its preferred shares has purchased a significant amount of the Fund's preferred shares in the auctions. Please see the notes to the financial statements for more information.

Because of the decline in NAV during the last 15 months and the Fund's relatively small size, the the Fund's Board of Trustees is currently considering actions to reduce its expenses and otherwise enhance value for the Fund's shareholders. To this end, on August 26, 2008 we filed a preliminary joint proxy statement / prospectus with the Securities and Exchange Commission in connection with a proposed combination of the Fund with two other closed end RMR funds (RMR Real Estate Fund and RMR F.I.R.E. Fund). Both are managed by our advisor, RMR Advisors, Inc. If the combinations receive all shareholder approvals that are required and proceed, all three funds will become one new fund, RMR Real Estate Income Fund, a newly formed Delaware statutory trust which also will be managed by our advisor. The process of seeking approvals and completing the proposed combinations may take several months, and the combinations may or may not occur for various reasons.

Thank you for your continued support. For more information, please view our website, at www.rmrfunds.com.

Sincerely,

Adam D. Portnoy President

August 27, 2008

Portfolio holdings by sub-sector as a percentage of investments (as of June 30, 2008)\*

Hospitality real estate	34%

### **RMR** Hospitality and Real Estate Fund Notes to Financial Statements

### June 30, 2008 (unaudited)

### Note A

### (1) Organization

RMR Hospitality and Real Estate Fund, or the Fund, was organized as a Massachusetts business trust on January 27, 2004, and is registered under the Investment Company Act of 1940, as amended, or the 1940 Act, as a diversified closed-end management investment company. The Fund had no operations until April 27, 2004, other than matters relating to the Fund's establishment and registration of the Fund's common shares under the Securities Act of 1933

### (2) Interim Financial Statements

The accompanying June 30, 2008 financial statements have been prepared without audit. The Fund believes that disclosures made are adequate to make the information presented not misleading. In the opinion of the Fund's management, all adjustments, which include normal recurring adjustments considered necessary for a fair presentation, have been included. The Fund's operating results for this interim period are not necessarily indicative of the results that may be expected on an annual basis in the future.

### (3) Use of Estimates

Preparation of these financial statements in conformity with accounting principles generally accepted in the United States requires the Fund's management to make estimates and assumptions that may affect the amounts reported in the financial statements and related notes. The actual results could differ from these estimates particularly for reasons described in Note A (8), and for other reasons.

### (4) Portfolio Valuation

Investment securities of the Fund are valued at the latest sales price whenever that price is readily available on that day; securities for which no sales were reported on that day, unless otherwise noted, are valued at the average of the closing bid and ask prices on that day. Securities traded primarily on the NASDAQ Stock Market, or NASDAQ, are normally valued by the Fund at the NASDAQ Official Closing Price, or NOCP, provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., eastern time, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Some fixed income securities may be valued using pricing provided by a pricing service. Any of the Fund's securities which are not readily marketable, which are not traded or which have other characteristics of illiquidity are valued by the Fund at fair value as determined in good faith under the supervision of the Fund's board of trustees. Numerous factors may be considered when determining fair value of a security, including cost at date of purchase, type of security, the nature and duration of restrictions on disposition of the security and whether the issuer of the security being fair valued has other securities of the same type outstanding. Short term debt securities with less than 60 days until maturity may be valued at cost plus interest accrued, which approximates market value.

### (5) Fair Value Measurements

The Fund has adopted the provisions of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements, or FAS 157, effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market for

the investment. FAS 157 established a three tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk; for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the six months ended June 30, 2008 maximized the use of observable inputs and minimized the use of unobservable inputs. The Fund utilized broker quotes, company financial information and other market indicators to value the securities whose prices were not readily available.

The following is a summary of the inputs used as of June 30, 2008, in valuing the Fund's investments carried at value:

on Inputs		Investments in Securities
Quoted prices Other significant observable inputs Significant unobservable inputs	\$	62,301,234 280,000 1,184,000
	\$	63,765,234
	Other significant observable inputs	Quoted prices       \$         Other significant observable inputs       \$         Significant unobservable inputs       \$

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining value:

	Investments in Securities Characterized as Level 3
Balance as of 12/31/07 Accrued discounts/premiums	\$ 1,592,000
Realized gain/loss and change in unrealized appreciation/depreciation Net purchases/sales Net transfers in and/or out of Level 3	(408,000)
Balance, as of 06/30/08	\$ 1,184,000
Net change in unrealized appreciation/depreciation from investments still held as of 06/30/08	\$ (408,000)

#### (6) Securities Transactions and Investment Income

Securities transactions are recorded on a trade date basis. Dividend income is recorded on the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and accretion of discount on short term investments, is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on an identified cost basis.

#### (7) Taxes

The Fund has qualified and intends to qualify in the future as a "regulated investment company" and to comply with the applicable provisions of subchapter M of the Internal Revenue Code of 1986, as amended, so that it will generally not be subject to federal income tax. However, the Fund may be subject to a 4% excise tax to the extent the Fund does not distribute substantially all taxable earnings each year.

Some foreign governments may subject the Fund's investment income and securities sales to withholding or other taxes. For the six months ended June 30, 2008, \$210 of foreign taxes have been withheld from distributions to the Fund and recorded as a reduction of dividend income.

### (8) Distributable Earnings

The Fund earns income, net of expenses, daily on its investments. It is the policy of the Fund to pay a stable distribution amount to common shareholders on a monthly basis and distributions to Fund shareholders are declared pursuant to this policy. On July 11, 2008, the Fund declared regular monthly distributions of \$0.083 per common share payable in July, August and September 2008. Distributions to shareholders are recorded on the ex-dividend date. The Fund's distributions may consist of ordinary income (net investment income and short term capital gains), long term capital gains and return of capital. To the extent the Fund's net realized capital gains, if any, can be offset by capital loss carry-forwards, it is the policy of the Fund not to distribute such gains. Distributions to preferred shareholders are determined as described in Note D.

The Fund has substantial investments in real estate investment trusts, or REITs, which are generally not subject to federal income taxes. Distributions that the Fund receives from REITs can be classified as ordinary income, capital gain income or return of capital by the REITs that make these distributions to the Fund. However, it is not possible to characterize distributions received from REITs during interim periods because the issuers do not report their tax characterization until subsequent to year end. Final characterization of the Fund's 2008 distributions to shareholders is also dependent upon the magnitude or timing of the Fund's securities transactions prior to year end. Therefore it is likely that some portion of the Fund's 2008 investment income and distributions to shareholders will be recharacterized as long term capital gain and return of capital for financial statement and federal income tax purposes subsequent to year end and reflected accordingly in the Fund's year end financial statements.

Although subject to adjustments, the cost, gross unrealized appreciation and unrealized depreciation of the Fund's investments for federal income tax purposes as of June 30, 2008, are as follows:

Cost	\$ 75,544,308
Gross unrealized appreciation Gross unrealized depreciation	\$ 3,372,742 (15,151,816)
Net unrealized appreciation/(depreciation)	\$ (11,779,074)

#### (9) Concentration of Risk

Under normal market conditions, the Fund's investments are concentrated in income producing common shares, preferred shares and debt securities, including convertible preferred and debt securities, issued by hospitality and real estate companies and REITs. The value of Fund shares may fluctuate more than the shares of a fund not concentrated in the hospitality and real estate industries due to economic, legal, regulatory, technological or other developments affecting the United States hospitality and real estate industries.

#### Note B

### Advisory and Administration Agreements and Other Transactions with Affiliates

The Fund has an advisory agreement with RMR Advisors, Inc., or RMR Advisors, to provide the Fund with a continuous investment program, to make day-to-day investment decisions and to generally manage the business affairs of the Fund in accordance with its investment objectives and policies. Pursuant to the agreement, RMR Advisors is compensated at an annual rate of 0.85% of the Fund's average daily managed assets. Managed assets means the total assets of the Fund less liabilities other than any indebtedness entered into for purposes of leverage. For purposes of calculating managed assets, the liquidation preference of preferred shares is not considered a liability.

RMR Advisors has contractually agreed to waive a portion of its annual fee equal to 0.25% of the Fund's average daily managed assets from April 27, 2004 until April 27, 2009. The Fund incurred net advisory fees of \$204,843 during the six months ended June 30, 2008. The amount of fees waived by the Advisor was \$85,351 for the six months ended June 30, 2008.

RMR Advisors also performs administrative functions for the Fund pursuant to an administration agreement with the Fund. RMR Advisors has entered into a subadministration agreement with State Street Bank and Trust Company, or State Street, to perform substantially all fund accounting and other administrative

services. Under the administration agreement, RMR Advisors is entitled to reimbursement of the cost of providing administrative services. The Fund reimbursed RMR Advisors for \$46,512 of subadministrative fees charged by State Street for the six months ended June 30, 2008.

Each trustee who is not a director, officer or employee of RMR Advisors and who is not an "interested person" of the Fund as defined under the 1940 Act is considered to be a "disinterested trustee". Disinterested trustees are each paid by the Fund an annual fee plus attendance fees for board and committee meetings. The Fund incurred \$8,900 of trustee fees and expenses during the six months ended June 30, 2008.

The Fund's board of trustees and separately the disinterested trustees authorized the Fund to make reimbursement payments to RMR Advisors for costs related to the Fund's compliance and internal audit programs. The Fund incurred \$17,344 of compliance and internal audit expense during the six months ended June 30, 2008. The Fund also participates in pooled insurance programs with RMR Advisors and other funds managed by RMR Advisors and makes payments of allocated portions of related premiums. The Fund incurred \$6,388 of insurance expense during the six months ended June 30, 2008.

### Note C

### **Securities Transactions**

During the six months ended June 30, 2008, there were purchases and sales transactions (excluding short term securities) of \$5,612,914 and \$5,182,518 respectively. Brokerage commissions on securities transactions amounted to \$11,870 during the six months ended June 30, 2008.

### Note D

### **Preferred Shares**

The Fund's 1,120 outstanding Series Th auction preferred shares have a liquidation preference of \$25,000 per share plus an amount equal to accumulated but unpaid distributions. The preferred shares are senior to the Fund's common shares and rank on parity with any other class or series of preferred shares of the Fund as to the payment of periodic distributions, including distribution of assets upon liquidation. If the Fund does not timely cure a failure to (1) maintain asset coverage for the preferred shares as required by rating agencies, or (2) maintain asset coverage, as defined in the 1940 Act, of at least 200%, the preferred shares will be subject to redemption in an amount equal to their liquidation preference plus accumulated but unpaid distributions. The holders of the preferred shares have voting rights equal to the holders of the Fund's common shares and generally vote together with the holders of the common shares as a single class. Holders of the preferred shares, voting as a separate class, also are entitled to elect two of the Fund's trustees. The Fund pays distributions on the preferred shares at a rate set at auctions held generally every seven days. Distributions are generally payable every seven days, on the first business day following the end of a distribution period. The preferred share distribution rate was 4.15% per annum as of June 30, 2008.

To date, no auctions for preferred securities of the Fund have failed to attract sufficient clearing bids. However, an affiliate of the Fund's lead broker-dealer for its preferred securities has purchased a significant amount of the Fund's preferred securities in the auctions. If this affiliate of the Fund's lead broker-dealer had not been supporting the Fund's auctions, the auctions likely would have failed and holders of the Fund's preferred shares would not have been able to sell their preferred shares in the auctions. There can be no

assurance that this or any other affiliate of the Fund's lead broker-dealer would purchase Fund preferred shares in any future auction of Fund preferred securities or that the Fund will not have any auction for its preferred securities fail. If an auction of the Fund's preferred shares should fail, the dividend rate for the next succeeding dividend period is set according to a pre-determined formula, and the resulting rate may be higher than the rate which the Fund would otherwise pay as a result of a successful auction. In addition, if an auction fails, holders of the Fund's preferred shares may not be able to sell their preferred shares in that auction. If auctions for the Fund's preferred shares fail, or if market conditions generally frustrate the Fund's ability to enhance investment results through the investment of capital attributable to its outstanding preferred shares, such factors may necessitate a change in the form and/or amount of investment leverage used by the Fund. The Fund has no current intention to change the form or degree of investment leverage that it uses. The use of alternative forms of leverage and/or a reduction in the degree of investment leverage used by the Fund in its investment program could result in reduced investment returns for common shareholders as compared to the returns that historically have been achieved by the Fund through the use of preferred share leverage in favorable market conditions. The Fund proactively manages compliance with asset coverage and other financial ratio requirements applicable to the preferred shares. In order to facilitate compliance with such requirements, and without further notice of its intention to do so, the Fund may from time to time purchase or otherwise acquire its outstanding preferred shares in the open market, in other nondiscriminatory secondary market transactions, pursuant to tender offers or other offers to repurchase preferred shares, or in other permissible purchase transactions, and also may from time to time call or redeem preferred shares in accordance with their terms..

