## FORWARD LOOKING STATEMENTS

THE FOLLOWING DISCUSSION SHOULD BE READ IN CONJUNCTION WITH THE FINANCIAL STATEMENTS AND RELATED NOTES CONTAINED ELSEWHERE IN THIS FORM 10-Q. CERTAIN STATEMENTS MADE IN THIS DISCUSSION ARE "FORWARD-LOOKING STATEMENTS" WITHIN THE MEANING OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995. FORWARD-LOOKING STATEMENTS CAN BE IDENTIFIED BY TERMINOLOGY SUCH AS "MAY," "WILL," "SHOULD," "EXPECTS," "INTENDS," "ANTICIPATES," "BELIEVES," "ESTIMATES," "PREDICTS," OR "CONTINUE" OR THE NEGATIVE OF THESE TERMS OR OTHER COMPARABLE TERMINOLOGY AND INCLUDE, WITHOUT LIMITATION, STATEMENTS BELOW REGARDING: THE COMPANY'S INTENDED BUSINESS PLANS; EXPECTATIONS AS TO PRODUCT PERFORMANCE; EXPECTATIONS AS TO MARKET ACCEPTANCE OF THE COMPANY'S TECHNOLOGY; AND BELIEF AS TO THE SUFFICIENCY OF CASH RESERVES. BECAUSE FORWARD-LOOKING STATEMENTS INVOLVE RISKS AND UNCERTAINTIES, THERE ARE IMPORTANT FACTORS THAT COULD CAUSE ACTUAL RESULTS TO DIFFER MATERIALLY FROM THOSE EXPRESSED OR IMPLIED BY THESE FORWARD-LOOKING STATEMENTS. THESE FACTORS INCLUDE, BUT ARE NOT LIMITED TO, THE COMPANY'S INABILITY TO OBTAIN NECESSARY FINANCING; GOING CONCERN QUALIFICATIONS; THE COMPETITIVE ENVIRONMENT GENERALLY AND IN THE COMPANY'S SPECIFIC MARKET AREAS; CHANGES IN TECHNOLOGY; THE AVAILABILITY OF AND THE TERMS OF FINANCING; INFLATION; CHANGES IN COSTS AND AVAILABILITY OF GOODS AND SERVICES; ECONOMIC CONDITIONS IN GENERAL AND IN THE COMPANY'S SPECIFIC MARKET AREAS; DEMOGRAPHIC CHANGES; CHANGES IN FEDERAL, STATE AND /OR LOCAL GOVERNMENT LAW AND REGULATIONS AFFECTING THE TECHNOLOGY; CHANGES IN OPERATING STRATEGY OR DEVELOPMENT PLANS; AND THE ABILITY TO ATTRACT AND RETAIN QUALIFIED PERSONNEL. ALTHOUGH THE COMPANY BELIEVES THAT EXPECTATIONS REFLECTED IN THE FORWARD-LOOKING STATEMENTS ARE REASONABLE, IT CANNOT GUARANTEE FUTURE RESULTS, PERFORMANCE OR ACHIEVEMENTS. MOREOVER, NEITHER THE COMPANY NOR ANY OTHER PERSON ASSUMES RESPONSIBILITY FOR THE ACCURACY AND COMPLETENESS OF THESE FORWARD-LOOKING STATEMENTS. THE COMPANY IS UNDER NO DUTY TO UPDATE ANY FORWARD-LOOKING STATEMENTS AFTER THE DATE OF THIS REPORT TO CONFORM SUCH STATEMENTS TO ACTUAL RESULTS.

