Table of Contents**II. BUSINESS****1. Business Summary****A. Industry Status****(1) Characteristics of the Industry**

As of December 31, 2008, the number of domestic mobile phone subscribers reached 45.6 million and with a 93.8% penetration rate, and the Korean mobile communication market can be considered to have reached its maturation stage. However, considering the number of European countries with penetration rates exceeding 90%, additional future growth of the domestic market may be possible.

The Korean mobile communications market continues to improve with the help of advances in network-related technology evidenced by the world's first commercialization of CDMA2000 1x, CDMA 1x EV-DO, and the development of highly advanced handsets that enables the provision of convergence services for multimedia contents, mobile commerce, telematics, satellite DMB, digital home services and other related contents.

(3) Market Characteristics

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. Although demand has primarily been in the domestic market, as the business territory expands to overseas market, the size of overseas sales is expected to grow in the near future. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

A. Material Legal Proceedings

(1) Action for Monetary Damages

- a) Parties to the litigation: G.Mate Inc. (plaintiff) vs. the Company (defendant)
- b) Overview: G.Mate alleged that the Company had engaged G.Mate to develop and deliver certain PDA units, but that the Company subsequently refused to take delivery of such units. G.Mate sought approximately Won 4 billion in damages.
- c) Progress: An initial mediation process, which was requested by G.Mate, was terminated in January 2007 and an action for monetary damages was brought before the Seoul Central District Court, to which seven creditors of G.Mate, including DNF Consulting Co., Ltd., requested intervenient participation as successors to part of the claim. On December 4, 2008, the trial court awarded the plaintiffs a total of Won 420 million in damages, to which all of plaintiff, defendant and successors appealed, and the case is currently pending before the Seoul High Court.
- d) Impact on business: In the event that the case is decided against the Company, there is a risk that the Company will be obligated to pay up to an aggregate of Won 4 billion in damages. However, the actual results of the litigation and actual impact on the Company's operations and finances may differ depending on future events.

(2) Action for Monetary Damages

- a) Parties to the litigation: Misook Peon, et al. (plaintiffs, eight in total) vs. the Company (defendant)
- b) Overview: The plaintiffs, who use the Company's mobile telephone services, alleged that the reason a large wireless internet surcharge was imposed on them was because the Company violated its duty to clearly explain contractual provisions. The plaintiffs are seeking damages.
- c) Progress: On October 4, 2007, the trial court awarded the plaintiffs a total of Won 3,707,479 in damages. The Company appealed, and on January 13, 2009, the appeals court denied the plaintiffs' claim. The plaintiffs have since appealed the decision on February 2, 2009.
- d) Impact on business: In the event that the case is decided against the Company, there is a risk that the National Council of the Green Consumers Network in Korea will bring an additional lawsuit based on this decision by recruiting other plaintiffs. However, the actual results of the litigation and actual impact on the Company's operations and finances may differ depending on future events.

(3) Action for Monetary Damages

- a) Parties to the litigation: KT Corporation (plaintiff) vs. the Company (defendant)
- b) Overview: KT Corporation alleged that the Company unreasonably delayed KT Corporation's request for connection to MSC/HLR, and sought damages for the extra connection fees incurred.
- c) Progress: The plaintiff brought an action against the Company in May 2008 and the lawsuit is currently pending.
- d) Impact on business: In the event that the case is decided against the Company, there is a risk that the Company will be obligated to pay up to Won 44.3 billion in damages (excluding interest). However,

Independent Auditors' Report

English Translation of a Report Originally Issued in Korean

To the Board of Directors and Stockholders of

SK Telecom Co., Ltd.

We have audited the accompanying consolidated balance sheets of SK Telecom Co., Ltd. and subsidiaries (the Company) as of December 31, 2006, 2007 and 2008, and the related consolidated statements of income, changes in stockholders' equity and cash flows for each of the three years in the period ended December 31, 2008 (all expressed in Korean won). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the auditing standards generally accepted in the Republic of Korea.

Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company at December 31, 2006, 2007 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2008, in conformity with accounting principles generally accepted in the Republic of Korea.

Our audits also comprehended the translation of the Korean won amounts into U.S. dollar amounts and, in our opinion, such translation has been made in conformity with the basis stated in Note 2(a) to the accompanying consolidated financial statements. Such U.S. dollar amounts are presented solely for the convenience of readers of the financial statements.

Accounting principles and auditing standards and their application in practice vary among countries. The accompanying consolidated financial statements are not intended to present the financial position, results of operations, changes in stockholders' equity and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to audit such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying consolidated financial statements are for use by those knowledgeable about Korean accounting procedures and auditing standards and their application in practice.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the Republic of Korea. Significant accounting policies followed in preparing the accompanying consolidated financial statements are summarized as follows:

a. Basis of Presentation

The Company maintains its official accounting records in Korean won and prepares statutory consolidated financial statements in Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea (Korean GAAP). Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with accounting principles generally accepted in other countries. Accordingly, these consolidated financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying consolidated financial statements have been condensed, restructured and translated into English with certain expanded descriptions from the Korean language financial statements. Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company s financial position, results of operations, changes in stockholders equity or cash flows, is not presented in the accompanying consolidated financial statements.

