PRECISION OPTICS CORPORATION, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying consolidated financial statements include the accounts of Precision Optics Corporation, Inc. and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

These financial statements have been prepared by the Company, without audit, and reflect normal recurring adjustments which, in the opinion of management, are necessary for a fair statement of the results of the third quarter and nine months of the Company's fiscal year 2002. These financial statements do not include all disclosures associated with annual financial statements and, accordingly, should be read in conjunction with footnotes contained in the Company's financial statements for the period ended June 30, 2001 together with the auditors' report filed under cover of the Company's 2001 Annual Report on Form 10-KSB.

Basic loss per share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the period. For the nine months ended March 31, 2002 and 2001, the effect of stock options and warrants was antidilutive; therefore, they were not included in the computation of diluted loss per share. The number of shares that were excluded from the computation, as their effect would be antidilutive were 1,231,698 and 1,217,598 for the nine months ended March 31, 2002 and 2001, respectively.

2. INVENTORIES

Inventories are stated at the lower of cost (first-in, first-out) or market and consist of the following:

	March 31, 2002	June 30, 2001
Raw Materials	\$ 585,747	\$ 777,269
Work-In-Process	276,281	462,517
Finished Goods and Components	253,008	284,333
Total Inventories	\$ 1,115,036	\$ 1,524,119

3. PROVISION FOR ASSET IMPAIRMENT AND RESTRUCTURING

The sharp reduction in demand and industry-wide excess inventory levels of passive telecommunications components has hampered the Company's ability to obtain new orders for its DWDM products. In calendar year 2001, the Company announced that two major customers for DWDM filters had canceled the balance of orders placed with the Company.

Revenues from DWDM filters and test instrumentation in the quarters ended September 30, 2001 and December 31, 2001 were sharply lower than in previous quarters. Current business prospects in this marketplace remain uncertain because of the lack of visibility concerning future spending levels for telecommunications equipment.

Asset Impairment:

In accordance with Statement of Financial Accounting Standards (SFAS) No. 121: *Accounting for the Impairment of Long-Lived Assets and For Long-Lived Assets to be Disposed of*, the Company reviews the recoverability of its long-lived assets when changes in circumstances indicate the carrying value of the asset may not be recoverable. As a result of the business conditions noted above, the Company determined such an assessment was required for the assets invested in its optical thin films business. The Company assesses recoverability of its assets based upon cumulative expected undiscounted cash flows of the related product lines. As a result of this assessment, the Company determined that the costs invested in certain property, plant and equipment of the Company's optical thin film coating business are not recoverable and, under generally accepted accounting principles, should be written down to the lower of carrying value or fair market value. Fair market value was determined by an independent appraisal.

Consequently, in the quarter ended September 30, 2001, the Company recorded a pretax non-cash charge of \$3,444,378 for the impairment in value of certain of its optical thin film coating property, plant and equipment.

Restructuring:

On August 1, 2001 the Company announced that it had reduced its workforce by approximately 30%, or 24 employees, and indicated it would be monitoring marketplace conditions to determine whether additional costs savings measures would be necessary.

The Company has taken additional measures to reflect the lower revenue expectations in its telecommunications business by a further reduction in its workforce in November, 2001, and by recording provisions for employee severance and costs of idle leased space in its Optical Thin Films Technology Center. The November 2001 workforce reduction affected 13 employees, or 24% of the existing workforce.

As a result of these actions, the Company recorded a non-recurring pretax charge to earnings of \$668,250 in the second quarter ended December 31, 2001, consisting of (1) a non-cash element of \$482,000 representing the present value of future lease payments related to idle space in the Company's Optical Thin Films Technology Center, and (2) \$186,250 representing employee severance costs.

4. PROVISION FOR INVENTORY WRITE-DOWN

As a result of the business conditions noted above, the Company determined that certain inventories of DWDM filters and filter test instrumentation may not be sold within the Company's business cycle or the products' life cycle. Consequently, the Company recorded, in cost of goods sold, a provision for excess and obsolete inventory of approximately \$540,000 in the quarter ended September 30, 2001.

PRECISION OPTICS CORPORATION, INC. AND SUBSIDIARIES

Management's Discussion and Analysis of Financial

Condition and Results of Operations

Important Factors Regarding Forward-Looking Statements

When used in this discussion, the words "believes", "anticipates", "intends to", and similar expressions are intended to identify forward-looking statements. Such statements are subject to certain risks and uncertainties which could cause actual results to differ materially from those projected. These risks and uncertainties, many of which are not within the Company's control, include, but are not limited to, uncertainty of future demand for the Company's products; the uncertainty and timing of the successful development of the Company's new products; the risks associated with obtaining the required regulatory approvals to market the Company's medical products; the risks associated with reliance on a few key customers; the Company's ability to attract and retain personnel with the necessary scientific and technical skills; the timing and completion of significant orders; the timing and amount of the Company's research and development expenditures; the timing and level of market acceptance and demand for customers' products for which the Company supplies components; the level of market acceptance of competitors' products; the ability of the Company to control costs associated with performance under fixed price contracts; the performance and reliability of the Company's vendors; the continued availability to the Company of essential supplies, materials and services; and the Company's ability to maintain the listing of its common stock on the Nasdaq SmallCap Market. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. The Company undertakes no obligation to publicly release the result of any revision to these forward-looking statements which may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Liquidity and Capital Resources

For the nine months ended March 31, 2002, the Company's cash and cash equivalents decreased by approximately \$3,800,000 to \$6,731,000. The decrease in cash and cash equivalents was due to cash used by operating activities of approximately \$3,656,000, capital expenditures of approximately \$73,000, repayment of debt of approximately \$29,000, and an increase in other assets (primarily patents) of approximately \$42,000.

The Company intends to continue devoting resources to internally-funded research and development spending on both new products and the improvement of existing products, albeit at a lower rate than in recent periods. The Company also intends to devote resources to the marketing and product support of its medical and optical thin films product lines. The Company anticipates that the result of these efforts will translate into increased revenues and profits when market conditions improve.

The Company considers its cash and cash equivalents to be sufficient to support working capital and investment needs for at least the next twelve months.

Results of Operations

Total revenues for the quarter and nine months ended March 31, 2002 decreased by \$775,088 or 68.4% and \$1,627,511 or 58.1%, respectively, from the same periods in the prior year.

The revenue decrease from the prior year for the third quarter was due primarily to lower sales of medical products (down 59%). For the quarter ended March 31, 2002, medical sales were lower due primarily to significantly lower shipments of stereo endoscopes and related products, and non-medical sales were lower due primarily to lower sales of Dense Wavelength Division Multiplexing (DWDM) filters and filter test equipment.

The revenue decrease from the prior year for the nine months ended March 31, 2002 was due to lower sales of medical products (down 59%), and lower sales of non-medical products (down 54%). For the nine months ended March 31, 2002, medical sales were lower due primarily to lower sales of stereo endoscopes and related products. Non-medical sales were lower due primarily to lower sales of DWDM filters. DWDM filter sales represented 9% of total revenues during the nine months ended March 31, 2002 compared to 15.5% for the corresponding period of the prior year (representing a reduction in filter sales of approximately 75%).

Revenues from the Company's four largest customers were approximately 21%, 14%, 10% and 10%, respectively, of total revenues for the nine months ended March 31, 2002. Revenues from the Company's largest customer were approximately 48% of total revenues for the nine months ended March 31, 2001. No other customers accounted for more than 10% of the Company's revenues during those periods.

Gross profit for the quarter and nine months ended March 31, 2002 was negative and reflected an unfavorable change of approximately \$321,000 and \$1,967,000, respectively, compared to the quarter and nine months ended March 31, 2001. Gross profit as a percentage of revenues decreased from 18.8% in the quarter ended March 31, 2001 to a negative 29.9% in the current quarter, and decreased from 25.1% in the nine months ended March 31, 2001 to a negative 107.9% in the nine months ended March 31, 2002. The unfavorable change in gross profit was due primarily to (1) a provision for excess and obsolete inventories of DWDM filters and DWDM filter test instrumentation of approximately \$540,000 recorded in the quarter ended September 30, 2001; and (2) the significant reduction in sales of higher margin stereo endoscopes and related products and the lower overall sales volume of other products.

Research and development expenses decreased by approximately \$375,000, or 42.7%, for the quarter ended March 31, 2002, and by approximately \$300,000, or 13.5%, for the nine months ended March 31, 2002 compared to the corresponding periods of the prior year. The decrease in the current year was due to fewer resources being devoted to the development of DWDM filters used in telecommunication systems, as reflected in reductions of staff.

Selling, general and administrative expenses decreased by approximately \$76,000, or 12.1%, for the quarter ended March 31, 2002 and by approximately \$27,000, or 1.8%, for the nine months ended March 31, 2002 compared to the corresponding periods of the prior year. The

decrease is due primarily to reductions in bad debt expense, employee recruiting, and professional services, partially offset by higher sales and marketing expenses.

The provision for asset impairment and restructuring of \$4,112,628 in the nine months ended March 31, 2002, consists of (1) a provision for restructuring costs of \$668,250 recorded in the quarter ended December 31, 2001, representing the present value of future lease payments related to idle space in the Company's Optical Thin Films Technology Center, and employee severance costs; and (2) a provision for asset impairment of \$3,444,378 recorded in the quarter ended September 30, 2001, representing a writedown to the lower of carrying value or fair market value of certain of the Company's property, plant and equipment invested in its optical thin films coating business. These provisions are more fully described in Note 3 of Notes to Consolidated Financial Statements.

Interest expense consists of interest on capital lease obligations and imputed interest on accrued restructuring costs related to the present value of future lease payments on idle space.

Interest income decreased by approximately \$156,000 for the quarter and by \$483,000 for the nine months ended March 31, 2002 compared to the corresponding periods of the prior year due to the lower base of cash and cash equivalents and to lower interest rates.

No income tax provision was recorded in the first or second quarters of fiscal year 2002 or 2001 because of the losses generated in those periods.

Trends and Uncertainties That May Affect Future Results

The asset impairment, restructuring and workforce reduction measures implemented earlier in the fiscal year, and other cost saving measures, are expected to result in a reduction in future annual expenses. During the quarter ended March 31, 2002, total recurring operating expenses (excluding inventory purchases) were approximately \$1.2 million (or 46%) lower than the \$2.6 million for the quarter ended June 30, 2001, which was prior to implementation of these cost reduction initiatives. Going forward, these cost reduction measures are expected to result in expense savings of at least \$4 million per year, of which approximately \$3.2 million per year represent actual cash savings.

For the quarter ended March 31, 2002, cash and cash equivalents decreased by approximately \$1,009,000, a 23% sequential decrease in cash usage from the previous quarter ended December 31, 2001. A further reduction in cash usage is anticipated during the quarter ending June 30, 2002.

Capital equipment expenditures during the nine months ended March 31, 2002 were approximately \$73,000, down 98% from \$3.3 million for the same period last year. It is anticipated that the level of capital spending for the balance of fiscal year 2002 and for the foreseeable future will continue to be substantially lower than last year.

Edgar Filing: PRECISION OPTICS CORPORATION INC - Form 10QSB

For the quarter ended March 31, 2002, research and development expenses were approximately \$503,000, down 42.7% from \$879,000 for the quarter ended March 31, 2001. It is anticipated that the quarterly level of R&D expenses for the balance of fiscal year 2002 and for the foreseeable future will be substantially lower than last year.

The Company is pursuing advances on several fronts in the medical area and certain non-medical applications. Among these initiatives are improvements in medical instrument lens coatings, a new 30° line of sight version of the successful 5 mm Laparoscope, and other new products. The Company also recently announced several major successes related to its medical instrument business:

- The first production shipment of autoclavable endoscopes in March 2002.
- Receipt of new orders for stereo endoscopes and related products.
- Receipt of new orders for the development and production of a relay lens system for use in medical digital photo microscopy.

As a result of these new orders for medical products, the Company anticipates that its sales in the quarter ending June 30, 2002, will be significantly higher than the quarter ended March 31, 2002.

Recent achievements of ISO 9001 and CE Mark certification, as recently announced, are also expected to support increased future sales opportunities, both foreign and domestic, for the Company's medical products.

Common Stock Listing on Nasdaq SmallCap Market

The Company has been notified that it is not in compliance with the \$1.00 minimum share price requirement for continued listing on the Nasdaq SmallCap Market. The Company will have until February 2003 to get back into compliance with Nasdaq's \$1.00 minimum bid price requirement. In order to regain compliance, the bid price of the Company's common stock must close at or above \$1.00 per share for a minimum of 10 consecutive trading days. As indicated above, the Company has undertaken a number of product development and marketing initiatives to increase sales and shareholder value. If the Company determines that it likely will not satisfy the minimum bid requirement on a timely basis, the Company will consider whether to pursue options which may be available to continue its listing on the Nasdaq SmallCap Market.
