Letter from the president

Dear Shareholder,

We are pleased to provide the semi-annual report of Western Asset Income Fund for the six-month reporting period ended June 30, 2010.

Please read on for Fund performance information and a detailed look at prevailing economic and market conditions during the Fund s reporting period.

As always, we remain committed to providing you with excellent service and a full spectrum of investment choices. We also remain committed to supplementing the support you receive from your financial advisor. One way we accomplish this is through our website,

www.leggmason.com/cef. Here you can gain immediate access to market and investment information, including:
• Fund prices and performance,
Market insights and commentaries from our portfolio managers, and
• A host of educational resources.
We look forward to helping you meet your financial goals.
Sincerely,
R. Jay Gerken, CFA

Investment commentary

Economic review

While the overall U.S. economy continued to expand over the six months ended June 30, 2010, several economic data points weakened toward the end of the reporting period. This, in combination with sovereign debt woes in Europe, caused investor sentiment to turn negative and had significant implications for the financial markets.

Looking back, the U.S. Department of Commerce reported that U.S. gross domestic product (GDP) is contracted four consecutive quarters, beginning in the third quarter of 2008 through the second quarter of 2009. Economic conditions then began to improve in the third quarter of 2009, as GDP growth was 1.6%. A variety of factors helped the economy to regain its footing, including the government s\$787 billion stimulus program. Economic growth then accelerated during the fourth quarter of 2009, as GDP growth was 5.0%. A slower drawdown in business inventories and renewed consumer spending were contributing factors spurring the economy s higher growth rate. While the recovery continued during the first half of 2010, it did so at a more modest pace, as GDP growth was 3.7% during the first quarter of 2010 and an estimated 2.4% during the second quarter. The slower pace of growth in the second quarter was due, in part, to slower consumer spending, which rose an annualized 1.6% during the quarter, versus a 1.9% gain over the first three months of the year.

Even before GDP growth turned positive, there were signs that the economy was on the mend. The manufacturing sector, as measured by the Institute for Supply Management s PMIii, rose to 52.8 in August 2009, the first time it surpassed 50 since January 2008 (a reading below 50 indicates a contraction, whereas a reading above 50 indicates an expansion). While June 2010 s PMI reading of 56.2 was lower than May s reading of 59.7, manufacturing has now expanded eleven consecutive months according to PMI data. The manufacturing sector s growth remained fairly broad-based with thirteen of the eighteen industries tracked by the Institute for Supply Management expanding during June.

After experiencing sharp job losses in 2009, the U.S. Department of Labor reported that over one million new positions were added during the first five months of 2010. Included in that total, however, were 700,000 temporary government jobs tied to the 2010 Census. In June, 225,000 of these temporary positions were eliminated, offsetting private sector growth and resulting in a net loss of 125,000 jobs for the month. However, the unemployment rate fell to 9.5% in June, versus 9.7% and 9.9% in May and April, respectively.

There was mixed news in the housing market during the period. According to the National Association of Realtors, existing home sales increased 7.0% and 8.0% in March and April, respectively, after sales had fallen for the period from December 2009 through February 2010. The rebound was largely attributed to people rushing to take advantage of the government s \$8,000 tax credit for first-time home buyers that expired at the end of April. However, with the end of the tax credit, existing home sales then declined 2.2% and 5.1% in May and June, respectively. In addition, the inventory of unsold homes increased 2.5% to 3.99 million in June. Looking at home prices, the S&P/Case-Shiller Home Price Indexiii indicated that month-to-month U.S. home prices rose 1.3% in May. This marked the second straight monthly increase following six consecutive months of declining prices.

Financial market overview

During the first half of the reporting period, the financial markets were largely characterized by healthy investor risk appetite and solid results by lower-quality bonds. However, the market experienced a sharp sell-off during the second half of the reporting period, during which risk aversion returned and investors flocked to the relative safety of U.S. Treasury securities.

Given certain pockets of weakness in the economy, including elevated unemployment in the U.S., the Federal Reserve Board (Fed)iv remained cautious. At its meeting in June 2010, the Fed said it will maintain the target range for the federal funds ratev at 0 to 1/4 percent and continues to anticipate that economic conditions, including low rates of resource utilization, subdued inflation trends, and stable inflation expectations, are likely to warrant exceptionally low levels of the federal funds rate for an extended period.