The accompanying consolidated financial statements are stated in Korean won, the currency of the country in which the Company is incorporated and operates. The translation of Korean won amounts into U.S. dollar amounts is included solely for the convenience of readers of financial statements and has been made at the rate of ₩1,262.00 to US\$1.00, the Noon Buying Rate in the City of New York for cable transfers in Korean won as certified for customs purposes by the Federal Reserve Bank of New York on the last business day of the period ended December 31, 2008. Such translations into U.S. dollars should not be construed as representations that the Korean won amounts could be converted into U.S. dollars at that or any other rate.

Table of Contents

Effective July 1, 2006, IHQ, Inc. and its subsidiary, CU Media, Inc. (formerly YTN Media, Inc) were included in the consolidation of the accompanying financial statements as the Company owned more than 30% of total outstanding common stock and became the largest stockholder.

During the year ended December 31, 2007, TU Media Corp., Commerce Planet Co., Ltd., Michigan Global Cinema Fund and Konan Technology became the controlled subsidiaries of the Company, as the Company owns majority ownership interest or more than 30% of total outstanding common stock and is the largest stockholder other than Konan Technology. Konan Technology is owned by SK Communications Co., Ltd. by 29.49% as of December 31, 2008. As SK Communications Co., Ltd. has call option to acquire all other stockholders' common stocks and the call option are exercisable at little or no economic cost, which is regarded de facto control of Konan Technology, Konan Technology was included in consolidation even though the Company's ownership interest is below 30%.

Effective January 1, 2007, Ntreev Soft Co., Ltd. and SK i-media Co., Ltd. were included in the consolidation of the accompanying consolidated financial statements as their total assets at the beginning of that fiscal year were more than ₩7 billion, in accordance with Korean GAAP.

Effective January 1, 2007, Centurion IT investment Association was excluded in the consolidation of the accompanying consolidated financial statements as it was dissolved on February 28, 2008. It was accounted for using the equity method of accounting from January 1, 2007.

Effective April 1, 2008, the Company acquired additional 91,406,249 common shares of SK Broadband Co., Ltd. (formerly hanarotelecom incorporated) which increased the Company's ownership from 4.6% to 43.4%. As a result, SK Broadband Co., Ltd. and its subsidiaries, Broadband Media Co., Ltd., Hanaro Dream Incorporated, Broadband D&M Co., Ltd. and Broadband CS Co., Ltd., were included in the consolidation of accompanying financial statements as the Company owned more than 30% of total outstanding common stock and became the largest stockholder.

For the year ended December 31, 2008, Etoos Co., Ltd, a newly established by SK Communications was included in the consolidation.

During the year ended December 31, 2008, Benex Digital Cultural Contents Fund, Benex Focus Limited Partnership II, K-net Culture and Contents Venture Fund and Open Innovation Fund became the controlled subsidiaries of the Company, as the Company owns majority ownership interest or more than 30% of total outstanding common stock and is the largest stockholder.

Effective January 1, 2008, SK Telecom Advanced Tech & Service Center, Cyworld China Holdings Limited and SK Telecom China Holdings Co., Ltd. were included in the consolidation of accompanying financial statements as its total assets at the beginning of that fiscal year were more than ₩7 billion, in accordance with Korean GAAP.

For the year ended December 31, 2008, SK Telecom USA Holdings, Inc. which was incorporated to manage the Company's investment to Helio LLC in 2005 was fully liquidated. Meanwhile, for the year ended December 31, 2008, the equity interest in Helio held by SK Telecom USA Holding, Inc. were exchanged into the equity interest in Virgin mobile USA Inc. As a result, Helio Inc & LLC was excluded from the consolidation.

Effective January 1, 2008, SK Cyberpass, Inc. was excluded from the consolidation as its total assets at the beginning of that fiscal year were less than ₩7 billion, in accordance with Korean GAAP.

Effective January 1, 2008, Aircross Co., Ltd. was excluded from the consolidation as it was liquidated in March 2009.

Table of Contents

c. Use of Estimates

The preparation of consolidated financial statements in conformity with Korean GAAP requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the consolidated balance sheets, and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from these estimates.

d. Cash Equivalents

Cash equivalents are highly liquid investments and short term financial instruments, which are readily convertible without significant transaction cost, do not have significant risk from changes in interest rates, and with original maturities of three months or less.

e. Allowance for Doubtful Accounts

Allowance for doubtful accounts is provided based on the estimated collectability of individual accounts and historical bad debt experience.