SPO MEDICAL INC AND ITS SUBSIDIARY  
NOTES TO FINANCIAL STATEMENTS

(U.S. dollars in thousands (except share data))

NOTE 1 - General

SPO Medical Inc. (hereinafter referred to as "SPO" or the "Company") was originally incorporated under the laws of the State of Delaware in September 1981 under the name "Applied DNA Systems, Inc." On November 16, 1994, the Company changed its name to "Nu-Tech Bio-Med, Inc." On December 23, 1998, the Company changed its name to "United Diagnostic, Inc." Effective April 21, 2005, the Company acquired (the "Acquisition Transaction") 100% of the outstanding capital stock of SPO Medical Equipment Ltd., a company incorporated under the laws of the State of Israel ("SPO Ltd."), pursuant to a Capital Stock Exchange Agreement dated as of February 28, 2005 between the Company, SPO Ltd. and the shareholders of SPO Ltd., as amended and restated on April 21, 2005 (the "Exchange Agreement"). In exchange for the outstanding capital stock of SPO Ltd., the Company issued to the former shareholders of SPO Ltd. a total of 5,769,106 shares of the Company's common stock, par value \$0.01 per share ("Common Stock"), representing approximately 90% of the Common Stock then issued and outstanding after giving effect to the Acquisition Transaction. As a result of the Acquisition Transaction, SPO Ltd. became a wholly owned subsidiary of the Company as of April 21, 2005 and, subsequent to the Acquisition Transaction, the Company changed its name to "SPO Medical Inc." Upon consummation of the Acquisition Transaction, the Company effectuated a forward subdivision of the Company's Common Stock issued and outstanding on a 2.65285:1 basis.

The merger between UNDI and the SPO Ltd was accounted for as a reverse merger. As the shareholders of SPO Ltd received the largest ownership interest in the Company, SPO Ltd was determined to be the "accounting acquirer" in the reverse acquisition. As a result, the historical financial statements of the Company were replaced with the historical financial statements of the SPO Ltd.

The Company and its subsidiary, SPO Ltd., are collectively referred to as the "Company".

In January 2010, the Company restructured its operations to focus primarily on licensing its core technology for non-medical market applications. The restructuring included entering into a licensing agreement (the "License") for the existing medical PulseOx product line with an entity owned by the Company's Chief Technology Officer (hereinafter the "Licensee"). Under the terms of the License, the Licensee was granted a non-transferable, royalty bearing license, to distribute the PulseOx product line and derivatives thereof, for specifically defined medical uses. Following the License, the Company ceased its previous operations associated with the distribution of the PulseOx line in the medical field.

NOTE 2 - Basis of Presentation

The accompanying un-audited condensed consolidated interim financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with Rule 8.03 of Regulation S-X. These financial statements reflect all adjustments, consisting of normal recurring adjustments and accruals, which are, in the opinion of management, necessary for a fair presentation of the financial position of the Company as of March 31, 2010 and the results of operations and cash flows for the interim periods indicated in conformity with generally accepted accounting principles applicable to interim periods. Accordingly, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. Operating results for the three months ended March 31, 2010, are not necessarily indicative of the results that may be expected for the year ended December 31, 2010.

Certain prior years' amounts have been reclassified in conformity with current year's financial statements.

NOTE 3 - Going Concern

As reflected in the accompanying financial statements, the Company's operations for the three months ended March 31, 2010, resulted in a net loss of \$202 and the Company's balance sheet reflects a net stockholders' deficit of \$1,878. The Company's ability to continue operating as a "going concern" is dependent on its ability to raise sufficient additional working capital. As disclosed in previous filings with the Securities and Exchange Commission, management has been attempting to raise additional cash from current and potential stockholders and plans to continue these efforts.

SPO MEDICAL INC AND ITS SUBSIDIARY  
NOTES TO FINANCIAL STATEMENTS

(U.S. dollars in thousands (except share data))

NOTE 4 – Discontinued Operations

Following the entry into the License, the Company ceased its previous operations associated with the distribution of the PulseOx line in the medical field. Consequently operating results of this component has been reported in this financial statements as discontinued operations in accordance with ASC number 360-10 (formerly SFAS No. 144) "Accounting For The Impairment Or Disposal Of Long Lived Assets", ("ASC 360-10") and, accordingly, the Company has reclassified its results of operations for the quarterly period ended March 31, 2009 in accordance with provisions of ASC 360-10.