Western Asset Income Fund

IV

Investment commentary (cont d)

However, the Fed took several steps in reversing its accommodative monetary stance. On February 18, 2010, the Fed raised the discount rate, the interest rate it charges banks for temporary loans, from 1/2 to 3/4 percent. The Fed also concluded its \$1.25 trillion mortgage securities purchase program at the end of the first quarter of 2010. However, the Fed left the door open for future stimulus measures if needed. In the minutes of its June meeting that were released on July 14th (after the reporting period ended), the Fed said, In addition to continuing to develop and test instruments to exit from the period of unusually accommodative monetary policy, the Committee would need to consider whether further policy stimulus might become appropriate if the outlook were to worsen appreciably.

Fixed-income market review

Continuing the trend that began in the second quarter of 2009, nearly every spread sector (non-Treasury) outperformed equal-durationvi Treasuries during the first half of the reporting period. Over that time, investor confidence was high given encouraging economic data, continued low interest rates, benign inflation and rebounding corporate profits. However, robust investor appetite was replaced with heightened risk aversion toward the end of April and during the month of May. This was due to the escalating sovereign debt crisis in Europe, uncertainties regarding new financial reforms in the U.S. and some worse-than-expected economic data. Most spread sectors then produced positive absolute returns in June, as investor demand for these securities began to again increase.

Both short- and long-term Treasury yields fluctuated during the period but generally moved lower. When the period began, two- and ten-year Treasury yields were 1.14% and 3.85%, respectively. Two- and ten-year Treasury yields initially rose, reaching as high as 1.18% and 4.01%, respectively, in early April. Yields then largely declined amid the investor flight to quality. On June 30, 2010, two- and ten-year Treasury yields reached their lows for the reporting period: 0.61% and 2.97%, respectively. Over the six-month reporting period, the yield curvevii flattened, with longer-term Treasury yields declining more than their shorter-term counterparts. For the six months ended June 30, 2010, the Barclays Capital U.S. Aggregate Indexviii returned 5.33%.

Performance review

For the six months ended June 30, 2010, Western Asset Income Fund returned 5.05% based on its net asset value (NAV)ix and 4.31% based on its New York Stock Exchange (NYSE) market price per share. The Fund s unmanaged benchmarks, the Barclays Capital U.S. Corporate High Yield Indexx and the Barclays Capital U.S. Credit Indexxi, returned 4.51% and 5.62%, respectively, over the same time frame. The Lipper Corporate Debt Closed-End Funds BBB-Rated Category Averagexii returned 6.88% for the same period. Please note that Lipper performance returns are based on each fund s NAV.

During this six-month period, the Fund made distributions to shareholders totaling \$0.40 per share, which may have included a return of capital. The performance table shows the Fund s six-month total return based on its NAV and market price as of June 30, 2010. **Past performance is no guarantee of future results.**

- i Gross domestic product (GDP) is the market value of all final goods and services produced within a country in a given period of time.
- ii The Institute for Supply Management s PMI is based on a survey of purchasing executives who buy the raw materials for manufacturing at more than 350 companies. It offers an early reading on the health of the manufacturing sector.
- iii The S&P/Case-Shiller Home Price Index measures the residential housing market, tracking changes in the value of the residential real estate market in twenty metropolitan regions across the United States.
- iv The Federal Reserve Board (Fed) is responsible for the formulation of policies designed to promote economic growth, full employment, stable prices and a sustainable pattern of international trade and payments.
- v The federal funds rate is the rate charged by one depository institution on an overnight sale of immediately available funds (balances at the Federal Reserve) to another depository institution; the rate may vary from depository institution to depository institution and from day to day.
- vi Duration is the measure of the price sensitivity of a fixed-income security to an interest rate change of 100 basis points. Calculation is based on the weighted average of the present values for all cash flows.
- vii The yield curve is the graphical depiction of the relationship between the yield on bonds of the same credit quality but different maturities.
- viii The Barclays Capital U.S. Aggregate Index is a broad-based bond index comprised of government, corporate, mortgage- and asset-backed issues, rated investment grade or higher, and having at least one year to maturity.
- ix Net asset value (NAV) is calculated by subtracting total liabilities and outstanding preferred stock (if any) from the closing value of all securities held by the Fund (plus all other assets) and dividing the result (total net assets) by the total number of the common shares outstanding. The NAV fluctuates with changes in the market prices of securities in which the Fund has invested. However, the price at which an investor may buy or sell shares of the Fund is the Fund is market price as determined by supply of and demand for the Fund is shares.
- x The Barclays Capital U.S. Corporate High Yield Index covers the universe of fixed-rate, non-investment grade debt, including corporate and non-corporate sectors. Pay-in-kind (PIK) bonds, Eurobonds and debt issues from countries designated as emerging markets are excluded, but Canadian and global bonds (SEC registered) of issuers in non-emerging market countries are included. Original issue zero coupon bonds, step-up coupon structures and 144-As are also included.
- xi The Barclays Capital U.S. Credit Index is an index composed of corporate and non-corporate debt issues that are investment grade (rated Baa3/BBB- or higher).
- xii Lipper, Inc., a wholly-owned subsidiary of Reuters, provides independent insight on global collective investments. Returns are based on the six-month period ended June 30, 2010, including the reinvestment of all distributions, including returns of capital, if any, calculated among the 27 funds in the Fund s Lipper category.

