ASIAINFO HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Three Months Ended March 31, 2003 and 2004

(In US dollars thousands, except per share amounts)

1. GENERAL AND BASIS OF PREPARATION

AsiaInfo Holdings, Inc. (the Company) is incorporated in the State of Delaware, in the United States of America (the US). The Company principally operates through the following directly owned subsidiaries, or their respective subsidiaries: AsiaInfo Technologies (China), Inc. (AsiaInfo Technologies) (100% owned), incorporated in the People's Republic of China (China or the PRC), Marsec Holdings, Inc. (Marsec) (100% owned), and Bonson Information Technology Holdings Limited, (Bonson) (100% owned), both incorporated in the Cayman Islands.

The Company and its subsidiaries are leading providers of network and software solutions in China. The software products and network services of the Company enable its customers to build, maintain, operate, manage and continuously improve their communications infrastructure. The main customers of the Company are the major telecommunications carriers in China and their provincial subsidiaries.

The Company acts as a holding company and, through certain subsidiaries, sources network-related equipment in the United States for sale to customers in the PRC.

The consolidated financial statements include the financial statements of the Company and its subsidiaries. All significant inter-company transactions and balances are eliminated in consolidation. Investments in 50% or less owned affiliates over which the Company exercises significant influence, but not control, are accounted for using the equity method. The Company's share of earnings (losses) of these companies is included in the accompanying consolidated statement of operations.

All adjustments necessary for a fair presentation of the unaudited results of operations for the three months ended March 31, 2003 and 2004 are included in the accompanying condensed financial statements. All such adjustments are of a normal and recurring nature. The results of operations for the periods are not necessarily indicative of the results of operations for the full year. The financial statements are unaudited.

The Company's revenue is derived from the procurement of hardware on behalf of customers, software license fees, and professional services for systems design, planning, consulting, and system integration, and is recognized based on the percentage of completion method. Revenues from customer orders requiring significant production, modifications, or customization of the software are recognized over the installation and customization period. Labor costs and direct project expenses are used to determine the stage of completion, except for revenues associated with the procurement of hardware. Such hardware-related revenues are recognized upon delivery. Estimates of hardware warranty costs are included in determining project costs. Revenue from packaged software license fees through reseller arrangements is recorded when the related products are shipped and installed. Costs related to insignificant obligations for a period of up to one year, which include telephone support, are accrued at the time the revenue is recorded.

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

Software revenue includes the benefit of the rebate of value added taxes on sales of software received from the Chinese tax authorities as part of the PRC government's policy of encouragement of software development in the PRC. The rebate was \$493 and \$605 for the three months ended March 31, 2003 and 2004, respectively.

Revisions in estimated contract profits are made in the period in which the circumstances requiring the revision become known. Provisions, if any, are made currently for anticipated losses on uncompleted contracts. Revenue in excess of billings is recorded as unbilled receivables and included in trade accounts receivable, and amounted to \$31,927 at December 31, 2003 and \$38,239 at March 31, 2004. Billings in excess of revenues recognized are recorded as deferred income. Billings are rendered based on agreed milestones included in the contracts with customers.

- 7 -

Table of Contents

ASIAINFO HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Three Months Ended March 31, 2003 and 2004

(In US dollars thousands, except per share amounts)

1. GENERAL AND BASIS OF PREPARATION - CONTINUED

At December 31, 2003 and March 31, 2004, the balance of trade accounts receivable of \$19,996 and \$27,567, respectively, represented amounts billed but not yet collected. All billed and unbilled amounts are expected to be collected within 1 year.

These financial statements of the Company and its subsidiaries are prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). This basis of accounting differs from that used in the statutory financial statements of the PRC subsidiaries which are prepared in accordance with the accounting principles and the relevant financial regulations applicable to enterprises with foreign investment as established by China's Ministry of Finance. The principal adjustments made to conform the statutory financial statements of these subsidiaries to U.S. GAAP included an adjustment to record goodwill from business acquisitions and the related impairment provisions, and an adjustment to recognize compensation expense on the issuance of stock options.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The financial records of the Company's PRC subsidiaries are maintained in Renminbi (RMB), their functional currency and the currency of the PRC. Their balance sheets are translated into United States dollars based on the rates of exchange ruling at the balance sheet date. Their statements of operations are translated using a weighted average rate for the period. Translation adjustments are reflected as cumulative translation adjustments in stockholders' equity.

The Renminbi is not fully convertible into United States dollars or other foreign currencies. The rate of exchange quoted by the People's Bank of China on March 31, 2004 was US\$1.00=RMB8.2771. No representation is made that the Renminbi amounts could have been, or could be, converted into United States dollars at that rate or at any other rate.

In June 2002, the Financial Accounting Standards Board (FASB) issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities , which requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. Such costs covered by the statement include lease termination costs and certain employee severance costs that are associated with a restructuring, discontinued operations, plant closing, or other exit or disposal activity. SFAS No. 146 replaces the previous accounting guidance provided by the Emerging Issues Task Force Issue No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). SFAS No.146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002 and adoption of this statement did not have a material impact on the Company's financial position, results of operations or cash flows.

Table of Contents

ASIAINFO HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Three Months Ended March 31, 2003 and 2004

(In US dollars thousands, except per share amounts)

1. GENERAL AND BASIS OF PREPARATION - CONTINUED

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure. SFAS No. 148 amends FASB Statement No. 123, Accounting for Stock-Based Compensation, to provide alternative methods of transition to SFAS No. 123's fair value method of accounting for stock-based employee compensation. Statement 148 also amends the disclosure provisions of SFAS No. 123 and APB Opinion No. 28, Interim Financial Reporting, to require disclosure in the summary of significant accounting policies of the effects of an entity's accounting policy with respect to stock-based employee compensation on reported net income and earnings per share in annual and interim financial statements. While SFAS No. 148 does not amend SFAS No. 123 to require companies to account for employee stock options using the fair value method, the disclosure provisions of SFAS No. 148 are applicable to all companies with stock based employee compensation, regardless of whether they account for that compensation using the fair value method of SFAS No. 123 or the intrinsic value method of APB Opinion No. 25. As allowed by SFAS No. 123, the Company has elected to continue to utilize the accounting method prescribed by APB Opinion No. 25 and has adopted the disclosure requirements of SFAS No. 148 as of December 31, 2003.

In May 2003, the FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity. The Statement establishes standards for how an issuer classifies and measures certain financial instruments. This Statement is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. The Statement requires that certain financial instruments that, under previous guidance, issuers could account for as equity, be classified as liabilities (or assets in some circumstances) in statement of positions or consolidated balance sheets, as appropriate. The financial instruments within the scope of this Statement are: (i) mandatorily redeemable shares those that an issuer is obligated to buy back in exchange for cash or other assets; (ii) financial instruments that do or may require the issuer to buy back some of its shares in exchange for cash or other assets; and (iii) financial instruments that embodies obligation that can be settled with shares, the monetary value of which is fixed, tied solely or predominantly to a variable such as a market index, or varies inversely with the value of the issuer's shares (excluding certain financial instruments indexed partly to the issuer's equity shares and partly, but not predominantly, to something else). This Statement does not apply to features embedded in a financial instrument that is not a derivative in its entirety. The Statement also requires disclosures about alternative ways of settling the instruments and the capital structure of entities, all of whose shares are mandatorily redeemable. The adoption of SFAS No. 150 did not have a material impact on the Company's financial position, cash flows or results of operations.

In November 2002, the FASB issued Interpretation Number (FIN) No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Other. This interpretation requires certain disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees that it has issued. It also requires a guarantor to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. The disclosure requirements of FIN No. 45 are effective for interim and annual periods ending after December 15, 2002 and have been adopted in the financial statements. The initial recognition and initial measurement requirements of FIN No. 45 are effective prospectively for guarantees issued or modified after December 31, 2002. The adoption of the recognition and initial measurement requirements of FIN No. 45 did not have a material impact on the Company's financial position, cash flows or results of operations.

Table of Contents

ASIAINFO HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Three Months Ended March 31, 2003 and 2004

(In US dollars thousands, except per share amounts)

1. GENERAL AND BASIS OF PREPARATION - CONTINUED

In January 2003, the FASB issued FASB Interpretation No. 46, Consolidation of Variable Interest Entities (FIN 46). FIN 46 clarifies the application of Accounting Research Bulletin No. 51, Consolidated Financial Statements and provides guidance on the identification of entities for which control is achieved through means other than voting rights (variable interest entities or VIEs) and on the determination of when and which business enterprise should consolidate the VIEs. This new model for consolidation applies to an entity in which either: (1) the equity investors (if any) lack one or more characteristics deemed essential to a controlling financial interest or (2) the equity investment at risk is insufficient to finance that entity's activities without receiving additional subordinated financial support from other parties. FIN 46 was applicable for periods ended December 15, 2003. In December 2003, the FASB issued FIN 46R which defers the implementation date to the end of the first reporting period after March 15, 2004 unless the Company has a special purpose entity in which case the provisions must be applied for fiscal years ended December 31, 2003. The Company does not have a special purpose entity. Therefore, it will adopt the provisions in December 2004.

In November 2002, the Emerging Issue Task Force (EITF) reached a consensus on Issue No. 00-21 (EITF 00-21), Revenue Arrangements with Multiple Deliverables . EITF No. 00-21 addresses certain aspects of the accounting by a vendor for arrangements under which the vendor will perform multiple revenue generating activities. EITF No. 00-21 is effective for fiscal periods beginning after June 15, 2003. The adoption of EITF No. 00-21 did not have a material impact on the Company's financial position, cash flows or results of operations.

Reclassifications Certain comparative figures have been reclassified to conform with current year's presentation.

2. CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash on hand, demand deposits and highly liquid investments, which are unrestricted as to withdrawal or use, and which have maturities of three months or less when purchased.