Details of changes in the allowance for doubtful accounts receivable trade for 2006, 2007 and 2008 are as follows (In millions of Korean won):

	2006	2007	2008
Beginning balance	₩ 133,499	₩ 106,737	₩ 93,551
Write-offs	(90,780)	(90,475)	(59,552)
Net	42,719	16,262	33,999
Provision for doubtful accounts receivable trade	61,457	48,835	62,973
Provision for doubtful accounts receivable trade for the discontinued operation		22,604	5,511
Increase (decrease) due to the changes in consolidated subsidiaries	2,561	5,850	47,837
End of year	₩ 106,737	₩ 93,551	₩ 150,320

f. Inventories

Inventories are stated at the acquisition cost using the following methods:

Assets	Methods
E-commerce inventories	Moving average method
Replacement units for wireless telecommunication facilities and supplies for sales promotion	Moving average method
Wireless device	FIFO
Books and CDs	FIFO

During the year, perpetual inventory systems are used to value inventories, which are adjusted to physical inventory counts performed at the end of the year. When the market value of inventories is less than the acquisition cost, carrying amount is reduced to the market value and any difference is charged to current operations as operating expenses. A valuation loss of ₩168 million and ₩584 million was recorded for the years ended December 31, 2006, 2007, respectively, and a reversal of allowance for inventory valuation loss of ₩168 million was recorded for the year ended December 31, 2008.

Table of Contents

g. Securities (excluding securities accounted for using the equity method of accounting)

Debt and equity securities are initially recorded at their acquisition costs (fair value of consideration paid) including incidental cost incurred in connection with acquisition of the related securities and classified into trading, available-for-sale and held-to-maturity (debt only) securities depending on the acquisition purpose and nature. The acquisition cost of the equity securities acquired by exercising a conversion right is the carrying amount of the convertible bonds exchanged. However, if those newly acquired equity securities are marketable securities in an active trading market, the acquisition cost of such equity securities is the market value of those equity securities at the acquisition date and the difference between the market value of the newly acquired equity securities and the carrying amount of the exchanged convertible bonds is charged to the current operation as gain or loss on conversion.

Trading securities are stated at fair value with gains or losses on valuation reflected in current operations.

Securities classified as available-for-sale are reported at fair value. Unrealized gains or losses on valuation of available-for-sale securities are included in accumulated other comprehensive income (loss) and the unrealized gains or losses are reflected in net income when the securities are sold or if there is an objective evidence of impairment such as bankruptcy of investees. Equity securities are stated at acquisition cost if fair value cannot be reliably measured.

Held-to-maturity securities are presented at acquisition cost after premiums or discounts are amortized or accreted, respectively. The Company recognizes write-downs resulting from declines in the fair value below its book value on the balance sheet date if there is objective evidence of impairment. The related write-downs are recorded as a loss on impairment of investment securities.

Trading securities are presented in the current asset section of the balance sheet, and available-for-sales and held-to-maturity securities are presented in the current asset section of the balance sheet if their maturities are within one year; otherwise such securities are recorded in the non-current section of the balance sheet.

h. Equity Securities Accounted for Using the Equity Method of Accounting

Investment securities of affiliated companies, in which the Company has the ability to exercise significant influence, are carried using the equity method of accounting, whereby the Company's initial investment is recorded at cost and the carrying value is subsequently increased or decreased to reflect the Company's portion of stockholders' equity of the investee. Differences between the acquisition cost and net asset fair value of the investee are amortized over 5 to 20 years using the straight-line method. When applying the equity method of accounting, unrealized inter-company gains and losses are eliminated. In addition, the Company provides for additional losses for those investments accounted for using the equity method that are reduced to zero to the extent that the Company has other investment assets related to the equity method investees.

Assets and liabilities of foreign-based companies accounted for using the equity method are translated at current rate of exchange at the balance sheet date while profit and loss items in the statement of earnings are translated at average rate and capital account at historical rate. The translation gains and losses arising from collective translation of the foreign currency financial statements of foreign-based companies are offset and the balance is remained as accumulated other comprehensive income (loss) in the Company's stockholders equity.

Table of Contents

Under the equity method of accounting, the Company does not record its share of losses of an affiliate when such losses would make the Company's investment in such entity less than zero unless the Company has guaranteed obligations of the investee or is otherwise committed to provide additional financial support. The Company provides for additional losses for these investments accounted for using the equity method that are reduced to zero to the extent that the Company has other investment assets related to the equity method investees. In addition, when the Company's share of equity interest in the equity method investees increases as a result of capital transactions of the investees with (or without) consideration, the increase in the Company's proportionate shares in the investees are treated as goodwill or negative goodwill and when the Company's share of equity interest in the equity method investees decrease as a result of capital transactions of the investees with (or without) consideration, the decrease in the Company's proportionate shares in the investees are accounted for as gain or loss on disposal.

i. Troubled Debt Restructuring

In case that contractual terms such as the face amount, interest rate, or maturity are changed to alleviate the debtor's burdens in accordance with an agreement between the creditor and the debtor, initiation of corporate reorganization procedures under court trustee or under debtor's management, the Company recognizes the restructured receivables at present value of the expected future cash flows discounted by the reasonable interest rate and amortizes the difference between principal amount and present value to interest income using the effective interest rate method.

j. Valuation of Long-term Accounts Receivable - Other

Long-term accounts receivable are stated at the present value of the expected future cash flows. Imputed interest amounts are recorded in present value discount accounts which are deducted directly from the related nominal receivable balances. Such imputed interest is included in operations using the effective interest rate method over the collection period.

k. Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Major renewals and betterments, which prolong the useful life or enhance the value of assets, are capitalized; expenditures for maintenance and repairs are charged to expense as incurred.

Depreciation is computed using the declining balance method (except for buildings and structures acquired on or after January 1, 1995 which are depreciated using straight-line method) over the estimated useful lives of the related assets as follows:

Assets	Depreciation method	Useful lives (years)
Buildings and structures	Declining balance method (straight-line method)	15~50
Machinery	Declining balance method	3~9
Other	Declining balance method	3~5

Interest expenses and other financing charges for borrowings related to the manufacture or construction of property and equipment are charged to current operations as incurred.

Table of Contents

1. Intangible Assets

Intangible assets are stated at cost less amortization computed using the straight-line method over 2 to 20 years.

The Company capitalizes the cost of internal-use software which has a useful life in excess of one year. Capitalized internal-use software costs are amortized using the straight-line method over 5 years and are recorded in intangible assets.

m. Government Subsidy

Government subsidy, which is used for the acquisition of certain assets, is accounted for as a deduction from the acquisition cost of the acquired assets. Such subsidy amount is offset against the depreciation or amortization of the acquired assets during such assets' useful life. Government subsidy, which is required to be repaid, is recorded as a liability in the balance sheet. Government subsidy with no repayment obligation, which is used to purchase a designated asset or to develop a certain technology, is presented as a deduction of the related asset and is amortized against the depreciation or amortization expense of the related asset. Government subsidy, contributed to compensate for specific expenses, is offset against the related expenses as incurred.

n. Impairment Losses

When the recoverable amount of assets (that are not recorded at fair value) including investment assets (except for trading and available-for-sale investments in listed companies), property and equipment, and intangible assets are significantly less than the carrying value due to obsolescence, physical damage, decline in market value or other causes, the carrying value is reduced to the recoverable amount and any difference is charged to current operation as an impairment loss.

o. Convertible Bonds and Bonds with Stock Purchase Warrants

The proceeds from issuance of convertible bonds are allocated between the conversion rights or warrant rights and the debt issued; the portion allocable to the conversion rights is accounted for as capital surplus with a corresponding conversion right adjustment which is deducted from the related bonds. Such conversion right adjustment is amortized to interest expense using the effective interest rate method over the redemption period of the convertible bonds. The portion allocable to the conversion rights is measured by deducting the present value of the debt at time of issuance from the gross proceeds from issuance of convertible bonds, with the present value of the debt being computed by discounting the expected future cash flows (including call premium, if any) using the effective interest rate applied to ordinary or straight debt of the Company at the issuance date.

p. Discounts on Bonds

Discounts on bonds are amortized to interest expense using the effective interest rate method over the redemption period of the bonds.

q. Valuation of Long-term Payables

Long-term payables resulting from long-term installment transactions are stated at present value of the expected future cash flows. Imputed interest amounts are recorded in present value discount accounts which

are deducted directly from the related nominal payable balances. Such imputed interest is included in operations using the effective interest rate method over the redemption period.

Table of Contents

r. Provisions, Contingent Liabilities and Contingent Assets

The Company recognizes a provision when i) it has a present obligation as a result of a past event, ii) it is probable that a disbursement of economic resources will be required to settle the obligation, and iii) a reliable estimate can be made of the amount of the obligation (see Note 26). When a possible range of loss in connection with a probable loss contingency as of the balance sheet date is estimable with reasonable certainty, and some amount within that range appears at the time to be a better estimate than any other amount within the range, the Company accrues such amount. When no amount within the range appears to be a better estimate than any other amount, the minimum amount in that range is recorded.

The Company does not recognize the following contingent obligations as liabilities:

Possible obligations related to past events, for which the existence of a liability can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

Present obligations arising from past events or transactions, for which i) a disbursement of economic resources to fulfill such obligations is not probable or ii) a disbursement of economic resources is probable, but the related amount cannot be reasonably estimated.

In addition, the Company does not recognize potential assets related to past events or transactions, for which the existence of an asset or future benefit can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

s. Accrued Severance Indemnities

In accordance with the policies of the Company, all employees with more than one year of service are entitled to receive severance indemnities, based on length of service and rate of pay, upon termination of their employment. Accruals for severance indemnities are recorded to approximate the amount required to be paid if all employees were to terminate at the balance sheet date.

SK Telecom and certain domestic subsidiaries have deposits with insurance companies to fund the portion of the employees' severance indemnities which is in excess of the tax deductible amount allowed under the Corporate Income Tax Law, in order to take advantage of the additional tax deductibility for such funding. Such deposits with outside insurance companies, where the beneficiaries are their employees, totaling ₩28,868 million, ₩45,878 million and ₩68,559 million as of December 31, 2006, 2007 and 2008, respectively, are deducted from accrued severance indemnities.

In accordance with the Korean National Pension Fund Law, SK Telecom and its domestic subsidiaries transferred a portion of its accrued severance indemnities to the National Pension Fund through March 1999. Such transfers, amounting to ₩91 million, ₩86 million and ₩28 million as of December 31, 2006, 2007 and 2008, respectively, are deducted from accrued severance indemnities.

Effective March 31, 2006, SK Telecom changed its policy for the severance indemnities applicable to those employees who joined SK Telecom before or on December 31, 2002 from cumulative method, where employees are entitled to get paid more than one month of salary for each year depending on the length of service, to simple multiplier method, where employees are paid one month of salary for each year regardless of their service period in accordance with the resolution of SK Telecom's joint labor-management conference held on March 16, 2006. As a result of such policy change, SK Telecom distributed early settlements to those eligible employees on their accumulated severance indemnities as of March 31, 2006 on a mandatory basis, and paid the additional bonuses of ₩125,890 million for those employees who received the mandatory distribution for their early settlement as compensation for those employees.

Table of Contents

The Company recorded such compensation costs as special severance indemnities in other expenses for the year ended December 31, 2006. In addition, SK Telecom executed the early retirement program and the related special bonus of ₩18,131 million were paid to eligible employees and accounted for as special severance indemnities in other expenses for the year ended December 31, 2006.

Changes in accrued severance indemnities for 2006, 2007 and 2008 are as follows (In millions of Korean won):

t. Accounting for Leases

A lease is classified as a finance lease or an operating lease depending on the extent of transfer to the Company of the risks and rewards incidental to ownership. If a lease meets any one of the following criteria, it is accounted for as a finance lease:

The lease transfers ownership of the asset to the lessee by the end of the lease term;

The lessee has the option to purchase the asset at a bargain price and it is certain that the option will be exercised;

The lease term is for the major part (75% or more) of the economic life of the asset even if title is not transferred;

At the date of lease commencement, the present value of the minimum lease payments amounts to at least substantially all (90% or more) of the fair value of the leased asset; or

The leased assets are of such a specialized nature that only the lessee can use them without major modifications.

All other leases are treated as operating leases.

Assets and liabilities related to finance leases are recorded as property and equipment and obligations under finance leases, respectively, and the related interest is calculated using the effective interest rate method and charged to expense. For operating leases, the future minimum lease payments are expensed ratably over the lease term while contingent rentals are expensed as incurred.

u. Research and Development Costs

The Company charges substantially all research and development costs to expense as incurred. The Company incurred internal research and development costs of ₩211,961 million, ₩218,652 million and ₩226,714 million for the years ended December 31, 2006, 2007 and 2008, respectively, and external research and development costs of ₩67,021 million, ₩74,388 million and ₩72,993 million for the years ended December 31, 2006, 2007 and 2008, respectively.

Table of Contents

v. Foreign-based Operations Translation Adjustment

In translating the foreign currency financial statements of the Company's overseas subsidiaries into Korean won, the Company presents the translation gain or loss as a foreign-based operations translation adjustment in the accumulated other comprehensive income (loss) section of the balance sheet. The translation gain or loss arises from the application of different exchange rates; the year-end rate for balance sheet items except stockholders' equity, the historical rate for stockholders' equity and the daily average rate for statement of income items.

w. Accounting for Foreign Currency Transactions and Translation

SK Telecom and its domestic subsidiaries maintain their accounts in Korean won. Transactions in foreign currencies are recorded in Korean won based on the prevailing rate of exchange at the dates of transactions. As allowed under Korean GAAP, monetary assets and liabilities denominated in foreign currencies are translated in the accompanying consolidated financial statements at the Base Rates announced by Seoul Money Brokerage Services, Ltd. on the balance sheet dates, which, for U.S. dollars, were ₩929.60=US\$1, ₩938.20=US\$1 and ₩1,257.50=US\$1 at December 31, 2006, 2007 and 2008, respectively. The resulting gains and losses arising from the translation or settlement of such assets and liabilities are included in current operations.