NOTE 5 – Financial Expenses

Financial expenses, net, for the three months ended March 31, 2010 and 2009 were \$2 and \$52, respectively. The principal components of the financial expenses during the two periods were: (i) interest in respect of debt instruments issued by the Company between April 2005 and October 2006 in the amounts of \$15 and \$28, respectively, (ii) income recoded in accordance with a settlement agreement signed with one of the holders of a debt instrument in the principal amount of \$33 in 2010 and (iii) exchange rate differences and other in the amount of \$20 and \$24, respectively.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

THE FOLLOWING DISCUSSION SHOULD BE READ IN CONJUNCTION WITH OUR FINANCIAL STATEMENTS AND THE NOTES RELATED TO THOSE STATEMENTS. SOME OF OUR DISCUSSION IS FORWARD-LOOKING AND INVOLVES RISKS AND UNCERTAINTIES. FOR INFORMATION REGARDING RISK FACTORS THAT COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, REFER TO THE RISK FACTORS SECTION OF THE ANNUAL REPORT ON FORM 10-K FOR THE YEAR ENDED DECEMBER 31, 2009.

### OVERVIEW

SPO Medical Inc. ("we" or the "Company") is engaged in the design and development of non-invasive pulse oximetry technologies to measure blood oxygen saturation and heart rate. We have developed and patented proprietary technology that enables the measurement of heart rate and oxygen saturation levels in the blood, which is known as Reflectance Pulse Oximetry (RPO). Using RPO, a sensor can be positioned on various body parts, hence minimizing problems from motion artifacts and poor perfusion. The unique design features contribute to substantially lower power requirements and enhance wireless, stand-alone configurations facilitating expanded commercial possibilities. As of May 2010, we hold 12 patents issued by the United States Patent and Trademark Office ("USPTO") covering various aspects of our technologies. As further discussed below, our technologies are currently applied to products that are designed for use by in the homecare, professional medical care, sports, safety and search and rescue markets.

In January 2010, our wholly owned subsidiary SPO Ltd. ("Ltd") entered into an Alliance and License Agreement, dated as of December 1, 2009, with an entity owned and controlled by our Chief Technical Officer (the "Licensee"). Under the terms of the license agreement, the PulseOx medical product line is being marketed by the Licensee in the medical field. Under the License, all worldwide sales, marketing and all existing inventory and manufacturing of the PulseOx line in the medical field was transferred to the Licensee in consideration of \$200,000 in cash and the Licensee's (and its affiliates) agreement to pay to Ltd royalties derived from these products in agreed upon amounts.

Following the license agreement, we are primarily engaged in developing and licensing our technology to third parties for integration with products in the recreational, military, baby wellness monitoring and sleep monitoring fields. Following our entry into the license agreement, we have restructured our business and ceased all operating activities formerly conducted with respect to the manufacture and marketing of our PulseOx product line to the medical market and we intend to pursue joint ventures, OEM type arrangements, research and or subcontracting agreements relating to our oximetry technology with respect to the recreational, military, baby wellness monitoring and sleep monitoring fields.

We were originally organized under the laws of the State of Delaware in September 1981 under the name "Applied DNA Systems, Inc." On November 16, 1994, we changed our name to "Nu-Tech Bio-Med, Inc." On December 23, 1998, we changed our name to "United Diagnostic, Inc." Effective April 21, 2005, we acquired 100% of the outstanding capital stock of SPO Ltd. pursuant to a Capital Stock Exchange Agreement dated as of February 28, 2005 among the Company, SPO Ltd. and the shareholders of SPO Ltd., as amended and restated on April 21, 2005 pursuant to which we issued to the former shareholders of SPO Ltd. a total of 5,769,106 shares of the Company's Common Stock representing approximately 90% of the Common Stock then issued and outstanding.

We have generated significant operating losses since inception and we have a limited operating history upon which an evaluation of our prospects can be made. Our prospects must therefore be evaluated in light of the problems, expenses, delays and complications associated with a development stage company.