3. SHORT-TERM INVESTMENTS

Short-term investments are classified as available for sale and consist principally of certificates of deposit issued by major financial institutions which have maturities of between 6 and 12 months. As there are no significant market price movements for such investments, they are held at cost and accrued interest. There were no realized or unrealized gains or losses as of March 31, 2004.

4. NOTES RECEIVABLE

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

At December 31, 2003 and March 31, 2004, the balances of notes receivable of \$3,832 and \$2,792, respectively, represented bank acceptance drafts that are non-interest bearing and due within six months.

5. COMPREHENSIVE INCOME

The components of comprehensive income for the periods presented are as follows:

	Three Months Ended March 31,	
	2003	2004
Net (loss) income	\$ (29,047)	\$ 1,977
Change in cumulative translation adjustment	4	(3)
Comprehensive income (loss)	\$ (29,043)	\$ 1,974

Table of Contents**ASIAINFO HOLDINGS, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

Three Months Ended March 31, 2003 and 2004

(In US dollars thousands, except per share amounts)

6. SHORT-TERM BANK LOANS

As of December 31, 2003 and March 31, 2004, the Company had total short-term credit facilities for working capital purposes totaling \$40,540 and \$40,539 expiring by December 2005. The facilities were secured by bank deposits of \$14,000 as of December 31, 2003 and March 31, 2004, respectively. At December 31, 2003, unused short-term credit facilities were \$28,759 and used facilities totalled \$11,781. The used facilities are pledged as security for issuing standby letters of credit and notes payable to hardware suppliers and customers. Additional bank deposits of \$827 were used for issuing standby letters of credit and bank acceptance drafts as of December 31, 2003. At March 31, 2004, unused short-term credit facilities were \$22,764 and used facilities totalled \$17,775. The used facilities are pledged as security for issuing standby letters of credit and notes payable to hardware suppliers and customers. Additional bank deposits of \$743 were used for issuing guarantees as of March 31, 2004. Bank deposits pledged as security for these credit facilities totalled \$14,827 and \$14,743 as of December 31, 2003 and March 31, 2004, respectively, and are presented as restricted cash in the consolidated balance sheets.

In addition, as of December 31, 2003 and March 31, 2004, the Company had short-term borrowings of \$60 and nil in RMB, the currency of the PRC, bearing an interest rate of 4.8% and secured by AsiaInfo Management's assets.

7. NOTES PAYABLE

At December 31, 2003 and March 31, 2004, the balances of notes payable of \$2,609 and \$5,790, respectively, represented commercial notes of \$945 and \$1,565, and bank acceptance drafts of \$1,664 and \$4,225, respectively, that are non-interest bearing and due within six months.

8. INCOME TAXES

The Company is subject to US federal and state income taxes. The Company's subsidiaries incorporated in the PRC are subject to PRC income taxes.

A reconciliation between the provision for income taxes computed by applying the US federal tax rate to income (loss) before income taxes and equity in loss of affiliate and the actual provision for income taxes is as follows:

Three Months Ended March 31,	
<hr/>	
2003	2004

9. CAPITAL STOCK

Option activity in the Company's stock option plans is summarized as follows:

	<u>Number of shares</u>	<u>Outstanding options weighted average exercise price per share</u>
Outstanding, January 1, 2004:	9,657,883	\$ 7.37
Granted	94,700	8.20
Cancelled	(434,134)	10.94
Exercised	(273,260)	3.69
	<u>9,045,189</u>	<u>\$ 7.31</u>

The exercise price of all options granted during the three months ended March 31, 2004 was equal to the fair market value of the Company's common stock on the dates of grant.

10. ACCOUNTING FOR STOCK-BASED COMPENSATION

The following table summarizes relevant information as to reported results under the Company's intrinsic value method of accounting for stock awards, with supplemental information as if the fair value recognition provisions of FASB Statement 123 had been applied:

	<u>Three Months Ended March 31,</u>	
	<u>2003</u>	<u>2004</u>
Net (loss) income as reported	\$ (29,047)	\$ 1,977
Add: Stock-based compensation included in reported net income (loss)	68	
Deduct: Total stock-based compensation expense under SFAS 123, net of tax effect	(5,749)	(1,820)
	<u>\$ (34,727)</u>	<u>\$ 157</u>
Pro forma net loss	\$ (34,727)	\$ 157
Basic and diluted net income (loss) per share:	\$ (0.66)	\$ 0.04

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

Pro forma net income (loss) per common share	\$ (0.79)	\$ 0.00
--	-----------	---------

11. NET INCOME (LOSS) PER SHARE

The following is a reconciliation of the numerators and denominators of the basic and diluted net income (loss) per share computations:

	Three Months Ended March 31,	
	2003	2004
Net income (numerator):		
Net income (loss) Basic and diluted	\$ (29,047)	\$ 1,977
Shares (denominator):		
Weighted average Common Stock Outstanding	44,206,625	45,301,278
Basic	44,206,625	45,301,278
Options (Treasury Method)		2,053,435
Diluted	44,206,625	47,354,713
Net income (loss) per share:		
Basic	\$ (0.66)	\$ 0.04
Diluted	\$ (0.66)	\$ 0.04

Table of Contents**ASIAINFO HOLDINGS, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

Three Months Ended March 31, 2003 and 2004

(In US dollars thousands, except per share amounts)

11. NET INCOME (LOSS) PER SHARE - CONTINUED

As of March 31, 2003, the Company had 9,885,565 options outstanding that could have potentially diluted earnings per share (EPS) in the future, but which were excluded in the computation of diluted EPS in the period, as their effect would have been antidilutive due to the net loss reported in the period.

As of March 31, 2004, the Company had 4,625,706 options outstanding that could have potentially diluted EPS in the future, but which were excluded in the computation of diluted EPS in the period, as their exercise prices were above the average market values in such periods.

12. ACQUISITION

On October 20, 2003 (the date of acquisition), the Company acquired certain human resources management and business intelligence assets from Pacific Software (China) Limited (Pacific), a software solutions company, in exchange for cash of \$4,180 and 349,315 shares of the Company s common stock valued at \$2,550. There is an additional contingent payment of \$2,270 which is payable by the Company upon attaining certain terms and conditions which management expects to occur in 2004. The value of the shares issued was determined based on the average market price of the Company s common shares over the 5-day period before and after the terms of the acquisition were agreed to and announced. This acquisition was treated as a purchase and, accordingly, the acquired assets were recorded at their fair market values at the date of acquisition.

The aggregate purchase price of \$6,730 has been allocated as follows:

		<u>Economic Life</u>
Current assets	\$ 58	
Equipment	35	
Completed technology	1,945	5 years
Contract backlog	326	2 years
Trade mark	60	2 years
Customer list	24	5 years
In-process technology	169	None
Goodwill	4,113	Indefinite
	<u> </u>	
Total	\$ 6,730	

The Company recorded a charge of \$169 at the date of acquisition in accordance with FASB Interpretation No. 4, Applicability of FASB Statement No. 2 to Business Combinations Accounted for by the Purchase Method, for purchased in-process technology related to a development project that had not reached technological feasibility, had no alternative future use, and for which successful development was uncertain. The conclusion that the in-process development effort, or any material sub-component, had no alternative future use was reached in consultation with the Company's management and Pacific's management.

Table of Contents**ASIAINFO HOLDINGS, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

Three Months Ended March 31, 2003 and 2004

(In US dollars thousands, except per share amounts)

12. ACQUISITION - CONTINUED

The following unaudited pro forma information summarizes the results of operations for the three months ended March 31, 2003 and 2004 of the Company and Pacific. It has been prepared on the assumption that the acquisitions occurred at the beginning of that period. The following pro forma financial information is not necessarily indicative of the results that would have occurred had the acquisition been completed at the beginning of the periods indicated, nor is it indicative of future operating results:

	Three Months Ended March 31,	
	2003	2004
Total revenue	\$ 30,674	\$ 31,981
Net (loss) income	(29,200)	1,977
Net (loss) income per share		
- Basic	\$ (0.66)	\$ 0.04
- Diluted	\$ (0.66)	\$ 0.04
Shares used in calculation of net (loss) income per share		
- Basic	44,555,940	45,301,278
- Diluted	44,555,940	47,354,713

The pro forma results of operations give effect to certain adjustments, including amortization of purchased intangibles with definite lives, associated with the acquisition. The charge for purchased in-process research and development of \$169 has been excluded from the pro forma results, as it is a material non-recurring charge.

13. SEGMENT AND GEOGRAPHIC OPERATING INFORMATION

During 2003, the Company reorganized its operations structure so that its business operations focus on specific customers rather than product lines. Instead of selling its products and services through its two former strategic business units, Communications Solutions and Operation Support Systems Solutions, the Company now has one point of sales contact for each of its major customers, streamlining the relationships and interactions with its customers.

The new customer-based structure is designed to offer customers a one window shopping solution for all of their needs, including all the business lines from the Company such as network solutions, software license and services and service applications solutions. The new structure benefits from cost efficiencies gained from combined sales and marketing as well as research and development staff and offer more integrated quality services to the Company's customers. As a result, the financial reporting structure that the Company has adopted is based on network solutions and software revenue.

	Three Months Ended March 31,	
	2003	2004
	(unaudited)	
Revenues net of hardware costs:		
Network solutions	\$ 5,545	\$ 5,355
Software revenue	7,174	9,672
Total revenues net of hardware costs	12,719	15,027
Cost of sales net of hardware costs	5,214	5,773
Gross profit	\$ 7,505	\$ 9,254

The information of 2003 has been reclassified to conform to the current operating segments.

