**Honda acquires all shares in BARH Ltd.**

Tokyo, Japan. October 4, 2005 Honda Motor Co., Ltd. today announced that Honda has agreed to purchase all shares in BARH Ltd. Honda currently owns 45% of the equity in BARH Ltd., and will complete the purchase of the remaining shares by the end of 2005.

From the 2006 season, Honda will therefore participate in the Formula One World Championship Series with its own team, with the aim of winning the World Championship.

The F1 team will continue to be based in Brackley, Northamptonshire, UK, and work in cooperation with Honda Racing Development Ltd., located in Bracknell, Berkshire, UK.

In 2000, Honda signed an engine supply and joint chassis development contract with B.A.R, marking the start of Honda's third participation in the Formula One World Championship. In December 2001, the agreement was extended for 3 years, with provisions for the strengthening of the joint chassis development programme. Further strengthening of the structure for development came with another extension of the contract (through the end of the 2007 season) in July 2004, and Honda's purchase in January 2005 of 45% of the shares of BARH Ltd.

Editor's note: BARH Ltd. is the holding company of B.A.R Honda GP Ltd, which operates the BAR Honda F1 team. Its shares are currently owned jointly by British American Tobacco (55%) and Honda (45%).

n Comment from Hiroshi Oshima, Operating Officer, Corporate Communications and Motor Sports, Honda Motor Co., Ltd.:

After discussing Honda's future F1 participation, we have decided that Honda should own 100% of the team. We greatly appreciate the partnership of BAT, which has managed the team with us until now, and we wish BAT the best of luck in its future endeavors. From next season, we will be even more energetic in our F1 activities, working hard as a team in order to improve our technology, develop our young engineers and achieve our goal of winning the World Championship. We look forward to your continued support.

**Honda Announces Automobiles and Motorcycles to be  
Displayed at the 39th Tokyo Motor Show**

October 5, 2005 Honda Motor Co., Ltd. today announced the lineup of vehicles to be displayed at the 39th Tokyo Motor Show (sponsored by the Japan Automobile Manufacturers Association), to be held from Saturday, October 22 to Sunday, November 6, 2005, at Makuhari Messe in Chiba, Japan.

The theme for Honda's automotive exhibition at this year's Motor Show is "feel FINE!", which expresses our commitment to creating new value and offering customers exciting new automobiles that exceed all expectations and deliver a unique sense of exhilaration. The theme for the company's motorcycle exhibition is "Dream Wings", which captures Honda's vision of a motorcycling lifestyle based on a new set of values, and a desire to help people pursue their dreams. Honda's automobile and motorcycle displays will feature intriguing concept vehicles, advanced technologies and environmental initiatives in a manner that is clear and easy to understand.

E4-01

SPORTS4 CONCEPT

FCX CONCEPT

NP6-D

**Table of Contents**

**Passenger Car Display: 23 vehicle types, 25 vehicles**

Honda proudly presents FINE! automobiles. Honda's automobile display is dedicated to Honda free thinking, intelligent, advanced technology and exciting new designs. It features concept vehicles full of individuality and fresh ideas; the new Civic and new Civic Hybrid; and a range of other Honda vehicles, all of which express the company's commitment to FINE TECHNOLOGY and FINE TIMES superior automobiles that anyone can enjoy driving. In addition, the display will highlight Honda's unique advanced safety technologies and power trains that combine environmental-friendliness with superior driving performance.

The Concept Vehicle Zone will showcase some FINE! Honda cars of the future, including concept vehicles like the next-generation, 4-door Sports 4 Concept, designed to make sure everyone in the vehicle shares the exhilaration of the drive; the W.O.W Concept, which offers a more enjoyable, dog-friendly mobile lifestyle; and the FCX Concept, a next-generation premium fuel-cell sedan featuring advanced intelligent technologies, a low-floor, low-center-of-gravity platform and a full-sized cabin.

The Civic Zone will present the all-new eighth generation Civic and new Civic Hybrid, accompanied by a technology display that provides a compelling, close-up look at Honda's newly-developed, next-generation intelligent power trains.

The Advanced Technology Zone will feature an easy-to-understand presentation of Honda's unique SH-AWD (Super Handling All-Wheel-Drive) System for the Legend, including video and an actual vehicle display. Also featured are advanced safety technologies such as Intelligent Night Vision System, and the innovative CMS (Collision Mitigation Brake System).

The Motor Sports Zone will provide a rare close-up look at Honda's F1 and IndyCar® Series racers, and also features the soon-to-be-released new S2000 production vehicle, equipped with even more advanced features than ever before.

The Special Needs Vehicle Zone will feature the STEP WGN side lift-up seat vehicle, the Fit equipped with Honda's Franz System, and a vehicle equipped with Honda's Techmatic driving assistance system, among other customized Honda vehicles.

**Table of Contents**

**Motorcycle Display : 38 vehicle types, 52 vehicles**

Honda's Dream Wings motorcycle exhibit will express the company's desire to create new value and provide enhanced riding pleasure, sharing its dreams with people everywhere, and helping everyone spread their wings and pursue their dreams. The exhibit will feature four stages designed to showcase Honda's unique vision, spirit of challenge, and advanced creativity.

The Main Stage will express Honda's desire to create new value and provide enhanced riding pleasure. Honda's vision of the future begins with the E4-01 concept vehicle which offers customers a new take on motorcycling lifestyles. Also on display will be planned production bikes such as the CBR1000RR and CBR600RR, and special import concept vehicles like the CBF1000ABS and Deauville ABS.

On Center Stage, Honda's line up will include planned production scooters like the FORZA Z ABS and Fusion SE, in addition to concept vehicles like the NP6-S and NP6-D created by the N Project, a team of imaginative young engineers at Honda R&D's Asaka R&D Center.

The Honda Racing Stage will showcase Honda's advanced technology and spirit of challenge, featuring racing machines from the CBR1000RRW, winner of the 2005 Suzuka 8-Hour Endurance Race, to the RC211V, Honda's super-performance MotoGP machine.

Honda's Safety and Environment Stage will present Honda's advanced safety and environment technologies, featuring the GOLD WING, equipped with the world's first production motorcycle airbag, which can help mitigate injuries caused by frontal collisions. As examples of Honda's work in traffic safety education, the Riding Simulator and newly released Riding Trainer will also be on display. As an example of Honda's environmental technologies, the display will feature a video presentation of a motorcycle equipped with the ultimate in clean next-generation power plants, the unique Honda Fuel Cell Stack.