Per Share	\$0.40	\$0.83
Dividends Paid:		
Ordinary Income	\$3,772,070	\$8,850,758
Per Share	\$0.40	\$0.94

The Fund

Western Asset Income Fund (PAI or the Fund) is a closed-end, diversified management investment company which seeks for its shareholders a high level of current income through investment in a diversified portfolio of debt securities. Substantially all of the Funds net investment income is distributed to its shareholders. A Dividend Reinvestment Plan is available to those shareholders of record desiring it.

Certain investment policies

The Fund s investment policies provide that its portfolio must be invested as follows:

- At least 75% in debt securities rated within the four highest grades, and in government securities, bank debt, commercial paper, cash or cash equivalents.
- Up to 25% in other fixed income securities, convertible bonds, convertible preferred and preferred stock.
- Not more than 25% in securities restricted as to resale.

Dividend reinvestment plan

The Fund offers to all shareholders a Dividend Reinvestment Plan (Plan). For participants in the Plan, cash distributions (e.g., dividends and capital gains) of registered shareholders (those who own shares in their own name on the Fund s records) are automatically invested in shares of

the Fund. Interested shareholders may obtain more information or sign up for the Plan by contacting the agent at the address set forth on page 2. Shareholders who own shares in a brokerage, bank, or other financial institution account must contact the Company where their account is held in order to participate in the Plan.

If you elect to participate in the Plan you will automatically receive your dividend or net capital gains distribution in newly issued shares of the Fund if the market price of a share on the date of the distribution is at or above the net asset value (NAV) of a Fund share. The number of shares to be issued to you will be determined by dividing the amount of the cash distribution to which you are entitled (net of any applicable withholding taxes) by the greater of the NAV per share on such date or 95% of the market price of a share on such date. If the market price of a share on such distribution date is below the NAV the Agent will, as agent for the participants, buy shares of the Fund s stock through a broker on the open market or in a negotiated transaction (subject to price and other terms to which the agent may agree). The price per share of shares purchased for each participant s account with respect to a particular dividend or other distribution will be the average price (including brokerage commissions, transfer taxes and any other costs of purchase) of all shares purchased with respect to that dividend or other distribution. All shares of common stock acquired on your behalf through the Plan will be automatically credited to an account maintained on the books of the Agent. Full and fractional shares will be voted by the Agent in accordance with your instructions.

Additional information regarding the plan

The Fund will pay all costs applicable to the Plan, with the exceptions noted below. Brokerage commissions, transfer taxes and any other costs of purchase or sale by the Agent under the Plan will be

Western Asset Income Fund 2010 Semi-Annual Report

2

Fund highlights (cont d)

charged to participants. The commission participants pay for selling shares under the Plan is calculated as \$2.50 plus \$0.15 per share. Beneficial shareholders should contact the company holding their account for further information concerning fees that may apply to selling shares under the Plan. In the event the Fund determines to no longer pay the costs applicable to the Plan, the Agent will terminate the Plan and may, but is not obligated to, offer a new plan under which it would impose a direct service charge on participants.

All shares acquired through the Plan receive voting rights and are eligible for any stock split, stock dividend, or other rights accruing to shareholders that the Board of Directors may declare. Distributions to Plan participants will be in the form of stock, unless the Agent is notified in writing 10 days prior to the record date fixed by the Board of Directors for the distribution that you wish to receive a cash payment. Beneficial shareholders should contact the company holding their account for further information regarding deadlines that might apply.

You may terminate participation in the Plan at any time by giving written notice to the Agent. Such termination will be effective prior to the record date next succeeding the receipt of such instructions or by a later date of termination specified in such instructions.