13. SEGMENT AND GEOGRAPHIC OPERATING INFORMATION - CONTINUED*Reconciliation of Non-GAAP Measures*

A reconciliation table of total revenues net of hardware costs and total revenues for the three months ended March 31, 2003 and 2004 is as follows:

	Three Months Ended March 31,	
	2003	2004
	(unaudited)	
Total revenues net of hardware costs^(a):		
Network solutions	\$ 5,545	\$ 5,355
Software revenue	7,174	9,672
	<u>\$ 12,719</u>	<u>\$ 15,027</u>
Total cost of hardware sales		
Network solutions	17,955	16,954
Software revenue		
	<u>\$ 17,955</u>	<u>\$ 16,954</u>
Total revenues		
Network solutions	\$ 23,500	\$ 22,309
Software revenue	7,174	9,672
	<u>\$ 30,674</u>	<u>\$ 31,981</u>

^(a) The Company believes that the presentation of this non-GAAP measure provides useful information for investors regarding the Company's financial performance. The presentation of this additional information is not meant to be considered in isolation or as a substitute for the Company's financial results prepared in accordance with GAAP.

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

For the three months ended March 31, 2003 and 2004, almost all of the Company's revenues have been derived from sales to customers in the PRC. Revenues are attributed to the country based on the country of installation of hardware, software and performance of system integration work and software related services. As of March 31, 2003 and 2004, 99% of the Company's long-lived assets are located in the PRC.

14. COMMITMENTS AND CONTINGENCIES

IPO Litigation

On December 4, 2001, a securities class action case was filed in New York City against the Company, certain of its current officers and directors and the underwriters of the Company's initial public offering, or IPO. The lawsuit alleged violations of the federal securities laws and was docketed in the United States District Court for the Southern District of New York, or the Court, as *Hassan v. AsiaInfo Holdings, Inc., et al.* The lawsuit alleged, among other things, that the underwriters of the Company's IPO improperly required their customers to pay the underwriters excessive commissions and to agree to buy additional shares of the Company's common stock in the aftermarket as conditions to their purchasing shares in the Company's IPO. The lawsuit further claimed that these supposed practices of the underwriters should have been disclosed in the Company's IPO prospectus and registration statement. The suit seeks rescission of the plaintiffs' alleged purchases of the Company's common stock as well as unspecified damages. In addition to the case against the Company, various other plaintiffs have filed approximately 1,000 other, substantially similar class action cases against approximately 300 other publicly traded companies and their IPO underwriters in New York City, which along with the case against the Company have all been transferred to a single federal district judge for purposes of case management.

ASIAINFO HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Three Months Ended March 31, 2003 and 2004

(In US dollars thousands, except per share amounts)

14. COMMITMENTS AND CONTINGENCIES - CONTINUED

On July 15, 2002, together with the other issuer defendants, the Company filed a collective motion to dismiss the consolidated, amended complaints against the issuers on various legal grounds common to all or most of the issuer defendants. The underwriters also filed separate motions to dismiss the claims against them. On October 9, 2002, the Court dismissed without prejudice all claims against the individual defendants in the litigation. The dismissals were based on stipulations signed by those defendants and the plaintiffs' representatives. On February 19, 2003, the Court issued its ruling on the motions to dismiss filed by the underwriter and issuer defendants. In that ruling the Court granted in part and denied in part those motions. As to the claims brought against the Company under the anti-fraud provisions of the securities laws, the Court dismissed all such claims without prejudice. As to the claims brought under the registration provisions of the securities laws, which do not require that intent to defraud be pleaded, the Court denied the motion to dismiss such claims as to the Company and as to substantially all of the other issuer defendants. The Court also denied the underwriter defendants' motion to dismiss in all respects.

In June 2003, the Company elected to participate in a proposed settlement agreement with the plaintiffs in this litigation. If ultimately approved by the Court, this proposed settlement would result in a dismissal, with prejudice, of all claims in the litigation against the Company and against any of the other issuer defendants who elect to participate in the proposed settlement, together with the current or former officers and directors of participating issuers who were named as individual defendants. The proposed settlement does not provide for the resolution of any claims against the underwriter defendants, and the litigation against those defendants is continuing. The proposed settlement provides that the class members in the class action cases brought against the participating issuer defendants will be guaranteed a recovery of \$1 billion by insurers of the participating issuer defendants. If recoveries totaling \$1 billion or more are obtained by the class members from the underwriter defendants, however, the monetary obligations to the class members under the proposed settlement will be satisfied. In addition, all participating issuer defendants will be required to assign to the class members certain claims that the Company may have against the underwriters.

The proposed settlement contemplates that any amounts necessary to fund the settlement or settlement-related expenses would come from participating issuers' directors and officers liability insurance policy proceeds as opposed to funds of the participating issuer defendants themselves. A participating issuer defendant could be required to contribute to the costs of the settlement if that issuer's insurance coverage were insufficient to pay that issuer's allocable share of the settlement costs. The Company expects that its insurance proceeds will be sufficient for these purposes and that it will not otherwise be required to contribute to the proposed settlement. Consummation of the proposed settlement is conditioned upon, among other things, negotiating, executing, and filing with the Court final settlement documents, and final approval by the Court. If the proposed settlement described above is not consummated, the Company intends to continue to defend the litigation vigorously. Moreover, if the proposed settlement is not consummated, the Company believes that the underwriters may have an obligation to indemnify the Company for the legal fees and other costs of defending this suit and that the Company's directors' and officers' liability insurance policies would also cover the defense and potential exposure in the suit. While the Company cannot guarantee the outcome of these proceedings, the Company believes that the final result of these actions will have no material effect on the Company's consolidated financial condition, results of operations or cash flows.

Warranty Costs

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

The Company's product warranty accrual reflects management's best estimate of probable liability under its product warranties. Management determines the warranty based on historical experience and other currently available evidence.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Except for historical information, the statements contained in this Quarterly Report on Form 10-Q are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The Private Securities Litigation Reform Act of 1995 (the Reform Act) contains certain safe harbors regarding forward-looking statements. Certain of the forward-looking statements include management's expectations, intentions and beliefs with respect to our growth, our operating results, the nature of the industry in which we are engaged, our business strategies and plans for future operations, our needs for capital expenditures, capital resources and liquidity; and similar expressions concerning matters that are not historical facts. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those expressed in the statements. All forward-looking statements included in this document are based on information available to us on the date hereof, and we assume no obligation to update any such forward-looking statements. These cautionary statements are being made pursuant to the provisions of the Reform Act with the intention of obtaining the benefits of the safe harbor provisions of the Reform Act. Among the factors that could cause actual results to differ materially are the factors discussed below under the heading Factors Affecting our Operating Results and our Common Stock.

Overview

We are a leading provider of high-quality software and solutions in China. We provide total customer solutions to some of China's largest companies, and help our customers to increase their business value in fast-growing and evolving markets. In the telecommunications market, our software products and network services enable our customers to build, maintain, operate, manage and continuously improve their communications infrastructure. Our largest customers are the major telecommunications carriers in China and their provincial subsidiaries, such as China Telecommunications Corporation, or China Telecom, China Network Communications Group Corporation, or China Netcom Group, China Mobile Communications Corporation, or China Mobile, and China United Telecommunications Corporation, or China Unicom. In December 2003, through our acquisition of a human resources management, or HRM, and business intelligence, or BI, software business, we gained exposure to new customers in a wider range of industries such as transportation, power and iron and steel.

We commenced our operations in the United States in 1993 and moved our major operations from the United States to China in 1995. We began generating significant network solutions revenues in 1996 and significant software revenues in 1998. We conduct the bulk of our business through our wholly-owned operating subsidiaries, AsiaInfo Technologies (China) Inc., or AsiaInfo Technologies, and AsiaInfo Management Software, Inc., or AsiaInfo Management, which are both Chinese companies.

We believe that there are opportunities for us to expand into new business areas and to continue to grow our business both organically and through acquisitions. On December 4, 2003, we completed our acquisition of certain HRM and BI assets valued at approximately \$9 million from Pacific Software (China) Limited, a privately held, medium-sized software solutions company based in Hong Kong, and from its affiliate, New Century Pacific Software (Beijing) Limited, a wholly-foreign-owned enterprise based in Beijing, China. The acquisition has helped us to expand into the HRM and BI software markets, and has exposed us to customers in other industries, outside of our traditional telecommunications customer base.

Reliance on key telecommunications customers. We have derived, and believe that we will continue to derive, a significant portion of our revenues from a limited number of large customers, such as China Telecom, China Unicom, China Mobile and China Netcom Group. Sales to China Telecom and its subsidiaries amounted to approximately 9%, 21% and 31% of total revenues in 2003, 2002 and 2001, respectively. Sales to China Unicom and its subsidiaries amounted to approximately 38%, 22% and 45% of total revenues in 2003, 2002 and 2001, respectively. Sales to China Netcom Group and its subsidiaries amounted to approximately 13%, 6% and 9% of total revenues in 2003, 2002 and 2001, respectively. As a result of our reliance on these key customers in the

Table of Contents

telecommunications industry, our operating results are influenced by governmental spending policies in that sector. Recently, China's Ministry of Information Industry, or MII, has announced that there will be a moderate increase in spending this year. However, our operating results have yet to be impacted by any such increase.

Sales to China Mobile and its subsidiaries amounted to approximately 38%, 42% and 10% of total revenues in 2003, 2002 and 2001, respectively. The sum of our top five receivable balances represented 96% and 95% of the total receivable balances for the years ended December 31, 2003 and 2002, respectively. We have expanded our customer base recently through the acquisition of an HRM and BI software business with customers in sectors such as transportation and energy. However, our operating results are still dependent on our large customers in the telecommunications sector, and the loss of any of those customers could have a material adverse impact on us.

Impact of goodwill impairments. In connection with our acquisition of Bonson Information Technology Holdings Limited in February 2002, we paid the former shareholders of that company \$32.76 million (net of acquisition costs) in cash and 1,031,686 shares of our common stock (which were valued at approximately \$18 million at the time the acquisition was announced). During the first quarter of 2003, we completed an annual impairment test as required by Statement of Financial Accounting Standard (SFAS) No.142 and recorded a non-cash impairment charge of \$29.84 million relating to the goodwill and acquired intangible assets attributable to our acquisition of Bonson. In December 2003, we conducted an impairment test in connection with our investment in Intrinsic Technology Holdings, Inc., in which we hold a minority stake, and recorded a charge of \$2.2 million. Although we do not presently anticipate any further impairment charges, any future deterioration of market conditions or other changes may require us to record additional impairment charges in the future, which would impact our net income (loss).