**Honda to Build New Powertrain Plant in China**

October 17, 2005 Honda Motor Co., Ltd. today announced plans to establish Honda Auto Parts Manufacturing Co., Ltd., an automobile powertrain components production company in China. Honda Motor (China) Investment Co., Ltd., a wholly-owned Honda subsidiary, is the sole investor in the new company, which is capitalized at \$ 90 million. The company will build a new plant in Nanhai District of Foshan City, Guangdong Province and manufacture automobile transmissions as well as other powertrain components including drive shafts and engine parts which will be supplied to Honda's automobile production joint ventures in China. The new company plans to begin production in spring 2007, with initial production capacity of 240,000 units per year.

The new plant will initially accommodate machining and assembly of transmissions and drive shafts as well as machining of crank shafts and connecting rods for engines. The company is planning later to add the machining of gears as well as production of control parts, both key high value transmission components currently supplied from Japan. Local production of these components enables Honda to secure an adequate supply to support expansion of Honda's automobile production in China, and also to further increase local content of powertrain components, which will help facilitate cost reduction and strengthen Honda's competitiveness in the market.

In China, two Honda joint venture companies, Guangzhou Honda Automobile Co., Ltd. and Dongfeng Honda Automobile Co., Ltd., are manufacturing automobile products for the domestic market, while Honda Automobile (China) Co., Ltd. manufactures automobiles for export. In order to continue to meet growing demand in China, both Guangzhou Honda and Dongfeng Honda are currently undertaking further expansion of production capacity. Overall annual production capacity of Honda's three joint venture automobile plants will reach 530,000 units by the latter half of 2006 - 360,000 units at Guangzhou Honda; 120,000 units at Dongfeng Honda; and 50,000 units at Honda Automobile (China).

Currently, transmissions, drive shafts, and other engine components (crank shafts and connecting rods) supplied to these automobile production plants are being locally manufactured by Honda's existing engine and parts production joint venture companies. The new company will share roles and work in a complementary way with the existing parts production companies in order to expand local production of powertrain components.

The new plant will be Honda's fourth major automatic transmission plant in the world after Ohio in the U.S., Indonesia, and Georgia in the U.S. (currently under construction). By adding this new plant, Honda will strengthen its transmission supply capability to support worldwide automobile production.

**I About Honda Auto Parts Manufacturing Co., Ltd.**

Established: October 2005

## Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Capital Investment: US\$ 90 million 100% Honda Motor (China) Investment Co., Ltd.

**Honda Introduces DN-01 Concept Motorcycle at Tokyo Motor Show,  
A Large-size Sports Bike with an Automatic Transmission**

October 19, 2005 At the 39<sup>th</sup> Tokyo Motor Show 2005, Honda Motor Co., Ltd. today introduced a large-size sports motorcycle concept model, DN-01\*, equipped with a continuously variable automatic transmission and a water-cooled, 4-stroke, OHC, V-type, 2-cylinder, 680cc engine. Honda will continue the development of DN-01 with the goal of introducing it to the market in the near future.

DN-01 is being developed in the concept of a comfortable sports cruiser, with the goal of creating new value for the customer by proposing a new level of riding pleasure. The newly adopted hydraulic mechanical continuously variable HFT (Human Fitting Transmission) system features two types of full automatic modes as well as a 6-speed manual mode which the rider operates through buttons located on the handle. Moreover, this is the first hydraulic mechanical continuously variable transmission system in the world to be equipped with a lock-up mechanism, which enables the rider to enjoy a smooth ride without feeling the shock normally associated with gear shifts, even when cornering. With the HFT, the DN-01 achieves more easy-to-operate and comfortable riding than currently available sports model motorcycles.

The 39<sup>th</sup> Tokyo Motor Show 2005 will open its doors to the general public beginning Saturday, October 22, in Makuhari, Chiba. Honda will present a motorcycle display booth with the theme of "Dream Wings". The theme represents Honda's effort to make people-motorcycle relationships more dream-inspiring and to propose a new level of riding pleasure with new values Honda will create.

\*DN-01 stands for the first (01) vehicle developed under Honda's Dream New (DN) concept.

**Honda Sets All-Time Records for Overseas and Worldwide Production for the  
First Half of Fiscal Year**

October 24, 2005 Honda Motor Co., Ltd. today announced a summary of production, domestic sales, and export results for the month of September and the first half of fiscal year 2006 (April to September 2005).

**<Production>**

**September 2005**

Domestic production for the month of September decreased 0.7% compared to the same month a year ago due to a decline in export shipments. Beginning with July 2005, this is the third consecutive month for domestic production to decrease compared to the same month a year ago.

Overseas production in September increased 9.0% due to production increases in North America on the second line of the Alabama plant with the addition of a second shift this year. Increased production in China and other Asian markets, where sales are experiencing steady growth, also contributed to the overall increase. It is the second consecutive month since August 2005 for an increase in overseas production compared to the same month a year ago.

Worldwide production in September increased 5.1% due to the increased overseas production. It is the second consecutive month for an increase over the same month a year ago.

**First Half of FY2006 (April - September 2005)**

Domestic production for the first half of FY2006 increased 0.4% due to increased production of both domestic and export vehicles. This is the second consecutive year for production in the first half of the fiscal year to exceed the same period a year ago.

Overseas production increased 12.7% due to increased production on the second line of the Alabama plant, with the addition of a second shift in 2005. The new export plant in China started operations in April 2005, which also contributed to the overall increase. It is the ninth consecutive year, since FY1998, for an increase in overseas production compared to the same period of the previous year. Honda set an all-time record for overseas production for the first half of the fiscal year.

Worldwide production during the first half of FY2006 increased 8.0% due to increases in domestic and overseas production. It is second consecutive year since FY2005 for worldwide sales to increase over the same period of the previous year. Honda set an all-time record for worldwide production for the first half of the fiscal year.

## **Table of Contents**

### **<Domestic Sales>**

#### **September 2005**

Total domestic sales, including imported cars, reached 75,199 units in September, up 3.7% compared to the same month a year ago, due to strong sales of passenger cars and light trucks. It is the first time in three months (since June 2005) for sales to exceed the same month a year ago. Models contributing to the increase in overall sales are the all-new StepWGN (11,814 units, the third best selling car in the market), which underwent a full model change in May, and the new Airwave (6,771 units, the 16<sup>th</sup> best selling car in the market), which was introduced in April.

Passenger car and light truck sales (including imports) increased over the same month a year ago for the first time in three months (since June 2005); while the sales of mini vehicles declined for the first time in the last two months (since July 2005) as sales of Life stabilized.