### Note E

#### Submission of Proposals to a Vote of Shareholders

The annual meeting of Fund shareholders was held on April 7, 2008. Following is a summary of the proposal submitted to shareholders for vote at the meeting and votes cast:

Proposal	Votes for	Votes withheld	Votes abstained
Common and Preferred Shares			
Election of John L. Harrington as an Independent Trustee			
until the 2011 annual meeting.	1,984,910	213,309	
The following trustees' terms of office as trustee continued after	the Fund's annual	meeting: Barry l	M. Portnoy, Gerard M.

Bailey and Arthur G. Koumantzelis.

#### Note F

### Litigation and Legal Fees

The Fund had recently been involved in litigation with its shareholder, Bulldog Investors General Partnership. The purpose of this litigation was to enforce provisions of the Fund's declaration of trust which generally limits ownership of the Fund to not more than 9.8% of the Fund's outstanding shares. The parties to this litigation entered into a settlement agreement in June 2008, and on July 1, 2008 the court granted the parties' joint motion to dismiss this litigation, effectively ending the litigation. During the six month period ended June 30, 2008, the Fund incurred approximately \$401,133 of expenses in connection with the Bulldog litigation and related matters.

Martin, Frank J.

RMR F.I.R.E. Fund June 30, 2008

To our shareholders,

In the pages that follow, you will find data summarizing our financial results for the six months ended June 30, 2008, and our financial position as of June 30, 2008.

### **Relevant Market Conditions**

*Financial Services Industry Fundamentals.* The financial markets are in disarray. The Fed has engaged in various activities to provide support to these markets. For example, since the beginning of the year, it has lowered the federal funds rate 225 basis points to 2%, injected liquidity into the market by introducing three new lending facilities and orchestrated the rescue of Bear Stearns in mid March. Equity markets recovered in April partly because market participants believed that the Fed would serve as a backstop for financial institutions. Inflation, however, continued to remove billions of dollars from the economy because of higher food and gas prices; it appears that the anticipated boost to the economy from the government's recent federal income tax rebate program instead went mostly to pay for the higher cost of living.

The housing market continued to deteriorate in the first half of the year despite the Fed's efforts to inject liquidity into the financial markets and the government's tax rebates to the boost consumer spending. Banks with exposure to the housing market in the form of mortgage backed securities and other derivatives have been plagued with write-downs because the values of these securities have continued to decline. Financial Industry capital adequacy ratios have also deteriorated, forcing banks to raise expensive capital to shore up their balance sheets. In an effort to preserve capital, banks have been reluctant to lend, adding more downward pressure to an already weak economy.

*Real Estate Industry Fundamentals.* Despite a slowing economy and negative sentiment regarding the direction of the financial markets, real estate fundamentals remained relatively stable during the first half of 2008. Occupancy levels held up and rents generally continued to increase, albeit at a slower pace. Property sales, however, slowed substantially as a result of tighter lending standards and wide differences between buyers and sellers regarding valuations. With limited transactions taking place, it is hard to estimate how much commercial property values have declined. Some estimates put the figure somewhere between negative 10% to negative 15%. What is clear, however, is that property values are no longer at levels seen in early 2007.

For the balance of the year, we believe the economy will likely continue to struggle due to higher food and energy prices, lack of employment growth and a weak housing market. Lending will continue to be restricted, hampering overall economic growth as financial institutions continue to strengthen their balance sheets.

*Real Estate Industry Technicals.* Throughout the first half of the year, the REIT market continued to exhibit high volatility. REITs started the year on a negative note, down almost 12% in mid-January, and rebounded sharply during March and April (up 6% during each month) following the Fed's and J.P. Morgan's

rescue of Bear Stearns. Concern about additional write-offs from financial institutions sent the REIT market, along with other financial services companies, into negative territory during the month of June. REITs were down 11% in June and finished the first half of the year down 3.5%. Despite the volatility, REIT dedicated funds saw \$3 billion of inflows during the first six months of the year, an encouraging sign after outflows of more than \$9 billion from the period March to December 2007.

### Fund Strategies, Techniques and Performance

Our investment objective is to provide high total returns to our common shareholders through a combination of capital appreciation and current income. There can be no assurance that we will achieve our investment objective.

During the six months ended June 30, 2008, our total return on net asset value, or NAV (including NAV changes and assuming a hypothetical reinvestment of distributions at NAV), was negative 16.1%. During the same period, the S&P 500 Financial Sector Index (an unmanaged index of financial services common stocks) total return was negative 29.7%, the total return for the MSCI US REIT Total Return Index (an unmanaged index of REIT common stocks) was negative 3.5% and the Merrill Lynch REIT Preferred Index (an unmanaged index of REIT preferred stocks) was 7.6%. We believe these three indices are relevant to us because our investments, excluding short term investments, as of June 30, 2008, included 12% financial services stocks, 35% REIT common stocks and 43% REIT preferred stocks. The S&P 500 Index (an unmanaged index published as Standard and Poor's Composite Index of 500 common stocks) total return for the six months ended June 30, 2008 was negative 11.9%.

The fund's negative performance during the first half of the year was greatly influenced by our concentration in financial institutions, which were down significantly in the first half of the year. As a result of the Fund's erosion in NAV and income from its investments during 2007 and into 2008, the Fund's Board decided to lower the distribution rate to common shareholders in April in an effort to bring the distribution more in line with the Fund's earnings potential. Also, in August of 2008 we redeemed \$3.5 million of our outstanding preferred shares in order to maintain leverage ratios in light of the decline in the Fund's NAV.

### **Recent Developments**

Recently, credit markets, including the market for auction rate securities, such as the Fund's \$12.5 million preferred shares, have experienced a liquidity crisis. To date, no auctions for the Fund's preferred shares have failed; however, an affiliate of the Fund's lead broker dealer for its preferred shares has purchased a significant amount of the Fund's preferred shares in the auctions. Please see the notes to the financial statements for more information.

Because of the decline in NAV during the last 15 months and the Fund's relatively small size, the Fund's Board of Trustees is currently considering actions to reduce expenses and otherwise enhance value for the Fund's shareholders. To this end, on August 26, 2008 we filed a preliminary joint proxy statement / prospectus with the Securities and Exchange Commission in connection with a proposed combination of the Fund with two other closed end RMR funds (RMR Real Estate Fund and RMR Hospitality and Real Estate Fund). Both are managed by our advisor, RMR Advisors, Inc. If the combinations receive all shareholder approvals that are required and proceed, all three funds will become one new fund, RMR Real Estate Income Fund, a newly formed Delaware statutory trust which also will be managed by our advisor. The process of seeking approvals and completing the proposed combinations may take several months, and the combinations may or may not occur for various reasons.

Thank you for your continued support. For more information, please view our website, at www.rmrfunds.com.

Sincerely,

Adam D. Portnoy President

<sup>(</sup>a)

Commencement of operations.

(b)

Based on average shares outstanding.

Net asset value at November 22, 2004, reflects the deduction of the average sales load and offering costs of \$0.97 per share paid by the holders of common share from the \$25.00 offering price. We paid a sales load and offering cost of \$1.125 per share on 1,280,000 common shares sold to the public and no sales load or offering costs on 200,000 common shares sold to affiliates of RMR Advisors for \$25 per share.

#### Amounts are net of expenses waived by RMR Advisors.

(e) As discussed in Note A (8) to the financial statements, these amounts are subject to change to the extent 2008 distributions by the issuers of the Fund's investments are characterized as capital gains and return of capital.

(f) Total returns for periods of less than one year are not annualized.

The impact of the net increase in payments by affiliates is less than \$0.005/share.

Total return based on per share market price assumes the purchase of common shares at the market price on the first day and sales of common shares at the market price on the last day of the period indicated; dividends and distributions, if any, are assumed to be reinvested at market prices on the ex-dividend date. The total return based on net asset value, or NAV, assumes the purchase of common shares at NAV on the first day and sales of common shares at NAV on the last day of the period indicated; distributions are assumed to be reinvested at NAV on the ex-dividend date. Results represent past performance and do not guarantee future results. Total return would have been lower if RMR Advisors had not contractually waived a portion of its investment advisory fee.

(i) Annualized.

(c)

(d)

(g)

(h)

(j)

Asset coverage per share equals net assets attributable to common shares plus the liquidation preference of the preferred shares divided by the total number of preferred shares outstanding at the end of the period.

See notes to financials statements.

### **RMR F.I.R.E. Fund** Notes to Financial Statements

### June 30, 2008 (unaudited)

### Note A

### (1) Organization

RMR F.I.R.E. Fund, or the Fund, was organized as a Massachusetts business trust on August 6, 2004, and is registered under the Investment Company Act of 1940, as amended, or the 1940 Act, as a diversified closed-end management investment company. The Fund had no operations until November 22, 2004, other than matters relating to the Fund's establishment and registration of the Fund's common shares under the Securities Act of 1933.

### (2) Interim Financial Statements

The accompanying June 30, 2008 financial statements have been prepared without audit. The Fund believes that disclosures made are adequate to make the information presented not misleading. In the opinion of the Fund's management, all adjustments, which include normal recurring adjustments considered necessary for a fair presentation, have been included. The Fund's operating results for this interim period are not necessarily indicative of the results that may be expected on an annual basis in the future.

### (3) Use of Estimates

Preparation of these financial statements in conformity with accounting principles generally accepted in the United States requires the Fund's management to make estimates and assumptions that may affect the amounts reported in the financial statements and related notes. The actual results could differ from these estimates particularly for reasons described in Note A (8), and for other reasons.

### (4) Portfolio Valuation

Investment securities of the Fund are valued at the latest sales price whenever that price is readily available on that day; securities for which no sales were reported on that day, unless otherwise noted, are valued at the average of closing bid and ask prices on that day. Securities traded primarily on the NASDAQ Stock Market, or NASDAQ, are normally valued by the Fund at the NASDAQ Official Closing Price, or NOCP, provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., eastern time, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Some fixed income securities may be valued using pricing provided by a pricing service. Any of the Fund's securities which are not readily marketable, which are not traded or which have other characteristics of illiquidity are valued by the Fund at fair value as determined in good faith under the supervision of the Fund's board of trustees. Numerous factors may be considered when determining fair value of a security, including cost at date of purchase, type of security, the nature and duration of restrictions on disposition of the security and whether the issuer of the security being fair valued has other securities of the same type outstanding. Short term debt securities with less than 60 days until maturity may be valued at cost plus interest accrued, which approximates market value.

(5) Fair Value Measurements

The Fund has adopted the provisions of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements, or FAS 157, effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market for

the investment. FAS 157 established a three tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk; for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three tier hierarchy of inputs is summarized in the three broad levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the six months ended June 30, 2008 maximized the use of observable inputs and minimized the use of unobservable inputs. The Fund utilized broker quotes, company financial information and other market indicators to value the securities whose prices were not readily available.

The following is a summary of the inputs used as of June 30, 2008 in valuing the Fund's investments carried at value:

\$ 29,874,852
640,000
 592,000
\$ 31,106,852

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining value:

	Investments in Securities Characterized as Level 3
Balance as of 12/31/07 Accrued discounts/premiums	\$ 796,000
Realized gain/loss and change in unrealized appreciation/depreciation Net purchases/sales Net transfers in and/or out of Level 3	(204,000)
Balance, as of 06/30/08	\$ 592,000
Net change in unrealized appreciation/depreciation from investments still held as of 06/30/08	\$ (204,000)

#### (6) Securities Transactions and Investment Income

Securities transactions are recorded on a trade date basis. Dividend income is recorded on the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and accretion of discount on short term investments, is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on an identified cost basis.

#### (7) Taxes

The Fund has qualified and intends to qualify in the future as a "regulated investment company" and to comply with the applicable provisions of subchapter M of the Internal Revenue Code of 1986, as amended, so that it will generally not be subject to federal income tax. However, the Fund may be subject to a 4% excise tax to the extent the Fund does not distribute substantially all taxable earnings each year.

Some foreign governments may subject the Fund's investment income and securities sales to withholding or other taxes. For the six months ended June 30, 2008, \$210 of foreign taxes has been withheld from distributions to the Fund and has been recorded as a reduction of dividend income

### (8) Distributable Earnings

The Fund earns income, net of expenses, daily on its investments. It is the policy of the Fund to pay a stable distribution amount to common shareholders on a monthly basis and distributions to Fund shareholders are declared pursuant to this policy. On July 11, 2008, the Fund declared regular monthly distributions of \$.098 per common share payable in July, August and September 2008. Distributions to shareholders are recorded on the ex-dividend date. The Fund's distributions may consist of ordinary income (net investment income and short term capital gains), long term capital gains and return of capital. To the extent the Fund's net realized capital gains, if any, can be offset by capital loss carry-forwards, it is the policy of the Fund not to distribute such gains. Distributions to preferred shareholders are determined as described in Note D.