x. Derivative Instruments

The Company records rights and obligations arising from derivative instruments as assets and liabilities, which are stated at fair value. The gains and losses that result from the change in the fair value of derivative instruments are reported in current earnings. However, for derivative instruments designated as hedging the exposure of variable cash flows, the effective portions of the gains or losses on the hedging instruments are recorded as accumulated other comprehensive income (loss) and credited/charged to operations at the time the hedged transactions affect earnings, and the ineffective portions of the gains or losses are credited/charged immediately to operations.

y. Revenue Recognition

The Company recognizes revenue when they are realized or realizable and earned. Revenues are realized or realizable and earned when the Company has persuasive evidence of an arrangement, the goods have been delivered or the services have been rendered to the customer, sales price is fixed or determinable and collectability is reasonably assured.

The revenue of the Company is principally derived from telecommunication service including data services and wireless device sales. Telecommunication service consists of fixed monthly charges, usage-related charges and non-refundable activation fees. Fixed monthly charges are recognized in the period earned. Usage-related charges are recognized at the time services are rendered. Non-refundable activation fees are recognized when the activation service was performed.

Meanwhile, the Company recognizes sales revenues on a gross basis when the Company is the primary obligator in the transactions with customers and if the Company merely acts an agent for the buyer or seller from whom it earns a commission, then sales revenues are recognized on a net basis.

SK Telecom's subsidiaries also sell products and merchandises to customers and these sales are recognized at the time products and merchandises are delivered.

z. Income Taxes

Income tax expense is determined by adding or deducting the total income tax and surtaxes to be paid for the current period and the changes in deferred income tax assets and liabilities.

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are generally recognized for all taxable temporary differences with some exceptions and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilized. The carrying amount of deferred tax assets is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. Deferred income tax assets and liabilities are classified into current and non-current based on the classification of related assets or liabilities for financial reporting purposes.

aa. Net Income Per Share

Net income per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per share of common stock is calculated by dividing adjusted net income by adjusted weighted average number of shares outstanding during the period, taking into account the dilutive effect of stock option and convertible bonds.

ab. Handset Subsidies to Long-term Mobile Subscribers

Effective April 1, 2008, the Telecommunication Business Act was revised to allow wireless carriers to provide handset subsidies to customers without any restrictions. As a result, the Company provides lump-sum handset subsidies to customers who agree to use the Company's service for the predetermined service period and the subsidies are charged to commission paid as the related payments are made. In case where the customers agree to use the Company's service for the predetermined service period and purchase handsets on installment basis, the subsidies are paid every month over the installment period and the Company provides provision for handset subsidies estimated to be paid based on the historical experience (See note 26).

ac. Use of Estimates

The Company's management makes reasonable estimates and assumptions in preparing the financial statements in conformity with accounting principles generally accepted in the Republic of Korea. These estimates and assumptions can change according to additional experiences, changes in circumstances, new information and other and could differ from actual results.

ad. Reclassification

Certain reclassifications have been made in prior periods financial statements to conform to classifications used in the current period. Such reclassifications did not have an effect on the previously reported net assets as of December 31, 2007 and 2006 or net income for the years then ended.

ae. Adoption of New Statements of Korea Accounting Standards (SKAS)

On January 1, 2006, the Company adopted SKAS No. 18 through No. 20. The adoption of such accounting standards did not have an effect on the consolidated financial position of the Company as of December 31, 2006 or the consolidated net income of the Company for the year ended December 31, 2006.

Table of Contents

On January 1, 2007, the Company adopted SKAS No. 11, and No. 21 through No. 23, and No. 25. The adoption of such accounting standards did not have an effect on the consolidated financial position of the Company as of December 31, 2007 or consolidated net income of the Company for the year ended December 31, 2007. Details of primary change due to such adoption of SKASs are as follows:

Pursuant to adoption of SKAS No. 21, Preparation and Presentation of Financial Statements, certain amounts classified as capital adjustments through 2006 are classified as accumulated other comprehensive income (loss); such amounts include unrealized gain/loss on available-for-sale securities, equity in capital adjustments of affiliates and gain/loss on valuation of derivative instruments. In addition, certain amounts classified as investment assets through 2006 are classified as other non-current assets; such amounts include long-term loans, guarantee deposits, long-term deposits and others. The accompanying consolidated balance sheets as of December 31, 2005 and 2006, which are comparatively presented, were reclassified in accordance with SKAS No. 21.