We need to raise additional funds on an immediate basis in order to meet our on-going operating requirements and to realize our business plan as well as pay outstanding loans in the approximate amount of \$ 1.1 million, which are currently due and payable. In response to the deteriorating global economic conditions that began in 2008, we have taken certain measures in an effort to reduce operating expenses and conserve our cash resources. Beginning in July 2008, we have significantly curtailed our non-essential product design and development, and ceased all marketing activities and product manufacturing. We have terminated certain product development plans. During 2008 we deferred part of management and employee salaries and benefits. As of March 31, 2010, we had 6 employees working on a full-time basis. If we are unable to raise capital on an immediate basis, it may be necessary for us to take further cost cutting measures to reduce our cash burn including laying-off additional personnel. No assurance can be given that we will be able to raise the needed capital. These conditions raise substantial doubt about our ability to continue as a going concern.

#### CRITICAL ACCOUNTING POLICIES

The discussion and analysis of our financial condition and results of operations are based upon our audited consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to revenue recognition, bad debts, investments, intangible assets and income taxes. Our estimates are based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

We have identified the accounting policies below as critical to our business operations and the understanding of our results of operations.

#### REVENUE RECOGNITION

We generate revenues principally from the provision of research and development services. Revenues generated from research and development services are recognized when such services are performed.

Commencing January 2010, revenue generation will be principally from OEM and licensing agreements which will be recognized upon delivery of services through such agreements.

#### USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

#### RESULTS OF OPERATIONS

##### COMPARISON OF THE THREE MONTHS ENDED MARCH 31, 2010 AND THE THREE MONTHS ENDED MARCH 31, 2009

As noted above, in January 2010, we restructured our operations to focus primarily on licensing our core technology for non-medical market application. The restructuring included entering into a licensing agreement (the "License") for the existing medical PulseOx productline with an entity owned by the Company's Chief Technology Officer (hereinafter the "Licensee"). Under the terms of the License, the Licensee was granted a non-transferable, royalty bearing license, to distribute the PulseOx product line and derivatives thereof, for specifically defined medical uses. Following the License, the Company ceased its previous operations associated with the distribution of the PulseOx line in the medical field entered into the License pursuant to which our PulseOx medical product line is being marketed by the Licensee in the medical field. Following the License, we are primarily engaged in developing and licensing our technology to third parties for integration with products in the recreational, military, baby wellness monitoring and sleep monitoring fields.

The cessation of operations was given effect to as of January 1, 2009. Consequently, operating results of this segment has been reported in this financial statements as discontinued operations in accordance with ASC number 360-10 (formerly SFAS No. 144) "Accounting For The Impairment Or Disposal Of Long Lived Assets", ("ASC 360-10"). As a result of this treatment we have reclassified our results of operations for the quarterly period ended March 31, 2009 in accordance with provisions of ASC 360-10.

**REVENUES.** Revenues for the three months ended March 31, 2010 were \$21,000 and were generated from research and development services that we provided. There were no revenues from continued operations for the period ended March 31, 2009.

**COSTS OF REVENUES.** Costs of revenues include all costs related to services provided and consist primarily of direct material costs, and salaries and related expenses for personnel. Costs of revenues for the three months ended March 31, 2010 were \$18,000 and were primarily attributable to salaries and related expenses. There were no cost of revenues recorded for the corresponding three month period in 2009.

**RESEARCH AND DEVELOPMENT EXPENSES, NET.** Research and development expenses, net, consist primarily of expenses incurred in the design, development and testing of our products. These expenses consist primarily of salaries and related expenses for employees, contract design and testing services, supplies used and consulting and license fees paid to third parties. Research and development expenses, net, for the three months ended March 31, 2010 and 2009 were \$49,000 and \$70,000, respectively. The decrease in research and development expenses during three months ended March 31, 2010 as compared to the corresponding period in 2009 is primarily attributable to the decrease in the number of employees and other personnel resulting from the restructuring of our business, including the entry into the License. Research and development expenses, net, for the three months ended March 31, 2010 and 2009 are net of \$69,000 and \$125,000, respectively, of grant awards received from the Office of the Chief Scientist of the Government of Israel ("OCS"), which we recognized and were offset against expenses in the periods.