The Fund has substantial investments in real estate investment trusts, or REITs, which are generally not subject to federal income taxes. Distributions that the Fund receives from REITs can be classified as ordinary income, capital gain income or return of capital by the REITs that make these distributions to the Fund. However, it is not possible to characterize distributions received from REITs during interim periods because the issuers do not report their tax characterization until subsequent to year end. Final characterization of the Fund's 2008 distributions to shareholders is also dependent upon the magnitude or timing of the Fund's securities transactions prior to year end. Therefore it is likely that some portion of the Fund's 2008 investment income and distributions to shareholders will be recharacterized as long term capital gain and return of capital for financial statement and federal income tax purposes subsequent to year end and reflected accordingly in the Fund's year end financial statements.

Although subject to adjustments, the cost, gross unrealized appreciation and unrealized depreciation of the Fund's investments for federal income tax purposes as of June 30, 2008, are as follows:

Cost	\$ 47,426,928
Gross unrealized appreciation Gross unrealized depreciation	\$ 440,098 (16,760,174)
Net unrealized appreciation/(depreciation)	\$ (16,320,076)

#### (9) Concentration of Risk

Under normal market conditions, the Fund's investments are concentrated in income producing common shares and preferred shares issued by F.I.R.E. companies. F.I.R.E. is a commonly used acronym for the combined financial services, insurance and real estate companies. The value of Fund shares may fluctuate more than the shares of a fund not concentrated in the F.I.R.E. industries due to economic, legal, regulatory, technological or other developments affecting the United States F.I.R.E. industries.

### Note **B**

### Advisory and Administration Agreements and Other Transactions with Affiliates

The Fund has an advisory agreement with RMR Advisors, Inc., or RMR Advisors, to provide the Fund with a continuous investment program, to make day-to-day investment decisions and to generally manage the business affairs of the Fund in accordance with its investment objectives and policies. Pursuant to the agreement, RMR Advisors is compensated at an annual rate of 0.85% of the Fund's average daily managed assets. Managed assets means the total assets of the Fund less liabilities other than any indebtedness entered into for purposes of leverage. For purposes of calculating managed assets, the liquidation preference of preferred shares is not considered a liability.

RMR Advisors has contractually agreed to waive a portion of its annual fee equal to 0.25% of the Fund's average daily managed assets from November 22, 2004, until November 22, 2009. The Fund incurred net advisory fees of \$151,605 during the six months ended June 30, 2008. The amount of fees waived by the Advisor was \$44,590 for the six months ended June 30, 2008.

RMR Advisors also performs administrative functions for the Fund pursuant to an administration agreement with the Fund. RMR Advisors has entered into a subadministration agreement with State Street Bank and

Trust Company, or State Street, to perform substantially all fund accounting and other administrative services. Under the administration agreement, RMR Advisors is entitled to reimbursement of the cost of providing administrative services. The Fund reimbursed RMR Advisors for \$45,022 of subadministrative fees charged by State Street for the six months ended June 30, 2008.

Each trustee who is not a director, officer or employee of RMR Advisors and who is not an "interested person" of the Fund as defined under the 1940 Act is considered to be a "disinterested trustee". Disinterested trustees are each paid by the Fund an annual fee plus attendance fees for board and committee meetings. The Fund incurred \$8,465 of trustee fees and expenses during the six months ended June 30, 2008.

The Fund's board of trustees and separately the disinterested trustees authorized the Fund to make reimbursement payments to RMR Advisors for costs related to the Fund's compliance and internal audit programs. The Fund incurred \$17,344 of compliance and internal audit expense during the six months ended June 30, 2008. The Fund also participates in pooled insurance programs with RMR Advisors and other funds managed by RMR Advisors and makes payments of allocated portions of related premiums. The Fund incurred \$7,281 of insurance expense during the six months ended June 30, 2008.

### Note C

### **Securities Transactions**

During the six months ended June 30, 2008, there were purchases and sales transactions (excluding short term securities) of \$2,554,268 and \$5,307,393 respectively. Brokerage commissions on securities transactions amounted to \$6,083 during the six months ended June 30, 2008.

### Note D

### **Preferred Shares**

In December 2004, the Fund issued 800 Series W auction preferred shares with a liquidation preference of \$25,000 per share plus an amount equal to accumulated but unpaid distributions. On December 27, 2007 and January 17, 2008, the Fund redeemed a total of 160 preferred shares with a liquidation preference of \$4,000,000. The Fund has further redeemed 40, 40 and 60 preferred shares on August 5, 2008, August 12, 2008 and August 19, 2008, respectively, with a total liquidation preference of \$3,500,000. The preferred shares are senior to the Fund's common shares and rank on parity with any other class or series of preferred shares of the Fund as to the payment of periodic distributions, including distribution of assets upon liquidation. If the Fund does not timely cure a failure to (1) maintain asset coverage for the preferred shares as required by rating agencies, or (2) maintain asset coverage, as defined in the 1940 Act, of at least 200%, the preferred shares will be subject to redemption in an amount equal to their liquidation preference plus accumulated but unpaid distributions. The holders of the preferred shares have voting rights equal to the holders of the Fund's common shares and generally vote together with the holders of the common shares as a single class. Holders of the preferred shares, voting as a separate class, also are entitled to elect two of the Fund's trustees. The Fund pays distributions on the preferred shares at a rate set at auctions held generally every seven days. Distributions are generally payable every seven days, on the first business day following the end of a distribution period. The preferred share distribution rate was 4.12% per annum as of June 30, 2008.

To date, no auctions for preferred securities of the Fund have failed to attract sufficient clearing bids. However, an affiliate of the Fund's lead broker-dealer for its preferred securities has purchased a significant amount of the Fund's preferred securities in the auctions. If this affiliate of the Fund's lead broker-dealer had not been supporting the Fund's auctions, the auctions likely would have failed and holders of the Fund's preferred shares would not have been able to sell their preferred shares in the auctions. There can be no assurance that this or any other affiliate of the Fund's lead broker-dealer would purchase Fund preferred shares in any future auction of Fund preferred securities or that the Fund will not have any auction for its preferred securities fail. If an auction of the Fund's preferred shares should fail, the dividend rate for the next succeeding dividend period is set according to a pre-determined formula, and the resulting rate may be higher than the rate which the Fund would otherwise pay as a result of a successful auction. In addition, if an auction fails, holders of the Fund's preferred shares may not be able to sell their preferred shares in that auction. If auctions for the Fund's preferred shares fail, or if market conditions generally frustrate the Fund's ability to enhance investment results through the investment of capital attributable to its outstanding preferred shares, such factors may necessitate a change in the form and/or amount of investment leverage used by the Fund. The Fund has no current intention to change the form or degree of investment leverage that it uses. The use of alternative forms of leverage and/or a reduction in the degree of investment leverage used by the Fund in its investment program could result in reduced investment returns for common shareholders as compared to the returns that historically have been achieved by the Fund through the use of preferred share leverage in favorable market conditions. The Fund proactively manages compliance with asset coverage and other financial ratio requirements applicable to the preferred shares. In order to facilitate compliance with such requirements, and without further notice of its intention to do so, the Fund may from time to time purchase or otherwise acquire its outstanding preferred shares in the open market, in other nondiscriminatory secondary market transactions, pursuant to tender offers or other offers to repurchase preferred shares, or in other permissible purchase transactions, and also may from time to time call or redeem preferred shares in accordance with their terms.

### Note E

### Submission of Proposals to a Vote of Shareholders

The annual meeting of Fund shareholders was held on April 7, 2008. Following is a summary of the proposal submitted to shareholders for vote at the meeting and votes cast:

Proposal	Votes for	Votes withheld	Votes abstained
Common and Preferred Shares Election of John L. Harrington as an Independent Trustee			
until the 2011 annual meeting.	1,338,319	54,250	
The following trustees' terms of office as trustee continued after the Fund's annual meeting: Barry M. Portnoy, Gerard M. Martin, Frank J.			
Bailey and Arthur G. Koumantzelis.			

**RMR Preferred Dividend Fund** 

June 30, 2008

To our shareholders,

In the pages that follow, you will find data summarizing our financial results for the six months ended June 30, 2008, and our financial position as of June 30, 2008.

### **Relevant Market Conditions**

*Preferred Securities Market Overview.* The issuance of non-REIT preferred securities during the first half of 2008 continued to be strong, particularly from financial institutions, as banks continued to improve their capital bases. This heavy issuance by the larger financial companies served to depress secondary market prices and precluded REITs from issuing preferred securities. Nevertheless, the REIT Preferred Index ended the first half of 2008 up 7.6%, outperforming the broader market indices.

*Real Estate Industry Fundamentals.* Despite a slowing economy and negative sentiment regarding the direction of the financial markets, real estate fundamentals remained stable during the first half of 2008. Occupancy levels held up and rents continued to increase, albeit at a slower pace. Property sales, however, slowed substantially as a result of tighter lending standards and wide differences between buyers and sellers regarding valuations. With limited transactions taking place, it is hard to estimate how much commercial property values have declined. Some estimates put the figure somewhere between negative 10% to negative 15%. What is clear, however, is that property values are no longer at levels seen in early 2007.

For the balance of the year, we believe the economy will likely continue to struggle due to higher food and energy prices, lack of employment growth and a weak housing market. Lending will continue to be restricted, hampering overall economic growth as financial institutions continue to strengthen their balance sheets.

*Real Estate Industry Technicals.* Throughout the first half of the year, the REIT market continued to exhibit high volatility. REITs started the year on a negative note, down almost 12% in mid-January, and rebounded sharply during March and April (up 6% during each month) following the Fed's and J.P. Morgan's rescue of Bear Stearns. Concern about additional write-offs from financial institutions sent the REIT market, along with other financial services companies, into negative territory during the month of June. REITs were down 11% in June and finished the first half of the year down 3.5%. Despite the volatility, REIT dedicated funds saw \$3 billion of inflows during the first six months of the year, an encouraging sign after outflows of more than \$9 billion from the period March to December 2007.

### Fund Strategies, Techniques and Performance

Our primary investment objective is to provide our common shareholders high current income. Our secondary investment objective is capital appreciation. There can be no assurance that we will achieve our investment objectives.

During the six months ended June 30, 2008, our total return on net asset value, or NAV (including NAV changes and assuming a hypothetical reinvestment of distributions at NAV), was negative 6.4%. During that same period, the total return for the Merrill Lynch REIT Preferred Index (an unmanaged index of REIT preferred stocks) was 7.6%. We believe this index is relevant to us because our investments as of June 30, 2008, excluding short term investments, included 73% REIT preferred stocks. The S&P 500 Index (an unmanaged index published as Standard and Poor's Composite Index of 500 Stocks) total return for the six months ended June 30, 2008 was negative 11.9%.

The fund's negative performance during the first half of the year was greatly influenced by our concentration in the preferred securities of hotel REITs. This subsector witnessed a rapid deterioration in operating fundamentals in the first half of the year because of the slowdown in the U.S. economy and the expectation of its continuation. As a result of the Fund's erosion in NAV and income from its investments during 2007 and into 2008, the Fund's board of trustees decided to lower the distribution rate to common shareholders in April in an effort to bring the distribution more in line with the Fund's earnings potential. Also, in August we redeemed \$5 million of our outstanding preferred shares because of the decline in the Fund's NAV.

### **Recent Developments**

Recently, credit markets, including the market for auction rate securities such as the Fund's \$17.5 million of preferred shares, have experienced a liquidity crisis. To date, no auctions for the Fund's preferred shares have failed; however, an affiliate of the Fund's lead broker dealer for its preferred shares has purchased a significant amount of the Fund's preferred shares in the auctions. Please see the notes to the financial statements for more information.

Because of the decline in NAV during the last 15 months and the Fund's relatively small size, the Fund's Board of Trustees is currently considering actions to reduce expenses and otherwise enhance value for the Fund's shareholders. These potential actions include combining the Fund with one or more other RMR closed end funds that have similar investment programs.

Thank you for your continued support. For more information, please view our website at www.rmrfunds.com.

Sincerely,

Adam D. Portnoy President August 27, 2008

### **RMR Preferred Dividend Fund**

June 30, 2008

## Portfolio holdings by sub-sector as a percentage of investments (as of June 30, 2008)\*

Hospitality real estate	28%
Office real estate	13%
Diversified real estate	9%
Other, less than 10%	50%
Total investments	100%
REITs	75%
Other	25%
Total investments	100%

These percentages represent the Fund's portfolio holdings by sub-sector as a percentage of total portfolio holdings and do not match with the percentages included in the Portfolio of Investments schedule which represent the Fund's portfolio holdings by sub-sector as a percentage of the Fund's net assets.

### **RMR Preferred Dividend Fund** Notes to Financial Statements

### June 30, 2008 (unaudited)

### Note A

### (1) Organization

RMR Preferred Dividend Fund, or the Fund, was organized as a Massachusetts business trust on November 8, 2004, and is registered under the Investment Company Act of 1940, as amended, or the 1940 Act, as a diversified closed end management investment company. The Fund had no operations until May 25, 2005, other than matters relating to the Fund's establishment and registration of the Fund's common shares under the Securities Act of 1933.

