Deswell Announces Third Quarter 2015 Results

- Company Announces Third Quarter Cash Dividend of \$0.035 Per Share -

FOR IMMEDIATE RELEASE

MACAO (Feb 13, 2015) - Deswell Industries, Inc. (Nasdaq: DSWL) today announced its financial results for the fiscal third quarter ended December 31, 2014.

Net sales for the third quarter ended December 31, 2014 were \$10.8 million, an increase of 1.0% compared to net sales of \$10.7 million for the same quarter ended December 31, 2013. Net sales increased by 8.7% to \$5.6 million in the Company's plastic segment and decreased by 6.2% to \$5.2 million in the electronic and metallic segment. The operating loss in the third quarter was \$1.7 million, compared to an operating loss of \$1.3 million for the same quarter of fiscal 2014.

Total gross margin decreased to 8.7% in the third quarter ended December 31, 2014 compared to 10.5% in the same quarter last year. Gross profit margin in the plastic segment increased to 16.1% of net sales for the third quarter of fiscal 2015 compared to 15.5% of net sales for the same quarter of last fiscal year. The increase in gross profit and margin in the plastic segment was mainly due to the decrease in labor cost and depreciation expense, offsetting the increase in raw materials cost and factory overhead. Gross profit margin in the electronic and metallic segment decreased to 0.6% of net sales for the third quarter ended December 31, 2014 compared to 5.9% of net sales for the year-ago quarter. The decrease in gross profit and margin in the electronic and metallic segment was mainly attributed to increases in labor costs due to a higher average labor rate, resulting from higher allowances paid, offsetting the decrease in headcount.

The Company reported a net loss of \$1.1 million for the third quarter ended December 31, 2014 compared to net loss of \$1.4 million for the quarter ended December 31, 2013. Deswell reported a basic and diluted loss per share of (\$0.07) for the third quarter of fiscal 2015 (based on 16,056,000 and 16,056,000 weighted average shares outstanding, respectively), compared to a basic and diluted loss per share of (\$0.09) (based on 16,262,000 and 16,266,000 weighted average shares outstanding, respectively), for the quarter ended December 31, 2013.

Net sales for the nine months ended December 31, 2014 were \$30.0 million, a decrease of 11.2%, compared to sales of \$33.7 million for the corresponding period in fiscal 2014. Operating loss for the nine months ended December 31, 2014 was \$4.4 million, compared to operating loss of \$4.3 million for the first nine months of fiscal 2014. The Company reported a net loss of \$2.8 million in the first nine months of fiscal 2015, compared to net loss of \$4.4 million for the nine months ended December 31, 2013. Deswell reported basic and diluted net loss per share of (\$0.18) for the first nine months of fiscal 2015, (based on 16,056,000 and 16,056,000 weighted average share outstanding, respectively), compared to basic and diluted loss per share of (\$0.27) (based on 16,229,000 and 16,256,000 weighted average shares outstanding, respectively), for the prior corresponding period.

The Company's financial position remained strong at the end of the third quarter of fiscal year 2015, with \$14.5 million in cash and cash equivalents and working capital of \$48.3 million at December 31, 2014. Furthermore, the Company has no long-term or short-term borrowings as of December 31, 2014.

Mr. Edward So, Chief Executive Officer, commented, “We are pleased to have delivered a slight increase in revenues during the quarter after many years of decreasing sales. This is a result of our strengthened sales and engineering teams who are focused on collaborating with our customers on new product designs and development. While this entails a long sales cycle, we are encouraged by the progress being made. We continued to keep our SG&A low and focus resources on areas that can best drive future sales growth and margins.”

Third Quarter Dividends

The Company also announced that on February 13, 2015 its board of directors declared a cash dividend of \$0.035 per share for the fiscal third quarter ended December 31, 2014. The dividend will be payable on March 19, 2015 to shareholders of record as of February 25, 2015.

