- (1) Assumes conversion of all of the holder's notes at a conversion rate of 15.1627 shares of common stock per \$1,000 principal amount at maturity of the notes. However, this conversion rate will be subject to adjustment as described in *Description of Notes Conversion Rights Adjustment to Conversion Rate*. The amount of common stock issuable upon conversion of the notes may only be decreased in this registration statement. The total number of shares of our common stock issuable upon conversion of the notes (in situations other than dilution) can only be increased through the use of a new registration statement. The number of shares offered by all selling securityholders will not be increased.
- (2) Calculated based on Rule 13d-3(d)(1)(i) of the Exchange Act using 52,081,581 shares of common stock outstanding as of March 1, 2004. In calculating the percentage of common stock outstanding for each holder, we treated as outstanding that number of shares of common stock issuable upon conversion of all of that particular holder's notes. However, we did not assume the conversion of any other holder's notes.

Investing in the notes and our common stock involves risks, which are described under *Risk Factors* beginning on page 8 of the prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.