Impact of SARS outbreak. The outbreak of Severe Acute Respiratory Syndrome, or SARS, is believed to have started in Guangdong Province, China in late 2002 and to have later spread to Beijing. The SARS outbreak impacted our second quarter 2003 revenues by disrupting travel throughout China and causing delays in service delivery to our customers. In addition, the outbreak of SARS interrupted our collection efforts, causing our days sales outstanding to increase to 219 days at the end of the second quarter of 2003. Although the spread of SARS in China has been contained and our business activities resumed normal operations during the third quarter of 2003, the medical community worldwide has not fully understood the origin of SARS and has not found a well-recognized effective treatment for SARS. As a consequence, the potential long-term effects of SARS on economic growth in China are still unknown. Since January 5, 2004, a small number of new SARS cases have been reported in China. Any future worsening of the SARS epidemic could have an adverse impact on our business.

Revenues

We report our revenues on the basis of the two principal types of revenues derived from our business: network solutions revenues and software revenues.

Network solutions revenue. Network solutions revenue consists of hardware sales for equipment procured by us on behalf of our customers from hardware vendors, as well as services for network planning, design, systems integration and training. We procure for and sell hardware to our customers as part of our total solutions strategy. We minimize our exposure to hardware risks by sourcing equipment from hardware vendors against letters of credit from our customers. We believe that as the telecommunications-related market in China develops our customers will increasingly purchase hardware directly from hardware vendors and hire us for our professional services.

Software revenue. Software revenues include two types of revenues: software license revenue and software services revenue. Software license revenue consists of fees received from customers for licenses or sublicenses to use our software products as well as third party software products in perpetuity, typically up to a specified maximum number of users. In most cases, our customers must purchase additional user licenses from us

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

when the number of users exceeds the specified maximum. Our software license revenue also includes the benefit of value added tax rebates on software license sales, which are part of the Chinese government's policy of encouraging China's

- 19 -

Table of Contents

software industry. Software services revenue consists of revenue from software installation, customization, training and other services.

Net revenues. Although we report our revenues on a gross basis, inclusive of hardware acquisition costs that are passed through to our customers, we manage our business internally based on revenues net of hardware costs, which is consistent with our strategy of providing our customers with high value IT professional services and, where efficient, outsourcing lower-end services such as hardware acquisition and installation. This strategy may result in lower growth rates for total revenues as against prior periods, but will not adversely impact revenues net of hardware costs. The following table shows our revenue breakdown on this basis and reconciles our net revenues to our total revenues:

	THREE MONTHS ENDED		YEAR ENDED	
	MARCH 31,		DECEMBER 31,	
	2004	2003	2003	2002
	(amounts in thousands of US\$)			
Network solutions net of hardware costs	5,355	5,545	25,982	31,720
Software revenue	9,672	7,174	31,488	33,013
Total revenues net of hardware costs	15,027	12,719	57,470	64,733
Total hardware costs	16,954	17,955	58,704	56,533
Total revenues	31,981	30,674	116,174	121,266

The information on revenues net of hardware costs in the above table is a non-GAAP financial measure within the meaning of Item 10 of Regulation S-K under the Securities Exchange Act of 1934, as amended. We have provided a reconciliation of this non-GAAP financial measure to the most directly comparable GAAP financial measure, total revenues. We believe that the presentation of this non-GAAP measure provides useful information for investors regarding our regular financial performance. Our management uses this measure for the same purpose. The presentation of this additional information is not meant to be considered in isolation or as a substitute for our financial results prepared in accordance with GAAP.

Cost of Revenues

Network solutions costs. Network solutions costs consist primarily of third party hardware costs, compensation and travel expenses for the professionals involved in designing and implementing projects, and hardware warranty costs. We recognize hardware costs in full upon delivery of the hardware to our customers. In order to minimize our working capital requirements, we generally obtain from our hardware vendors payment terms that are timed to permit us to receive payment from our customers for the hardware before our payments to hardware vendors are due. However, in large projects we sometimes obtain less favorable payment terms from our customers, thereby increasing our working capital requirements. We accrue hardware warranty costs upon final acceptance. We obtain manufacturers' warranties for hardware we sell, which cover a portion of the warranties that we give to our customers. We currently accrue 0.5% of hardware sales to cover potential warranty expenses. This estimate of warranty cost is based on our current experience with contracts for which the warranty period has expired.

Software costs. Software costs consist primarily of three components:

packaging and written manual expenses for our proprietary software products;

compensation and travel expenses for the professionals involved in modifying, customizing or installing our software products and in providing consultation, training and support services; and

software license fees paid to third-party software providers for the right to sublicense their products to our customers as part of our solutions offerings.

Table of Contents

The costs associated with designing and modifying the formulation of our proprietary software are classified as research and development expenses as incurred.

Operating Expenses

Operating expenses are comprised of sales and marketing expenses, research and development expenses, general and administrative expenses, and amortization expenses for intangible assets, deferred stock compensation and impairment of goodwill and acquired intangible assets. Compensation expenses consistently comprise a significant portion of our total operating expenses.

Sales and marketing expenses include compensation expenses for employees in our sales and marketing departments, third party advertising expenses, as well as sales commissions and sales agency fees.

Research and development expenses relate to the development of new software and the modification of the formulation of existing software. We expense such costs as they are incurred.

Taxes

Except for certain hardware procurement and resale transactions, we conduct substantially all of our business through our Chinese subsidiaries, which are generally subject to a 30% state corporate income tax and a 3% local income tax.

Under the income tax laws of China, foreign invested enterprises, or FIEs, satisfying certain criteria can enjoy preferential tax treatment. Our subsidiaries, AsiaInfo Technologies, AsiaInfo Management and AsiaInfo Technologies (Chengdu), Inc., are FIEs and enjoy certain preferential tax treatments in China. Please refer to Note 11 to our consolidated financial statements included in our annual report on Form 10-K filed with the United States Securities and Exchange Commission on March 15, 2004 for details of the respective preferential treatments for each of these subsidiaries.

The unified Chinese corporate income tax laws for domestic enterprises and FIEs will likely take effect in 2005. It is anticipated that these unified tax laws will eliminate various preferential tax provisions in China. However, such unified tax laws should not affect the preferential tax treatments granted to FIEs in previous years.

Sales of hardware procured in China are subject to a 17% value added tax. Most of our sales of hardware procured outside China are made through our U.S. parent company, AsiaInfo Holdings, Inc. and thus are not subject to the value added tax. We effectively pass value-added taxes on hardware sales through to our customers and do not include them in revenues reported in our financial statements. In addition, companies that develop their own software and register the software with the relevant authorities in China are generally entitled to a value added tax refund. If the net amount of the value added tax payable exceeds 3% of software sales, the excess portion of the value added tax is refundable immediately. This policy is effective until 2010.

We are also subject to U.S. income taxes on revenues generated in the United States, including revenues from our limited hardware procurement activities through our U.S. parent company, AsiaInfo Holdings, Inc., and interest income earned in the United States.

Foreign Exchange

A majority of our revenues and expenses relating to hardware sales are denominated in U.S. dollars, and substantially all of our revenues and expenses relating to the software and service components of our business are denominated in Renminbi. The value of our shares will be affected by the foreign exchange rate between U.S. dollars and Renminbi because the value of our business is effectively denominated in Renminbi, while our shares are traded in U.S. dollars. Furthermore, an increase in the value of the Renminbi may require us to exchange more U.S. dollars into Renminbi to meet the

Table of Contents

working capital requirements of our subsidiaries in China. Depreciation of the value of the U.S. dollar will also reduce the value of the cash we hold in U.S. dollars, which we may use for purposes of future acquisitions or other business expansion. We actively monitor our exposure to these risks and adjust our cash position in the Renminbi and the U.S. dollar when we believe such adjustments will reduce our foreign exchange risks. For example, in February 2004 we exchanged approximately \$28 million cash in U.S. dollar into Renminbi.

Critical Accounting Policies

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. On an on-going basis, we evaluate our estimates and judgments, including those related to revenues and cost of revenues under customer contracts, warranty obligations, bad debts, income taxes, investment in affiliate, goodwill and other intangible assets, and litigation. We base our estimates and judgments on historical experience and on various other factors that we believe are reasonable. Actual results may differ from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect the more significant judgments and estimates used in the preparation of our consolidated financial statements.

Revenue recognition. We generally charge a fixed price for all of our projects and recognize revenue based on the percentage of completion of the project. Software revenues from customer orders requiring significant production, modifications, or customization of the software are recognized over the installation and customization period. We use labor costs and direct project expenses to determine the stage of completion, except for revenue associated with the procurement of hardware, which we recognize upon delivery of the hardware to the customer. Since a large part of the cost of certain projects, particularly network solutions projects, often relates to hardware, the timing of hardware delivery can cause our quarterly gross revenue and inventory level to fluctuate significantly. However, those fluctuations do not significantly affect our gross profits because hardware-related revenues generally approximate the costs of the hardware. Recognized revenues and profit are subject to adjustments in current periods as the contract progresses to completion. Accordingly, any changes in our estimates would impact our future operating results.

Income taxes. We record a valuation allowance to reduce our deferred tax assets to the amount that we believe is more likely than not to be realized. In the event we were to determine that we would be able to realize our deferred tax assets in the future in excess of their recorded amount, an adjustment to the deferred tax asset would increase income in the period such determination was made. Likewise, should we determine that we would not be able to realize all or part of our net deferred tax asset in the future, an adjustment to the deferred tax asset would be charged to income in the period such determination was made.

