**EBITDAR (earnings before interest, taxes, depreciation, amortization and rent) is presented as supplemental information because we believe it is a useful indicator of our operating performance and is useful in comparing our performance with other companies in the airline industry. However, EBITDAR should not be considered in isolation, as a substitute for net income prepared in accordance with US GAAP or as a measure of a company's profitability. In addition, our calculations may not be comparable to other similarly titled measures of other companies. A reconciliation of EBITDAR to consolidated net income is attached to this press release.*

MANAGEMENT'S COMMENTS ON 1Q07 RESULTS

First quarter results marked a strong beginning to 2007. For the quarter, Copa Holdings consolidated traffic growth outpaced capacity growth, resulting in a consolidated load factor of 76.4%, an increase of 4.8 percentage points over 1Q06. This increase came mainly from Copa Airlines, which experienced a 20.8% capacity growth and a 28.2% increase in traffic. For the same period, Aero Republica's load factor increased 1.3 percentage points year-over-year to

54.4%, on traffic growth of 2.9% and a 0.4% capacity expansion.

Copa Holdings reported record net earnings of US\$48.6 million for 1Q07, a year-over-year growth of 50.5%. These earnings were obtained as a result of strong underlying demand for air travel in the region, which produced a substantial increase in load factors and yields in the face of a significant capacity expansion.

During the quarter, Copa Holdings experienced a 26.6% or US\$51.0 million year over year increase in operating revenues, driven mainly by a 29.7% or US\$45.0 million increase in Copa Airlines operating revenues and a 16.9% or US\$6.8 million increase in Aero Republica operating revenues.

Operating costs for the quarter increased 21.3% or US\$32.0 million, driven primarily by increased capacity. Total unit cost, as measured by operating cost per available seat mile, increased 4.8% to 9.7 cents. Excluding fuel expense, operating expenses rose 22.5% and unit costs increased 5.8% to 6.7 cents.

Consolidated earnings before interest, taxes, depreciation, amortization and rents ("EBITDAR") rose 38.3% to US\$79.5 million from US\$57.5 million in 1Q06. EBITDAR margins increased by 2.8 percentage points to 32.8%. Operating income rose 45.6% to US\$60.8 million in 1Q07 from US\$41.8 million in 1Q06, while operating margins increased 3.3 percentage points to 25%.

The Company ended the quarter with US\$243.7 million in cash, cash equivalents, short-term and long-term investments, as well as approximately US\$34.5 million in committed credit lines. Total debt amounted to US\$703.0 million, which relates for the most part to aircraft and equipment financing.

Looking forward to the remainder of 2007, we expect healthy demand patterns to continue, benefiting from the ongoing strength in the regional economy and the growing preference of Copa Airlines' Hub of the Americas as the best option for intra-Latin America travel. Consolidated capacity is expected to increase by approximately 20% year-over-year, driven mainly by 25% Copa Airlines capacity growth.

Copa Airlines operational plan includes the addition of six new destinations for 2007, as well as increased frequencies to current destinations. These new frequencies and destinations will begin in the second half of 2007 when Copa Airlines will take delivery of seven new aircraft: two Boeing 737-800's and five EMBRAER-190's.

For the quarter, Aero Republica recorded operating earnings of US\$3.9MM, representing an operating margin of 8.3%. Their results benefited from higher yields and lower costs related to lower jet fuel costs and the timing of major overhaul events.

Aero Republica continues to execute its transition plan aimed at strengthening its competitive and financial position. The principal initiative of this plan includes the modernization of Aero Republica's fleet by replacing less efficient MD-80 aircraft with modern and efficient EMBRAER-190 aircraft. During the months of December 2006 and January 2007, Aero Republica received its first four EMBRAER-190 aircraft and will be receiving an additional four during the second half of 2007, to end the year with a fleet of eight EMBRAER-190's and six MD-80's.

We expect the right-sizing and modernization of Aero Republica's fleet throughout 2007 will lead to increased operational efficiencies, higher load factors and a superior product offering for the Colombian market. Additionally, Aero Republica has increased its international connectivity with Copa Airlines' Hub of The Americas through the addition of daily flights from the Colombian cities of Bogota, Cali and Cartagena. With these new flights Aero República now provides international connectivity into Copa Airlines' Hub from four major Colombian cities.

Going forward, we expect Copa Airlines will continue gaining and solidifying its advantage of having the most extensive network for intra-Latin American travel, being complemented by Aero República's presence and connectivity in the Colombian market.