Pursuant to adoption of SKAS No. 25, Consolidated Financial Statements, net income is allocated to majority interest and minority interest. In addition, when a subsidiary is purchased during the year, statement of income of the subsidiary is included in the consolidation as though it had been acquired at the beginning of the year, and pre-acquisition earnings are presented as deduction at the bottom of the consolidated statements of income. The accompanying consolidated statements of income for the years ended December 31, 2005 and 2006, which are comparatively presented, were reclassified in accordance with SKAS No. 25. In addition, in connection with the Company's adoption of SKAS No. 25, the Company also began to present pre-acquisition cash flows of subsidiaries as a separate deduction (addition) at the bottom of the Company's consolidated statements of cash flows.

There is no significant change due to the adoption of SKAS No.11, No.22 and No.23. The amended SKAS No. 25, Consolidated Financial Statements, which is effective December 29, 2008, clarifies that when the parent's ownership interest in a subsidiary is increased after control is obtained, the difference between the consideration for additional acquisition of interest and portion of net asset of subsidiary, which had been previously recognized as capital surplus, should be recognized as other capital adjustment if the difference is negative amount and there is no related capital surplus earned at previous transaction. As the amended SKAS No. 25, Consolidated Financial Statements is applied retroactively during the year ended December 31, 2008, the 2006 and 2007 financial statements presented comparatively are restated, which results in the increase in capital surplus by ₩16,072 million and ₩31,146 million as of December 31, 2006 and 2007, respectively, and the decrease in other capital adjustment by ₩16,072 million and ₩31,146 million as of December 31, 2006 and 2007, respectively.

af. Discontinued Operation

When a subsidiary is disposed during the year, the results of its operations in the consolidated income statement are treated as discontinued operation and should be presented as a single item between income tax expenses for continuing operation and net income.

On August 22, 2008, the Company disposed its investment in Helio LLC which was incorporated to provide cellular telephone communication service in the US to Virgin Mobile USA in accordance with the agreement entered into on June 27, 2008. As a result, the operation of Helio LLC was presented as discontinued operation.

(note a) With its application for a license to provide IMT services, the Company has a commitment to pay ₩1,300,000 million to the Ministry of Information Communication (MIC). SK IMT Co., Ltd., which was merged into SK Telecom on May 1, 2003, paid ₩650,000 million in March 2001 and SK Telecom is required to pay the remainder over 10 years with an annual interest rate equal to the 3-year-maturity government bond rate minus 0.75% (4.54% as of December 31, 2008). The future payment obligations are ₩130,000 million in 2009, ₩150,000 million in 2010 and ₩170,000 million in 2011. On December 4, 2001, SK IMT Co., Ltd. received the IMT license from MIC, and recorded the total license cost

(measured at present value) as an intangible asset.

Amortization of the IMT license commenced when the Company started its commercial IMT service in December 2003, using the straight-line method over the estimated useful life (13 years) of the IMT license which expires in December 2016. The Company determined the IMT license has a finite life, considering that renewal cost is expected to be substantial. As of December 31, 2008, the present value discount related to the current portion and long-term portion of payments to be made to MIC amounts to ₩805 million and ₩15,416 million, respectively.

(note b) The Company purchased the WiBro license from MIC on March 30, 2005. The license period is seven years from the

purchase date.

Convertible Bonds Issued by SK Telecom

On May 27, 2004, the Company issued zero coupon convertible bonds with a maturity of five years in the principal amount of US\$329,450,000 for US\$324,923,469, with an initial conversion price of ₩235,625 per share of the Company's common stock, which was greater than market value at the date of issuance. Subsequently, the initial conversion price was changed to ₩203,516 per share in accordance with anti-dilution protection. The Company may redeem the principal amount after 3 years from the issuance date if the market price exceeds 130% of the conversion price during a predetermined period. On the other hand, the bond holders may redeem their notes at 103.81% of the principal amount on May 27, 2007 (3 years from the issuance date). The conversion right may be exercised during the period from July 7, 2004 to May 13, 2009 and the number of common shares to be converted as of December 31, 2008 is 1,324,744 shares. Effective July 1, 2008, the conversion price was changed from ₩204,636 to ₩203,516 and the number of shares to be converted was changed from 1,317,494 shares to 1,324,744 shares due to the payment of interim dividends in accordance with the resolution of the Company's board of directors of July 18, 2008.

Conversion of notes to common shares may be prohibited under the Telecommunications Law or other legal restrictions which restrains foreign governments, individuals and entities from owning more than 49% of the Company's voting stock, if this 49% ownership limitation is violated due to the exercise of conversion rights. In this case, the Company will pay a bond holder as cash settlement determined at the average price of one day after a holder exercises its conversion right or the weighted average price for the following five business days. The Company intends to sell treasury shares held in trust by the Company that corresponds to the number of shares of common stock that would have been delivered in the absence of the 49% foreign shareholding restrictions. The Company entered into an agreement with Credit Suisse First Boston International to reduce the effect of fluctuation with respect to cash settlement payments that may be more or less than the proceeds from sales of treasury shares held in trust. Unless either previously redeemed or converted, the notes are redeemable at 106.43% of the principal amount at maturity.

Table of Contents

During the year ended December 31, 2006, the convertible bonds with a principal amount of US\$25,210,000 were converted into 136,613 shares of treasury stock (see Note 16), and the principal amount of the convertible bonds decreased from US\$329,450,000 to US\$304,240,000. In addition, the consideration for conversion right (capital surplus) decreased by ₩3,733 million (net of tax effect of ₩1,416 million).

During the year ended December 31, 2007, the conversion rights for the convertible bond with a principal amount of US\$75,080,000 were exercised. The Company paid ₩42,962 million in cash to bond holders with a principal amount of US\$36,260,000 without delivering the Company's common stocks due to the 49% ownership limitation as explained above and the convertible bonds with principal amount of US\$38,820,000 were converted into 216,347 shares of treasury stock (see Note 16). Therefore, the principal amount of the convertible bonds decreased from US\$304,240,000 to US\$229,160,000. In addition, the consideration for conversion right (capital surplus) decreased by ₩11,116 million (net of tax effect of ₩4,216 million). In 2008, no conversion right was exercised.

Convertible Bonds and Bonds with Stock Purchase Warrants Issued by Subsidiaries

In 2005, IHQ, Inc. (IHQ) and YTN Media, Inc. (YTN) which were consolidated effective July 1, 2006, issued convertible bonds with the principal amount of US\$18,000,000 and ₩1,000 million, respectively. As of December 31, 2006, IHQ's convertible bonds are convertible into IHQ's common stock at ₩7,359 (convertible rate of exchange: 1,034.70 = US\$1) per share during the period from May 15, 2006 to November 15, 2008. Unless converted, these bonds are redeemable for cash at 104.57% of the principal amount at maturity. During the year ended December 31, 2007, all convertible bonds were converted into common stocks, therefore no convertible bonds are remained as of December 31, 2008.

As SK Communications Co., Ltd. merged with Etoos Group on May 1, 2006, bonds with stock purchase warrants with the principal amount of ₩125,000,000 were transferred to the Company. During the year ended December 31, 2007, these bonds were all redeemed at maturity, accordingly no bonds with stock purchase warrants are remained as of December 31, 2008.

11. SUBSCRIPTION DEPOSITS

The Company receives facility guarantee deposits from subscribers of cellular services at the subscription date. The Company has no obligation to pay interest on these deposits and returns all amounts to subscribers upon termination of the subscription contract.

Long-term subscription guarantee deposits by service type held as of December 31, 2006, 2007 and 2008 are as follows (In millions of Korean won, except deposit per subscriber amounts):

Service type	Deposit per subscriber	2006			2007			2008		
Cellular	₩ 200,000	₩ 21,140	₩ 6,425	₩ 4,796						

The Company offers existing and new cellular subscribers the option of obtaining credit insurance from Seoul Guarantee Insurance Company (SGIC) in lieu of the facility deposit. Existing subscribers who elect this option are refunded their subscription deposits. As a result of this arrangement, the balance of facility guarantee deposits has been decreasing.

Subscription deposits payable in current liabilities section represents payable to subscribers who cancelled services.

Reserve for technology development			800,000
	₩ 6,679,235	₩ 7,335,037	₩ 8,295,037

a. Legal Reserve

The Korean Commercial Code requires the Company to appropriate as a legal reserve at least 10% of cash dividends for each accounting period until the reserve equals 50% of outstanding capital stock. The legal reserve may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

b. Reserve for Improvement of Financial Structure

Through 2006, the Financial Control Regulation for Listed Companies in Korea required that at least 10% of net income (net of accumulated deficit), and an amount equal to net gain (net of related income tax, if any) on the disposal of property and equipment should be appropriated as a reserve for improvement of financial structure until the ratio of stockholders' equity to total assets reached 30%. However, this regulation was nullified during the year ended December 31, 2007 and no such requirement exists as of December 31, 2007 and 2008.

Table of Contents

c. Reserves for Loss on Disposal of Treasury Stock and Research and Manpower Development

Reserves for loss on disposal of treasury stock and research and manpower development were appropriated in order to recognize certain tax deductible benefits through the early recognition of future expenditures for tax purposes. These reserves will be reversed from appropriated retained earnings in accordance with the relevant tax laws. Such reversal will be included in taxable income in the year of reversal.

d. Reserve for Business Expansion and Technology Development

The reserve for business expansion and technology development are voluntary and were approved by the board of directors and stockholders.

16. TREASURY STOCK

Upon issuance of stock dividends and new common stock, and the merger with Shinsegi Telecomm, Inc. and SK IMT Co., Ltd., the Company acquired fractional shares totaling 77,970 shares for ₩6,110 million through 2005.
