INGREDION INCORPORATED (Ingredion)

Notes to Condensed Consolidated Financial Statements

1. Interim Financial Statements

References to the Company are to Ingredion Incorporated (Ingredion) and its consolidated subsidiaries. These statements should be read in conjunction with the consolidated financial statements and the related notes to those statements contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

The unaudited condensed consolidated interim financial statements included herein were prepared by management on the same basis as the Company's audited consolidated financial statements for the year ended December 31, 2014 and reflect all adjustments (consisting solely of normal recurring items unless otherwise noted) which are, in the opinion of management, necessary for the fair presentation of results of operations and cash flows for the interim periods ended June 30, 2015 and 2014, and the financial position of the Company as of June 30, 2015. The results for the interim periods are not necessarily indicative of the results expected for the full years.

2. New Accounting Standards

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers (Topic 606) that introduces a new five-step revenue recognition model in which an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU also requires disclosures sufficient to enable users to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers, including qualitative and quantitative disclosures about contracts with customers, significant judgments and changes in judgments, and assets recognized from the costs to obtain or fulfill a contract. This standard is effective for fiscal years beginning after December 15, 2017, including interim periods within that reporting period. The standard will allow various transition approaches upon adoption. The Company is assessing the impacts of this new standard; however, the adoption of the guidance in this Update is not expected to have a material impact on the Company's Condensed Consolidated Financial Statements.

In April 2015, the FASB issued ASU No. 2015-03, Interest-Imputation of Interest (Subtopic 835-30), for the purpose of simplifying the presentation of debt issuance costs. This standard requires that debt issuance costs associated with a recognized debt liability be presented in the balance sheet as a direct reduction from the carrying amount of that debt in the balance sheet, consistent with the recording of debt discounts. The amendments in this Update are effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years and require an entity to apply the guidance on a retrospective basis. Early adoption of the amendments in this Update is permitted for financial statements that have not been previously issued. The adoption of the guidance in this Update is not expected to have a material impact on the Company's Condensed Consolidated Financial Statements.

3. Acquisition

On March 11, 2015, the Company completed its acquisition of Penford Corporation (Penford), a manufacturer of specialty starches that is headquartered in Centennial, Colorado. Total purchase consideration for Penford was \$332 million, which included the extinguishment of \$93 million in debt in conjunction with the acquisition. The Company funded the acquisition with proceeds from borrowings under its revolving credit agreement. The results of Penford are included in the Company's consolidated results from March 11, 2015 forward within the North America operating segment.

The acquisition provides the Company with, among other things, an expanded specialty ingredient product portfolio consisting of potato starch-based offerings. Penford had net sales of \$444 million for the fiscal year ended August 31, 2014 and operated six manufacturing facilities in the United States, all of which manufacture specialty starches. With the acquisition, the Company now employs approximately 11,800 people world-wide.

A preliminary allocation of the purchase price to the assets acquired and liabilities assumed was made based on available information and incorporating management's best estimates. Assets acquired and liabilities assumed in the transaction were generally recorded at their estimated acquisition date fair values, while transaction costs associated with the acquisition were expensed as incurred. The Company is currently in the process of finalizing the valuation of the assets acquired and liabilities assumed, primarily related to the valuation of tangible and identifiable intangible assets acquired. As such, the actual allocation of the final purchase price and the resulting effect on net income may differ from the preliminary amounts included herein. The Company expects to finalize the purchase price allocation during 2015.

Goodwill represents the amount by which the purchase price exceeds the estimated fair value of the net assets acquired, and is not tax deductible for the Company. The preliminary goodwill of \$116 million results from synergies and other operational benefits expected to result from the acquisition.

The following table summarizes the preliminary purchase price allocation as of March 11, 2015 for the acquisition of Penford:

(in millions)	
Working capital (excluding cash)	\$ 68
Property, plant and equipment	86
Other assets	9
Identifiable intangible assets	124
Goodwill	116
Non-current liabilities assumed	(71)
Total preliminary purchase price	\$ 332

The identifiable intangible assets include items such as customer relationships, proprietary technology and tradenames.

Included in the results from the acquired Penford business for the six months ended June 30, 2015 was an increase in cost of sales of \$6 million relating to the sale of Penford inventory that was adjusted to fair value at the acquisition date in accordance with business combination accounting rules, of which \$3 million was recognized in the second quarter of 2015. The Company also recorded a pre-tax restructuring charge

of \$10 million for the six months

ended June 30, 2015 related to estimated employee severance costs. In addition, the Company incurred \$4 million and \$8 million of pre-tax acquisition and integration costs for the three and six months ended June 30, 2015, respectively, associated with the Penford transaction.

4. Segment Information

The Company is principally engaged in the production and sale of starches and sweeteners for a wide range of industries, and is managed geographically on a regional basis. The Company's operations are classified into four reportable business segments: North America, South America, Asia Pacific and Europe, Middle East and Africa (EMEA). Its North America segment includes businesses in the United States, Canada and Mexico. The Company's South America segment includes businesses in Brazil, Colombia and Ecuador and the Southern Cone of South America, which includes Argentina, Chile, Peru and Uruguay. Its Asia Pacific segment includes businesses in South Korea, Thailand, Malaysia, China, Japan, Indonesia, the Philippines, Singapore, India, Australia and New Zealand. The Company's EMEA segment includes businesses in the United Kingdom, Germany, South Africa, Pakistan and Kenya.

5. Financial Instruments, Derivatives and Hedging Activities

The Company is exposed to market risk stemming from changes in commodity prices (primarily corn and natural gas), foreign currency exchange rates and interest rates. In the normal course of business, the Company actively manages its exposure to these market risks by entering into various hedging transactions, authorized under established policies that place clear controls on these activities. These transactions utilize exchange-traded derivatives or over-the-counter derivatives with investment grade counterparties. Derivative financial instruments currently used by the Company consist of commodity futures, options and swap contracts, foreign currency forward contracts and swaps, and interest rate swaps.

Commodity price hedging: The Company's principal use of derivative financial instruments is to manage commodity price risk in North America relating to anticipated purchases of corn and natural gas to be used in the manufacturing process, generally over the next twelve to twenty-four months. To manage price risk related to corn purchases in North America, the Company uses corn futures and options contracts that trade on regulated commodity exchanges to lock-in its corn costs associated with firm-priced customer sales contracts. The Company uses over-the-counter gas swaps to hedge a portion of its natural gas usage in North America. These derivative financial instruments limit the impact that volatility resulting from fluctuations in market prices will have on corn and natural gas purchases and have been designated as cash-flow hedges. Effective with the acquisition of Penford, the Company now produces and sells ethanol. The Company now enters into swap contracts to hedge price risk associated with fluctuations in market prices of ethanol. Unrealized gains and losses associated with marking the commodity hedging contracts to market (fair value) are recorded as a component of other comprehensive income (OCI) and included in the equity section of the Condensed Consolidated Balance Sheets as part of accumulated other comprehensive income/loss (AOCI). These amounts are subsequently reclassified into earnings in the same line item affected by the hedged transaction and in the same period or periods during which the hedged transaction affects earnings, or in the month a hedge is determined to be ineffective. The Company assesses the effectiveness of a commodity hedge contract based on changes in the contract's fair value. The changes in the market value of such contracts have historically been, and are expected to continue to be, highly effective at offsetting changes in the price of the hedged items. The amounts representing the ineffectiveness of these cash-flow hedges are not significant.

At June 30, 2015, AOCI included \$2 million of gains, net of tax of \$1 million, pertaining to commodities-related derivative instruments designated as cash-flow hedges. At December 31, 2014, AOCI included \$13 million of losses, net of tax of \$6 million, pertaining to commodities-related derivative instruments designated as cash-flow hedges.

Interest rate hedging: Derivative financial instruments that have been used by the Company to manage its interest rate risk consist of Treasury Lock agreements (T-Locks) and interest rate swaps. The Company did not have any T-loops outstanding at June 30, 2015 or December 31, 2014. The Company has interest rate swap agreements that effectively convert the interest rates on its 3.2 percent \$350 million senior notes due November 1, 2015, its 6.0 percent \$200 million senior notes due April 15, 2017, its 1.8 percent \$300 million senior notes due September 25, 2017 and on \$200 million of its \$400 million 4.625 percent senior notes due November 1, 2020, to variable rates. These swap agreements call for the Company to receive interest at the fixed coupon rate of the respective notes and to pay interest at a variable rate based on the six-month US dollar LIBOR rate plus a spread. The Company has designated these interest rate swap agreements as hedges of the changes in fair value of the underlying debt obligations attributable to changes in interest rates and accounts for them as fair-value hedges. Changes in the fair value of interest rate swaps designated as hedging instruments that effectively offset the variability in the fair value of outstanding debt obligations are reported in earnings. These amounts offset the gain or loss (that is, the change in fair value) of the hedged debt instrument that is attributable to changes in interest rates (that is, the hedged risk), which is also recognized in earnings. The fair value of these interest rate swap agreements at June 30, 2015 and December 31, 2014 was \$12 million and \$13 million, respectively and is reflected in the Condensed Consolidated Balance Sheets within other assets, with an offsetting amount recorded in long-term debt to adjust the carrying amount of the hedged debt obligations.

At June 30, 2015 and December 31, 2014, AOCI included \$6 million of losses (net of income taxes of \$3 million) and \$7 million of losses (net of income taxes of \$4 million), respectively, related to settled T-Locks. These deferred losses are being amortized to financing costs over the terms of the senior notes with which they are associated.

Foreign currency hedging: Due to the Company's global operations, including operations in many emerging markets, it is exposed to fluctuations in foreign currency exchange rates. As a result, the Company has exposure to translational foreign exchange risk when the results of its foreign operations are translated to US dollars and to transactional foreign exchange risk when transactions not denominated in the functional currency of an operating unit are revalued. The Company primarily uses derivative financial instruments such as foreign currency forward contracts, swaps and options to manage its transactional foreign exchange risk. At June 30, 2015, the Company had foreign currency forward sales contracts with an aggregate notional amount of \$164 million and foreign currency forward purchase contracts with an aggregate notional amount of \$72 million that hedged transactional exposures. At December 31, 2014, the Company had foreign currency forward sales contracts with an aggregate notional amount of \$150 million and foreign currency forward purchase contracts with an aggregate notional amount of \$70 million that hedged transactional exposures. The fair value of these derivative instruments are assets of \$4 million and \$1 million at June 30, 2015 and December 31, 2014, respectively.

The Company also has foreign currency derivative instruments that hedge certain foreign currency transactional exposures and are designated as cash-flow hedges. The amount included in AOCI relating to these hedges at both June 30, 2015 and December 31, 2014 was not significant.

The fair value and balance sheet location of the Company's derivative instruments, accounted for as cash-flow hedges and presented gross in the Condensed Consolidated Balance Sheets, are reflected below:

Edgar Filing: Ingredion Inc - Form 10-Q

Derivatives designated as cash-flow hedging instruments: (in millions)	Balance Sheet Location	Fair Value of Derivative Instruments		Balance Sheet Location	Fair Value	
		At June 30, 2015	At December 31, 2014		At June 30, 2015	At December 31, 2014
Commodity and foreign currency contracts	<i>Accounts receivable-net</i>	\$ 23	\$ 15	<i>Accounts payable and accrued liabilities</i>	\$ 8	\$ 18
Commodity and foreign currency contracts	<i>Other assets</i>	2	1	<i>Non-current liabilities</i>	7	6
Total		\$ 25	\$ 16		\$ 15	\$ 24

At June 30, 2015, the Company had outstanding futures and option contracts that hedged the forecasted purchase of approximately 67 million bushels of corn and 6 million pounds of soybean oil. The Company is unable to directly hedge price risk related to co-product sales; however, it occasionally enters into hedges of soybean oil (a competing product to corn oil) in order to mitigate the price risk of corn oil sales. The Company also had outstanding swap and option contracts that hedged the forecasted purchase of approximately 14 million mmbtu's of natural gas at June 30, 2015. Additionally at June 30, 2015, the Company had outstanding ethanol swap contracts that hedged the forecasted sale of approximately 8 million gallons of ethanol.

Additional information relating to the Company's derivative instruments is presented below (in millions, pre-tax):

Interest rate contracts				(2)	(2)
Total	\$ (3)	\$ 2		\$ (23)	\$ (19)

At June 30, 2015, AOCI included \$2 million of losses on settled T-Locks (net of income taxes of \$1 million) and \$1 million of gains related to foreign currency hedges (net of income taxes of \$1 million), which are expected to be reclassified into earnings during the next twelve months. Additionally, at June 30, 2015, AOCI included an insignificant amount of losses on commodities-related derivative instruments designated as cash-flow hedges that are expected to be reclassified into earnings during the next twelve months. The Company expects the losses to be offset by changes in the underlying commodities costs.

Presented below are the fair values of the Company's financial instruments and derivatives for the periods presented:

(in millions)	At June 30, 2015				At December 31, 2014			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Available for sale securities	\$ 5	\$ 5	\$	\$	\$ 5	\$ 5	\$	\$
Derivative assets	41	21	20		29	12	17	
Derivative liabilities	15	1	14		23	6	17	
Long-term debt	2,264		2,264		1,939		1,939	

Level 1 inputs consist of quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. Level 2 inputs are based on quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability or can be derived principally from or corroborated by observable market data. Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs shall be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date.

The carrying values of cash equivalents, short-term investments, accounts receivable, accounts payable and short-term borrowings approximate fair values. Commodity futures, options and swap contracts are recognized at fair value. Foreign currency forward contracts, swaps and options are also recognized at fair value. The fair value of the Company's long-term debt is estimated based on quotations of major securities dealers who are market makers in the securities. At June 30, 2015, the carrying value and fair value of the Company's long-term debt were \$2.16 billion and \$2.26 billion, respectively.

6. Share-Based Compensation

Stock Options:

Under the Company's stock incentive plan, stock options are granted at exercise prices that equal the market value of the underlying common stock on the date of grant. The options have a 10-year term and are exercisable upon vesting, which occurs over a three-year period at the anniversary dates of the date of grant. Compensation expense is recognized on a straight-line basis for all awards.

The Company granted non-qualified options to purchase 336 thousand shares and 715 thousand shares of the Company's common stock during the six months ended June 30, 2015 and 2014, respectively. The fair value of each option grant was estimated using the Black-Scholes option-pricing model with the following assumptions:

	For the Six Months Ended	
	June 30,	
	2015	2014
Expected life (in years)	5.5	5.5
Risk-free interest rate	1.36%	1.63%
Expected volatility	25.19%	30.28%
Expected dividend yield	2.04%	2.82%

The expected life of options represents the weighted-average period of time that options granted are expected to be outstanding giving consideration to vesting schedules and the Company's historical exercise patterns. The risk-free interest rate is based on the US Treasury yield curve in effect at the grant date for the period corresponding to the expected life of the options. Expected volatility is based on historical volatilities of the Company's common stock. Dividend yields are based on historical dividend payments.

Stock option activity for the six months ended June 30, 2015 was as follows:

(dollars and options in thousands, except per share amounts)	Number of Options	Weighted Average Exercise Price per Share	Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at December 31, 2014	2,889	\$ 46.84		
Granted	336	82.28		
Exercised	(263)	38.85		
Cancelled	(13)	60.30		
Outstanding at June 30, 2015	2,949	51.52	6.22	\$ 84,256
Exercisable at June 30, 2015	2,040	43.81	5.05	\$ 73,428

For the six months ended June 30, 2015, cash received from the exercise of stock options was \$10 million. At June 30, 2015, the total remaining unrecognized compensation cost related to stock options approximated \$11 million, which will be amortized over a weighted-average period of

approximately 1.9 years.

Edgar Filing: Ingredion Inc - Form 10-Q

Additional information pertaining to stock option activity is as follows:

(dollars in thousands, except per share)	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Weighted average grant date fair value of stock options granted (per share)	\$	\$	15.93	\$ 12.99
Total intrinsic value of stock options exercised	\$	7,464	\$ 12,148	\$ 11,204

Restricted Shares of Common Stock and Restricted Stock Units:

The Company has granted shares of restricted common stock (RSAs) and restricted stock units (RSUs) to certain key employees. The RSAs and RSUs are subject to cliff vesting, generally after three to five years provided the employee remains in the service of the Company. The fair value of the RSAs and RSUs is determined based upon the number of shares granted and the quoted market price of the Company's common stock at the date of the grant.