Upon termination of the Plan, a participant may request a certificate for the full shares credited to his or her account or may request the sale of all or part of such shares. If the participant instructs the Agent to sell the shares credited to the participant s account, the Agent may accumulate such shares and those of any other terminating participants for purposes of such sale. Brokerage charges, transfer taxes, and any other costs of sale will be allocated pro rata among the selling participants. Any such sale may be made on any securities exchange where such shares are traded, in the over-the-counter market or in negotiated transactions, and may be subject to such terms of price, delivery, etc., as the Agent may agree to. Fractional shares credited to a terminating account will be paid for in cash at the current market price at the time of termination.

Dividends and other distributions invested in additional shares under the Plan are subject to income tax just as if they had been received in cash. After year end, dividends paid on the accumulated shares will be included in the Form 1099-DIV information return to the Internal Revenue Service and only one Form 1099-DIV will be sent to each participant each year.

Registered shareholders can make inquiries regarding the Plan, as well as sign up or terminate their participation in the Plan by contacting American Stock Transfer & Trust Company LLC, 59 Maiden Lane, New York, N.Y. 10038 Investor Relations, telephone number (888)-888-0151. Beneficial Shareholders can make inquiries regarding the Plan as well as sign up or terminate their participation in the Plan by contacting the company where their account is held.

- * Non-income producing security.
- (a) The coupon payment on these securities is currently in default as of June 30, 2010.
- (b) Security is exempt from registration under Rule 144A of the Securities Act of 1933. This security may be resold in transactions that are exempt from registration, normally to qualified institutional buyers. This security has been deemed liquid pursuant to guidelines approved by the Board of Directors, unless otherwise noted.
- (c) Variable rate security. Interest rate disclosed is that which is in effect at June 30, 2010.
- (d) Security has no maturity date. The date shown represents the next call date.
- (e) Illiquid security.
- (f) Security is valued in good faith at fair value in accordance with procedures approved by the Board of Directors (See Note 1).
- (g) Rate shown represents yield-to-maturity.

- (h) All or a portion of this security is held at the broker as collateral for open futures contracts.
- # Aggregate cost for federal income tax purposes is substantially the same.

¹ For the six months ended June 30, 2010 (unaudited).

² Per share amounts have been calculated using the average shares method.

³ Performance figures may reflect fee waivers and/or expense reimbursements. In the absence of fee waivers and/or expense reimbursements, the total return would have been lower. Past performance is no guarantee of future results. Total returns for periods of less than one year are not annualized.

⁴ The total return calculation assumes that distributions are reinvested in accordance with the Fund s dividend reinvestment plan. Past performance is no guarantee of future results. Total returns for periods of less than one year are not annualized.

⁵ Annualized.

⁶ Reflects fee waivers and/or expense reimbursements.

⁷ The impact of compensating balance arrangements to the expense ratio was less than 0.01%.

19

Notes to financial statements (unaudited)

1. Organization and significant accounting policies

Western Asset Income Fund (the Fund) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a closed-end diversified investment company.

The Fund s primary investment objective is to provide current income for its shareholders. Capital appreciation, when consistent with current income, is a secondary investment objective.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP). Estimates and assumptions are required to be made regarding assets, liabilities and changes in net assets resulting from operations when financial statements are prepared. Changes in the economic environment, financial markets and any other parameters used in determining these estimates could cause actual results to differ. Subsequent events have been evaluated through the date the financial statements were issued.

(a) Investment valuation. Debt securities are valued at the last quoted bid price provided by an independent pricing service that are based on transactions in debt obligations, quotations from bond dealers, market transactions in comparable securities and various other relationships between securities. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market, and are valued at the mean between the last quoted bid and asked prices as of the close of business of that market. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. When prices are not readily available, or are determined not to reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund values these securities at fair value as determined in accordance with procedures approved by the Fund s Board of Directors. Short-term obligations with maturities of 60 days or less are valued at the amortized cost, which approximates fair value.

The Fund has adopted Financial Accounting Standards Board Codification Topic 820 (ASC Topic 820). ASC Topic 820 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund s investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of the security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to convert future amounts of cash flow to a single present amount.

20	Western Asset Income Fund 2010 Semi-Annual Report	

Notes to financial statements (unaudited) (cont d)

The following is a summary of the inputs used in valuing the Fund s assets carried at fair value:
