New Century Announces June Monthly Loan Production of \$4.9 Billion

New Century Increases its 2004 Annual Production Guidance from \$36 Billion to \$40 Billion

Irvine, Calif., July 8, 2004, New Century Financial Corporation (Nasdaq: NCEN), one of the nation's largest mortgage finance companies, announced today loan production volume for June 2004 of \$4.9 billion, which reflects a 135 percent increase over the same period last year.

* Changed from \$4.2 billion due to rounding

June's production of \$4.9 billion and second quarter production of \$12.3 billion crowned the best monthly and quarterly production results in our company's history, said Robert K. Cole, chairman of the board and chief executive officer. The considerable increase in our second quarter's production was primarily the result of the quarter's changing rate environment which caused many brokers and borrowers who were not protected by rate lock agreements from traditional lenders to seek financing from alternative sources. This created an opportunity for our company to add an incremental volume of high FICO score product to our core base of production.

In addition, with loan production totaling \$20.7 billion for the six months ended June 30, 2004, we expect a normalized pace of production in the third and fourth quarters this year ranging from approximately \$10 billion to \$12 billion per quarter. We are therefore raising our 2004 annual production guidance to \$40 billion reflecting the lower range given the changing interest rate environment.

We also remain on track to achieve our 2004 earnings per share guidance range of \$7.50 to \$8.00, added Cole.