### (2) Interim Financial Statements

The accompanying June 30, 2008 financial statements have been prepared without audit. The Fund believes that disclosures made are adequate to make the information presented not misleading. In the opinion of the Fund's management, all adjustments, which include normal recurring adjustments considered necessary for a fair presentation, have been included. The Fund's operating results for this interim period are not necessarily indicative of the results that may be expected on an annual basis in the future.

### (3) Use of Estimates

Preparation of these financial statements in conformity with accounting principles generally accepted in the United States requires the Fund's management to make estimates and assumptions that may affect the amounts reported in the financial statements and related notes. The actual results could differ from these estimates particularly for reasons described in Note A (8), and for other reasons.

### (4) Portfolio Valuation

Investment securities of the Fund are valued at the latest sales price whenever that price is readily available on that day; securities for which no sales were reported on that day, unless otherwise noted, are valued at the average of closing bid and ask prices on that day. Securities traded primarily on the NASDAQ Stock Market, or NASDAQ, are normally valued by the Fund at the NASDAQ Official Closing Price, or NOCP, provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., eastern time, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Some fixed income securities may be valued using pricing provided by a pricing service. Any of the Fund's securities which are not readily marketable, which are not traded or which have other characteristics of illiquidity are valued by the Fund at fair value as determined in good faith under the supervision of the Fund's board of trustees. Numerous factors may be considered when determining fair value of a security, including cost at date of purchase, type of security, the nature and duration of restrictions on disposition of the security and whether the issuer of the security being fair valued has other securities of the same type outstanding. Short term debt securities with less than 60 days until maturity may be valued at cost plus interest accrued, which approximates market value.

(5) Fair Value Measurements

The Fund has adopted the provisions of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements, or FAS 157, effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market for

the investment. FAS 157 established a three tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk; for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the six months ended June 30, 2008 maximized the use of observable inputs and minimized the use of unobservable inputs. The Fund utilized broker quotes, company financial information and other market indicators to value the securities whose prices were not readily available.

The following is a summary of the inputs used as of June 30, 2008, in valuing the Fund's investments carried at value:

 Investments in Securities
\$ 44,024,339 1,977,000
 888,000
\$ 46,889,339

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining value:

	Investments in Securities Characterized as Level 3
Balance as of 12/31/07 Accrued discounts/premiums	\$ 1,194,000
Realized gain/loss and change in unrealized appreciation/depreciation Net purchases/sales Net transfers in and/or out of Level 3	(306,000)
Balance, as of 06/30/08	\$ 888,000
Net change in unrealized appreciation/depreciation from investments still held as of 06/30/08	\$ (306,000)

#### (6) Securities Transactions and Investment Income

Securities transactions are recorded on a trade date basis. Dividend income is recorded on the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and accretion of discount on short term investments, is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on an identified cost basis.

### (7) Taxes

The Fund has qualified and intends to qualify in the future as a "regulated investment company" and to comply with the applicable provisions of subchapter M of the Internal Revenue Code of 1986, as amended, so that it will generally not be subject to federal income tax. However, the Fund may be subject to a 4% excise tax to the extent the Fund does not distribute substantially all taxable earnings each year.

### (8) Distributable Earnings

The Fund earns income, net of expenses, daily on its investments. It is the policy of the Fund to pay a stable distribution amount to common shareholders on a monthly basis and distributions to Fund shareholders are declared pursuant to this policy. On July 11, 2008, the Fund declared regular monthly distributions of \$0.10 per common share payable in July, August and September 2008. Distributions to shareholders are recorded on the ex-dividend date. The Fund's distributions may consist of ordinary income (net investment income and short term capital gains), long term capital gains and return of capital. To the extent the Fund's net realized capital gains, if any, can be offset by capital loss carry-forwards, it is the policy of the Fund not to distribute such gains. Distributions to preferred shareholders are determined as described in Note D.

The Fund has substantial investments in real estate investment trusts, or REITs, which are generally not subject to federal income taxes. Distributions that the Fund receives from REITs can be classified as ordinary income, capital gain income or return of capital by the REITs that make these distributions to the Fund. However, it is not possible to characterize distributions received from REITs during interim periods because

the issuers do not report their tax characterization until subsequent to year end. Final characterization of the Fund's 2008 distributions to shareholders is also dependent upon the magnitude or timing of the Fund's securities transactions prior to year end. Therefore it is likely that some portion of the Fund's 2008 investment income and distributions to shareholders will be recharacterized as long term capital gain and return of capital for financial statement and federal income tax purposes subsequent to year end and reflected accordingly in the Fund's year end financial statements.

Although subject to adjustments, the cost, gross unrealized appreciation and unrealized depreciation of the Fund's investments for federal income tax purposes as of June 30, 2008, are as follows:

Cost	\$ 61,952,701
Gross unrealized appreciation Gross unrealized depreciation	\$ 59,696 (15,123,058)
Net unrealized appreciation/(depreciation)	\$ (15,063,362)

### (9) Concentration of Risk

Under normal market conditions, the Fund's investments are concentrated in preferred securities issued by REITs. The value of Fund shares may fluctuate more than the shares of a fund not concentrated in the real estate industry due to economic, legal, regulatory, technological or other developments affecting the United States real estate industry.

### (10) Common Shares

The Fund issued 11,582 common shares during the six months ended June 30, 2008 and 33,350 common shares during the year ended December 31, 2007, for a total consideration of \$131,106 and \$516,595 respectively, pursuant to its dividend reinvestment plan.

### Note B

### Advisory and Administration Agreements and Other Transactions with Affiliates

The Fund has an advisory agreement with RMR Advisors, Inc., or RMR Advisors, to provide the Fund with a continuous investment program, to make day-to-day investment decisions and to generally manage the business affairs of the Fund in accordance with its investment objectives and policies. Pursuant to the agreement, RMR Advisors is compensated at an annual rate of 0.85% of the Fund's average daily managed assets. Managed assets means the total assets of the Fund less liabilities other than any indebtedness entered into for purposes of leverage. For purposes of calculating managed assets, the liquidation preference of preferred shares is not considered a liability.

RMR Advisors has contractually agreed to waive a portion of its annual fee equal to 0.55% of the Fund's average daily managed assets from May 25, 2005 until May 24, 2010. The Fund incurred net advisory fees of \$74,633 during the six months ended June 30, 2008. The amount of fees waived by the Advisor was \$136,827 for the six months ended June 30, 2008.

RMR Advisors also performs administrative functions for the Fund pursuant to an administration agreement with the Fund. RMR Advisors has entered into a subadministration agreement with State Street Bank and

Trust Company, or State Street, to perform substantially all fund accounting and other administrative services. Under the administration agreement, RMR Advisors is entitled to reimbursement of the cost of providing administrative services. The Fund reimbursed RMR Advisors for \$45,022 of subadministrative fees charged by State Street for the six months ended June 30, 2008.

Each trustee who is not a director, officer or employee of RMR Advisors and who is not an "interested person" of the Fund as defined under the 1940 Act is considered to be a "disinterested trustee". Disinterested trustees are each paid by the Fund an annual fee plus attendance fees for board and committee meetings. The Fund incurred \$8,761 of trustee fees and expenses during the six months ended June 30, 2008.

The Fund's board of trustees and separately the disinterested trustees authorized the Fund to make reimbursement payments to RMR Advisors for costs related to the Fund's compliance and internal audit programs. The Fund incurred \$17,344 of compliance and internal audit expense during the six months ended June 30, 2008. The Fund also participates in pooled insurance programs with RMR Advisors and other funds managed by RMR Advisors and makes payments of allocated portions of related premiums. The Fund incurred \$6,227 of insurance expense during the six months ended June 30, 2008.

### Note C

### **Securities Transactions**

During the six months ended June 30, 2008, there were purchases and sales transactions (excluding short term securities) of \$100,000 and \$78,214 respectively. Brokerage commissions on securities transactions amounted to \$308 during the six months ended June 30, 2008.

### Note D

### **Preferred Shares**

In July 2005, the Fund issued 900 Series M auction preferred shares with a liquidation preference of \$25,000 per share plus an amount equal to accumulated but unpaid distributions. On August 15, 2008 and August 22, 2008, the Fund redeemed 40 and 160 preferred shares, respectively, with a total liquidation preference of \$5,000,000. The preferred shares are senior to the Fund's common shares and rank on parity with any other class or series of preferred shares of the Fund as to the payment of periodic distributions, including distribution of assets upon liquidation. If the Fund does not timely cure a failure to (1) maintain asset coverage for the preferred shares as required by rating agencies, or (2) maintain asset coverage, as defined in the 1940 Act, of at least 200%, the preferred shares will be subject to redemption in an amount equal to their liquidation preference plus accumulated but unpaid distributions. The holders of the preferred shares have voting rights equal to the holders of the Fund's common shares and generally vote together with the holders of the common shares as a single class. Holders of the preferred shares, voting as a separate class, also are entitled to elect two of the Fund's trustees. The Fund pays distributions on the preferred shares at a rate set at auctions held generally every seven days. Distributions are generally payable every seven days, on the first business day following the end of a distribution period. The preferred share distribution rate was 3.90% per annum as of June 30, 2008.

To date, no auctions for preferred securities of the Fund have failed to attract sufficient clearing bids. However, an affiliate of the Fund's lead broker-dealer for its preferred securities has purchased a significant

amount of the Fund's preferred securities in the auctions. If this affiliate of the Fund's lead broker-dealer had not been supporting the Fund's auctions, the auctions likely would have failed and holders of the Fund's preferred shares would not have been able to sell their preferred shares in the auctions. There can be no assurance that this or any other affiliate of the Fund's lead broker-dealer would purchase Fund preferred shares in any future auction of Fund preferred securities or that the Fund will not have any auction for its preferred securities fail. If an auction of the Fund's preferred shares should fail, the dividend rate for the next succeeding dividend period is set according to a pre-determined formula, and the resulting rate may be higher than the rate which the Fund would otherwise pay as a result of a successful auction. In addition, if an auction fails, holders of the Fund's preferred shares may not be able to sell their preferred shares in that auction. If auctions for the Fund's preferred shares fail, or if market conditions generally frustrate the Fund's ability to enhance investment results through the investment of capital attributable to its outstanding preferred shares, such factors may necessitate a change in the form and/or amount of investment leverage used by the Fund. The Fund has no current intention to change the form or degree of investment leverage that it uses. The use of alternative forms of leverage and/or a reduction in the degree of investment leverage used by the Fund in its investment program could result in reduced investment returns for common shareholders as compared to the returns that historically have been achieved by the Fund through the use of preferred share leverage in favorable market conditions. The Fund proactively manages compliance with asset coverage and other financial ratio requirements applicable to the preferred shares. In order to facilitate compliance with such requirements, and without further notice of its intention to do so, the Fund may from time to time purchase or otherwise acquire its outstanding preferred shares in the open market, in other nondiscriminatory secondary market transactions, pursuant to tender offers or other offers to repurchase preferred shares, or in other permissible purchase transactions, and also may from time to time call or redeem preferred shares in accordance with their terms.

### Note E

### Submission of Proposals to a Vote of Shareholders

The annual meeting of Fund shareholders was held on April 7, 2008. Following is a summary of the proposal submitted to shareholders for vote at the meeting and votes cast:

Proposal	Votes for	Votes withheld	Votes abstained	
Common and Preferred Shares				
Election of John L. Harrington as an Independent Trustee until the 2011 annual meeting.	2,513.054	63.018		
The following trustees' terms of office as trustee continued after t Bailey and Arthur G. Koumantzelis.	) )		M. Portnoy, Gerard M	1. Martin, Frank J

**RMR Asia Pacific Real Estate Fund** 

June 30, 2008

To our shareholders,

In the pages that follow, you will find data summarizing our financial results for the six months ended June 30, 2008, and our financial position as of June 30, 2008.

### **Relevant Market Conditions**

*Real Estate Industry Fundamentals.* In 2008, we expect commercial real estate fundamentals in the Asia Pacific region to remain generally healthy due to limited new supply. Office market vacancy rates are expected to remain low in Hong Kong, Singapore and Tokyo. Although there may be some slowing in the second half of 2008 and early 2009 due to the declines in export industries, resilient national income growth in most countries, except for Japan, should lead to growing retail sales and rising rental values for retail property. The industrial real estate sector is robust due to the development of logistics networks in the emerging countries. Residential real estate prices are expected to increase in the longer term due to rising incomes and urbanization dynamics which is driving demand in China and India.

Economic growth for the remainder of 2008 is expected to remain strong relative to the rest of the world. For 2008, The International Monetary Fund expects 8.0% GDP growth for developing Asia and 1.5% for Japan. Rising inflation due to high food and energy prices and slowing exports may be short term risks to the rapid economic growth throughout the region.

Real estate companies in the region are generally conservatively financed. However, the credit tightening by lenders across the globe may be problematic for some Asia Pacific based real estate companies in 2008.

*Real Estate Industry Technicals.* We expect continued strong demand for real estate investments in the Asia Pacific region. High personal savings rates and attractive real estate yields are expected to lead to increasing values for real estate companies in the region, especially real estate companies that pay a regular dividend, such as REITs. With the exception of Australia, property yields in the region typically are 2-3% higher than long term government bond yields. The number of REITs in the region continues to grow, with several countries currently considering initiating REIT legislation, such as the Philippines, India and China.

### Fund Strategies, Techniques and Performance

Our primary investment objective is capital appreciation. There can be no assurance that we will achieve our investment objective.

During the six months ended June 30, 2008, our total return on net asset value, or NAV, was negative 30.7%. During that same period, the total return for the EPRA NAREIT Asia Index (an unmanaged index of Asia Pacific real estate common stocks) was negative 24.2%. We believe this index is relevant to us because all our investments as of June 30, 2008, excluding short term investments, were in securities of real estate companies

in countries covered by this index. The S&P 500 Index (an unmanaged index published as Standard and Poor's Composite Index of 500 common stocks) total return for the six months ended June 30, 2008 was negative 11.8%.

### **Recent Developments**

Because of the decline in NAV during the last 15 months and the Fund's relatively small size, the Fund's Board of Trustees is currently considering actions to reduce expenses and otherwise enhance value for the Fund's shareholders. These potential actions include combining the Fund with one or more other RMR closed end funds that have similar investment programs.

Thank you for your continued support. For more information, please view our website, at www.rmrfunds.com.

Sincerely,

Adam D. Portnoy President

Net asset value at May 25, 2006, reflects the deduction of the average sales load and offering costs of \$0.92 per share paid by the holders of common shares from the \$20.00 offering price. We paid a sales load and offering cost of \$0.94 per share on 1,710,000 shares sold to the public and no sales load or offering costs on 40,000 common shares sold to affiliates of the RMR Advisors for \$20 per share.

(d)

Amounts are net of expenses waived by RMR Advisors.

Total returns for periods of less than one year are not annualized.

Total return based on per share market price assumes the purchase of common shares at the market price on the first day and sales of common shares at the market price on the last day of the period indicated; dividends and distributions, if any, are assumed to be reinvested at market prices on the ex-dividend date. The total return based on net asset value, or NAV, assumes the purchase of common shares at NAV on the first day and sales of common shares at NAV on the last day of the period indicated; distributions are assumed to be reinvested at NAV on the ex-dividend date. Results represent past performance and do not guarantee future results.

<sup>(</sup>g) Annualized.

# **RMR Asia Pacific Real Estate Fund**

### Notes to Financial Statements

### June 30, 2008 (unaudited)

### Note A

### (1) Organization

RMR Asia Pacific Real Estate Fund, or the Fund, was organized as a Massachusetts business trust on February 14, 2006, and is registered under the Investment Company Act of 1940, as amended, or the 1940 Act, as a non-diversified closed-end management investment company. The Fund had no operations prior to May 25, 2006, other than matters relating to the Fund's establishment and registration of the Fund's common shares under the Securities Act of 1933.

### (2) Interim Financial Statements

The accompanying June 30, 2008 financial statements have been prepared without audit. The Fund believes that disclosures made are adequate to make the information presented not misleading. In the opinion of the Fund's management, all adjustments, which include normal recurring adjustments considered necessary for a fair presentation, have been included. The Fund's operating results for this interim period are not necessarily indicative of the results that may be expected on an annual basis in the future.

### (3) Use of Estimates

Preparation of these financial statements in conformity with accounting principles generally accepted in the United States requires the Fund's management to make estimates and assumptions that may affect the amounts reported in the financial statements and related notes. The actual results could differ from these estimates.

### (4) Portfolio Valuation

Investment securities of the Fund are valued at the latest sales price reflected on the consolidated tape of the exchange that reflects the principal market for such securities whenever that price is readily available on that day; securities for which no sales were reported on that day, unless otherwise noted, are valued at the average of the closing bid and ask prices on that day. Any of the Fund's securities which are not readily marketable, which are not traded or which have other characteristics of illiquidity are valued by the Fund at fair value as determined in good faith under the supervision of the Fund's board of trustees. Numerous factors may be considered when determining fair value of a security, including cost at date of purchase, type of security, the nature and duration of restrictions on disposition of the security and whether the issuer of the security being fair valued has other securities of the same type outstanding. Short-term debt securities with less than 60 days until maturity may be valued at cost plus interest accrued, which approximates market value.

Some foreign markets close before the close of customary trading sessions on the American Stock Exchange or AMEX (normally 4:00 p.m. eastern time). Occasionally, events occur after the principal foreign exchange on which the foreign securities trade has closed but before the AMEX closes and the Fund determines net asset value, or NAV, that could affect the value of the securities the Fund owns or cause their prices to be unreliable. If these events are expected to materially affect the Fund's NAV, the prices of such securities will be adjusted to reflect their estimated fair value as of the close of the AMEX, as determined in good faith under procedures established by the Fund's board of trustees.

### (5) Fair Value Measurements

The Fund has adopted the provisions of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements, or FAS 157, effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market for the investment. FAS 157 established a three tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk; for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity is own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the six months ended June 30, 2008 maximized the use of observable inputs and minimized the use of unobservable inputs. When the S&P 500 Index fluctuates significantly from the previous day close, we believe that the closing price in the local market may no longer represent the fair value of foreign securities at the time of the U.S. market close. Accordingly, in such circumstances, we report holdings in such foreign securities at their fair values as determined by an independent security pricing service. The service uses a multi-factor model that includes such information as the issue's local closing price, relevant general and sector indices, currency fluctuations, depository receipts, and futures, as applicable. The model generates an adjustment factor for each security that is applied to the local closing price to adjust it for post closing events, resulting in the security's reported fair value.

The following is a summary of the inputs used as of June 30, 2008 in valuing the Fund's investments carried at value:

on Inputs		Investments in Securities
Quoted prices Other significant observable inputs	\$	415,440 24,322,638
Significant unobservable inputs		21,322,030
	\$	24,738,078
	Other significant observable inputs	Quoted prices \$ Other significant observable inputs Significant unobservable inputs

There were no investments in securities characterized as Level 3 as of December 31, 2007 or June 30, 2008.

#### (6) Securities Transactions and Investment Income

Securities transactions are recorded on a trade date basis. Dividend income is recorded on the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and accretion of discount on short-term investments, is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on the basis of identified cost.

#### (7) Taxes

The Fund has qualified and intends to qualify in the future as a "regulated investment company" and to comply with the applicable provisions of subchapter M of the Internal Revenue Code of 1986, as amended, so that it will generally not be subject to federal income tax. However, the Fund may be subject to a 4% excise tax to the extent the Fund does not distribute substantially all taxable earnings each year.

Some Asia Pacific governments may subject the Fund's investment income and securities sales to withholding or other taxes. For the six months ended June 30, 2008, \$40,984 of foreign taxes have been withheld from distributions to the Fund and recorded as a reduction of dividend income.

### (8) Distributable Earnings

The Fund earns income, net of expenses, daily on its investments. It is the policy of the Fund to make distributions of its income at least annually in amounts at least equal to the amount necessary to maintain its status as a regulated investment company. Distributions to shareholders are recorded on the ex-dividend date. The Fund's distributions may consist of ordinary income (net investment income and short term capital gains), long term capital gains and return of capital. To the extent the Fund's net realized capital gains, if any, can be offset by capital loss carry-forwards, it is the policy of the Fund not to distribute such gains.

Although subject to adjustments, the cost, gross unrealized appreciation and unrealized depreciation of the Fund's investments for federal income tax purposes as of June 30, 2008, are as follows:

Cost	\$ 28,746,912
Gross unrealized appreciation Gross unrealized depreciation	\$ 1,240,212 (5,249,046)
Net unrealized appreciation/(depreciation)	\$ (4,008,834)

#### (9) Concentration of Risk

Under normal market conditions, the Fund's investments are concentrated in common shares, preferred shares and debt securities, including convertible preferred and debt securities, issued by Asia Pacific real estate companies and REITs. The value of Fund shares may fluctuate more than the shares of a fund not concentrated in the real estate industry or in the Asia Pacific region due to economic, legal, regulatory, technological or other developments affecting the Asia Pacific real estate industry and securities market.

#### (10) Foreign Securities Risk

As compared to U.S. securities, foreign securities may be issued by companies which provide less financial and other information, and which are subject to less developed and difficult to access legal systems, less stringent accounting, auditing and financial reporting standards or different governmental regulations. As compared to

U.S. securities markets, foreign securities markets may have different settlement procedures, may have higher transaction costs, may be conducted in a less regulated manner, are generally smaller and may be less liquid and more volatile than securities markets in the U.S. The value of foreign securities may also decline or be unstable because of political, social or economic events or instability outside of the U.S.

### (11) Foreign Currency Transactions

The accounting records of the Fund are maintained in U.S. dollars. Portfolio securities and other assets and liabilities denominated in a foreign currency are translated daily into U.S. dollars at the prevailing rates of exchange. Purchases and sales of securities, income receipts and expense payments are translated into U.S. dollars at the prevailing exchange rates on the respective transaction dates.

The Fund does not isolate the portion of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in the market prices of investments. Such fluctuations are included in net realized and unrealized gain (loss) on investments. Net realized gain (loss) on foreign currency transactions represents net foreign currency gain (loss) from forward currency contracts, disposition of foreign currency gain (loss) realized between the trade and settlement dates on securities transactions, and the difference between the amount of dividends, interest and foreign currency appreciation/(depreciation) arises from changes in the value of assets and liabilities, other than investments in securities, as a result of changes in exchange rates.

### Note B

### Advisory, Subadvisory and Administration Agreements and Other Transactions with Affiliates

The Fund has an advisory agreement with RMR Advisors to provide the Fund with a continuous investment program, oversee the subadvisor and generally manage the business affairs of the Fund in accordance with its investment objectives and policies. Pursuant to the agreement, RMR Advisors is compensated at an annual rate of 1% of the Fund's average daily managed assets.

RMR Advisors has contractually agreed to waive a portion of its annual fee equal to 0.25% of the Fund's average daily managed assets from May 25, 2006 until May 25, 2011. The Fund incurred net advisory fees of \$107,386 during the six months ended June 30, 2008. The amount of fees waived by the Advisor was \$35,796 for the six months ended June 30, 2008.

RMR Advisors has entered into a subadvisory agreement with MacarthurCook Investment Managers Ltd., or MacarthurCook, to make day-to-day investment decisions and to generally manage the business affairs of the Fund in accordance with its investment objectives and policies. Pursuant to the agreement, RMR Advisors, and not the Fund, pays the subadvisor a monthly fee equal to an annual rate of 0.375% of the Fund's average daily managed assets. MacarthurCook has agreed to waive a portion of the fee payable by RMR Advisors such that until May 25, 2011, the fee payable will be equal to 0.25% of the Fund's average daily managed assets.

RMR Advisors also performs administrative functions for the Fund pursuant to an administration agreement with the Fund. RMR Advisors has entered into a subadministration agreement with State Street Bank and Trust Company, or State Street, to perform substantially all fund accounting and other administrative services. Under the administration agreement, RMR Advisors is entitled to reimbursement of the cost of

providing administrative services. The Fund reimbursed RMR Advisors for \$46,196 of subadministrative fees charged by State Street for the six months ended June 30, 2008.

Each trustee who is not a director, officer or employee of RMR Advisors and who is not an "interested person" of the Fund as defined under the 1940 Act is considered to be a "disinterested trustee". Disinterested trustees are each paid by the Fund an annual fee plus attendance fees for board and committee meetings. The Fund incurred \$8,900 of trustee fees and expenses during the six months ended June 30, 2008.

The Fund's board of trustees and separately the disinterested trustees authorized the Fund to make reimbursement payments to RMR Advisors for costs related to the Fund's compliance and internal audit programs. The Fund incurred \$17,344 of compliance and internal audit expense during the six months ended June 30, 2008. The Fund also participates in pooled insurance programs with RMR Advisors and other funds managed by RMR Advisors and makes payments of allocated portions of related premiums. The Fund incurred \$10,865 of insurance expense during the six months ended June 30, 2008.

### Note C

### **Securities Transactions**

During the six months ended June 30, 2008, there were purchases and sales transactions (excluding short-term securities) of \$9,842,904 and \$17,619,828 respectively. Brokerage commissions on securities transactions amounted to \$47,995 during the six months ended June 30, 2008.

### Note D

### Submission of Proposals to a Vote of Shareholders

The annual meeting of Fund shareholders was held on April 7, 2008. Following is a summary of the proposal submitted to shareholders for vote at the meeting and votes cast:

Proposal	Votes for	Votes withheld	Votes abstained
Election of John L. Harrington as an Independent Trustee			
until the 2011 annual meeting.	1,480,071	39,471	
The following trustees' terms of office as trustee continued after the Fund's annual meeting: Barry M. Portnoy, Gerard M. Martin, Frank J.			
Bailey and Arthur G. Koumantzelis.			

