NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2005

(Unaudited)

1. Basis of Presentation

The information at June 30, 2005 and for the three-month periods ended June 30, 2005 and 2004, is unaudited, but include all adjustments (consisting of normal recurring adjustments) which the Company's management believes to be necessary for the fair presentation of the financial position, results of operations and cash flows for the periods presented. Interim results are not necessarily indicative of results for a full year.

The accompanying financial statements should be read in conjunction with the Company's audited financial statements for the year ended March 31, 2005, which are included in the annual report on Form 10-K filed by the Company with the Securities and Exchange Commission.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates under different assumptions or conditions.

Stock-based compensation

The Company has generally granted stock options to employees for a fixed number of shares with an exercise price equal to the fair market value of the stock on the date of the grant. As permitted under Statement of Financial Accounting Standard No. 123, Accounting for Stock-Based Compensation (FAS 123) and Statement of Financial Accounting Standard No. 148, Accounting for Stock-Based Compensation Transition and Disclosure (FAS 148), we have elected to follow the intrinsic value method of accounting as defined by Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB 25) and related interpretations in accounting for stock awards to employees. Accordingly, no compensation expense is recognized in the financial statements in connection with employee stock option awards where the exercise price of the award is equal to the fair market value of the stock at the date of the award. When stock options are granted with an exercise price that is lower than the fair market value of the stock on the date of grant, the difference is recorded as deferred compensation and amortized to expense on a graded basis over the vesting term of the options.

As required by FAS 148, the following table illustrates the effect on net loss and loss per share if we had accounted for our stock option and stock purchase plans under the fair value method of accounting (in thousands, except per share amounts):

	Three Months Ended June 30,	
	2005	2004
Net loss:		
As reported	\$ (208)	\$ (268)
Less: Total stock-based employee compensation expense under the fair value based methods for all awards, net of related tax effects	1	1
Pro forma net loss	\$ (209)	\$ (269)
Pro forma basic and diluted net loss per share	\$ (0.02)	\$ (0.02)

Table of Contents**2. Net Loss Per Share**

Basic net loss per share and diluted net loss per share is computed by dividing net loss by the weighted average number of common shares outstanding during the period. At June 30, 2005 and 2004, options for 150,666 shares at exercise prices ranging from \$1.27 to \$7.50 were outstanding and were excluded from the loss per share calculator as their effects would have been antidilutive.

The following table sets forth the computation of basic and diluted net loss per share (in thousands, except per share amounts):

	Three Months ended June 30,	
	2005	2004
Net loss	\$ (208)	\$ (268)
Weighted average number of common shares outstanding	11,634	11,634
Basic and diluted net loss per share	\$ (0.02)	\$ (0.02)

3. Taxes

The Company recorded no tax benefit for the three-months ended June 30, 2005 and 2004. The Company's effective tax rate differed from the federal statutory rate in the first three-month periods ended June 30, 2005 and 2004 due to the uncertainty of the Company returning to profitability.

Table of Contents

The Company's common stock is currently being listed and traded on the bulletin board.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Information set forth in this report constitutes and includes forward looking information made within the meaning of Section 27A of the Security Act of 1933, as amended and Section 21E of the Securities and Exchange Act of 1934, as amended, that involve risks and uncertainties. The Company's actual results may differ significantly from the results discussed in the forward looking statements as a result of a number of factors, including the Company's ongoing efforts to enforce its intellectual property rights including its current litigation efforts, the willingness of the parties it believes are infringing its patents to settle its claims against them, the amount of litigation costs the Company must incur in pursuing its patent infringement claims, the degree to which technology subject to the Company's intellectual property rights is used by other companies in the personal computer and semiconductor industries and our ability to obtain license revenues from them, changes in intellectual property law in such industries and in general and other matters. Readers are encouraged to refer to "Factors Affecting Earnings and Stock Price".

OPTi was founded in 1989 as an independent supplier of semiconductor products to the personal computer market. During fiscal 2003, the Company sold its product fabrication, distribution and sales operations to Opti Technologies, Inc., an unrelated third party. As a result of this transaction all future revenues for the Company are expected to be generated through royalties or from the licensing of the Company's intellectual property. The Company received approximately \$52,000 of royalties during the first quarter of fiscal 2005 from Opti Technologies, Inc. and does not expect to receive additional significant revenue other than through the pursuit of its patent infringement cases and associated licensing efforts.