#### **First Half of FY2006 (April - September 2005)**

Due to increased sales in both categories (passenger cars & light trucks and mini vehicles), total domestic sales including imported cars increased in the first half of FY2006 over the same period a year ago, reaching 361,797 units up 3.1%. New models contributing to the sales increase include Airwave (introduced in April) and Step WGN (received full model change in May). It is the second consecutive year that sales increased over the first half of the previous year.

For the second consecutive year, sales of passenger cars and light trucks (including imports) as well as mini vehicles increased for the first half of FY2006 compared to the same period a year ago.

### **<Exports>**

#### **September 2005**

Total exports in September of 38,861 units, were down 17.4% compared to the same month a year ago, due mainly to a decrease in exports to North America and Europe. It is the second consecutive month for exports to decrease compared to the same month a year ago.

Exports to North America declined due to a shipping adjustment for the full model change of the Civic Hybrid, and exports to Europe declined due to the start-up of Jazz exports from a new Honda plant in China in addition to exports from Japan (Jazz is known as Fit in Japan).

#### **First Half of FY2006 (April - September 2005)**

## Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Total exports for the first half of FY2006 reached 253,954 units, up 3.7%, exceeding the total for the same period a year ago for the second consecutive year. For North America, strong sales of Accord Hybrid introduced at the end of 2004, and the all-new Acura RL, which underwent a model change in fall 2004, contributed to the increase.

**Notice Regarding the Buyback of Company Shares**

Tokyo, October 27, 2005 Honda Motor Co., Ltd. today announced its intention to implement acquisition of its outstanding company shares, the resolution for which was resolved as follows at the meeting of the Board of Directors held on October 27, 2005 in accordance with Article 211-3, Paragraph 1, Item 2 of the Commercial Code:

1. Reason for the Acquisition of Company Shares:

Mainly to improve capital efficiency.

2. Details of the Acquisition:

(1) Type of shares to be acquired

Common stock of Honda Motor Co., Ltd

(2) Maximum number of shares to be acquired

4,700,000 shares

(Ratio to total number of shares of common stock in issue: 0.51%)

(3) Maximum amount of acquisition

26,000,000,000 yen

(4) Period of acquisition

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

From November 2, 2005 to January 16, 2006

**HONDA MOTOR CO., LTD. REPORTS**

**CONSOLIDATED FINANCIAL RESULTS**

**FOR THE FISCAL SECOND QUARTER AND**

**THE FIRST HALF ENDED SEPTEMBER 30, 2005**

Tokyo, October 27, 2005 Honda Motor Co., Ltd. today announced its consolidated financial results for the fiscal second quarter and the fiscal first half ended September 30, 2005.

**Second Quarter Results**

Honda's consolidated net income for the fiscal second quarter ended September 30, 2005 totaled JPY 133.7 billion (USD 1,181million), an increase of 5.2% from the corresponding period in 2004. Basic net income per Common Share for the quarter amounted to JPY 144.89 (USD 1.28), compared to JPY 135.70 for the corresponding period in 2004. Two of Honda's American Depository Shares represent one Common Share.

Consolidated net sales and other operating revenue (herein referred to as revenue) for the quarter amounted to JPY 2,337.6 billion (USD 20,653 million), an increase of 11.7% over the corresponding period in 2004. Revenue was positively affected by currency translations, which were translations of foreign-currency-denominated revenue from Honda's overseas subsidiaries into yen. Honda estimates that if the exchange rate of yen had remained unchanged from that in the corresponding period in 2004, revenue for the quarter would have increased by approximately 9.6%.

Consolidated operating income for the fiscal second quarter totaled JPY 162.6 billion (USD 1,437 million), a decrease of 5.9% compared to the corresponding period in 2004. This decrease in operating income was primarily due to the negative impacts of increased selling, general and administrative (SG&A) expenses and research and development (R&D) expenses, which offset the positive currency effects caused by the depreciation of the yen, increased profits from higher revenues and continuing cost reduction effects.

Consolidated income before income taxes for the quarter totaled JPY 169.3 billion (USD 1,497 million), an increase of 2.3% from the corresponding period in 2004.

## Table of Contents

Equity in income of affiliates, which is mainly attributable to Asian affiliates accounted for under the equity method, for the quarter amounted to JPY 26.0 billion (USD 230 million), a decrease of 7.9% from the corresponding period in 2004.

### Business Segment

With respect to Honda's sales in the fiscal second quarter by business category, motorcycle unit sales totaled 2,489 thousand units, a decrease of 7.8% from the corresponding period in 2004. Motorcycle unit sales in Japan decreased 5.5% to 104 thousand units, and overseas unit sales were 2,385 thousand units, which was a decrease of 8.0% from the corresponding period in 2004, mainly caused by a decrease in unit sales of parts for local production at affiliates in India\*, which offset an increase in unit sales of parts for local production at the Indonesian affiliate. Despite a drop in unit sales, revenue from sales to unaffiliated customers increased 12.4%, to JPY 287.7 billion (USD 2,542 million), due mainly to positive currency translation effects. Operating income increased by 48.1% to JPY 29.6 billion (USD 262 million), due mainly to increased profits from higher revenues, an increase in royalty income and the positive currency effects caused by the depreciation of the yen, offsetting the negative impacts of the change in model mix in North America and Europe, and an increase in sales incentive in North America.

\* Net sales of Honda-brand motorcycle products that are procured locally 100%, manufactured and sold by overseas affiliates accounted for under the equity method are not included in net sales and other operating revenue, in conformity with U.S. generally accepted accounting principles. Accordingly, these unit sales are not included in the financial results and forecasts.

For the fiscal second quarter, the number of products 100% locally procured, manufactured and sold by affiliates in India and China increased to approximately 550 thousands units.

Honda's unit sales of automobiles increased by 5.0% from the corresponding period in 2004 to 834 thousand units. In Japan, unit sales of automobiles decreased 3.7% to 183 thousand units. Overseas unit sales increased 7.8% to 651 thousand units, due mainly to continued strong sales in the U.S. as a result of a lineup of attractive models, such as the *Odyssey*, the *Civic* and the *Ridgeline*. Revenue from sales to unaffiliated customers increased 11.7%, to JPY 1,892.6 billion (USD 16,721 million) during the quarter, due to the positive currency translation impact and an increase in unit sales. Operating income decreased 15.9% to JPY 101.0 billion (USD 893 million), due mainly to the negative impacts of the increased SG&A, including the expenses for model change and expansion of the production capacity, change in model mix and an increase in sales incentives in North America and Europe, which offset the positive impacts of the increased profits from higher revenues and depreciation of the yen.