The following table summarizes RSA and RSU activity for the six months ended June 30, 2015:

(in thousands, except per share amounts)	RSAs		RSUs	
	Number of RSAs	Weighted Average Fair Value per Share	Number of RSUs	Weighted Average Fair Value per Share
Non-vested at December 31, 2014	16	\$ 27.94	434	\$ 59.61
Granted			147	82.27
Vested	(14)	28.75	(138)	55.69
Cancelled			(7)	64.55
Non-vested at June 30, 2015	2	21.42	436	68.43

At June 30, 2015, the total remaining unrecognized compensation cost related to RSUs was \$17 million, which will be amortized over a weighted-average period of approximately 2.2 years. Unrecognized compensation cost related to RSAs was insignificant at June 30, 2015.

The following table summarizes the components of the Company's share-based compensation expense:

Edgar Filing: Ingredion Inc - Form 10-Q

(in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Stock options:				
Pre-tax compensation expense	\$ 1.6	\$ 1.7	\$ 3.4	\$ 3.7
Income tax benefit	(0.6)	(0.6)	(1.3)	(1.4)
Stock option expense, net of income taxes	1.0	1.1	2.1	2.3
RSUs, RSAs and other share-based compensation:				
Pre-tax compensation expense	3.6	3.0	6.9	5.7
Income tax benefit	(1.3)	(1.1)	(2.5)	(2.1)
RSUs, RSAs and other share-based compensation expense, net of income taxes	2.3	1.9	4.4	3.6
Total share-based compensation:				
Pre-tax compensation expense	5.2	4.7	10.3	9.4
Income tax benefit	(1.9)	(1.7)	(3.8)	(3.5)
Total share-based compensation expense, net of income taxes	\$ 3.3	\$ 3.0	\$ 6.5	\$ 5.9

7. Net Periodic Pension and Postretirement Benefit Costs

For detailed information about the Company's pension and postretirement benefit plans, please refer to Note 9 of the Notes to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

The following table sets forth the components of net periodic benefit cost of the US and non-US defined benefit pension plans for the periods presented:

(in millions)	Three Months Ended June 30,				Six Months Ended June 30,			
	US Plans		Non-US Plans		US Plans		Non-US Plans	
	2015	2014	2015	2014	2015	2014	2015	2014
Service cost	\$ 2.0	\$ 1.7	\$ 1.1	\$ 1.4	\$ 3.8	\$ 3.5	\$ 2.3	\$ 2.9
Interest cost	3.7	3.2	3.0	3.8	6.9	6.5	6.0	7.4
Expected return on plan assets	(6.3)	(5.3)	(3.4)	(3.6)	(11.9)	(10.5)	(6.8)	(7.1)
Amortization of net actuarial loss	0.2	0.1	0.5	0.8	0.4	0.2	1.1	1.6
Amortization of prior service credit				(0.1)			(0.1)	(0.1)
Amortization of transition obligation			0.1				0.1	0.1
Net pension cost	\$ (0.4)	\$ (0.3)	\$ 1.3	\$ 2.3	\$ (0.8)	\$ (0.3)	\$ 2.6	\$ 4.8

The Company currently anticipates that it will make approximately \$12 million in cash contributions to its pension plans in 2015, consisting of \$10 million to its US pension plans and \$2 million to its non-US pension plans. For the six months ended June 30, 2015, cash contributions of approximately \$2 million and \$1 million were made to the US and non-US plans, respectively.

Edgar Filing: Ingredion Inc - Form 10-Q

During the first quarter of 2015, the Company amended one of its pension plans in Canada to eliminate future benefit accruals for the plan effective April 30, 2015. This plan curtailment resulted in an improvement in the funded status of the plan by approximately \$9 million in the first quarter. The impact of this plan curtailment on net periodic benefit cost for the first half of 2015 was not significant.

The following table sets forth the components of net postretirement benefit cost for the periods presented:

(in millions)	Three Months Ended June 30,			Six Months Ended June 30,				
	2015		2014	2015		2014		
Service cost	\$	0.2	\$	0.7	\$	0.4	\$	1.4
Interest cost		0.8		0.9		1.5		1.8
Amortization of net actuarial loss		0.1		0.1		0.3		0.2
Amortization of prior service credit		(0.5)				(1.1)		
Net postretirement benefit cost	\$	0.6	\$	1.7	\$	1.1	\$	3.4

8. Earnings per Common Share

The following table provides the computation of basic and diluted earnings per common share (EPS) for the periods presented.

(in millions, except per share amounts)	Three Months Ended June 30, 2015			Three Months Ended June 30, 2014		
	Net Income Available to Ingredion (Numerator)	Weighted Average Shares (Denominator)	Per Share Amount	Net Income Available to Ingredion (Numerator)	Weighted Average Shares (Denominator)	Per Share Amount
Basic EPS	\$ 106.7	71.6	\$ 1.49	\$ 102.6	74.9	\$ 1.37
Effect of Dilutive Securities:						
Incremental shares from assumed exercise of dilutive stock options and vesting of dilutive RSUs, RSAs and other awards		1.1			1.1	
Diluted EPS	\$ 106.7	72.7	\$ 1.47	\$ 102.6	76.0	\$ 1.35

(in millions, except per share amounts)	Six Months Ended June 30, 2015			Six Months Ended June 30, 2014		
	Net Income Available to Ingredion (Numerator)	Weighted Average Shares (Denominator)	Per Share Amount	Net Income Available to Ingredion (Numerator)	Weighted Average Shares (Denominator)	Per Share Amount
Basic EPS	\$ 190.3	71.6	\$ 2.66	\$ 175.2	74.8	\$ 2.34
Effect of Dilutive Securities:						
Incremental shares from assumed exercise of dilutive stock options and		1.2			1.1	

Edgar Filing: Ingredion Inc - Form 10-Q

vesting of dilutive RSUs, RSAs and
other awards

Diluted EPS	\$	190.3	72.8	\$	2.62	\$	175.2	75.9	\$	2.31
--------------------	----	-------	------	----	------	----	-------	------	----	------

For both the second quarter and first half of 2015, options to purchase approximately 0.3 million shares of common stock were excluded from the calculation of diluted EPS as the impact of their inclusion would have been anti-dilutive. For the first half of 2014, options to purchase approximately 1.1 million shares of common stock were excluded from the calculation of diluted EPS as the impact of their inclusion would have been anti-dilutive. The number of anti-dilutive options excluded from the calculation of diluted EPS for the second quarter of 2014 was not material.

9. Inventories

Inventories are summarized as follows:

(in millions)	At June 30, 2015	At December 31, 2014
Finished and in process	\$ 428	\$ 428
Raw materials	259	225
Manufacturing supplies and other	49	46
Total inventories	\$ 736	\$ 699

10. Debt

The Company's long-term debt at June 30, 2015 and December 31, 2014 includes \$350 million of 3.2 percent senior notes that mature November 1, 2015. These borrowings are included in long-term debt as the Company has the ability and intent to refinance the notes on a long-term basis prior to the maturity date.

Borrowings outstanding under the Company's \$1 billion Revolving Credit Agreement were \$446 million and \$87 million at June 30, 2015 and December 31, 2014, respectively. The increase primarily reflects borrowings to fund the acquisition of Penford.

On July 10, 2015, the Company entered into a new Term Loan Credit Agreement to establish an 18-month \$350 million multi-currency senior unsecured term loan credit facility. All borrowings under the term loan facility will bear interest at a variable annual rate based on the LIBOR or base rate, at the Company's election, subject to the terms and conditions thereof, plus, in each case, an applicable margin. Proceeds from the new Term Loan Credit Agreement were used to repay borrowings outstanding under our Revolving Credit Agreement.

The Term Loan Credit Agreement contains customary representations, warranties, covenants, events of default, terms and conditions, including limitations on liens, incurrence of debt, mergers and significant asset dispositions. The Company must also comply with a leverage ratio and interest coverage ratio. The occurrence of an event of default under the Term Loan Credit Agreement could result in all loans and other obligations being declared due and payable and the term loan credit facility being terminated.

11. Accumulated Other Comprehensive Loss

Edgar Filing: Ingredion Inc - Form 10-Q

A summary of accumulated other comprehensive loss for the six months ended June 30, 2015 and 2014 is provided below:

Edgar Filing: Ingredion Inc - Form 10-Q

(in millions)	Cumulative Translation Adjustment	Deferred Gain/(Loss) on Hedging Activities	Pension/Postretirement Adjustment	Unrealized Loss on Investment	Accumulated Other Comprehensive Loss
Balance, December 31, 2014	\$ (701)	\$ (19)	\$ (61)	\$ (1)	\$ (782)
Losses on cash-flow hedges, net of income tax effect of \$-		(3)			(3)
Amount of losses on cash-flow hedges reclassified to earnings, net of income tax effect of \$7		16			16
Actuarial gains on pension and postretirement obligations, settlements and plan amendments, net of income tax effect of \$2			7		7
Losses related to pension and other postretirement obligations reclassified to earnings, net of income tax effect			1		1
Currency translation adjustment	(126)				(126)
Balance, June 30, 2015	\$ (827)	\$ (6)	\$ (53)	\$ (1)	\$ (887)

(in millions)	Cumulative Translation Adjustment	Deferred Gain/(Loss) on Hedging Activities	Pension/Postretirement Adjustment	Unrealized Loss on Investment	Accumulated Other Comprehensive Loss
Balance, December 31, 2013	\$ (489)	\$ (40)	\$ (53)	\$ (1)	\$ (583)
Gains on cash-flow hedges, net of income tax effect of \$1		1			1
Amount of losses on cash-flow hedges reclassified to earnings, net of income tax effect of \$6		13			13
Losses related to pension and other postretirement obligations reclassified to earnings, net of income tax effect			2		2
Currency translation adjustment	5				5
Balance, June 30, 2014	\$ (484)	\$ (26)	\$ (51)	\$ (1)	\$ (562)

The following table provides detail pertaining to reclassifications from AOCI into net income for the periods presented:

Details about AOCI Components (in millions)	Amount Reclassified from AOCI				Affected Line Item in Condensed Consolidated Statements of Income
	Three Months ended June 30,		Six Months ended June 30,		
	2015	2014	2015	2014	
Gains (losses) on cash-flow hedges:					
Commodity and foreign currency contracts	\$ (8)	\$ 1	\$ (21)	\$ (17)	Cost of sales
Interest rate contracts	(1)	(1)	(2)	(2)	Financing costs, net
Losses related to pension and other postretirement obligations	(1)	(1)	(1)	(2)	(a)
Total before tax reclassifications	\$ (10)	\$ (1)	\$ (24)	\$ (21)	
Income tax benefit	3		7	6	
Total after-tax reclassifications	\$ (7)	\$ (1)	\$ (17)	\$ (15)	

(a) This component is included in the computation of net periodic benefit cost and affects both cost of sales and operating expenses on the Condensed Consolidated Statements of Income.

12. Subsequent Events

On July 7, 2015, the Company entered into a definitive agreement to sell its manufacturing assets in Port Colborne, Ontario, Canada for approximately \$30 million. The sale is expected to close in the fourth quarter of 2015 and is not expected to result in a significant net gain or loss for the Company.

On July 8, 2015, the Company announced that it had entered into a definitive agreement to acquire Kerr Concentrates, Inc. (Kerr), a privately held producer of natural fruit and vegetable concentrates for approximately \$100 million in cash. Kerr employs approximately 80 people and serves major food and beverage companies, flavor houses and ingredient producers from its manufacturing locations in Oregon and California. The transaction is expected to close in the third quarter of 2015. The results of Kerr will be included in the North America reportable business segment.

ITEM 2

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We are a major supplier of high-quality food and industrial ingredients to customers around the world. We have 42 manufacturing plants located in North America, South America, Asia Pacific and Europe, the Middle East and Africa (EMEA), and we manage and operate our businesses at a regional level. We believe this approach provides us with a unique understanding of the cultures and product requirements in each of the geographic markets in which we operate, bringing added value to our customers. Our ingredients are used by customers in the food, beverage, animal feed, paper and corrugating, and brewing industries, among others.

Our Strategic Blueprint continues to guide our decision-making and strategic choices with an emphasis on value-added ingredients for our customers. The foundation of our Strategic Blueprint is operational excellence, which includes our focus on safety, quality and continuous improvement. We see growth opportunities in three areas. First is organic growth as we work to expand our current business. Second, we are focused on broadening our ingredient portfolio of on-trend products through internal and external business development. Finally, we look for growth from geographic expansion as we pursue extension of our reach to new locations. The ultimate goal of these strategies and actions is to deliver increased shareholder value.

On March 11, 2015, we completed our acquisition of Penford Corporation (Penford), a manufacturer of specialty starches that is headquartered in Centennial, Colorado. The purchase price was \$332 million in cash. We funded the acquisition of Penford with proceeds from borrowings under our \$1 billion Revolving Credit Agreement. The results of Penford are included in our consolidated results from March 11, 2015 forward.

The acquisition provides us with, among other things, an expanded specialty ingredient product portfolio consisting of potato starch-based offerings. Penford had sales of \$444 million for its fiscal year ended August 31, 2014 and operates six manufacturing facilities in the United States, all of which manufacture specialty starches. With the acquisition, we now employ approximately 11,800 people world-wide.

While net sales declined due to devaluation of foreign currencies versus the US dollar, operating income, net income and diluted earnings per common share for the second quarter and first half of 2015 increased from the year-ago periods. This growth was driven principally by significantly improved operating results in our North America segment. Looking forward to the rest of 2015, we expect North America to continue to drive our operating income and bottom-line growth driven by stronger volumes and improved product mix. We anticipate that Asia Pacific operating income will improve modestly from last year, despite continuing foreign exchange headwinds. EMEA operating income is anticipated to decline from 2014 as currency headwinds continue to be a challenge. South America operating income is expected to be in line with last year with strong performance in the Andean region offsetting softness in the Southern Cone of South America and Brazil.

On July 7, 2015, we entered into a definitive agreement to sell our manufacturing assets in Port Colborne, Ontario, Canada for approximately \$30 million. The sale is expected to close in the fourth quarter of 2015

and is not expected to result in a significant net gain or loss for us. We are committed to an on-going continuous improvement effort to optimize our network to control our fixed costs and use our resources efficiently. This transaction is intended to allow us to better balance supply based on our customers' needs as we focus on the growth of our higher-value specialty ingredient product portfolio.

On July 8, 2015, we announced that we had agreed to acquire Kerr Concentrates, Inc. (Kerr), a privately held producer of natural fruit and vegetable concentrates, purees and essences for approximately \$100 million in cash. Kerr employs approximately 80 people and serves major food and beverage companies, flavor houses and ingredient producers from its manufacturing locations in Oregon and California. The transaction is expected to close in the third quarter of 2015, pending satisfaction of customary closing conditions.

The acquisition will provide us with an opportunity to grow Kerr's portfolio with our advanced technologies and product-development capabilities. We also intend to expand the business with our broad customer network and global presence. The trend toward simple ingredients is rapidly growing and the Kerr acquisition provides another step towards broadening our portfolio of wholesome, clean-label ingredient solutions that consumers are increasingly demanding.

On July 10, 2015, we entered into a new Term Loan Credit Agreement to establish an 18-month \$350 million multi-currency senior unsecured term loan credit facility. Proceeds from the new Term Loan Credit Agreement were used to repay borrowings outstanding under our Revolving Credit Agreement.

We currently expect that our available cash balances, future cash flow from operations, access to debt markets and borrowing capacity under our credit facilities will provide us with sufficient liquidity to fund our anticipated capital expenditures, dividends and other investing and/or financing activities for the foreseeable future.

Results of Operations

We have significant operations in four reporting segments, North America, South America, Asia Pacific and EMEA. For most of our foreign subsidiaries, the local foreign currency is the functional currency. Accordingly, revenues and expenses denominated in the functional currencies of these subsidiaries are translated into US dollars (USD) at the applicable average exchange rates for the period. Fluctuations in foreign currency exchange

rates affect the US dollar amounts of our foreign subsidiaries' revenues and expenses. The impact of currency exchange rate changes, where significant, is provided below.

As previously mentioned, on March 11, 2015, we acquired Penford, a provider of specialty starches. The results of Penford are included in our consolidated financial results from March 11, 2015 forward. While we identify significant fluctuations due to the acquisition, our discussion below also addresses results of operations absent the impact of the Penford acquisition and operations, where appropriate, to provide a more comparable and meaningful analysis.

For The Three and Six Months Ended June 30, 2015

With Comparatives for the Three and Six Months Ended June 30, 2014

Net Income attributable to Ingredion. Net income for the quarter ended June 30, 2015 increased to \$106.7 million, or \$1.47 per diluted common share, from \$102.6 million, or \$1.35 per diluted common share, in the second quarter of 2014. Net income for the six months ended June 30, 2015 increased to \$190.3 million, or \$2.62 per diluted common share, from \$175.2 million, or \$2.31 per diluted common share, in the prior-year period. Our second quarter 2015 results include after-tax costs of \$3 million (\$0.04 per diluted common share) associated with the acquisition and integration of Penford and after-tax costs of \$2 million (\$0.03 per diluted common share) relating to the sale of Penford inventory that was adjusted to fair value at the acquisition date in accordance with business combination accounting rules (see Note 3 of the notes to the condensed consolidated financial statements for additional information). Our first half 2015 results include after-tax restructuring charges of \$6 million (\$0.09 per diluted common share) for employee severance-related costs associated with the Penford acquisition, after-tax costs of \$6 million (\$0.08 per diluted common share) associated with the acquisition and integration of Penford and after-tax costs of \$4 million (\$0.05 per diluted common share) relating to the sale of Penford inventory that was adjusted to fair value at the acquisition date. Without these acquisition-related charges, our net income for the second quarter and first half of 2015 would have grown 9 percent and 18 percent, respectively, from the comparable prior-year periods, while our diluted earnings per share for the second quarter and first half of 2015 would have grown by 13 percent and 23 percent, respectively. These increases primarily reflect significantly improved operating income in North America, as compared to the weak results of a year ago. Additionally, the improved diluted earnings per common share also reflect the favorable impact of our share repurchases.

Net Sales. Second quarter 2015 net sales totaled \$1.45 billion, down 2 percent from second quarter 2014 net sales of \$1.48 billion. Penford contributed \$97 million of net sales in the second quarter of 2015. The decrease in net sales primarily reflects unfavorable currency translation of 7 percent due to the stronger US dollar and a 1 percent price/product mix decline, which more than offset 6 percent volume growth driven by the Penford operations. Organic volume was flat.

North American net sales for second quarter 2015 increased 6 percent to \$869 million, from \$820 million a year ago. The increase in net sales reflects 12 percent volume growth due to the addition of Penford, partially offset by a 4 percent price/product mix decline driven principally by lower raw material costs and unfavorable currency translation of 2 percent attributable to the weaker Canadian dollar. Organic volume was flat. In South America, second quarter 2015 net sales decreased 18 percent to \$250 million from \$305 million a year ago, as unfavorable currency

Edgar Filing: Ingredion Inc - Form 10-Q

translation of 22 percent and a 4 percent volume reduction more than offset an 8 percent price/product mix improvement. Asia Pacific's second quarter 2015 net sales decreased 6 percent to \$192 million from \$203 million a year ago. The decrease reflects unfavorable currency translation of 6 percent and a 3 percent price/product mix decline, which more than offset volume growth of 3 percent in the segment. EMEA net sales for second quarter 2015 declined 11 percent to \$138 million from \$155 million a year ago. This decrease reflects unfavorable currency translation of 10 percent attributable to weaker local currencies and a 2 percent price/product mix decline, which more than offset volume growth of 1 percent.

First half 2015 net sales totaled \$2.78 billion, down 2 percent from first half 2014 net sales of \$2.84 billion. Penford contributed \$120 million of net sales in the first half of 2015. The decrease in net sales primarily reflects unfavorable currency translation of 7 percent due to the stronger US dollar and a 1 percent price/product mix decline, which more than offset volume growth of 6 percent driven mainly by the Penford operations. Organic volume grew 1 percent.

Net sales in North America for the first half of 2015 increased 4 percent to \$1.62 billion, from \$1.56 billion a year ago. The increase in net sales primarily reflects volume growth of 10 percent driven largely by the addition of Penford, which more than offset a 4 percent price/product mix decline driven principally by lower raw material costs and unfavorable currency translation of 2 percent attributable to the weaker Canadian dollar. Organic volume grew 2 percent. In South America, net sales for the first half of 2015 decreased 15 percent to \$508 million from \$599 million a year ago. This decline was driven by unfavorable currency translation of 19 percent and a 4 percent volume reduction, which more than offset price/product mix improvement of 8 percent. In Asia Pacific, net sales for the first half of 2015 decreased 3 percent to \$379 million from \$389 million a year ago. The decrease reflects unfavorable currency translation of 5 percent and a 4 percent price/product mix decline, which more than offset 6 percent volume growth. EMEA net sales for the first half of 2015 decreased 9 percent to \$269 million from \$296 million a year ago. This decrease reflects unfavorable currency translation of 9 percent primarily attributable to the weaker Euro and British Pound Sterling. Volume growth of 1 percent was offset by a price/product mix decline of 1 percent.

Cost of Sales and Operating Expenses. Cost of sales of \$1.13 billion for the second quarter of 2015 decreased 5 percent from \$1.19 billion in the prior-year period. Cost of sales of \$2.18 billion for the first half of 2015 decreased 5 percent from \$2.29 billion a year ago. These reductions primarily reflect lower raw material costs and the effects of currency translation. Gross corn costs per ton for the second quarter and first half of 2015 decreased approximately 16 percent and 14 percent, respectively, from the comparable prior-year periods, driven by lower market prices for corn. Currency translation caused cost of sales for the second quarter and first half of 2015 to decrease approximately 8 percent and 7 percent, respectively, from the prior-year periods, reflecting the impact of the stronger US dollar. Our gross profit margin was 22 percent for both the second quarter and first half of 2015, compared to 20 percent and 19 percent in the corresponding prior-year periods.

Operating expenses for the second quarter and first half of 2015 increased to \$144 million and \$276 million, respectively, from \$137 million and \$270 million last year. These increases primarily reflect incremental operating expenses of Penford as well as other costs associated with the acquisition and integration of Penford. Favorable translation effects associated with the stronger US dollar more than offset higher compensation-related and various other costs. Currency translation associated with the weaker foreign currencies reduced operating expenses for the second quarter and first half of 2015 by approximately 8 percent and 7 percent, respectively, from the prior-year periods. Operating expenses, as a percentage of gross profit, were 45 percent and 46 percent for the second quarter and first half

of 2015, respectively, as compared to 46 percent and 49 percent in the comparable prior-year periods.

Other Income / Expense, net. For the second quarter and first half of 2015 we had other expense, net of \$2 million and \$1 million, respectively, as compared to other income, net of \$4 million and \$9 million in the comparable prior-year periods. The decreases in income primarily reflect the recognition of a contingent liability relating to a legal matter, losses on miscellaneous asset disposals, the absence of certain miscellaneous income items in South America recorded in 2014 and the recording in the second quarter of 2014 of a \$5 million gain from the sale of an investment in a non-consolidated affiliate.

Operating Income. Second quarter 2015 operating income increased 6 percent to \$173 million from \$163 million a year ago. Operating income for second quarter 2015 includes \$4 million of costs related to the acquisition and integration of Penford. Additionally, the second quarter 2015 results include \$3 million of costs associated with the sale of Penford inventory that was marked up to fair value at the acquisition date in accordance with business combination accounting rules. Without these acquisition-related charges, our operating income would have grown 11 percent from second quarter 2014. This increase primarily reflects operating income growth in North America and South America. Unfavorable currency translation attributable to the stronger US dollar reduced operating income by approximately \$15 million from the prior-year period. North America operating income for second quarter 2015 increased 15 percent to \$127 million from \$110 million a year ago, reflecting both acquisition-related and organic growth. Approximately 38 percent of the increase reflects earnings contributed by the operations acquired from Penford. The remainder of the operating income improvement was driven principally by lower costs in the segment. Our North American results in 2015 also include approximately \$4 million of business interruption insurance recoveries related to last year's harsh winter weather. Translation effects associated with a weaker Canadian dollar negatively impacted second quarter 2015 operating income by approximately \$3 million in the segment. South America operating income for second quarter 2015 increased 22 percent to \$20 million from \$16 million in the year-ago period. The increase was driven principally by improved earnings in the Southern Cone of South America from the weak results of a year ago. Improved selling prices for our products more than offset unfavorable impacts of currency devaluation, higher local production costs and reduced volume in the segment. Translation effects associated with weaker South American currencies (particularly the Brazilian Real and the Colombian Peso) negatively impacted operating income by approximately \$7 million. We anticipate that our business in South America will continue to be challenged by difficult economic conditions. We continue to assess various strategic options to better optimize our business and improve our performance in South America. Implementation of certain of these options could result in future asset impairment charges in the segment. Asia Pacific operating income for second quarter 2015 was \$28 million, consistent with the year-ago period. Improved product pricing helped to mitigate the impact of local currency weakness in the segment. Translation effects associated with weaker Asia Pacific currencies negatively impacted operating income by approximately \$2 million in the segment. EMEA operating income for second quarter 2015 decreased 9 percent to \$23 million from \$25 million a year ago. This decrease primarily reflects the impact of currency translation. Cost control and volume growth helped to partially offset the currency impact. Translation effects associated with the weaker Euro and British Pound Sterling had an unfavorable impact of \$3 million on operating income in the segment.

Operating income for the first half of 2015 increased 10 percent to \$312 million from \$285 million a year ago. First-half 2015 operating income includes a \$10 million restructuring

charge for employee severance-related costs associated with the Penford acquisition and \$8 million of other costs related to the acquisition and integration of Penford. Although the majority of the severance-related costs will be paid within one year of the acquisition, certain costs are anticipated to be paid out through 2017. Additionally, the first-half 2015 results include \$6 million of costs associated with the sale of Penford inventory that was marked up to fair value at the acquisition date in accordance with business combination accounting rules. Without these acquisition-related charges, our operating income would have grown 18 percent from the first half of 2014. This increase primarily reflects our significantly improved operating income in North America compared to the weak results of a year ago. Unfavorable currency translation attributable to the stronger US dollar negatively impacted operating income by approximately \$25 million from the prior-year period. North America operating income for first-half 2015 increased 31 percent to \$229 million from \$176 million a year ago. Approximately 13 percent of the increase reflects earnings contributed by the operations acquired from Penford. Our remaining organic operating income improvement for the first half of 2015 reflects more normal weather conditions, organic volume growth and lower corn, energy and other manufacturing costs. Our North American results in the first half of 2015 also include approximately \$7 million of business interruption insurance recoveries related to last year's weather. Our year-ago results were negatively impacted by harsh winter weather conditions that caused high energy, transportation and production costs. Translation effects associated with a weaker Canadian dollar unfavorably impacted first-half 2015 operating income by approximately \$5 million in the segment. South America operating income for first-half 2015 decreased 3 percent to \$45 million from \$46 million a year ago. The decline primarily reflects weaker results in Brazil driven principally by lower demand and local currency weakness. Improved selling prices for our products helped to partially offset the unfavorable impacts of currency devaluation, higher local production costs and reduced volume in the segment. Translation effects associated with weaker South American currencies (particularly the Brazilian Real, Colombian Peso and the Argentine Peso) negatively impacted operating income by approximately \$12 million. We anticipate that our business in South America will continue to be challenged by difficult economic conditions. We continue to assess various strategic options to better optimize our business and improve our performance in South America. Implementation of certain of these options could result in future asset impairment charges in the segment. Asia Pacific operating income for first-half 2015 increased 1 percent to \$54 million from \$53 million a year ago. Volume growth was offset by unfavorable currency translation. Translation effects associated with weaker Asia Pacific currencies negatively impacted operating income by approximately \$3 million in the segment. EMEA operating income for first-half 2015 decreased 3 percent to \$45 million from \$47 million a year ago. This decrease primarily reflects the impact of currency translation. Cost control and volume growth helped to partially offset the currency impact. Translation effects associated with the weaker Euro and British Pound Sterling had an unfavorable impact of \$5 million on operating income in the segment.

Financing Costs-net. Financing costs for the second quarter and first half of 2015 decreased to \$16 million and \$30 million, respectively, from \$17 million and \$34 million in the comparable prior-year periods. The decreases primarily reflect reduced interest expense resulting from lower average interest rates on our borrowings attributable to the effect of our interest rate swaps. Additionally, an increase in interest income driven by higher cash balances and short-term investments, contributed to the reduction in financing costs.

Provision for Income Taxes. Our effective income tax rate for the second quarter of 2015 was 30.3 percent compared to 28.1 percent a year ago. The effective income tax rate for the first six months of 2015 was 30.9 percent compared to 28.4 percent a year ago.

Edgar Filing: Ingredion Inc - Form 10-Q

The second quarter of 2015 includes favorable impacts related to the reversal of previously unrecognized tax benefits due to the lapsing of the statute of limitations of approximately \$1 million.

In addition, we use the US dollar as the functional currency for our subsidiaries in Mexico. Because of the continued decline in the value of the Mexican peso versus the US dollar, our tax provision for the second quarter and first half of 2015 was unfavorably impacted by \$2.7 million and \$4.6 million, respectively, compared to the year-ago periods.

Without these items, the Company's effective income tax rates for the second quarter and first half of 2015 would have been approximately 29.2 percent and 29.7 percent, respectively.

The Company's effective income tax rate for the second quarter of 2014 included the recognition of previously unrecognized tax benefits of approximately \$2 million. Without this item, the Company's effective income tax rates for the second quarter and first half of 2014 would have been approximately 29.4 percent and 29.2 percent, respectively.

It is reasonably possible that the Company could recognize approximately \$1 million of unrecognized tax benefits as a result of a lapse of the statute of limitations in various jurisdictions. In such event, these benefits would be recognized as discrete items and favorably affect our income tax provision in the third quarter of 2015.

Comprehensive Income Attributable to Ingredion. We recorded comprehensive income of \$145 million for the second quarter of 2015, as compared to \$116 million in the year-ago period. The increase in comprehensive income primarily reflects a \$42 million year-over-year increase associated with our cash-flow hedging activity and our net income growth, which more than offset a \$17 million unfavorable variance in the foreign currency translation adjustment attributable to less strengthening in end of period foreign currencies relative to the US dollar, as compared to the year-ago period. For the first half of 2015, we recorded comprehensive income of \$86 million, as compared to \$196 million in the prior-year period. The decrease in comprehensive income primarily reflects a \$131 million unfavorable variance in the foreign currency translation adjustment, which more than offset our net income growth. The unfavorable variance in the foreign currency translation adjustment for the six months ended June 30, 2015 reflects a weakening in end of period foreign currencies relative to the US dollar, as compared to the year-ago period when foreign currencies had strengthened modestly.

Liquidity and Capital Resources

Cash provided by operating activities for the first six months of 2015 was \$248 million, as compared to \$229 million a year ago. The increase in operating cash flow primarily reflects an increase in our net income.

Capital expenditures of \$128 million for the first six months of 2015 are in line with our capital spending plan for the year. We anticipate that our capital expenditures will be approximately \$300 million for full year 2015.

Edgar Filing: Ingredion Inc - Form 10-Q

During the first half of 2015, we repurchased 364 thousand shares of our common stock in open market transactions for approximately \$29 million.

We have a senior, unsecured \$1 billion revolving credit agreement (the Revolving Credit Agreement) that matures on October 22, 2017. At June 30, 2015, there were \$446 million of

Edgar Filing: Ingredion Inc - Form 10-Q

borrowings outstanding under our Revolving Credit Agreement, as compared to \$87 million at December 31, 2014. The increase primarily reflects borrowings to fund the acquisition of Penford. In addition to borrowing availability under our Revolving Credit Agreement, we also have approximately \$412 million of unused operating lines of credit in the various foreign countries in which we operate.

At June 30, 2015, we had total debt outstanding of \$2.21 billion, compared to \$1.83 billion at December 31, 2014. In addition to the borrowings outstanding under the Revolving Credit Agreement, our total debt includes \$350 million of 3.2 percent notes due November 1, 2015, \$300 million (principal amount) of 1.8 percent senior notes due 2017, \$200 million of 6.0 percent senior notes due 2017, \$200 million of 5.62 percent senior notes due 2020, \$400 million (principal amount) of 4.625 percent notes due 2020, \$250 million (principal amount) of 6.625 percent senior notes due 2037, and \$49 million of consolidated subsidiary debt consisting of local country short-term borrowings. The weighted average interest rate on our total indebtedness was approximately 3.4 percent for the first six months of 2015, compared to 4.4 percent in the comparable prior-year period.

As noted above, we have \$350 million of 3.2 percent senior notes that mature November 1, 2015. These borrowings are included in long-term debt in our condensed consolidated balance sheet as we have the ability and intent to refinance the notes on a long-term basis prior to the maturity date.

On July 10, 2015, we entered into a new Term Loan Credit Agreement to establish an 18-month \$350 million multi-currency senior unsecured term loan credit facility. All borrowings under the term loan facility will bear interest at a variable annual rate based on the LIBOR or base rate, at our election, subject to the terms and conditions thereof, plus, in each case, an applicable margin. Proceeds from the new Term Loan Credit Agreement were used to repay borrowings outstanding under our Revolving Credit Agreement.

The Term Loan Credit Agreement contains customary representations, warranties, covenants, events of default, terms and conditions, including limitations on liens, incurrence of debt, mergers and significant asset dispositions. We must also comply with a leverage ratio and interest coverage ratio. The occurrence of an event of default under the Term Loan Credit Agreement could result in all loans and other obligations being declared due and payable and the term loan credit facility being terminated.

On May 20, 2015, our board of directors declared a quarterly cash dividend of \$0.42 per share of common stock. This dividend was paid on July 27, 2015 to stockholders of record at the close of business on June 30, 2015.

We currently expect that our available cash balances, future cash flow from operations, access to debt markets, and borrowing capacity under our credit facilities will provide us with sufficient liquidity to fund our anticipated capital expenditures, dividends, and other investing and/or financing activities for the foreseeable future.

We have not provided federal and state income taxes on accumulated undistributed earnings of certain foreign subsidiaries because these earnings are considered to be permanently reinvested. It is not practicable to determine the amount of the unrecognized deferred tax liability related to the undistributed earnings. We do not anticipate the need to repatriate funds to the United States to satisfy domestic liquidity needs arising in the ordinary

course of business, including liquidity needs associated with our domestic debt service requirements. Approximately \$645 million of our total cash and cash equivalents and short-term investments of \$677 million at June 30, 2015, was held by our operations outside of the United States. We anticipate that such cash and short-term investments will be used to fund growth opportunities outside of the United States, including capital expenditures and acquisitions. We expect that available cash balances and credit facilities in the United States, along with cash generated from operations and access to debt markets, will be sufficient to meet our operating and other cash needs for the foreseeable future.

Hedging

We are exposed to market risk stemming from changes in commodity prices, foreign currency exchange rates and interest rates. In the normal course of business, we actively manage our exposure to these market risks by entering into various hedging transactions, authorized under established policies that place clear controls on these activities. These transactions utilize exchange-traded derivatives or over-the-counter derivatives with investment grade counterparties. Our hedging transactions may include, but are not limited to, a variety of derivative financial instruments such as commodity futures, options and swap contracts, forward currency contracts and options, interest rate swap agreements and treasury lock agreements. See Note 5 of the Notes to the Condensed Consolidated Financial Statements for additional information.

Commodity Price Risk:

Our principal use of derivative financial instruments is to manage commodity price risk in North America relating to anticipated purchases of corn and natural gas to be used in our manufacturing process. We periodically enter into futures, options and swap contracts for a portion of our anticipated corn and natural gas usage, generally over the following twelve to twenty-four months, in order to hedge price risk associated with fluctuations in market prices. Effective with the acquisition of Penford, we now produce and sell ethanol. We now enter into swap contracts to hedge price risk associated with fluctuations in market prices of ethanol. Our derivative instruments are recognized at fair value and have effectively reduced our exposure to changes in market prices for these commodities. We are unable to directly hedge price risk related to co-product sales; however, we occasionally enter into hedges of soybean oil (a competing product to our corn oil) in order to mitigate the price risk of corn oil sales. Unrealized gains and losses associated with marking our commodities-based derivative instruments to market are recorded as a component of other comprehensive income (OCI). At June 30, 2015, our accumulated other comprehensive loss account (AOCI) included \$2 million of gains, net of income taxes of \$1 million, related to these derivative instruments. The amount of such gains that we anticipate to be reclassified into earnings during the next twelve months is not significant. We expect the gains to be offset by changes in the underlying commodities costs.

Foreign Currency Exchange Risk:

Due to our global operations, including operations in many emerging markets, we are exposed to fluctuations in foreign currency exchange rates. As a result, we have exposure to translational foreign exchange risk when our foreign operations results are translated to USD and to transactional foreign exchange risk when transactions not denominated in the functional currency of the operating unit are revalued. We primarily use derivative financial instruments such as foreign currency forward contracts, swaps and options to manage our foreign currency transactional exposures. At June 30, 2015, we had foreign currency forward sales contracts

Edgar Filing: Ingredion Inc - Form 10-Q

with an aggregate notional amount of \$164 million and foreign currency forward purchase contracts with an aggregate notional amount of \$72 million that hedged transactional exposures. The fair value of these derivative instruments is an asset of \$4 million at June 30, 2015.

We also have foreign currency derivative instruments that hedge certain foreign currency transactional exposures and are designated as cash-flow hedges. The amount in AOCI relating to these hedges at June 30, 2015 was not significant.

We have significant operations in Argentina. We utilize the official exchange rate published by the Argentine government for re-measurement purposes. Due to exchange controls put in place by the Argentine government, a parallel market exists for exchanging Argentine pesos to US dollars at rates less favorable than the official rate.

Interest Rate Risk:

We use interest rate swaps and occasionally use Treasury Lock agreements (T-Locks) to hedge our exposure to interest rate changes, to reduce the volatility of our financing costs, or to achieve a desired proportion of fixed versus floating rate debt, based on current and projected market conditions. We did not have any T-Locks outstanding at June 30, 2015.

We have interest rate swap agreements that effectively convert the interest rates on our 3.2 percent \$350 million senior notes due November 1, 2015, our 6.0 percent \$200 million senior notes due April 15, 2017, our 1.8 percent \$300 million senior notes due September 25, 2017 and on \$200 million of our \$400 million 4.625 percent senior notes due November 1, 2020, to variable rates. These swap agreements call for us to receive interest at the fixed coupon rate of the respective notes and to pay interest at a variable rate based on the six-month US dollar LIBOR rate plus a spread. We have designated these interest rate swap agreements as hedges of the changes in fair value of the underlying debt obligations attributable to changes in interest rates and account for them as fair-value hedges. The fair value of these interest rate swap agreements was \$12 million at June 30, 2015 and is reflected in the Condensed Consolidated Balance Sheet within other assets, with an offsetting amount recorded in long-term debt to adjust the carrying amount of the hedged debt obligations.

At June 30, 2015, AOCI included \$6 million of losses (net of income taxes of \$3 million) related to settled Treasury Lock agreements. These deferred losses are being amortized to financing costs over the terms of the senior notes with which they are associated. It is anticipated that \$2 million of these losses (net of income taxes of \$1 million) will be reclassified into earnings during the next twelve months.

Critical Accounting Policies and Estimates

Our critical accounting policies and estimates are described in Management's Discussion and Analysis of Financial Condition and Results of Operations included in our 2014 Annual Report on Form 10-K. There have been no changes to our critical accounting policies and estimates during the six months ended June 30, 2015.

FORWARD-LOOKING STATEMENTS

Edgar Filing: Ingredion Inc - Form 10-Q

This Form 10-Q contains or may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities

Exchange Act of 1934, as amended. The Company intends these forward-looking statements to be covered by the safe harbor provisions for such statements.

Forward-looking statements include, among other things, any statements regarding the Company's prospects or future financial condition, earnings, revenues, tax rates, capital expenditures, expenses or other financial items, any statements concerning the Company's prospects or future operations, including management's plans or strategies and objectives therefor and any assumptions, expectations or beliefs underlying the foregoing.

These statements can sometimes be identified by the use of forward looking words such as may, will, should, anticipate, assume, believe, project, estimate, expect, intend, continue, pro forma, forecast, outlook or other similar expressions or the negative thereof. All statements other than statements of historical facts in this report or referred to in or incorporated by reference into this report are forward-looking statements.

These statements are based on current circumstances or expectations, but are subject to certain inherent risks and uncertainties, many of which are difficult to predict and are beyond our control. Although we believe our expectations reflected in these forward-looking statements are based on reasonable assumptions, stockholders are cautioned that no assurance can be given that our expectations will prove correct.

Actual results and developments may differ materially from the expectations expressed in or implied by these statements, based on various factors, including the effects of global economic conditions, including, particularly, continuation or worsening of the current economic, currency and political conditions in South America and economic conditions in Europe, and their impact on our sales volumes and pricing of our products, our ability to collect our receivables from customers and our ability to raise funds at reasonable rates; fluctuations in worldwide markets for corn and other commodities, and the associated risks of hedging against such fluctuations; fluctuations in the markets and prices for our co-products, particularly corn oil; fluctuations in aggregate industry supply and market demand; the behavior of financial markets, including foreign currency fluctuations and fluctuations in interest and exchange rates; volatility and turmoil in the capital markets; the commercial and consumer credit environment; general political, economic, business, market and weather conditions in the various geographic regions and countries in which we buy our raw materials or manufacture or sell our products; future financial performance of major industries which we serve, including, without limitation, the food and beverage, pharmaceuticals, paper, corrugated, textile and brewing industries; energy costs and availability, freight and shipping costs, and changes in regulatory controls regarding quotas, tariffs, duties, taxes and income tax rates; operating difficulties; availability of raw materials, including potato starch, tapioca and the specific varieties of corn upon which our products are based; energy issues in Pakistan; boiler reliability; our ability to effectively integrate and operate acquired businesses including the Penford business; our ability to achieve budgets and to realize expected synergies; our ability to complete planned maintenance and investment projects successfully and on budget; labor disputes; genetic and biotechnology issues; changing consumption preferences including those relating to high fructose corn syrup; increased competitive and/or customer pressure in the corn refining industry; and the outbreak or continuation of serious communicable disease or hostilities including acts of terrorism. Factors relating to the acquisition of Penford Corporation that could cause actual results and developments to differ from expectations include that the anticipated benefits of the acquisition, including synergies, may not be realized, and that the integration of Penford's operations with our operations may be materially delayed or may be more costly or difficult than expected.

Our forward-looking statements speak only as of the date on which they are made and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date of the statement as a result of new information or future events or developments. If we do update or correct one or more of these statements, investors and others should not conclude that we will make additional updates or corrections. For a further description of these and other risks, see **Risk Factors** included in our Annual Report on Form 10-K for the year ended December 31, 2014 and subsequent reports on Forms 10-Q and 8-K.

ITEM 3

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See the discussion set forth in Part II, Item 7A. Quantitative and Qualitative Disclosures About Market Risk at pages 48 to 50 in our Annual Report on Form 10-K for the year ended December 31, 2014, for a discussion as to how we address risks with respect to interest rates, raw material and energy costs and foreign currencies. There have been no material changes in the information that would be provided with respect to those disclosures from December 31, 2014 to June 30, 2015.

ITEM 4

CONTROLS AND PROCEDURES

Our management, including our Chief Executive Officer and our Chief Financial Officer, performed an evaluation of the effectiveness of our disclosure controls and procedures as of June 30, 2015. Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures (a) are effective in providing reasonable assurance that all material information required to be filed in this report has been recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (b) are designed to ensure that information required to be disclosed in the reports we file or submit under the Securities Exchange Act of 1934, as amended, is accumulated and communicated to our management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. There have been no changes in our internal control over financial reporting during the quarter ended June 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

On March 11, 2015, we completed our acquisition of Penford. We are currently in the process of integrating Penford's operations, processes and internal controls. See Note 3 of the Notes to the Condensed Consolidated Financial Statements for additional information regarding the acquisition.

PART II OTHER INFORMATION

ITEM 1

LEGAL PROCEEDINGS

As previously reported, on April 22, 2011, Western Sugar and two other sugar companies filed a complaint in the U.S. District Court for the Central District of California against the Corn Refiners Association (CRA) and certain of its member companies, including us, alleging false and/or misleading statements relating to high fructose corn syrup in violation of the Lanham Act and California's unfair competition law. The complaint seeks injunctive relief and unspecified damages. On May 23, 2011, the plaintiffs amended the complaint to add additional plaintiffs, among other reasons.

On July 1, 2011, the CRA and the member companies in the case filed a motion to dismiss the first amended complaint on multiple grounds. On October 21, 2011, the U.S. District Court for the Central District of California dismissed all Federal and state claims against us and the other members of the CRA, with leave for the plaintiffs to amend their complaint, and also dismissed all state law claims against the CRA.

The state law claims against the CRA were dismissed pursuant to a California law known as the anti-SLAPP (Strategic Lawsuit Against Public Participation) statute, which, according to the court's opinion, allows early dismissal of meritless first amendment cases aimed at chilling expression through costly, time-consuming litigation. The court held that the CRA's statements were protected speech made in a public forum in connection with an issue of public interest (high fructose corn syrup). Under the anti-SLAPP statute, the CRA is entitled to recover its attorney's fees and costs from the plaintiffs.

On November 18, 2011, the plaintiffs filed a second amended complaint against certain of the CRA member companies, including us, seeking to reinstate the federal law claims, but not the state law claims, against certain of the CRA member companies, including us. On December 16, 2011, the CRA member companies filed a motion to dismiss the second amended complaint on multiple grounds. On July 31, 2012, the U.S. District Court for the Central District of California denied the motion to dismiss for all CRA member companies other than Roquette America, Inc.

On September 4, 2012, we and the other CRA member companies that remain defendants in the case filed an answer to the plaintiffs' second amended complaint that, among other things, added a counterclaim against the Sugar Association. The counterclaim alleges that the Sugar Association has made false and misleading statements that processed sugar differs from high fructose corn syrup in ways that are beneficial to consumers' health (i.e., that consumers will be healthier if they consume foods and beverages containing processed sugar instead of high fructose corn syrup). The counterclaim, which was filed in the U.S. District Court for the Central District of California, seeks injunctive relief and unspecified damages. Although the counterclaim was initially only filed against the Sugar Association, the Company and the other CRA member companies that remain defendants in the Western Sugar case have reserved the right to add other plaintiffs to the counterclaim in the future.

On October 29, 2012, the Sugar Association and the other plaintiffs filed a motion to dismiss the counterclaim and certain related portions of the defendants' answer, each on multiple grounds. On December 10, 2012, the remaining member companies which are defendants in the case responded to the motion to dismiss the counterclaim. On January 14, 2013, the plaintiffs filed a reply to the defendants' response to the motion to dismiss. On September 16, 2013, the U.S. District Court for the Central District of California denied the

motion to dismiss the counterclaim, which entitles the Company and the other CRA member companies to continue to pursue the counterclaim against the Sugar Association and the other plaintiffs.

On May 23, 2014, the defendants asked the court for leave to amend their counterclaim to add the individual sugar companies as counterclaim defendants. The motion for leave to amend was denied by the court on August 4, 2014 and this decision is in the process of being appealed by the defendants. On August 26, 2014, each of the Company and Tate & Lyle filed motions to disqualify the plaintiffs' lead counsel, Squire Patton Boggs, due to a conflict of interest arising from Squire Sanders' merger with Patton Boggs, a firm which represents each of the Company and Tate & Lyle. In addition, on August 26, 2014, the defendants filed two separate motions for summary judgment, one on the issue of liability and the other on the issue of damages, and the plaintiffs filed a motion for summary judgment with respect to the defendants' counterclaim.

The motion to disqualify the plaintiff's attorneys was argued before the court on both November 13 and November 25, 2014. On February 13, 2015, the court granted the Company's and Tate & Lyle's motions to dismiss Squire Patton Boggs due to a conflict of interest.

The three summary judgment motions were argued on July 7, 2015 and all three motions were denied by the court on the same day. The trial of this case is presently scheduled to begin in November 2015.

We continue to believe that the second amended complaint is without merit and intend to vigorously defend this case. In addition, we intend to vigorously pursue our rights in connection with the counterclaim.

ITEM 2

UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Issuer Purchases of Equity Securities:

(shares in thousands)	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that may yet be Purchased Under the Plans or Programs at end of period
April 1 - April 30, 2015	55	77.44	55	4,887 shares
May 1 - May 31, 2015				4,887 shares
June 1 - June 30, 2015	75	79.99	75	4,812 shares
Total	130	78.91	130	

On December 12, 2014, the Board of Directors authorized a new stock repurchase program permitting the Company to purchase up to 5 million of its outstanding common shares from January 1, 2015 through December 31, 2019. At June 30, 2015, we have 4.8 million shares available for

repurchase under the stock repurchase program.
