Item 2.02. Results of Operations and Financial Condition

On May 5, 2014, Occidental Petroleum Corporation released information regarding its results of operations for the three months ended March 31, 2014. The exhibits to this Form 8-K and the information set forth in this Item 2.02 are being furnished pursuant to Item 2.02, Results of Operations and Financial Condition. The full text of the press release is attached to this report as Exhibit 99.1. The full text of the presentations of Cynthia Walker, Stephen Chazen and Vicki Hollub are attached to this report as Exhibit 99.2. Investor Relations Supplemental Schedules are attached to this report as Exhibit 99.3. Earnings Conference Call Slides are attached to this report as Exhibit 99.4. Forward-Looking Statements Disclosure for Earnings Release Presentation Materials is attached to this report as Exhibit 99.5. The information in this Item 2.02 and Exhibits 99.1 through 99.5, inclusive, shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, except as shall be expressly set forth by specific reference in such filing.

Section 8 - Other Events

Item 8.01. Other Events

On May 5, 2014, Occidental Petroleum Corporation announced net income for the first quarter of 2014 of \$1.4 billion (\$1.75 per diluted share), compared with \$1.4 billion (\$1.68 per diluted share) for the first quarter of 2013.

Oil and Gas

Oil and gas segment earnings were \$2.1 billion for the first quarter of 2014, compared with \$1.9 billion for the first quarter of 2013. The current quarter results, which mainly reflect higher domestic earnings, resulted from higher domestic oil, NGL and gas prices and higher worldwide oil volumes, partially offset by lower international oil prices, higher domestic operating costs and higher DD&A rates. The increase in operating costs was due to higher costs for CO₂, steam and power, which are affected by crude oil and natural gas prices, along with increased downhole maintenance activity levels. Excluding the impact of these increases, the domestic costs were \$0.10 per barrel of oil equivalent (BOE) lower than the 2013 average rate.

For the first quarter of 2014, daily oil and gas production volumes averaged 745,000 BOE, compared with 763,000 BOE in the first quarter of 2013. Domestic oil production increased by 10,000 barrels per day, but overall domestic production was lower by 4,000 BOE per day, mostly due to reduced domestic gas drilling. Middle East/North Africa production declined 14,000 BOE per day, mainly due to field and port strikes in Libya, insurgent activity in Yemen and the impact of full cost recovery and other adjustments under our production-sharing agreements, partially offset by an increase of 9,000 BOE per day in Qatar. Daily sales volumes were 735,000 BOE for the first quarter of 2014 and 746,000 BOE for the first quarter of 2013. Sales volumes were lower than production volumes due to the timing of liftings in Oxy's international operations.

Oxy's worldwide realized price for crude oil was \$99.00 per barrel for the first quarter of 2014, compared with \$98.07 per barrel for the first quarter of 2013. Domestic crude oil prices increased by almost 5 percent in the first quarter of 2014 to \$95.94 per barrel, compared to \$91.57 per barrel in the first quarter of 2013. Domestic NGL prices increased by 15 percent in the first quarter of 2014 to \$46.69 per barrel, compared to \$40.59 per barrel in the first quarter of 2013. Domestic gas prices increased by 48 percent in the first quarter of 2014 to \$4.57 per MCF, compared with \$3.08 in the first quarter of 2013. Middle East/North Africa crude oil prices were approximately 3 percent lower on a year-over-year basis for the first quarter of 2014.

On a sequential quarterly basis, worldwide realized crude oil prices were slightly lower and worldwide realized NGL prices increased approximately 3 percent. On a geographic basis, domestic crude oil prices were almost 2 percent higher and domestic gas prices were 37 percent higher.

Chemical

Chemical segment earnings for the first quarter of 2014 were \$136 million, compared with \$159 million in the first quarter of 2013. The decrease was primarily from lower caustic soda prices driven by new chlor-alkali capacity in the industry. Higher polyvinyl chloride and vinyl chloride margins, resulting from improvement in U.S. construction markets, along with higher volumes across all products, offset most of the decline.

Midstream, Marketing and Other

Midstream segment earnings were \$170 million for the first quarter of 2014, compared with \$215 million for the first quarter of 2013. The decrease reflected lower marketing and trading performance due to the timing of mark-to-market adjustments on trading contracts.

Forward-Looking Statements

Portions of this report contain forward-looking statements and involve risks and uncertainties that could materially affect expected results of operations, liquidity, cash flows and business prospects. Actual results may differ from anticipated results sometimes materially, and reported results should not be considered an indication of future performance. Factors that could cause results to differ include, but are not limited to: global commodity pricing fluctuations; supply and demand considerations for Occidental's products; higher-than-expected costs; the regulatory approval environment; reorganization or restructuring of Occidental's operations; not successfully completing, or any material delay of, field developments, expansion projects, capital expenditures, efficiency projects, acquisitions or dispositions; lower-than-expected production from development projects or acquisitions; exploration risks; general economic slowdowns domestically or internationally; political conditions and events; liability under environmental regulations including remedial actions; litigation; disruption or interruption of production or manufacturing or facility damage due to accidents, chemical releases, labor unrest, weather, natural disasters, cyber attacks or insurgent activity; failure of risk management; changes in law or regulations; or changes in tax rates. Words such as estimate, project, predict, will, would, should, could, might, anticipate, plan, intend, believe, expect, aim, goal, target, objective, likely or similar expressions that convey the probability of events or outcomes generally indicate forward-looking statements. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this report. Unless legally required, Occidental does not undertake any obligation to update any forward-looking statements, as a result of new information, future events or otherwise. Material risks that may affect Occidental's results of

The Company's net capital expenditures after these reimbursements and inclusion of our contributions for the Chemical JV Cracker were \$2.2 billion for the first quarter of 2014 and \$2.0 billion for the first quarter of 2013.

SIGNIFICANT TRANSACTIONS AND EVENTS AFFECTING EARNINGS

Occidental's results of operations often include the effects of significant transactions and events affecting earnings that vary widely and unpredictably in nature, timing and amount. Therefore, management uses a measure called "core results," which excludes those items. This non-GAAP measure is not meant to disassociate those items from management's performance, but rather is meant to provide useful information to investors interested in comparing Occidental's earnings performance between periods. Reported earnings are considered representative of management's performance over the long term. Core results is not considered to be an alternative to operating income reported in accordance with generally accepted accounting principles.
