The shares are being issued to Ercole Biotech, Inc. ( Ercole ) in connection with that certain collaboration and license agreement between the Company and Ercole. The Company expects Ercole to dispose of the shares in the open market in the near future.

## DILUTION

The net tangible book value of our common stock on December 31, 2006, as adjusted, was approximately \$35.903 million, or approximately \$0.67 per share. Net tangible book value per share is equal to the amount of our total tangible assets, less total liabilities, divided by the aggregate number of shares of common stock outstanding. Dilution in net tangible book value per share represents the difference between the amount per share paid by purchasers of shares of common stock in this offering and the net tangible book value per share of our common stock immediately after this offering. After giving effect to the sale of the shares of common stock in this offering at a sales price of \$2.72 per share, our net tangible book value at December 31, 2006 would have been approximately \$35.903 million, or approximately \$0.67 per share. This represents an immediate dilution of \$2.05 per share to new investors purchasing shares of common stock in this offering. The following table illustrates this dilution:

Public offering price per share	\$ 2.72
Net tangible book value per share	\$ 0.67
Increase per share attributable to new investors	
Net tangible book value per share after giving effect to this offering	\$ 0.67
Dilution per share to new investors	\$ 2.05

The as adjusted figure reflects the issuance of the 270,758 of our commons stock on April 18, 2007 at a price of \$2.77 per shares (\$750,000 in the aggregate).

The number of shares of common stock to be outstanding after the offering is based on the number of shares outstanding as of December 31, 2006, as adjusted. As of that date, we had 53,453,599 shares of common stock outstanding, which does not include:

- 5,571,470 shares of common stock underlying options outstanding at a weighted average exercise price of \$5.12 per share;
- 8,508,103 shares of common stock underlying warrants outstanding at a weighted average exercise price of \$11.68 per share; and
- 1,710,934 shares available for future grant under our stock option plan and 248,144 shares available for future issuance under our employee stock purchase plan.

The above table does not reflect the expected loss to date for our fiscal quarter ending March 31, 2007, which would increase the dilution per share.
