(b) Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update No. 2014-09 ("ASU 2014-09"), "Revenue from Contracts with Customers (Topic 606)". ASU 2014-09 will eliminate transaction-specific and industry-specific revenue recognition guidance under current U.S. GAAP and replace it with a principle-based approach for determining revenue recognition. ASU 2014-09 will require that companies recognize revenue based on the value of transferred goods or services as they occur in the contract. The ASU also will require additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. ASU 2014-09 is effective for reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early adoption is permitted for annual periods beginning after December 15, 2016, including interim periods within that reporting period. Entities can transition to the standard either retrospectively or as a cumulative effect adjustment as of the date of adoption. Management is currently assessing the impact the adoption of ASU 2014-09 and the effect of the standard on the Company's ongoing financial reporting.

In April 2015, the FASB issued ASU No. 2015-3, "Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs," which requires debt issuance costs to be presented in the balance sheet as a direct deduction from the associated debt liability. For the Company, the standard is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. The new guidance will be applied on a retrospective basis and early adoption is permitted. The Company is in the process of evaluating the impact of adopting this guidance.

In July 2015, the FASB issued ASU 2015-11, "Inventory (Topic 330): Simplifying the Measurement of Inventory" ("ASU 2015-11") which applies to inventory that is measured using the first-in, first-out ("FIFO") or average cost method. Under the updated guidance, an entity should measure inventory that is within scope at the lower of cost and net realizable value, which is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. Subsequent measurement is unchanged for inventory that is measured using the last-in, first-out ("LIFO") method. This ASU is effective for annual and interim periods beginning after December 15, 2016, and should be applied prospectively with early adoption permitted at the beginning of an interim or annual reporting period. The Company expects that the adoption of this guidance will not have a material effect on its financial statements.

In September 2015, the FASB issued ASU No. 2015-16, “Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments.” Under this ASU, an acquirer must recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The effect on earnings of changes in depreciation or amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed as of the acquisition date, must be recorded in the reporting period in which the adjustment amounts are determined rather than retrospectively. This standard is effective for annual reporting periods, including interim reporting periods within those periods, beginning after December 15, 2016. Early adoption is permitted as of annual reporting periods beginning after December 15, 2015, including interim reporting periods within those annual periods. The Company expects that the adoption of this guidance will not have a material effect on its financial statements.

13. Deferred income tax assets

In accordance with the provisions of *ASC Topic 740, "Income Taxes"*, the Company assesses, on a quarterly basis, its ability to realize its deferred tax assets. Based on the more likely than not standard in the guidance and the weight of available evidence, the Company believes a valuation allowance against its deferred tax assets is necessary. In determining the need for a valuation allowance, the Company considered the following significant factors: an assessment of recent years' profitability and losses by tax authorities; the Company's expectation of profits based on margins and volumes expected to be realized, which are based on current pricing and volume trends; the long period in all significant operating jurisdictions before the expiry of net operating losses, noting further that a portion of the deferred tax asset is composed of deductible temporary differences that are subject to an expiry period until realized under tax law. The Company will continue to evaluate the provision of valuation allowance in future periods.

The components of estimated deferred income tax assets as of September 30, 2015 and December 31, 2014 are as follows (figures are in thousands of USD):

	September 30, 2015	December 31, 2014

Less: Valuation allowance	(9,159)	(9,236)
Total deferred tax assets, net of valuation allowance ⁽²⁾	\$ 12,632	\$ 11,974

The net operating losses carry forward for the U.S. entities for income tax purposes are available to reduce future years' taxable income. These losses will expire, if not utilized, in 20 years. Net operating losses carry forward for China entities can be carried forward for 5 years to offset taxable income. However, as of September 30, 2015, the valuation allowance was \$9.2 million, including \$7.1 million allowance for the Company's deferred tax assets in (1) the United States and \$2.1 million allowance for the Company's non-U.S. deferred tax assets in China. Based on the Company's current operations in the United States, management believes that the deferred tax assets in the United States are not likely to be realized in the future. For the deferred tax assets in China, pursuant to certain tax laws and regulations in China, the management believes such amount will not be used to offset future taxable income.

Approximately \$5.4 million and \$4.9 million of net deferred income tax asset as of September 30, 2015 and (2) December 31, 2014, respectively, are included in non-current deferred tax assets in the accompanying condensed unaudited consolidated balance sheets. On May 27, 2014, the Company announced a special cash dividend of \$0.18 per common share to the Company's shareholders of record as of the close of business on June 26, 2014. As China Automotive Systems, the parent (1) company, had an accumulated deficit position as of the date of the dividend declaration, the dividends distributed to the Company's common shareholders described above are treated as a return of common shareholders' investment cost.

(2) On August 11, 2014, the Company entered into the Exchange Agreement with Jiulong Machinery Electricity, under which the Company issued 3,260,000 and 818,000 of its common shares in consideration for the acquisition of the 20% and 19% equity interests in Henglong and Jiulong, respectively, held by Jiulong Machinery Electricity. On September 26, 2014, the Company obtained the 20% and 19% equity interests in Henglong and Jiulong, respectively, and completed its share registrations with the local government administrative bureau. The Company owned 100% of the equity interests in both Henglong and Jiulong as of September 30, 2014. The Company's acquisitions of the non-controlling interests were accounted for as equity transactions in the year ended December 31, 2014. The total carrying value for the non-controlling interests in both Henglong and Jiulong was \$34.5 million, including the accumulated other comprehensive income of \$4.7 million related to the noncontrolling interests acquired and other non-controlling interests of \$29.8 million. Therefore, the total carrying value of \$34.5 million for the non-controlling interests acquired was reclassified from non-controlling interests to the controlling interest's equity as of September 30, 2014. On October 13, 2014, the Company completed its issuance of 4,078,000 common shares to nominee holders designated by Jiulong Machinery Electricity. The fair market value of the Company's common stock issued was \$37.3 million or \$9.15 per share, which was determined on the issuance date of the common shares. The difference between the fair market value of \$37.3 million for the Company's common shares issued and the carrying value of \$34.5 million for the non-controlling interest acquired of \$2.8 million was recorded as a reduction of additional paid-in capital. Additional paid-in capital of the Company was also

decreased by \$4.7 million and the accumulated other comprehensive income attributable to Henglong and Jiulong was increased by a corresponding amount.

On September 16, 2014, the Company granted 22,500 stock options to the Company's independent directors, with the exercise price equal to the closing price of the Company's common stock traded on NASDAQ on the date of grant. The fair value of stock options was determined at the date of grant using the Black-Scholes option pricing model. The Black-Scholes option model requires management to make various estimates and assumptions, (3) including expected term, expected volatility, risk-free rate and dividend yield. The expected term represents the period of time that stock-based compensation awards granted are expected to be outstanding and is estimated based on considerations including the vesting period, contractual term and anticipated employee exercise patterns. Expected volatility is based on the historical volatility of the Company's stock. The risk-free rate is based on the U.S. Treasury yield curve in relation to the contractual life of stock-based compensation instruments. The dividend yield assumption is based on historical patterns and future expectations for the Company's dividends.

Assumptions used to estimate the fair value of stock options on the grant dates are as follows:

Issuance Date	Expected volatility	Risk-free rate	Expected term (years)	Dividend yield
September 16, 2014	120.6	% 1.78	5	0.00

The above stock options were vested and exercisable immediately. Their fair value on the grant dates of September 16, 2014 and August 13, 2013 using the Black-Scholes option pricing model was \$0.2 million and \$0.2 million, respectively. For the year ended December 31, 2014, the Company recognized stock-based compensation expenses of \$0.2 million.

27. Significant concentrations

A significant portion of the Company's business is conducted in China where the currency is the RMB. Regulations in China permit foreign owned entities to freely convert the RMB into foreign currency for transactions that fall under the "current account," which includes trade related receipts and payments, interest and dividends. Accordingly, the Company's Chinese subsidiaries may use RMB to purchase foreign exchange for settlement of such "current account" transactions without pre-approval. However, pursuant to applicable regulations, foreign-invested enterprises in China may pay dividends only out of their accumulated profits, if any, determined in accordance with the PRC law. In calculating accumulated profits, foreign investment enterprises in China are required to allocate at least 10% of their annual net income each year, if any, to fund certain reserve funds, including mandated employee benefits funds, unless these reserves have reached 50% of the registered capital of the enterprises.

Transactions other than those that fall under the "current account" and that involve conversion of RMB into foreign currency are classified as "capital account" transactions; examples of "capital account" transactions include repatriations of investment by or loans to foreign owners, or direct equity investments in a foreign entity by a China domiciled entity. "Capital account" transactions require prior approval from China's State Administration of Foreign Exchange, or SAFE, or its provincial branch to convert a remittance into a foreign currency, such as USD, and transmit the foreign currency outside of China.

This system could be changed at any time and any such change may affect the ability of the Company or its subsidiaries in China to repatriate capital or profits, if any, outside China. Furthermore, SAFE has a significant degree of administrative discretion in implementing the laws and has used this discretion to limit convertibility of current account payments out of China. Whether as a result of a deterioration in the Chinese balance of payments, a shift in the Chinese macroeconomic prospects or any number of other reasons, China could impose additional restrictions on capital remittances abroad. As a result of these and other restrictions under the laws and regulations of the PRC, the Company's PRC subsidiaries are restricted in their ability to transfer a portion of their net assets to the parent. The Company has no assurance that the relevant Chinese governmental authorities in the future will not limit further or eliminate the ability of the Company's PRC subsidiaries to purchase foreign currencies and transfer such funds to the Company to meet its liquidity or other business needs. Any inability to access funds in China, if and when needed for use by the Company outside of China, could have a material and adverse effect on the Company's liquidity and its business.

The Company grants credit to its customers including Xiamen Joylon, Xiamen Automotive Parts, Shanghai Fenglong and Jiangling Yude, which are related parties of the Company. The Company's customers are mostly located in the PRC.

30. Off-balance sheet arrangements

As of September 30, 2015 and December 31, 2014, the Company did not have any significant transactions, obligations or relationships that could be considered off-balance sheet arrangements.

31. Segment reporting

The accounting policies of the product sectors are the same as those described in the summary of significant accounting policies except that the disaggregated financial results for the product sectors have been prepared using a management approach, which is consistent with the basis and manner in which management internally disaggregates financial information for the purposes of assisting them in making internal operating decisions. Generally, the Company evaluates performance based on stand-alone product sector operating income and accounts for inter segment

sales and transfers as if the sales or transfers were to third parties, at current market prices.

As of September 30, 2015, the Company had 13 product sectors, five of which were principal profit makers and were reported as separate sectors and engaged in the production and sales of power steering (Henglong, Jiulong, Shenyang, Wuhu and Hubei Henglong), and one holding company (Genesis). The other eight sectors were engaged in the production and sale of sensor modular (USAI), automobile steering columns (Jielong), provision of after sales and R&D services (HLUSA), production and sale of power steering (Chongqing Henglong), trade (Brazil Henglong), commercial vehicle repacking and sales (Fujian Qiaolong), manufacture and sales of automobile electronic systems and parts (Wuhan Chuguanjie), and design and sales of automobile electronics (Shanghai Henglong). Since the revenues, net income and net assets of these eight sectors collectively are less than 10% of consolidated revenues, net income and net assets, respectively, in the condensed unaudited consolidated financial statements, the Company incorporated these eight sectors into "Other Sectors."

As of September 30, 2014, the Company had 10 product sectors, five of which were principal profit makers and were reported as separate sectors and engaged in the production and sales of power steering (Henglong, Jiulong, Shenyang, Wuhu and Hubei Henglong), and one holding company (Genesis). The other five sectors were engaged in the production and sale of sensor modular (USAI), automobile steering columns (Jielong), provision of after sales and R&D services (HLUSA), production and sale of power steering (Chongqing Henglong) and trade (Brazil Henglong). Since the revenues, net income and net assets of these five sectors collectively are less than 10% of consolidated revenues, net income and net assets, respectively, in the condensed unaudited consolidated financial statements, the Company incorporated these five sectors into "Other Sectors."

The Company's product sector information for the three months and nine months ended September 30, 2015 and 2014, is as follows (figures are in thousands of USD):

Critical Accounting Estimates

The Company prepares its condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amount of revenues and expenses during the reporting periods. Management periodically evaluates the estimates and judgments made. Management bases its estimates and judgments on historical experience and on various factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates as a result of different assumptions or conditions. The following critical accounting policies affect the more significant judgments and estimates used in the preparation of the Company’s condensed consolidated financial statements.

The Company considers an accounting estimate to be critical if:

- It requires the Company to make assumptions about matters that were uncertain at the time it was making the estimate, and

- Changes in the estimate or different estimates that the Company could have selected would have had a material impact on the Company’s financial condition or results of operations.

The table below presents information about the nature and rationale for the Company's critical accounting estimates:

Balance Sheet Caption	Critical Estimate Item	Nature of Estimates Required	Assumptions/Approaches Used	Key Factors
Accrued liabilities and other long-term liabilities	Warranty obligations	Estimating warranty requires the Company to forecast the resolution of existing claims and expected future claims on products sold. OEMs (Original Equipment Manufacturers) are increasingly seeking to hold suppliers responsible for product warranties, which may impact the Company's exposure to these costs.	The Company bases its estimate on historical trends of units sold and payment amounts, combined with its current understanding of the status of existing claims and discussions with its customers.	<ul style="list-style-type: none"> ·OEM sourcing ·OEM policy decisions regarding warranty claims

Tax payable and deferred tax assets/liabilities	Uncertain tax positions	The Company is required to determine and assess all material positions, including all significant uncertain positions in all tax years that are still subject to assessment or challenge under relevant tax statutes.	The Company applies a more likely than not threshold and a two-step approach for tax position measurement and financial statement recognition. For the two-step approach, the first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely to be realized upon settlement.	·An allocation or a shift of income between jurisdictions
				·The characterization of income or a decision to exclude reporting taxable income in a tax return ·A decision to classify a transaction, entity, or other position in a tax return as tax exempt

In addition, there are other items within the Company's financial statements that require estimation, but are not as critical as those discussed above, including provision of accounts and notes receivable. Although not significant in recent years, changes in estimates used in these and other items could have a significant effect on the Company's consolidated financial statements.

Recent Accounting Pronouncements

Net Product Sales

Net product sales were \$90.8 million for the three months ended September 30, 2015, compared to \$101.7 million for the same period in 2014, representing a decrease of \$10.9 million, or 10.7%. The decrease was mainly due to the economic slowdown in China. The year-over-year GDP growth rate was 6.9% for the third quarter of 2015, which was the lowest rate since 2009. As the major part of the Company's business is in China, the slower economy in China led to decreased vehicle sales, which correspondingly led to a decreased sales volume of the Company as an auto parts supplier. The product mix change also caused a decline in the Company's net product sales. With more passenger vehicles installing electronic power steering (EPS), the share of hydraulic power steering gears, the Company's traditional products, is shrinking. Though the Company's sales of EPS increased substantially, they only partially offset the decline in sales of hydraulic power steering gears due to the low percentage of EPS in the product mix.

Net sales of traditional hydraulic power steering products were \$44.7 million for the three months ended September 30, 2015, compared to \$66.8 million for the same period in 2014, representing a decrease of \$22.1 million, or 33.1%. Net sales of EPS were \$20.3 million for the three months ended September 30, 2015, compared to \$9.1 million for the same period in 2014, representing an increase of \$11.2 million, or 123.1%. As a percentage of net sales, sales of EPS were 22.4% for the three months ended September 30, 2015, compared to 8.9% for the same period in 2014.

The depreciation of the RMB against the U.S. dollar in the third quarter of 2015 also caused a decrease in net sales as more than 80% of the Company's business is conducted in China.

In summary, the Company had a decrease in sales volume leading to a sales decrease of \$6.0 million, a decrease in selling price of steering gears leading to a sales decrease of \$2.6 million, and the effect of foreign currency translation of the RMB against the U.S. dollar, which led to a sales decrease of \$2.3 million.

Further analysis by segment (before elimination) is as follows:

Net product sales for Henglong were \$53.9 million for the three months ended September 30, 2015, compared with \$60.9 million for the three months ended September 30, 2014, representing a decrease of \$7.0 million, or 11.4%, which was mainly due to the decrease in sales of hydraulic power steering gears, partially offset by the increase in sales of EPS. A decrease in sales volume led to a sales decrease of \$5.6 million, a decrease in selling price led to a sales decrease of \$0.2 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$1.2 million.

Net product sales for Jiulong were \$16.2 million for the three months ended September 30, 2015, consistent with \$16.0 million for the three months ended September 30, 2014. An increase in sales volume led to a sales increase of \$0.9 million, a decrease in selling price led to a sales decrease of \$0.5 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$0.2 million.

Net product sales for Shenyang were \$7.5 million for the three months ended September 30, 2015, compared to \$9.0 million for the same period in 2014, representing a decrease of \$1.5 million, or 16.4%. The products of Shenyang are mainly sold to Shenyang Brilliance Jinbei Automobile Co., LTD, “Jinbei”, which increasingly uses EPS on its passenger vehicles, while Shenyang mainly engages in the production and sales of hydraulic power steering gears for passenger vehicles, so the sales volumes of Shenyang decreased accordingly. A decrease in sales volumes led to a sales decrease of \$0.5 million, a decrease in selling price led to a sales decrease of \$0.8 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$0.2 million.

Net product sales for Wuhu were \$3.9 million for the three months ended September 30, 2015, compared to \$5.9 million for the same period in 2014, representing a decrease of \$2.0 million, or 33.9%. The products of Wuhu are mainly sold to Chery Automobile Co., Ltd., “Chery”. Sales volumes of Chery have decreased continuously since 2012. Therefore, Wuhu’s ability to increase its sales is limited. A decrease in sales volumes led to a sales decrease of \$2.0 million, an increase in selling price led to a sales increase of \$0.1 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$0.1 million.

Net product sales for Hubei Henglong were \$13.8 million for the three months ended September 30, 2015, compared to \$14.4 million for the same period in 2014, representing a decrease of \$0.6 million, or 4.2%. An increase in sales volumes led to a sales increase of \$0.3 million, a decrease in selling price led to a sales decrease of \$0.7 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a sales decrease of \$0.2 million.

Net product sales for Other Sectors were \$8.7 million for the three months ended September 30, 2015, compared to \$9.9 million for the same period in 2014, representing a decrease of \$1.2 million, or 12.5%, mainly due to a decrease of \$2.0 million in the sales of Jielong (which engages in the production and sale of automotive steering columns) and an increase of \$0.7 million in the sales of HLUSA (which engages in the marketing of automotive parts in North America).

Cost of Products Sold

For the three months ended September 30, 2015, the cost of products sold was \$74.9 million, compared to \$81.2 million for the same period of 2014, representing a decrease of \$6.2 million, or 7.7%. The decrease in the cost of products sold was mainly due to the net effect of a net decrease in sales volumes which led to a cost of products sold decrease of \$5.2 million, an increase in unit cost which led to a cost of products sold increase of \$1.0 million, and the effect of foreign currency translation of the RMB against the U.S. dollar which led to a cost of products sold decrease of \$2.0 million. Further analysis is as follows:

Cost of products sold for Henglong was \$46.1 million for the three months ended September 30, 2015, compared to \$49.2 million for the same period of 2014, representing a decrease of \$3.1 million, or 6.3%. A decrease in sales volumes led to a cost of products sold decrease of \$4.3 million, an increase in unit cost led to a cost of products sold increase of \$2.1 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a cost of products sold decrease of \$0.9 million.

Cost of products sold for Jiulong was \$14.8 million for the three months ended September 30, 2015, compared to \$14.0 million for the same period of 2014, representing an increase of \$0.8 million, or 5.7%. An increase in sales volumes led to a cost of products sold increase of \$0.4 million, an increase in unit cost led to a cost of products sold increase of \$0.6 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a cost of products sold decrease of \$0.2 million.

Cost of products sold for Shenyang was \$6.2 million for the three months ended September 30, 2015, compared to \$7.1 million for the same period of 2014, representing a decrease of \$0.9 million, or 13.0%. The decrease in cost of products sold was mainly due to a decrease in sales volumes which led to a cost of products sold decrease of \$0.2 million, a decrease in unit cost which led to a cost of products sold decrease of \$0.6 million, and the effect of foreign currency translation of the RMB against the U.S. dollar, which led to a cost of products sold decrease of \$0.1 million.

Cost of products sold for Wuhu was \$3.6 million for the three months ended September 30, 2015, compared to \$5.4 million for the same period of 2014, representing a decrease of \$1.7 million, or 32.3%. The decrease in cost of products sold was mainly due to a decrease in sales volumes which led to a cost of products sold decrease of \$1.8 million, an increase in unit cost which led to a cost of products sold increase of \$0.2 million, and the effect of foreign currency translation of the RMB against the U.S. dollar which led to a cost of products sold decrease of \$0.1 million.

Cost of products sold for Hubei Henglong was \$10.8 million for the three months ended September 30, 2015, compared to \$12.0 million for the same period of 2014, representing a decrease of \$1.1 million, or 9.5%. The decrease in cost of products sold was mainly due to an increase in sales volumes which led to a cost of products sold increase of \$0.1 million, a decrease in unit cost which led to a cost of products sold decrease of \$1.1 million, and the effect of foreign currency translation of the RMB against the U.S. dollar which led to a cost of products sold decrease of \$0.1 million.

Cost of products sold for Other Sectors was \$6.8 million for the three months ended September 30, 2015, compared to \$8.1 million for the same period of 2014, representing a decrease of \$1.3 million, or 16.4%. The decrease in sales volumes led to a cost of products sold decrease of \$0.8 million, a decrease in unit cost led to a cost of products sold decrease of \$0.4 million, and the effect of foreign currency translation of the RMB against the U.S. dollar led to a cost of products sold decrease of \$0.1 million.

Gross margin was 17.5% for the three months ended September 30, 2015, compared to 20.2% in the same period of 2014, representing a decrease of 2.7%, mainly due to the product mix and the overall revenue decrease in 2015.

Gain on Other Sales

Gain on other sales mainly consisted of net amount retained from sales of materials, property, plant and equipment, land use rights, and scraps. For the three months ended September 30, 2015, gain on other sales amounted to \$0.9 million as compared to \$1.1 million for the three months ended September 30, 2014, representing a decrease of \$0.3 million, which was mainly due to the decrease in sales volumes of materials.

Selling Expenses

Selling expenses were \$3.3 million for the three months ended September 30, 2015, compared to \$3.7 million for the same period of 2014, representing a decrease of \$0.4 million, or 11.1%, mainly due to a decrease in transportation fees of \$0.4 million and a decrease in marketing expenses of \$0.1 million, offset by an increase in rental expense of \$0.1 million,.

General and Administrative Expenses

General and administrative expenses were \$3.1 million for the three months ended September 30, 2015, compared to \$3.7 million for the same period of 2014, representing a decrease of \$0.7 million, or 17.5%, mainly due to a decrease in salaries and wages cost of \$0.2 million, a decrease in professional service fees of \$0.2 million, a decrease in office facilities improvement expenses of \$0.1 million and a decrease in entertainment expenses of \$0.1 million.

Research and Development Expenses

Research and development expenses were \$5.4 million for the three months ended September 30, 2015, consistent with \$5.4 million for the three months ended September 30, 2014. The Company's research and development expenses were mainly used for the development and trial production of EPS and other new products. Research and development expenditures have continued to be significant in the past three years.

The global automotive parts industry is highly competitive; winning and maintaining new business requires suppliers to rapidly produce innovative products on a cost-competitive basis. In the past three years, the Company has continued to purchase advanced manufacturing equipment for newly developed products, hiring senior technicians and actively seeking external technical support.

Financial Income, Net

Financial income, net, was \$0.6 million for the three months ended September 30, 2015, compared to \$1.1 million for the three months ended September 30, 2014, representing a decrease of \$0.6 million, or 51.2%, which was mainly due to a decrease in interest income of \$0.5 million.

Net product sales were \$323.5 million for the nine months ended September 30, 2015, compared to \$331.5 million for the same period in 2014, representing a decrease of \$8.1 million, or 2.4%. During the nine months ended September 30, 2015, the Company made a \$2.4 million payment to a customer for new product testing services provided by the customer. As the Company cannot reasonably demonstrate that such payment amount represents the fair value of the services provided by its customer, the payment was recorded as a reduction of net sales in accordance with U.S. GAAP.

Net sales of traditional hydraulic power steering products were \$181.8 million for the nine months ended September 30, 2015, compared to \$218.8 million for the same period in 2014, representing a decrease of \$37.0 million, or 16.9%. Liquidity and Capital Resources

Capital Resources and Use of Cash

The Company has historically financed its liquidity requirements from a variety of sources, including short-term borrowings under bank credit agreements, bankers' acceptances, issuances of capital stock and notes and internally generated cash. As of September 30, 2015, the Company had cash and cash equivalents and short-term investments,

excluding pledged deposit, of \$95.3 million, compared to \$109.5 million as of December 31, 2014, representing a decrease of \$11.8 million, or 10.8%.

The Company had working capital of \$193.5 million as of September 30, 2015, compared to \$198.1 million as of December 31, 2014, representing a decrease of \$4.6 million, or 2.3%.

The Company intends to indefinitely reinvest the funds in subsidiaries established in the PRC.

The Company believes that, in view of its current cash position as of September 30, 2015, the cash expected to be generated from the operations and funds available from bank borrowings as detailed in subsequent paragraphs will be sufficient to meet its working capital and capital expenditure requirements, including the repayment of bank loans, for at least twelve months commencing from September 30, 2015.

Capital Source

The Company's capital source is multifaceted, such as bank loans and banker's acceptance facilities. In financing activities and operating activities, the Company's banks require the Company to sign line of credit agreements and repay all existing borrowings under such facilities within one year. On the condition that the Company can provide adequate mortgage security and has not violated the terms of the line of credit agreement, such one year facilities can be extended for another year.

The Company had short-term loans of \$45.0 million (See Note 14) and bankers' acceptances of \$74.4 million (See Note 15) as of September 30, 2015.

The Company currently expects to be able to obtain similar bank loans, i.e., RMB loans, and bankers' acceptance facilities in the future if it can provide adequate mortgage security following the termination of the above-mentioned agreements, see the table under "Bank Arrangements" below for more information. If the Company is not able to do so, it will have to refinance such debt as it becomes due or repay that debt to the extent it has cash available from operations or from the proceeds of additional issuances of capital stock. Owing to depreciation, the value of the mortgages securing the above-mentioned bank loans and banker's acceptances will be lowered by approximately \$13.6 million over the next 12 months. If the Company wishes to obtain the same amount of bank loans and banker's acceptances, it will have to provide additional mortgages of \$13.6 million as of the maturity date of such line of credit agreements, see the table under "Bank Arrangements" below for more information. The Company can still obtain a reduced line of credit with a reduction of \$10.2 million, which is 75.04%, the mortgage rate, of \$13.6 million, if it cannot provide additional mortgages. The Company expects that the reduction in bank loans will not have a material adverse effect on its liquidity.