**Table of Contents**

Revenue from sales to unaffiliated customers in financial services increased 15.7% to JPY 75.0 billion (USD 663 million), due to the growth of the automobile business in North America. Operating income decreased 3.1% to JPY 24.7 billion (USD 219 million), due primarily to increased funding costs.

Unit sales of power products in Japan totaled 118 thousand units, an increase of 15.7%. Overseas unit sales were 1,023 thousand units, increased by 4.1% and total unit sales of power products were 1,141 thousand units, up by 5.2 % from the corresponding period in 2004. Increased unit sales of general-purpose engines in Europe, Asia and Middle and Near East regions were the major contributing factors to this increase. Revenue from sales to unaffiliated customers in power product and other businesses increased by 4.3% to JPY 82.2 billion (USD 727 million), due mainly to the increase in unit sales of power products. Operating income was JPY 7.2 billion (USD 64 million), which was almost the same level as the corresponding period in 2004, due mainly to the negative impact of the increase in SG&A expenses, which offset increased profits from higher revenues in power product business.

**Geographical Segment**

With respect to Honda's sales for the second quarter by geographical segment, in Japan, revenue for exports and domestic sales was JPY 1,078.6 billion (USD 9,530 million), up by 5.7% compared to the corresponding period in 2004, due primarily to increased unit sales for exports sales in the automobile business. Operating income in Japan was JPY 62.9 billion (USD 556 million), up by 17.0%, due primarily to the positive impacts of increased royalty income, increased profits from higher revenues in the automobile exports business, ongoing cost reduction efforts and positive currency impact from the depreciation of the yen, which offset the negative impacts of the increases in SG&A and R&D expenses.

In North America, revenue increased by 15.0% from the corresponding period in 2004 to JPY 1,263.4 billion (USD 11,163 million), due mainly to the positive currency translation effects and increased unit sales in the automobile business. Operating income in North America decreased by 19.5% to JPY 68.5 billion (USD 605 million) from the corresponding period in 2004, due primarily to the negative impacts of the increase in SG&A, funding costs in the financial services business, sales incentives and prices for raw materials, which offset the positive impacts of the increased profits from higher revenues in the automobile business and the currency effects caused by the appreciation of the U.S. dollar.

**Table of Contents**

In Europe, revenue for the quarter increased by 11.2% to JPY 266.9 billion (USD 2,358 million) compared to the corresponding period of the previous year, due primarily to the increase in unit sales of the motorcycle and automobile businesses. Operating income in Europe decreased by 91.0% to JPY 0.8 billion (USD 7 million), due mainly to the changes in the model mix, increased SG&A expenses, which include expenses for model change and the increase in sales incentives, offsetting the positive impact of the increase in profits from higher revenues in the automobile business.

In Asia, revenue increased by 8.8% to JPY 231.2 billion (USD 2,043 million) from the corresponding period of the previous year, due mainly to an increase in unit sales in the motorcycle and automobile businesses caused by the change in model mix, and an increase in unit sales in the power product business. Operating income decreased by 10.0% to JPY 15.8 billion (USD 140 million) from the corresponding period of the previous year, due mainly to an increase in SG&A expenses, including expenses for the expansion of the production capacity, rising prices for raw materials and the negative currency effects, offsetting the positive impact of the increased profits from higher revenues and change in the sales prices. In Asia, in addition to subsidiaries, many affiliates accounted for under the equity method manufacture and sell Honda-brand products. Operating income does not include income from these affiliates. Income from these affiliates is recorded as equity in income of affiliates and reflected in net income.

In Other regions, revenue for the second quarter increased by 25.9% to JPY 146.7 billion (USD 1,297 million) compared to the corresponding period of the previous year. The positive currency translation effects and the increased unit sales in all business segments, namely motorcycle, automobile and power product businesses were the major contributing factors to the increase in revenues. Operating income increased by 43.2% from the corresponding period of the previous year to JPY 15.1 billion (USD 134 million), due mainly to the positive impact of the depreciation of the yen, increased profits from higher revenues and change in the sales prices, offsetting the negative impacts of the increase in SG&A expenses and prices for raw materials.

**Table of Contents**

**First Half-Year Results**

Honda's consolidated net income for the fiscal first half ended September 30, 2005 totaled JPY 244.3 billion (USD 2,159 million), an increase of 1.2% from the corresponding period in 2004. Income taxes in the fiscal first half in 2004 included JPY 11.7 billion payments for a transfer pricing assessment, relating to the motorcycle business in Brazil. Basic net income per Common Share for the fiscal first half amounted to JPY 264.64 (USD 2.34), compared to JPY 257.35 for the corresponding period in 2004. Two of Honda's American Depositary Shares represent one Common Share.

Consolidated net sales and other operating revenue (herein referred to as revenue) for the period amounted to JPY 4,602.2 billion (USD 40,660 million), an increase of 10.5% over the corresponding period in 2004. Revenue was positively affected by currency translations, which were translations of foreign-currency-denominated revenue from Honda's overseas subsidiaries into yen. Honda estimates that if the exchange rate of yen had remained unchanged from that in the corresponding period in 2004, revenue for the fiscal first half would have increased by approximately 9.6%.

Consolidated operating income for the fiscal first half totaled JPY 333.0 billion (USD 2,943 million), which was almost the same level as the corresponding period in 2004. This was primarily due to currency effects from the depreciation of the yen, increased profits from higher revenues and continuing cost reduction efforts, which offset the negative impact of increased SG&A and R&D expenses.

Consolidated income before income taxes for the fiscal first half totaled JPY 313.7 billion (USD 2,771 million), a decrease of 7.6% from the corresponding period in 2004.

Equity in income of affiliates, which is mainly attributable to Asian affiliates accounted for under the equity method for the fiscal first half amounted to JPY 47.2 billion (USD 417 million), which was almost the same level of the corresponding period in 2004.

---

**Table of Contents****Business Segment**

With respect to Honda's sales in the fiscal first half year by business category, motorcycle unit sales totaled 5,070 thousand units, which decreased by 4.0% from the corresponding period in 2004. Motorcycle unit sales in Japan decreased 3.9% to 199 thousand units, and overseas unit sales were 4,871 thousand units, which was a decrease of 4.0% from the corresponding period in 2004, mainly caused by a decrease in unit sales of parts for local production at affiliates in India\*, which offset an increase in unit sales of parts for local production at Indonesian affiliate. Revenue from sales to unaffiliated customers increased 3.9%, to JPY 550.9 billion (USD 4,867 million), due mainly to the positive currency translation impacts, offsetting the decrease in unit sales. Operating income increased by 7.4% to JPY 39.9 billion (USD 353 million), due mainly to the positive impacts of the depreciation of the yen, increased profits from the higher revenues and ongoing cost reduction efforts, offsetting the negative impact of the increase in R&D expenses.

\* Net sales of Honda-brand motorcycle products that are procured locally 100%, manufactured and sold by overseas affiliates accounted for under the equity method are not included in net sales and other operating revenue, in conformity with U.S. generally accepted accounting principles. Accordingly, these unit sales are not included in the financial results and forecasts.

For the fiscal first half, the number of products 100% locally procured, manufactured and sold by affiliates in India and China increased to approximately 930 thousands units.

Honda's unit sales of automobiles increased by 6.9% from the corresponding period in 2004 to 1,674 thousand units. In Japan, unit sales of automobiles increased 1.7% to 350 thousand units. Overseas unit sales increased 8.3% to 1,324 thousand units, due mainly to increased sales in North America. Revenue from sales to unaffiliated customers increased 11.6%, to JPY 3,738.6 billion (USD 33,030 million) during the period, due to the positive currency translation effects and increased unit sales. Operating income was JPY 234.2 billion (USD 2,069 million), which was almost the same level as the corresponding period in 2004, due mainly to the negative impacts in increase in SG&A and R&D expenses, which offset the positive currency effects caused by the depreciation of the yen, increased profits from higher revenues and ongoing cost reduction efforts.

Revenue from sales to unaffiliated customers in financial services increased 16.5% to JPY 143.7 billion (USD 1,270 million), due to the growth of the automobile business in North America. Operating income decreased 6.7% to JPY 44.6 billion (USD 394 million), due primarily to increased funding costs.

Unit sales of power products in Japan totaled 239 thousand units, an increase of 8.6%. Overseas unit sales were 2,384 thousand units, an increase of 5.9%, due primarily to increased unit sales in Asia, and total unit sales of power products were 2,623 thousand units, up by 6.1% from the corresponding period in 2004. Revenue from sales to unaffiliated customers in power product and other businesses increased by 2.9% to JPY 168.9 billion (USD 1,492 million), due mainly to increased unit sales of power products. Operating income increased 18.0% to JPY 14.3 billion (USD 127 million), due mainly to increased profits from higher revenues, offsetting the negative impact of the increase in SG&A expenses.

## **Table of Contents**

### **Geographical Segment**

With respect to Honda's sales for the first half by geographical segment, in Japan, revenue for exports and domestic sales was JPY 2,139.1 billion (USD 18,898 million), up by 8.1% compared to the corresponding period in 2004, due primarily to increased unit sales for both domestic and exports sales in the automobile business. Operating income in Japan was JPY 110.1 billion (USD 974 million), up by 27.0%, due primarily to the positive currency effects caused by the depreciation of the yen, increased profits from higher revenues and ongoing cost reductions, which offset the negative impact of the increase in SG&A and R&D expenses.

In North America, revenue increased by 12.5% from the corresponding period of the previous year to JPY 2,512.0 billion (USD 22,193 million), due mainly to the increased unit sales in automobile and power product businesses. Operating income in North America decreased by 14.8% to JPY 141.2 billion (USD 1,248 million) from the corresponding period of the previous year, due primarily to the negative impact of the increase in SG&A, which offset the positive currency effects caused by the depreciation of the JPY and impact of increased profits from higher revenues.

In Europe, revenue for the period increased by 9.7% to JPY 564.2 billion (USD 4,985 million) compared to the corresponding period of the previous year, due primarily to the increased unit sales in all business segments, namely motorcycle, automobile and power product businesses. Operating income in Europe decreased by 43.5% to JPY 13.5 billion (USD 120 million), due mainly to increased SG&A expenses, offsetting the positive impacts of the increased profits from higher revenues and ongoing cost reduction efforts.

In Asia, revenue increased by 11.3% to JPY 462.8 billion (USD 4,089 million) from the corresponding period of the previous year, due mainly to the increases in unit sales in the automobile and power product businesses. Operating income decreased by 6.5% to JPY 34.9 billion (USD 309 million) from the corresponding period of the previous year, due mainly to the negative impacts of an increase in SG&A expenses, offsetting the positive impacts of the depreciation of the yen and increased profits from higher revenues. In Asia, in addition to subsidiaries, many affiliates accounted for under the equity method manufacture and sell Honda-brand products. Operating income does not include income from these affiliates. Income from these affiliates is recorded as equity in income of affiliates and reflected in net income.

In Other regions, revenue for the first half increased by 20.4% to JPY 263.7 billion (USD 2,330 million) compared to the corresponding period of the previous year. The increase in unit sales in the motorcycle, automobile and power product business were the major contributing factors to the increase in revenue. Operating income increased by 49.3% from the corresponding period of the previous year to JPY 28.7 billion (USD 254 million), due mainly to the positive currency effects caused by the depreciation of the yen and increased profits from higher revenues, offsetting the negative impact of the increase in SG&A expenses.

**Table of Contents****Consolidated Statements of Cash Flows for the Fiscal First Half**

Cash and cash equivalents for the period from April 1, 2005 through September 30, 2005, decreased by JPY 42.3 billion (USD 374 million) from March 31, 2005 to JPY 731.1 billion (USD 6,460 million) as of September 30, 2005.

The reason for the increase or decrease for each cash flow activity is as follows;

**Cash flows from operating activities**

Net cash provided by operating activities amounted to JPY 296.6 billion (USD 2,621 million), which included net income and depreciation for the six months ended September 30, 2005. Cash flows from operating activities decreased by JPY 92.2 billion (USD 815 million) compared with the corresponding period of the previous year.

**Cash flows from investing activities**

Net cash used in investing activities amounted to JPY 428.4 billion (USD 3,785 million), which was mainly due to the capital expenditures and an acquisition of finance subsidiaries-receivables. Cash outflows from investing activities decreased by JPY 59.1 billion (USD 522 million) compared with the corresponding period of the previous year.

**Cash flows from financing activities**

Net cash provided by financing activities amounted to JPY 66.7 billion (USD 589 million), which arose due to proceeds from the issuance of long-term debt. Cash flows from financing activities increased by JPY 8.0 billion (USD 71 million) compared with the corresponding period of the previous year.

### Explanatory notes:

1. All figures are calculated based on the information included in the consolidated financial statements.
2. Cash flows from operating activities are obtained from the consolidated statement of cash flows. Interest bearing debt represents Honda's outstanding debt with interest payments, which are included on the consolidated balance sheets. Interest bearing debt and cash flow from operating activities for the non-financial services businesses are obtained from the consolidated balance sheets and consolidated statements of cash flows which are separated by non-financial services businesses and finance subsidiaries.

**Table of Contents**

**Presentation of Finance Subsidiaries-Receivables in the Consolidated Statements of Cash Flows and the Consolidated Balance Sheets**

In prior periods, Honda reported the effects of all finance subsidiaries-receivables as investing activities for purposes of presentation in the consolidated statements of cash flows. This policy, when applied to wholesale receivables related to sales of inventory to outside dealers, had the effect of presenting an investing cash outflow and an operating cash inflow even though there was no cash flow on a consolidated basis.

In the previous fiscal fourth quarters, based on concerns raised by the staff of the Securities and Exchange Commission ( SEC ), management has decided to report the cash flow related effects of those finance subsidiaries-receivables which relate to sales of inventory as operating activities in the consolidated statements of cash flows and also reclassify related finance subsidiaries-receivables to trade receivables in the consolidated balance sheets. This presentation results in the elimination of the intercompany activities and proper classification of cash receipts from the settlement of wholesale receivables related to the sale of inventory as operating activities.

Certain finance subsidiaries provide retail finance to customers who purchased inventory from the consolidated dealers. The cash flows generated from this retail finance were reported as investing cash flows in prior periods. In the current year, based on concerns raised by the staff of the SEC, management has decided to report the cash flow related effects of those finance subsidiaries-receivables which relate to sales of inventory as operating activities in the consolidated statements of cash flows and also reclassify related finance subsidiaries- receivables to trade receivables, including those of non-current portion to other assets, in the consolidated balance sheets.

**Table of Contents**

The cash flow related effects of finance subsidiaries-receivable from retail, direct finance leases, wholesale and term loans to dealer which are unrelated to the sales of inventory continue to be reported as investing activities in the consolidated statements of cash flows.

The impacts of the reclassification of the affected line items in the consolidated statement of cash flows with respect to the year ended March 31, 2004 and in the consolidated balance sheet at March 31, 2004 are as follows:

*Consolidated statement of cash flows*

	<b>Six months ended September 30, 2004</b>

**Table of Contents****Forecasts for the Fiscal Year Ending March 31, 2006**

In regard to the forecasts of the financial results for the fiscal year ending March 31, 2006, Honda projects consolidated and unconsolidated results to be as shown below:

As stipulated in the Japanese Welfare Pension Insurance Law, the Honda Employees Pension Fund (a confederated welfare pension fund, the Fund), of which the Company is a member, has obtained approval from the Japanese Ministry of Health, Labor and Welfare for exemption from benefits obligations related to past employee services with respect to the substitutional portion of the Fund on July 1, 2005.

With respect to the forecast of the Company's consolidated financial position and results of operations for the year ending March 31, 2006, the effect of the transfer of the benefit obligation of the substitutional portion of the Employees Pension Fund to the Japanese government is not reflected in accordance with the applicable U.S. regulations. According to the regulations, the difference between the fair value of the obligation and the assets to be transferred to the government, which should be disclosed as a subsidy, will be determined upon completion of the transfer to the government of the substitutional portion of the benefit obligation and related plan assets. At this moment, the date of such transfer and its effect has not yet been determined.

With respect to the forecast of the Company's unconsolidated financial position and results of operation for the year ending March 31, 2006, the Company recognized the gain on the transfer of the benefit obligation of the substitutional portion of the Fund to the Japanese government as an extraordinary gain in accordance with the Japanese accounting standards.

**FY2006 Forecasts for Consolidated Results**

	<u>Yen (billions)</u>	<u>Changes from FY2005</u>
Net sales and other operating revenue	9,600	+11.0%
Operating income	675	+7.0%
Income before income taxes	655	0.3%
Net income	490	+0.8%

**FY2006 Forecasts for Unconsolidated Results**

	<u>Yen (billions)</u>	<u>Changes from FY2005</u>
Net sales	3,720	+6.6%
Operating income	215	+45.7%
Ordinary income	308	+45.8%
Net income	290	+100.7%

## Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

These forecasts are based on the assumption that the average exchange rates for the yen to the U.S. dollar and the Euro for the second half of the year ending March 31, 2006 will be JPY 110 and JPY 135, respectively, and for the full year ending March 31, 2006, JPY 110 and JPY 135, respectively.

- 12 -

**Table of Contents**

**Dividend per Share of Common Stock for Fiscal Year 2006**

Honda has decided to increase the interim cash dividend by 12 yen, to JPY 40 per share of common stock, and projects that year-end cash dividend will be JPY 40, an increase of 3 yen. As a result, total cash dividends for the year ending March 31, 2006 will be JPY 80, an increase of 15 yen.

This announcement contains forward-looking statements as defined in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are based on management's assumptions and beliefs taking into account information currently available to it. Therefore, please be advised that Honda's actual results could materially differ from those described in these forward-looking statements as a result of numerous factors, including general economic conditions in Honda's principal markets and foreign exchange rates between the Japanese yen and the U.S. dollar, the Euro and other major currencies, as well as other factors detailed from time to time.

## **Table of Contents**

### **Risk Factors**

This section describes some of the risks that could affect Honda's business and financial statements, and the Company's stock price.

#### **1. Honda may be adversely affected by market conditions**

Honda conducts its operation in Japan and throughout the world, including North America, Europe and Asia.

A continued economic slowdown, recession or sustained loss of consumer confidence in these markets which may be caused by rising fuel prices or other factors, could trigger a decline in demand for automobiles, motorcycles and power products that may adversely affect the results of Honda's operations.

#### **2. Prices for automobiles, motorcycles and power products can be volatile**

Prices for automobiles, motorcycles and power products in certain markets have, at times, experienced sharp changes over short periods of time.

This volatility is caused by many factors, including fierce competition, which is increasing, short-term fluctuations in demand from underlying economic conditions, changes in import regulations, shortages of certain supplies and sales incentives by Honda or other manufacturers or dealers. There can be no assurance that such price volatility will not continue or intensify or that price volatility will not occur in markets that to date have not experienced such volatility. Overcapacity within the industry has increased and will likely continue to increase if the economic downturn continues in Honda's major markets or worldwide, leading, potentially, to further increased price pressure. Price volatility in any or all of Honda's markets could adversely affect Honda's results of operations in a particular period.

#### **3. Honda's operations are subject to currency fluctuations**

Honda has manufacturing operations throughout the world including Japan and exports products and components to various countries.

Honda purchases materials and sells its products in foreign currencies, therefore currency fluctuations may affect Honda's pricing of products sold and materials purchased. Accordingly currency fluctuations have an effect on Honda's results of operation, balance sheet and cash flow, as well as Honda's competitiveness, which will over time affect its results. Since Honda exports many products and components from Japan and generates a substantial portion of its revenues in currencies other than the Yen, Honda's results of operations would be adversely affected by an appreciation of the Yen against other currencies, in particular the U.S. dollar.

## **Table of Contents**

### **4.Honda's hedging of currency and interest rate risk exposes Honda to other risks**

Although it is impossible to hedge against all currency or interest risk, Honda uses derivative financial instruments in order to reduce the substantial effects of currency fluctuations and interest rate exposure on our cash flow and financial condition. These instruments include foreign currency forward contracts, currency swap agreements and currency option contracts, as well as interest rate swap agreements. Honda has entered into, and expects to continue to enter into, such hedging arrangements. As with all hedging instruments, there are risks associated with the use of such instruments. While limiting to some degree our risk fluctuations in currency exchange and interest rates by utilizing such hedging instruments, Honda potentially forgoes benefits that might result from other fluctuations in currency exchange and interest rates. Honda also is exposed to the risk that its counterparties to hedging contracts will default on their obligations. Honda manages exposure to counterparty credit risk by limiting the counterparties to major international banks and financial institutions meeting established credit guidelines. However, any default by such counterparties might have an adverse effect on Honda.

### **5.The automobile, motorcycle and power product industries are subject to extensive environmental and other governmental regulation**

Regulations regarding vehicle emission levels, fuel economy, noise and safety, as well as levels of pollutants from production plants are extensive within the automobile, motorcycle and power product industries. These regulations are subject to change, and are often made more restrictive. The costs to comply with these regulations can be significant to Honda's operations.

### **6.Honda is reliant on the protection and preservation of its intellectual property**

Honda owns or otherwise has rights in a number of patents and trademarks relating to the products it manufactures, which have been obtained over a period of years. These patents and trademarks have been of value in the growth of Honda's business and may continue to be of value in the future. Honda does not regard any of its businesses as being dependent upon any single patent or related group of patents. However, an inability to protect this intellectual property generally, or the illegal breach of some or a large group of Honda's intellectual property rights, would have an adverse effect on Honda's operations.

### **7.Honda's financial services business conducts business under highly competitive conditions in an industry with inherent risks**

Honda's financial services business offers various financing plans designed to increase the opportunity for sales of its products and to generate financing income. However, customers can also obtain financing for the lease or purchase of Honda's products through a variety of other sources that compete with our financing services, including commercial banks and finance and leasing companies. The financial services offered by us also involve risks relating to residual value, credit risk and cost of capital. Competition for customers and/or these risks may affect Honda's results of operations in the future.

**Table of Contents**

8.Honda relies on various suppliers for the provision of certain raw materials and components

Honda purchases raw materials, and certain components and parts, from numerous external suppliers, and relies on some key suppliers for some items and the raw materials it uses in the manufacture of its products. Honda's ability to continue to obtain these supplies in an efficient and cost-effective manner is subject to a number of factors, some of which are not within Honda's control. These factors include the ability of its suppliers to provide a continued source of supply and Honda's ability to compete with other users in obtaining the supplies. Loss of a key supplier in particular may affect our production and increase our costs.

9.Honda conducts its operations in various regions of the world

Honda conducts its businesses worldwide, and in several countries, Honda conducts businesses through joint ventures with local entities, in part due to the legal and other requirements of those countries. These businesses observe various regulations, including the legal and other requirements of each country. If these regulations or the business condition or policy of these local entities change, it may have an adverse affect on Honda's business, financial condition or results of operations.

10.Honda may be adversely affected by wars, use of force by foreign countries, terrorism, multinational conflicts, natural disasters, epidemics and labor strikes

Honda conducts its businesses worldwide, and its operations may variously be subject to wars, use of force by foreign countries, terrorism, multinational conflicts, natural disasters, epidemics, labor strikes and other events beyond our control which may delay or disrupt Honda's local operations in the affected regions, including the acquisition of raw materials and parts, the manufacture, sales and distribution of products and the provision of services. Delays or disruptions in one region may in turn affect our global operations. If such delay or disruption occurs and continues for a long period of time, Honda's business financial condition or results of operations may be adversely affected.

Explanatory note:

In the previous fiscal fourth quarter, Honda reclassified certain finance subsidiaries-receivables to trade receivables, including those of non-current portion to other assets, in the consolidated balance sheets divided into non-financial services businesses and finance subsidiaries (unaudited). Reclassifications have been made to consolidated financial statements in prior year's fiscal first half and fiscal year to conform to the presentation used for the year ended March 31, 2005.

Explanatory notes:

1. The cash flows derived from non-financial services businesses loans to finance subsidiaries were included in the items of Decrease (increase) in investments and advances of Non financial services businesses, and Increase (decrease) in short-term debt , Proceeds from long-term debt and Repayment of long-term debt of Finance subsidiaries (marked by \*). Free cash flow of Non financial services businesses excluding the decrease in loans to finance subsidiaries are stated for the readers information.

Loans from non-financial services businesses to finance subsidiaries increased by 77,741 million yen for the fiscal first half ended September 30, 2004, and increased by 27,510 millions yen for the corresponding period in 2005.

2. In the current fiscal year, Honda reclassified and restated its cash flow related to the finance subsidiaries-receivables which relate to sales of inventory as cash flows from operating activities instead of cash flows from investing activities in the consolidated statements of cash flows divided into non-financial services businesses and finance subsidiaries (unaudited). Due to this reclassification, the figures for the fiscal first half ended September 30, 2004 have been also reclassified and restated to conform to the presentation of the fiscal first half ended September 30, 2005.
3. Decrease (increase) in trade accounts and notes receivable for finance subsidiaries is due to the reclassification of finance subsidiaries-receivables which relate to sales of inventory in the unaudited consolidated statements of cash flows presented above.

### **Explanatory notes:**

1. Consolidated subsidiaries

Number of consolidated subsidiaries: 324

2. Affiliated companies

Number of affiliated companies: 117

3. Changes of consolidated subsidiaries and affiliated companies

Consolidated subsidiaries:

Newly formed consolidated subsidiaries: 8

Reduced through reorganization: 3

Affiliated companies:

Newly formed affiliated companies: 2

Reduced through reorganization: 3

4. The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, since the Company has listed its shares as on American Depositary Receipts on the New York Stock Exchange and files reports with the U.S. Securities and Exchange Commission. All segment information, however, is prepared in accordance with the Ministerial Ordinance under the Securities and Exchange Law of Japan.
5. The average exchange rates for the fiscal second quarter ended September 30, 2005 were ¥111.28=U.S.\$1 and ¥135.72=1 euro. The average exchange rates for the corresponding period last year were ¥109.96=U.S.\$1 and ¥134.37=1 euro. The average exchange rates for the fiscal first half ended September 30, 2005 were ¥109.48=U.S.\$1 and ¥135.65=euro1, as compared with ¥109.86=U.S.\$1 and ¥133.32=1 euro for the corresponding period last year.
6. United States dollar amounts have been translated from yen solely for the convenience of the reader at the rate of ¥113.19=U.S.\$1, the mean of the telegraphic transfer selling exchange rate and the telegraphic transfer buying exchange rate prevailing on the Tokyo foreign exchange market on September 30, 2005.
7. The Company's Common Stock-to-ADR exchange rate was changed from two shares of Common Stock to one ADR to one share of Common Stock to two ADRs, effective January 10, 2002.
8. Minority interests in net assets and income are not significant and, accordingly, are not presented separately in the accompanying consolidated balance sheets and statements of income.
9. Inventories are stated at the lower of cost, determined principally by the first-in, first-out method, or market.

## Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

10. Honda classifies its debt and equity securities in one of three categories: available-for-sale, trading, or held-to-maturity. Debt securities that are classified as held-to-maturity securities are reported at amortized cost. Debt and equity securities classified as trading securities are reported at fair value, with unrealized gains and losses included in earnings. Other debt and equity securities are classified as available-for-sale securities and are reported at fair value, with unrealized gains or losses, net of deferred taxes included in accumulated other comprehensive income (loss) in the stockholders' equity section of the consolidated balance sheets.
11. Honda does not amortize goodwill but instead is tested for impairment at least annually.
12. Depreciation of property, plant and equipment is calculated principally by the declining-balance method based on estimated useful lives of the respective assets.
13. Honda does not apply hedge accounting for foreign exchange agreements and interest rate agreements.
14. The allowance for credit losses for finance-subsiaries receivables is maintained at an amount management deems adequate to cover estimated losses on finance receivables. The allowance is based on management's evaluation of many factors, including current economic trends, industry experience, inherent risks in the portfolio and the borrower's ability to pay.

- 34 -

**Table of Contents**

15. The allowance for losses on lease residual values is maintained at an amount management deems adequate to cover estimated losses on the uninsured portion of the vehicles' lease residual values. The allowance is also based on management's evaluation of many factors, including current economic conditions, industry experience and the finance subsidiaries' historical experience with residual value losses.
16. Provisions for retirement benefits are provided based on the fair value of both projected benefit obligations and plan assets at the end of the fiscal year to cover for employees' retirement benefits. If the provisions for retirement benefits are less than the unfunded accumulated benefit obligations, accrued pension cost is adjusted as an additional minimum pension liability that is at least equal to the unfunded accumulated benefit obligation. Unrecognized net transition obligation has been amortized over approximately 19 years since the fiscal year ended March 31, 1990. Unrecognized prior service cost (benefit) is amortized by using the straight-line method and the estimated average remaining service years of employees.

Unrecognized actuarial loss is amortized if unrecognized net gain or loss exceeds ten percent of the greater of the projected benefit obligation or the market-related value of plan assets by using the straight-line method and the estimated average remaining service years of employees.

17. Our warranty expense accruals are costs for general warranties on product we sell, products recalls and service actions outside the general warranties. Estimated warranty expenses are provided based on historical warranty claim experience with consideration given to the expected level of future warranty costs as well as current information on repair costs.

**Additional Information**

As stipulated in the Japanese Welfare Pension Insurance Law, the Honda Employees' Pension Fund (a confederated welfare pension fund, the Fund), of which the Company is a member, has obtained approval from the Japanese Ministry of Health, Labor and Welfare for exemption from benefits obligations related to past employee services with respect to the substitutional portion of the Fund on July 1, 2005. Previously on April 1, 2004, the Company received approval of exemption from the obligation for benefits related to future employee services with respect to the Fund. The difference between the fair value of the obligation and the assets to be transferred to the government, which should be disclosed as a subsidy, will be determined upon completion of the transfer to the government of the substitutional portion of the benefit obligation and related plan assets. The date of such transfer and its effect has not yet been determined.

**Notes to Consolidated balance sheets**

1. The allowance for doubtful trade accounts and notes receivable, and the allowance for credit losses for finance-subidiaries receivable are as follows:

	Yen(millions)		
	Mar. 31, 2005	Sep. 30, 2005	Sep. 30, 2004
The allowance for doubtful trade accounts and notes receivables	9,710	10,554	9,935
The allowance for credit losses for financial-subidiaries receivables	30,926	32,516	30,843

2. Net book value of property, plant and equipment which were subject to specific mortgages securing indebtedness are as follows;

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

	<b>Yen(millions)</b>		
	<b>Mar. 31, 2005</b>	<b>Sep. 30, 2005</b>	<b>Sep. 30, 2004</b>
Property, plant and equipment	12,881	<b>6,657</b>	11,754
A finance subsidiary pledged as collateral finance subsidiaries-receivables	22,597	<b>15,153</b>	20,577

- 35 -

**Table of Contents**

3. Honda has entered into various guarantee and indemnification agreements which are primarily for employee bank/loans to costs for their housing costs are as follows:

	<b>Yen(millions)</b>		
	<u>Mar. 31, 2005</u>	<u>Sep. 30, 2005</u>	<u>Sep. 30, 2004</u>
Bank loan of employees for their housing costs	69,574	<b>50,689</b>	73,312

If an employee defaults on his/her loan payments, Honda is required to perform its obligation under the guarantee. The undiscounted maximum amount of Honda's obligation to make future payments in the event of defaults were shown as above. As of September 30, 2005, no amount has been accrued for any possible estimated losses under the guarantee obligations, as it is probable that the employees will be able to make all scheduled payments.

**Reclassification**

From the fiscal fourth quarter ended March 31, 2005, Honda reclassified and restated cash flow relating to finance subsidiaries-receivables which relate to sales of inventory in the cash flows from investing activities to cash flow from operating activities in the unaudited consolidated statements of cash flows. In addition, in the consolidated balance sheets, corresponding finance subsidiaries-receivables were reclassified to trade receivables, including non-current portion of other assets. Due to this reclassification, the figures for the fiscal first half ended September 30, 2004 and as of September 30, 2004 have been also reclassified and restated to conform to the presentation of the fiscal first half ended September 30, 2005 and as of September 30, 2005. For further information, please see the consolidated statements of cash flows for the fiscal first half ended September 30, 2005.