### Note E

### **Portfolio Management Changes**

On July 17, 2008, Roberto Versace was appointed a co-portfolio manager for the Fund. Mr. Versace replaces Craig Turnbull who resigned from MacarthurCook on June 27, 2008. Craig Dunstan remains a co-portfolio manager for the Fund. Mr. Versace has been a Fund Manager at MacarthurCook since July 2007. From September 2005 to June 2007, Mr. Versace was employed by the global investment and advisory firm Babcock & Brown as part of its Global Real Estate Team. From September 2000 to June 2004, Mr. Versace was an analyst with Colonial First State Global Asset Management, the largest manager of Australian sourced funds.

RMR Asia Real Estate Fund June 30, 2008

To our shareholders,

In the pages that follow, you will find data summarizing our financial results for the six months ended June 30, 2008, and our financial position as of June 30, 2008.

### **Relevant Market Conditions**

*Real Estate Industry Fundamentals.* In 2008, we expect commercial real estate fundamentals in the Asia region to remain generally healthy due to limited new supply. Office market vacancy rates are expected to remain low in Hong Kong, Singapore and Tokyo. Although there may be some slowing in the second half of 2008 and early 2009 due to decline in export industries, resilient national income growth in most countries, except for Japan, should lead to growing retail sales and rising rental values for retail property. The industrial real estate sector is robust due to the development of logistics networks in the emerging countries. Residential real estate prices are expected to increase in the longer term due to rising incomes and urbanization dynamics which is driving demand in China and India.

Economic growth in the remainder of 2008 is expected to remain strong relative to the rest of the world. For 2008, The International Monetary Fund expects 8.0% GDP growth for developing Asia and 1.5% for Japan. Rising inflation due to high food and energy prices and slowing exports may be short term risk to the rapid economic growth throughout the region.

Real estate companies in the region are generally conservatively financed. However, the credit tightening by lenders across the globe may be problematic for some Asia based real estate companies in 2008.

*Real Estate Industry Technicals.* We expect continued strong demand for real estate investments in the Asia region. High personal savings rates and attractive real estate yields are expected to lead to increasing values for real estate companies in the region, especially real estate companies that pay a regular dividend, such as REITs. Property yields in the region typically are 2-3% higher than long term government bond yields. The number of REITs in the region continues to grow, with several countries currently considering initiating REIT legislation, such as the Philippines, India and China.

### Fund Strategies, Techniques and Performance

Our primary investment objective is capital appreciation. There can be no assurance that we will achieve our investment objective.

During the six months ended June 30, 2008, our total return on net asset value, or NAV, was negative 24.5%. During that same period, the total return for the EPRA NAREIT Asia Index (an unmanaged index of Asia Pacific real estate common stocks) was negative 24.2%. We believe this index is relevant to us because all our investments as of June 30, 2008, excluding short term investments, were in securities of real estate companies

in countries covered by this index. The S&P 500 Index (an unmanaged index published as Standard and Poor's Composite Index of 500 common stocks) total return for the six months ended June 30, 2008 was negative 11.9%.

### **Recent Developments**

Because of the decline in NAV during the last 15 months and the Fund's relatively small size, the Fund's Board of Trustees is currently considering actions to reduce expenses and otherwise enhance value for the Fund's shareholders. These potential actions include combining the Fund with one or more other RMR closed end funds that have similar investment programs.

Thank you for your continued support. For more information, please view our website, at www.rmrfunds.com.

Sincerely,

Adam D. Portnoy President

### **RMR** Asia Real Estate Fund Notes to Financial Statements

#### June 30, 2008 (unaudited)

### Note A

#### (1) Organization

RMR Asia Real Estate Fund, or the Fund, was organized as a Massachusetts business trust on January 18, 2007, and is registered under the Investment Company Act of 1940, or the 1940 Act, as amended, as a non-diversified closed-end management investment company. The Fund had no operations prior to May 25, 2007, other than matters relating to the Fund's establishment, registration of the Fund's common shares under the Securities Act of 1933, and the sale of 5,000 common shares for \$100,000 to RMR Advisors, Inc., or RMR Advisors. On May 25, 2007, the Fund sold 4,750,000 common shares in an initial public offering. Proceeds to the Fund were \$90,535,000 after deducting underwriting commissions and \$190,000 of offering expenses.

#### (2) Interim Financial Statements

The accompanying June 30, 2008 financial statements have been prepared without audit. The Fund believes that disclosures made are adequate to make the information presented not misleading. In the opinion of the Fund's management, all adjustments, which include normal recurring adjustments considered necessary for a fair presentation, have been included. The Fund's operating results for this interim period are not necessarily indicative of the results that may be expected in the future.

#### (3) Use of Estimates

Preparation of these financial statements in conformity with accounting principles generally accepted in the United States requires the Fund's management to make estimates and assumptions that may affect the amounts reported in the financial statements and related notes. The actual results could differ from these estimates.

#### (4) Portfolio Valuation

Investment securities of the Fund are valued at the latest sales price reflected on the consolidated tape of the exchange that reflects the principal market for such securities whenever that price is readily available on that day; securities for which no sales were reported on that day, unless otherwise noted, are valued at the average of the closing bid and ask prices on that day. Any of the Fund's securities which are not readily marketable, which are not traded or which have other characteristics of illiquidity are valued by the Fund at fair value as determined in good faith under the supervision of the Fund's board of trustees. Numerous factors may be considered when determining fair value of a security, including cost at date of purchase, type of security, the nature and duration of restrictions on disposition of the security and whether the issuer of the security being fair valued has other securities of the same type outstanding. Short-term debt securities with less than 60 days until maturity may be valued at cost plus interest accrued, which approximates market value.

Some foreign markets close before the close of customary trading sessions on the American Stock Exchange or AMEX (normally 4:00 p.m. eastern time). Occasionally, events occur after the principal foreign exchange on which the foreign securities trade has closed but before the AMEX closes and the Fund determines net asset value, or NAV, that could affect the value of the securities the Fund owns or cause their prices to be unreliable. If these events are expected to materially affect the Fund's NAV, the prices of such securities will be adjusted to reflect their estimated fair value as of the close of the AMEX, as determined in good faith under procedures established by the Fund's board of trustees.

#### (5) Fair Value Measurements

The Fund has adopted the provisions of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements, or FAS 157, effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market for the investment. FAS 157 established a three tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk; for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity is own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level quoted prices in active markets for identical investments
- Level other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the six months ended June 30, 2008 maximized the use of observable inputs and minimized the use of unobservable inputs. When the S&P 500 Index fluctuates significantly from the previous day close, we believe that the closing price in the local market may no longer represent the fair value of foreign securities at the time of the U.S. market close. Accordingly, in such circumstances, we report holdings in such foreign securities at their fair values as determined by an independent security pricing service. The service uses a multi-factor model that includes such information as the issue's local closing price, relevant general and sector indices, currency fluctuations, depository receipts, and futures, as applicable. The model generates an adjustment factor for each security that is applied to the local closing price to adjust it for post closing events, resulting in the security's reported fair value.

The following is a summary of the inputs used as of June 30, 2008 in valuing the Fund's investments carried at value:

Valuatio	Valuation Inputs		Investments in Securities
Level 1 Level 2	Quoted prices Other significant observable inputs	\$	967,888 63,909,142
Level 3	Significant unobservable inputs		, ,
Total		\$	64,877,030

There were no investments in securities characterized as Level 3 as of December 31, 2007 or June 30, 2008.

#### (6) Securities Transactions and Investment Income

Securities transactions are recorded on a trade date basis. Dividend income is recorded on the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and accretion of discount on short term investments, is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on an identified cost basis.

#### (7) Taxes

The Fund has qualified and intends to qualify in the future as a "regulated investment company" and to comply with the applicable provisions of subchapter M of the Internal Revenue Code of 1986, as amended, so that it will generally not be subject to federal income tax. However, the Fund may be subject to a 4% excise tax to the extent the Fund does not distribute substantially all taxable earnings each year.

Some Asian governments may subject the Fund's investment income and securities sales to withholding or other taxes. For the six months ended June 30, 2008, \$32,320 of foreign taxes have been withheld from distributions to the Fund and recorded as a reduction of dividend income.

#### (8) Distributable Earnings

The Fund earns income, net of expenses, daily on its investments. It is the policy of the Fund to make distributions of its income at least annually in amounts at least equal to the amount necessary to maintain its status as a regulated investment company. Distributions to shareholders are recorded on the ex-dividend date. The Fund's distributions may consist of ordinary income (net investment income and short term capital gains), long term capital gains and return of capital. To the extent the Fund's net realized capital gains, if any, can be offset by capital loss carry forwards, it is the policy of the Fund not to distribute such gains.

Although subject to adjustments, the cost, gross unrealized appreciation and unrealized depreciation of the Fund's investments for federal income tax purposes as of June 30, 2008, are as follows:

Cost	\$ 82,662,895
Gross unrealized appreciation Gross unrealized depreciation	\$ 199,985 (17,985,850)
Net unrealized appreciation/(depreciation)	\$ (17,785,865)

#### (9) Concentration of Risk

Under normal market conditions, the Fund's investments are concentrated in common shares, preferred shares and debt securities, including convertible preferred and debt securities, issued by Asian real estate companies and REITs. The value of Fund shares may fluctuate more than the shares of a fund not concentrated in the real estate industry or in the Asian region due to economic, legal, regulatory, technological or other developments affecting the Asian real estate industry and securities market.

#### (10) Foreign Securities Risk

As compared to U.S. securities, foreign securities may be issued by companies which provide less financial and other information, and which are subject to less developed and difficult to access legal systems, less stringent accounting, auditing and financial reporting standards or different governmental regulations. As compared to

U.S. securities markets, foreign securities markets may have different settlement procedures, may have higher transaction costs, may be conducted in a less regulated manner, are generally smaller and may be less liquid and more volatile than securities markets in the U.S. The value of foreign securities may also decline or be unstable because of political, social or economic events or instability outside of the U.S.

#### (11) Foreign Currency Transactions

The accounting records of the Fund are maintained in U.S. dollars. Portfolio securities and other assets and liabilities denominated in a foreign currency are translated daily into U.S. dollars at the prevailing rates of exchange. Purchases and sales of securities, income receipts and expense payments are translated into U.S. dollars at the prevailing exchange rates on the respective transaction dates.

The Fund does not isolate the portion of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in the market prices of investments. Such fluctuations are included in net realized and unrealized gain (loss) on investments. Net realized gain (loss) on foreign currency transactions represents net foreign currency gain (loss) from forward currency contracts, disposition of foreign currency gain (loss) realized between the trade and settlement dates on securities transactions, and the difference between the amount of dividends, interest and foreign currency appreciation/(depreciation) arises from changes in the value of assets and liabilities, other than investments in securities, as a result of changes in exchange rates.

### Note **B**

#### Advisory, Subadvisory and Administration Agreements and Other Transactions with Affiliates

The Fund has an advisory agreement with RMR Advisors, to provide the Fund with a continuous investment program, oversee the subadvisor and generally manage the business affairs of the Fund in accordance with its investment objectives and policies. Pursuant to the agreement, RMR Advisors is compensated at an annual rate of 1% of the Fund's average daily managed assets.

RMR Advisors has contractually agreed to waive a portion of its annual fee equal to 0.25% of the Fund's average daily managed assets from May 25, 2007 until May 25, 2012. The Fund incurred net advisory fees of \$278,842 during the six months ended June 30, 2008. The amount of fees waived by the Advisor was \$92,947 for the six months ended June 30, 2008.

RMR Advisors has entered into a subadvisory agreement with MacarthurCook Investment Managers Ltd., or MacarthurCook, to make day-to-day investment decisions and to generally manage the business affairs of the Fund in accordance with its investment objectives and policies. Pursuant to the agreement, RMR Advisors, and not the Fund, pays the subadvisor a monthly fee equal to an annual rate of 0.375% of the Fund's average daily managed assets. MacarthurCook has agreed to waive a portion of the fee payable by RMR Advisors such that until May 25, 2012, the fee payable will be equal to 0.25% of the Fund's average daily managed assets.

RMR Advisors also performs administrative functions for the Fund pursuant to an administration agreement with the Fund. RMR Advisors has entered into a subadministration agreement with State Street Bank and Trust Company, or State Street, to perform substantially all fund accounting and other administrative services. Under the administration agreement, RMR Advisors is entitled to reimbursement of the cost of

providing administrative services. The Fund reimbursed RMR Advisors for \$45,030 of subadministrative fees charged by State Street for the six months ended June 30, 2008.

Each trustee who is not a director, officer or employee of RMR Advisors and who is not an "interested person" of the Fund as defined under the 1940 Act is considered to be a "disinterested trustee". Disinterested trustees are each paid by the Fund an annual fee plus attendance fees for board and committee meetings. The Fund incurred \$8,900 of trustee fees and expenses during the six months ended June 30, 2008.