**GENERAL AND ADMINISTRATIVE EXPENSES .** General and administrative expenses primarily consist of salaries and other related costs for personnel in executive and other administrative functions. Other significant costs include professional fees for legal and accounting services. General and administrative expenses for the three months ended March 31, 2010 were \$154,000 compared to \$168,000 for the corresponding period in 2009. The decrease is primarily attributable to the reduction in number of employees and in professional fees for the three months ended March 31, 2010 compared to the corresponding period in 2009.

**FINANCIAL EXPENSES, NET.** Financial expenses, net, for the three months ended March 31, 2010 were \$2,000 compared to \$52,000 for the corresponding period in 2009. The decrease in financial expenses, net, during the three months ended March 31, 2010 compared to the corresponding period in 2009 is primarily attributable to income recorded during the 2009 period in respect of a settlement reached with a holder of a promissory note in the principal amount of \$33,000, the decrease in interest in respect of debt instruments issued between April 2005 and October 2006 (\$15,000 for the three months ended March 31, 2010 compared to \$28,000 in the corresponding period in 2009) and non-cash amortization expenses \$5,000 recorded in the three months ended March 31, 2009.

**NET INCOME FROM DISCONTINUED OPERATIONS.** Following the entry into the License, we ceased all previous operations associated with the distribution of the PulseOx line in the medical field. Consequently, for the three months ended March 31, 2009 we recorded net income from discontinued operations consisting of operating results of the discontinued operations. During the three months period ended March 31, 2010 we did not record any net income from discontinued operations as compared to \$147,000 during the corresponding period in 2009.

**NET LOSS.** For the three months ended March 31, 2010 and 2009, we had a net loss of \$202,000 and \$143,000, respectively. The increase in net loss during 2010 period is primarily attributable to our downsizing and subsequent restructuring process which was initiated in January 2010 and designed to enable us to focus primarily on licensing our core technology for non-medical market applications.

#### LIQUIDITY AND CAPITAL RESOURCES

We need to raise additional funds in order to meet our on-going operating requirements, pay outstanding loans in the aggregate approximate amount of \$1.1 million and to realize our restructured business plan. In response to the deteriorating global economic conditions that began in 2008, we have taken certain measures in an effort to reduce operating expenses and conserve our cash resources. Beginning in July 2008 we significantly curtailed our non-essential product design and development, marketing activities and reorganized our product manufacturing and delivery system to "just-in-time" arrangements. We have terminated certain product development plans. During 2008 and 2009, we deferred part of management and employee salaries and benefits. As of May 14, 2010, we had six employees working on a full-time basis. As noted above, in our restructured operations, we intend to pursue joint ventures, OEM type arrangement, research and or sub contractor agreements relating to our oximetry technology with respect to the recreational, military, baby wellness monitoring and sleep monitoring fields. If we are unable to raise capital through a financial raise or joint-venture type of agreement in the near term, it may be necessary for us to take further measures to reduce our cash burn including laying-off additional personnel. No assurance can be given that we will be able to raise the needed capital. These conditions raise substantial doubt about our ability to continue as a going concern. Additional equity financings is likely to be dilutive to holders of our Common Stock and debt financing, if available, may require us to be bound by significant repayment obligations and covenants that restrict our operations.

As at March 31, 2010, we had cash and cash equivalents of approximately \$271,000 compared to \$386,000 at December 31, 2009.

We generated net negative cash flows from operating activities of approximately \$176,000 during the three months ended March 31, 2010 compared to \$122,000 positive cash flows during the corresponding period in 2009. The decreased in cash flows is primarily attributable to our restructuring process which was initiated in January 2010 to focus primarily on licensing our core technology for non-medical market applications. In addition, the grants we received from the OCS decreased from \$125,000 during the three months ended March 31, 2009 to \$69,000 during the three months ended March 31, 2010.