Forward-Looking Statements

Statements in this press release that are "forward-looking statements" are based on current expectations and assumptions that are subject to risks and uncertainties. For example, our statements regarding our expected growth in sales from the electronic and metallic division in the coming year and our efforts to reduce overhead costs in our plastic division are forward-looking statements. Actual results could differ materially because of the following factors, among others, which may cause revenues and income to fall short of anticipated levels or our overhead expenses to increase: our dependence on a few major customers; vigorous competition forcing product price reductions or discounts; the timing and amount of significant orders from our relatively few significant customers; continuing increases in resin prices that cannot be passed on to customers; unexpected production delays; obsolete inventory or product returns; losses resulting from fraudulent activity of our customers or employees; labor shortages that increase labor and costs; changes in the mix of product products we manufacture and sell; adverse currency fluctuations in the renminbi and Hong Kong dollar when translated to US dollars; potential new accounting pronouncements; and the effects of travel restrictions and quarantines associated with major health problems, such as the Severe Acute Respiratory Syndrome, on general economic activity.

For further information regarding risks and uncertainties associated with the Company’s business, please refer to the “Risk Factors” section of Company’s Annual Report on Form 20-F, copies of which may be obtained from the Website maintained by the Securities and Exchange Commission at <http://www.sec.gov>.

All information in this release is made as of the date of this press release. Deswell undertakes no duty to update any forward-looking statement to conform the statement to actual results or changes in Deswell’s expectations.

MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS

Results of Operations

General

The Company's revenues are derived from the manufacture and sale of (i) injection-molded plastic parts and components, (ii) electronic products and subassemblies and (iii) metallic parts and components and distribution sales of audio equipment. The Company carries out all of its manufacturing operations in southern China, where it is able to take advantage of the lower overhead costs and less expensive labor rates as compared with Hong Kong.

Quarter Ended December 31, 2014 Compared to Quarter Ended December 31, 2013

Net Sales - The Company's net sales for the quarter ended December 31, 2014 were \$10,834,000, an increase of \$110,000, or 1.0%, as compared to the corresponding period in fiscal 2014. The increase in sales was mainly related to the increase in sales of \$452,000 in our plastic segment and a decrease of \$342,000 in our electronic and metallic segment. These represent an increase of 8.7% in the plastic segment and a decrease of 6.2% in the electronic segment, respectively, as compared with the net sales from these segments in the corresponding period of the prior fiscal year.

The increase in net sales in our plastic segment was mainly due to an increase in orders from existing customers of \$2,035,000 mainly for printing, telephone and motor vehicle products, offsetting a decrease in orders from other existing customers of \$1,579,000, mainly for medical, audio products and tooling equipment. The decrease of net sales in the electronic and metallic segment was largely due to a decrease in orders of \$1,303,000 from existing customers for professional audio equipment and home entertainment products, offsetting an increase of \$971,000 in sales for professional audio equipment with other existing customers.

Gross Profit - The gross profit for the quarter ended December 31, 2014 was \$942,000, representing a gross profit margin of 8.7%. This compares with the overall gross profit and gross profit margin of \$1,127,000 or 10.5% for the quarter ended December 31, 2013.

Gross profit in the plastic segment increased by \$106,000 to \$909,000 or 16.1% of net sales, for the quarter ended December 31, 2014, as compared to \$803,000 or 15.5% of net sales, for the quarter ended December 31, 2013. The increase in gross profit and margin in the plastic segment was mainly attributed to the decreases in labor cost and depreciation charges, offsetting an increase in raw materials cost, as compared to the same quarter in the prior year.

Gross profit in the electronic and metallic segment decreased by \$291,000 to \$33,000, or 0.6% of net sales, for the quarter ended December 31, 2014, as compared to \$324,000 or 5.9% of net sales, for the same period of the last fiscal year. The decrease in gross profit and margin was mainly attributed to an increase in labor costs resulting from more allowances paid, offsetting the decrease in headcount, as compared to the same quarter of last fiscal year.

Selling, General and Administrative Expenses – SG&A expenses for the quarter ended December 31, 2014 were \$2,565,000, as compared to \$2,609,000 for the corresponding period of last year. As a percentage of sales, the SG&A expenses were 23.7% for the quarter ended December 31, 2014, as compared to 24.3% for the same quarter of last fiscal year.

The SG&A expenses in the plastic segment decreased slightly by \$11,000 to \$1,571,000, or 27.8% of net sales, for the quarter ended December 31, 2014, as compared to \$1,582,000, or 30.5% of net sales for the corresponding period in fiscal 2014. The slight decrease in SG&A expenses was due to the cost control in staff cost, utility and travelling expenses, as compared with the year-ago quarter.

SG&A expenses in the electronic and metallic segment decreased by \$33,000 to \$994,000, or 19.2% of net sales for the quarter ended December 31, 2014, compared to \$1,027,000, or 18.6% of net sales for the corresponding period in fiscal 2014. The decrease in SG&A expenses for the quarter ended December 31, 2014 was mainly due to the decrease of \$83,000 in professional and other fees, offsetting the increase of \$44,000 in staff cost and welfare, as compared with the corresponding quarter in the prior fiscal year.

Other expense - Other expense was \$102,000 for the quarter ended December 31, 2014, as compared to other income of \$134,000 for the quarter ended December 31, 2013.

On a segment basis, other expense attributable to the plastic segment was \$131,000 as compared to other income of \$80,000 for the same quarter last year. The decrease in other income for the quarter ended December 31, 2014 was mainly due to an exchange loss of \$39,000 and a provision of \$88,000 for doubtful receivables, as compared to an exchange gain of \$77,000 and a reversal of the provision of \$15,000 for doubtful receivables in the corresponding year-ago quarter.

The increase in operating loss in the plastic division was mainly due to a decrease in other income as described above.

Operating loss in the electronic and metallic segment was \$932,000, or negative 18.0% of net sales in the quarter ended December 31, 2014 compared to operating loss of \$649,000 or 11.7% of net sales in the corresponding period of fiscal 2014. The increase in operating loss in the electronic and metallic segment was mainly due to a decrease in gross margin as described above.

Non-operating income – Non-operating income was \$631,000 for the quarter ended December 31, 2014 as compared to non-operating income of \$134,000 for the year-ago quarter. The increase in non-operating income is mainly attributable to \$291,000 in unrealized gain on the revaluation of marketable securities and \$133,000 from rental income during the quarter ended December 31, 2014, as compared to \$168,000 in unrealized loss on the revaluation of marketable securities and \$72,000 from rental income in the year-ago quarter.

Net Loss – The Company had a net loss of \$1,133,000 for the quarter ended December 31, 2014 as compared to net loss of \$1,421,000 for the quarter ended December 31, 2013. Net loss for the plastic segment for the quarter ended December 31, 2014 totaled \$362,000, as compared to a net loss of \$628,000 for the corresponding quarter in fiscal 2014. The decrease in net loss was mainly the result of an increase in non-operating income for the quarter as described above.

Net loss for the electronic and metallic segment for the quarter ended December 31, 2014 was \$771,000, as compared to net loss of \$793,000 for the corresponding quarter in fiscal 2014. The decrease in net loss in the electronic and metallic segment was primarily the result of an increase in non-operating income as described above.

Nine Months Ended December 31, 2014 Compared to Nine Months Ended December 31, 2013

Net Sales - The Company's net sales for the nine months ended December 31, 2014 were \$29,951,000, a decrease of \$3,762,000 or 11.2% as compared to \$33,713,000 in the corresponding period in fiscal 2014. The decrease was related to a decrease in sales revenues of \$1,329,000 in our plastic segment and \$2,433,000 in our electronic and metallic segment, as compared with the respective net sales from these segments in the corresponding period of the prior fiscal year.

The revenue decrease in the plastic segment was due to a decrease in sales orders from existing customers reflecting the continuous slow global economic recovery. The decrease in net sales was related to a decrease of \$1,835,000 in orders from existing customers mainly for medical products, motor vehicle, audio and telephone equipment, and baby products, offsetting an increase of \$530,000 in orders from other existing customers for printing and other products.

The revenue decrease in the electronic and metallic segment was mainly due to decrease in orders of \$2,160,000 for home entertainment products and of \$749,000 for professional audio instrument from existing customers, offsetting an increase in orders of \$478,000 for professional audio products from new customers. The decrease in sales orders was mainly attributed to unstable and sluggish demand for audio products from the slow recovering economies in the US and European markets.

Gross Profit - Gross profit for the nine months ended December 31, 2014 was \$2,502,000, representing a gross profit margin of 8.4%. This compared with the overall gross profit and gross profit margin of \$2,945,000 or 8.7% for the nine months ended December 31, 2013.

Gross profit in the plastic segment increased by \$504,000 to \$2,301,000 or 15.1% of net sales for the nine months ended December 31, 2014, as compared to \$1,797,000 or 10.9% of net sales, for the same period in the prior fiscal year. The increase in gross margin for the plastic segment was mainly due to decrease in labor costs resulting from headcount deduction, and in depreciation expense, when compared with the same period of last year.