The Fund's board of trustees and separately the disinterested trustees authorized the Fund to make reimbursement payments to RMR Advisors for costs related to the Fund's compliance and internal audit programs. The Fund incurred \$17,344 of compliance and internal audit expense during the six months ended June 30, 2008. The Fund also participates in pooled insurance programs with RMR Advisors and other funds managed by RMR Advisors and makes payments of allocated portions of related premiums. The Fund incurred \$7,078 of insurance expense during the six months ended June 30, 2008.

### Note C

#### **Securities Transactions**

During the six months ended June 30, 2008, there were purchases and sales transactions (excluding short term securities) of \$20,968,472 and \$22,622,306 respectively. Brokerage commissions on securities transactions amounted to \$92,271 during the six months ended June 30, 2008.

### Note D

#### Submission of Proposals to a Vote of Shareholders

The annual meeting of Fund shareholders was held on April 7, 2008. Following is a summary of the proposal submitted to shareholders for vote at the meeting and votes cast:

Proposal	Votes for	Votes withheld	Votes abstained		
Election of John L. Harrington as an Independent Trustee					
until the 2011 annual meeting	4,564,949	21,446			
The following trustees' terms of office as trustee continued after the Fund's annual meeting: Barry M. Portnoy, Gerard M. Martin, Frank J.					
Bailey and Arthur G. Koumantzelis.					

### Note E

#### **Portfolio Management Changes**

On July 17, 2008, Roberto Versace was appointed a co-portfolio manager for the Fund. Mr. Versace replaces Craig Turnbull who resigned from MacarthurCook on June 28, 2008. Craig Dunstan remains a co-portfolio manager for the Fund. Mr. Versace has been a Fund Manager at MacarthurCook since July 2007. From September 2005 to June 2007, Mr. Versace was employed by the global investment and advisory firm Babcock & Brown as part of its Global Real Estate Team. From September 2000 to June 2004, Mr. Versace was an analyst with Colonial First State Global Asset Management, the largest manager of Australian sourced funds.

**RMR Dividend Capture Fund** 

June 30, 2008

#### To our shareholders,

In the pages that follow, you will find data summarizing our financial results for the six months ended June 30, 2008, and our financial position as of June 30, 2008.

I am pleased to report that the Fund has now completed its first six months of operation since its launch in December of 2007. Following the IPO, we raised an additional \$10 million in auction rate preferred securities in February 2008, effectively leveraging the Fund 29%.

#### **Relevant Market Conditions**

#### Closed-End Fund Market.

The closed-end fund market remained volatile during the first half of 2008. Despite several attempts by the Fed to inject liquidity into the capital markets generally in the form of lower rates and new lending facilities, credit availability remained tight as banks reduced lending in an effort to conserve cash. The auction rate securities market which had been a major source of leverage to closed end funds, collapsed in February, as banks decided not support the auctions.

After reaching \$27.6 billion in full year 2007, closed end IPOs dried up in the first half of 2008, with only one offering brought to the market in January for a total raise of \$120 million.

#### Real Estate Industry Fundamentals.

Despite a slowing economy and negative sentiment regarding the direction of the financial markets, real estate fundamentals remained stable during the first half of 2008. Occupancy levels held up and rents continued to increase, albeit at a slower pace. Property sales, however, slowed substantially as a result of tighter lending standards and wide differences between buyers and sellers regarding valuations. With limited transactions taking place, it is hard to estimate how much commercial property values have declined. Some estimates put the figure somewhere between negative 10% to negative 15%. What is clear, however, is that property values are no longer at levels seen in early 2007.

For the balance of the year, we believe the economy will likely continue to struggle due to higher food and energy prices, lack of employment growth and a weak housing market. Lending will continue to be restricted, hampering overall economic growth as financial institutions continue to strengthen their balance sheets.

#### Real Estate Industry Technicals.

Throughout the first half of the year, the REIT market continued to exhibit high volatility. REITs started the year on a negative note, down almost 12% in mid-January, and rebounded sharply during March and April (up 6% during each month) following the Fed's and J.P. Morgan's rescue of Bear Stearns. Concern about additional write-offs from financial institutions sent the REIT market, along with other financial services companies, into negative territory during the month of June. REITs were down 11% in June and finished the

first half of the year down 3.5%. Despite the volatility, REIT dedicated funds saw \$3 billion of inflows during the first six months of the year, an encouraging sign after outflows of more than \$9 billion from the period March to December 2007.

#### Fund Strategies, Techniques and Performance

Our primary objective is to earn and pay to our common shareholders a high current dividend income by investing in real estate companies and portfolio funds. Our secondary objective is capital appreciation. There can be no assurance that we will achieve our investment objectives.

During the six months ended June 30, 2008, our total return on net asset value, or NAV (including NAV changes and assuming a hypothetical reinvestment of distributions at NAV), was negative 5.7%. During that same period, the total return for the MSCI US REIT Total Return Index (an unmanaged index of REIT common stocks) was negative 3.5% and the total return for the Fund Data U.S. All Taxable ex-Foreign Equity Index (a market cap weighted Index of closed-end funds) was negative 5.9%. We believe these two indices are relevant to us because our investments, excluding short term investments, as of June 30, 2008, included 46% in REIT common stocks and 52% in common stocks of closed-end funds. The S&P 500 Index (an unmanaged index published as Standard and Poor's Composite Index of 500 common stocks) total return for the six months ended June 30, 2008 was negative 11.9%.

#### **Recent Developments**

Recently, credit markets, including the market for auction rate securities such as the Fund's \$10 million in preferred shares, have experienced a liquidity crisis. To date, no auctions for the Fund's preferred shares have failed; however, an affiliate of the Fund's lead broker dealer for its preferred shares has purchased a significant amount of the Fund's preferred shares in the auctions. Please see notes to the financial statements for more information.

Because of the decline in NAV during the last 15 months and the Fund's relatively small size, the Fund's Board of Trustees is currently considering actions to reduce expenses and otherwise enhance value for the Fund's shareholders. These potential actions include combining the Fund with one or more other RMR closed end funds that have similar investment programs.

Thank you for your continued support. For more information, please view our website, at www.rmrfunds.com.

Sincerely,

Adam D. Portnoy President August 27, 2008

(a) Commencement of operations. (b)				
Based on average shares outstanding.				

(c)

Net asset value at December 12, 2007, reflects the deduction of the average sales load and offering costs of \$0.90 per share paid by the holders of common shares from the \$20.00 offering price. We paid a sales load of \$0.94 per share on 1,200,000 shares sold to the public and no sales load or offering costs on 50,000 common shares sold to affiliates of RMR Advisors for \$20.00 per share.

As discussed in Note A (8) to the financial statements, these amounts are subject to change to the extent 2008 distributions by the issuers of the Fund's investments are characterized as capital gains and return of capital.

(e) Total returns for periods of less than one year are not annualized.

Total return based on per share market price assumes the purchase of common shares at the market price on the first day and sales of common shares at the market price on the last day of the period indicated; dividends and distributions, if any, are assumed to be reinvested at market prices on the ex-dividend date. The total return based on net asset value, or NAV, assumes the purchase of common shares at NAV on the first day and sales of common shares at NAV on the last day of the period indicated; distributions are assumed to be reinvested at NAV on the ex-dividend date. Results represent past performance and do not guarantee future results.

(g) Annualized.

Asset coverage per share equals net assets attributable to common shares plus the liquidation preference of the preferred shares divided by the total number of preferred shares outstanding at the end of the period.

See notes to financial statements.

### **RMR Dividend Capture Fund** Notes to Financial Statements

#### June 30, 2008 (unaudited)

### Note A

#### (1) Organization

RMR Dividend Capture Fund, or the Fund, was organized as a Massachusetts business trust on June 14, 2007, and is registered under the Investment Company Act of 1940, as amended, or the 1940 Act, as a non-diversified closed-end management investment company. The Fund had no operations prior to December 18, 2007, other than matters relating to the Fund's establishment, registration of the Fund's common shares under the Securities Act of 1933, and the sale of 5,000 common shares for \$100,000 to RMR Advisors, Inc., or RMR Advisors. On December 18, 2007, the Fund sold 1,250,000 common shares in an initial public offering including 50,000 shares sold to affiliates of RMR Advisors. Proceeds to the Fund were \$23,872,000 after deducting underwriting commissions and \$48,000 of offering expenses. There was no underwriting commission or offering expenses paid on shares sold to the affiliates of RMR Advisors.

#### (2) Interim Financial Statements

The accompanying June 30, 2008 financial statements have been prepared without audit. The Fund believes that disclosures made are adequate to make the information presented not misleading. In the opinion of the Fund's management, all adjustments, which include normal recurring adjustments considered necessary for a fair presentation, have been included. The Fund's operating results for this interim period are not necessarily indicative of the results that may be expected on an annual basis in the future.

#### (3) Use of Estimates

Preparation of these financial statements in conformity with accounting principles generally accepted in the United States requires the Fund's management to make estimates and assumptions that may affect the amounts reported in the financial statements and related notes. The actual results could differ from these estimates particularly for reasons described in Note A (8), and for other reasons.

#### (4) Portfolio Valuation

Investment securities of the Fund are valued at the latest sales price whenever that price is readily available on that day; securities for which no sales were reported on that day, unless otherwise noted, are valued at the average of the closing bid and ask prices on that day. Securities traded primarily on the NASDAQ Stock Market, or NASDAQ, are normally valued by the Fund at the NASDAQ Official Closing Price, or NOCP, provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., eastern time, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Some fixed income securities may be valued using pricing provided by a pricing service. Any of the Fund's securities which are not readily marketable, which are not traded or which have other characteristics of illiquidity are valued by the Fund at fair value as determined in good faith under the supervision of the Fund's board of trustees. Numerous factors may be considered when determining fair value of a security, including cost at date of purchase, type of security, the nature and duration of restrictions on disposition of the security and whether the issuer of the security being fair valued has other securities of the same type outstanding. Short term debt securities with less than 60 days until maturity may be valued at cost plus interest accrued, which approximates market value.

(5) Fair Value Measurements

The Fund has adopted the provisions of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements, or FAS 157, effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market for the investment. FAS 157 established a three tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk; for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity is own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the six months ended June 30, 2008 maximized the use of observable inputs and minimized the use of unobservable inputs. The Fund did not fair value any of its securities.

The following is a summary of the inputs used as of June 30, 2008 in valuing the Fund's investments carried at value:

Valuation Inputs		Investments in Securities
Level 1 Level 2 Level 3	Quoted prices Other significant observable inputs Significant unobservable inputs	\$ 31,204,762
Total		\$ 31,204,762

There were no investments in securities characterized as level 3 as of December 31, 2007, or June 30, 2008.

#### (6) Securities Transactions and Investment Income

Securities transactions are recorded on a trade date basis. Dividend income is recorded on the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and

accretion of discount on short term investments, is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on an identified cost basis.

### (7) Taxes

The Fund has qualified and intends to qualify in the future as a "regulated investment company" and to comply with the applicable provisions of subchapter M of the Internal Revenue Code of 1986, as amended, so that it will generally not be subject to federal income tax. However, the Fund may be subject to a 4% excise tax to the extent the Fund does not distribute substantially all taxable earnings each year.

#### (8) Distributable Earnings

The Fund earns income, net of expenses, daily on its investments. It is the policy of the Fund to pay a stable distribution amount to common shareholders on a monthly basis and distributions to Fund shareholders are declared pursuant to this policy. On July 11, 2008, the Fund declared regular monthly distributions of \$0.167 per common share payable in July, August and September 2008. Distributions to shareholders are recorded on the ex-dividend date. The Fund's distributions may consist of ordinary income (net investment income and short term capital gains), long term capital gains and return of capital. To the extent the Fund's net realized capital gains, if any, can be offset by capital loss carry-forwards, it is the policy of the Fund not to distribute such gains. Distributions to preferred shareholders are determined as described in Note D.

The Fund has substantial investments in real estate investment trusts, or REITs, and closed end investment management companies which are generally not subject to federal income taxes. Distributions that the Fund receives from these investments can be classified as ordinary income, capital gain income or return of capital by the issuers that make these distributions to the Fund. However, it is not possible to characterize distributions received from these investments during interim periods because the issuers do not report their tax characterization until subsequent to year end. Final characterization of the Fund's 2008 distributions to shareholders is also dependent upon the magnitude or timing of the Fund's securities transactions prior to year end. Therefore it is likely that some portion of the Fund's 2008 investment income and distributions to shareholders will be recharacterized as long term capital gain and return of capital for financial statement and federal income tax purposes subsequent to year end and reflected accordingly in the Fund's year end financial statements.

