Item 2.05. Costs Associated With Exit or Disposal Activities.

In November 2012, the Company's Board of Directors authorized an enterprise-wide restructuring plan (the "2013 Project") and delegated authority to the Company's management to determine the final actions with respect to this plan. On January 27, 2014, the Board of Directors of Energizer Holdings, Inc. (the "Company" or "Energizer") authorized an expansion of scope of the previously announced 2013 Project and delegated authority to the Company's management to determine the final actions with respect to the plan. The 2013 Project was previously reported in the Company's Current Report on Form 8-K filed with the Securities and Exchange Commission (the "SEC") on November 8, 2012, as amended on Form 8-K/A filed on December 12, 2012 and May 7, 2013, and further described in the Company's Annual Report on Form 10-K for the year ended September 30, 2013 and filed with the SEC on November 21, 2013. As previously disclosed, the primary objectives of the 2013 Project included reduction in workforce, consolidation of functional support across the organization, reduced overhead spending, creation of a center-led purchasing function, and rationalization and streamlining of the Household Products operations facilities, product portfolio and marketing organization. The Company increased the scope of the 2013 Project to include the balance of the organization. As a result of the expanded scope of the Company's restructuring efforts, incremental costs will be incurred to successfully execute the program. It is estimated that fiscal 2014 restructuring costs will be in the range of \$100 million to \$130 million, including the costs related to the expanded project scope, an increase of \$30 million to \$40 million versus original estimates. Total 2013 Project costs are estimated to increase from the original outlook of \$250 million to approximately \$350 million.

Total project-to-date costs associated with the 2013 Project are approximately \$185 million, of which approximately \$50 million relates to non-cash asset impairment and accelerated depreciation charges, approximately \$55 million relates to severance and related benefit costs, and approximately \$80 million relates to consulting, program management and other exit costs. Consulting, program management and other exit costs are inclusive of approximately \$8 million in certain information technology enablement costs and approximately \$6 million in obsolescence charges related to the exit of certain non-core product lines, both of which are considered part of the overall 2013 Project.

A summary of the remaining estimated costs for the 2013 Project is as follows. These amounts are inclusive of the expanded scope initiatives described above. Total, as well as category ranges, are estimates.

- ▲ Approximately \$15-\$30 million related to plant closure and accelerated depreciation charges,
- ▲ Approximately \$35-\$45 million related to severance and related benefit costs,
- ▲ Approximately \$35-\$45 million related to consulting and program management, and
- ▲ Approximately \$30-\$40 million related to other restructuring related costs.

Costs remaining associated with certain information technology enablement activities related to our restructuring initiatives are approximately \$10-\$15 million. In addition, the Company expects to incur incremental capital expenditures of \$20-\$30 million over the next 9 months, related primarily to information technology enablement of certain restructuring initiatives.

This Form 8-K contains both historical and forward-looking statements.