The Company's current strategy is to pursue licensing opportunities as a means of resolving potential infringement of its proprietary intellectual property in the core logic area. During the first quarter of fiscal year 2000, the Company entered into a one-time licensing arrangement for \$13,311,000 on the core logic technology that the Company had developed during its existence. During the first quarter of fiscal year 2004, the Company also entered into a one-time license arrangement for \$425,000 on its patented technology. The Company believes that there may be additional companies that may be infringing its patents. The Company is actively working to explore all possible arrangements to settle such infringement. Although the Company continues to pursue license revenues related to the unauthorized use of its intellectual property, there can be no assurance whether or when revenues will result from the pursuit of such claims.

On October 19, 2004, the Company announced that it has filed a complaint against nVidia Corporation ("nVidia"), in the Eastern District of Texas, for infringement of five U.S. patents relating to its "Predictive Snooping" and "Compact ISA" chipset technology. See *Item 1 Legal Proceedings* below. The "Markman" hearing pursuant to which the court will interpret OPTi's patent claims in light of its complaint against nVidia is currently scheduled to commence on or about March 2006. Note, however, that court dates are often subject to delay. The nVidia case itself is an important part of the Company's strategy for pursuing its patent infringement claims and its outcome will have a significant effect on the Company's ability to realize ongoing licensing revenue through its intellectual property licensing efforts.

Table of Contents

Critical Accounting Policies

Our critical accounting policies, which incorporate our more significant judgments and estimates used in the preparation of our Condensed Consolidated Financial Statements, are the same as those described in Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended March 31, 2005.

The preparation of financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reported periods. We base our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances, the results of which form our basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from those estimates under different assumptions or conditions.

Fiscal 2006 Compared to 2005

Revenues

The Company had no revenue for the three-month period ending June 30, 2005 as compared to net revenue of \$52,000 for the quarter ended June 30, 2004. This decrease in net sales was attributable to decreased license revenue from Opti Technology, who reached the maximum licensing revenue of \$1.5 million during the first quarter of fiscal year 2005. No further revenue is expected from Opti Technologies, Inc. and the Company's future revenues depend on the success of our strategy of pursuing license claims on our intellectual property position.

Gross Margin

Gross margin for the quarter ended June 30, 2004 was 100%. This gross margin is attributable to the Company's net revenues coming entirely from license revenue, which had no associated costs.

Selling, General and Administrative

Selling, general and administrative expenses for the quarter ended June 30, 2005 were \$305,000 as compared to \$348,000 for the quarter ended June 30, 2004. This decrease was primarily related to a decrease in legal expenses during the quarter ended June 30, 2005 as compared to the prior period. The Company anticipates that SG&A expenses will increase in fiscal 2006, as it spends more on legal fees in pursuit of licensing its intellectual property.

Interest Income

Edgar Filing: OPTI INC - Form 10-Q

Interest income for the three-month period ending June 30, 2005 was \$97,000 as compared to \$28,000 for the three-months ended June 30, 2004. The increase in interest income in the quarter ended June 30, 2005 as compared to the quarter ended June 30, 2004 was due to an increase in interest income due to higher interest rates during the period.

Table of Contents

Income Taxes

The Company recorded no tax benefits for the three-months ended June 30, 2005 and 2004. The Company's effective tax rate differed from the federal statutory rate in the first three-month periods ended June 30, 2005 and 2004 due to the uncertainty of the Company returning to profitability.

Liquidity and Capital Resources

Cash and cash equivalents decreased to \$14,159,000 at June 30, 2005 from \$14,457,000 at March 31, 2005. The decrease in cash and cash equivalents of approximately \$0.3 million from March 31, 2005 to June 30, 2005, primarily relates to the net loss for the period, a decrease in accounts payable and an increase in prepaid expenses. Working capital as of June 30, 2005 decreased to \$14,070,000 from \$14,391,000 at March 31, 2005. During the first three-months of fiscal 2006, operating activities used \$0.3 million of cash. Cash used from operating activities was primarily due to the net loss of \$208,000 during the period, a decrease of \$69,000 in accounts payable and in an increase of \$59,000 in prepaid expenses. The Company had minimal investing activities and no financing activities during the three-month period ended June 30, 2005.

As of June 30, 2005, the Company's principal sources of liquidity included cash and cash equivalents of approximately \$14.2 million and working capital of approximately \$14.1 million. The Company believes that the existing sources of liquidity will satisfy the Company's projected working capital and other cash requirements through at least the next twelve months.

The Company's current building lease agreement is scheduled to end on April 30, 2007. The total remaining commitment under the amended lease at June 30, 2005 is approximately \$111,000.

Factors Affecting Earnings and Stock Price

Trading of OPTi Common Stock on the OTC Bulletin Board

On May 24, 2004, the Company received notice from NASDAQ that pursuant to the April 1, 2004 oral hearing before the NASDAQ listing Qualification Panel, a determination had been made in the matter of the Company and its request for continued inclusion on the NASDAQ National Market.

After a review of the entire record the qualification panel concluded that the Company was a public shell. The panel was of the opinion that the pursuit of patent infringement claims did not constitute active and sustainable business operations. Based on the foregoing, the Panel determined that, in order to preserve and strengthen the quality of and the public confidence in the NASDAQ Stock Market, and in order to protect the integrity of The National Stock Market, prospective investors and the public interest, the Company's securities should be delisted from The NASDAQ Stock Market. The delisting became effective with the opening of business on May 26, 2004.

Edgar Filing: OPTI INC - Form 10-Q

Our common stock is currently traded over-OTC Bulletin Board. Some investors may be less likely to invest in stocks that are not traded on recognized national markets and listing services such as NASDAQ. Therefore, investors in our common stock may experience reduced liquidity when attempting to trade shares of our common stock.

Dependence on Intellectual Property Position

The success of the Company's current strategy of resolving potential infringement of its patented core logic technology can be affected by new developments in intellectual property law generally and with respect to semiconductor patents in particular and upon the Company's success in defending its patent position. It is difficult to predict developments and changes in intellectual property law. However, such changes could have an adverse impact on the Company's ability to pursue infringement claims on its previously developed technology.

Table of Contents

Uncertain Revenue Stream

Royalty payments from Opti Technologies, Inc., an unrelated third party to whom the Company sold rights to its product lines in September 2002 were completed during the first quarter of 2005 when OPTi received the remaining \$52,000 of revenue from the agreement. No further revenue is expected from Opti Technologies, Inc. and the Company's future revenues, if any, depend on the success of our strategy of pursuing license claims to our intellectual property position.

Although the Company has commenced legal action and continues to pursue license revenues relating to the unauthorized use of its intellectual property, there can be no assurances whether or when revenues will result from the pursuit of such claims.

In addition, the Company's focus on pursuing claims related to its intellectual property position can result in one time payments that may increase revenues during a single fiscal period but may not be repeated in future periods. For example, in the fiscal quarter ended June 30, 2003, the Company reached a settlement of certain claims and counterclaims with National Semiconductor that included, among other things, a one time cash payment to the Company. Under the terms of the settlement, the Company will not receive future payments from National Semiconductor. Consequently, settlements of these claims will cause our operating results to fluctuate from period to period and revenues that we may receive from such a settlement should not be viewed as indicative of future trends in our operating results.

Outcome of nVidia Legal Action

On October 19, 2004, the Company announced that it had filed a complaint against nVidia, in the Eastern District of Texas, for infringement of five U.S. patents relating to its Predictive Snooping and Compact ISA chipset technology. See *Item 1 Legal Proceedings* below. The Markman hearing pursuant to which the court will interpret OPTi's patent claims in light of its complaint against nVidia is currently scheduled to commence on or about March 2006. The nVidia action itself is an important part of the Company's strategy for pursuing its patent infringement claims relating to its Predictive Snooping technology. Consequently, the outcome of the Markman hearing and that of the nVidia case itself is an important part of the Company's strategy for pursuing its patent infringement claims and the Company's ability to realize licensing revenue from its Predictive Snoop patents will be severely impaired if the litigation is not successful.

Fluctuations in Operating Results

The Company has experienced significant fluctuations in its operating results in the past and expects that it will experience such fluctuations in the future. In the past, these fluctuations have been caused by a variety of factors including increased competition, price competition, changes in customer demand, ability to continue to sale existing products, inventory adjustments, changes in the availability of foundry capacity, changes in the mix of products sold and litigation expenses. In the future, the Company's operating results will largely be dependent on its ability to generate revenue from its pursuit of license and patent infringement claims.

Table of Contents

Limited Trading Volume

Daily trading volume in our shares has varied from zero to over one million shares during the last two years. Therefore, investors in our stock may find liquidity in our shares to be limited and difficult to predict.

Possible Volatility of Stock Price

There can be no assurances as to the Company's operating results in any given period. The Company expects that the trading price of its common stock will continue to be subject to significant volatility.

Item 3. Quantitative and Qualitative Disclosure About Market Risk

Interest Rate Sensitivity

We maintain our cash and cash equivalents primarily in money market funds. We do not have any derivative financial instruments. As of June 30, 2005, all of our investments mature in less than thirty days. Accordingly, we do not believe that our investments have significant exposure to interest rate risk.

Item 4. Controls and Procedures

- (a) We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to exchange Act Rules 13a-14 and 13a-15 as of the end of the Company's fiscal year ended June 30, 2005. Based upon that evaluation, our Chief Executive Officer along with our Chief Financial Officer concluded that our disclosure controls and procedures are effective at the reasonable assurance level.
- (b) There have been no significant changes (including corrective actions with regard to significant deficiencies or material weaknesses) in our internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation referenced in paragraph (a) above.

We intend to review and evaluate the design and effectiveness of our disclosure controls and procedures on an ongoing basis and to improve our controls and procedures over time and to correct any deficiencies that we may discover in the future. Our goal is to ensure that our senior management has timely access to all material financial and non-financial information concerning our business. While we believe the present design of our disclosure controls and procedures is effective to achieve our goal, future events affecting our business may cause us to significantly modify our disclosure controls and procedures.

Table of Contents

OPTi Inc.

Part II. Other Information

Item 1. Legal Proceedings

On October 19, 2004, the Company announced that it has filed a complaint against nVidia Corporation (nVidia), in the Eastern District of Texas, for infringement of five U.S. patents. The five patents at issue in the lawsuit are U.S. patent No. 5,710,906, U.S. patent No. 5,813,036, U.S. patent No. 6,405,291, all entitled Predictive Snooping of Cache Memory for Master-Initiated Accesess , U.S. patent No. 5,944,807 and U.S. patent No. 6,098,141, both entitled Compact ISA-Bus Interface. The complaint alleges that nVidia infringes the patents by making, selling, and offering for sale products based on and incorporating Predictive Snooping technology and the Low Pin Count Interface Specification in various of its products and inducing and contributing to the infringement of the patents by others. OPTi has requested a jury trial in this matter. The Company in its case against nVidia is seeking damages or other monetary relief, including pre-judgment interest and awarding OPTi s attorney fees. The Markman hearing pursuant to which the court will interpret OPTi s patent claims in light of its complaint against nVidia is currently scheduled to commence on or about March 2006.

The Company from time to time has been notified of claims that it may be infringing patents, maskwork rights, or copyrights owned by third parties. There can be no assurance that the Company will not become involved in litigation regarding the alleged infringements by the Company of third party intellectual property rights.

Item 2. Unregistered Sale of Equity Securities and Use of Proceeds

Not applicable and has been omitted.

Item 3. Defaults Upon Senior Securities

Not applicable and has been omitted.

Item 4. Submission of Matters to a Vote of Shareholders

Not applicable and has been omitted.

Item 5. Other Information

Item 6. Exhibits

31.1 and 31.2 Certification of the Chief Executive Officer and Chief Financial Officer in accordance with 8 U.S. 1350, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 and 32.2 Certification of Chief Executive Officer and Chief Financial Officer in accordance with rule 15d-14, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002.
