=====
Item 2.02 Results of Operations and Financial Condition.

In a Press Release dated August 9, 2006, the Registrant announced its final
second quarter 2006 results. The Registrant's Press Release is furnished

Edgar Filing: ROGERS CORP - Form 8-K

herewith as Exhibit 99.1.

The press release contains non-GAAP financial measures. For purposes of Regulation G, a non-GAAP financial measure is a numerical measure of a registrant's historical or future financial performance, financial position or cash flows that excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statement of income, balance sheet or statement of cash flows (or equivalent statements) of the issuer; or includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented. In this regard, GAAP refers to generally accepted accounting principles in the United States. Pursuant to the requirements of Regulation G, the Registrant has provided reconciliations within the earnings release of the non-GAAP financial measures to the most directly comparable GAAP financial measures.

References to non-GAAP earnings per share are included in the earnings release because management believes that diluted earnings per share, excluding the effect of the impairment charge, is a measure that should be presented as it is useful to investors. Management believes that the following should be considered when evaluating these non-GAAP financial measures:

- o Rogers reviews the operating results of its businesses excluding the impact of any asset impairment because it provides an additional basis of comparison. The Company believes that these events are unusual in nature, and would not necessarily be indicative of ongoing operating results. As a result, management believes that excluding such charges is useful in comparing past, current and future periods.
- o Asset impairments principally represent adjustments to the carrying value of certain assets and do not typically require a cash payment.
- o While asset impairments are typically material, they are generally considered to be outside the normal operations of a business.
- o Corporate management is responsible for the initial and ongoing investments and for making decisions about asset impairment and related charges on those investments.

The non-GAAP financial measures included in the earnings release have been reconciled to the comparable GAAP results. This reconciliation can also be found on the Registrant's web site at www.rogerscorporation.com.