Goodwill and other intangible assets. We make assumptions regarding estimated future cash flows and other factors to determine the fair value of goodwill and other intangible assets. If these estimates or their related assumptions change in the future, we may be required to record an impairment charge if the estimated fair value of goodwill and other intangible assets is less than its recorded amount. As required under SFAS No.142, during the first quarter of 2003 we completed an annual goodwill impairment test and recorded a non-cash impairment charge of \$30.2 million relating to the goodwill and acquired intangible assets primarily attributable to our acquisition of Bonson in February of 2002. The impairment resulted primarily from the industry-wide equity devaluations of the past year. Continued deterioration of market conditions may require us to record additional impairment charges in the future.

Table of Contents

Consolidated Results of Operations

Revenues. Total revenues were \$32 million in the three-month period ended March 31, 2004, representing an increase of 4% against the comparable period in 2003. This increase was primarily due to an increase in software revenue, which was partially offset by a decrease in network solutions revenue. Revenues net of hardware costs were \$15 million in the three-month period ended March 31, 2004, representing an 18% increase over the comparable period in 2003 and a 7% decrease over the previous quarter. Software revenue was \$9.7 million in the three-month period ended March 31, 2004, representing an increase of 35% over the comparable period in 2003 and a 1% increase over the previous quarter. Network solutions revenue was \$5.3 million in the three-month period ended March 31, 2004, representing a decrease of 3% over the comparable period in 2003 and a 19% decrease over the previous quarter. These changes in net revenues were attributable to our strategy to focus more of our resources on growing our software business.

Revenue from our HRM and BI unit, which we acquired in December 2003, accounted for approximately 6% of our net revenue in the quarter ended March 31, 2004.

Cost of Revenues. Our cost of gross revenues decreased 2% to \$22.7 million in the first quarter of 2004, from \$23.2 million in the first quarter of 2003. The decrease in cost of gross revenue was primarily attributable to lower hardware costs.

Gross Profit. Our gross profit of \$9.3 million represented a 23% increase in the first quarter of 2004, as compared to the first quarter of 2003. Gross profit as a percentage of gross revenues, or gross margin, increased to 29% in the first quarter of 2004, as compared to 24% in the first quarter of 2003. Gross profit as a percentage of net revenues increased to 62% in the first quarter of 2004, as compared to 59% in the same period of 2003. These increases were attributable to the year-over-year increase in our net revenue as well as improvements in our operating efficiency.

Operating Expenses. Total operating expenses, decreased 81% to \$7.3 million in the first quarter of 2004, from \$37.7 million in the first quarter of 2003. The unusually high total operating expenses in the first quarter of 2003 were due to a one-time, non-cash impairment charge of \$30.2 million we recorded in the first quarter of 2003 as a result of an independent valuation of the goodwill and acquired intangible assets mainly attributable to our acquisition of Bonson in February of 2002. Excluding such charges, total operating expenses in the first quarter of 2003 would have been \$7.5 million. The year-over-year and sequential decreases in total operating expenses were primarily attributable to the decrease in our research and development expenses, which in turn resulted from the consolidation of our separate research and development departments from our two previous business units, Operation Support System Solutions and Communications Solutions.

Sales and marketing expenses increased 4% to \$2.6 million in the first quarter of 2004, from \$2.5 million in the first quarter of 2003, in line with the increase in our revenues.

Research and development expenses decreased 21% to \$2.0 million in the first quarter of 2004 from \$2.5 million in the first quarter of 2003 due to the efficiencies resulted from our consolidation of previous separate research and development departments described above.

General and administrative expenses increased 7% to \$2.5 million in the first quarter of 2004, from \$2.3 million in the first quarter of 2003, primarily due to certain one-time costs associated with the implementation of administrative projects designed to maximize efficiency.

Income (Loss) From Operations. Our operating income was \$2.0 million in the first quarter of 2004, as compared to an operating loss of \$30.2 million in the comparable period in 2003. The loss in the first quarter of 2003 was due primarily to the one-time, non-cash impairment charge described above.

Other Income (Expense). Other income and expenses, consisting primarily of net interest income and expense, decreased from income of approximately \$0.45 million in the first quarter of 2003 to income of \$0.35 million in the first quarter of 2004, primarily due to a decrease in interest rates and our having less cash invested in interest bearing investments.

Table of Contents

Equity in Loss of Affiliate. Equity in loss of affiliate of approximately \$0.04 million represented our proportionate share of the loss incurred by Intrinsic.

Net Income (Loss). We recorded net income of \$2.0 million, or \$0.04 basic income per share, for the quarter ended March 31, 2004. We expect net revenue for the second quarter of 2004 to be between \$14 to \$15 million, or \$0.02 to \$0.03 per basic share.

Liquidity and Capital Resources

Our capital requirements are primarily working capital requirements related to hardware sales and costs associated with the expansion of our business, such as research and development and sales and marketing expenses. We recognize hardware costs in full upon delivery of the hardware to our customers. In order to minimize our working capital requirements, we generally obtain from our hardware vendors payment terms that are timed to permit us to receive payment from our customers for the hardware before our payments to hardware vendors are due. However, we sometimes obtain less favorable payment terms from our customers, thereby increasing our working capital requirements. See Factors Affecting our Operating Results and our Common Stock Our working capital requirements may increase significantly. We have historically financed our working capital and other financing requirements through careful management of our billing cycle, private placements of equity securities, our initial public offering in March of 2000 and, to a limited extent, bank loans.

Our accounts receivable balance at March 31, 2004 was \$65.8 million, consisting of \$27.6 million in billed receivables and \$38.2 million in unbilled receivables. Our billed receivables are based on revenue we have booked and billed. Our unbilled receivables are based on revenue we have booked through the percentage completion method, but for which we have not yet billed the customer. For example, we recognize revenues for hardware pass-through at the time the hardware is accepted by the customer, based on the cost of the underlying hardware. However, our contracts with our customers will often allow the customers to withhold 10-20% of the total contract payments until final project acceptance, which on average is eight to nine months after hardware delivery. As a result, revenues from hardware pass-through generally represent a significant portion of our unbilled receivables and can cause the aging of these receivables to be relatively long.

At the end of the first quarter, our days sales outstanding were 185 days, as compared to 161 days at the end of December 31, 2003. Our billed receivables were 77 days sales outstanding and our unbilled receivables were 108 days sales outstanding. The higher day sales outstanding were caused by the typical slowdown in account collection for the first quarter of each year. As of the end of the first quarter, our accounts payable balance increased 19% as compared to the previous quarter end. This increase was attributable to our delaying payment to equipment vendors under contracts that allow us to delay such payments until we receive payment from our customers.

As of March 31, 2004, we had total short-term credit facilities totaling \$40.5 million, expiring by December 2005, for working capital purposes, of which unused short-term credit facilities were \$22.8 million at that date. At March 31, 2004, \$17.7 million had been used to issue letters of credit and notes payable. All the borrowings were in Renminbi. The loans carry interest 4.8% per annum and are repayable within one year. Bank deposits pledged as security for these bank loans and short-term credit facilities totaled \$14.7 million as of March 31, 2004, and are presented as restricted cash in our consolidated balance sheets.

We ended the quarter with a cash position of \$149.8 million, of which \$10.4 million was in short term investments and \$14.7 million was in restricted cash. Restricted cash consisted of \$14 million used to secure our \$40.5 million credit facility, \$0.3 million pledged as security for issuing standby letters of credit and notes payable and \$0.4 million held by Bonson and pledged as security for guarantees, and \$124.7 million of which was in cash and cash equivalents. The cash equivalents include investments in cash management accounts to enhance our interest income.

Table of Contents

We had net operating cash inflow of \$2.7 million in first quarter of 2004, primarily attributable to our operating profit. Our inventory position at the end of the quarter was approximately \$3.8 million, representing a 19% increase over the previous quarter's \$3.2 million.

We anticipate that the net proceeds of our initial public offering in March 2000, together with available funds and cash flows generated from operations, will be sufficient to meet our anticipated needs for working capital, capital expenditures and business expansion through 2004. We may need to raise additional funds in the future, however, in order to fund acquisitions, develop new or enhanced services or products, respond to competitive pressures to compete successfully for larger projects involving higher levels of hardware purchases, or if our business otherwise grows more rapidly than we currently predict. We plan to raise additional funds, if necessary, through new issuances of shares of our equity securities in one or more public offerings or private placements, or through credit facilities extended by lending institutions.

In the event that we decide to pay dividends to our shareholders, our ability to pay dividends will depend in part on our ability to receive dividends from our operating subsidiaries in China. Foreign exchange and other regulations in China may restrict our ability to distribute retained earnings from our operating subsidiaries in China or convert those payments from Renminbi into foreign currencies.

Off-Balance Sheet Arrangements

As of March 31, 2004, we have not entered into any off-balance sheet arrangements with any individuals or entities.

Accounting Pronouncements Recently Adopted

Recent Accounting Pronouncements

Our adoption of the following recently issued accounting pronouncements did not have a material impact on our financial position, cash flows or results of operations. We have reflected all disclosure requirements of these pronouncements in our financial statements.

SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities.

Financial Accounting Standards Board (FASB) Interpretation Number, (FIN) No. 45, Guarantors Accounting and Disclosure Requirements for Guarantees of Indebtedness of Others.

Emerging Issues Task Force (EITF) Issue No. 00-21, Revenue Arrangements with Multiple Deliverables.

SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure. As allowed by SFAS No. 148, we have elected to continue to utilize the accounting method prescribed by Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees.

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity, for instruments entered into or modified after May 31, 2003.

We have not yet adopted the following recently issued accounting pronouncements because they are not yet applicable in part or in total; however, we do not expect their adoption to have a material effect on our financial position, cash flows or results of operations.

FIN No. 46, Consolidation of Variable Interest Entities, applicable December 31, 2004.

SFAS No. 150, applicable January 1, 2004 for instruments existing at May 31, 2003 and not subsequently modified.

Table of Contents

Certain Risks That May Affect Our Operating Results and Our Common Stock

In addition to the other information in this report, the following factors should be considered in evaluating our business and our future prospects:

The growth of our business is dependent on government telecommunications infrastructure and budgetary policies, particularly the allocation of funds to sustain the growth of the telecommunications industry in China.