In December 2005 we completed the private placement to certain accredited investors that we commenced in April 2005 for the issuance of up to \$1,544,000 of units of our securities, with each unit comprised of (i) our 18 month 6% promissory note (collectively, the "April 2005 Notes") and (ii) three year warrants to purchase up to such number of shares of our Common Stock as are determined by the principal amount of the Note purchased by such investor divided by \$ 0.85 (collectively the "April 2005 Warrants"). We and the holders of \$1,464,000 in principal amount of the April 2005 Notes subsequently agreed to (a) extend the maturity term of the April 2005 Notes through March 26, 2008, (b) extend the exercise period of the April 2005 Warrants from three to five years with an expiration date of September 26, 2010 and adjust the per share exercise price to \$0.60 and (c) increase the interest rate on the amounts outstanding under the April 2005 Notes to 8% per annum, effective July 12, 2006. Holders of notes in the principal

amount of \$125,000 that agreed to the extension of the maturity date on the notes , have since exercised their warrants and converted the interest accrued there on into common stock; and a holder of an April 2005 Note in the principal amount of \$50,000 was repaid. The Amendment also provided that if we subsequently issue shares of our Common Stock at an effective per share exercise price less than that of the adjusted per share exercise price of the April 2005 Warrants during the adjusted exercise period, then the exercise price thereof is to be reduced to such lower exercise price, except for certain specified issuances. All of the extended notes, matured on March 26, 2008. On December 31, 2009, we and the last holder of \$30,000 who did not sign the Amendment agreed to extend the note's maturity date to December 31, 2011 in consideration of the issuance of warrants to purchase up to 50,000 shares of our common stock, exercisable through the third anniversary of issuance, at a per share exercise price of \$0.01.

In March 2008, we offered to the holders of the April 2005 Notes to apply the amounts payable to them on the April 2005 Notes, to the exercise price of the April 2005 Warrants, thereby exercising these warrants, and to convert into Common Stock the accrued interest on the 2005 Notes at a per share conversion price of \$0.60. Note holders who accepted this offer were issued new warrants for such number of shares of Common Stock equal to 25% of the number shares issued to them upon exercise of their existing warrants and conversion of the interest accrued on the note. The new warrants will be exercisable over three years at an exercise price of \$0.60. As of December 31, 2009, the holders of approximately \$439,000 in principal amount have agreed to apply the principal amount owed to them to the exercise price of the April 2005 Warrants. Accordingly, approximately \$520,000 in amounts owed under the 2005 Notes have been converted into equity and, accordingly, an aggregate of 866,528 shares of our Common Stock have been issued upon exercise of the April 2005 Warrants and conversion of the interest owing on the April 2005 Notes. Under the terms of the offer, new warrants for 216,636 share of our Common stock have been issued to these April 2005 Note holders, exercisable over three years from the date of issuance. Three note holders of the principal amount of \$200,000 have agreed to extend their loan for a further 24 months and we agreed to pay to them the interest accrued through the original maturity date of March 26, 2008 in the aggregate amount of \$40,000. Under the terms of the agreement with the extending note holders, we will issue to the extending holders new warrants for an aggregate of 50,000 shares of our Common stock, which warrants are exercisable for three years from issuance and contain the same operative terms, including exercise price, as the warrants that were originally issued in connection with the issuance of the April 2005 Notes. We have been informed by the holders of \$300,000 in principal amount of their election to not accept our offer, of which \$250,000 of principal and the accrued interest thereon has been repaid as of December 31, 2009. On March 15, 2010, we agreed with the holder of an April 2005 Note in the principal amount of \$50,000 to extend the note's maturity date to September 15, 2010 and, in consideration thereof, we agreed to pay the holder total amount of \$45,000, of which \$25,000 was paid as of the date of the filing of this quarterly report and the rest is to be paid in payments on the amount of \$5,000 each on the 15th day of each month.. On February 5, 2009, we agreed with one of the note holders to repay \$25,000 in principal over a number of payments during 2009 and to convert accrued interest to 26,500 shares of common stock

In July 2006, we commenced a private placement of units of our securities, with each unit comprised of (i) our 8% month promissory note due 12 months from the date of issuance and (ii) warrants as described below, pursuant to which we raised \$550,000 (the maximum amount that could be raised from this offering). Under the terms of the offering, the principal and accrued interest is due in one balloon payment at the end of the twelve month period. Each purchaser of the notes received warrants, exercisable over a period of two years from the date of issuance, to purchase 16,250 shares of Common Stock for each \$25,000 of principal loaned, at a per share exercise price equal to the lower of \$1.50 or 35% less than any the offering price at an initial public offering of the Company's Common Stock during the warrant exercise period. During 2007, we offered to the holders of the notes to convert the principal and accrued interest into shares of the Company's Common Stock at a per share conversion price of \$0.90. As of March 29, 2010, the holders of \$238,000 of the principal amount agreed to convert the principal and accrued interest thereon into shares of our Common Stock. We repaid to note holders the principal amount of \$75,000 and the accrued interest thereon. On December 31, 2009 the Company and a holder of a Loan Notes in the principal amount of \$150,000 agreed to extend the note's maturity date to December 31, 2011 in consideration of the issuance of warrants to purchase up to 50,000 shares of the of the Company's common stock, at a per share exercise price of \$0.01 exercisable for a period of three years. We already paid the holder \$96,000 on account for the amount owed to him. We have not made the scheduled payment on the principal amount of \$54,000 that remains due and owing under the notes that have not been converted and, accordingly, under the terms of such notes, we are in default. As of the May 14, 2010, approximately \$211,000 in respect of the principal and accrued interest on these notes remains outstanding.

#### ITEM 4. CONTROLS AND PROCEDURES

**EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES.** We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is

recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer, as appropriate, to allow timely decisions regarding required disclosure based closely on the definition of "disclosure controls and procedures" in Rule 13a-14(c).

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with participation of management, including our Chief Executive Officer, who serves as our principal executive officer and principal financial and accounting officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Chief Executive Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report to provide reasonable assurance that material information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms

Management is aware that there is a lack of segregation of duties due to the small number of employees dealing with general administrative and financial matters. However, at this time, management has decided that considering the employees involved, the control procedures in place, and the outsourcing of certain financial functions, the risks associated with such lack of segregation are low and the potential benefits of adding additional employees to clearly segregate duties do not justify the expenses associated with such increases. Management will periodically reevaluate this situation. If the volume of the business increases and sufficient capital is secured, it is our intention to increase staffing to mitigate the current lack of segregation of duties within the general administrative and financial functions.

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems no evaluation of controls can provide absolute assurance that all control issues, if any, within a company have been detected. Such limitations include the fact that human judgment in decision-making can be faulty and that breakdowns in internal control can occur because of human failures, such as simple errors or mistakes or intentional circumvention of the established process.

**CHANGES IN INTERNAL CONTROLS OVER FINANCIAL REPORTING.** During the quarter ended March 31, 2010, there have been no changes in our internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, these controls.

PART II - OTHER INFORMATION

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

We first disclosed in the quarterly report on Form 10-Q for the three months ended March 31, 2008, that we had not repaid principal and accrued interest that became due during the quarterly period covered by such report. We disclosed in subsequent quarterly reports on Form 10-Q additional amounts that became due in ensuing quarterly periods and the results of our efforts to resolve these matters. As of March 31, 2010, there continues to remain outstanding, in the aggregate, approximately \$895,000 of such principal and accrued interest. We continue to hold discussions with certain of the holders of the outstanding debt in an attempt to resolve this matter; no assurance can be provided that we will be successful in concluding any mutually acceptable resolution of this matter.

ITEM 6. EXHIBITS.

31 Rule 13a - 14(a) Certification of Principal Executive Officer (and Principal Financial and Accounting Officer)

32 Section 1350 Certification of Principal Executive Officer (and Principal Financial and Accounting Officer)

SIGNATURES

Pursuant to the requirements of the Exchange Act of 1934, the registrant has caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

DATE: May 14, 2010