Although subject to adjustments, the cost, gross unrealized appreciation and unrealized depreciation of the Fund's investments for federal income tax purposes as of June 30, 2008, are as follows:

Cost	\$ 35,194,497
Gross unrealized appreciation Gross unrealized depreciation	\$ 32,576 (4,022,311)
Net unrealized appreciation/(depreciation)	\$ (3,989,735)

#### (9) Concentration of Risk

Under normal market conditions, the Fund's investments are concentrated in income producing common shares, preferred shares and debt securities, including convertible preferred and debt securities, issued by real estate companies and REITs and common shares of closed end investment management companies. The value of Fund shares may fluctuate more than the shares of a fund not concentrated in the real estate industry due to

economic, legal, regulatory, technological or other developments affecting the United States real estate industry. Some of the closed end investment management companies in which the Fund invests may invest substantially all of their managed assets in one sector including real estate, and therefore carry the risk of that particular sector or industry group.

### Note **B**

#### Advisory and Administration Agreements and Other Transactions with Affiliates

The Fund has an advisory agreement with RMR Advisors, Inc., or RMR Advisors, to provide the Fund with a continuous investment program, to make day-to-day investment decisions and to generally manage the business affairs of the Fund in accordance with its investment objectives and policies. Pursuant to the agreement, RMR Advisors is compensated at an annual rate of 1% of the Fund's average daily managed assets. Managed assets means the total assets of the Fund less liabilities other than any indebtedness entered into for purposes of leverage. For purposes of calculating managed assets, the liquidation preference of preferred shares is not considered a liability.

RMR Advisors also performs administrative functions for the Fund pursuant to an administration agreement with the Fund. RMR Advisors has entered into a subadministration agreement with State Street Bank and Trust Company, or State Street, to perform substantially all fund accounting and other administrative services. Under the administration agreement, RMR Advisors is entitled to reimbursement of the cost of providing administrative services. The Fund reimbursed RMR Advisors for \$49,418 of subadministrative fees charged by State Street for the six months ended June 30, 2008.

Each trustee who is not a director, officer or employee of RMR Advisors and who is not an "interested person" of the Fund as defined under the 1940 Act is considered to be a "disinterested trustee". Disinterested trustees are each paid by the Fund an annual fee plus attendance fees for board and committee meetings. The Fund incurred \$8,900 of trustee fees and expenses during the six months ended June 30, 2008.

The Fund's board of trustees and separately the disinterested trustees authorized the Fund to make reimbursement payments to RMR Advisors for costs related to the Fund's compliance and internal audit programs. The Fund incurred \$17,344 of compliance and internal audit expense during the six months ended June 30, 2008. The Fund also participates in pooled insurance programs with RMR Advisors and other funds managed by RMR Advisors and makes payments of allocated portions of related premiums. The Fund incurred \$5,276 of insurance expense during the six months ended June 30, 2008.

### Note C

#### **Securities Transactions**

During the six months ended June 30, 2008, there were purchases and sales transactions (excluding short term securities) of \$40,012,692 and \$26,979,939 respectively. Brokerage commissions on securities transactions amounted to \$98,649 during the six months ended June 30, 2008.

### Note D

#### **Preferred Shares**

The Fund's 400 outstanding Series F auction preferred shares have a liquidation preference of \$25,000 per share plus an amount equal to accumulated but unpaid distributions. The preferred shares are senior to the Fund's common shares and rank on parity with any other class or series of preferred shares of the Fund as to the payment of periodic distributions, including distribution of assets upon liquidation. If the Fund does not timely cure a failure to (1) maintain asset coverage for the preferred shares as required by rating agencies, or (2) maintain asset coverage, as defined in the 1940 Act, of at least 200%, the preferred shares will be subject to redemption in an amount equal to their liquidation preference plus accumulated but unpaid distributions. The holders of the preferred shares have voting rights equal to the holders of the Fund's common shares and generally vote together with the holders of the common shares as a single class. Holders of the preferred shares, voting as a separate class, also are entitled to elect two of the Fund's trustees. The Fund pays distributions on the preferred shares at a rate set at auctions held generally every seven days. Distributions are generally payable every seven days, on the first business day following the end of a distribution period. The preferred share distribution rate was 4.15% per annum as of June 30, 2008.

To date, no auctions for preferred securities of the Fund have failed to attract sufficient clearing bids. However, an affiliate of the Fund's lead broker-dealer for its preferred securities has purchased a significant amount of the Fund's preferred securities in the auctions. If this affiliate of the Fund's lead broker-dealer had not been supporting the Fund's auctions, the auctions likely would have failed and holders of the Fund's preferred shares would not have been able to sell their preferred shares in the auctions. There can be no assurance that this or any other affiliate of the Fund's lead broker-dealer would purchase Fund preferred shares in any future auction of Fund preferred securities or that the Fund will not have any auction for its preferred securities fail. If an auction of the Fund's preferred shares should fail, the dividend rate for the next succeeding dividend period is set according to a pre-determined formula, and the resulting rate may be higher than the rate which the Fund would otherwise pay as a result of a successful auction. In addition, if an auction fails, holders of the Fund's preferred shares may not be able to sell their preferred shares in that auction. If auctions for the Fund's preferred shares fail, or if market conditions generally frustrate the Fund's ability to enhance investment results through the investment of capital attributable to its outstanding preferred shares, such factors may necessitate a change in the form and/or amount of investment leverage used by the Fund. The Fund has no current intention to change the form or degree of investment leverage that it uses. The use of alternative forms of leverage and/or a reduction in the degree of investment leverage used by the Fund in its investment program could result in reduced investment returns for common shareholders as compared to the returns that historically have been achieved by the Fund through the use of preferred share leverage in favorable market conditions. The Fund proactively manages compliance with asset coverage and other financial ratio requirements applicable to the preferred shares. In order to facilitate compliance with such requirements, and without further notice of its intention to do so, the Fund may from time to time purchase or otherwise acquire its outstanding preferred shares in the open market, in other nondiscriminatory secondary market transactions, pursuant to tender offers or other offers to repurchase preferred shares, or in other permissible purchase transactions, and also may from time to time call or redeem preferred shares in accordance with their terms.

### Note E

### Submission of Proposals to a Vote of Shareholders

The annual meeting of Fund shareholders was held on April 7, 2008. Following is a summary of the proposal submitted to shareholders for vote at the meeting and votes cast:

Proposal	Votes for	Votes withheld	Votes abstained
Common and Preferred Shares Election of John L. Harrington as Independent Trustee			
until the 2011 annual meeting.	1,040,290	700	
The following trustees' terms of office as trustee continued after t Bailey and Arthur G. Koumantzelis.	the Fund's annu	al meeting: Barry	M. Portnoy, Gerard M. Martin, Frank J

RMR Real Estate Fund RMR Hospitality and Real Estate Fund RMR F.I.R.E. Fund RMR Preferred Dividend Fund RMR Asia Pacific Real Estate Fund RMR Asia Real Estate Fund RMR Dividend Capture Fund June 30, 2008

For the purposes of the following, RMR Real Estate Fund (RMR), RMR Hospitality and Real Estate Fund (RHR), RMR F.I.R.E. Fund (RFR), RMR Preferred Dividend Fund (RDR), RMR Asia Pacific Real Estate Fund (RAP), RMR Asia Real Estate Fund (RAF) and RMR Dividend Capture Fund (RCR) are each referred to as a "Fund" or collectively as the "Funds".

#### **Privacy Notice**

Each Fund advised by RMR Advisors, Inc. recognizes and respects the privacy concerns of its shareholders. The Funds do not sell your name or other information about you to anyone. The Funds collect nonpublic personal information about you in the course of doing business with shareholders and investors. "Nonpublic personal information" is personally identifiable financial information about you. For example, it includes information regarding your social security number, account balance, bank account information and purchase and redemption history.

#### The Funds collect this information from the following sources:

Information we receive from you on applications or other forms;

Information about your transactions with us and our service providers, or others; and

Information we receive from consumer reporting agencies (including credit bureaus).

#### What the Funds disclose and to whom the Funds disclose information.

The Funds only disclose nonpublic personal information the Funds collect about shareholders as permitted by law. For example, the Funds may disclose nonpublic personal information about shareholders to nonaffiliated third parties such as:

To government entities, in response to subpoenas or to comply with laws or regulations.

When you, the shareholder, direct the Funds to do so or consent to the disclosure.

To companies that perform necessary services for the Funds, such as data processing companies that the Funds use to process your transactions or maintain your account.

To protect against fraud, or to collect unpaid debts.

In connection with disputes or litigation between the Funds and the concerned shareholders.

#### Information about former shareholders.

If you decide to close your account(s) or become an inactive customer, we will adhere to the privacy policies and practices described in this notice.

#### How the Funds safeguard information.

The Funds conduct their business through directors, officers and third parties that provide services pursuant to agreements with the Funds (for example, the service providers described above). The Funds do not have any employees. The Funds restrict access to your personal and account information to those persons who need to know that information in order to provide services to you. The Funds or their service providers maintain physical, electronic and procedural safeguards that comply with federal standards to guard your nonpublic personal information.

#### Customers of other financial institutions.

In the event that you hold shares of the Funds through a financial intermediary, including, but not limited to, a broker-dealer, bank or trust company, the privacy policy of your financial intermediary will govern how your non-public personal information will be shared with non-affiliated third parties by that entity.

#### **Proxy Voting Policies and Procedures**

A description of the policies and procedures that are used to vote proxies relating to each Fund's portfolio securities is available: (1) without charge, upon request, by calling us at (866)790-8165; and (2) as an exhibit to each Fund's annual report on Form N-CSR, which is available on the website of the U.S. Securities and Exchange Commission (the "Commission") at *http://www.sec.gov*. Information regarding how proxies received by each Fund during the most recent 12 month period ended June 30, 2008, have been voted is available (1) without charge, on request, by calling us at (866)790-3165, or (2) by visiting the Commission's website at *http://www.sec.gov* and accessing each Fund's Form N-PX.

# Procedures for the Submission of Confidential and Anonymous Concerns or Complaints about Accounting, Internal Accounting Controls or Auditing Matters

The Funds are committed to compliance with all applicable securities laws and regulations, accounting standards, accounting controls and audit practices and have established procedures for handling concerns or complaints about accounting, internal accounting controls or auditing matters. Any shareholder or other interested party who desires to communicate with our independent trustees or any other trustees, individually or as a group, may do so by filling out a report at the "Contact Us" section of our website (*www.rmrfunds.com*), by calling our toll-free confidential message system at 866-511-5038, or by writing to the party for whom the communication is intended, care of our director of internal audit, RMR Funds, 400 Centre Street, Newton, MA 02458. Our director of internal audit will then deliver any communication to the appropriate party or parties.

#### **Portfolio Holdings Reports**

Each Fund files its complete schedule of portfolio holdings with the Commission for the first and third quarters of each fiscal year on Form N-Q, which are available on the Commission's website at http://www.sec.gov. The Funds' Forms N-Q may also be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling the Commission at 1-800-SEC-0330. Each Fund provides additional data on its website at *www.rmrfunds.com*.

#### Certifications

Each Fund's principal executive officer and principal financial officer certifications required by Section 302 of the Sarbanes-Oxley Act of 2002 and filed with the Fund's N-CSR are available on the Commission's website at *http://www.sec.gov*.

WWW.RMRFUNDS.COM

#### Item 2. Code of Ethics.

The information is only required for the annual report on Form N-CSR.

#### Item 3. Audit Committee Financial Expert.

The information is only required for the annual report on Form N-CSR.

#### Item 4. Principal Accountant Fees and Services.

The information is only required for the annual report on Form N-CSR.

#### Item 5. Audit Committee of Listed Registrants.

The information is only required for the annual report on Form N-CSR.

#### Item 6. Schedule of Investments.

The information required under Item 6 is included as part of the report to shareholders filed under Item 1 of this Form N-CSR.

#### Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies.

The information is only required for the annual report on Form N-CSR.

#### Item 8. Portfolio Managers of Closed-End Management Investment Companies.

The information is only required for the annual report on Form N-CSR.

#### Item 9. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers.

During the six months ended June 30, 2008, there were no purchases made by or on behalf of the registrant or any "affiliated purchaser" as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934, as amended (the "Exchange Act") (17 CFR 240.10b-18(a)(3)), of shares of the registrant's equity securities that are registered by the registrant pursuant to Section 12 of the Exchange Act.

#### Item 10. Submission of Matters to a Vote of Security Holders.

Effective February 20, 2008, no shareholder may give a notice to the registrant's secretary of a nomination to the registrant's board of trustees unless such shareholder holds a certificate or certificates, as the case may be, for all registrant shares owned by such shareholder, and a copy of each such certificate shall accompany such shareholder's notice to the secretary in order for such notice to be effective.

#### Item 11. Controls and Procedures.

(a)

The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the "1940 Act")) are effective, as of a date within 90 days of the filing date of this report, based on their evaluation of these controls and procedures.

(b)

There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act) that occurred during the registrant's second fiscal quarter of the period covered by this report that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

#### Item 12. Exhibits.

(a)

(2) Certifications of principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the 1940 Act are attached hereto.

(b)

Certifications of principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(b) under the 1940 Act and Section 906 of the Sarbanes-Oxley Act of 2002 are attached hereto.

#### SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