Most of our large customers are directly or indirectly owned or controlled by the government of China. Accordingly, their business strategies, capital expenditure budgets and spending plans are largely decided in accordance with government policies, which, in turn, are determined on a centralized basis at the highest level by the National Development and Reform Commission of China. As a result, the growth of our business is heavily dependent on government policies for telecommunications infrastructure. Insufficient government allocation of funds to sustain the growth of China's telecommunications industries in the future could reduce the demand for our products and services and have a material adverse effect on our ability to grow our business.

On December 11, 2001, in an effort to increase the efficiency of telecommunications service providers through competition, the State Council of China announced that it would split China Telecom geographically into a northern division (comprising ten provinces) and a southern division (comprising 21 provinces). Under the State Council's plan, the northern division of China Telecom has merged with China Netcom and Jitong Communication, and has been renamed China Network Communications Group Corporation, or China Netcom Group, while the southern division operates under the China Telecom name. As a result of the restructuring, new orders for telecommunications infrastructure expansion and improvement projects have decreased over the past several quarters, adversely affecting our backlog and our net revenue. Although we expect that the restructuring will have a positive impact on growth in the telecommunications industry in China in the long-term, continued delays in capital expenditure projects could continue to negatively affect our growth in the near-term. In addition, similar restructurings of this nature could cause our operating results to vary unexpectedly from quarter to quarter in the future.

Our customer base is concentrated and the loss of one or more of our customers could cause our business to suffer significantly.

We have derived, and believe that we will continue to derive, a significant portion of our revenues from a limited number of large customers, such as China Telecom, China Unicom, China Mobile and China Netcom Group. China Mobile accounted for 38% of our revenues in 2003. The loss, cancellation or deferral of any large contract by any of our large customers would have a material adverse effect on our revenues, and consequently our profits. Our recent acquisition of the human resources management and business intelligence assets of Pacific Software is part of our strategy to further diversify our business and, therefore, gradually reduce such concentration risk in the future. However, in the near term, the expected revenue to be generated by our business outside the telecommunications industry is still limited compared to our overall revenues. Moreover, we cannot provide any assurance that a material proportion of our revenues will be derived from other industries in the future.

The long and variable sales cycles for our products and services can cause our revenues and operating results to vary significantly from period to period and may adversely affect the trading price of our common stock.

Our revenues and operating results will vary significantly from quarter to quarter due to a number of factors, many of which are outside of our control and any of which may cause our stock price to fluctuate. A customer's decision to purchase our services and products involves a significant commitment of its resources and an extended evaluation. As a result, our sales cycle tends to be lengthy. We spend considerable time

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

and expense educating and providing information to prospective customers about features and applications of our services and products. Because our major customers operate large and complex networks, they usually expand their networks in large increments on a

- 26 -

Table of Contents

sporadic basis. The combination of these factors can cause our revenues and results of operations to vary significantly and unexpectedly from quarter to quarter.

A large part of the contract amount of our projects usually relates to hardware procurement. Since we recognize most of the revenues relating to hardware plus a portion of services and software revenues at the time of hardware delivery, the timing of hardware delivery can cause our quarterly gross revenues to fluctuate significantly. Due to the foregoing factors, we believe that quarter to quarter comparisons of our operating results are not a good indication of our future performance and should not be relied upon. It is likely that our operating results in some periods may be below the expectations of public market analysts and investors. In this event, the price of our common stock will probably decline, perhaps significantly more in percentage terms than any corresponding decline in our operating results.

Our working capital requirements may increase significantly.

We typically purchase hardware for our customers as part of our turn-key total solutions services. We generally require our customers to pay 80 to 90% of the invoice value of the hardware upon delivery. We typically place orders for hardware against back-to-back orders from customers and seek favorable payment terms from hardware vendors. This policy has historically minimized our working capital requirements. However, for certain large and strategically important projects, we have agreed to payment of less than 80 to 90% of the invoice value of the hardware upon delivery in order to maintain competitiveness. Wider adoption of less favorable payment terms or delays in hardware deliveries will require us to increase our working capital needs significantly.

We have sustained losses in prior years and may incur slower earnings growth, earnings declines or net losses in the future.

Although we had net income in 1998, 2001 and 2002, we sustained net losses in 1999, 2000 and 2003. There are no assurances that we can sustain profitability or avoid net losses in the future. We continue to expect that certain of our operating expenses will increase as our business grows. The level of these expenses will be largely based on anticipated organizational growth and revenue trends and a high percentage will be fixed. As a result, any delays in expanding sales volume and generating revenue could result in substantial operating losses.

Our high level of fixed costs, as well as increased competition in the software market, could result in reduced operating margins.

We maintain a relatively stable work force of software and network engineers engaged in all phases of planning and executing projects on behalf of our customers. As a result, our operating costs are relatively fixed from quarter to quarter, regardless of fluctuations in our revenues. In recent periods, this has resulted in our gross profit decreasing as a percentage of our net revenues. For example, during the second quarter of 2003 our revenues were impacted by the outbreak of SARS and our gross profit as a percentage of net revenue decreased to 56% as compared to 66% in the comparable period of 2002. Future fluctuations in our net revenues could result in similar decreases in our operating margins. In addition, enhanced competition in the software market and other markets in which we operate could result in reduced prices, which, together with our relatively fixed operating costs, could also result in reduced operating margins.

Business acquisitions we undertake may be challenging, and we may realize losses on our investments.

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

In February of 2002, as a key component of our business and growth strategy, we acquired Bonson, a leading provider of operation support system solutions in China. On December 4, 2003, we completed our acquisition of certain human resources management and business intelligence assets valued at approximately \$9 million from Pacific Software (China) Limited, a privately held, medium-sized software solutions company based in Hong Kong, and from its affiliate, New Century Pacific Software (Beijing) Limited, a wholly-foreign-owned enterprise based in Beijing, China. In the future, we may acquire other companies or assets that we feel will enhance our revenue growth, operations and profitability. Such acquisitions could result in the use of significant

- 27 -

Table of Contents

amounts of cash and dilutive issuances of our common stock. Such acquisitions involve other significant risks, including:

the difficulties of integrating, assimilating and managing the operations, technologies, intellectual property, products and personnel of the acquired business;

the diversion of management attention from other business concerns;

the additional expense associated with acquired contingent liabilities;

the loss of key employees in acquired businesses; and

the risk of being sued by terminated employees and contractors.

We will need to integrate and manage any businesses we determine to acquire in the future. Our failure to do so successfully could have a material adverse effect on our business, results of operations and financial condition.

Asset impairment reviews may result in future periodic write-downs.

Effective January 1, 2002, we adopted SFAS No. 142 which requires us, among other things, to review goodwill and intangible assets for impairment annually. In connection with our business acquisitions, we make assumptions regarding estimated future cash flows and other factors to determine the fair value of goodwill and intangible assets. In assessing the related useful lives of those assets, we have to make assumptions regarding their fair value, our recoverability of those assets and our ability to successfully develop and ultimately commercialize acquired technology. If those assumptions change in the future when we conduct our periodic reviews in accordance with applicable accounting standards, we may be required to record impairment charges.

We recorded a non-cash impairment charge of \$30.2 million as a result of an independent valuation during the first quarter of 2003 of the goodwill and acquired intangible assets mainly attributable to our acquisition of Bonson in February 2002. In December 2003 we recorded an impairment charge of US\$2.2 million related to our investment in Intrinsic. There is no assurance that future reviews will not result in further write-downs to goodwill and other intangible assets.

Severe acute respiratory syndrome may have an impact on our business.

The outbreak of Severe Acute Respiratory Syndrome, or SARS, is believed to have started in Guangdong Province, China in late 2002 and to have later spread to Beijing. The SARS outbreak impacted our second quarter revenues by disrupting travel throughout China and causing serious delays in service delivery to our customers. The outbreak also interrupted our collection efforts, causing accounts receivable and days sales outstanding to increase. Although the spread of SARS in China appears to have been contained and our business activities resumed normal operations throughout the third and fourth quarters of 2003, the medical community worldwide has not fully understood the origin of SARS and has not found a well-recognized effective treatment for SARS. As a consequence, the potential long-term effects of SARS on economic growth

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

in China are still unknown. Since January 5, 2004, a small number of new SARS cases have been reported in China. Any worsening of the SARS epidemic could have an adverse impact on our business.

We are highly dependent on our executive officers.

Each of our executive officers is responsible for an important segment of our operations. Although we believe that we have significant depth at all levels of management, the loss of any of our executive officers' services could be detrimental to our operations. We do not have, and do not plan to obtain, key man life insurance on any of our employees.

- 28 -

Table of Contents

We face a competitive labor market in China for skilled personnel and therefore are highly dependent on the skills and services of our existing key skilled personnel and our ability to hire additional skilled employees.

Competition for highly skilled software design, engineering and sales and marketing personnel is intense in China. Our failure to attract, assimilate or retain qualified personnel to fulfill our current or future needs could impair our growth. Competition for skilled personnel comes primarily from a wide range of foreign companies active in China, many of which have substantially greater resources than we have. Limitations on our ability to hire and train a sufficient number of personnel at all levels would limit our ability to undertake projects in the future and could cause us to lose market share.

We extend warranties to our customers that expose us to potential liabilities.

We customarily provide our customers with one to three year warranties, under which we agree to maintain installed systems at no additional cost to our customers. The maintenance services cover both hardware and our proprietary and third party software products. Although we seek to arrange back-to-back warranties with hardware and software vendors, we have the primary responsibility to maintain the installed hardware and software. Our contracts do not have disclaimers or limitations on liability for special, consequential and incidental damages, nor do we cap the amounts our customers can recover for damages. In addition, we do not currently maintain any insurance policy with respect to our exposure to warranty claims. The failure of our installed projects to operate properly could give rise to substantial liability for special, consequential or incidental damages, that in turn could materially and adversely affect us.

We sell our services on a fixed-price, fixed-time basis which exposes us to risks associated with cost overruns and delays.

We sell most of our services on a fixed-price, fixed-time basis. In contracts with our customers, we typically agree to pay late completion fines of up to 5% of the total contract value. In large scale telecommunications infrastructure projects, there are many factors beyond our control which could cause delays or cost overruns. In this event, we would be exposed to cost overruns and liable for late completion fines.

We may become less competitive if we are unable to develop or acquire new products, or enhancements to our existing products, that are marketable on a timely and cost-effective basis.

Our future operating results will depend, to a significant extent, upon our ability to enhance our existing products and services and to introduce new products and services to meet the requirements of our customers in a rapidly developing and evolving market. For example, we continually develop new services and software products for our customers in the telecommunications market. If we do not enhance our existing products and services or introduce new successful products and services in a timely manner, our products and services may become obsolete, and our revenues and operating results may suffer. Moreover, unexpected technical, operational, distribution or other problems could delay or prevent the introduction of any products or services that we may plan to introduce in the future. We cannot be sure that any of these products and services will achieve widespread market acceptance or generate incremental revenues.

Our proprietary rights may be inadequately protected and there is a risk of poor enforcement of intellectual property rights in China.

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

Our success and ability to compete depend substantially upon our intellectual property rights, which we protect through a combination of confidentiality arrangements and copyright and trademark registrations. We have registered some marks and filed trademark applications for other marks with the United States Patent and Trademark Office, the Trademark Bureau of the State Administration of Industry and Commerce in China and the Trade Marks Registry in Hong Kong. We have also registered copyrights with the State Copyright Bureau in China with respect to certain of our software products, although we have not applied for copyright protection elsewhere (including the United States). Despite these precautions, the legal regime protecting intellectual property rights in China is weak. Moreover, Bonson, which we acquired in February, 2002, had never registered copyrights for its software products prior to the acquisition. Because the Chinese legal system in general, and the intellectual property regime in particular, are relatively weak, it is often difficult to enforce

- 29 -

Table of Contents

intellectual property rights in China. In addition, there are other countries where effective copyright, trademark and trade secret protection may be unavailable or limited.

We do not own any patents and have not filed any patent applications, as we do not believe that the benefits of patent protection outweigh the costs of filing and updating patents for our software products. We enter into confidentiality agreements with most of our employees and consultants, and control access to, and distribution of, our documentation and other licensed information. Despite these precautions, it may be possible for a third party to copy or otherwise obtain and use our licensed services or technology without authorization, or to develop similar technology independently. Policing unauthorized use of our licensed technology is difficult and there can be no assurance that the steps we take will prevent misappropriation or infringement of our proprietary technology. In addition, litigation may be necessary to enforce our intellectual property rights, to protect our trade secrets or to determine the validity and scope of the proprietary rights of others, which could result in substantial costs and diversion of our resources.

A portion of our business involves the development and customization of software applications for customers. We generally retain significant ownership or rights to use and market such software for other customer projects, where possible. However, our customers sometimes retain co-ownership and rights to use the applications, processes, and intellectual property so developed. In some cases, we may have no right or only limited rights to reuse or provide these developments in projects involving other customers. To the extent that we are unable to negotiate contracts which permit us to reuse source-codes and methodologies, or to the extent that we have conflicts with our customers regarding our ability to do so, we may be unable to provide similar solutions to our other customers.

We are exposed to certain business and litigation risks with respect to technology rights held by third parties.

We currently license technology from third parties and intend to do so increasingly in the future as we introduce services that require new technology. There can be no assurance that these technology licenses will be available to us on commercially reasonable terms, if at all. Our inability to obtain any of these licenses could delay or compromise our ability to introduce new services. In addition, we may or may allegedly breach the technology rights of others and incur legal expenses and damages, which could be substantial.

Investors may not be able to enforce judgments by United States courts against certain of our officers and directors.

We are incorporated in the State of Delaware. However, a majority of our directors and executive officers, and certain of our principal shareholders, live outside of the United States, principally in Beijing and Hong Kong. As a result, you may not be able to:

effect service of process upon those persons within the United States; or

enforce against those persons judgments obtained in United States courts, including judgments relating to the federal securities laws of the United States.

We do not intend to pay and may be restricted from paying dividends on our common stock.

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

We have never declared or paid dividends on our capital stock and we do not intend to declare any dividends in the foreseeable future. We currently intend to retain future earnings to fund our growth. Furthermore, if we decide to pay dividends, foreign exchange and other regulations in China may restrict our ability to distribute retained earnings from China or convert those payments from Renminbi into foreign currencies.

- 30 -

Table of Contents

The fact that our business is conducted in both U.S. dollars and Renminbi may subject us to currency exchange rate risk due to fluctuations in the exchange rate between those two currencies.

Substantially all of our revenues, expenses and liabilities are denominated in either U.S. dollars or Renminbi. As a result, we are subject to the effects of exchange rate fluctuations between those currencies. Because of the unitary exchange rate system introduced in China on January 1, 1994, the official bank exchange rate for conversion of Renminbi to U.S. dollars experienced a devaluation of approximately 50%. We report our financial results in U.S. dollars, therefore, any future devaluation of the Renminbi against the U.S. dollar may have an adverse effect on our reported net income. Substantially all our revenues and expenses relating to hardware sales are denominated in U.S. dollars, and substantially all our revenues and expenses relating to the software and services component of our business are denominated in Renminbi. The value of our shares may be affected by the foreign exchange rate between the U.S. dollar and the Renminbi because the value of our business is effectively denominated in Renminbi, while our shares are traded in U.S. dollars. Furthermore, an increase in the value of the Renminbi may require us to exchange more U.S. dollars into Renminbi to meet the working capital requirements of our subsidiaries in China. Depreciation of the value of the U.S. dollar will also reduce the value of the cash we hold in U.S. dollars, which we may use for purposes of future acquisitions or other business expansion.

The markets in which we sell our services and products are competitive and we may not be able to compete effectively.

Our main domestic competitors in China are Digital China, Linkage, Neusoft, and Wholewise. Our international competitors include multinational companies such as IBM Global Services, HP Services, Oracle, Sibel, Convergys and SAP, who are establishing more active presences in the IT services market for China's telecommunications industry. In addition, top international consulting companies such as PricewaterhouseCoopers, Deloitte Touche Tohmatsu, Ernst & Young, Accenture, and KPMG, have also entered China's IT services market.

In the human resources management and business intelligence software sector, our competitors include large international information technology companies such as SAP, Oracle, IBM and PeopleSoft, as well as domestic players such as UFSOFT.

Our competitors, some of whom have greater financial, technical and human resources than we have, may be able to respond more quickly to new and emerging technologies and changes in customer requirements or devote greater resources to the development, promotion and sale of new products or services. It is possible that competition in the form of new competitors or alliances, joint ventures or consolidation among existing competitors may decrease our market share. Increased competition could result in lower personnel utilization rates, billing rate reductions, fewer customer engagements, reduced gross margins and loss of market share, any one of which could materially and adversely affect our profits and overall financial condition.

Political and economic policies of the Chinese government could affect our industry in general and our competitive position in particular.

Since the establishment of the People's Republic of China in 1949, the Communist Party has been the governing political party in China. The highest bodies of leadership are the Politburo of the Communist Party, the Central Committee and the National People's Congress. The State Council, which is the highest institution of government administration, reports to the National People's Congress and has under its supervision various commissions, agencies and ministries, including The Ministry of Information Industry, the telecommunications regulatory body of the Chinese government. Since the late 1970s, the Chinese government has been reforming the Chinese economic system. Although we believe that economic reform and the macroeconomic measures adopted by the Chinese government have had and will continue to have a positive effect on economic development in China, there can be no assurance that the economic reform strategy will not from time to time be modified or revised. Such modifications or revisions, if any, could have a material adverse effect on the overall economic growth of China and investment in the

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

Internet and the telecommunications industry in China. Such developments could reduce, perhaps significantly, the demand for our products and services. Furthermore, changes in political, economic and social conditions in China, adjustments in policies of the Chinese government or changes in laws and regulations

- 31 -

Table of Contents

could adversely affect our industry in general and our competitive position in particular.

High technology and emerging market shares have historically experienced extreme volatility and may subject you to losses.

The trading price of our shares may be subject to significant market volatility due to investor perceptions of investments relating to China and Asia, as well as developments in the telecommunications industry. In addition, the high technology sector of the stock market frequently experiences extreme price and volume fluctuations, which have particularly affected the market prices of many software companies and which have often been unrelated to the operating performance of those companies.

If our stock price is volatile, we may become subject to securities litigation, which is expensive and could result in a diversion of resources.

In the past, following periods of volatility in the market price of a particular company's securities, securities class action litigation has often been brought against that company. Many companies in our industry have been subject to this type of litigation in the past, and we are currently involved in this type of litigation as a result of allegedly improper allocation procedures relating to the sale of our common stock in connection with our initial public offering in March of 2000. For more information on that litigation, please see the discussion under the heading "Item 1. Legal Proceedings" in Part II of this report. Litigation is often expensive and diverts management's attention and resources, which could materially and adversely affect our business.

Future sales of shares by existing shareholders could cause the market price of our common stock to fall.

If our stockholders sell substantial amounts of our common stock in the public market, including shares issued upon the exercise of outstanding options, the market price of our common stock could fall. Such sales also might make it more difficult for us to sell equity or equity-related securities in the future at a time and price that we deem appropriate.

A small number of shareholders controls us.

A small number of shareholders, including Warburg-Pincus Ventures, and their affiliates, as well as Edward Tian, one of our directors, James Ding, our Chairman, and several of our other directors and officers control approximately 50% of our voting stock. As a result, these shareholders collectively are able to control all matters requiring shareholder approval, including election of directors and approval of significant corporate transactions, such as a sale of our assets and the terms of future equity financings. The combined voting power of our large shareholders could have the effect of delaying or preventing a change in control.

We are subject to anti-takeover provisions that could prevent a change of control and prevent our shareholders from realizing a premium on their common stock.

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

Our board of directors has the authority to issue up to 10,000,000 shares of our preferred stock. Without any further vote or action on the part of our stockholders, the board of directors has the authority to determine the price, rights, preferences, privileges and restrictions of the preferred stock. This preferred stock, if it is ever issued, may have preference over and harm the rights of the holders of our common stock. Although the issuance of this preferred stock will provide us with flexibility in connection with possible acquisitions and other corporate purposes, such an issuance may make it more difficult for a third party to acquire a majority of our outstanding voting stock.

We currently have authorized the size of our board of directors to be not less than three nor more than nine directors. The terms of the office of the nine-member board of directors have been divided into three classes: Class I, whose term will expire at the annual meeting of the stockholders to be held in 2006; Class II, whose term will expire at the annual meeting of stockholders to be held in 2007; and Class III, whose term

Table of Contents

will expire at the annual meeting of stockholders to be held in 2005. This classification of the board of directors may have the effect of delaying or preventing changes in our control or management.

We are subject to the provisions of Section 203 of the Delaware General Corporation Law. In general, the statute prohibits a publicly-held Delaware corporation from engaging in a business combination with an interested stockholder for a period of three years after the date when the person became an interested stockholder unless, subject to exceptions, the business combination or the transaction in which the person became an interested stockholder is approved in a prescribed manner. Generally, a business combination includes a merger, asset or stock sale, or other transaction resulting in a financial benefit to the stockholder; and an interested stockholder includes any person that is the owner of 15% or more of our outstanding voting stock or is an affiliate or associate of ours.

Our change of control severance agreements with executive officers may discourage a change of control.

Recently we have entered into change of control severance agreements with several of our executive officers. These agreements provide, among other things, that the executive officers would be entitled to various benefits upon the occurrence of either a covered termination (as defined therein) or a change of control (as defined therein), including payment of one year of base salary and bonus, immediate vesting of 50% of any outstanding unvested stock options held by the executive officer and provisions of medical benefits and housing allowance. The potential obligations to pay the executive officers the above amounts may discourage a potential acquiror from effecting a change of control.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to interest-rate risk primarily associated with our cash, short-term investments and short-term bank loans. To date, we have not entered into any types of derivatives to hedge against interest-rate changes.

We are exposed to exchange rate risk in connection with the relative value of the U.S. dollar and the Renminbi. Substantially all of our revenues and expenses relating to hardware sales are denominated in U.S. dollars, and substantially all of our revenues and expenses relating to the service and software components of our business are denominated in Renminbi. We maintain a significant portion of our cash deposits in U.S. dollars to avoid currency risk related to Renminbi. A portion of these U.S. dollar deposits are used to collateralize Renminbi denominated loans from Chinese banks.

The value of our shares will be affected by the foreign exchange rate between U.S. dollars and Renminbi because the value of our business is effectively denominated in Renminbi, while our shares are traded in U.S. dollars. Furthermore, an increase in the value of the Renminbi may require us to exchange more U.S. dollars into Renminbi to meet the working capital requirements of our subsidiaries in China. Depreciation of the value of the U.S. dollar will also reduce the value of the cash we hold in U.S. dollars, which we may use for purposes of future acquisitions or business expansion. We actively monitor our exposure to these risks and adjust our cash position in the Renminbi and the U.S. dollar when we believe such adjustments will reduce our foreign exchange risk. For example, in February 2004 we exchanged approximately \$28 million cash in U.S. dollar into Renminbi.

There have been no significant changes in our exposure to changes in either interest rates or foreign currency exchange rates for the quarter ended March 31, 2004. Our exposure to interest rates is limited as we do not have variable rate and long-term borrowings. We are subject to variable interest rates on our bank deposits that are short-term investments. As there are no significant market price movements, such investments are held at cost. As of March 31, 2004, a hypothetical 10% immediate increase or decrease in interest rates would increase our

Edgar Filing: ASIAINFO HOLDINGS INC - Form 10-Q

annual interest expense by approximately \$24 or decrease our annual interest income by approximately \$35,179, respectively.

ITEM 4. Controls and Procedures

Within 90 days prior to the filing date of this quarterly report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-14 under the Securities Exchange Act of 1934, as amended. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective. There were no significant changes in our internal controls or in other factors that could significantly affect those controls subsequent to the date of our evaluation.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

On December 4, 2001, a securities class action case was filed in New York City against us, certain of our officers and directors and the underwriters of our initial public offering, or IPO. The lawsuit alleged violations of the federal securities laws and was docketed in the United States District Court for the Southern District of New York as *Hassan v. AsiaInfo Holdings, Inc., et al.* The lawsuit alleged, among other things, that the underwriters of our IPO improperly required their customers to pay the underwriters excessive commissions and to agree to buy additional shares of our common stock in the aftermarket as conditions to their purchasing shares in our IPO. The lawsuit further claimed that these supposed practices of the underwriters should have been disclosed in our IPO prospectus and registration statement. The suit seeks rescission of the plaintiffs' alleged purchases of our common stock as well as unspecified damages. In addition to the case against us, various other plaintiffs have filed approximately 1,000 other, substantially similar class action cases against approximately 300 other publicly traded companies and their IPO underwriters in New York City, which along with the case against us have all been transferred to a single federal district judge for purposes of case management. On July 15, 2002, together with the other issuer defendants, we filed a collective motion to dismiss the consolidated, amended complaints against the issuers on various legal grounds common to all or most of the issuer defendants. The underwriters also filed separate motions to dismiss the claims against them. On October 9, 2002, the court dismissed without prejudice all claims against the individual defendants in the litigation. The dismissals were based on stipulations signed by those defendants and the plaintiffs' representatives. On February 19, 2003, the court issued its ruling on the motions to dismiss filed by the underwriter and issuer defendants. In that ruling the court granted in part and denied in part those motions. As to the claims brought against us under the anti-fraud provisions of the securities laws, the court dismissed all such claims without prejudice. As to the claims brought under the registration provisions of the securities laws, which do not require that intent to defraud be pleaded, the court denied the motion to dismiss such claims as to us and as to substantially all of the other issuer defendants. The court also denied the underwriter defendants' motion to dismiss in all respects.

In June 2003, based on a decision made by a special independent committee of our board of directors, we elected to participate in a proposed settlement agreement with the plaintiffs in this litigation. If ultimately approved by the court, this proposed settlement would result in a dismissal, with prejudice, of all claims in the litigation against us and against any of the other issuer defendants who elect to participate in the proposed settlement, together with the current or former officers and directors of participating issuers who were named as individual defendants. The proposed settlement does not provide for the resolution of any claims against the underwriter defendants, and the litigation against those defendants is continuing. The proposed settlement provides that the class members in the class action cases brought against the participating issuer defendants will be guaranteed a recovery of \$1 billion by insurers of the participating issuer defendants. If recoveries totaling \$1 billion or more are obtained by the class members from the underwriter defendants, however, the monetary obligations to the class members under the proposed settlement will be satisfied. In addition, all participating issuer defendants will be required to assign to the class members certain claims that we may have against the underwriters.

Table of Contents

The proposed settlement contemplates that any amounts necessary to fund the settlement or settlement-related expenses would come from participating issuers' directors and officers liability insurance policy proceeds as opposed to funds of the participating issuer defendants themselves. A participating issuer defendant could be required to contribute to the costs of the settlement if that issuer's insurance coverage were insufficient to pay that issuer's allocable share of the settlement costs. We expect that our insurance proceeds will be sufficient for these purposes and that we will not otherwise be required to contribute to the proposed settlement. Consummation of the proposed settlement is conditioned upon, among other things, negotiating, executing, and filing with the court final settlement documents, and final approval by the court. If the proposed settlement described above is not consummated, we intend to continue to defend the litigation vigorously. Moreover, if the proposed settlement is not consummated, we believe that the underwriters may have an obligation to indemnify us for the legal fees and other costs of defending this suit and that our directors' and officers' liability insurance policies would also cover the defense and potential exposure in the suit. While we cannot guarantee the outcome of these proceedings, we believe that the final result of these actions will have no material effect on our consolidated financial condition, results of operations or cash flows.

ITEM 2. Changes in Securities, Use of Proceeds and Issuer Purchases of Equity Securities

On March 2, 2000, our Registration Statement on Form S-1 covering the offering of 5,000,000 shares of our common stock (No.333-93199) was declared effective. The underwriters in the offering exercised an over-allotment option to purchase an additional 750,000 shares of our common stock. The total price to the public for the shares offered and sold was \$138,000,000. The net proceeds of the offering (after deducting expenses) was approximately \$126,610,000. The net proceeds have been used for general corporate purposes, including working capital, and expenses such as research and development and sales and marketing, as well as acquisition or investment in complementary businesses or products. The remaining net proceeds from the offering have been invested in cash, cash equivalents, and short-term investments. The use of the proceeds from the offering does not represent a material change in the use of proceeds described in the prospectus contained in the Registration Statement on Form S-1 described above. None of the net proceeds of the offering have been paid directly or indirectly to our directors, officers or their associates, to persons owning ten percent or more of our common stock, or to our affiliates.

ITEM 4. Submission of Matters to a Vote of Security Holders***Annual Meeting of Stockholders***

We held our Annual Meeting of Shareholders on April 19, 2004. For more information on the following proposals, please refer to our definitive proxy statement dated March 15, 2004, the relevant portions of which are incorporated herein by reference.

(1) Our shareholders elected each of the three nominees to our Board of Directors for a three-year term:

<u>DIRECTOR</u>	<u>FOR</u>	<u>WITHHELD</u>
Xingsheng Zhang	35,526,352	1,828,983
Ying Wu	36,754,790	600,545
Tao Long	36,647,577	707,758

(2) Our shareholders ratified the appointment of Deloitte Touche Tohmatsu as our independent auditors:
