The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities, and we are not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

PROSPECTUS (Subject to Completion)

Issued October 2, 2006

75,000,000 Shares

COMMON STOCK

SAIC, Inc. is offering 75,000,000 shares of its common stock. Although our principal operating subsidiary has previously sponsored a limited market in its common stock, no public market currently exists for our common stock. We anticipate that the initial public offering price will be between \$13 and \$15 per share. A special dividend of between \$1.6 billion and \$2.4 billion will be declared prior to this offering by our principal operating subsidiary and, following completion of this offering, paid to its stockholders of record, including our directors and officers. We will not pay this special dividend on shares sold in this offering. After the payment of this special dividend and the completion of this offering at an assumed public offering price of \$14 per share, and after deducting estimated underwriting discounts and commissions and offering expenses, our consolidated cash reserves will be reduced by a net amount ranging from approximately \$620 million to \$1.4 billion, or from \$470 million to \$1.3 billion if the underwriters exercise their over-allotment option in full.

We have been approved for listing of our common stock on the New York Stock Exchange under the symbol SAI.

Investing in our common stock involves risks. See Risk Factors beginning on page 10.

PRICE \$ A SHARE

	<u>Price to Public</u>	<u>Underwriting Discounts and Commissions</u>	<u>Proceeds to SAIC</u>
<i>Per Share</i>	\$	\$	\$
<i>Total</i>	\$	\$	\$

We have granted the underwriters the right to purchase up to an additional 11,250,000 shares of common stock to cover over-allotments.

The Securities and Exchange Commission and state securities regulators have not approved or disapproved these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the shares to purchasers on _____, 2006.

PROSPECTUS SUMMARY

You should read the following summary together with the entire prospectus, including the more detailed information in our financial statements and related notes appearing in the back of this prospectus. You should also carefully consider, among other things, the matters discussed in Risk Factors.

In this prospectus, we use the terms SAIC, we, us and our to refer to Science Applications International Corporation or SAIC, Inc. when the distinction between the two companies is not important. When the distinction is important to the discussion, we use the term Old SAIC to refer to Science Applications International Corporation and New SAIC to refer to SAIC, Inc. Unless otherwise noted, references to years are to fiscal years ended January 31, not calendar years. For example, we refer to the fiscal year ended January 31, 2006 as fiscal 2006. We are currently in fiscal 2007. References to government fiscal years are to fiscal years ended September 30.

SAIC, INC.

Overview

We are a leading provider of scientific, engineering, systems integration and technical services and solutions to all branches of the U.S. military, agencies of the U.S. Department of Defense, the intelligence community, the U.S. Department of Homeland Security and other U.S. Government civil agencies, as well as to customers in selected commercial markets. Our customers seek our domain expertise to solve complex technical challenges requiring innovative solutions for mission-critical functions in such areas as national security, intelligence and homeland defense. The increase in demand for our services and solutions has been driven by priorities including the ongoing global war on terror and the transformation of the U.S. military.

From fiscal 2002 to fiscal 2006, our consolidated revenues increased at a compound annual growth rate of 15.5% to a company record of \$7.8 billion, inclusive of acquisitions and exclusive of Telcordia Technologies, Inc., our commercial telecommunications subsidiary, which we divested in March 2005. Through the first half of fiscal 2007, our consolidated revenues increased by 6% over the same period in the prior year. As of July 31, 2006, we had a portfolio of approximately 9,000 active contracts. Our total consolidated negotiated backlog as of July 31, 2006 was approximately \$16.0 billion, which included funded backlog of approximately \$4.0 billion, compared to approximately \$15.1 billion and \$3.9 billion, respectively, as of January 31, 2006. In May 2006, Washington Technology, a leading industry publication, ranked us number three in its list of Top Federal Prime Contractors in the United States based on information technology (IT), telecommunications and systems integration revenues.

The U.S. Government is our largest customer, in the aggregate representing 89% of our total consolidated revenues in fiscal 2006. According to Congressional Budget Office estimates, U.S. Government total discretionary outlays in government fiscal 2006 will be approximately \$1,035 billion, and we estimate that more than \$200 billion of this amount will be spent in areas in which we compete. We believe that U.S. Government spending in these areas will continue to grow over the next several years as a result of homeland security and intelligence needs arising from the global war on terror, the ongoing transformation of the U.S. military and the increased reliance on outsourcing by the U.S. Government.

Competitive Strengths

Edgar Filing: SAIC, Inc. - Form S-1/A

To maximize our ability to consistently deliver innovative solutions to help meet our customers' most challenging needs, and to grow our business and increase stockholder value, we rely on the following key strengths:

- Skilled Personnel and Experienced Management;
- Employee Ownership and Core Values;

Table of Contents

- Knowledge of Customers Needs;
- Technical Expertise;
- Trusted Services and Solutions Provider;
- Proven Marketing and Business Development Organization; and
- Ability to Complete and Integrate Acquisitions.

Growth Strategy

We are focused on continuing to grow our business as a leading scientific, engineering, systems integration and technical services and solutions company. In our Government segment, we seek to become the leading provider of systems engineering, systems integration and technical services and solutions by focusing on the U.S. Government's increased emphasis on defense transformation, intelligence and homeland defense. In addition, we plan to continue to pursue strategic acquisitions in areas such as these, where we anticipate higher growth. In our Commercial segment, we seek to grow our business in our existing targeted markets, in addition to becoming a leader in new selected vertical markets in which we can leverage our specialized experience and skill sets.

Our Services and Solutions

We offer a broad range of services and solutions to address our customers' most complex and critical technology-related needs. These services and solutions include the following:

Defense Transformation. We develop leading-edge concepts, technologies and systems to solve complex challenges facing the U.S. military and its allies, helping them transform the way they fight.

Intelligence. We develop solutions to help the U.S. defense, intelligence and homeland security communities build an integrated intelligence picture, allowing them to be more agile and dynamic in challenging environments and produce actionable intelligence.

Homeland Security and Defense. We develop technical solutions and provide systems integration and mission-critical support services to help federal, state, local and foreign governments and private-sector customers protect the United States and allied homelands.

Logistics and Product Support. We provide logistics and product support solutions to enhance the readiness and operational capability of U.S. military personnel and weapon and support systems.

Systems Engineering and Integration. We provide systems engineering and integration solutions to help our customers design, manage and protect complex IT networks and infrastructure.

Research and Development. As one of the largest science and technology contractors to the U.S. Government, we conduct leading-edge research and development of new technologies with applications in areas such as national security, intelligence and life sciences.

Commercial Services. We help our customers become more competitive, offering technology-driven consulting, systems integration and outsourcing services and solutions in selected commercial markets, currently IT support for oil and gas exploration and production, applications and IT infrastructure management for utilities and data lifecycle management for pharmaceuticals.

Table of Contents

On September 27, 2006, the stockholders of Old SAIC adopted and approved a merger agreement providing for the merger of Old SAIC with New SAIC's wholly-owned subsidiary, SAIC Merger Sub, Inc. The purpose of the merger is to effect a capital restructuring, which is a necessary step in order to complete this offering. We refer to this merger in this prospectus as the reorganization merger. After the reorganization merger, Old SAIC will be a wholly-owned subsidiary of New SAIC and Old SAIC stockholders will become New SAIC stockholders. We expect to complete the reorganization merger before the completion of this offering, and the completion of the reorganization merger is a condition to the completion of this offering. After the reorganization merger and upon the completion of this offering, our current stockholders will hold approximately 81% of our total outstanding capital stock and 98% of our total voting power. Unless we indicate otherwise, the information in this prospectus assumes that we complete the reorganization merger.

We are headquartered in San Diego, California. Our address is 10260 Campus Point Drive, San Diego, California 92121, and our telephone number is (858) 826-6000. Our website can be found on the Internet at www.saic.com. The website contains information about us and our operations. The contents of our website are not incorporated by reference into this prospectus.

Table of Contents**THE OFFERING**

Common stock offered by us	75,000,000 shares
Stock to be outstanding immediately after completion of this offering:	
Common stock	75,000,000 shares
Class A preferred stock, divided into four series:	
Series A-1 preferred stock	65,214,563 shares
Series A-2 preferred stock	65,214,563 shares
Series A-3 preferred stock	97,821,845 shares
Series A-4 preferred stock	97,821,845 shares
Total class A preferred stock	326,072,816 shares
Total capital stock	401,072,816 shares
Voting rights:	
Common stock	One vote per share
Class A preferred stock	10 votes per share
NYSE symbol	SAI

Net proceeds from this offering will be approximately \$1.0 billion, or \$1.2 billion if the underwriters exercise their over-allotment option in full, based upon an assumed initial public offering price of \$14 per share, the mid-point of the range set forth on the cover page of this prospectus, and after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us. A special dividend of between \$1.6 billion and \$2.4 billion will be declared prior to this offering by our principal operating subsidiary and, following completion of this offering, paid from cash held by the subsidiary to its former stockholders of record. We will not pay this special dividend on shares sold in this offering. The special dividend will exceed the net proceeds from this offering by an amount ranging from approximately \$620 million to \$1.4 billion, depending on the size of the dividend. See [Use of Proceeds](#) and [The Merger and the Special Dividend](#).

The principal purpose of this offering is to better enable us to use our cash and cash flows generated from operations to fund internal growth and growth through acquisitions as well as provide us with publicly traded stock that can be used for future acquisitions. Creating a public market for our common stock will ultimately eliminate our use of cash to provide liquidity to our stockholders by repurchasing their shares in the limited market or in other transactions.

The payment of the special dividend is conditioned upon the completion of this offering. We do not expect to pay any other dividends on our capital stock in the foreseeable future and we currently intend to retain any future earnings to finance our operations and growth. The exact amount of the special dividend and any future determination to pay cash dividends will be at the discretion of our board of directors and will depend on available cash, estimated cash needs, earnings, financial condition, operating results, capital requirements, applicable contractual restrictions and other factors our board of directors deems relevant. See [Use of Proceeds](#), [Dividend Policy](#) and [The Merger and the Special Dividend](#).

Table of Contents

Shares of our class A preferred stock are convertible on a one-for-one basis into our common stock, subject to certain restrictions on the timing of conversion, which we refer to as restriction periods. The four series of class A preferred stock will be identical, except for the restriction periods applicable to each series. See Description of Capital Stock.

The number of shares of class A preferred stock that will be outstanding immediately after the completion of this offering is based on 159,002,268 shares of Old SAIC class A common stock and 201,707 shares of Old SAIC class B common stock outstanding as of July 31, 2006 (which will convert into shares of New SAIC class A preferred stock pursuant to the reorganization merger described below), and excludes the following:

- 55,191,326 shares of New SAIC class A preferred stock issuable upon exercise of options to purchase 27,595,663 shares of Old SAIC class A common stock, which will be assumed by New SAIC in the reorganization merger, with a weighted-average exercise price of \$18.10 per share (such number of shares and price being adjusted for the reorganization merger, but not for the anticipated increase in the number of shares and decrease in weighted-average exercise price resulting from payment of the special dividend); and
- 84,000,000 shares of New SAIC stock (which can be issued as class A preferred stock or common stock) initially reserved for future grants under our 2006 Equity Incentive Plan and 2006 Employee Stock Purchase Plan.

Except as otherwise indicated, all information in this prospectus relating to New SAIC (1) assumes that the underwriters' over-allotment option will not be exercised and (2) gives effect to the reorganization merger of Old SAIC with a wholly-owned subsidiary of New SAIC, pursuant to which:

- each share of Old SAIC class A common stock will convert into the right to receive two shares of New SAIC class A preferred stock, which will be allocated among four series, A-1, A-2, A-3 and A-4, as described under The Merger and the Special Dividend; and
- each share of Old SAIC class B common stock will convert into the right to receive 40 shares of New SAIC class A preferred stock, which will be allocated among four series, A-1, A-2, A-3 and A-4, as described under The Merger and the Special Dividend.

Old SAIC financial statements have not been adjusted to give effect to the reorganization merger.

Please read Risk Factors and other information included in this prospectus for a discussion of the factors you should consider carefully before deciding to invest in our common stock.

Table of Contents

SUMMARY CONSOLIDATED FINANCIAL DATA

You should read the summary consolidated financial data presented below in conjunction with Selected Consolidated Financial Data and Management's Discussion and Analysis of Financial Condition and Results of Operations and our audited consolidated financial statements, unaudited condensed consolidated financial statements and the related notes included elsewhere in this prospectus. The summary consolidated financial data presented below under Consolidated Statement of Income Data for the years ended January 31, 2006, 2005 and 2004 have been derived from our audited consolidated financial statements included elsewhere in this prospectus.

The summary consolidated financial data presented below under Consolidated Statement of Income Data for the six months ended July 31, 2006 and 2005 and Consolidated Balance Sheet Data as of July 31, 2006 have been derived from our unaudited condensed consolidated financial statements that are included elsewhere in this prospectus and have been prepared on the same basis as our audited consolidated financial statements. In the opinion of management, the unaudited condensed consolidated financial statements reflect all adjustments, consisting only of normal and recurring adjustments, necessary to state fairly our results of operations for and as of the periods presented. Historical results are not necessarily indicative of the results of operations to be expected for future periods.

The special dividend is expected to range from \$10 to \$15 per share of Old SAIC class A common stock and from \$200 to \$300 per share of Old SAIC class B common stock, which is the equivalent of a range from \$5 to \$7.50 per share of New SAIC class A preferred stock. The finance committee of our board of directors has recommended that our board of directors declare the special dividend at the maximum amount of the dividend range; therefore, as applicable, certain pro forma and pro forma as adjusted financial data in the following table assume a special dividend of \$7.50 per equivalent share of New SAIC class A preferred stock, the maximum amount of the dividend range. The pro forma earnings per share and pro forma equivalent share data reflect the dilutive effect of the completion of the reorganization merger for the periods presented. The pro forma as adjusted earnings per share and the pro forma as adjusted equivalent share data reflect the dilutive effect of the special dividend that exceeds earnings for the year ended January 31, 2006 and the completion of the reorganization merger. For purposes of computing pro forma earnings per share, New SAIC class A preferred stock has been treated as if it is common stock since the holders of New SAIC class A preferred stock will have the same rights and privileges, except for voting rights, as holders of New SAIC common stock. The pro forma consolidated balance sheet data reflect the balance sheet data as of July 31, 2006, after giving effect to Old SAIC's special dividend and the completion of this offering. The pro forma as adjusted consolidated balance sheet data reflect the balance sheet data as of July 31, 2006, after giving effect to the special dividend, the completion of the reorganization merger and the completion of the sale of common stock by us in this offering at an assumed initial public offering price of \$14 per share (\$13.44 per share after deducting estimated underwriting discounts and commissions and offering expenses).

Total number of employees (9)	43,600	42,400	39,300	43,100

- (1) Pro forma earnings per share and pro forma equivalent shares reflect the conversion of each outstanding share of Old SAIC class A common stock into two shares of New SAIC class A preferred stock and each outstanding share of Old SAIC class B common stock into 40 shares of New SAIC class A preferred stock and has been shown for all periods presented as a recapitalization of Old SAIC with New SAIC.
- (2) Pro forma diluted earnings per share and pro forma diluted equivalent shares include the effect of converting dilutive securities on the same basis as the Old SAIC class A common stock. The pro forma dilutive equivalent shares are comprised of stock options and other stock awards granted under stock-based compensation plans that were outstanding during the periods noted. These securities have been converted to New SAIC class A preferred stock for the pro forma earnings per share calculation.
- (3) Pro forma as adjusted earnings per share and pro forma as adjusted equivalent shares reflect the completion of the reorganization merger and the effect of the payment of the special dividend that exceeds earnings for the period presented and that Old SAIC intends to pay to its stockholders following completion of this offering. See Use of Proceeds, Capitalization and The Merger and the Special Dividend.
- (4) Pro forma as adjusted earnings per share and pro forma as adjusted equivalent shares for both basic and diluted computations assume the sale of 113 million shares of our common stock and net proceeds of \$13.44 per share, using the maximum amount of the dividend range during each of the periods indicated. Such shares represent the assumed number of shares of our common stock necessary to be sold in this offering to replace the capital in excess of earnings for

Edgar Filing: SAIC, Inc. - Form S-1/A

the year ended January 31, 2006 being withdrawn for the special dividend to be paid by Old SAIC. Pro forma as adjusted earnings per share and pro forma as adjusted equivalent shares for both basic and diluted computations also reflect the conversion of each outstanding share of Old SAIC class A common stock into two shares of New SAIC class A preferred stock and each outstanding share of Old SAIC class B common stock into 40 shares of New SAIC class A preferred stock.

- (5) EBITDA is defined as net income plus income tax expense, net interest expense, and depreciation and amortization expense. EBITDA is considered a non-GAAP financial measure. We believe that EBITDA is an important measure of our performance and is a useful supplement to net income and other income statement data. We believe EBITDA is useful to management and investors in comparing our performance to that of other companies in our industry, since it removes the impact of (a) differences in capital structure, including the effects of interest income and expense, (b) differences among the tax regimes to which we and comparable companies are subject and

Table of Contents

(c) differences in the age, method of acquisition and approach to depreciation and amortization of productive assets. However, because other companies may calculate EBITDA differently than we do, it may be of limited usefulness as a comparative measure. EBITDA has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are: (a) EBITDA does not reflect our cash expenditures, or future requirements, for capital expenditures or contractual commitments, (b) EBITDA does not reflect changes in, or cash requirements for, our working capital needs, (c) EBITDA does not reflect the interest expense, or the cash requirements necessary to service our principal payments, on our debt, (d) EBITDA does not reflect income taxes or the cash requirements for any tax payments, and (e) although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and EBITDA does not reflect any cash requirements for such replacements.

The following is a reconciliation of EBITDA to net income.

	Year Ended January 31			Six Months Ended July 31	
	2006	2005	2004	2006	2005
	(in millions)				
Net income	\$ 927	\$ 409	\$ 351	\$ 209	\$ 682
Interest income	(97)	(45)	(49)	(63)	(43)
Interest expense	89	88	80	46	44
Provision for income taxes	432	149	159	103	434
Depreciation and amortization	70	86	81	34	31
EBITDA	\$ 1,421	\$ 687	\$ 622	\$ 329	\$ 1,148

- (6) Adjusted EBITDA equals EBITDA minus income from discontinued operations before income taxes and gain on sale of business units and subsidiary common stock, plus goodwill impairment, net gain or (loss) on marketable securities and other investments including impairment losses and investment activities by our venture capital subsidiary. We utilize and present Adjusted EBITDA as a further supplemental measure of our performance. We prepare Adjusted EBITDA to eliminate the impact of items we do not consider indicative of ongoing operating performance. You are encouraged to evaluate each adjustment and the reasons we consider them appropriate for supplemental analysis. As an analytical tool, Adjusted EBITDA is subject to all of the limitations applicable to EBITDA.

The following is a reconciliation of Adjusted EBITDA to EBITDA.

	Year Ended January 31			Six Months Ended July 31	
	2006	2005	2004	2006	2005
	(in millions)				
EBITDA	\$ 1,421	\$ 687	\$ 622	\$ 329	\$ 1,148
Income from discontinued operations, net of tax	(582)	(137)	(127)	(12)	(542)
Depreciation and amortization of discontinued operations		(30)	(44)		
Provision for income taxes of discontinued operations	(293)	(18)	(19)	13	(328)
Gain on sale of business units and subsidiary common stock		(2)			
Goodwill impairment			7		
Net loss (gain) on marketable securities and other investments, including impairment losses	15	16	(5)		5
Investment activities by venture capital subsidiary	2	3	4		1
Adjusted EBITDA	\$ 563	\$ 519	\$ 438	\$ 330	\$ 284

Edgar Filing: SAIC, Inc. - Form S-1/A

- (7) Number of contracts from which we recognized more than \$10 million in annual revenues in the periods presented.
- (8) Total consolidated negotiated backlog consists of funded backlog and negotiated unfunded backlog. Funded backlog represents the portion of backlog for which funding currently is appropriated or otherwise authorized and is payable to us upon completion of a specified portion of work, less revenues previously recognized. Our funded backlog does not include the full potential value of our contracts because the U.S. Government and our other customers often appropriate or authorize funds for a particular program or contract on a yearly or quarterly basis, even though the contract may call for performance over a number of years. Negotiated unfunded backlog represents (a) firm orders for which funding has not been appropriated or otherwise authorized and (b) unexercised contract options. When a definitive contract or contract amendment is executed and funding has been appropriated or otherwise authorized, funded backlog is increased by the difference between the funded dollar value of the contract or contract amendment and the revenues recognized to date. Negotiated unfunded backlog does not include any estimate of future potential task orders that might be awarded under (a) indefinite delivery / indefinite quantity contract vehicles, (b) government-wide acquisition contract vehicles or (c) U.S. General Services Administration Schedule contract vehicles. See [Risk Factors](#) [Risks Relating to Our Business](#) We may not realize as revenues the full amounts reflected in our backlog, which could adversely affect our future revenues and growth prospects, [Management's Discussion and Analysis of Financial Condition and Results of Operations](#) [Key Financial Metrics](#) [Sources of Revenues](#) [Backlog](#) and [Business Contracts](#) [Backlog](#).
- (9) Includes full-time and part-time employees and excludes employees of our former Telcordia Technologies, Inc. subsidiary.

Table of Contents

RISK FACTORS

Investing in our common stock involves a high degree of risk. You should carefully consider the risks described below together with all of the other information contained in this prospectus before deciding whether to purchase our common stock. If any of the following risks occurs, the trading price of our common stock could decline and you may lose all or part of your investment.

Risks Relating to Our Business

We depend on our contracts with U.S. Government agencies for a significant portion of our revenues and, if our reputation or relationships with these agencies were harmed, our future revenues and growth prospects would be adversely affected.

We are heavily dependent upon the U.S. Government as our primary customer and we believe that the success and development of our business will continue to depend on our successful participation in U.S. Government contract programs. We generated 89%, 86% and 85% of our total consolidated revenues from the U.S. Government (including all branches of the U.S. military) in fiscal 2006, 2005 and 2004, respectively. Revenues from the U.S. Army represented 16%, 13% and 13% of our total consolidated revenues in fiscal 2006, 2005 and 2004, respectively. Revenues from the U.S. Navy represented 14%, 13% and 12% of our total consolidated revenues in fiscal 2006, 2005 and 2004, respectively. Revenues from the U.S. Air Force represented 10%, 11% and 11% of our total consolidated revenues in fiscal 2006, 2005 and 2004, respectively.

For the foreseeable future, we expect to continue to derive a substantial portion of our revenues from work performed under U.S. Government contracts. Our reputation and relationship with the U.S. Government, and in particular with the agencies of the Department of Defense (DoD) and the U.S. intelligence community, is a key factor in maintaining and growing revenues under contracts with the U.S. Government. Negative press reports regarding poor contract performance, employee misconduct, information security breaches or other aspects of our business could harm our reputation, particularly with these agencies. If our reputation with these agencies is negatively affected, or if we are suspended or debarred from contracting with government agencies for any reason, such actions would decrease the amount of business that the U.S. Government does with us and our future revenues and growth prospects would be adversely affected.

The U.S. Government may modify, curtail or terminate our contracts at any time prior to their completion and, if we do not replace them, we may be unable to sustain our revenue growth and may suffer a decline in revenues.

Many of the U.S. Government programs in which we participate as a contractor or subcontractor may extend for several years. These programs are normally funded on an annual basis. Under our contracts, the U.S. Government generally has the right not to exercise options to extend or expand our contracts and may modify, curtail or terminate the contracts and subcontracts at its convenience. Any decision by the U.S. Government not to exercise contract options or to modify, curtail or terminate our major programs or contracts would adversely affect our revenues and revenue growth.

We may not realize as revenues the full amounts reflected in our backlog, which could adversely affect our future revenues and growth prospects.

Edgar Filing: SAIC, Inc. - Form S-1/A

As of July 31, 2006, our total consolidated negotiated backlog was \$16.0 billion, which included \$4.0 billion in funded backlog (for information regarding our historical backlog levels, see Business Contracts Backlog). The U.S. Government's ability not to exercise contract options or to modify, curtail or terminate our major programs or contracts makes the calculation of backlog subject to numerous uncertainties. Due to the uncertain nature of our contracts with the U.S. Government and the rights of our customers in our Commercial segment to cancel contracts and purchase orders in certain circumstances, we may never realize revenues from some of the engagements that are included in our backlog. Our unfunded backlog, in particular, contains amounts

Table of Contents

that we may never realize as revenues because the maximum contract value specified under a U.S. Government contract or task order awarded to us is not necessarily indicative of the revenues that we will realize under that contract. If we fail to realize as revenues amounts included in our backlog, our future revenue and growth prospects may be adversely affected.

The U.S. Government has increasingly relied on certain types of contracts that are subject to a competitive bidding process. Due to this competitive pressure, we may be unable to sustain our revenue growth and profitability.

The U.S. Government has increasingly been using contract vehicles, such as indefinite delivery/indefinite quantity (IDIQ), government-wide acquisition contracts (GWACs) and General Services Administration (GSA) Schedule contract vehicles, to obtain commitments from contractors to provide various products or services on pre-established terms and conditions. Under these contracts, the U.S. Government issues task orders for specific services or products it needs and the contractor supplies these products or services in accordance with the previously agreed terms. These contracts often have multi-year terms and unfunded ceiling amounts, therefore enabling but not committing the U.S. Government to purchase substantial amounts of products and services from one or more contractors. These contracts are typically subject to a competitive bidding process that results in greater competition and increased pricing pressure. Accordingly, we may not be able to realize revenues and/or maintain our historical profit margins under these contracts. The competitive bidding process also presents a number of more general risks, including the risk of unforeseen technological difficulties and cost overruns that may result from our bidding on programs before completion of their design and the risk that we may encounter expense, delay or modifications to previously awarded contracts as a result of our competitors protesting or challenging contracts awarded to us in competitive bidding. Our failure to compete effectively in this procurement environment would adversely affect our revenues and/or profitability.

Our overall profit margins on our contracts may decrease and our results of operations could be adversely affected if material and subcontract revenues continue to grow at a faster rate than labor-related revenues.

Our revenues are generated from either the efforts of our technical staff, which we refer to as labor-related revenues, or the receipt of payments for the costs of materials and subcontracts used in a project, which we refer to as material and subcontract (M&S) revenues. Generally, our M&S revenues have lower profit margins than our labor-related revenues. Our labor-related revenues increased by 6% from fiscal 2005 to 2006 and by 16% from fiscal 2004 to 2005, while our M&S revenues increased by 13% from fiscal 2005 to 2006 and by 39% from fiscal 2004 to 2005. M&S revenues accounted for 37%, 36% and 32% of our total consolidated revenues for fiscal 2006, 2005 and 2004, respectively, and labor-related revenues accounted for 63%, 64% and 68% of our total consolidated revenues for fiscal 2006, 2005 and 2004, respectively. If M&S revenues continue to grow at a faster rate than labor-related revenues, our overall profit margins on our contracts may decrease and our profitability could be adversely affected.

A decline in the U.S. defense budget or changes in budgetary priorities may adversely affect our future revenues and limit our growth prospects.

Revenues under contracts with the DoD, including subcontracts under which the DoD is the ultimate purchaser, represented 69% of our total consolidated revenues in fiscal 2006. Changes in the budgetary priorities of the U.S. Government or the DoD could directly affect our operating results. For example, the U.S. defense budget declined in the late 1980s and the early 1990s, resulting in a slowing of new program starts, program delays and program cancellations. These reductions caused most defense-related government contractors to experience declining revenues, increased pressure on operating margins and, in some cases, net losses. While spending authorizations for defense-related programs by the U.S. Government have increased in recent years, and in particular after the September 11, 2001 terrorist attacks, these spending levels may not be sustainable, and future levels of spending and authorizations for these programs may decrease, remain constant or shift to programs in areas where we do not currently provide services. Such changes in spending authorizations and

Table of Contents

budgetary priorities could occur due to the significant relief and recovery costs associated with natural disasters, the rapid growth of the federal budget deficit, increasing political pressure to reduce overall levels of government spending, or other factors. The U.S. Government conducted a strategic review of the U.S. defense budget in government fiscal 2005 and 2006, known as the Quadrennial Defense Review (QDR), and the results of this strategic review may result in shifts in DoD budgetary priorities or reductions in overall U.S. Government spending for defense-related programs, including with respect to programs from which we expect to derive a significant portion of our revenues. A significant decline in overall U.S. Government spending, including in the areas of national security, defense transformation, intelligence and homeland security, or a significant shift in its spending priorities, or the substantial reduction or elimination of particular defense-related programs, would adversely affect our future revenues and limit our growth prospects.

A delay in the completion of the U.S. Government's budget process could delay procurement of our services and solutions and have an adverse effect on our future revenues.

In years when the U.S. Government does not complete its budget process before the end of its fiscal year on September 30, government operations are typically funded pursuant to a continuing resolution that authorizes agencies of the U.S. Government to continue to operate, but does not authorize new spending initiatives. When the U.S. Government operates under a continuing resolution, delays can occur in the procurement of our services and solutions. We have from time to time experienced a decline in revenues in our quarter ending January 31 as a result of this annual budget cycle, and we could experience similar declines in revenues if the budget process is delayed significantly in future periods. For example, the delay in the approval of a supplemental spending bill in government fiscal 2006 resulted in procurement delays by the U.S. Government. Similar delays could have an adverse effect on our future revenues.

Our financial results may vary significantly from period-to-period.

Our financial results may fluctuate as a result of a number of factors, many of which are outside of our control. For these reasons, comparing our operating results on a period-to-period basis may not be meaningful, and you should not rely on our past results as an indication of our future performance. Our financial results may be negatively affected by any of the risk factors listed in this Risk Factors section and, in particular, the following risks:

- a reduction of government funding or delay in the completion of the U.S. Government's budget process
- decisions by the U.S. Government not to exercise contract options or to modify, curtail or terminate our major programs or contracts
- the potential decline in our overall profit margins if our material and subcontract revenues grow at a faster rate than labor-related revenues
- failure to accurately estimate or control costs under firm fixed price (FFP) contracts
- adverse judgments or settlements in legal disputes
- expenses related to acquisitions, mergers or joint ventures

- other one-time financial charges

The failure to successfully resolve issues related to our Greek Olympic contract could adversely affect our profitability and could require us to make large payments to the Greek government.

We entered into an FFP contract with the Greek government (Greek contract) to provide the security infrastructure that was used to support the 2004 Athens Summer Olympic Games and to serve as the security system for the Greek government's public order departments after the Olympic Games. The Greek government has not made various payments under this contract and has not yet formally accepted the security infrastructure, which contains certain omissions and deviations from the contractual requirements. In 2005, we submitted a

Table of Contents

proposal for an alternative technical approach for the Command Decision and Support System (subsystems 1-7) and are attempting to address the omissions and deviations identified on the other subsystems. We have been negotiating for many months with the Greek government for a contractual modification to address technical, financial and contractual issues. To date, a mutually satisfactory agreement on the contractual modification has not been reached.

In accordance with the terms of the Greek contract, we are required to provide certain payment performance and offset bonds in favor of the Greek government. These bonding requirements have been met through the issuance of standby letters of credit. Under the terms of these bonding arrangements, the Greek government currently has the right to call some or all of the \$245 million of standby letters of credit outstanding. The letters of credit supporting the payment bonds (\$159 million) and performance bonds (\$33 million) may be called by the Greek government by submitting a written statement to the guaranteeing bank that we have not fulfilled our obligations under the Greek contract. The letters of credit supporting the offset bonds (\$53 million) may be called by the Greek government by submitting a written statement to the guaranteeing bank that we have not fulfilled our obligations under a separate offset contract requiring us, among other things, to use Greek subcontractors on the Greek contract. If this occurs, the banks issuing the letters of credit supporting these bonding arrangements will be entitled to immediate payment from us for the amount obtained from the guaranteeing banks by the Greek government, reducing our cash balances. Although we believe that any amounts obtained by the Greek government through the calling of these letters of credit may be retained by the Greek government only as security against any actual damages it proves in arbitration, if the Greek government does call these letters of credit, we can make no assurances as to whether we will be successful in arbitration or able to recover amounts owed from the Greek government.

Although we have been in discussions with the Greek government and our principal subcontractor to attempt to resolve these issues, we may not be able to reach mutually acceptable agreements, and we cannot predict the financial impact on us of the resolution of these issues. On April 21, 2006, we instituted arbitration proceedings before the International Chamber of Commerce to pursue our rights and remedies related to this contract. We are seeking total damages in excess of \$76 million, with the precise amount to be proven in arbitration. The Greek government filed its response to our arbitration complaint on July 29, 2006 generally denying our claims. Although the Greek government reserved its right to assert a claim in the arbitration proceedings in the future, its response did not include a counterclaim. Under the terms of the contract, disputes are subject to ultimate resolution by binding arbitration before a panel of three Greek arbitrators in Greece. Due to the complex nature of the legal and factual issues involved and the uncertainty of litigation in general, the outcome of the arbitration is uncertain. There is no assurance that we will prevail in the arbitration.

While we are still pursuing the execution of an acceptable contract modification with the Greek government, based upon our inability to obtain such modification for more than two years, we believe it is most likely that the resolution of the issues surrounding the Greek contract will be determined in arbitration under the proceedings described above or through a negotiated settlement with the Greek government. Due to the complex nature of the issues surrounding the Greek contract, resolution is uncertain and will depend upon future negotiations with the Greek government or the outcome of the arbitration proceedings. Successful imposition of damages or claims by the Greek government or subcontractors against us, the calling of our bonds, additional contract costs required to fulfill our obligations, or additional revenue reductions arising from the negotiation of the Greek contract modification could have a material adverse affect on our consolidated financial position, results of operations and cash flows.

We have received \$147 million of payments from the Greek government under the contract and recognized as revenues only \$120 million of the total system price of \$199 million. As of July 31, 2006, we have recorded \$123 million of losses on this contract and unfavorable resolution of this matter could further adversely affect our profitability and cash balances. In the event we do not prevail in the arbitration or are unable to resolve the various disputes under the Greek contract, we could incur additional losses. If the Greek government asserts claims against us in the arbitration and it is determined that we have breached the Greek contract and, as a result, owe the Greek government damages, such damages could include, but are not limited to, (1) re-procurement costs, (2) repayment of amounts paid of \$147 million under the Greek contract, (3) penalties for delayed delivery

Table of Contents

in an amount up to \$15 million, and (4) forfeiture of good performance bonds in the amount of \$33 million. See Management's Discussion and Analysis of Financial Condition and Results of Operations Commitments and Contingencies Firm Fixed-Price Contract with the Greek Government, Business Legal Proceedings and Note 10 of the notes to condensed consolidated financial statements for the six months ended July 31, 2006.

We use estimates in recognizing revenue, and changes in our estimates could adversely affect our future financial results.

Revenues from our contracts are primarily recognized using the percentage-of-completion method based on progress towards completion, with performance measured by the cost-to-cost method, efforts-expended method or units-of-delivery method, all of which require estimates of total costs at completion. Estimating costs at completion on our long-term contracts, particularly due to the technical nature of the services being performed, is complex and involves significant judgment. Adjustments to original estimates are often required as work progresses, experience is gained and additional information becomes known, even though the scope of the work required under the contract may not change. Any adjustment as a result of a change in estimate is recognized as events become known. Should updated estimates indicate that we will experience a loss on the contract, we recognize the estimated loss at the time it is determined. Additional information may subsequently indicate that the loss is more or less than initially recognized, which requires further adjustments in our consolidated financial statements, as was the case with the Greek contract. Due to the size of many of our contracts, changes in the underlying assumptions, circumstances or estimates could result in adjustments that may adversely affect future financial results.

Adverse judgments or settlements in legal disputes could require us to pay potentially large damage awards, which would adversely affect our cash balances and profitability.

We are subject to, and may become a party to, a variety of litigation or other claims and suits that arise from time to time in the ordinary course of our business. Adverse judgments or settlements in some or all of these legal disputes may result in significant monetary damages or injunctive relief against us. The litigation and other claims described in this prospectus are subject to inherent uncertainties and management's view of these matters may change in the future. For example, an unfavorable final settlement or judgment of our dispute with the Greek government, Telcordia Technologies, Inc.'s dispute with Telkom South Africa, or our disputes relating to our joint venture, INTESA, could adversely affect our cash balances and profitability. See Management's Discussion and Analysis of Financial Condition and Results of Operations Commitments and Contingencies.

Our failure to attract, train and retain skilled employees, including our management team, would adversely affect our ability to execute our strategy.

The availability of highly trained and skilled technical, professional and management personnel is critical to our future growth and profitability. Competition for scientists, engineers, technicians and professional and management personnel is intense and competitors aggressively recruit key employees. Because of our growth and increased competition for experienced personnel, particularly in highly specialized areas, it has become more difficult to meet all of our needs for these employees in a timely manner and this may affect our growth in the current fiscal year and in future years. Although we intend to continue to devote significant resources to recruit, train and retain qualified employees, we may not be able to attract and retain these employees. Any failure to do so would have an adverse effect on our ability to execute our strategy.

Additionally, in the past, we have promoted our employee ownership culture as a competitive advantage in recruiting and retaining employees. Although we intend to retain the essential elements of an employee ownership culture, if our employees or recruits perceive that becoming a publicly traded company will negatively impact our employee ownership culture, our ability to recruit and retain employees may be adversely

impacted.

In addition to attracting and retaining qualified engineering, technical and professional personnel, we believe that our success will also depend on the continued employment of a highly qualified and experienced

Table of Contents

senior management team and its ability to generate new business. Our inability to retain appropriately qualified and experienced senior executives could cause us to lose customer relationships or new business opportunities.

Our revenues and growth prospects may be adversely affected if we or our employees are unable to obtain the security clearances or other qualifications we and they need to perform services for our customers.

Many U.S. Government programs require contractors to have security clearances. Depending on the level of required clearance, security clearances can be difficult and time-consuming to obtain. If we or our employees are unable to obtain or retain necessary security clearances, we may not be able to win new business, and our existing customers could terminate their contracts with us or decide not to renew them. To the extent we cannot obtain or maintain the required security clearances for our employees working on a particular contract, we may not derive the revenue anticipated from the contract.

Employee misconduct, including security breaches, or our failure to comply with laws or regulations applicable to our business could cause us to lose customers or our ability to contract with the U.S. Government.

Because we are a U.S. Government contractor, misconduct, fraud or other improper activities by our employees or our failure to comply with laws or regulations could have a significant negative impact on our business and reputation. Such misconduct could include the failure to comply with U.S. Government procurement regulations, regulations regarding the protection of classified information, legislation regarding the pricing of labor and other costs in U.S. Government contracts, regulations on lobbying or similar activities, environmental laws and any other applicable laws or regulations. Many of the systems we develop involve managing and protecting information relating to national security and other sensitive government functions. A security breach in one of these systems could prevent us from having access to such critically sensitive systems. Other examples of potential employee misconduct include time card fraud and violations of the Anti-Kickback Act. The precautions we take to prevent and detect these activities may not be effective, and we could face unknown risks or losses. Our failure to comply with applicable laws or regulations or misconduct by any of our employees could subject us to fines and penalties, loss of security clearance and suspension or debarment from contracting with the U.S. Government, any of which would adversely affect our business.

Our U.S. Government contracts may be terminated and we may be liable for penalties under a variety of procurement rules and regulations and changes in government regulations or practices could adversely affect our profitability, cash balances or growth prospects.

We must comply with laws and regulations relating to the formation, administration and performance of U.S. Government contracts, which affect how we do business with our customers. Such laws and regulations may potentially impose added costs on our business and our failure to comply with them may lead to penalties and the termination of our U.S. Government contracts. Some significant regulations that affect us include:

- the Federal Acquisition Regulation and supplements, which regulate the formation, administration and performance of U.S. Government contracts
- the Truth in Negotiations Act, which requires certification and disclosure of cost and pricing data in connection with contract negotiations

Edgar Filing: SAIC, Inc. - Form S-1/A

- the Cost Accounting Standards, which impose accounting requirements that govern our right to reimbursement under certain cost-based government contracts

The U.S. Government may revise its procurement practices or adopt new contract rules and regulations, such as cost accounting standards, at any time. In addition, the U.S. Government may face restrictions or pressure from government employees and their unions regarding the amount of services the U.S. Government may obtain from private contractors. Any of these changes could impair our ability to obtain new contracts or contracts under which

Table of Contents

we currently perform when those contracts are put up for recompetition bids. Any new contracting methods could be costly or administratively difficult for us to implement and could adversely affect our future revenues.

Additionally, our contracts with the U.S. Government are subject to periodic review and investigation. If such a review or investigation identifies improper or illegal activities, we may be subject to civil or criminal penalties or administrative sanctions, including the termination of contracts, forfeiture of profits, the triggering of price reduction clauses, suspension of payments, fines and suspension or debarment from doing business with U.S. Government agencies. We could also suffer harm to our reputation if allegations of impropriety were made against us, which would impair our ability to win awards of contracts in the future or receive renewals of existing contracts. We are from time to time subject to investigations by the DoD and other agencies. Although we have never had any material penalties or administrative sanctions imposed upon us, such penalties and sanctions are not uncommon in the industry. If we incur a material penalty or administrative sanction or otherwise suffer harm to our reputation, our profitability, cash position and future prospects could be adversely affected.

Our business is subject to routine audits and cost adjustments by the U.S. Government, which, if resolved unfavorably to us, could adversely affect our profitability.

U.S. Government agencies routinely audit and review their contractors' performance on contracts, cost structure, pricing practices and compliance with applicable laws, regulations and standards. They also review the adequacy of, and a contractor's compliance with, its internal control systems and policies, including the contractor's purchasing, property, estimating, compensation and management information systems. Such audits may result in adjustments to our contract costs, and any costs found to be improperly allocated will not be reimbursed. To date, none of our audits has resulted in material adjustments and all of our indirect contract costs have been agreed upon through fiscal 2004 and are not subject to further adjustment. We have recorded contract revenues in fiscal 2006, 2005 and 2004 based upon costs we expect to realize upon final audit. However, we do not know the outcome of any future audits and adjustments and, if future audit adjustments exceed our estimates, our profitability could be adversely affected.

If we are unable to accurately estimate the costs, time and resources, or to effectively manage and control costs, associated with various contractual commitments, our profitability may be adversely affected.

Over the last three fiscal years, an average of 18% of our total consolidated revenues were derived from FFP and target cost and fee with risk sharing contracts, in which we bear risk that our actual costs may exceed the estimated costs on which the prices are negotiated. Under FFP contracts, we agree to fulfill our obligations at a set price. Under target cost and fee with risk sharing contracts, customers reimburse our costs plus a specified or target fee or profit, if our actual costs equal a negotiated target cost. Under such contracts, if our actual costs exceed the target costs, our target fee and cost reimbursement are reduced by a portion of the cost overrun. When making proposals for engagements on these types of contracts, we rely heavily on our estimates of costs and timing for completing the associated projects, as well as assumptions regarding technical issues. In each case, our failure to accurately estimate costs or the resources and technology needed to perform our contracts or to effectively manage and control our costs during the performance of our work could result, and in some instances, including the Greek contract, has resulted, in reduced profits or in losses. More generally, any increased or unexpected costs or unanticipated delays in connection with the performance of these contracts, including costs and delays caused by contractual disputes or other factors outside of our control, could make these contracts less profitable or unprofitable. We have recorded losses on FFP contracts from time to time, including the Greek contract. Future losses could have a material adverse effect on our profitability.

Our services and operations sometimes involve using, handling or disposing of hazardous materials, which could expose us to potentially significant liabilities.

Edgar Filing: SAIC, Inc. - Form S-1/A

Our services sometimes involve the investigation or remediation of environmental hazards, as well as the use, handling or disposal of hazardous materials. These activities and our operations generally subject us to extensive foreign, federal, state and local environmental protection and health and safety laws and regulations,

Table of Contents

which, among other things, require us to incur costs to comply with these regulations and could impose liability on us for contamination. Furthermore, failure to comply with these environmental protection and health and safety laws could result in civil or criminal sanctions, including fines, penalties or suspension or debarment from contracting with the U.S. Government. Additionally, our ownership and operation of real property also subjects us to environmental protection laws, some of which hold current or previous owners or operators of businesses and real property liable for contamination, even if they did not know of and were not responsible for the contamination. Although we have not incurred any material costs related to environmental matters to date, any violations of, or liabilities pursuant to, these laws or regulations could adversely affect our financial condition and operating results.

Acquisitions, investments and joint ventures could result in operating difficulties, dilution and other adverse consequences to our business.

We have historically supplemented our internal growth through acquisitions, investments and joint ventures and expect that a significant portion of our planned growth will continue to come from these transactions. We evaluate potential acquisitions, investments and joint ventures on an ongoing basis. Our acquisitions, investments and joint ventures pose many risks, including:

- we may not be able to compete successfully for available acquisition candidates, complete future acquisitions and investments or accurately estimate the financial effect of acquisitions and investments on our business
- future acquisitions, investments and joint ventures may require us to issue capital stock or spend significant cash or may result in a decrease in our operating income or operating margins and we may be unable to recover investments made in any such acquisitions
- we may have trouble integrating acquired businesses or retaining their personnel or customers
- acquisitions, investments or joint ventures may disrupt our business and distract our management from other responsibilities
- we may not be able to effectively influence the operations of our joint ventures, which could adversely affect our operations

We may not be able to continue to identify attractive acquisitions or joint ventures. Acquired entities or joint ventures may not operate profitably. Additionally, we may not realize anticipated synergies and acquisitions may not result in improved operating performance. If our acquisitions, investments or joint ventures fail or perform poorly, our business could be adversely affected.

In conducting our business, we depend on other contractors and subcontractors. If these parties fail to satisfy their obligations to us or the U.S. Government, or if we are unable to maintain these relationships, our revenues, profitability and growth prospects could be adversely affected.

We depend on contractors and subcontractors in conducting our business. There is a risk that we may have disputes with our subcontractors arising from, among other things, the quality and timeliness of work performed by the subcontractor, customer concerns about the subcontractor, our failure to extend existing task orders or issue new task orders under a subcontract, or our hiring of a subcontractor's personnel. In addition, if any of our subcontractors fail to deliver on a timely basis the agreed-upon supplies and/or perform the agreed-upon services, our ability to fulfill our obligations as a prime contractor may be jeopardized. During the past five fiscal years, on several occasions we have incurred non-material losses resulting from the failure of our subcontractors to perform their subcontract obligations. Although material losses due to subcontractor performance problems have been rare, material losses could arise in future periods and subcontractor performance deficiencies could result in a

Edgar Filing: SAIC, Inc. - Form S-1/A

customer terminating a contract for default. A termination for default could expose us to liability and have an adverse effect on our ability to compete for future contracts and orders, especially if the customer is an agency of the U.S. Government.

Table of Contents

We also rely on relationships with other contractors when we act as their subcontractor or joint venture partner. Our future revenues and growth prospects could be adversely affected if other contractors eliminate or reduce their subcontracts or joint venture relationships with us, or if the U.S. Government terminates or reduces these other contractors' programs, does not award them new contracts or refuses to pay under a contract. Additionally, companies that do not initially have access to U.S. Government contracts may perform services as our subcontractor for a U.S. Government customer, and through that exposure secure future positions as prime U.S. Government contractors. If any of our current subcontractors were awarded prime contractor status in the future, not only would we have to compete with them for future U.S. Government contracts, but our ability to perform our current and future contracts might also be impaired.

Systems failures could disrupt our business and impair our ability to effectively provide our products and services to our customers, which could damage our reputation and adversely affect our revenues and profitability.

We are subject to systems failures, including network, software or hardware failures, whether caused by us, third-party service providers, intruders or hackers, computer viruses, natural disasters, power shortages or terrorist attacks. We will be making significant changes to our internal financial systems through fiscal 2009, which could also subject us to systems failures. Any such failures could cause loss of data and interruptions or delays in our or our customers' businesses and could damage our reputation. In addition, the failure or disruption of our communications or utilities could cause us to interrupt or suspend our operations or otherwise adversely affect our business. Our property and business interruption insurance may be inadequate to compensate us for all losses that may occur as a result of any system or operational failure or disruption and, as a result, our future results could be adversely affected.

The systems and networks that we maintain for our customers could also fail. If a system or network we maintain were to fail or experience service interruptions, we might experience loss of revenue or face claims for damages or contract termination. Our errors and omissions liability insurance may be inadequate to compensate us for all the damages that we might incur and, as a result, our future results could be adversely affected.

We have only a limited ability to protect our intellectual property rights, which are important to our success. Our failure to adequately protect our intellectual property rights could adversely affect our competitive position.

Our success depends, in part, upon our ability to protect our proprietary information and other intellectual property. We rely principally on trade secrets to protect much of our intellectual property where we do not believe that patent or copyright protection is appropriate or obtainable. However, trade secrets are difficult to protect. Although our employees are subject to confidentiality obligations, this protection may be inadequate to deter or prevent misappropriation of our confidential information. In addition, we may be unable to detect unauthorized use of our intellectual property or otherwise take appropriate steps to enforce our rights. Failure to obtain or maintain trade secret protection would adversely affect our competitive business position. In addition, if we are unable to prevent third parties from infringing or misappropriating our copyrights, trademarks or other proprietary information, our competitive position could be adversely affected.

We face risks associated with our international business.

Approximately 3% of our total consolidated revenues in each of fiscal 2006, 2005 and 2004 was generated by SAIC entities outside of the United States. Additionally, our domestic entities periodically enter into contracts with foreign customers. These international business operations are subject to a variety of the risks associated with conducting business internationally, including:

Edgar Filing: SAIC, Inc. - Form S-1/A

- changes in or interpretations of foreign laws, regulations or policies that may adversely affect the performance of our services, sale of our products or repatriation of our profits to the United States
- the imposition of tariffs

Table of Contents

- hyperinflation or economic or political instability in foreign countries
- imposition of limitations on or increase of withholding and other taxes on remittances and other payments by foreign subsidiaries or joint ventures
- conducting business in places where laws, business practices and customs are unfamiliar or unknown
- the imposition of restrictive trade policies
- the imposition of inconsistent laws or regulations
- the imposition or increase of investment and other restrictions or requirements by foreign governments
- uncertainties relating to foreign laws and legal and arbitration proceedings
- compliance with a variety of U.S. laws, including the Foreign Corrupt Practices Act
- compliance with U.S. export control regulations and policies that restrict our ability to communicate with non-U.S. employees and supply foreign affiliates and customers
- compliance with licensing requirements

Although revenues derived from our international operations have been relatively low, we do not know the impact that these regulatory, geopolitical and other factors may have on our business in the future and any of these factors could materially adversely affect our business. Failure to comply with U.S. Government laws and regulations applicable to international business like the Foreign Corrupt Practices Act or U.S. export control regulations could have an adverse impact on our business with the U.S. Government. Additionally, these risks relating to international operations may expose us to potentially significant contract losses. For example, we have incurred significant losses under our Greek contract, and a portion of these losses may be attributable to difficulties associated with conducting business internationally.

We face aggressive competition that can impact our ability to obtain contracts and therefore affect our future revenues and growth prospects.

Our business is highly competitive in both the Government and Commercial segments. We compete with larger companies that have greater name recognition, financial resources and larger technical staffs. We also compete with smaller, more specialized entities that are able to concentrate their resources on particular areas. In the Government segment, we also compete with the U.S. Government's own capabilities and federal non-profit contract research centers. To remain competitive, we must provide superior service and performance on a cost-effective basis to our customers.

Our existing indebtedness may affect our ability to take certain extraordinary corporate actions and may negatively affect our ability to borrow additional amounts at favorable rates.

As of July 31, 2006, we had approximately \$1.2 billion in notes payable and long-term debt. The terms of our credit facility place certain limitations on our ability to undertake extraordinary corporate transactions, such as a sale of significant assets. As a result, it may be more difficult for us to take these actions and the interests of our creditors in such transactions may be different from the interests of our stockholders. Additionally, the existence of this debt may make it more difficult for us to borrow additional amounts at favorable rates. For additional information regarding our existing indebtedness, see Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Outstanding Indebtedness.

Table of Contents

Risks Relating to Our Stock

The concentration of our capital stock ownership with our employee benefit plans, executive officers, employees and directors and their respective affiliates will limit your ability to influence corporate matters.

After this offering, our class A preferred stock will have 10 votes per share and our common stock, which is the stock we are selling in this offering, will have one vote per share. We anticipate that after the completion of this offering, our employee benefit plans, executive officers, employees and directors and their respective affiliates will together own more than 50% of our outstanding capital stock and will be able to exercise a majority of the voting power. For the foreseeable future, they will have significant influence over our management and affairs and over all matters requiring stockholder approval, including the election of directors and significant corporate transactions, such as a merger or other sale of our company or our assets. As a result of this dual-class structure, our employee benefit plans, executive officers, employees and directors and their respective affiliates may be able to control all matters submitted to our stockholders for approval, even if they come to own less than 50% of the outstanding shares of our capital stock, except to the extent that holders of common stock may be entitled to vote as a separate class under the General Corporation Law of the State of Delaware. This concentrated control will limit your ability to influence corporate matters and, as a result, we may take actions that our common stockholders do not view as beneficial. As a result, the market price of our common stock could be adversely affected.

Our common stock has not been publicly traded, and the price of our common stock may fluctuate substantially.

Although Old SAIC has sponsored a limited market in its common stock, there has been no public market for our common stock prior to this offering. The price of our common stock in this offering will be negotiated with the lead underwriters and the market price at which our common stock will trade following this offering will be determined by market forces. The underwriters and public investors who trade in our common stock may give different weight to factors or valuation methodologies or consider new factors or valuation methodologies other than those relied upon in determining the historical price of Old SAIC common stock. Therefore, the price negotiated with the lead underwriters and the market price at which our common stock will trade following this offering may be lower than the historical prices of Old SAIC common stock. In addition, we cannot predict the extent to which a trading market will develop for our common stock or how liquid that market might become.

Broad market and industry factors may adversely affect the market price of our common stock, regardless of our actual operating performance. Factors that could cause fluctuations in our stock price include, among other things:

- actual or anticipated variations in quarterly operating results
- changes in financial estimates by us, by investors or by any financial analysts who might cover our stock
- our ability to meet the performance expectations of financial analysts or investors
- negative publicity regarding us, including relating to poor performance on a particular contract, employee misconduct or information security breaches

Edgar Filing: SAIC, Inc. - Form S-1/A

- disclosure of non-compliance with government laws and regulations relating to the protection of classified information, the procurement of government contracts and the conduct of lobbying and other activities
- changes in market valuations of other companies in our industry
- the expiration of the applicable restriction periods to which the class A preferred stock is subject or the conversion of certain shares of class A preferred stock held in our retirement plans prior to the expiration of the applicable restrictions, which could result in additional shares of our common stock being sold in the market

Table of Contents

- general market and economic conditions
- announcements by us or our competitors of significant acquisitions, strategic partnerships or divestitures
- additions or departures of key personnel
- sales of our common stock, including sales by our directors and officers or our principal stockholders
- the relatively small percentage of our stock that will be held by non-employees following this offering

Fluctuations caused by factors such as these may negatively affect the market price of our common stock. In addition, the other risks described elsewhere in this prospectus could adversely affect our stock price.

Before the reorganization merger, Old SAIC intends to declare a special dividend payable to its stockholders of record. The net proceeds from this offering will be less than the amount of this dividend and we will have less cash available after this offering and the payment of the special dividend.

Before the reorganization merger, Old SAIC intends to declare a special dividend in an aggregate amount of between \$1.6 billion and \$2.4 billion, payable to the holders of record of Old SAIC class A and class B common stock. The special dividend will exceed the net proceeds from this offering by an amount ranging from approximately \$620 million to \$1.4 billion, depending on the size of the dividend. As a result of the payment of the special dividend, we will have less cash available for working capital, capital spending and possible investments and acquisitions and may need to borrow funds for operating capital. Additionally, this reduction in our cash balances may result in a downgrade in our credit rating, which may increase our borrowing costs.

Except for the special dividend that Old SAIC intends to pay to holders of its common stock, we do not intend to pay dividends on our capital stock.

Old SAIC has never declared or paid any cash dividend on our capital stock other than the special dividend. New SAIC does not expect to pay any dividends on our capital stock in the foreseeable future and intends to retain any future earnings to finance our operations and growth. See Dividend Policy.

The Sarbanes-Oxley Act of 2002 requires us to document and test our internal controls over financial reporting as of fiscal 2008 and requires our independent registered public accounting firm to report on our assessment as to the effectiveness of these controls. Any delays or difficulty in satisfying these requirements could cause some investors to lose confidence in, or otherwise be unable to rely on, the accuracy of our reported financial information, which could adversely affect the trading price of our common stock.

Section 404 of the Sarbanes-Oxley Act of 2002 requires us to document and test the effectiveness of our internal controls over financial reporting in accordance with an established internal control framework and to report on our conclusion as to the effectiveness of our internal

Edgar Filing: SAIC, Inc. - Form S-1/A

controls. It also requires our independent registered public accounting firm to test our internal controls over financial reporting and report on the effectiveness of such controls as of January 31, 2008. Our independent registered public accounting firm is also required to test, evaluate and report on management's assessment of internal control.

In the second quarter of fiscal 2005, we reported the existence of a material weakness in our internal controls relating to income tax accounting. During a review and reconciliation of our worldwide income tax liabilities, we identified an overstatement of income tax expense of \$13 million related to fiscal 2003 (which was corrected in an amendment to our Annual Report on Form 10-K for fiscal 2004). Although we believe we have remediated this weakness, similar or other weaknesses may be identified. If we conclude that our controls are not effective or if our independent registered public accounting firm concludes that either our controls are not effective or that we did not appropriately document and test our controls, investors could lose confidence in, or otherwise be unable to rely on, our reported financial information, which could adversely affect the trading price of our common stock.

Table of Contents

Future sales of substantial amounts of our common stock, or the perception in the public markets that these sales may occur, could depress our stock price.

We cannot predict the effect, if any, that market sales of our common stock or the availability of shares for sale will have on the market price prevailing from time to time. These sales may also make it more difficult for us to raise capital through the issuance of equity securities at a time and at a price we deem appropriate.

Upon the completion of this offering, there will be 401,072,816 shares of our common and class A preferred stock outstanding. Of these shares, 75,000,000 shares of common stock sold in this offering will be freely transferable without restriction or further registration under the Securities Act of 1933 (Securities Act). The remaining 326,072,816 shares are shares of class A preferred stock. Most of these shares are subject to restrictions on transfer and conversion into common stock that lapse over a 360-day period following the commencement of trading of our common stock on the NYSE. However, as a result of the recent enactment of the Pension Protection Act of 2006, up to an estimated 100 million shares of the class A preferred stock held in our retirement plans may be converted into common stock and sold at the direction of plan participants effective January 1, 2007 as described in *Shares Eligible for Future Sale*. These shares would represent approximately 30% of the class A preferred stock to be outstanding immediately following completion of this offering.

The holders of class A preferred stock have owned shares of our stock for many years and have not had access to a public market in which to sell their shares. After the restriction periods described in *Shares Eligible for Future Sale* expire or the diversification rights of the Pension Protection Act otherwise become applicable to shares held in our retirement plans, shares of class A preferred stock will be convertible on a one-for-one basis into shares of common stock. A significant number of holders of our class A preferred stock may convert their shares to take advantage of the public market in common stock. Subject to certain limitations, those shares of common stock will be freely tradable without restriction following their conversion as described in *Description of Capital Stock* and *Shares Eligible for Future Sale*. In addition to outstanding shares eligible for sale, additional shares of our class A preferred stock will be issuable upon completion of this offering under currently outstanding stock options. Substantial sales of these shares could adversely affect the market price of the common stock.

Provisions in our charter documents and under Delaware law could delay or prevent transactions that many stockholders may favor.

Some provisions of our certificate of incorporation and bylaws may have the effect of delaying, discouraging or preventing a merger or acquisition that our stockholders may consider favorable, including transactions in which stockholders might receive a premium for their shares. These restrictions, which may also make it more difficult for our stockholders to elect directors not endorsed by our current directors and management, include the following:

- Our certificate of incorporation provides for class A preferred stock, which initially will give our employee benefit plans, executive officers, employees and directors and their respective affiliates voting control over all matters requiring stockholder approval, including the election of directors and significant corporate transactions such as a merger or other sale of our company or its assets. This concentrated control could discourage others from initiating any potential merger, takeover or other business combination that other stockholders may view as beneficial.
- Our certificate of incorporation provides that our bylaws and certain provisions of our certificate of incorporation may be amended only by two-thirds or more voting power of all of the outstanding shares entitled to vote. These supermajority voting requirements could impede our stockholders' ability to make changes to our certificate of incorporation and bylaws, which could delay, discourage or prevent a merger, acquisition or business combination that our stockholders may consider favorable.

Table of Contents

- Our certificate of incorporation generally provides that mergers and certain other business combinations between us and a related person be approved by the holders of securities having at least 80% of our outstanding voting power, as well as by the holders of a majority of the voting power of such securities that are not owned by the related person. This supermajority voting requirement could prevent a merger, acquisition or business combination that our stockholders may consider favorable.
- Our stockholders may not act by written consent. As a result, a holder, or holders, controlling a majority of our capital stock would not be able to take certain actions without holding a stockholders meeting.
- Our board of directors may issue, without stockholder approval, shares of undesignated preferred stock. The ability to authorize undesignated preferred stock makes it possible for our board of directors to issue preferred stock with voting or other rights or preferences that could impede the success of any attempt to acquire us.
- Our board of directors is classified and members of our board of directors serve staggered terms. Our classified board structure may discourage unsolicited takeover proposals that stockholders may consider favorable.

As a Delaware corporation, we are also subject to certain restrictions on business combinations. Under Delaware law, a corporation may not engage in a business combination with any holder of 15% or more of its capital stock unless the holder has held the stock for three years, or among other things, the board of directors has approved the business combination or the transaction pursuant to which such person became a 15% holder prior to the time the person became a 15% holder. Our board of directors could rely on Delaware law to prevent or delay an acquisition of us. See Description of Capital Stock Anti-takeover Effects of Various Provisions of Delaware Law and Our Certificate of Incorporation and Bylaws.

Table of Contents

FORWARD-LOOKING STATEMENTS

This prospectus, including the sections entitled Prospectus Summary, Risk Factors, Management's Discussion and Analysis of Financial Condition and Results of Operations and Business, contains forward-looking statements that are based on our management's belief and assumptions about the future in light of information currently available to our management. These statements relate to future events or our future financial performance, and involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. These factors include, but are not limited to:

- changes in the U.S. Government defense budget or budgetary priorities or delays in the U.S. budget process;
- changes in U.S. Government procurement rules and regulations;
- our compliance with various U.S. Government and other government procurement rules and regulations;
- the outcome of U.S. Government audits of our company;
- our ability to win contracts with the U.S. Government and others;
- our ability to attract, train and retain skilled employees;
- our ability to maintain relationships with prime contractors, subcontractors and joint venture partners;
- our ability to obtain required security clearances for our employees;
- our ability to accurately estimate costs associated with our firm fixed price and other contracts;
- resolution of legal and other disputes with our customers and others, including our ability to resolve issues related to the Greek contract;
- our ability to acquire businesses and make investments;
- our ability to manage risks associated with our international business;
- our ability to compete with others in the markets in which we operate; and

Edgar Filing: SAIC, Inc. - Form S-1/A

- our ability to execute our business plan effectively and to overcome these and other known and unknown risks that we face.

In some cases, you can identify forward-looking statements by terminology such as may, will, should, expects, intends, plans, anticipate, believes, estimates, predicts, potential, continue or the negative of these terms or other comparable terminology. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. There are a number of important factors that could cause our actual results to differ materially from those results anticipated by our forward-looking statements. These factors are discussed elsewhere in this prospectus, including under Risk Factors. We do not intend to update any of the forward-looking statements after the date of this prospectus or to conform these statements to actual results.

Table of Contents

USE OF PROCEEDS

We estimate that we will receive net proceeds from the sale of our shares of common stock in this offering of approximately \$1.0 billion, or \$1.2 billion if the underwriters exercise their over-allotment option in full, based upon an assumed initial public offering price of \$14 per share, the mid-point of the range set forth on the cover page of this prospectus, and after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us.

Old SAIC will declare a special dividend in an aggregate amount of between \$1.6 billion and \$2.4 billion, payable to holders of record of Old SAIC class A and class B common stock immediately prior to the reorganization merger. The special dividend will exceed the net proceeds from this offering by an amount ranging from approximately \$620 million to \$1.4 billion, depending on the size of the dividend. Following the completion of this offering, we will have, on a consolidated basis, cash of approximately \$3.4 billion to pay the special dividend of \$2.4 billion, which reflects the maximum amount of the dividend range of \$7.50 per equivalent share of New SAIC class A preferred stock as recommended by the finance committee of the board of directors. Cash remaining after the special dividend payment and borrowing capacity under our credit facility will be used for general corporate purposes, including working capital, capital spending, internal growth initiatives and possible investments in, or acquisitions of, complementary businesses, services or technologies. The payment of the special dividend is conditioned upon the completion of this offering. See The Merger and the Special Dividend.

The principal purpose of this offering is to better enable us to use our cash and cash flows generated from operations to fund internal growth and growth through acquisitions, as well as to provide us with publicly traded stock that can be used for future acquisitions. Creating a public market for our common stock will ultimately eliminate our use of cash to provide liquidity to our stockholders by repurchasing their shares in the limited market or in other transactions.

DIVIDEND POLICY

Old SAIC has never declared or paid any cash dividends on its capital stock other than the special dividend. The special dividend is expected to range from \$10 to \$15 per share of Old SAIC class A common stock and from \$200 to \$300 per share of Old SAIC class B common stock, which is the equivalent of a range from \$5 to \$7.50 per share of New SAIC class A preferred stock. The aggregate amount of the special dividend is expected to range from \$1.6 billion to \$2.4 billion. New SAIC does not expect to pay any dividends on our capital stock in the foreseeable future and we currently intend to retain any future earnings to finance our operations and growth. The exact amount of the special dividend and any future determination to pay cash dividends will be at the discretion of our board of directors and will depend on available cash, estimated cash needs, earnings, financial condition, operating results, capital requirements, applicable contractual restrictions and other factors our board of directors deems relevant.

Table of Contents**CAPITALIZATION**

The following table sets forth our liquid assets and capitalization as of July 31, 2006:

- on an actual basis;
- on a pro forma basis to reflect the completion of the reorganization merger and a special dividend of \$7.50 per equivalent share of New SAIC class A preferred stock, the maximum amount of the dividend range, as recommended by the finance committee of our board of directors; and
- on a pro forma as adjusted basis to reflect the completion of the reorganization merger, the completion of this offering at an assumed initial public offering price of \$14 per share (and after deducting estimated underwriting discounts and commissions and offering expenses) and a special dividend of \$7.50 per equivalent share of New SAIC class A preferred stock, the maximum amount of the dividend range, as recommended by the finance committee of our board of directors.

You should read this table in conjunction with the sections of this prospectus entitled "Selected Consolidated Financial Data," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our financial statements and related notes included elsewhere in this prospectus.

Table of Contents**SELECTED CONSOLIDATED FINANCIAL DATA**

You should read the selected consolidated financial data presented below in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our audited consolidated financial statements, unaudited condensed consolidated financial statements and the related notes included elsewhere in this prospectus. The selected consolidated financial data presented below under Consolidated Statement of Income Data for the years ended January 31, 2006, 2005 and 2004 and the selected consolidated financial data presented below under Consolidated Balance Sheet Data as of January 31, 2006 and 2005 have been derived from our audited consolidated financial statements included elsewhere in this prospectus. The selected consolidated financial data presented below under Consolidated Statement of Income Data for the years ended January 31, 2003 and 2002 and under Consolidated Balance Sheet Data as of January 31, 2004, 2003 and 2002 have been derived from our audited consolidated financial statements not included in this prospectus. The selected consolidated financial data presented below under Consolidated Statement of Income Data for the six months ended July 31, 2006 and 2005 and Consolidated Balance Sheet Data as of July 31, 2006 have been derived from our unaudited condensed consolidated financial statements that are included elsewhere in this prospectus and have been prepared on the same basis as our audited consolidated financial statements. In the opinion of management, the unaudited condensed consolidated financial statements reflect all adjustments, consisting only of normal and recurring adjustments, necessary to state fairly our results of operations for and as of the periods presented. Historical results are not necessarily indicative of the results of operations to be expected for future periods.

The special dividend is expected to range from \$10 to \$15 per share of Old SAIC class A common stock and from \$200 to \$300 per share of Old SAIC class B common stock, which is the equivalent of a range from \$5 to \$7.50 per share of New SAIC class A preferred stock. The finance committee of our board of directors has recommended that our board of directors declare the special dividend at the maximum amount of the dividend range; therefore, the following pro forma as adjusted financial data assume a special dividend of \$7.50 per equivalent share of New SAIC class A preferred stock, the maximum amount of the dividend range. The pro forma earnings per share and pro forma equivalent share data contained in the selected consolidated financial data presented below reflect the dilutive effect of the completion of the reorganization merger for the periods presented. The pro forma as adjusted earnings per share and pro forma as adjusted equivalent share data reflect the dilutive effect of the special dividend that exceeds earnings for the year ended January 31, 2006 and the completion of the reorganization merger. For purposes of computing pro forma earnings per share, New SAIC class A preferred stock has been treated as if it is common stock since the holders of New SAIC class A preferred stock will have the same rights and privileges, except for voting rights, as holders of New SAIC common stock. See Use of Proceeds, Capitalization and The Merger and the Special Dividend.

(1) Includes impairment losses of \$108 million and \$467 million on marketable equity securities and other private investments in 2003 and 2002, respectively.

(2) The 2002 amount includes the cumulative effect of an accounting change for the adoption of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended.

Table of Contents

- (3) Pro forma earnings per share and pro forma equivalent shares reflect the conversion of each outstanding share of Old SAIC class A common stock into two shares of New SAIC class A preferred stock and each outstanding share of Old SAIC class B common stock into 40 shares of New SAIC class A preferred stock and has been shown for all periods presented as a recapitalization of Old SAIC with New SAIC.
- (4) Pro forma diluted earnings per share and pro forma diluted equivalent shares include the effect of converting dilutive securities on the same basis as the Old SAIC class A common stock. The pro forma dilutive equivalent shares are comprised of stock options and other stock awards granted under stock-based compensation plans that were outstanding during the periods noted. These securities have been converted to New SAIC class A preferred stock for the pro forma earnings per share calculation.
- (5) Pro forma as adjusted earnings per share and pro forma as adjusted equivalent shares reflect the completion of the reorganization merger and the effect of the special dividend that exceeds earnings for the period presented and that Old SAIC intends to pay to its stockholders following completion of this offering. See Use of Proceeds, Capitalization and The Merger and the Special Dividend.
- (6) Pro forma as adjusted earnings per share and pro forma as adjusted equivalent shares for both basic and diluted computations assume the sale of 113 million shares of our common stock and net proceeds of \$13.44 per share, using the maximum amount of the dividend range during each of the periods indicated. Such shares represent the assumed number of shares of our common stock necessary to be sold in this offering to replace the capital in excess of earnings for the year ended January 31, 2006 being withdrawn for the special dividend to be paid by Old SAIC. Pro forma as adjusted earnings per share and pro forma as adjusted equivalent shares for both basic and diluted computations also reflect the conversion of each outstanding share of Old SAIC class A common stock into two shares of New SAIC class A preferred stock and each outstanding share of Old SAIC class B common stock into 40 shares of New SAIC class A preferred stock.
- (7) Working capital for fiscal 2004 and 2002 excludes the effect of reclassifications for discontinued operations that were made in fiscal 2005 and 2003 in order to conform the fiscal 2004 and 2002 consolidated balance sheets to reflect discontinued operations that occurred in fiscal 2005 and 2003.

**MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our audited consolidated financial statements and our unaudited condensed consolidated financial statements and related notes that appear elsewhere in this prospectus. In addition to historical consolidated financial information, the following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements. See Forward-Looking Statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this prospectus, particularly in Risk Factors.

Unless otherwise noted, references to years are for fiscal years ended January 31, not calendar years. For example, we refer to the fiscal year ended January 31, 2006 as fiscal 2006. We are currently in fiscal 2007.

Overview

We are a leading provider of scientific, engineering, systems integration and technical services and solutions to all branches of the U.S. military, agencies of the U.S. Department of Defense, the intelligence community, the U.S. Department of Homeland Security and other U.S. Government civil agencies, as well as to customers in selected commercial markets. Demand for our services has been driven by priorities such as the ongoing global war on terror and the transformation of the U.S. military. We have three reportable segments: Government, Commercial, and Corporate and Other. Except in Discontinued Operations, all amounts in this Management's Discussion and Analysis of Financial Condition and Results of Operations are presented for our continuing operations only.

Government Segment. Through the Government segment, we provide systems engineering, systems integration and advanced technical services and solutions primarily to U.S. federal, state and local government agencies and foreign governments. Revenues from our Government segment accounted for 92% and 93% of our total consolidated revenues for the six months ended July 31, 2006 and 2005, respectively, and 94% of our total consolidated revenues in fiscal 2006 and 2005 and 93% of our total consolidated revenues in fiscal 2004. Within the Government segment, substantially all of our revenues are derived from contracts with the U.S. Government. Revenues from contracts with the U.S. Government accounted for 89%, 86% and 85% of our total consolidated revenues in fiscal 2006, 2005 and 2004, respectively. These revenues include contracts where we serve as the prime or lead contractor, as well as contracts where we serve as a subcontractor to other parties who are engaged directly with various U.S. Government agencies as the prime contractor.

Following the September 11, 2001 terrorist attacks, U.S. Government spending has increased in response to the global war on terror and efforts to transform the U.S. military. This increased spending has had a favorable impact on our business through fiscal 2005. Our results have also been favorably impacted by increased outsourcing of information technology (IT) and other technical services by the U.S. Government. However, these favorable trends have slowed in fiscal 2006 and 2007 as a result of the diversion of funding toward the ongoing military deployment in Iraq and Afghanistan. Future levels of spending and authorizations may decrease, remain constant or shift to areas where we do not currently provide services. Additionally, changes in spending authorizations and budgetary priorities could occur due to the significant relief and recovery costs associated with natural disasters, the rapid growth of the federal budget deficit, increasing political pressure to reduce overall levels of government spending or other factors.

Edgar Filing: SAIC, Inc. - Form S-1/A

Competition for contracts with the U.S. Government is intense. In addition, in recent years, the U.S. Government has increasingly used contracting processes that give it the ability to select multiple winners or pre-qualify certain contractors to provide various products or services at established general terms and conditions. Such processes include purchasing services and solutions using indefinite delivery / indefinite quantity (IDIQ), government-wide acquisition contract (GWAC), and U.S. General Services Administration (GSA) Schedule contract vehicles. This trend has served to increase competition for U.S. Government contracts and increase pressure on the prices we charge for our services. See Risk Factors Risks Relating to Our Business and Business Contracts.

Table of Contents

Commercial Segment. Through our Commercial segment, we primarily target commercial customers worldwide in selected commercial markets, which currently include IT support for oil and gas exploration and production, applications and IT infrastructure management for utilities and data lifecycle management for pharmaceuticals. We provide our Commercial segment customers with systems integration and advanced technical services and solutions we have developed for the commercial marketplace, often based on expertise developed in serving our Government segment customers. Revenues from our Commercial segment accounted for 7% of our total consolidated revenues for the six months ended July 31, 2006 and 2005 and in each of fiscal 2006, 2005 and 2004. Revenues from our Commercial segment are primarily driven by our customers' desire to reduce their costs related to IT management and other complex technical functions by outsourcing to third-party contractors.

Corporate and Other Segment. Our Corporate and Other segment includes the operations of our broker-dealer subsidiary, Bull, Inc., our internal real estate management subsidiary, Campus Point Realty Corporation, and various corporate activities, including elimination of intersegment revenues. We expect that the operations of Bull, Inc. will cease following the completion of this offering. Our Corporate and Other segment does not contract with third parties for the purpose of generating revenues. However, for internal management reporting purposes, we record certain revenue and expense items incurred by the Government and Commercial segments in the Corporate and Other segment in certain circumstances as determined by our chief operating decision-maker (currently our Chief Executive Officer).

Key Financial Metrics

Sources of Revenues

Contracts. We generate revenues under the following types of contracts: (1) cost-reimbursement, (2) time-and-materials (T&M), (3) fixed price level-of-effort, (4) firm fixed-price (FFP) and (5) target cost and fee with risk sharing. Cost-reimbursement contracts provide for reimbursement of our direct costs and allocable indirect costs, plus a fee or profit component. T&M contracts typically provide for the payment of negotiated fixed hourly rates, which include allocable indirect costs and fees for labor hours plus reimbursement of our other direct costs. Fixed price level-of-effort contracts are substantially similar to T&M contracts except that the deliverable is the labor hours provided to the customer. FFP contracts provide for payments to us of a fixed price for specified products, systems and/or services. If actual costs vary from the FFP target costs, we can generate more or less than the targeted amount of profit or even incur a loss. Target cost and fee with risk sharing contracts provide for reimbursement of costs, plus a specified or target fee or profit, if our actual costs equal a negotiated target cost. Under these contracts, if our actual costs are less than the target costs, we receive a portion of the cost underrun as an additional fee or profit. If our actual costs exceed the target costs, our target fee and cost reimbursement are reduced by a portion of the cost overrun. We do not use target cost and fee with risk sharing contracts in our Government segment.

The following table summarizes revenues by contract type as a percentage of total contract revenues for the periods noted:

	Year Ended January 31			Six Months Ended July 31	
	2006	2005	2004	2006	2005
Cost-reimbursement	46%	44%	45%	47%	46%
T&M and fixed price level-of-effort	35	38	38	35	37
FFP and target cost and fee with risk sharing	19	18	17	18	17

Edgar Filing: SAIC, Inc. - Form S-1/A

Total	100%	100%	100%	100%	100%
-------	------	------	------	------	------

Table of Contents

We generate revenues under our contracts from (1) the efforts of our technical staff, which we refer to as labor-related revenues and (2) the efforts of our subcontractors and materials used on a project, which we refer to as M&S revenues. M&S revenues are generated primarily from large, multi-year systems integration contracts and contracts in our logistics and product support business area. If M&S revenues grow at a faster rate than our labor-related revenues, our overall profit margin could be impacted negatively because our M&S revenues generally have lower margins than our labor-related revenues.

The following table summarizes labor-related revenues and M&S revenues as a percentage of total consolidated revenues for the periods noted:

	Year Ended January 31			Six Months Ended July 31	
	2006	2005	2004	2006	2005
Labor-related	63%	64%	68%	66%	64%
M&S	37	36	32	34	36
Total	100%	100%	100%	100%	100%

The growth of our business is directly related to the receipt of contract awards, the ability to hire personnel to perform on service contracts and contract performance. In fiscal 2006, we derived more than \$10 million in annual revenues from each of 106 contracts, compared to 91 and 66 contracts in fiscal 2005 and 2004, respectively. These larger contracts represented 38%, 35% and 31% of our total consolidated revenues in fiscal 2006, 2005 and 2004, respectively. We recognized more than \$50 million in annual revenues from ten contracts in fiscal 2006, compared to nine and eight contracts in fiscal 2005 and 2004, respectively. The remainder of our revenues is derived from a large number of smaller contracts with annual revenues of less than \$10 million.

We recognize revenues under our contracts primarily using the percentage-of-completion method. Under the percentage-of-completion method, revenues are recognized based on progress towards completion, with performance measured by the cost-to-cost method, efforts-expended method or units-of-delivery method, all of which require estimating total costs at completion. The contracting process used for procurement, including IDIQ, GWAC and GSA Schedule contract vehicles, does not determine revenue recognition. See Critical Accounting Policies.

Backlog. Total consolidated negotiated backlog consists of funded backlog and negotiated unfunded backlog. Government segment funded backlog primarily represents the portion of backlog for which funding is appropriated and is payable to us upon completion of a specified portion of work, less revenues previously recognized on these contracts. Commercial segment funded backlog represents the full value on firm contracts, which may cover multiple future years, under which we are obligated to perform less revenues previously recognized on these contracts. Our funded backlog in the Government segment does not include the full potential value of our contracts because the U.S. Government and our other customers often appropriate or authorize funds for a particular program or contract on a yearly or quarterly basis, even though the contract may call for performance over a number of years. When a definitive contract or contract amendment is executed and funding has been appropriated or otherwise authorized, funded backlog is increased by the difference between the funded dollar value of the contract or contract amendment and the revenues recognized to date. Negotiated unfunded backlog represents (1) firm orders for which funding has not been appropriated or otherwise authorized and (2) unexercised priced contract options. Negotiated unfunded backlog does not include any estimate of future potential task orders that might be awarded under IDIQ, GWAC or GSA Schedule contract vehicles.

Table of Contents

The approximate value of our total consolidated negotiated backlog as of January 31, 2006, 2005 and 2004 and July 31, 2006 was as follows:

	As of January 31			As of
	2006	2005	2004	July 31
	(in millions)			
Government Segment:				
Funded backlog	\$ 3,398	\$ 3,333	\$ 3,127	\$ 3,332
Negotiated unfunded backlog	11,169	9,656	7,359	11,921
Total negotiated backlog	\$ 14,567	\$ 12,989	\$ 10,486	\$ 15,253
Commercial Segment:				
Funded backlog	\$ 490	\$ 313	\$ 228	\$ 666
Negotiated unfunded backlog	5	114	187	81
Total negotiated backlog	\$ 495	\$ 427	\$ 415	\$ 747
Total Consolidated:				
Funded backlog	\$ 3,888	\$ 3,646	\$ 3,355	\$ 3,998
Negotiated unfunded backlog	11,174	9,770	7,546	12,002
Total consolidated negotiated backlog	\$ 15,062	\$ 13,416	\$ 10,901	\$ 16,000

We expect to recognize a substantial portion of our funded backlog as revenues within the next 12 months. However, the U.S. Government may cancel any contract or purchase order at any time. In addition, certain contracts and purchase orders in the Commercial segment may include provisions that allow the customer to cancel at any time. Most of our contracts have cancellation terms that would permit us to recover all or a portion of our incurred costs and potential fees in such cases. See Risk Factors Risks Relating to Our Business We may not realize as revenues the full amounts reflected in our backlog, which could adversely affect our future revenues and growth prospects.

Cost of Revenues and Operating Expenses

Cost of Revenues. Cost of revenues includes direct labor and related fringe benefits and direct expenses incurred to complete contracts and task orders. Cost of revenues also includes subcontract work, consultant fees, materials and overhead. Overhead consists of indirect costs relating to operations, rent/facilities, administration, certain depreciation, management information systems, travel and other expenses.

Selling, General and Administrative Expenses. Selling, general and administrative (SG&A) expenses are primarily for corporate administrative functions, such as management, legal, finance and accounting, contracts and administration, human resources and certain management information systems expenses. SG&A also includes bid-and-proposal and independent research and development expenses.

Factors Affecting Our Results of Operations

Greek Contract. Our contract with the Hellenic Republic of Greece, or the Greek government (the Customer) as described in *Commitments and Contingencies* has adversely impacted and may continue to adversely impact our results of operations. We have recorded \$123 million in contract losses since the inception of this contract including \$2 million relating to foreign currency translation during the six months ended July 31, 2006 and \$16 million in contract losses for the six months ended July 31, 2005. In fiscal 2006, based on the results of activities conducted to review the omissions and deviations identified by the Customer and additional communication with the Customer, we recorded total contract losses of \$83 million. This compares to contract losses of \$34 million for fiscal 2005. This contract may continue to have an adverse impact on our results of operations.

Table of Contents

Acquisitions. We acquire businesses in our key markets when opportunities arise. We completed three acquisitions during the six months ended July 31, 2006 for a total purchase price of \$37 million. During the six months ended July 31, 2005, we completed one acquisition for a total purchase price of \$34 million. We completed four acquisitions in fiscal 2006 for a total purchase price of \$234 million. In fiscal 2005, we acquired four businesses for an aggregate purchase price of \$236 million and in fiscal 2004, we acquired 10 businesses for an aggregate purchase price of \$289 million. We expect the use of cash to acquire businesses will increase in the future. In addition, after completion of this offering, we may also increase our use of capital stock as consideration for acquisitions since our shares will be publicly traded.

Dispositions. As part of our ongoing strategic planning, we have exited, and may in the future exit, certain businesses from time to time. During the six months ended July 31, 2006, we sold our 50% interest in our DS&S joint venture for \$9 million. We have deferred recognition of any gain on sale of DS&S pending resolution of certain matters as described in Commitments and Contingencies DS&S Joint Venture. In March 2005, we sold Telcordia Technologies, Inc. (Telcordia) and recognized a gain before income taxes of \$866 million during the six months ended July 31, 2005 and \$871 million in fiscal 2006. This transaction is reflected as discontinued operations for all periods presented. Prior to the sale, Telcordia's revenues were 1%, 11% and 13% of our total consolidated revenues in fiscal 2006, 2005 and 2004, respectively.

Stock-Based Compensation. We adopted Statement of Financial Accounting Standards (SFAS) No. 123(R), Share-Based Payment, on February 1, 2006. This Statement requires that we recognize as compensation expense the fair value of all stock-based awards, including stock options, granted to employees and others in exchange for services over the requisite service period, which is typically the vesting period. SFAS No. 123(R) requires that we recognize as compensation expense the 15% discount on employee stock purchases made under our employee stock purchase plan (ESPP). SFAS No. 123(R) also requires that cash flows resulting from tax benefits realized from stock option exercises or stock vesting events in excess of tax benefits recognized from stock-based compensation expenses be classified as financing cash flows instead of operating cash flows.

We adopted SFAS No. 123(R) using the modified prospective transition method for stock-based awards granted after September 1, 2005, the date New SAIC made its initial filing with the SEC for this offering and the prospective transition method for stock-based awards granted prior to September 1, 2005. Under these transition methods, compensation cost associated with stock options recognized in the six months ended July 31, 2006, includes (1) amortization related to the remaining unvested portion of all stock option awards granted between September 1, 2005 and January 31, 2006 based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123 and (2) amortization related to all stock option awards granted subsequent to January 31, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123(R). In accordance with the modified prospective transition method, results from prior periods have not been restated. Under the prospective transition method, we continue to account for options granted to employees and directors prior to September 1, 2005 under the provisions of Accounting Principles Board Opinion No. 25. Accordingly, no compensation expense will be recognized for options granted prior to September 1, 2005 unless a modification is made to those options. This difference in accounting treatment is due to the fact that we met the definition of a non-public company under SFAS No. 123 and applied the minimum value method (assumed no volatility in our pro forma stock-based employee compensation expense disclosures) under SFAS No. 123 prior to September 1, 2005. The cumulative effect of adopting SFAS No. 123(R) using the modified prospective transition method was de minimus.

Except for use of the minimum value method, which assumed no stock volatility in our fair value calculations prior to September 1, 2005, there are no significant differences in the methodologies or assumptions used in estimating the fair value of our options under SFAS No. 123(R) from those used prior to adoption of the standard.

Table of Contents

We recognized total stock-based compensation expense as follows:

	Six Months Ended	
	July 31	
	2006	2005
	(in millions)	
Stock-based compensation expense:		
Stock options	\$ 11	\$
Vesting stock awards	18	15
Vested stock awards	1	
15% ESPP discount	6	
	—	—
Total consolidated stock-based compensation expense	\$ 36	\$ 15

These amounts do not include amounts accrued under the Bonus Compensation Plan during the six months ended July 31, 2006 and 2005, as the amounts to be settled through issuance of vested stock are not known until the bonus is awarded in a subsequent period. We issued \$43 million and \$49 million in vested stock during the six months ended July 31, 2006 and 2005, respectively, as settlement of certain bonus and retirement plan amounts.

Reclassifications

During the six months ended July 31, 2006, certain work previously performed by our Government segment was reassigned to our Commercial segment. Amounts in this Management's Discussion and Analysis of Financial Condition and Results of Operations for the six months ended July 31, 2005 have been restated for consistency with the current year's presentation.

Changes When We are a Public Company

Prior to this offering, there has been no public trading market for our common stock. However, Old SAIC has maintained a limited secondary market for its common stock, which we call the limited market, through its broker-dealer subsidiary, Bull, Inc. The limited market has enabled Old SAIC stockholders to submit offers to buy and sell Old SAIC common stock on predetermined trade dates. In addition, we have provided retirement plan participants with the opportunity to sell our stock held in our retirement plans. These retirement plan trades have generally occurred on a quarterly basis in conjunction with limited market trades.

Although we were not contractually required to do so, on all trade dates for the periods presented, we repurchased the excess of the number of shares offered for sale over the number of shares sought to be purchased, thereby creating an opportunity for liquidity for the shares held by Old SAIC stockholders. In the six months ended July 31, 2006 and 2005, we repurchased \$584 million and \$378 million of Old SAIC common stock, respectively, and in fiscal 2006, 2005 and 2004, we repurchased \$818 million, \$607 million and \$451 million of Old SAIC common stock, respectively. See "Liquidity and Capital Resources - Historical Trends - Cash Used in Financing Activities of Continuing Operations."

Edgar Filing: SAIC, Inc. - Form S-1/A

Because shares of New SAIC common stock will be publicly traded following the completion of this offering and New SAIC class A preferred stock will be convertible into New SAIC common stock as the applicable restriction periods lapse, we expect to cease repurchases of our stock from our stockholders through the limited market and wind up the operations of Bull, Inc. We completed our last limited market trade on June 30, 2006.

If we complete this offering, the shares of New SAIC class A preferred stock held by our stockholders, including our retirement plans, will be subject to certain restrictions on transfer and conversion that will lapse in four periodic increments, called restriction periods, over a 360-day period following this offering, as described in Description of Capital Stock. However, the Pension Protection Act of 2006, which was signed into law on August 17, 2006, mandates that companies provide diversification rights to certain retirement plan participants. As a result, the Pension Protection Act effectively overrides the restriction periods and provides certain participants in the SAIC Retirement Plan and the AMSEC Employees 401(k) Profit Sharing Plan with rights to

Table of Contents

diversify their investments in company stock into other investment alternatives within those retirement plans. To date, however, no regulations or interpretive guidance have been issued under the Pension Protection Act and any such regulations or guidance, when issued, could modify the impact of the Pension Protection Act on us.

As a result of the Pension Protection Act and the manner in which we intend to comply with its requirements, if we complete this offering on our planned schedule, certain shares of class A preferred stock that will be held in our retirement plans after the reorganization merger may be converted into common stock at the direction of plan participants beginning on January 1, 2007. See *Shares Eligible for Future Sale*.

Following completion of this offering, we will no longer repurchase stock through limited market trades. A retirement plans trade has been scheduled for October 27, 2006, but may be rescheduled if this offering is not completed sufficiently far in advance of that trade date. We currently do not intend to conduct additional retirement plans trades after the October 27, 2006 trade.

Results of Operations***Comparison of the Six Months Ended July 31, 2006 and 2005***

The following table summarizes our consolidated results of operations for the periods noted:

	Six Months Ended July 31		
	2006	Percent Change	2005
	(dollars in millions)		
Revenues	\$ 4,013	6%	\$ 3,798
Cost of revenues	3,452	5	3,303
Selling, general and administrative expenses	261	9	239
Operating income	300	17	256
As a percentage of revenues	7.5%		6.7%
Non-operating income (expense), net	13		(10)
Provision for income taxes	116	9	106
Income from continuing operations	197	41	140
Income from discontinued operations, net of tax	12	(98)	542
Net income	209	(69)	682

Revenues. Our consolidated revenues increased 6% during the six months ended July 31, 2006 compared to the same period of the prior year due to growth in revenues from both our Government and Commercial segments. Approximately two percentage points of the consolidated growth for the six months ended July 31, 2006 was internal, or non-acquisition, related growth. The acquisition of new businesses accounted for the remaining four percentage points of the consolidated revenue growth for the six months ended July 31, 2006. We calculate internal growth by comparing our current period reported revenue to prior period revenue adjusted to include the revenue of acquired companies for the comparable prior period. Internal revenue growth in our business is directly related to the receipt of contract awards across a balance of our business areas and the ability to hire personnel to perform on service contracts.

Table of Contents

The following table summarizes changes in segment revenues on an absolute basis and as a percentage of consolidated revenues for the periods noted:

	Six Months Ended July 31				
				Segment Revenues as a Percentage of Total Consolidated Revenues	
	2006	Percent Change	2005	2006	2005
	(dollars in millions)				
Government segment revenues	\$ 3,696	4%	\$ 3,543	92%	93%
Commercial segment revenues	298	9	273	7	7
Corporate and Other segment revenues	19		(18)		
	<u>\$ 4,013</u>	<u>6%</u>	<u>\$ 3,798</u>		

The acquisition of new businesses accounted for the majority of our Government segment growth for the six months ended July 31, 2006. Internal growth within the Government segment was relatively flat during the six months ended July 31, 2006. This slower internal growth is primarily attributable to the wind down of certain large programs initiated in fiscal years 2004 and 2005 combined with fewer large replacement programs starting up, a decision by management to exit certain non-core business areas and the diversion of Federal funding toward the war efforts in Iraq and Afghanistan.

The growth in our Commercial segment revenues for the six months ended July 31, 2006 was driven by internal growth principally attributable to higher revenues from our systems integration and domestic outsourcing business areas.

The Corporate and Other segment revenues include the elimination of intersegment revenues of \$3 million for the six months ended July 31, 2005. There were no intersegment revenues for the six months ended July 31, 2006. The remaining balance for each of the periods represents the net effect of various revenue items related to operating business units that are excluded from the evaluation of a business unit's operating performance in the Government or Commercial segment and instead are reflected in the Corporate and Other segment.

The following table presents our consolidated revenues on the basis of how such revenues were earned for the periods noted:

	Six Months Ended July 31		
	2006	Percent Change	2005
	(dollars in millions)		
Labor-related	\$ 2,640	9%	\$ 2,422
M&S	1,373		1,376

\$ 4,013	\$ 3,798
----------	----------

The increase in labor-related revenues during the six months ended July 31, 2006 was attributable to acquisitions, greater direct labor utilization and overall increases in technical staff. At July 31, 2006, we had 43,100 full-time and part-time employees compared to 43,000 at July 31, 2005. We averaged 43,300 full-time and part-time employees during the six months ended July 31, 2006 compared to 42,700 for the six months ended July 31, 2005. The decrease in M&S revenues during the six months ended July 31, 2006 was primarily due to certain systems engineering and integration contracts in the Government segment that had significant quantities of materials that were delivered and integrated in the same period of the prior year.

Table of Contents

Cost of Revenues. The following table summarizes cost of revenues as a percentage of revenues for the periods noted:

	Six Months Ended	
	July 31	
	2006	2005
Consolidated cost of revenues as a percentage of consolidated revenues	86.0%	87.0%
Segment cost of revenues as a percentage of segment revenues:		
Government segment	87.3	88.0
Commercial segment	72.6	76.8

Total consolidated cost of revenues increased \$149 million, or 5%, on an absolute basis but declined as a percentage of total consolidated revenues for the six months ended July 31, 2006 as compared to the six months ended July 31, 2005. This improvement as a percentage of revenues was primarily due to greater direct labor utilization and decreased losses on our Greek contract partially offset by increased stock-based compensation expense during the six months ended July 31, 2006. We recorded \$2 million in contract losses related to foreign currency translation on the Greek contract during the six months ended July 31, 2006 compared to contract losses of \$16 million for the same period of the prior year. Total consolidated cost of revenues as a percentage of total consolidated revenues includes a portion of the Corporate and Other segment operating loss as described in Segment Operating Income.

Government segment cost of revenues increased by \$108 million, or 3%, on an absolute basis but decreased as a percentage of segment revenues for the six months ended July 31, 2006 as compared to the six months ended July 31, 2005. This improvement as a percentage of revenue was primarily due to greater direct labor utilization and decreased losses on our Greek contract partially offset by increased stock-based compensation expense. All losses on the Greek contract are recorded in the Government segment and the decrease in Greek contract losses for the six months ended July 31, 2006 account for approximately 0.4 percentage points of the improvement in cost of revenues as a percentage of revenues in the Government segment.

Commercial segment cost of revenues increased by \$7 million, or 3%, on an absolute basis but decreased as a percentage of segment revenues for the six months ended July 31, 2006 primarily reflecting improved contract margins and greater direct labor utilization.

Selling, General and Administrative Expenses. The following table summarizes SG&A as a percentage of revenues for the periods noted:

	Six Months Ended	
	July 31	
	2006	2005
Total consolidated SG&A as a percentage of total consolidated revenues	6.5%	6.3%
Segment SG&A as a percentage of segment revenues:		
Government segment	4.9	4.9
Commercial segment	16.0	18.0

Edgar Filing: SAIC, Inc. - Form S-1/A

Total consolidated SG&A increased \$22 million, or 9%, on an absolute basis for the six months ended July 31, 2006 compared to the same period of the prior year primarily due to increased stock-based compensation, business development, professional services and legal expenses. Stock-based compensation expense reflected within selling, general and administrative expenses increased approximately \$6 million during the six months ended July 31, 2006 due to the adoption of SFAS No. 123(R). Professional service expense increases are largely attributable to our fiscal 2007 Sarbanes-Oxley Section 404 compliance efforts.

Government segment SG&A increased \$10 million, or 6%, on an absolute basis for the six months ended July 31, 2006 compared to the same period of the prior year. This includes increases in bid-and-proposal costs of

Table of Contents

\$3 million in the six months ended July 31, 2006. The level of bid-and-proposal activities fluctuates depending on the timing of bidding opportunities. Government segment independent research and development costs remained relatively consistent with prior year levels.

Commercial segment SG&A expenses during the six months ended July 31, 2006 remained relatively consistent on an absolute basis with the same period of the prior year.

Corporate and Other segment SG&A expenses increased \$14 million, or 81%, during the six months ended July 31, 2006 compared to the same period of the prior year. This increase was primarily due to increased stock-based compensation expense, as well as increased professional services and legal expenses not allocated to the Government and Commercial segments. In addition, Corporate and Other segment SG&A expenses during the six months ended July 31, 2005 benefited from the reversal of an accrued expense of \$10 million related to a class action lawsuit that was dismissed by plaintiffs without prejudice in fiscal 2006. This reversal had the effect of reducing Corporate and Other segment operating losses in the prior year.

Segment Operating Income. We use segment operating income (SOI) as our internal measure of operating performance. It is calculated as operating income before income taxes less losses on impaired intangible and goodwill assets, less gains or losses on sales of business units, subsidiary stock and similar items, plus equity in the income or loss of unconsolidated affiliates, and minority interest in income or loss of consolidated subsidiaries. We use SOI as our internal performance measure because we believe it provides a comprehensive view of our ongoing business operations and is therefore useful in understanding our operating results. Unlike operating income, SOI includes only our ownership interest in income or loss from our majority-owned consolidated subsidiaries and our partially-owned unconsolidated affiliates. In addition, SOI excludes the effects of transactions that are not part of on-going operations such as gains or losses from the sale of business units or other operating assets as well as investment activities of our subsidiary, SAIC Venture Capital Corporation.

In accordance with SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, the reconciliation of total reportable SOI to consolidated operating income for the six months ended July 31, 2006 and 2005, is shown in Note 2 of the notes to condensed consolidated financial statements for the six months ended July 31, 2006.

The following table summarizes changes in SOI on an absolute basis and as a percentage of related revenues:

	Six Months Ended July 31				
	2006	Percent Change	2005	SOI as a percentage of related revenues	
				2006	2005
	(dollars in millions)				
Government SOI	\$ 283	14%	\$ 249	7.7%	7.0%
Commercial SOI	33	154	13	11.1	4.8
Corporate and Other SOI	(20)		(10)		

Edgar Filing: SAIC, Inc. - Form S-1/A

Total reportable SOI	\$ 296	17%	\$ 252	7.4%	6.6%
----------------------	--------	-----	--------	------	------

The increase in total reportable SOI for the six months ended July 31, 2006 primarily reflects greater Government and Commercial segment profitability partially offset by increases in Corporate and Other segment operating losses for the period. If this offering is completed, we will recognize compensation expense for the special dividend declared on outstanding vesting stock awards estimated to be forfeited prior to vesting. The amount of compensation expense will be adjusted periodically based on actual forfeitures of these awards. In addition, we currently anticipate incurring increased expense associated with bid-and-proposal and independent research and development activities over the remainder of fiscal 2007.

The increase in Government and Commercial segment SOI for the six months ended July 31, 2006 primarily reflects growth in segment revenues and improvements in cost of revenues as a percentage of revenues partially

Table of Contents

offset by increased SG&A expenses. Increases in segment SG&A expenses are primarily related to increased bid-and-proposal efforts and stock-based compensation expense.

The increase in Corporate and Other segment operating loss during the six months ended July 31, 2006 is primarily due to increased stock-based compensation, labor, and legal expenses not allocated to the Government and Commercial segments and the reversal of an accrued expense of \$10 million related to a class action lawsuit that was dismissed by plaintiffs without prejudice in fiscal 2006. This reversal had the effect of reducing Corporate and Other segment operating losses in the prior year.

Other Income Statement Items

Interest Income and Interest Expense. Interest income increased by \$20 million, or 47%, for the six months ended July 31, 2006 compared to the same period of the prior year. This increase was primarily due to higher interest rates partially offset by slightly lower average cash and investment balances in the six months ended July 31, 2006 as compared to the same period of the prior year.

Interest expense reflects interest on (1) our outstanding debt securities, (2) a building mortgage, (3) deferred compensation arrangements and (4) notes payable. Interest expense remained constant for the six months ended July 31, 2006 compared to the same period of the prior year, as most of our debt instruments have fixed interest rates and there were no significant changes in the underlying debt balances.

Other Income (Expense), Net. Other income (expense), net increased \$6 million during the six months ended July 31, 2006. During the six months ended July 31, 2005, we recognized realized net losses on marketable securities of \$2 million and other-than-temporary impairment losses on certain private equity securities of \$3 million.

Provision for Income Taxes. The provision for income taxes as a percentage of income from continuing operations before income taxes was 37% for the six months ended July 31, 2006. This compares with 43% for the six months ended July 31, 2005. The lower effective tax rate for the six months ended July 31, 2006 was partially due to the reversal of \$7 million in tax expense accruals for tax contingencies as a result of settlements of federal and state audits and audit issues for amounts different than the recorded accruals for tax contingencies and the state tax refund of \$4 million. The higher tax rate for the six months ended July 31, 2005 was due to an increase in tax expense of \$9 million related to a change in state tax law during the six months ended July 31, 2005.

We are subject to routine compliance reviews by the Internal Revenue Service (IRS) and other taxing jurisdictions on various tax matters, which may include challenges to various tax positions we have taken. We have recorded liabilities for tax contingencies for open years based upon our best estimate of the taxes ultimately to be paid. As of July 31, 2006, our income taxes payable balance included \$50 million of tax expense accruals that have been recorded for tax contingencies. The Company's accruals for tax contingencies have decreased from \$113 million at January 31, 2006 as a result of the resolution of certain tax contingencies with the taxing authorities for fiscal years 2002, 2003 and 2004, including \$7 million of which was recognized as an income tax benefit during the six months ended July 31, 2006. We are currently undergoing several routine IRS and other tax jurisdiction examinations. While we believe we have adequate accruals for tax contingencies, there is no assurance that the tax authorities will not assert that we owe taxes in excess of our accruals, or that our accruals will not be in excess of the final amounts agreed to by tax authorities.

Edgar Filing: SAIC, Inc. - Form S-1/A

Upon completion of this offering, Old SAIC intends to pay a dividend to stockholders of Old SAIC common stock, including the SAIC Retirement Plan. We believe the dividend payable on Old SAIC common stock held by the SAIC Retirement Plan may be deductible for tax purposes in the year of payment and have requested rulings from the IRS to confirm deductibility. Accordingly, if we pay a dividend following the completion of this offering and favorable rulings are received, we expect a significant reduction in our tax liability.

Income from Continuing Operations. Income from continuing operations increased \$57 million, or 41%, for the six months ended July 31, 2006 compared to the same period of the prior year. This increase was primarily

Table of Contents

due to increased segment operating income, increased interest income and lower effective tax rates during the six months ended July 31, 2006 compared to the same period of the prior year.

Discontinued Operations. We sold one of our subsidiaries, Telcordia, for \$1.35 billion and recorded a gain of \$866 million during the six months ended July 31, 2005. An income tax benefit of \$13 million was recorded during the six months ended July 31, 2006 to reflect the resolution of certain tax contingencies related to Telcordia operations prior to the sale.

The operating results of Telcordia, which have been classified as discontinued operations for all periods presented, were as follows:

	Six Months Ended July 31	
	2006	2005
	(in millions)	
Revenues	\$	\$ 89
Costs and expenses		
Cost of revenues		57
Selling, general and administrative expenses		28
Income before income taxes	\$	\$ 4

We have indemnified the buyer for all income tax obligations on and through the closing date of the transaction. While we believe we have appropriate accruals for these tax contingencies, the ultimate resolution of these matters could differ from the amounts accrued. We also have customary indemnification obligations owing to the buyer, as well as an obligation to indemnify the buyer for any loss Telcordia may incur as a result of an adverse judgment in the Telkom South Africa litigation. We are also entitled to receive additional amounts as contingent sale price, including all of the net proceeds from any judgment or settlement of the litigation Telcordia initiated against Telkom South Africa and 50% of the net proceeds received in connection with the prosecution of certain patent rights of Telcordia as discussed in Commitments and Contingencies. All these future contingent payments or contingent purchase price proceeds and changes in our estimates of these items and other related Telcordia items will continue to be reflected as discontinued operations and result in adjustments to the gain on sale in the period in which they arise.

Net Income. Net income decreased \$473 million during the six months ended July 31, 2006 compared to the same period of the prior year primarily due to the after-tax gain of \$542 million on the sale of Telcordia during the six months ended July 31, 2005.

Comparison of Years Ended January 31, 2006, 2005 and 2004

The following table summarizes our consolidated results of operations for the periods noted:

Year Ended January 31

	2006	Percent Change	2005	Percent Change	2004
(dollars in millions)					
Revenues	\$ 7,792	8%	\$ 7,187	23%	\$ 5,833
Cost of revenues	6,801	8	6,283	24	5,053
Selling, general and administrative expenses	494	18	418	11	378
Operating income	497	2	488	24	395
As a percentage of revenues	6.4%		6.8%		6.8%
Non-operating expense, net	(13)	(85)	(85)	174	(31)
Provision for income taxes, continuing operations	139	6	131	(6)	140
Income from continuing operations	345	27	272	21	224
Income from discontinued operations, net of tax	582	325	137	8	127
Net income	927	127	409	17	351

Table of Contents

Revenues. Total consolidated revenues increased 8% and 23% in fiscal 2006 and 2005, respectively, due to a combination of growth in revenues from our U.S. Government customers as well as growth through the acquisition of new businesses. Approximately five percentage points of the consolidated fiscal 2006 growth was a result of acquisitions, compared to six percentage points of the fiscal 2005 growth. Consolidated internal, or non-acquisition related, growth was three percentage points in fiscal 2006 as compared with 17 percentage points in fiscal 2005. We calculate internal growth by comparing our current period reported revenue to prior period revenue adjusted to include the revenue of acquired companies for the prior periods comparable to those for which they are included in the current period's revenue.

The strong internal growth in fiscal 2005 was due primarily to increased work on several large systems integration and engineering programs with our U.S. Government customers that included significant M&S efforts. These large systems and engineering programs had relatively high revenues in fiscal 2005 as compared to fiscal 2006. Additional growth was achieved through higher revenues from the sale to our commercial customers of security systems used to protect ports, cargo terminals and containers.

The following table summarizes changes in segment revenues on an absolute basis and as a percentage of total consolidated revenues for the periods noted:

	Year Ended January 31							
						Segment Revenues as a Percentage of Total Consolidated Revenues		
	2006	Percent Change	2005	Percent Change	2004	2006	2005	2004
	(dollars in millions)							
Government segment revenues	\$ 7,289	8%	\$ 6,738	24%	\$ 5,426	94%	94%	93%
Commercial segment revenues	533	2	521	24	419	7	7	7
Corporate and Other revenues	(30)		(72)		(12)	(1)	(1)	

The growth in our Government segment revenues for fiscal 2006 was the result of growth in our traditional business areas, revenues from departments and agencies of the U.S. Government as well as growth through the acquisition of new businesses. Approximately five percentage points of the fiscal 2006 growth in the Government segment revenues was a result of acquisitions made in fiscal 2006, while the remaining three percentage points represented internal growth. This compares to six percentage points of acquisition-related growth versus 18 percentage points of internal growth for fiscal 2005. The internal growth in our Government segment revenues in fiscal 2006 and 2005 reflects an increase in contract awards from the U.S. Government and increased budgets of our customers, particularly in our business areas providing services to the Department of Defense. Revenue growth declined in fiscal 2006 compared to fiscal 2005 due to several large systems integration, engineering and M&S programs, which had relatively high revenues in fiscal 2005 as compared to fiscal 2006, and funding delays in the homeland security and defense business area and our naval maintenance engineering and technical support services area.

The percentage of total consolidated revenues from U.S. Government customers representing greater than 10% of our total consolidated revenues were as follows:

Year Ended January 31

Edgar Filing: SAIC, Inc. - Form S-1/A

	<u>2006</u>	<u>2005</u>	<u>2004</u>
U.S. Army	16%	13%	13%
U.S. Navy	14	13	12
U.S. Air Force	10	11	11

Fiscal 2006 Commercial segment revenues remained relatively consistent with fiscal 2005 revenues. The increase in our Commercial segment revenues in fiscal 2005 was attributable principally to higher revenues from

Table of Contents

the sale of security systems used to protect ports, cargo terminals and containers, including revenues from a Canadian security system business acquired late in fiscal 2004. In fiscal 2005, four percentage points of the increase in revenues was attributable to exchange rate changes between the U.S. dollar and the British pound, which caused a relatively constant level of local U.K. revenues to be translated into a higher level of U.S. dollars. Revenues from our U.K. subsidiary represented 32%, 31% and 33% of the Commercial segment revenues in fiscal 2006, 2005 and 2004, respectively.

The Corporate and Other segment includes the elimination of intersegment revenues of \$3 million, \$45 million and \$25 million in fiscal 2006, 2005 and 2004, respectively. The remaining balance for each of the years represents the net effect of various revenue items related to operating business units that are excluded from the evaluation of a business unit's operating performance in the Government or Commercial segment and instead are reflected in the Corporate and Other segment.

The following table presents our consolidated revenues on the basis of how such revenues were earned for the periods noted:

	Year Ended January 31				
	2006	Percent Change	2005	Percent Change	2004
	(dollars in millions)				
Labor-related	\$ 4,880	6%	\$ 4,603	16%	\$ 3,977
M&S	2,912	13	2,584	39	1,856

The increases in labor-related revenues are attributable to greater employee utilization and overall increases in our technical staff. At the end of fiscal 2006, we had approximately 43,600 full-time and part-time employees compared to 42,400 and 39,300 at the end of fiscal 2005 and 2004, respectively. The increase in M&S revenues in fiscal 2006 is primarily related to the overall growth and acquisitions in the logistics and product support business areas and, in fiscal 2005, certain systems engineering and integration contracts in the Government segment that had significant quantities of materials that were delivered and integrated.

Cost of Revenues. The following table summarizes cost of revenues as a percentage of revenues for the periods noted:

	Year Ended January 31		
	2006	2005	2004
Total consolidated cost of revenues as a percentage of total consolidated revenues	87.3%	87.4%	86.6%
Segment cost of revenues as a percentage of segment revenues:			
Government segment	88.3	87.9	87.1
Commercial segment	74.2	75.5	75.3

Total consolidated cost of revenues as a percentage of total consolidated revenues decreased slightly in fiscal 2006 as compared with fiscal 2005 and reflected the following factors: (1) improved contract margins, greater direct labor utilization and lower employee fringe benefit expenses related to changes in our retirement and bonus compensation plans, which decreased cost of revenues as a percentage of total consolidated

Edgar Filing: SAIC, Inc. - Form S-1/A

revenues, and (2) the adverse impact of Greek contract losses of \$83 million, which increased cost of revenues as a percentage of total consolidated revenues. During fiscal 2006, in part to encourage employee retention, we decided to provide a higher portion of our bonus compensation plan awards in the form of vesting stock as compared to vested stock. Vesting stock bonus expense is recognized over the period in which the employee provides service, generally four years. This decision had the effect of reducing the estimated bonus compensation expense by approximately \$10 million in fiscal 2006 compared to the expense that would have been recognized for a fully vested stock and cash bonus. Total consolidated cost of revenues as a percentage of total consolidated revenues includes a portion of the Corporate and Other segment operating loss as described in Segment Operating Income.

Table of Contents

Government segment cost of revenues increased by \$515 million, or 9%, on an absolute basis and as a percentage of segment revenues in fiscal 2006 primarily due to the \$83 million Greek contract losses, partially offset by improved contract margins in the remainder of the segment and greater direct labor utilization. Government segment cost of revenues increased \$1.2 billion, or 25%, on an absolute basis and as a percentage of segment revenues in fiscal 2005 primarily due to Greek contract losses of \$34 million and lower margins realized on the higher level of M&S revenues in fiscal 2005 as compared with fiscal 2004.

Commercial segment cost of revenues increased by \$2 million, or 1%, on an absolute basis and decreased as a percentage of segment revenues in fiscal 2006, primarily reflecting improved contract margins. Commercial segment cost of revenues as a percentage of segment revenues did not change significantly between fiscal 2005 and 2004.

Selling, General and Administrative Expenses. The following table summarizes SG&A as a percentage of revenues for the periods noted:

	Year Ended January 31		
	2006	2005	2004
Total consolidated SG&A as a percentage of total consolidated revenues	6.3%	5.8%	6.5%
Segment SG&A as a percentage of segment revenues:			
Government segment	4.8	4.2	4.7
Commercial segment	17.3	16.1	18.1

Total consolidated SG&A increased \$76 million, or 18%, in fiscal 2006 and \$40 million, or 11%, in fiscal 2005 on an absolute basis. SG&A increased in fiscal 2006 primarily due to increasing IT and other infrastructure expenditures in support of current and anticipated future growth, including \$9 million in offering related costs which were expensed due to the postponement of this offering. Additionally, we incurred a higher amount of amortization expense on intangible assets due to our increased volume of acquisitions. During fiscal 2006, we reversed a previously accrued expense of \$10 million related to a class action lawsuit that was dismissed by plaintiffs without prejudice in September 2005. This reversal is reflected in the Corporate and Other segment. SG&A decreased as a percentage of total consolidated revenues in fiscal 2005 due to the factors noted below for our Government and Commercial segments and an \$18 million gain on the sale of land and buildings reflected in our Corporate and Other segment.

Government segment SG&A increased \$64 million, or 22%, in fiscal 2006 and \$34 million, or 14%, in fiscal 2005 on an absolute basis. Government segment SG&A increased as a percentage of revenues in fiscal 2006 primarily due to increasing IT and other infrastructure expenditures in support of current and anticipated future growth. We expect to maintain this higher level of expense throughout fiscal 2007. Additionally, we incurred a higher amount of amortization expense on intangible assets due to our increased volume of acquisitions, primarily in our Government segment. Government segment SG&A decreased as a percentage of segment revenues in fiscal 2005 primarily because revenues grew more quickly than our SG&A expenses during fiscal 2005. During fiscal 2004, we recorded workforce reduction and realignment charges of \$8 million stemming from efforts to reorganize and streamline some of our operations to better align ourselves with major customers and key markets.

Government segment G&A costs increased \$56 million, or 29%, in fiscal 2006 as compared with fiscal 2005. As a percentage of segment revenues, G&A costs were 3.4% in fiscal 2006 compared to 2.8% in fiscal 2005. Bid-and-proposal costs increased \$6 million, or 8%, on an absolute basis in fiscal 2006 compared to the prior year. The level of bid-and-proposal activities fluctuates depending on the timing of bidding opportunities. Government segment independent research and development costs have remained relatively consistent as a percentage of segment revenues.

Commercial segment SG&A increased \$8 million, or 10%, in fiscal 2006 and \$8 million or 11% in fiscal 2005 primarily due to an increase in headcount and other infrastructure expenditures. Commercial segment

Table of Contents

SG&A decreased as a percentage of segment revenues in fiscal 2005 primarily because revenue grew more quickly than our SG&A expenses in that year.

Segment Operating Income. We use segment operating income (SOI) as our internal measure of operating performance. It is calculated as operating income before income taxes less losses on impaired intangible and goodwill assets, less non-recurring gains or losses on sales of business units, subsidiary stock and similar items, plus equity in the income or loss of unconsolidated affiliates, and minority interest in income or loss of consolidated subsidiaries. We use SOI as our internal performance measure because we believe it provides a comprehensive view of our ongoing business operations and is therefore useful in understanding our operating results. Unlike operating income, SOI includes only our ownership interest in income or loss from our majority-owned consolidated subsidiaries and our partially-owned unconsolidated affiliates. In addition, SOI excludes the effects of transactions that are not part of on-going operations, such as gains or losses from the sale of business units or other operating assets and the investment activities of our subsidiary, SAIC Venture Capital Corporation. Effective in fiscal 2006, we no longer allocate an internal interest charge or credit to our operating segments as a measure of their effective management of operating capital.

In accordance with SFAS No. 131, for fiscal 2006, 2005 and 2004, the reconciliation of total reportable SOI of \$491 million, \$470 million and \$401 million, respectively, to consolidated operating income of \$497 million, \$488 million and \$395 million, respectively, is shown in Note 2 of the notes to consolidated financial statements for fiscal 2006.

The following table, with prior year information reclassified for the internal interest change noted above, summarizes changes in SOI on an absolute basis and as a percentage of related revenues:

	Year Ended January 31							
				SOI as a				
				Percentage of Related Revenues				
	2006	Percent Change	2005	Percent Change	2004	2006	2005	2004
	(dollars in millions)							
Total reportable SOI	\$ 491	4%	\$ 470	17%	\$ 401	6.3%	6.5%	6.9%
Government SOI	499	(3)	516	17	442	6.8	7.7	8.1
Commercial SOI	37	(8)	40	43	28	6.9	7.7	6.7
Corporate and Other segment operating loss	(45)		(86)		(69)			

The fiscal 2006 increase in total reportable SOI primarily reflects decreased operating loss within the Corporate and Other segment and improved contract margins and greater direct labor utilization in the Government segment, partially offset by the Greek contract losses of \$83 million and increases in SG&A expenses. The fiscal 2005 increase in total reportable SOI primarily reflects our overall revenue growth and lower SG&A expenses as a percentage of revenues.

The fiscal 2006 decrease in Government SOI primarily reflects losses of \$83 million on our Greek contract and an increase in SG&A caused by higher spending on our IT and other infrastructure areas and higher bid-and-proposal costs. Partially offsetting the impact of the Greek contract losses were improved contract margins with respect to other contracts in the Government segment and greater direct labor utilization. The fiscal

Edgar Filing: SAIC, Inc. - Form S-1/A

2005 increase in Government SOI, on an absolute basis, reflects the increase in segment revenues and lower SG&A expenses as a percentage of revenues. However, the fiscal 2005 decrease in Government SOI as a percentage of segment revenues reflects lower margins earned on the higher level of M&S revenues and losses on the Greek contract of \$34 million.

Growth in commercial segment revenues during fiscal 2006 was not sufficient to cover increases in Commercial segment cost of revenues and SG&A expenses. The fiscal 2005 increase in our Commercial SOI, on an absolute basis and as percentage of revenues, was primarily attributable to growth in revenues and improved contract margins which more than offset increases in SG&A expenses in fiscal 2005.

Table of Contents

The decrease in our fiscal 2006 Corporate and Other segment operating loss was primarily due to lower intersegment revenue eliminations of \$42 million, lower accrued fringe benefit expenses related to our retirement and bonus compensation plans for employees in all segments and the reversal to income of an accrued expense recorded in fiscal 2005 of \$10 million related to a class action lawsuit that was dismissed by plaintiffs without prejudice in fiscal 2006. These fiscal 2006 declines were partially offset by increases in IT and other infrastructure expenditures in support of current and anticipated growth. The increase in our fiscal 2005 Corporate and Other segment operating loss was primarily related to higher unallocated accrued incentive compensation costs as a result of improved SOI in our Government segment and an increase in certain revenue and expense items recorded within Corporate and Other and excluded from other segments' operating performance as well as \$10 million related to the class action lawsuit described above. Partially offsetting the fiscal 2005 increase in Corporate and Other segment operating loss is an \$18 million gain on the sale of land and buildings at two different locations.

Other Income Statement Items

Net (Loss) Gain on Marketable Securities and Other Investments, Including Impairment Losses. Net loss on marketable securities and other investments, including impairment losses, reflects gains or losses and other-than-temporary impairment losses on our investments that are accounted for as marketable equity or debt securities or as cost method investments and are part of non-operating income or expense. Due to the non-routine nature of the transactions that are recorded in this financial statement line item, significant fluctuations from year to year are not unusual.

Components of this financial statement line item are as follows:

	Year Ended January 31		
	2006	2005	2004
	(in millions)		
Impairment losses on marketable securities and other investments	\$ (6)	\$ (20)	\$ (19)
Net (loss) gain on sale of marketable securities and other investments	(9)	4	24
	\$ (15)	\$ (16)	\$ 5

Substantially all of the impairment losses in fiscal 2006, 2005 and 2004 were related to our private equity securities. The carrying value of our private equity securities as of January 31, 2006 was \$38 million. The gross realized losses on the sale of investments in fiscal 2006 were primarily due to the liquidation of fixed rate securities prior to their stated maturities to achieve greater liquidity. The market value of these securities has recently been negatively impacted by rising interest rates.

The net gain on sale of investments in fiscal 2004 was primarily from the sale of our investment in publicly-traded equity securities of Tellium, Inc., which resulted in a gain before income taxes of \$17 million.

Goodwill Impairment. We did not record any impairment of goodwill during fiscal 2006 or 2005. During fiscal 2004, as a result of the loss of certain significant contracts and proposals related to a reporting unit, we determined that goodwill assigned to that reporting unit had become impaired and we recorded goodwill impairment charges of \$7 million. Impairment losses on intangible assets were not material in fiscal 2006

and 2005. There were no intangible asset impairments in fiscal 2004.

Interest Income and Interest Expense. Interest income increased by \$52 million or 116% and decreased \$4 million or 8% in fiscal 2006 and 2005, respectively. During fiscal 2006, average interest rates increased significantly and our average cash balances increased over fiscal 2005. During fiscal 2005, average interest rates increased slightly while our average cash balances remained consistent with 2004 levels. In fiscal 2004, interest income increased primarily as a result of interest received from a favorable audit settlement with the IRS for a refund of research tax credits.

Table of Contents

Interest expense reflects interest on (1) our outstanding debt securities, (2) a building mortgage, (3) deferred compensation arrangements and (4) notes payable. Interest expense remained consistent in fiscal 2006 compared to fiscal 2005. Interest expense increased \$8 million in fiscal 2005 primarily as a result of interest on \$300 million aggregate amount of our 5.5% notes that were issued in the second quarter of fiscal 2004 and outstanding for a full year in fiscal 2005.

As more fully described in *Quantitative and Qualitative Disclosures About Market Risk* and Note 8 of the notes to consolidated financial statements for fiscal 2006, we are currently exposed to interest rate risks, foreign currency risks and equity price risks that are inherent in the financial instruments arising from transactions entered into in the normal course of business. We will from time to time use derivative instruments to manage this risk. The derivative instruments we currently hold have not had a material impact on our consolidated financial position or results of operations. Net losses from derivative instruments in fiscal 2006, 2005 and 2004 were not material.

Other Income (Expense). Other income (expense) includes our equity interest in the earnings (loss) and other-than-temporary impairment losses on equity method investees.

Components of this financial statement line item are as follows:

	<u>Year Ended January 31</u>		
	<u>2006</u>	<u>2005</u>	<u>2004</u>
	(in millions)		
Equity interest in earnings (loss)	\$ 5	\$ (6)	\$ 5
Impairment losses on equity method investees		(9)	
Other	2	3	
	<u>\$ 7</u>	<u>\$ (12)</u>	<u>\$ 5</u>

In fiscal 2005, an impairment loss of \$9 million on our investment in Data Systems & Solutions, LLC (DS&S), was recorded primarily due to a significant business downturn at DS&S caused by a loss of business and an ongoing government investigation. On March 24, 2006, we sold our 50% interest in DS&S to our joint venture partner for approximately \$9 million. Our financial commitments related to DS&S are described in *Commitments and Contingencies*.

Provision for Income Taxes. The provision for income taxes as a percentage of income from continuing operations before income taxes was 28.7% in fiscal 2006, 32.5% in fiscal 2005 and 38.4% in fiscal 2004. The lower effective tax rate for fiscal 2006 was primarily due to the reversal of approximately \$50 million in accruals for tax contingencies as a result of settlements of federal and state audits and audit issues for amounts different than the recorded accruals for tax contingencies, as well as the expiration of statutes on open tax years. The effective tax rate in fiscal 2005 was lower than in fiscal 2004 primarily as a result of the favorable closure of state tax audit matters.

We are subject to routine compliance reviews by the IRS and other taxing jurisdictions on various tax matters, which may include challenges to various tax positions we have taken. We have recorded liabilities for tax contingencies for open years based upon our best estimate of the taxes ultimately to be paid. As of January 31, 2006, our income taxes payable balance included \$113 million of tax accruals that have been recorded

Edgar Filing: SAIC, Inc. - Form S-1/A

for tax contingencies. The income taxes payable balance is reduced by deposits made with various tax authorities for anticipated tax payments due on prior tax periods. We are currently undergoing several routine IRS and other tax jurisdiction examinations. While we believe we have adequate accruals for tax contingencies, there is no assurance that the tax authorities will not assert that we owe taxes in excess of our accruals, or that our accruals will not be in excess of the final amounts agreed to by tax authorities.

Income from Continuing Operations. Income from continuing operations increased \$73 million or 27% in fiscal 2006 primarily due to increased interest income of \$52 million, other income from our equity investments, and a lower fiscal 2006 effective tax rate described above. Offsetting the decrease in non-operating expense are

Table of Contents

the contract losses we recorded related to our Greek contract. These contract losses more than offset the increases in the Government SOI from our improved contract margins on other contracts and higher direct labor utilization. Income from continuing operations increased \$48 million in fiscal 2005 or 21% over fiscal 2004. The increase in fiscal 2005 was primarily due to the growth in total consolidated revenues with lower SG&A expenses as a percentage of total consolidated revenues and the lower income tax rate as described above. Offsetting some of the favorable increase in income was an increase in cost of revenues and in net interest expense, which is interest income less interest expense, an impairment loss on our DS&S equity investment, and lower gains from the sale of investments in marketable securities or our private equity securities as described above.

Discontinued Operations. We sold one of our subsidiaries, Telcordia Technologies, Inc., during fiscal 2006. The following table summarizes Telcordia's operating results for fiscal 2006, 2005 and 2004, which for fiscal 2006 reflects the period of February 1, 2005 through March 14, 2005 (prior to the sale):

	Year Ended January 31		
	2006	2005	2004
	(in millions)		
Revenues	\$ 89	\$ 874	\$ 887
Costs and expenses:			
Cost of revenues	57	489	484
Selling, general and administrative expenses, including depreciation and amortization of \$30 million and \$44 million in fiscal 2005 and 2004, respectively	28	235	258
Other (expense) income, net		(1)	1
Income before income taxes	4	149	146
(Benefit) provision for income taxes	(32)	16	19
Income from discontinued operations	\$ 36	\$ 133	\$ 127

After the sale of Telcordia, an income tax benefit of \$32 million related to discontinued operations was recorded to reflect the resolution of certain tax contingencies of Telcordia's operations prior to the sale. We have indemnified the buyer for all income tax obligations on and through the closing date of the transaction. While we believe we have appropriate accruals for these tax contingencies, the ultimate resolution of these matters could differ from the amounts accrued.

We also have customary indemnification obligations owing to the buyer, as well as an obligation to indemnify the buyer against any loss Telcordia may incur as a result of an adverse judgment in the Telkom South Africa litigation. All these future contingent payments or contingent purchase price proceeds and changes in our estimates of these items and other related Telcordia items will continue to be reflected as discontinued operations and result in adjustments to the gain on sale in the period in which they arise.

Net Income. Net income increased \$518 million or 127% in fiscal 2006 primarily due to the after-tax gain of \$546 million on the sale of Telcordia. Net income in fiscal 2005 increased \$58 million or 17% over fiscal 2004, primarily due to the increase in income from continuing operations described above and an increase of \$6 million in income from discontinued operations of INTESA.

Table of Contents**Selected Quarterly Financial Data**

The following tables set forth our selected unaudited quarterly consolidated financial data for fiscal 2006 and 2005 and for the first two quarters of fiscal 2007. The information for each of these quarters has been derived from our unaudited consolidated financial statements, which have been prepared on the same basis as the audited consolidated financial statements included in this prospectus and, in the opinion of management, reflect all adjustments, consisting only of normal and recurring adjustments, necessary to fairly state our results of operations for the periods presented. These quarterly operating results are not necessarily indicative of our operating results for any future period.

	Three Months Ended (1)			
	April 30	July 31	October 31	January 31
	(in millions, except per share amounts)			
Fiscal 2007				
Revenues	\$ 1,958	\$ 2,055		
Operating income	143	157		
Income from continuing operations	94	103		
Income from discontinued operations	12			
Net income	106	103		
Basic earnings per share (2)	\$.63	\$.62

Basic earnings per share (2)	\$.48	\$.44	\$.52	\$.80
Diluted earnings per share (2)	\$.47	\$.43	\$.51	\$.78

(1) Amounts for the first, second and third quarters of fiscal 2005 have been reclassified to conform to the presentation of Telcordia as discontinued operations at January 31, 2005.

(2) Earnings per share are calculated independently for each quarter presented and therefore may not sum to the total for the year.

Liquidity and Capital Resources

Edgar Filing: SAIC, Inc. - Form S-1/A

We financed our operations from our inception in 1969 primarily through cash flow from operations, proceeds from the sale of investments, issuance of debt securities and our credit facilities. Following this offering and the payment of the special dividend, our principal sources of liquidity will be cash flow from operations and borrowings under our credit facility, and our principal uses of cash will be for operating expenses, capital expenditures, working capital requirements, acquisitions, debt service requirements, funding of pension

Table of Contents

obligations and repurchases of class A preferred stock from our retirement plans on the scheduled October 27, 2006 trade in order to provide participants in those plans with liquidity to the extent permitted under the plans. Whether or not we complete this offering, we anticipate that our operating cash flow, existing cash, cash equivalents, and borrowing capacity under our new credit facility will be sufficient to meet our anticipated cash requirements for at least the next twelve months.

Historical Trends

Cash and cash equivalents and short-term investments in marketable securities totaled \$2.4 billion at July 31, 2006 and \$2.7 billion at January 31, 2006. We liquidated \$1.7 billion of short-term investments in marketable securities into cash and cash equivalents during the six months ended July 31, 2006, in part, to prepare for the expected payment of a special dividend following the completion of the offering.

Cash Provided by (Used in) Operating Activities of Continuing Operations. We generated cash flows from operating activities of \$296 million for the six months ended July 31, 2006 compared to \$220 million for the six months ended July 31, 2005. The improvement in cash flows from operating activities for the six months ended July 31, 2006 is primarily due to a \$57 million increase in income from continuing operations.

In fiscal 2006, 2005 and 2004, we generated cash flows from operating activities of \$595 million, \$588 million and \$374 million, respectively. Factors impacting cash flows in fiscal 2006 were higher income from continuing operations and a lower investment in receivables as a result of improvements in our working capital management processes partially offset by an increase in tax payments, including deposits made with various tax authorities for anticipated tax payments due on prior tax periods.

Cash Provided by (Used in) Investing Activities of Continuing Operations. We generated cash flows from investing activities of \$1.6 billion for the six months ended July 31, 2006 due primarily to the liquidation of our investments in marketable securities, in part, to prepare for the expected payment of the special dividend following the completion of this offering. We also used \$31 million for property, plant and equipment and \$32 million (net of cash acquired of \$1 million) to acquire three businesses in our Government segment during the six months ended July 31, 2006. We used \$22 million for property, plant and equipment and \$26 million (net of cash acquired of \$3 million) to acquire one business in our Government segment and to settle certain contingencies associated with previous business acquisitions during the six months ended July 31, 2005. Acquisitions are part of our overall growth strategy.

We used cash of \$583 million, \$345 million and \$468 million for investing activities in fiscal 2006, 2005 and 2004, respectively. The increase in use of cash for 2006 was primarily due to purchases of debt and equity securities that are managed by outside investment managers and the acquisition of four businesses. The primary source of cash to fund these purchases was the proceeds from the sale of Telcordia, which was reflected as cash from investing activities of discontinued operations. In fiscal 2005, we used less cash for investing activities because we did not purchase any land or buildings as we did in fiscal 2004, and our purchases of debt and equity securities, net of proceeds from sales of investments, decreased compared to fiscal 2004. In fiscal 2004, we used cash to purchase land and buildings in McLean, Virginia that had previously been leased. In each of fiscal 2006 and 2005, we used \$212 million to acquire four businesses for our Government segment. In fiscal 2004, we used cash of \$193 million to acquire eight businesses for our Government segment and two businesses for our Commercial segment. All of these acquisitions were part of our overall growth strategy.

Table of Contents

Cash Used in Financing Activities of Continuing Operations. We used cash of \$561 million and \$355 million for financing activities during the six months ended July 31, 2006 and 2005, respectively, and used cash of \$713 million, \$478 million and \$26 million in fiscal 2006, 2005 and 2004, respectively, primarily for repurchases of Old SAIC common stock. Fiscal 2004 uses of cash for financing activities were offset by net proceeds from a debt offering in June 2003. The use of cash resources to repurchase shares of Old SAIC common stock limits our ability to use that cash for other purposes. Old SAIC common stock repurchase activities were as follows for the periods noted:

	Year Ended January 31			Six Months Ended July 31	
	2006	2005	2004	2006	2005
	(in millions)				
Repurchases of Old SAIC common stock:					
Limited market stock trades	\$ 399	\$ 413	\$ 265	\$ 230	\$ 209
Retirement plans	228	75	74	300	67
Upon employee terminations	112	68	56		79
Other stock transactions	79	51	56	54	23
Total	\$ 818	\$ 607	\$ 451	\$ 584	\$ 378

We have the right, but not the obligation, to repurchase stock in the limited market and retirement plan trades, to the extent that the number of shares offered for sale exceeds the number of shares sought to be purchased. The increase in repurchases from the retirement plans during the six months ended July 31, 2006 compared to the same period of the prior year is primarily due to the fact that we provided our retirement plan participants with an opportunity to exchange out of their investments in the SAIC Non-Exchangeable Stock Funds in the June 30, 2006 retirement plans trade. The decrease in repurchases upon employee terminations during the six months ended July 31, 2006, compared to the same period of the prior year, is due to the fact that since September 1, 2005, we have suspended repurchasing shares upon termination of employment pending completion of the proposed reorganization merger and this offering. The increase in repurchases in fiscal 2006 and 2005 was primarily attributable to an increase in the number of shares offered for sale relative to the number of shares sought to be purchased, in addition to increases in share price. Included in the fiscal 2005 shares offered for sale were approximately 1.5 million shares sold by our founder and former chairman who retired in fiscal 2005. The increase in repurchases from the retirement plans in fiscal 2006 is primarily due to repurchases of \$106 million from the Telcordia 401(k) Plan and repurchase of \$122 million from the SAIC Retirement Plan. As a result of the sale of Telcordia, Old SAIC common stock is no longer an investment choice for future contributions in the Telcordia 401(k) Plan. As of July 31, 2006, the Telcordia 401(k) Plan held approximately 3.3 million shares of Old SAIC class A common stock, which had a fair value of \$158 million. We no longer have a right of repurchase under the terms of our Restated Certificate of Incorporation with respect to the shares of our common stock held by the Telcordia 401(k) Plan or any other contractual right to repurchase these shares. However, we agreed with Telcordia to provide an opportunity for the Telcordia 401(k) Plan to sell shares of Old SAIC class A common stock in any trade in which our retirement plans have such an opportunity prior to completion of this offering. Further, we agreed that if this offering is completed, the Telcordia 401(k) Plan will have the same opportunity to sell shares of class A preferred stock as other stockholders generally, but will not have the opportunity to sell such shares in any additional opportunities provided to our retirement plans that are not otherwise provided to other stockholders generally.

Repurchases of our shares reduce the amount of retained earnings in the stockholders' equity section of our consolidated balance sheets. If we repurchase our shares in excess of our cumulative earnings, our retained earnings will decrease, as occurred during the six months ended July 31, 2006, and could result in an accumulated deficit within our stockholders' equity.

Cash Flows from Discontinued Operations. There were no cash flows from discontinued operations for the six months ended July 31, 2006. During the six months ended July 31, 2005, we generated cash proceeds of \$934 million from the sale of Telcordia. In fiscal 2006, we used \$319 million of cash in the operating activities of our Telcordia discontinued operations, primarily for income tax payments related to the sale of Telcordia, and we

Table of Contents

generated cash of \$1.1 billion from investing activities, representing the net cash proceeds from the sale of Telcordia.

Outstanding Indebtedness

Notes payable and long-term debt totaled \$1.2 billion at July 31, 2006 and January 31, 2006 with debt maturities between calendar 2008 and 2033. In addition to our long-term debt, we have a new credit facility providing for \$750 million in unsecured borrowing capacity. Shortly before the completion of the reorganization merger, New SAIC intends to guarantee approximately \$1.2 billion of Old SAIC's notes payable and long-term debt obligations in addition to Old SAIC's credit facility.

Notes Payable and Long-term Debt. Our outstanding notes payable and long-term debt consisted of the following as of the dates noted:

	July 31, 2006	January 31, 2006
	(in millions)	
5.5% notes due 2033	\$ 296	\$ 296
7.125% notes due 2032	248	248
6.25% notes due 2012	549	548
6.75% notes due 2008	94	94
3-year note due 2006		17
Other notes payable	28	36
	<u>1,215</u>	<u>1,239</u>
Less current portion	23	47
Total	<u>\$ 1,192</u>	<u>\$ 1,192</u>

During the six months ended July 31, 2006, our 55% owned joint venture, AMSEC LLC, repaid its 3-year term note that was scheduled to mature in December 2006.

All of the long-term notes described above contain customary restrictive covenants, including, among other things, restrictions on our ability to create liens and enter into sale and leaseback transactions. We were in compliance with such covenants as of July 31, 2006. Our other notes payable have interest rates from 3.4% to 6.0% and are due on various dates through 2016. For additional information on our notes payable and long-term debt, see Note 13 of the notes to consolidated financial statements for fiscal 2006.

Credit Facility. In June 2006, we replaced our previous credit facilities with a new credit facility that provides for borrowings of up to \$750 million through 2011. The new facility's terms and conditions are generally more favorable to us and are structured to facilitate this offering and the payment of the special dividend if New SAIC guarantees the new facility. Borrowings under this new facility are unsecured and bear interest at a rate determined, at our option, based on either LIBOR plus a margin or a defined base rate, and are subject to customary affirmative and negative covenants, including financial covenants. We have transitioned the standby letters of credit issued in connection with the Greek contract to this new credit facility.

Edgar Filing: SAIC, Inc. - Form S-1/A

As of July 31, 2006, no loans were outstanding, although our borrowing capacity was reduced by \$93 million to secure standby letters of credit issued in connection with bonding requirements that we have under the Greek contract. The terms of the standby letters of credit require them to remain outstanding until the customer has formally accepted the system pursuant to the contract. We are in dispute with the customer on this contract as described in [Commitments and Contingencies](#) Firm Fixed-Price Contract with the Greek Government.

The new credit facility contains certain customary affirmative and negative covenants, including financial covenants that require us to maintain a ratio of consolidated funded debt to earnings before interest, taxes, depreciation and amortization (EBITDA) of not more than 3.0 to 1.0 for each trailing four fiscal quarters

Table of Contents

beginning with the fiscal year ended January 31, 2006, and to maintain a ratio of EBITDA to interest expense of greater than 3.5 to 1.0 for the same period. As of July 31, 2006, we were in compliance with all covenants under the credit facility.

Underfunded Pension Obligation

We have a defined pension plan for employees working on a contract in the United Kingdom. As of January 31, 2006, the pension plan had an underfunded projected benefit obligation of \$38 million, which we expected to fund over the next 13 years. Recently enacted legislation in the United Kingdom as well as on going negotiations with this customer may significantly accelerate the timeframe over which we fund this obligation.

Cash Flow Expectations for the Remainder of Fiscal 2007

Assuming we complete this offering, we expect the offering proceeds to be a significant cash inflow for fiscal 2007 and the payment of a special dividend to be a significant use of cash for fiscal 2007.

Following completion of this offering, we will no longer repurchase stock through limited market trades. A retirement plans trade has been scheduled for October 27, 2006, but may be rescheduled if this offering is not completed sufficiently far in advance of that trade date. We currently do not intend to conduct additional retirement plans trades after the October 27, 2006 trade. See [Shares Eligible for Future Sale](#).

If we complete this offering, we expect to have sufficient funds from our existing cash, cash equivalents and borrowing capacity to pay a special dividend. Assuming we complete the offering and pay a special dividend, we expect our cash and cash equivalents, borrowing capacity and expected cash flows from operations to provide sufficient funds for at least the next 12 months for our operations, capital expenditures, repurchases of class A preferred stock from our retirement plans in the scheduled October 27, 2006 trade, business acquisitions, pension obligations and to meet our contractual obligations, including interest payments on our outstanding debt. There is a greater likelihood that we will borrow funds under our credit facility if we ultimately pay the special dividend at the higher end of the stated range.

Off-Balance Sheet Arrangements

We are party to various off-balance sheet arrangements including various guarantees, indemnifications and lease obligations. We have outstanding performance guarantees and cross-indemnity agreements in conjunction with our joint venture investments. See Notes 16 and 19 of the notes to consolidated financial statements for fiscal 2006 for detailed information about our lease commitments and [Commitments and Contingencies](#) for detailed information about our guarantees associated with our joint ventures.

In connection with the sale of Telcordia, as described in Note 11 of the notes to condensed consolidated financial statements for the six months ended July 31, 2006, we retained certain obligations as described in [Commitments and Contingencies](#). We also have customary indemnification obligations and have waived our right to repurchase our common stock from the Telcordia 401(k) Plan as previously discussed.

Table of Contents**Contractual Obligations**

The following table summarizes our obligations to make future payments pursuant to certain contracts or arrangements as of January 31, 2006, as well as an estimate of the timing in which these obligations are expected to be satisfied:

	Payments Due by Fiscal Year				
	Total	2007	2008- 2009	2010- 2011	2012 and After
	(in millions)				
Contractual obligations:					
Long-term debt (1)	\$ 2,417	\$ 120	\$ 249	\$ 139	\$ 1,909
Operating lease obligations (2)	300	103	113	47	37
Capital lease obligations (3)	4	3	1		
Estimated purchase obligations (4)	48	26	22		
Other long-term liabilities (5)	83	18	33	24	8
Total contractual obligations	\$ 2,852	\$ 270	\$ 418	\$ 210	\$ 1,954

- (1) Includes total interest payments on our outstanding debt of \$76 million in fiscal 2007, \$148 million in fiscal 2008-2009, \$137 million in fiscal 2010-2011 and \$806 million in fiscal 2012 and after.
- (2) Excludes \$91 million related to an operating lease on a contract with the Greek government as we are not obligated to make the lease payments to the lessee if our customer defaults on payments to us, as described in *Commitments and Contingencies* Firm Fixed-Price Contract with the Greek Government, *Business* Legal Proceedings, and Notes 16 and 19 of the notes to consolidated financial statements for fiscal 2006.
- (3) Includes interest and executory costs of approximately \$1 million.
- (4) Includes estimated obligations to transfer funds under legally enforceable agreements for fixed or minimum amounts or quantities of goods or services at fixed or minimum prices. Excludes purchase orders for products or services to be delivered pursuant to U.S. Government contracts in which we have full recourse under normal contract termination clauses.
- (5) Includes estimated payments to settle the fiscal 2002 and 2003 swap agreements (as described in Note 8 of the notes to consolidated financial statements for fiscal 2006), contractually required payments to the foreign defined benefit pension plan and deferred compensation arrangements. Because payments under the deferred compensation arrangements are based upon the participant's termination, we are unable to determine when such amounts will become due. Therefore, for purpose of this table we assumed equal payments over the next six years.

Commitments and Contingencies**Telkom South Africa**

Edgar Filing: SAIC, Inc. - Form S-1/A

As described in Note 10 of the notes to condensed consolidated financial statements for the six months ended July 31, 2006, our former Telcordia subsidiary instituted arbitration proceedings before the International Chamber of Commerce (ICC), against Telkom South Africa in March 2001 as a result of a contract dispute. Telkom South Africa successfully challenged the arbitrator's partial award in Telcordia's favor in the South African trial court, and Telcordia has appealed this decision to the South African Supreme Court. In a separate proceeding, Telcordia unsuccessfully attempted to have its partial arbitration award confirmed by the U.S. District Court in early 2005, which held (i) that the court did not have personal jurisdiction over Telkom South Africa and (ii) that issue preclusion resulting from a prior D.C. Circuit Court of Appeals ruling prevented the court from considering Telcordia's petition to confirm the arbitration award. Telcordia appealed this ruling to the U.S. Court of Appeals for the Third Circuit, which on August 14, 2006 reversed the District Court on both issues and indicated that Telcordia could refile the petition after the South African Supreme Court had issued its decision.

On March 15, 2005, we sold Telcordia to an affiliate of Warburg Pincus LLC and Providence Equity Partners Inc. Pursuant to the definitive stock purchase agreement relating to the sale, we are entitled to receive all of the net proceeds from any judgment or settlement with Telkom South Africa, and, if this dispute is settled or decided adversely against Telcordia, we are obligated to indemnify the buyer of Telcordia against any loss that may result from such an outcome.

Table of Contents

Due to the complex nature of the legal and factual issues involved in the dispute and the uncertainty of litigation in general, the outcome of the arbitration and the related court actions are not presently determinable; however, an adverse resolution could materially harm our business, consolidated financial position, results of operations and cash flows. We do not have any assets or liabilities recorded related to this contract and the related legal proceedings as of July 31, 2006 and January 31, 2006. We do not believe a material loss is probable based on the procedural standing of the case and our understanding of applicable laws and facts.

Firm Fixed-Price Contract with the Greek Government

Original Contract. In May 2003, we entered into a euro-denominated firm-fixed-price contract (the Greek contract) with the Hellenic Republic of Greece (the Customer), as represented by the Ministry of Defense, to provide a C4I (Command, Control, Communications, Coordination and Integration) System (the System), to support the 2004 Athens Summer Olympic Games (the Olympics), and to serve as the security system for the Customer's public order departments following completion of the Olympics. The System is comprised of 29 subsystems, organized into three major functional areas: the Command Decision Support System (CDSS), the Communication and Information System and the Command Center Systems. A significant amount of effort on this contract has been and is expected to be performed by subcontractors to us. Under the Greek contract, the System was to be completed, tested, and accepted by September 1, 2004, at a price of approximately \$199 million. To date, we have received advance payments totaling approximately \$147 million. The Greek contract also requires us to provide five years of System support and maintenance for approximately \$13 million and ten years of TETRA radio network services for approximately \$107 million. Under the terms of the Greek contract, our obligation to provide the System support and maintenance and TETRA radio network services only begins upon System acceptance, which has not yet occurred. The Greek contract contains an unpriced option for an additional five years of TETRA network services.

The Memorandum. On July 7, 2004, shortly before the start of the Olympics, we entered into an agreement (the Memorandum) with the Hellenic Republic, as represented by the Committee for Planning and Monitoring the Olympic Security Command Centers, pursuant to which the parties recognized and agreed that: (1) delivery and acceptance of the System had not been completed by the scheduled date; (2) the System would be delivered for use at the Olympics in its then-current state, which included certain omissions and deviations attributable to both parties; (3) a new process for testing and acceptance of the System would be instituted, with final acceptance to occur no later than October 1, 2004; (4) the Customer would proceed with the necessary actions for the completion of a contract modification as soon as possible; and (5) we would receive a milestone payment of approximately \$23 million immediately upon the execution of the contract modification.

Delivery of System, Testing and Negotiations. The Customer took delivery of the System for use and operation during the Olympics, and continues to use significant portions of the System. The System has not been accepted by the Customer under the terms of the Greek contract, and the contract modification anticipated under the Memorandum has not been obtained. In November 2004, we delivered a revised version of the CDSS portion of the System to the Customer. Beginning in December 2004 and continuing through April 2005, the Customer performed subsystems acceptance testing on each of the subsystems comprising the System based on test procedures that had not been mutually agreed upon by the parties. The Customer identified numerous omissions and deviations in its test reports. We believe that certain of these omissions and deviations are valid, while others are not. From December 2004 through April 2005, we engaged in negotiations with the Customer concerning a modification to the Greek contract to resolve the disputes. On April 28, 2005, the Customer formally notified us that the System delivered had significant deviations and omissions from the contractual requirements and may not be accepted.

Under the terms of the Greek contract and the Memorandum between the parties, we submitted various proposals to the Customer to remedy these omissions and deviations. The most significant of these proposals includes a redevelopment of CDSS using an alternative technical approach, and a redesigned port security system. After a series of conflicting communications between us and the Customer, on December 13, 2005, the

Table of Contents

Customer delivered a letter to us indicating that our proposal based on the alternative CDSS approach was deemed acceptable in principle on the terms proposed. The parties reengaged in negotiations in early January 2006 on a contract modification to incorporate these proposals. A contract modification has not yet been executed and would be required in order for us to implement the proposals and achieve Customer acceptance of the System. If such modification is executed, we anticipate that it would include revised testing and acceptance procedures. Until such acceptance occurs, the Customer has advised us that it cannot negotiate appropriate price adjustments for omissions and deviations of a subsystem.

Subcontracts. We have subcontracted a significant portion of the requirements under the Greek contract, including the lease of certain equipment and TETRA network services for at least 10 years. In order for us to implement the technical proposals submitted to the Customer and contemplated by the modification being negotiated with the Customer, we would need to negotiate and execute modifications, including price, to the subcontracts with our subcontractors. Certain of the omissions and deviations of the System are attributable to subcontracted work. Payments to the subcontractors are generally required only if we receive payment from the Customer related to the subcontractors' work. If it is determined we breached our obligations to any of our subcontractors, we may incur additional losses. We and our principal subcontractor disagree as to whether the principal subcontractor fully performed its obligations under the subcontract.

Under the terms of the Greek contract, we are not obligated to provide TETRA network services to the Customer until the Customer has accepted the System. We and our subcontractors have provided System support and maintenance and TETRA network services to the Customer since the Olympics in August 2004, without receiving any compensation. However, there have been several communications from our principal subcontractor and a second tier subcontractor during the past 18 months in which they have indicated that they will not continue to provide such services without compensation and have threatened to terminate these services. For example, the second tier subcontractor most recently indicated that it would terminate such services on August 1, 2006, but subsequently indicated that it would continue to provide the services. To date, there has been no interruption of these services, but our primary subcontractor and the second tier subcontractor could cease providing such services at any time.

Legality of the Greek Contract. In March 2005, the Customer notified us that an issue had been raised concerning the legality of the Greek contract by a Greek government auditor. In August 2005, we learned that the Court of Auditors of the Hellenic Republic (the Greek Audit Court), a government agency with authority to review and audit procurements, issued a decision finding that certain mistakes in the procurement process committed by the Greek government rendered the contract illegal. The Customer requested revocation of the Greek Audit Court decision. On November 17, 2005, the Greek Audit Court issued a decision finding that the errors committed by the Customer in the procurement process constituted pardonable mistakes with respect to prior payments under the Greek contract. Although the rationale of the Greek Audit Court decision suggests that the Customer may be able to make future payments under the Greek contract, the impact of the decision on the legality of the Greek contract and the Customer's ability to make future payments is not clear. The Customer has recently indicated that it will seek the Greek Audit Court's approval of any modification to the Greek contract.

Arbitration Proceedings. Although we have been pursuing a contract modification with the Customer since shortly after the Memorandum was signed in July 2004, due to the difficulties in reaching mutually satisfactory terms, we instituted arbitration proceedings on April 21, 2006 before the International Chamber of Commerce (ICC) against the Customer to pursue our rights and remedies provided for in the Greek contract and the Memorandum and under Greek law. The arbitration complaint filed by us: (1) seeks an order that the Customer's extended use of the System under the circumstances constitutes constructive acceptance and precludes the Customer from rejecting the System, (2) seeks damages for breach of contract, bad faith, use of the System and other damages, (3) seeks a determination as to the legal status of the Greek contract as a result of the illegality issue discussed above, and (4) if the Greek contract is determined to be illegal, seeks compensation for the commercial value of the System delivered and its use by the Customer and other damages. We are seeking total damages in excess of \$76 million, with the precise amount to be proven in arbitration. The Customer filed its response to our arbitration complaint on July 29, 2006 generally denying our claims. Although the Customer

Table of Contents

reserved its right to assert a claim in the arbitration proceedings in the future, its response did not include a counterclaim. Under the terms of the Greek contract, disputes are subject to ultimate resolution by binding arbitration before a panel of three Greek arbitrators in Greece. Due to the complex nature of the legal and factual issues involved and the uncertainty of litigation in general, the outcome of the arbitration is uncertain. There is no assurance that we will prevail in the arbitration.

In the event we do not prevail in the arbitration or are unable to resolve the various disputes under the Greek contract, we could incur additional losses. If the Customer asserts claims against us in the arbitration and it is determined that we have breached the Greek contract and, as a result, owe the Customer damages, such damages could include, but are not limited to, (1) re-procurement costs, (2) repayment of amounts paid of \$147 million under the Greek contract, (3) penalties for delayed delivery in an amount up to \$15 million, and (4) forfeiture of good performance bonds in the amount of \$33 million.

Financial Status and Contingencies of the Contract. We have recorded \$123 million of losses under the Greek contract as of July 31, 2006. We recorded \$2 million of losses relating to foreign currency translation during the six months ended July 31, 2006 and \$16 million of contract losses during the six months ended July 31, 2005. These losses reflect our estimated total cost to complete the System once an acceptable contract modification has been executed, including the estimated results of negotiations on reductions in price for remaining omissions and deviations from the original Greek contract requirements. Because of the significant uncertainties related to ultimate acceptance and payment from the Customer, our accounting treatment assumes the Greek contract value is limited to the cash received to date. Although we expect to pursue remaining amounts owed under the terms of the Greek contract, this reduction in total estimated revenues to be realized under the Greek contract increased the total loss by \$32 million during the year ended January 31, 2006, which is included in the loss amounts discussed above. Through July 31, 2006, we have recognized revenues of \$120 million, which represent a portion of the \$147 million cash received to date based upon the percentage-of-completion method of revenue recognition.

As of July 31, 2006, the estimated future costs to complete the System and obtain Customer acceptance is \$51 million. This estimated cost is included in the \$123 million of Greek contract losses recorded as of July 31, 2006. Management has used its judgment in evaluating the various uncertainties and assumptions necessary to estimate the total loss on this contract. Such assumptions include obtaining mutual agreement with the Customer regarding system requirements, execution of a modification to the Greek contract, completion of the System and Customer acceptance. Management has estimated that final acceptance of the System under a modified contract will occur approximately 18 months following when a contract modification is obtained. Our recorded losses exclude potential subcontractor payments associated with the omissions and deviations related to specific subsystems supplied by subcontractors in the amount of \$13 million that management believes will not be paid under the subcontract terms if these amounts are not paid by the Customer.

We have \$14 million of accounts receivable relating to Value Added Taxes (VAT) that we have paid and believe we are entitled to recover either as a refund from the taxing authorities or as a payment under the Greek contract upon final billing. The Greek contract requires the Customer to pay amounts owed for VAT for the System delivered. Failure by the Customer to pay these amounts could result in an additional obligation payable by us to the Greek taxing authorities and would increase our total losses on the Greek contract.

In accordance with the terms of the Greek contract, we are required to provide certain payment, performance and offset bonds in favor of the Customer. These bonding requirements have been met through the issuance of standby letters of credit. Under the terms of these bonding arrangements, the Customer currently has the right to call some or all of the \$245 million of standby letters of credit outstanding. The letters of credit supporting the payment bonds (\$159 million) and performance bonds (\$33 million) may be called by the Customer submitting a written statement to the guaranteeing bank that we have not fulfilled our obligations under the Greek contract. The letters of credit supporting the offset bonds (\$53 million) may be called by the Customer submitting a written statement to the guaranteeing bank that we have not fulfilled our obligations under a separate offset contract requiring us, among other things, to use Greek subcontractors on the Greek contract. We

Table of Contents

believe that, under Greek law, any amounts obtained by the Customer through such a calling of these letters of credit may properly be retained by the Customer only as security against any actual damages it proves in arbitration, and that any excess must be returned to us. We do not currently believe it is probable that the Customer will call these standby letters of credit. If the standby letters of credit are called, we may have the right to call some or all of the \$102 million in bonds provided by our subcontractors in connection with their work under the Greek contract.

While we are still pursuing the execution of an acceptable contract modification with the Customer, based upon our inability to obtain such modification for more than two years, we believe it is most likely that the resolution of the issues surrounding the Greek contract will be determined in arbitration under the proceedings described above or through a negotiated settlement with the Customer. Based on management's evaluation of the possible arbitration outcomes, we do not believe it is probable that the outcome of arbitration will result in a loss that is more than we have recorded on this contract to date and accordingly, no additional loss (other than foreign currency translation) has been recorded. Due to the complex nature of the issues surrounding the Greek contract, resolution is uncertain and will depend upon future negotiations with the customer or the outcome of arbitration proceedings. Successful imposition of damages or claims by the Customer or subcontractors against us, the calling of our bonds, additional contract costs required to fulfill our obligations, or additional revenue reductions arising from the negotiation of the Greek contract modification could have a material adverse affect on our consolidated financial position, results of operations and cash flows.

DS&S Joint Venture

In March 2006, we sold our interest in DS&S, a joint venture in which we owned a 50% interest. As part of the sale, we agreed to indemnify the purchaser for certain legal costs and expenses, including those relating to an on-going government investigation involving DS&S and any litigation resulting from that investigation up to the sum of the sales price of \$9 million plus the amount received by us in repayment of a \$1 million loan receivable owed by DS&S. As of July 31, 2006, we have deferred any gain on the sale of DS&S pending resolution of the on-going investigation and any resulting litigation.

INTESA Joint Venture

INTESA, a Venezuelan joint venture we formed in fiscal 1997 with Venezuela's national oil company, PDVSA, to provide information technology services in Latin America, is involved in various legal proceedings. We had previously consolidated our 60% interest in the joint venture, but the operations of INTESA were classified as discontinued operations as of January 31, 2003 and INTESA is currently insolvent. PDVSA has refused to have the joint venture declared bankrupt as required under Venezuelan law.

Outsourcing Services Agreement and Guarantee. INTESA had derived substantially all its revenues from an outsourcing services agreement with PDVSA that it entered into at the time the joint venture was formed. The services agreement expired on June 30, 2002 and the parties were not able to reach agreement on a renewal. We guaranteed INTESA's obligations under the services agreement to PDVSA. Under the terms of the services agreement, INTESA's liability for damages to PDVSA in any calendar year is capped at \$50 million. As a result, our maximum potential liability to PDVSA under the guarantee in any calendar year, based on our guarantee of PDVSA's ownership interest in INTESA, is \$20 million. To date, PDVSA has not asserted any claims.

Expropriation of Our Interest in INTESA. In fiscal 2003 and 2004, PDVSA and the Venezuelan government took certain actions, including denying INTESA access to certain of its facilities and assets, which prevented INTESA from continuing operations. In fiscal 2005, the Overseas Private Investment Company (OPIC), a U.S. governmental entity that provides insurance coverage against expropriation of U.S. business interests by foreign governments, determined that the Venezuelan government had expropriated our interest in INTESA without compensation

and paid us approximately \$6 million in settlement of our claim.

Employment Claims of Former INTESA Employees. INTESA is a defendant in a number of lawsuits brought by former employees seeking unpaid severance and pension benefits. PDVSA and SAIC Bermuda, our

Table of Contents

wholly-owned subsidiary and the entity that held our interest in INTESA, were added as defendants in a number of these suits. Based on the procedural standing of the cases and our understanding of applicable laws and facts, we believe that our exposure to any possible loss related to these employment claims is either remote or, if reasonably possible, immaterial.

Other Legal Proceedings Involving INTESA. The Attorney General of Venezuela initiated a criminal investigation of INTESA in fiscal 2003 alleging unspecified sabotage by INTESA employees. We believe this investigation is inactive. In connection with our expropriation claim, OPIC determined that INTESA did not sabotage PDVSA's infrastructure as alleged by PDVSA and the Venezuelan government. In addition, the SENIAT, the Venezuelan tax authority, filed a claim against INTESA in fiscal 2004 for approximately \$30 million for alleged non-payment of VAT taxes in fiscal 1998.

Potential Financial Impact. Many issues relating to INTESA, including the termination of the services agreement and the employment litigation brought by former INTESA employees, remain unresolved. Due to the complex nature of the legal and factual issues involved in these matters and the uncertain economic and political environment in Venezuela, the outcome is not presently determinable; however, adverse resolutions could materially harm our business, consolidated financial position, results of operations and cash flows.

Other Joint Ventures

We are an investor in Danet Partnership GbR (Danet GbR), a German partnership accounted for under the equity method. Danet GbR is the controlling shareholder in Danet GmbH, a German operating company. Danet GbR has an internal equity trading market similar to our limited market. We are required to provide liquidity rights to the other Danet GbR investors in certain circumstances. Absent a change in control whereby we gain control over Danet GbR, these rights allow Danet GbR investors who are withdrawing from the partnership to put their Danet GbR shares to us in exchange for the current fair value of those shares. If we gain control over Danet GbR, all Danet GbR investors have the right to put their shares to us in exchange for the current fair value of those shares. If Danet GbR investors put their shares to us, we may pay the put price in shares of our common stock or cash. We do not currently record a liability for these put rights because their exercise is contingent upon the occurrence of future events which we cannot determine will occur with any certainty. During the six months ended July 31, 2006, we paid less than \$1 million to withdrawing Danet GbR investors who exercised their right to put their Danet GbR shares to us. The maximum potential obligation, assuming all the current Danet GbR investors were to put their Danet GbR shares to us, was \$7 million as of July 31, 2006. If we were to incur the maximum obligation and buy all the partnership shares currently held by other Danet GbR investors, we would then own 100% of Danet GbR and would hold a controlling interest in Danet GmbH.

We have a guarantee that relates only to claims brought by the sole customer of another of our joint ventures, Bechtel SAIC Company, LLC, for specific contractual nonperformance of the joint venture. We also have a cross-indemnity agreement with the joint venture partner, pursuant to which we will only be ultimately responsible for the portion of any losses incurred under the guarantee equal to our ownership interest of 30%. Due to the nature of the guarantee, as of July 31, 2006 we are not able to project the maximum potential obligation we could be required to make under the guarantee but, based on current conditions, we believe the likelihood of having to make any payment is remote. Accordingly, no liability relating to this guarantee is currently recorded.

On September 15, 2004, we entered into an agreement with EG&G Technical Services, Inc. (EG&G), and Parsons Infrastructure & Technology Group, Inc. (Parsons), to form Research and Development Solutions, LLC (RDS), a Delaware limited liability company that will pursue contracts offered by the Department of Energy's National Energy Technical Laboratory. We, EG&G and Parsons, each have a one-third equal joint venture interest. In conjunction with a contract award to RDS, each joint venture partner was required to sign a performance guarantee agreement with the U.S. Government. Under this agreement, we unconditionally guarantee all of RDS's obligations to the U.S. Government under the contract award, which has a total value of up to \$217 million. We also have a cross-indemnity agreement with each of the other two joint venture partners

Table of Contents

to protect us from liabilities for any U.S. Government claims resulting from the actions of the other two joint venture partners and to limit our liability to our share of the contract work. As of July 31, 2006, the fair value of the guarantee is not material to us.

Other

We are subject to investigations and reviews relating to compliance with various laws and regulations with respect to our role as a contractor to agencies and departments of the U.S. Government and in connection with performing services in countries outside of the United States. Such matters can lead to criminal, civil or administrative proceedings and we could be faced with penalties, fines, repayments or compensatory damages. Adverse findings could also have a material adverse effect on us because of our reliance on government contracts. Although we can give no assurance, based upon management's evaluation of current matters that are subject to U.S. Government investigations of which we are aware and based on management's current understanding of the facts, we do not believe that the outcome of any such matter would have a material adverse effect on our consolidated financial position, results of operations, cash flows or our ability to conduct business.

We are also involved in various claims and lawsuits arising in the normal conduct of our business, none of which, in the opinion of our management, based upon current information, will likely have a material adverse effect on our consolidated financial position, results of operations, cash flows or ability to conduct business.

In the normal conduct of our business, we seek to monetize our patent portfolio through licensing agreements. We also have and will continue to defend our patent positions when we believe our patents have been infringed and are involved in such litigation from time to time. As described in Note 11 of the notes to condensed consolidated financial statements for the six months ended July 31, 2006, on March 15, 2005, we sold our Telcordia subsidiary. Pursuant to the terms of the definitive stock purchase agreement, we will receive 50% of any net proceeds Telcordia receives in the future in connection with the enforcement of certain patent rights.

As part of the terms of the sale of Telcordia, in addition to the indemnification related to the Telkom South Africa litigation, we also have indemnified the buyer for all income tax obligations on and through the date of close. While we believe we have adequate accruals for these tax contingencies, the ultimate resolution of these matters could differ from the amounts accrued. All of these future contingent payments or contingent purchase price proceeds will continue to be reflected as discontinued operations in the period in which they arise.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The preparation of these financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingencies at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Management evaluates these estimates and assumptions on an on-going basis, including those relating to allowances for doubtful accounts, inventories, fair value and impairment of investments, fair value and impairment of intangible assets and goodwill, income taxes, warranty obligations, estimated profitability of long-term contracts, pension benefits, contingencies and litigation. Our estimates and assumptions have been prepared on the basis of the most current reasonably available information. The results of these estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from these estimates under different assumptions and conditions.

Edgar Filing: SAIC, Inc. - Form S-1/A

We have several critical accounting policies that are both important to the portrayal of our financial condition and results of operations and require management's most difficult, subjective and complex judgments. Typically, the circumstances that make these judgments complex and difficult have to do with making estimates about the effect of matters that are inherently uncertain. We no longer consider our accounting policies for pension plans and derivative instruments to be critical accounting policies. With the sale of Telcordia, our

Table of Contents

remaining pension plans are not of a material size, and therefore our accounting policies for pension plans are not considered critical accounting policies as the impact of management judgment related to pension plans is not considered significant. Similarly, our use of derivative instruments has not been material since fiscal 2003, and therefore we no longer consider our derivative instrument accounting policies to be critical accounting policies. Our critical accounting policies are as follows:

Revenue Recognition. Our revenues are primarily recognized using the percentage-of-completion method as discussed in Statement of Position 81-1, Accounting for Performance of Construction-Type and Certain Production-Type Contracts. Under the percentage-of-completion method, revenues are recognized based on progress towards completion, with performance measured by the cost-to-cost method, efforts-expended method or units-of-delivery method, all of which require estimating total costs at completion. Estimating costs at completion on our long-term contracts, particularly due to the technical nature of the services being performed, is complex and involves significant judgment. Factors that must be considered in making estimates include labor productivity and availability, the nature and technical complexity of the work to be performed, potential performance delays, the availability and timing of funding from the customer, the progress toward completion and the recoverability of claims. Adjustments to original estimates are often required as work progresses, experience is gained and additional information becomes known, even though the scope of the work required under the contract may not change. Any adjustment as a result of a change in estimates is made when facts develop, events become known or an adjustment is otherwise warranted, such as in the case of a contract modification. When estimates indicate that we will experience a loss on the contract, we recognize the estimated loss at the time it is determined. Additional information may subsequently indicate that the loss is more or less than initially recognized, which would require further adjustment in our financial statements. We have procedures and processes in place to monitor the actual progress of a project against estimates and our estimates are updated quarterly or more frequently if circumstances warrant.

Although our primary revenue recognition policy is the percentage-of-completion method, we do have contracts under which we use alternative methods to record revenue (see Note 1 of the notes to consolidated financial statements for fiscal 2006). Selecting the appropriate revenue recognition method involves judgment based on the contract and can be complex depending upon the structure and terms and conditions of the contract.

Costs incurred on projects accounted for under the percentage-of-completion method can be recognized as pre-contract costs and deferred as an asset when we have been requested by the customer to begin work under a new contract, or extend or modify work under an existing contract (change order). We record pre-contract costs when formal contracts or contract modifications have not yet been executed, and it is probable that we will recover the costs through the issuance of a contract or contract modification. When the formal contract or contract modification has been executed, the costs are recorded to the contract and revenue is recognized based on the percentage-of-completion method of accounting.

Contract claims are unanticipated additional costs incurred in excess of the executed contract price that we seek to recover from the customer. Such costs are expensed as incurred. Additional revenue related to contract claims is recognized when the amounts are awarded by the customer.

Income Taxes. Income taxes are provided utilizing the liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax basis of assets and liabilities. Under the liability method, changes in tax rates and laws are reflected in income in the period such changes are enacted. In addition, the provisions for federal, state, foreign and local income taxes are calculated on reported financial statement income before income taxes based on current tax law and include the cumulative effect of any changes in tax rates from those used previously in determining deferred tax assets and liabilities. Such provisions differ from the amounts currently payable because certain items of income and expense are recognized in different time periods for financial reporting purposes than for income tax purposes. We also have recorded liabilities for tax contingencies for open years based upon our best estimate of the taxes ultimately expected to be paid. A significant portion of our income taxes payable balance is comprised of tax accruals that have been recorded for tax contingencies.

Table of Contents

Recording our provision for income taxes requires management to make significant judgments and estimates for matters whose ultimate resolution may not become known until final resolution of an examination by the IRS or State agencies. Additionally, recording liabilities for tax contingencies involves significant judgment in evaluating our tax positions and developing our best estimate of the taxes ultimately expected to be paid.

Stock-Based Compensation. We recognize as compensation expense the fair value of all stock-based awards, including stock options, granted to employees and others in exchange for services, typically over the period during which such awards are earned. We are also required to recognize as compensation expense the 15% discount on employee stock purchases made under our ESPP. The estimation of stock option fair value requires management to make complex estimates and judgments about, among other things, employee exercise behavior, forfeiture rates, and the volatility of our common stock. These judgments directly affect the amount of compensation expense that will ultimately be recognized.

Investments in Marketable and Private Equity Securities. Our marketable debt and equity securities are carried on the balance sheet at fair value, with changes in fair value recorded through equity. When the fair value of a security falls below its cost basis and the decline is deemed to be other-than-temporary, we record the difference between cost and fair value as an unrealized loss. Investments accounted for on the cost method or equity method must be marked down to estimated fair value if an other-than-temporary decline occurs. In determining whether a decline is other-than-temporary, management considers a wide range of factors that may vary depending upon whether the investment is a marketable debt or equity security or a private investment. These factors include the duration and extent to which the fair value of the security or investment has been below its cost, recent financing rounds at a value that is below our carrying value, the operating performance of the entity, its liquidity and our investment intent. The private equity investments involve more judgment than the marketable equity securities because there is no readily available fair market value of a private equity security. Therefore, management, in addition to considering a wide range of other factors, must also use valuation methods to estimate the fair value of a private equity investment. Management judgments about these factors may impact the timing of when an other-than-temporary loss is recognized, and management's use of valuation methods to estimate fair value may also impact the amount of the impairment loss.

Business Combinations and Goodwill Impairment. We have engaged and expect to continue to engage in significant business acquisition activity. The accounting for business combinations requires management to make judgments and estimates of the fair value of assets acquired, including the identification and valuation of intangible assets, as well as the liabilities and contingencies assumed. Such judgments and estimates directly impact the amount of goodwill recognized in connection with each acquisition. As of July 31, 2006, goodwill represents 53% of our consolidated long-term assets and 13% of consolidated total assets.

Goodwill is tested annually in our fourth fiscal quarter and whenever an event occurs or circumstances change such that it is reasonably possible that an impairment condition may exist. The goodwill impairment test is a two-step process that requires management to make judgments in determining what assumptions to use in the calculation. The first step of the process consists of estimating the fair value of each of the reporting units based on a discounted cash flow model using revenue and profit forecasts and comparing those estimated fair values with the carrying values, which includes the allocated goodwill. If the fair value is less than the carrying value, a second step is performed to compute the amount of the impairment by determining an implied fair value of goodwill. The implied fair value of goodwill is the residual fair value derived by deducting the fair value of a reporting unit's identifiable assets and liabilities from its estimated fair value calculated in step one. The impairment charge represents the excess of the carrying amount of the reporting unit's goodwill over the implied fair value of goodwill. The revenue and profit forecasts used in step one are based on management's best estimate of future revenues and operating costs. Changes in these forecasts could cause a particular reporting unit to either pass or fail the first step in the impairment test, which could significantly change the amount of the impairment recorded from step two. In addition, the estimated future cash flows are adjusted to present value by applying a discount rate. Changes in the discount rate impact the impairment by affecting the calculation of the fair value of the reporting unit in step one.

Table of Contents

Recently Issued Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 clarifies how uncertain tax positions that have been taken or are expected to be taken on a company's tax return should be recognized, measured, presented and disclosed in the financial statements. The cumulative effect of applying this pronouncement to uncertain tax positions at the date of adoption will be recorded during the fiscal year beginning February 1, 2007. We are currently evaluating the effect that the adoption of FIN 48 will have on our consolidated financial position and results of operations.

Effects of Inflation

Our cost-reimbursement type contracts are generally completed within one year. As a result, we have generally been able to anticipate increases in costs when pricing our contracts. Bids for longer-term FFP and T&M contracts typically include sufficient provisions for labor and other cost escalations to cover cost increases over the period of performance. Consequently, revenues and costs have generally both increased commensurate with the general economy. As a result, net income as a percentage of total consolidated revenues has not been significantly impacted by inflation.

Quantitative and Qualitative Disclosures About Market Risk

We are exposed to certain market risks in the normal course of business. Our current market risk exposures are primarily related to interest rates and foreign currency fluctuations. The following information about our market sensitive financial instruments contains forward-looking statements.

Interest Rate Risk. Our exposure to market risk for changes in interest rates relates primarily to our cash equivalents, investments in marketable securities, interest rate swaps and long-term debt obligations.

We have established an investment policy to protect the safety, liquidity and after-tax yield of invested funds. This policy establishes guidelines regarding acceptability of instruments and maximum maturity dates and requires diversification in the investment portfolios by establishing maximum amounts that may be invested in designated instruments. We do not authorize the use of derivative financial instruments in our managed short-term investment portfolios. Our policy authorizes the limited use of derivative instruments only to hedge specific interest rate risks.

Table of Contents

The table below provides information about our financial instruments at January 31, 2006 that are sensitive to changes in interest rates. For debt obligations and short-term investments, the table presents principal cash flows in U.S. dollars and related weighted average interest rates by expected maturity dates. For interest rate swap agreements, the table presents the notional amounts and weighted average interest rates. The notional amounts are used to calculate the contractual cash flows to be exchanged under the contracts. As described in Note 8 of the notes to consolidated financial statements for fiscal 2006, the swap agreements we entered into in May 2003 are expected to substantially offset interest rate exposures related to the swap agreements previously entered into in January 2002. As a result, on a combined basis, these swaps are no longer exposed to changing interest rates and we have excluded these swap agreements from the table below.

	2007	2008	2009	2010	2011	There- after	Total	Estimated Fair Value as of January 31, 2006
(dollars in millions)								
Assets:								
Cash equivalents (1)	\$ 1,032						\$ 1,032	\$ 1,032
Average interest rate	4.41%							
Investment in marketable securities:								
Variable rate	\$ 1,659						\$ 1,659	\$ 1,659
Weighted average interest rate	4.53%							
Liabilities:								
Short-term and long-term debt:								
Variable interest rate (2)	\$ 44		\$ 1	\$ 1	\$ 1	\$ 3	\$ 50	\$ 50
Weighted average interest rate	4.01%		4.46%	4.46%	4.46%	4.46%		
Fixed rate	\$ 3	\$ 1	\$ 100			\$ 1,100	\$ 1,204	\$ 1,252
Weighted average interest rate	5.87%	5.90%	6.75%			6.24%		
Interest Rate Derivatives								
Interest rate swap agreements								
Fixed to variable			\$ 100				\$ 100	\$ 3
Average receive rate	6.75%	6.75%	6.75%					
Average pay rate	7.88%	7.88%	7.88%					

(1) Includes \$21 million denominated in British pounds

(2) The fiscal 2006 amount includes \$19 million denominated in Euros and \$7 million denominated in Canadian dollars

Short term interest rates related to these financial instruments have increased since January 31, 2005, while long term interest rates remained relatively consistent. At January 31, 2006, our investments in marketable securities and cash equivalents were higher than January 31, 2005 by approximately \$292 million and \$64 million, respectively. We also had a larger portion of our marketable securities invested in financial instruments bearing variable interest rates at January 31, 2006 than January 31, 2005. Short term interest rates related to these financial instruments have increased since January 31, 2006. At July 31, 2006, a significant portion of our total assets consisted of cash equivalents, which are subject to fluctuations in short term interest rates. The increase in cash equivalents bearing variable interest rates results in increased sensitivity to changes in interest rates.

Foreign Currency Risk. Although the majority of our transactions are denominated in U.S. dollars, some transactions are denominated in various foreign currencies. Our objective in managing our exposure to foreign currency exchange rate fluctuations is to mitigate adverse fluctuations in earnings and cash flows associated with foreign currency exchange rate fluctuations. Our policy allows us to actively manage cash flows, anticipated transactions and firm commitments through the use of natural hedges and forward foreign exchange contracts. We do not use foreign currency derivative instruments for trading purposes.

Edgar Filing: SAIC, Inc. - Form S-1/A

We assess the risk of loss in fair values from the impact of hypothetical changes in foreign currency exchange rates on market sensitive instruments by performing a sensitivity analysis. The fair values for forward foreign exchange contracts were estimated using spot rates in effect on July 31, 2006. The differences that result from comparing hypothetical foreign exchange rates and actual spot rates as of July 31, 2006 are the hypothetical gains and losses associated with foreign currency risk. As of July 31, 2006, holding all other variables constant, a 10% weakening of the U.S. dollar against each hedged currency would affect the fair values of the forward foreign exchange contracts by immaterial amounts.

Table of Contents

BUSINESS

Overview

We are a leading provider of scientific, engineering, systems integration and technical services and solutions to all branches of the U.S. military, agencies of the U.S. Department of Defense (DoD), the intelligence community, the U.S. Department of Homeland Security (DHS) and other U.S. Government civil agencies, as well as to customers in selected commercial markets. Our customers seek our domain expertise to solve complex technical challenges requiring innovative solutions for mission-critical functions in such areas as national security, intelligence and homeland defense. The increase in demand for our services and solutions has been driven by priorities including the ongoing global war on terror and the transformation of the U.S. military.

From fiscal 2002 to fiscal 2006, our consolidated revenues increased at a compound annual growth rate of 15.5% to a company record of \$7.8 billion, inclusive of acquisitions and exclusive of Telcordia Technologies, Inc., our commercial telecommunications subsidiary, which we divested in March 2005. Through the first half of fiscal 2007, our consolidated revenues increased by 6% over the same period in the prior year. As of July 31, 2006, we had a portfolio of approximately 9,000 active contracts. Our total consolidated negotiated backlog as of July 31, 2006 was approximately \$16.0 billion, which included funded backlog of approximately \$4.0 billion, compared to \$15.1 billion and \$3.9 billion, respectively, as of January 31, 2006.

Currently, we serve more than 500 U.S. federal, state and local government agencies through our contracts, which include active task orders under indefinite delivery/indefinite quantity (IDIQ) contract vehicles, under which the U.S. Government issues task orders for specific services or products to be procured on previously negotiated terms. We believe we have a diversified portfolio of contracts, with revenues recognized in fiscal 2006 under our largest contract representing approximately 4% of our total consolidated revenues. In addition to our national security customers, we provide services to various other U.S. federal civil agencies, including the U.S. National Aeronautics and Space Administration (NASA), the U.S. Department of Energy (DOE), the National Institutes of Health (NIH) and the National Cancer Institute (NCI). In May 2006, Washington Technology, a leading industry publication, ranked us number three in its list of Top Federal Prime Contractors in the United States based on IT, telecommunications and systems integration revenues. We expect to continue to derive the vast majority of our revenues and cash flows from our installed base of U.S. Government customers.

We view our 43,100 employees as our most valuable asset. We have historically attracted and retained our employees by providing challenging and important work, an entrepreneurial culture and broad employee stock ownership opportunities. Approximately 23,000 of our employees have national security clearances provided by the U.S. Government. Many U.S. Government programs require contractors to have high-level security clearances. Depending on the required level of clearance, security clearances can be difficult and time-consuming to obtain, and our large pool of cleared employees allows us to allocate the appropriate human resources to sensitive projects, facilitating our ability to win and execute contracts with the DoD, DHS and U.S. intelligence community. Our Chief Executive Officer, our seven Executive Vice Presidents and our five Group Presidents have industry experience averaging over 32 years and tenure with our company averaging over 12 years.

Our Government segment provides a broad range of technical services and solutions in the following areas, which are described under **Services and Solutions**:

- *Defense Transformation.* We develop leading-edge concepts, technologies and systems to solve complex challenges facing the U.S. military and its allies, helping them transform the way they fight.

Edgar Filing: SAIC, Inc. - Form S-1/A

- *Intelligence.* We develop solutions to help the U.S. defense, intelligence and homeland security communities build an integrated intelligence picture, allowing them to be more agile and dynamic in challenging environments and produce actionable intelligence.
- *Homeland Security and Defense.* We develop technical solutions and provide systems integration and mission-critical support services to help federal, state, local and foreign governments and private-sector customers protect the United States and allied homelands.

Table of Contents

- *Logistics and Product Support.* We provide logistics and product support solutions to enhance the readiness and operational capability of U.S. military personnel and weapon and support systems.
- *Systems Engineering and Integration.* We provide systems engineering and integration solutions to help our customers design, manage and protect complex IT networks and infrastructure.
- *Research and Development.* As one of the largest science and technology contractors to the U.S. Government, we conduct leading-edge research and development of new technologies with applications in areas such as national security, intelligence and life sciences.

The percentage of our total consolidated revenues generated by our Government segment for fiscal 2006, 2005 and 2004 was 94%, 94% and 93%, respectively.

Our Commercial segment provides technology-driven consulting, systems integration and outsourcing services and solutions in selected commercial markets, currently IT support for oil and gas exploration and production, applications and IT infrastructure management for utilities and data lifecycle management for pharmaceuticals, in the United States and abroad. We apply domain-specific expertise, and adapt consulting and technology services and solutions developed for our Government segment customers, to fulfill the needs of our Commercial segment customers. These needs include enterprise IT optimization, data lifecycle management, asset management and business process analysis and transformation. The percentage of our total consolidated revenues generated by our Commercial segment was 7% for each of fiscal 2006, 2005 and 2004.

Industry Background

In fiscal 2006, 2005 and 2004, we derived 89%, 86% and 85% of our revenues, respectively, from various departments and agencies of the U.S. Government. According to the Congressional Budget Office estimates, U.S. Government total discretionary outlays in government fiscal 2006 will be approximately \$1,035 billion, and we estimate that more than \$200 billion of this amount will be spent in areas in which we compete.

U.S. Government National Security Spending

Spending on national security accounts for the largest portion of the discretionary U.S. Government budget. According to Congressional Budget Office estimates, aggregate defense and homeland security discretionary outlays will be \$555 billion for government fiscal 2006. These government fiscal 2006 outlays represent an increase of \$56 billion over government fiscal 2005, an 11% increase. Spending priorities are heavily influenced by ongoing military deployment in Iraq and Afghanistan and the global war on terror.

Military

Global War on Terror. National security spending is driven primarily by the DoD. After substantial contraction in the DoD budget during the early 1990s with the end of the Cold War, spending on national security began to rebound significantly in 1999. This trend was accelerated by the U.S. Government's response to the September 11, 2001 terrorist attacks. According to Congressional Budget Office estimates, DoD

Edgar Filing: SAIC, Inc. - Form S-1/A

discretionary outlays will grow at a rate of 6.0% from government fiscal 2005 to 2006. These discretionary outlays do not include the June 2006 legislation for \$65.88 billion in supplemental defense appropriations for the global war on terror. As a result of the ongoing global war on terror and the U.S. military's continued deployment to Iraq and Afghanistan, we expect the U.S. Government to continue investing heavily in national security, including in programs for which we compete.

Defense Transformation. Another key driver of recent U.S. Government national security spending has been defense transformation with a focus on command, control, communications, computers, intelligence, surveillance and reconnaissance (C4ISR). Although it predated the September 11, 2001 terrorist attacks, the effort to transform the military has accelerated as a result of the global war on terror. We believe that U.S. Government spending on defense transformation will be driven by several interrelated goals, including (1) improved threat assessment, dissemination of actionable intelligence and advance warning of threats,

Table of Contents

(2) a more mobile, versatile and effective military and (3) the development of network-centric warfighting capabilities. We believe the DoD's annual investment in defense transformation will average more than \$75 billion in each of the next four government fiscal years. Of this amount, we expect approximately \$60 billion will be spent each year to acquire transformational systems and capabilities and approximately \$15 billion each year to improve and outsource business, logistics and product support functions. Of the spending on the acquisition of systems and capabilities, we estimate that approximately \$30 billion will be spent each year on defense transformation-related research and development, testing and evaluation (RDT&E), a large portion of which will be spent on contractors like us. Of the \$15 billion that we estimate will be spent each year to improve and outsource business, logistics and product support functions, we estimate that approximately \$5 billion will be spent on contractors like us.

Intelligence

Budget data for government fiscal 1998, the most recent period for which intelligence-related budget data has been declassified, indicated an annual intelligence budget in excess of \$26 billion. We believe that the U.S. Government's response to the global war on terror has resulted in increased spending by U.S. intelligence agencies and expect it to continue to grow in the foreseeable future. The Intelligence Reform and Terrorism Prevention Act of 2004 mandated better integration and timeliness of global and domestic threat assessment and dissemination of actionable information and created the office of Director of National Intelligence with budgetary authority over 16 intelligence agencies. We expect that the increased focus on coordination and interoperability among these intelligence agencies will require significant support by outside contractors like us.

Homeland Defense

In addition to spending on the global war on terror overseas, the U.S. Government has intensified its efforts to protect the United States against terrorism at home. The Congressional Budget Office estimates that homeland security outlays will increase from \$33.3 billion in government fiscal 2005 to \$61 billion in government fiscal 2006, representing a growth rate of 84.7%. Although we expect that spending on homeland security will remain robust in government fiscal 2006 and 2007, we do not expect spending to continue to increase beyond fiscal 2007 at these historical levels. We believe that a significant portion of future homeland defense spending will focus on protecting U.S. citizens from chemical, biological, radiological and nuclear (CBRN) attacks, protecting and fortifying critical infrastructure, enhancing information security, upgrading enterprise systems to better facilitate communications and facilitating coordination and communication within and among government agencies.

U.S. Government IT Spending

The U.S. Government is the largest single consumer of IT solutions, systems and services in the world. According to the Government Electronics & Information Technology Association, an industry association, the portion of total U.S. Government IT spending that is contracted to private sector providers like us will be \$65 billion in government fiscal 2006 and will grow at a compound annual growth rate of 2.9% to \$75 billion in government fiscal 2011. We believe that the U.S. Government's demand for IT systems and services is driven by the national security concerns stemming from the global war on terror, the ongoing transformation of the military and the increased reliance on IT outsourcing by the U.S. Government.

Commercial Services

Edgar Filing: SAIC, Inc. - Form S-1/A

We compete in targeted areas of the commercial business services market, which is driven largely by corporate investment in technology to enhance productivity, reduce costs and increase profitability. Competitive factors, including emerging technologies and globalization, are highlighting critical areas of corporate IT spending such as enterprise information technology optimization, data lifecycle management, asset management and business analysis and transformation. The ability of businesses to capture, access, analyze and transmit data rapidly throughout an organization and between remote geographic locations is becoming more critical. In addition, increased merger and acquisition activity is also generating higher corporate IT spending. With IT

Table of Contents

projects becoming more complex in scale and scope, businesses are increasingly turning to IT services providers for access to specialized expertise and systems engineering and integration capabilities that are either not readily available from internal resources or not in their core competency. As a result, we have focused our efforts in selected commercial markets in which we can leverage our specialized experience and skill sets, currently oil and gas, utilities and pharmaceuticals.

Oil and Gas. The oil and gas industry is experiencing a period of historically high levels of cash flow and profitability. At the same time, diminishing reserves at proven sites and disappointing trends in greenfield exploration are placing an increased premium on data integration and exploitation at all phases of the upstream exploration and development process. Also, the oil and gas industry is relying more heavily on data management and integration to match its upstream production capabilities with downstream distribution to its end-user customers more effectively and efficiently. According to IDC, total worldwide oil and gas industry IT spending is expected to be \$39.3 billion in 2006.

Utilities. With the consolidation and deregulation of utilities in the United States and United Kingdom, utility companies are facing increased profitability and financial performance expectations from their stakeholders. Utilities' resulting focus on more efficient power generation, distribution and asset management is driving investment in IT infrastructure and business processes. According to IDC, total worldwide utility industry IT spending is expected to be \$18.1 billion in 2006.

Pharmaceuticals. Advances in medical knowledge and research tools have dramatically increased the sources and amount of information available to scientists in the fields of drug discovery and development. Simultaneously, the high costs of clinical trials, increased pressure on drug pricing and prescription reimbursement and product liability risks have increased the importance of systems to manage drug development data. We believe that these trends are driving spending on data integration and lifecycle management in every phase of the drug discovery and development process. Industry consolidation in the pharmaceuticals and life sciences sectors is also driving the necessity for data management and IT optimization. According to IDC, worldwide total IT spending for the life sciences sector, which includes pharmaceutical companies and biotechnology companies, is expected to be \$33.9 billion in 2006.

Competitive Strengths

To maximize our ability to consistently deliver innovative solutions to help meet our customers' most challenging needs, and to grow our business and increase stockholder value, we rely on the following key strengths:

Skilled Personnel and Experienced Management. Our people are our most valuable asset. Our professional staff is highly educated, with more than 22,000 holding college degrees, of which 45% hold advanced degrees, including more than 1,500 with doctoral degrees. As of July 31, 2006, we had 43,100 employees, approximately 23,000 of whom had national security clearances. Many U.S. Government programs require contractors to have high-level security clearances. Depending on the required level of clearance, security clearances can be difficult and time consuming to obtain, and our large pool of cleared employees allows us to allocate the appropriate human resources to sensitive projects, facilitating our ability to win and execute contracts with the DoD, DHS and U.S. intelligence community. In addition, our Chief Executive Officer, our seven Executive Vice Presidents and our five Group Presidents have industry experience averaging over 32 years and tenure with our company averaging over 12 years.

Employee Ownership and Core Values. We believe that a cornerstone of our success has been our culture of employee ownership supported by our long-standing core values. Approximately 35,500 of our 43,100 employees own our stock. We believe that we have a high level of employee ownership relative to our competitors, and this better aligns our employees' interests with those of our company, our other non-employee stockholders and our customers. Following this offering, we intend to continue to provide our employees with opportunities to own our stock

through bonuses in stock or stock options, stock contributions to our employee

Table of Contents

benefit plans and participation in our employee stock purchase plan. We believe that our employee ownership culture, in addition to our core values, differentiates us from our competition. These core values include:

- commitment to ethical conduct
- fostering entrepreneurship and innovation
- pursuit of technical excellence
- focus on high level of customer satisfaction

Knowledge of Customers Needs. Over the past 35 years, we have developed a deep and sophisticated knowledge of our customers, enabling us to design effective solutions that address their mission-critical needs and integrate these solutions with existing systems. We have also made strategic hires of managerial-level employees with significant government experience who have supplemented our knowledge of our customers business processes and who have extended our expertise into new areas.

Technical Expertise. We have deep technical expertise stemming from our work on our customers most challenging and complex problems. This technical expertise allows us to stay at the forefront of technology and innovation in key technical areas, such as:

- computer network technologies and infrastructure
- data mining and management
- high performance computing and storage
- modeling and simulation
- sensors, surveillance, and signal processing
- supply chain management
- unmanned vehicles and robotics

Trusted Services and Solutions Provider. We have provided platform-independent systems engineering and IT services and solutions to the U.S. Government and other customers since 1969. Over this time, we believe we have earned a reputation as a trusted provider of services and solutions for complex problems, including those with significant national security implications. We believe our position as a prime contractor on several key U.S. Government programs reflects the U.S. Government's confidence in our abilities to address its mission-critical needs. As a result

Edgar Filing: SAIC, Inc. - Form S-1/A

of our strong record of performance, we have become one of the top three IT and systems integrators for the U.S. Government, as evidenced by industry publications:

- #1 GSA Contractor Government Executive (August 2006)
- #2 Top Federal Prime IT Contractors INPUT (May 2005)
- #2 Top Systems Integrators Federal Computer Week (September 2006)
- #3 Top Federal Prime Contractors Washington Technology (May 2006)
- #3 Top Technology Contractors Government Executive (August 2006)
- #3 Top U.S. Systems Integration Vendors IDC (November 2005)

Proven Marketing and Business Development Organization. Our highly effective marketing and business development organization has helped us achieve high contract win rates and grow our business with existing and new customers. Our non-IDIQ contract win rates, based on award values, were 69%, 65% and 64% in fiscal 2006, 2005 and 2004, respectively.

Ability to Complete and Integrate Acquisitions. To complement our internal growth, we have completed and integrated approximately 60 acquisitions of small- and medium-sized companies over the 10 fiscal years ended

Table of Contents

January 31, 2006, with an aggregate purchase price of approximately \$1.7 billion. These acquisitions have provided us with highly skilled personnel including many with security clearances and specialized technical expertise, as well as valuable customer relationships, thereby enhancing our internally-developed capabilities. We believe that our ability to identify, acquire and integrate complementary businesses is a core strength that will continue to play a significant role in our growth and success.

Strong Relationships with Small Businesses. The U.S. Government is focused on supporting small and disadvantaged businesses through formal procurement regulations and set-asides. We have strong relationships with a large number of small and disadvantaged businesses that possess a wide range of skills and significant customer contacts. These relationships provide us access to specialized capabilities, allow us to participate with these businesses in programs with set-aside requirements and improve our competitive positioning in programs for which small and disadvantaged business participation is important.

Growth Strategy

We are focused on continuing to grow our business as a leading scientific, engineering, systems integration and technical services and solutions company. In our Government segment, we seek to become the leading provider of systems engineering, systems integration and technical services and solutions. In our Commercial segment, we seek to become a leading supplier of scientific, engineering and business solutions to our customers in additional targeted vertical markets. Elements of our growth strategy include:

Leverage Our Existing Customer Relationships. We plan to continue expanding the scope of the services we provide to our existing customers. We are adept at penetrating, cross-selling to and building-out existing customer accounts through our successful performance and comprehensive knowledge of our customers' needs, which has led to many long-term contract relationships. We believe our high level of customer satisfaction and deep knowledge of our customers' business processes enhances our ability to cross-sell additional services.

Increase Our U.S. Government Customer Base. We believe that the U.S. Government's increased emphasis on national security, intelligence and homeland security has significantly increased our market opportunity. We have extensive experience supporting the U.S. Government in the areas of contingency and emergency response and recovery planning, information assurance, critical infrastructure protection and command, control, communications and intelligence. We intend to leverage this broad experience to expand our customer base to include organizations in the U.S. Government for which we have not historically worked. We believe our ability to win new customers is enhanced by our position as a prime contractor on four of the largest IT services GWACs, which are task-order or delivery-order contracts for IT services established by one agency for government-wide use. These contracts enable us to sell our services and solutions to virtually any U.S. Government agency. In addition we have used and intend to continue to use strategic hires as a cost-effective way to build out customer accounts, to establish new competencies and to penetrate new markets.

Pursue Strategic Acquisitions. In order to complement our internal growth, we plan to continue to pursue strategic acquisitions in areas that we expect to experience high growth. Our acquisition strategy is focused on companies that will enable us to cost-effectively add new customers, specific agency knowledge and/or technical expertise. We have acquired more than 70 companies over the 10 fiscal years ended January 31, 2006 and intend to continue to selectively acquire high quality companies that accelerate our access to existing or new markets that we believe have strong growth dynamics. Following the completion of this offering, we will have greater flexibility to make acquisitions through the issuance of publicly traded shares of our common stock.

Grow High Value-Added Business in Selected Commercial Markets. We intend to grow in our current selected commercial markets and identify other markets in which we can leverage our specialized experience and skill sets.

Table of Contents

Services and Solutions

We offer a broad range of services and solutions to address our customers' most complex and critical needs. Below is a summary of our principal services and some representative projects that illustrate the breadth of our capabilities. References below to total contract value mean the aggregate potential value of a given contract, assuming that all options are exercised under that contract. See Risk Factors Risks Relating to Our Business.

Defense Transformation

We develop leading-edge concepts, technologies and systems to solve complex challenges facing the U.S. military and its allies, helping them transform the way they fight. To help ensure that U.S. military personnel are better equipped, protected and trained, we assist the DoD in developing and implementing advanced technologies into the current armed forces. As a leader in the emerging area of network-centric operations, we are helping the U.S. military to develop next-generation C4ISR capabilities, including advanced communications networks, shared situational awareness, improved collaborative planning and enhanced mobility and logistics. We received the 2004 Frost & Sullivan Competitive Strategy Leadership Award, which recognized us as one of the most trusted and influential high-level C4ISR systems integrators. Some examples of our defense transformation projects are described below.

U.S. Army's Future Combat Systems Program (FCS). The U.S. Army is undertaking a major program to design, prototype and build combat technologies and systems to serve as the centerpiece of the U.S. Army's transformation into a more mobile, versatile and effective force. We and The Boeing Company were selected in June 2003 by the U.S. Army as the lead systems integrator team for FCS. When completed, FCS will consist of 19 individual battlefield systems interconnected and commanded through an advanced network. The FCS network will be capable of monitoring and directing military equipment and personnel in all kinds of terrain and weather conditions and providing an integrated picture of the battlefield wherever located. This program highlights our ability to conceive and design a large system of systems employing leading-edge technology to address the military's future needs in new and innovative ways. The FCS Program is scheduled to run through December 31, 2014 and has a total contract value to us of approximately \$2.7 billion. FCS currently is our largest non-IDIQ contract.

Net-Centric Enterprise Services. We are supporting the DoD's efforts to migrate from the current Global Command and Control System (GCCS) to the next generation of Joint Command and Control (JC2) based on a new services-based approach called Net-Centric Enterprise Service (NCES). We are helping define how a services-oriented architecture and web services technology should be integrated on an enterprise scale in support of warfighter operations. We are providing architecture, design, systems engineering, integration of commercial and government software, performance testing, security and information assurance engineering and deployment support to this migration effort. We believe our experience and capabilities developed in connection with the GIG-BE program, the GCCS-Joint program and the NCES initiatives have positioned us well for future major C4ISR programs. We participate in this program under the Defense Information Systems Network (DISN) Global Solutions master agreement, which is an IDIQ contract vehicle. This contract has a value to all contractors of up to \$3 billion, including contract options exercisable through 2010.

Intelligence

We develop solutions to help the U.S. defense, intelligence and homeland security communities build an integrated intelligence picture, allowing them to be more agile and dynamic in challenging environments and produce actionable intelligence.

Edgar Filing: SAIC, Inc. - Form S-1/A

We provide operations, engineering and technical support for the development and improvement of technologies relating to intelligence collection, processing, dissemination, collaboration and implementation. Our intelligence services include activities related to (1) the support of intelligence and operations centers, (2) surveillance and reconnaissance through satellite technologies and unmanned aerial vehicle operations centers and (3) enhanced radar and sensors on weapon systems. We also support human intelligence and

Table of Contents

counterintelligence activities. Much of the information regarding our intelligence programs is classified. Some unclassified examples of our intelligence projects are provided below.

Geospatial Intelligence. Imagery, mapping and geospatial reference data are essential elements of all military activity. Our services include activities related to the acquisition, management, interpretation, integration, analysis and display of imagery and related mapping and intelligence data, referred to as geospatial intelligence. For example, we help U.S. Northern Command (NORTHCOM), the U.S. military command responsible for, among other things, U.S. homeland defense, and other government agencies provide timely, relevant, and actionable intelligence to homeland defenders. As part of this work, we developed, and now maintain, the geospatial component of NORTHCOM's intelligence operations. We are one of the largest contract producers of geospatial information for the National Geospatial-Intelligence Agency, having provided new imagery exploitation capabilities to 15 sites worldwide last year.

Surveillance and Reconnaissance. Unmanned vehicles have become an increasingly important intelligence-gathering tool. Our technologies are used in some of the most sophisticated unmanned aerial vehicles (UAV) ever developed. We previously integrated and recently upgraded the operations center and ground stations for the Predator UAV, which was widely used in Iraq, and our technical staff supports operational crews during all Predator missions. We have also played a key role in the design and integration of the high-altitude, long-range Global Hawk UAV, and, at the other end of the spectrum, we helped test and evaluate a hand-launched UAV called Dragon Eye, which provided U.S. Marines in Iraq with infrared surveillance videos of their operating area. Our wide-ranging system, software and engineering services are at the forefront of developing and fielding emerging UAV surveillance and reconnaissance technologies.

Homeland Security and Defense

We develop technical solutions and provide systems integration and mission-critical support services to help federal, state, local and foreign governments and private-sector customers protect the United States and allied homelands. Our innovation and breadth of solutions in homeland security was recently recognized when Frost & Sullivan named us as the 2005 Homeland Security Company of the Year.

We provide services and solutions including vulnerability analysis, infrastructure protection and emergency response and recovery. We contribute to critical counterintelligence plans and programs to assess vulnerabilities and help safeguard important events and infrastructure, including the 2004 national political conventions, the U.S. Capitol, House and Senate office buildings and the Library of Congress. We are also developing countermeasures to address a range of threats from dirty bombs to improvised nuclear devices to full-scale nuclear weapons. We are also working on multiple fronts to attack the toughest problems in bioagent detection. Following a disaster, managing critical infrastructure information is crucial for ensuring continuity of operations. We have designed more than a dozen emergency operations centers, primarily for state and local agencies, to manage the interoperability between new equipment and legacy responder systems. Some examples of our projects in homeland security are described below.

Protecting Against Chemical, Biological, Radiological, and Nuclear (CBRN) Threats. We have an extensive understanding of the design and employment of weapons of mass destruction which is critical to detection of, protection from and response to these threats. Our expertise spans the range of CBRN threats, as evidenced by the DoD's recent selection of us as the prime contractor under the Guardian Installation Protection Program to provide CBRN protection for up to 200 DoD installations. Commanders at these installations are facing the full range of CBRN threats and a confusing array of CBRN detection, protection and response choices. As the prime contractor for the Guardian project, we will help choose and field the appropriate integrated detection, protection and response capabilities. The Guardian program has a total contract value to us of \$593 million.

Edgar Filing: SAIC, Inc. - Form S-1/A

Protecting Ports, Borders and Transportation. Only a small portion of the millions of cargo containers moving by ship, road and rail are screened for weapons of mass destruction or other hazards. To help address this threat, we developed the Integrated Container Inspection System (ICIS), which scans sealed containers for

Table of Contents

hazardous materials at cargo terminals and border crossings without disrupting normal traffic flow. ICIS employs several of our technologies, including (1) EXPLORANIUM detectors for low-level radiation scanning, (2) optical character recognition technology for automated container identification and (3) VACIS[®] inspection systems for identification of a wide range of substances, including weapons, hazardous materials and drugs. Nearly 300 VACIS systems are deployed globally, and the ICIS has been deployed in two pilot programs in Hong Kong. Our products and services are now deployed in 20 major ports in multiple countries, demonstrating international adoption of this solution.

Enterprise Systems Integration for Homeland Defense. Following the consolidation of 22 U.S. Government agencies into the Department of Homeland Security (DHS), we were selected under the STARS System Management and Integration program as the prime contractor to provide enterprise-wide integration services for the Immigration and Customs Enforcement element of the DHS. Some of the services included implementation of a data network backbone connecting the formerly separate agencies and the development of the first enterprise architecture in DHS. By laying this foundation, we helped the DHS map its IT systems to specific business functions, identify overlapping systems and more effectively identify needed IT programs. In fiscal 2006, we were selected as prime contractor under the follow-on Information Technology Engineering Support Services (ITESS) program to continue to provide integration services. The follow-on ITESS program has a total contract value to us of \$428 million.

Logistics and Product Support

Maintaining and delivering a ready supply of fuel, parts, munitions, food and other supplies is a constant challenge for the U.S. military. Our logistics and product support solutions enhance the readiness and operational capability of U.S. military personnel and weapon and support systems.

To keep up with the pace of military operations, logisticians need intelligence sensors, communications networks and analytics, as well as the same best-in-class supply chain solutions that are used in the commercial sector, such as demand forecasting, total asset visibility and just-in-time inventory. To address these needs for the U.S. Navy, we are providing a supply chain management solution to Naval Aviation Depots and the Defense Logistics Agency in support of maintenance, repair and overhaul of 72 weapon systems. Under the contract, we employ a supplier/manufacturer network with supply chain management capability to supply more than 84,000 items. Our supply chain management system incorporates intelligent agent technology, which automatically tracks inventory levels in tens of thousands of bins as parts are consumed and forecasts when items should be reordered, cutting average supply delivery times. This program has a total contract value to us of \$627 million.

Systems Engineering and Integration

Large government organizations face increasingly tough challenges to integrate and share massive amounts of data from geographically remote and disparate databases and legacy systems. We provide systems engineering and integration solutions to help our customers design, manage and protect complex IT networks and infrastructure. We support customers across the domains and mission areas of the U.S. Government, providing a range of services from full-scale systems deployment to systems engineering support services.

With the increasing complexity of weapons systems and military tactics, the U.S. military has an increasing need for more sophisticated training tools and solutions. Through our software and systems-engineering organizations, we have pioneered innovative modeling and simulation technologies, including distributed simulation for training and distributed test and evaluation. Today, our expertise ranges from traditional areas, such as training and analysis simulation, to emerging areas, such as simulation-based acquisition. Currently, we lead the development of the DoD's architecture and middleware for seamlessly integrating live-virtual-constructive simulation for experimentation, training, test and

Edgar Filing: SAIC, Inc. - Form S-1/A

evaluation and acquisition. As a leader in modeling and simulation, we support the U.S. s three premier military simulation training programs: the Army Warfighter Simulation (WARSIM), the Joint Simulation System (JSIMS), and the Air Force National Air and Space Model (NASM). Additionally, our expertise in semi-automated forces technology in the United States

Table of Contents

resulted in our selection to lead the software implementation of British doctrine and tactics for the U.K. Combined Arms Tactical Trainer. These four programs have an aggregate total contract value to us of \$126 million. Our success with these programs demonstrates our ability to leverage our experience and capabilities to obtain new projects.

Research and Development

As one of the largest science and technology contractors to the U.S. Government, we conduct leading-edge research and development of new technologies with applications in areas such as national security, intelligence and life sciences. We believe that being at the forefront of science and technology provides us with a competitive advantage and positions us as a solution provider for our customers' next-generation challenges. Some examples of our research and development projects are described below.

Advanced Robotics. We develop and test advanced robotic systems, including prototype unmanned robotic vehicles. An advanced autonomous robotic vehicle that we developed in collaboration with Carnegie Mellon University recently competed in a Defense Advanced Research and Projects Agency (DARPA) sponsored test, designed to prove the concept of integration of advanced robotic vehicles into unmanned military systems. The mapping and route planning software we developed for this project has provided valuable insights that could be used for geospatial intelligence requirements for future military robotic systems. For DARPA, we developed a networked system of 100 small robots that are able to intelligently collaborate on missions. In the future, these robots may be used to search and map terrorist-occupied or earthquake-damaged buildings, as well as track intruders.

Wireless Sensors. For DARPA, we are also exploring innovative ways to deploy tiny wireless sensors, known as Smart Dust, that can self-configure into a network and gather and fuse information into actionable intelligence information. For example, we are researching how these sensors could help the U.S. military improve situational awareness, reconnaissance, surveillance and target acquisition capabilities in urban areas.

Biopharmaceutical and Medical Research. We operate the National Cancer Institute (NCI) at Frederick, Maryland, one of the world's premier cancer and AIDS research facilities. We support a wide range of research areas for NCI, the National Institute of Allergy and Infectious Diseases, and the U.S. Army, including the development of nanotechnology applications for the prevention and treatment of cancer, as well as vaccines for HIV, anthrax and malaria. The NCI's new cancer Biomedical Informatics Grid will enable cross-disciplinary sharing of research between more than 600 cancer researchers from over 50 different cancer centers. We are developing important grid-based middleware, applications and security for this groundbreaking initiative.

Commercial Services

We help our Commercial segment customers become more competitive, offering technology-driven consulting, systems integration and outsourcing services and solutions primarily to customers in selected commercial markets, currently IT support for oil and gas exploration and production, applications and IT infrastructure management for utilities and data lifecycle management for pharmaceuticals, in the United States and abroad. We apply domain-specific expertise, as well as consulting and technology services and solutions adapted from our experience with our Government segment customers, to fulfill the needs of our Commercial segment customers. These needs include enterprise IT optimization, data lifecycle management, asset management and business process analysis and transformation. Some examples of our commercial projects are described below.

Edgar Filing: SAIC, Inc. - Form S-1/A

The Digital Oilfield. The oil and gas industry faces significant challenges to maximize exploration and production while minimizing capital risk and requirements. The industry employs highly specialized systems and solutions to meet these challenges. To help one of the largest global oil and gas companies design and operationalize its next generation oilfield and refinery called the Field of the Future and Refinery of the Future, respectively, we are working to implement and manage mission-critical geophysical data collection and

Table of Contents

decision support systems. Our solutions provide the architecture for more complete asset awareness, enabling improved decision making. We have similar projects with two other major oil and gas companies.

Asset Management for Utility Companies. Asset management has become increasingly important to utility companies as they look to streamline costs and create other efficiencies related to their extensive assets, many of which have useful lives spanning decades. A leading U.K. utility company sought to create more efficient methods to provide maintenance and emergency repairs of its physical assets used in electricity delivery, such as power substations, pole-mounted transformers, overhead lines and underground cables. We helped design and implement an asset management system for this utility company. This system provides field personnel with up-to-date, easy-to-access mapping information which is used to readily locate electricity substations, transformers and power cables, as well as to facilitate the use of fault diagnosis tools to enable technicians to efficiently and effectively address power loss problems across the utility's power grid.

Contracts

As of July 31, 2006, we had a portfolio of approximately 9,000 active contracts, including active task orders under IDIQ contract vehicles. We have a diversified portfolio of contracts, with revenues recognized in fiscal 2006 under our largest contract representing approximately 4% of our total consolidated revenues. Listed below are the 10 contracts which generated the most revenues and which in the aggregate represented 14% of our total consolidated revenues in fiscal 2006.

<u>Contract title</u>	<u>Customer</u>
Future Combat Systems (FCS)	U.S. Army
Unified NASA Information Technology Services (UNITeS)	NASA
Global Information Grid-Bandwidth Expansion (GIG-BE)	U.S. Defense Information Systems Agency (DISA)
Air Force Industrial Prime Vendor	U.S. Air Force
Data Services Installation & Maintenance	DISA
Information Technology Services Agreement	Entergy
Safety, Reliability & Quality Assurance (SR&QA)	NASA
Omnibus 2000 Systems & Computer Resources Support	U.S. Army
EXECUTELOCUS (formerly Trailblazer Technical Development Program)	Confidential
Information Technology Systems, Engineering and Management Support Services (ISEM)	Department of Transportation

Contract Procurement. The U.S. Government technology services procurement environment has evolved in recent years due to statutory and regulatory procurement reform initiatives. U.S. Government agencies traditionally have procured technology services and solutions through agency-specific contracts awarded to a single contractor. However, in recent years the number of procurement contracting methods available to U.S. Government customers for services procurements has increased substantially. Today, there are three predominant contracting methods through which U.S. Government agencies procure technology services: traditional single award contracts, GSA Schedule contracts, and single and multiple award IDIQ contracts. Each of these is described below:

- Traditionally, U.S. Government agencies have procured services and solutions through single award contracts which specify the scope of services that will be delivered and identify the contractor that will provide the specified services. When an agency has a requirement, interested contractors are solicited, qualified and then provided with a request for a proposal. The process of qualification, request for proposals and evaluation of bids requires the agency to maintain a large, professional procurement staff and can take a year or more to complete.

Edgar Filing: SAIC, Inc. - Form S-1/A

- GSA Schedule contracts are listings of services, products and prices of contractors maintained by the GSA for use throughout the U.S. Government. In order for a company to provide services under a GSA Schedule contract, the company must be pre-qualified and awarded a contract by GSA. When an agency uses a GSA Schedule contract to meet its requirements, the agency, or the GSA on behalf of the agency,

Table of Contents

conducts the procurement. The user agency, or the GSA on its behalf, evaluates the user agency's services requirements and initiates a competition limited to GSA Schedule qualified contractors. GSA Schedule contracts are designed to provide the user agency with reduced procurement time and lower procurement costs.

- Single and multiple award IDIQ contracts are contract forms used to obtain commitments from contractors to provide certain products or services on pre-established terms and conditions. Under IDIQ contracts, the U.S. Government issues task orders for specific services or products it needs and the contractor supplies products or services in accordance with the previously agreed terms. The competitive process to obtain task orders is limited to the pre-selected contractor(s). If the IDIQ contract has a single prime contractor, the award of task orders is limited to that party. If the contract has multiple prime contractors, the award of the task order is competitively determined. Multiple-contractor IDIQ contracts that are open for any government agency to use for the procurement of services are commonly referred to as government-wide acquisition contracts, or GWACs. Due to the lower cost, reduced procurement time, and increased flexibility of GWACs, there has been greater use of GWACs among many agencies for large-scale procurements of technology services. IDIQ contracts often have multi-year terms and unfunded ceiling amounts, therefore enabling but not committing the U.S. Government to purchase substantial amounts of products and services from one or more contractors.

Below is a list of our 10 largest non-IDIQ contracts based on total contract value to us, including funded backlog and negotiated unfunded backlog as of July 31, 2006. For information regarding our backlog, see [Backlog](#).

Top 10 non-IDIQ contracts by total contract value

<u>Contract title</u>	<u>Customer</u>	<u>Total SAIC contract value</u>	<u>Contract expiration date</u>
		(in millions)	
Future Combat Systems (FCS)	U.S. Army	\$ 2,724	Dec 31, 2014

Safety and Mission Assurance Support Services (S&MA)	NASA	266	Apr 30, 2011
Systems Engineering & Integration Contract (SEIC)	U.S. Air Force	235	Apr 14, 2017
		<u>\$ 6,475</u>	

Table of Contents

Below is a list of our 10 largest GSA Schedule or IDIQ contract vehicles based on total contract vehicle ceiling value that could be awarded to all contractors, including us, as of July 31, 2006.

Top 10 GSA Schedule or IDIQ contract vehicles by total contract vehicle ceiling value (1)

Contract title	Customer	Total contract vehicle ceiling value to all contractors	Contract vehicle expiration date
		(in millions)	
SeaPort Enhanced (2)	U.S. Navy	\$ 45,409	Apr 1, 2019
Millennia	GSA Federal Technology Service	25,000	Apr 27, 2009
Millennia Lite	GSA Federal Technology Service	20,000	Apr 21, 2010
Defense Medical Information Systems (D/SIDDOMS III)	Defense Contracting Command	8,000	Dec 14, 2013
Flexible Acquisition Sustainment Tool (FAST)	U.S. Air Force	7,441	Feb 23, 2008
Simulation, Training & Instrumentation Command (STRICOM)	U.S. Army	4,000	Sep 20, 2008
Omnibus			
DISN Global Solutions	DISA	3,000	Sep 30, 2010
Weapons of Mass Destruction Defeat Technology	Defense Threat Reduction Agency	1,260	Apr 30, 2008
Applications & Support for Widely-Diverse End User Requirements (ANSWER)	GSA Federal Technology Service	1,100	Dec 31, 2008
Next Generation Engineering	DISA	1,000	Apr 21, 2009
		\$ 116,210	

(1) Total contract ceiling value represents the maximum amount of contract awards that could be awarded to all contractors, including us, eligible to compete for task orders under the contract vehicle.

(2) Contract with AMSEC, LLC, our 55% owned joint venture.

Backlog

Government segment funded backlog primarily represents the portion of backlog for which funding is appropriated and is payable to us upon completion of a specified portion of work, less revenues previously recognized on these contracts. Commercial segment funded backlog represents the full value on firm contracts, which may cover multiple future years, under which we are obligated to perform less revenues previously recognized on these contracts. Our funded backlog in the Government segment does not represent the full potential value of our contracts because the U.S. Government and our other customers often appropriate or authorize funds for a particular program or contract on a yearly or quarterly basis, even though the contract may call for performance over a number of years. When a definitive contract or contract amendment is executed and funding has been appropriated or otherwise authorized, funded backlog is increased by the difference between the funded dollar value of the contract or contract amendment and the revenues recognized to date on the contract. Negotiated unfunded backlog represents (1) firm orders for which funding has not been appropriated or otherwise authorized and (2) unexercised priced contract options. Negotiated unfunded backlog does not include any estimate of future potential task orders that might be awarded under IDIQ, GWAC or GSA Schedule contract vehicles.

Table of Contents

The approximate value of our total consolidated negotiated backlog as of January 31, 2006, 2005 and 2004 and July 31, 2006 was as follows:

	January 31			July 31
	2006	2005	2004	2006
(in millions)				
Government Segment:				
Funded backlog	\$ 3,398	\$ 3,333	\$ 3,127	\$ 3,332
Negotiated unfunded backlog	11,169	9,656	7,359	11,921
Total negotiated backlog	\$ 14,567	\$ 12,989	\$ 10,486	\$ 15,253
Commercial Segment:				
Funded backlog	\$ 490	\$ 313	\$ 228	\$ 666
Negotiated unfunded backlog	5	114	187	81
Total negotiated backlog	\$ 495	\$ 427	\$ 415	\$ 747
Total Consolidated:				
Funded backlog	\$ 3,888	\$ 3,646	\$ 3,355	\$ 3,998
Negotiated unfunded backlog	11,174	9,770	7,546	12,002
Total consolidated negotiated backlog	\$ 15,062	\$ 13,416	\$ 10,901	\$ 16,000

We expect to recognize a substantial portion of our funded backlog as revenues within the next 12 months. However, the U.S. Government may cancel any contract or purchase order at any time. In addition, certain contracts and purchase orders in the Commercial segment may include provisions that allow the customer to cancel at any time. Most of our contracts have cancellation terms that would permit us to recover all or a portion of our incurred costs and potential fees in such cases. See Risk Factors Risks Relating to Our Business We may not realize as revenues the full amounts reflected in our backlog, which could adversely affect our future revenues and growth prospects.

Key Customers

Our largest customer is the U.S. Government, in the aggregate accounting for 89%, 86% and 85% of our total consolidated revenues in fiscal 2006, 2005 and 2004, respectively. Within the U.S. Government, our largest customers for each of the last three fiscal years were the U.S. Army, U.S. Navy and U.S. Air Force. Each of these customers has a number of subsidiary agencies which have separate budgets and procurement functions. Our contracts may be with the highest level or with the subsidiary agencies of these customers.

The percentage of total consolidated revenues attributable to each of these three major customers for the last three fiscal years was as follows:

	Year Ended January 31		
	2006	2005	2004
U.S. Army	16%	13%	13%
U.S. Navy	14	13	12
U.S. Air Force	10	11	11

Competition

Competition for U.S. Government contracts is intense. We compete against a large number of major, established multinational corporations which may have greater financial capabilities than we do. We also compete against smaller, more specialized companies that concentrate their resources on particular areas. As a result of the diverse requirements of the U.S. Government and our commercial customers, we frequently form

Table of Contents

teams with other companies to compete for large contracts, while bidding against team members in other situations. Because of the current industry trend toward consolidation, we expect major changes in the competitive landscape. See **Risk Factors** **Risks Relating to Our Business**. We face aggressive competition that can impact our ability to obtain contracts and therefore affect our future revenues and growth prospects. We believe that our principal competitors include the following companies:

- Among contractors focused principally on U.S. Government IT and other technical services, we compete primarily with companies such as Anteon International Corporation, which was acquired by General Dynamics, CACI International Inc, ManTech International Corporation, SRA International, Inc. and The Titan Corporation, which was acquired by L-3 Communications.
- Among the large defense contractors which provide U.S. Government IT services in addition to other hardware systems and products, we compete primarily with engineering and technical services divisions of The Boeing Company, General Dynamics Corporation, Lockheed Martin Corporation, Northrop Grumman Corporation and Raytheon Company.
- Among the diversified commercial and U.S. Government IT providers, we compete primarily with companies such as Accenture Ltd, BearingPoint, Inc., Booz Allen Hamilton Inc., Computer Sciences Corporation, Electronic Data Systems Corporation, International Business Machines Corporation and Unisys Corporation.

We compete on factors including, among others, our technical expertise, our ability to deliver cost-effective solutions in a timely manner, our reputation and standing with government and commercial customers, pricing and the size and scale of our company.

Patents and Proprietary Information

Our technical services and products are not generally dependent upon patent protection. We claim a proprietary interest in certain of our products, software programs, methodology and know-how. This proprietary information is protected by copyrights, trade secrets, licenses, contracts and other means.

We actively pursue opportunities to license our technologies to third parties and enforce our patent rights. We also evaluate potential spin-offs of our technologies.

In connection with the performance of services for customers in the Government segment, the U.S. Government has certain rights to data, software codes and related material that we develop under U.S. Government-funded contracts and subcontracts. Generally, the U.S. Government may disclose such information to third parties, including, in some instances, competitors. In the case of subcontracts, the prime contractor may also have certain rights to the programs and products that we develop under the subcontract.

Research and Development

We conduct research and development activities under customer-funded contracts and with independent research and development (IR&D) funds. IR&D efforts consist of projects involving basic research, applied research, development and systems and other concept formulation studies. In fiscal 2006, 2005 and 2004, we spent approximately \$27 million, \$25 million and \$19 million, respectively, on IR&D, which was

included in selling, general and administrative expenses.

Seasonality

The U.S. Government's fiscal year ends on September 30 of each year. It is not uncommon for U.S. Government agencies to award extra tasks or complete other contract actions in the weeks before the end of its fiscal year in order to avoid the loss of unexpended fiscal year funds. As a result of this cyclicity in the U.S. Government budget process, we have from time to time experienced higher revenues in our third fiscal quarter, ending October 31, and lower revenues in our fourth fiscal quarter, ending January 31.

Table of Contents

Regulation

We are heavily regulated in most fields in which we operate. We deal with numerous U.S. Government agencies and entities, including all of the branches of the U.S. military, the DoD, NASA, intelligence agencies, the Nuclear Regulatory Commission and the DHS. When working with these and other U.S. Government agencies and entities, we must comply with and are affected by laws and regulations relating to the formation, administration and performance of contracts. These laws and regulations, among other things:

- require certification and disclosure of all cost or pricing data in connection with various contract negotiations
- impose acquisition regulations that define allowable and unallowable costs and otherwise govern our right to reimbursement under various cost-based U.S. Government contracts
- restrict the use and dissemination of information classified for national security purposes and the exportation of certain products and technical data.

In order to help ensure compliance with these laws and regulations, all of our employees are required to attend ethics training at least bi-annually and other compliance training relevant to their position.

Internationally, we are subject to special U.S. Government laws and regulations (such as the Foreign Corrupt Practices Act), local government regulations and procurement policies and practices (including regulations relating to import-export control, investments, exchange controls and repatriation of earnings) and varying currency, political and economic risks. Some international customers require contractors to comply with industrial cooperation regulations, sometimes referred to as offset programs. Offset programs may require in-country purchases, manufacturing and financial support projects as a condition to obtaining orders or other arrangements. Offset programs generally extend over several years and may provide for penalties in the event we fail to perform in accordance with offset requirements.

See Risk Factors Risks Relating to Our Business Our U.S. Government contracts may be terminated and we may be liable for penalties under a variety of procurement rules and regulations and changes in government regulations or practices could adversely affect our profitability, cash balances or growth prospects.

Environmental Matters

Our operations, including the environmental consulting and investigative services we provide to third parties, and our ownership or operation of real property are subject to various foreign, federal, state and local environmental protection and health and safety laws and regulations. Failure to comply with those laws could result in civil or criminal sanctions, including fines, penalties or suspension or debarment from contracting with the U.S. Government, or could cause us to have to incur costs to change or upgrade or close some of our operations or properties. Some environmental laws hold current or previous owners or operators of businesses and real property liable for contamination, even if they did not know of and were not responsible for the contamination. Environmental laws may also impose liability on any person who disposes, transports, or arranges for the disposal or transportation of hazardous substances to any site. In addition, we may face liability for personal injury, property damage and natural resource damages relating to contamination for which we are otherwise liable or relating to exposure to or the mishandling of chemicals or other hazardous substances in connection with our current and former operations or services.

Although we do not currently anticipate that the costs of complying with, or the liabilities associated with, environmental laws will materially adversely affect us, we cannot ensure that we will not incur material costs or liabilities in the future. See [Risk Factors](#) [Risks Relating to Our Business](#). Our services and operations sometimes involve using, handling or disposing of hazardous materials, which could expose us to potentially significant liabilities.

Table of Contents

Employees and Consultants

As of July 31, 2006, we employed approximately 43,100 full and part-time employees. We also use consultants to provide specialized technical and other services on specific projects. To date, we have not experienced any strikes or work stoppages and we consider our relations with our employees to be good.

The highly technical and complex services and products provided by us are dependent upon the availability of professional, administrative and technical personnel having high levels of training and skills and, in many cases, security clearances. Because of our growth and the increased competition for qualified personnel, it has become more difficult to meet all of our needs for these employees in a timely manner and this may affect our growth in the current fiscal year and in future years. We intend to continue to devote significant resources to recruit and retain qualified employees.

Properties

As of January 31, 2006, we conducted our operations in approximately 400 offices located in 44 states, the District of Columbia and various foreign countries. We occupy a total of approximately 10 million square feet of space. Of this total, we own approximately 3.1 million square feet, and the balance is leased. Our major locations are in the San Diego, California and Washington, D.C. metropolitan areas, where we occupy approximately 1.3 million square feet and 2.7 million square feet of space, respectively.

We own and occupy the following properties:

<u>Location</u>	<u>Number of buildings</u>	<u>Square footage</u>	<u>Acreage</u>
McLean, Virginia	4	900,000	18.3
San Diego, California	7	677,000	22.2
Vienna, Virginia	2	280,000	14.7
Virginia Beach, Virginia	2	159,200	22.5
Huntsville, Alabama	1	100,000	18.0
Columbia, Maryland	1	95,500	7.3
Orlando, Florida	1	85,000	18.0
Oak Ridge, Tennessee	1	83,000	12.5
Dayton, Ohio	2	79,400	4.5
Reston, Virginia	1	62,000	2.6
Richland, Washington	1	23,700	3.1

The nature of our business is such that there is no practicable way to relate occupied space to industry segments. We consider our facilities suitable and adequate for our present needs. See Note 16 of the notes to consolidated financial statements for fiscal 2006 for information regarding commitments under leases.

Legal Proceedings

Firm Fixed-Price Contract with the Greek Government

On April 21, 2006, we instituted arbitration proceedings before the International Chamber of Commerce (ICC) against the Hellenic Republic of Greece (the Customer) relating to an FFP contract with the Greek government. Although we have been pursuing contract modifications with the Customer since July 2004, we filed the arbitration complaint seeking an order that (1) the Customer's extended use of the C4I system provided under the contract (System) under the circumstances constitutes constructive acceptance and precludes the Customer from rejecting the System, (2) seeks damages for breach of contract, bad faith, use of the System and other damages, (3) determines the legal status of the contract as a result of certain illegality issues, and (4) if the contract is determined to be illegal, seeks compensation for the commercial value of the System delivered, its use by the Customer and other damages. We are seeking total damages in excess of \$76 million, with the precise amount to be proven in

Table of Contents

arbitration. The Customer filed its response to our arbitration complaint on July 29, 2006 generally denying our claims. Although the Customer reserved its right to assert a claim in the arbitration proceedings in the future, its response did not include a counterclaim. Under the terms of the contract, disputes are subject to ultimate resolution by binding arbitration before a panel of three Greek arbitrators in Greece. Due to the complex nature of the legal and factual issues involved and the uncertainty of litigation in general, the outcome of the arbitration is uncertain. There is no assurance that we will prevail in the arbitration.

If the Customer subsequently asserts claims and we do not prevail in the arbitration, we could incur additional losses. If the Customer asserts claims against us in the arbitration and it is determined that we have breached the contract and, as a result, owe the Customer damages, such damages could include, but are not limited to, (1) re-procurement costs, (2) repayment of amounts paid of \$147 million under the contract, (3) penalties for delayed delivery in an amount up to \$15 million, and (4) forfeiture of good performance bonds in the amount of \$33 million. Due to the early stage of the arbitration, the amount of any claims that the Customer may assert against us is not known.

Successful imposition of damages or claims by the Customer or subcontractors against us, the calling of our bonds, additional contract costs required to fulfill our obligations, or additional revenue reductions arising from the negotiation of the contract modification could have a material adverse affect on our consolidated financial position, results of operations and cash flows. For a description of the contract, the disputes and the impact of the contract on our results of operations and financial condition, see Management's Discussion and Analysis of Financial Condition and Results of Operations Commitments and Contingencies Firm Fixed-Price Contract with the Greek Government.

Telkom South Africa

Our former Telcordia Technologies, Inc. subsidiary instituted arbitration proceedings before the ICC against Telkom South Africa in March 2001 as a result of a contract dispute. Telcordia is seeking to recover damages of approximately \$130 million, plus interest at a rate of 15.5%. Telkom South Africa counterclaimed, seeking substantial damages from Telcordia, including repayment of approximately \$97 million previously paid to Telcordia under the contract and the excess costs of reprocurring a replacement system, estimated by Telkom South Africa to be \$234 million. On September 27, 2002, Telcordia prevailed in the initial phase of the arbitration. The arbitrator found that Telkom repudiated the contract and dismissed Telkom's counterclaims against Telcordia. The damages to be recovered by Telcordia were to be determined in a second phase of the arbitration. Telkom challenged the arbitration decision in the South African High Court (Transvaal Provincial Division), and, on November 27, 2003, the High Court judge ordered that the arbitration decision be set aside, that the arbitrator and the ICC be dismissed and that the case be re-arbitrated before a panel of three retired South African judges. Although the High Court judge denied Telcordia's motion for leave to appeal his ruling, on November 29, 2004, the South African Supreme Court of Appeal granted Telcordia's motion for leave to appeal the judge's ruling and will hear the appeal. Telcordia filed its appellate brief in September 2005. Telkom has also filed its full brief with the court. The hearing is scheduled for October 30, 2006. In parallel proceedings in the United States District Court (Northern District of New Jersey), Telcordia is seeking to have its ICC arbitration award confirmed. On January 24, 2005, the District Court declined to confirm Telcordia's award and in a February 17, 2005 opinion concluded (i) that the District Court did not have personal jurisdiction over Telkom South Africa and (ii) that issue preclusion resulting from a prior D.C. Circuit Court of Appeals' ruling prevented the court from considering Telcordia's petition to confirm the arbitration award. Telcordia appealed this ruling to the U.S. Court of Appeals for the Third Circuit, which on August 14, 2006 reversed the District Court on both issues and indicated that Telcordia could refile the petition after the South African Supreme Court had issued its decision.

On March 15, 2005, we sold Telcordia to an affiliate of Warburg Pincus LLC and Providence Equity Partners Inc. Pursuant to the definitive stock purchase agreement, we are entitled to receive all of the net proceeds from any judgment or settlement with Telkom South Africa, and, if this dispute is settled or decided adversely against Telcordia, we are obligated to indemnify the buyer of Telcordia against any loss that may result from such an outcome.

Table of Contents

Due to the complex nature of the legal and factual issues involved and the uncertainty of litigation in general, the outcome of the arbitration and the related court actions are not presently determinable; however, an adverse resolution could materially harm our business, consolidated financial position, results of operations and cash flows.

INTESA Joint Venture

Informática, Negocios y Tecnología, S.A., (INTESA) a Venezuelan joint venture we formed in fiscal 1997 with Venezuela's national oil company, PDVSA, to provide information technology services in Latin America, is involved in various legal proceedings. We had previously consolidated our 60% interest in the joint venture, but the operations of INTESA were classified as discontinued operations as of January 31, 2003 and INTESA is currently insolvent. PDVSA has refused to have the joint venture declared bankrupt as required under Venezuelan law.

Outsourcing Services Agreement and Guarantee. INTESA had derived substantially all its revenues from an outsourcing services agreement with PDVSA that it entered into at the time the joint venture was formed. The services agreement expired on June 30, 2002 and the parties were not able to reach agreement on a renewal. We guaranteed INTESA's obligations under the services agreement to PDVSA. Under the terms of the services agreement, INTESA's liability for damages to PDVSA in any calendar year is capped at \$50 million. As a result, our maximum potential liability to PDVSA under the guarantee in any calendar year, based on our guarantee of their ownership interest in INTESA, is \$20 million. To date, PDVSA has not asserted any claims.

Expropriation of Our Interest in INTESA. In fiscal 2003 and 2004, PDVSA and the Venezuelan government took certain actions, including denying INTESA access to certain of its facilities and assets, that prevented INTESA from continuing operations. In fiscal 2005, the Overseas Private Investment Company (OPIC), a U.S. governmental entity that provides insurance coverage against expropriation of U.S. business interests by foreign governments, determined that the Venezuelan government had expropriated our interest in INTESA without compensation and paid us approximately \$6 million in settlement of our claim.

Employment Claims of Former INTESA Employees. INTESA is a defendant in a number of lawsuits brought by former employees seeking unpaid severance and pension benefits. PDVSA and SAIC Bermuda, our wholly-owned subsidiary and the entity that held our interest in INTESA, were added as defendants in a number of these suits. Based on the procedural standing of these cases and our understanding of applicable laws and facts, we believe that our exposure to any possible loss related to these employment claims is either remote or, if reasonably possible, immaterial.

Other Legal Proceedings Involving INTESA. The Attorney General of Venezuela initiated a criminal investigation of INTESA in fiscal 2003 alleging unspecified sabotage by INTESA employees. We believe this investigation is inactive. In connection with our expropriation claim, OPIC determined that INTESA did not sabotage PDVSA's infrastructure as alleged by PDVSA and the Venezuelan government. In addition, the SENIAT, the Venezuelan tax authority, filed a claim against INTESA in fiscal 2004 for approximately \$30 million for alleged non-payment of VAT taxes in fiscal 1998.

Potential Financial Impact. Many issues relating to INTESA, including the termination of the services agreement and the employment litigation brought by former INTESA employees, remain unresolved. Due to the complex nature of the legal and factual issues involved in these matters and the uncertain economic and political environment in Venezuela, the outcome is not presently determinable; however, adverse resolutions could materially harm our business, consolidated financial position, results of operations and cash flows.

Other

We are also involved in various investigations, claims and lawsuits arising in the normal conduct of our business, none of which, in the opinion of our management, based upon current information, is expected to have a material adverse effect on our consolidated financial position, results of operations, cash flows or our ability to conduct business.

Table of Contents

In the normal conduct of our business, we seek to monetize our patent portfolio through licensing. We also have and will continue to defend our patent position when we believe our patents have been infringed and are involved in such litigation from time to time. On March 15, 2005, we sold our Telcordia subsidiary. Pursuant to the terms of the definitive stock purchase agreement, we will receive 50% of the net proceeds Telcordia receives in the future in connection with the prosecution of certain patent rights.

About New SAIC

We formed SAIC, Inc., or New SAIC, as a Delaware corporation on August 12, 2005. To date, it has not conducted any activities other than those incident to its formation and the preparation of this prospectus, periodic reports, and the Registration Statement on Form S-4 with respect to the reorganization merger. Upon completion of the reorganization merger, Old SAIC will be a wholly-owned subsidiary of New SAIC.

Table of Contents**MANAGEMENT****Directors and Executive Officers**

The following is a list of the names and ages as of the date of this prospectus of all of Old SAIC's directors and key officers, indicating all positions and offices held by each such person and each such person's principal occupation or employment during at least the past five years. Except as otherwise noted, each of the persons listed below has served in his or her present capacity for Old SAIC for at least the past five years. All such persons have been elected to serve until their successors are elected or until their earlier resignation or retirement.

We expect that each of the individuals listed below will serve in the same capacities with New SAIC immediately following the reorganization merger and this offering.

Name of director or officer	Age	Position(s) with the company and prior business experience
Deborah H. Alderson	49	Group President since October 2005. Ms. Alderson previously served as Deputy Group President from August 2005 to October 2005. Prior to joining us, Ms. Alderson held various positions with Anteon International Corporation, a systems integration services provider, including President of the Systems Engineering Group from January 2002 to August 2005, and Senior Vice President and General Manager of the Systems Engineering Group from November 1998 to January 2002. Ms. Alderson held various positions with Techmatics, Inc., a systems engineering provider, from 1985 to 1998.
Kenneth C. Dahlberg	61	Chairman of the Board since July 2004 and Chief Executive Officer and Director since November 2003. Mr. Dahlberg previously served as President from November 2003 to March 2006. Prior to joining us, Mr. Dahlberg served as Corporate Executive Vice President of General Dynamics Corp. from March 2001 to October 2003. Mr. Dahlberg served as President of Raytheon International from February 2000 to March 2001, and from 1997 to 2000 he served as President and Chief Operating Officer of Raytheon Systems Company. Mr. Dahlberg held various positions with Hughes Aircraft from 1967 to 1997. Mr. Dahlberg has served as a director of Teledyne Technologies since February 2006.
Thomas E. Darcy	56	Executive Vice President Strategic Projects since November 2005. Mr. Darcy previously served as Corporate Executive Vice President since December 2003 and Chief Financial Officer since October 2000. From October 2000 to December 2003, Mr. Darcy was an Executive Vice President. Prior to joining us, Mr. Darcy was with the accounting firm currently known as PricewaterhouseCoopers LLP from July 1973 to September 2000, where he served as partner from 1985 to 2000.
Wolfgang H. Demisch	62	Director since 1990. Mr. Demisch has been a principal of Demisch Associates LLC, a consulting firm, since 2003. He was a Managing Director of Dresdner Kleinwort Wasserstein, formerly Wasserstein Perella Securities, Inc., from 1998 to 2002. From 1993 to 1998, he was Managing Director of BT Alex. Brown, and from 1988 to 1993, he was Managing Director of UBS Securities, Inc.

Table of Contents

Name of director or officer	Age	Position(s) with the company and prior business experience
Jere A. Drummond	67	Director since 2003. Mr. Drummond was employed by BellSouth Corporation from 1962 until his retirement in December 2001. He served as Vice Chairman of BellSouth Corporation from January 2000 until his retirement. He was President and Chief Executive Officer of BellSouth Communications Group, a provider of traditional telephone operations and products, from January 1998 until December 1999. He was President and Chief Executive Officer of BellSouth Telecommunications, Inc. from January 1995 until December 1997. Mr. Drummond is also a member of the board of directors of Borg-Warner Automotive, AirTran Holdings, Inc. and Centillium Communications, Inc.
Steven P. Fisher	46	Treasurer since January 2001 and Senior Vice President since July 2001. Mr. Fisher has held various positions with us since 1988, including serving as Assistant Treasurer and Corporate Vice President for Finance from 1997 to 2001 and Vice President from 1995 to 1997.
Donald H. Foley	62	Chief Engineering and Technology Officer since January 2005, Executive Vice President since July 2000, and a Director since July 2002. Dr. Foley has held various positions with us since 1992, including serving as Group President from February 2004 to January 2005 and a Sector Vice President from 1992 to July 2000.
John J. Hamre	56	Director since 2005. Dr. Hamre has served as the President and Chief Executive Officer of the Center for Strategic & International Studies, a public policy research institution, since 2000. Dr. Hamre served as U.S. Deputy Secretary of Defense from 1997 to 2000 and Under Secretary of Defense (Comptroller) from 1993 to 1997. Dr. Hamre is also a member of the board of directors of ChoicePoint, Inc., ITT Industries, Inc., and MITRE Corporation.
John R. Hartley	40	Senior Vice President and Corporate Controller since August 2005. Mr. Hartley has held various positions with our finance organization since 2001. For 12 years prior to that, he was with the accounting firm currently known as Deloitte & Touche LLP.
Anita K. Jones	64	Director since 1998. Dr. Jones is the Quarles Professor of Engineering at the University of Virginia where she has taught since 1989. From 1993 to 1997, Dr. Jones was on leave of absence from the University to serve as Director of Defense Research and Engineering in the U.S. Department of Defense. Dr. Jones also served as a Director of the Company from 1987 to 1993.
Harry M. J. Kraemer, Jr.	51	Director since 1997. Mr. Kraemer has been an executive partner of Madison Dearborn Partners, LLC, a private equity investment firm, since April 2005, and has served as a professor at the Kellogg School of Management at Northwestern University since January 2005. Mr. Kraemer previously served as the Chairman of Baxter International, Inc., or Baxter, a health-care products, systems and services company, from January 2000 until April 2004, as Chief Executive Officer of Baxter from January 1999 until April 2004 and as President of Baxter from April 1997 until April 2004. Mr. Kraemer also served as the Senior Vice President and Chief Financial Officer of Baxter from November 1993 to April 1997.

Table of Contents

Name of director or officer	Age	Position(s) with the company and prior business experience
Larry J. Peck	59	Group President since February 2004. Mr. Peck has held various positions with us since 1978, including serving as a Sector Vice President from 1994 to February 2004.
Lawrence B. Prior, III	50	Group President since February 2005. Prior to joining us, Mr. Prior served as Chief Financial Officer and then President and Chief Executive Officer of LightPointe Communications, Inc. from 2000 until 2004.
Arnold L. Punaro	60	Executive Vice President, Government Affairs, Communications and Support Operations since February 2005. Mr. Punaro has held various positions with us since 1997 including Sector Vice President and Senior Vice President, Director of Corporate Development. Mr. Punaro also served as the Staff Director of the Senate Armed Services Committee and retired as a Major General in the United States Marine Corps Reserve.
William A. Roper, Jr.	60	Executive Vice President since December 2005. Mr. Roper served as Corporate Executive Vice President from 2000 to December 2005, Senior Vice President from 1990 to 1999, Chief Financial Officer from 1990 to October 2000 and Executive Vice President from 1999 to 2000. Mr. Roper has served as a director of VeriSign, Inc. since November 2003.
Edward J. Sanderson, Jr.	57	Director since 2002. Mr. Sanderson retired from Oracle Corporation in 2001 after having served as an Executive Vice President since 1995. At Oracle, Mr. Sanderson was responsible for Oracle Product Industries, Oracle Consulting, and the Latin American Division. Prior to that he was President of Unisys World-wide Services and partner at both McKinsey & Company and Accenture (formerly Andersen Consulting).
Douglas E. Scott	49	Secretary since July 2003, Senior Vice President since January 1997 and General Counsel since 1992. Mr. Scott has held various positions with us since 1987, including serving as a Corporate Vice President from 1992 to January 1997.
Louis A. Simpson	69	Director since July 2006. Mr. Simpson has served as President and Chief Executive Officer, Capital Operations, of GEICO Corporation, an auto insurer, since May 1993. Mr. Simpson previously served as Vice Chairman of the Board of GEICO from 1985 to 1993. Mr. Simpson is also a member of the board of directors of VeriSign, Inc., Western Asset Funds, Inc. and Western Asset Income Fund and serves as a trustee of Western Asset Premier Bond Fund. Mr. Simpson previously served as a director from 1999 to 2002.
George T. Singley, III	61	Group President since February 2004. Mr. Singley has held various positions with us since 1998, including serving as a Sector Vice President from 2001 to February 2004 and Group Senior Vice President from 2000 to 2001.

Table of Contents

Name of director or officer	Age	Position(s) with the company and prior business experience
Theoren P. Smith, III	52	Group President since February 2005. Dr. Smith served as Sector Vice President from July 2002 until February 2004 and Executive Vice President, Federal Business from February 2004 until February 2005. From 2000 to March 2002, Dr. Smith served as Global Chief Technology Officer at Cable & Wireless, PLC and as President of Cable & Wireless USA, Inc., which filed for bankruptcy protection in December 2003. Dr. Smith also served as Senior Vice President and Chief Technology Officer at Road Runner, LLC from 1999 to 2000.
Mark W. Sopp	41	Executive Vice President and Chief Financial Officer since November 2005. Mr. Sopp served as Senior Vice President, Chief Financial Officer and Treasurer of The Titan Corporation from April 2001 to July 2005, when Titan was acquired by L-3 Communications. From 1998 to 2001, Mr. Sopp served as a Vice President and Chief Financial Officer of Titan Systems Corporation, a subsidiary of The Titan Corporation. Titan provided information and communications products and services primarily to the U.S. Government.
Joseph P. Walkush	54	Executive Vice President since July 2000 and a Director since April 1996. Mr. Walkush has held various positions with us from 1976 to 1979 and since 1981, including serving as a Sector Vice President from 1994 to 2000.
John H. Warner, Jr.	65	Executive Vice President since December 2005, Chief Administrative Officer from December 2003 to July 2006, Corporate Executive Vice President from 1996 to 2005 and a Director from 1988 to 2006. Dr. Warner has held various positions with us since 1973, including serving as Executive Vice President from 1989 to 1996.
A. Thomas Young	68	Director since 1995. Mr. Young retired from Lockheed Martin Corp. in 1995 after having served as an Executive Vice President from March 1995 to July 1995. Prior to its merger with Lockheed Corporation, Mr. Young served as the President and Chief Operating Officer of Martin Marietta Corp. from 1990 to 1995. Mr. Young is also on the board of directors of the Goodrich Corporation.

Board of Directors Composition and Committees

Our restated certificate of incorporation provides for a classified board of directors consisting of three classes, which shall be as equal in number as possible. The total number of authorized directors is to be between 10 and 18, with the exact size of the board to be fixed by resolution of the board. Immediately following the reorganization merger and this offering, we expect to have 11 directors.

The board of directors of New SAIC will have the following standing committees: an audit committee, a compensation committee, an ethics and corporate responsibility committee, a finance committee and a nominating and corporate governance committee. Except as noted below, we expect that the membership for the New SAIC board committees immediately following the completion of the IPO will be the same as the current membership for Old SAIC's corresponding board committees.

Audit Committee. The purpose of the audit committee is to assist the board of directors in providing oversight of: (1) the integrity of our financial statements, including the financial reporting process, system of internal control and audit process, (2) our compliance with legal and regulatory requirements, (3) the registered public accountant's qualifications and independence, (4) the performance of our internal audit function and registered public accountants and (5) financial reporting risk assessment and mitigation. The current members of

Table of Contents

the Old SAIC audit committee are H.M.J. Kraemer, Jr. (Chair), W.H. Demisch, J.A. Drummond, A.K. Jones and A.T. Young. Our board of directors has determined that each member is an independent director under our corporate governance guidelines. Our board of directors has also determined that H.M.J. Kraemer, Jr., W.H. Demisch and J.A. Drummond qualify as audit committee financial experts as defined by the rules under the Securities Exchange Act of 1934. The background and experience of each of our audit committee financial experts are set forth above.

Compensation Committee. The compensation committee's responsibilities include: (1) determining the compensation of the chief executive officer and reviewing and approving the compensation of the other executive officers named pursuant to Section 16 of the Securities Exchange Act of 1934, (2) exercising all rights, authority and functions under all of our stock, retirement and other compensation plans, (3) approving and making recommendations to the Board regarding non-employee director compensation, (4) preparing an annual report on executive compensation for inclusion in our proxy statement or annual report on Form 10-K, in accordance with the rules and regulations of the Securities and Exchange Commission and (5) providing guidance and monitoring the formation and implementation of human resource management. The current members of the Old SAIC compensation committee are E.J. Sanderson, Jr. (Chair), W.H. Demisch, A.K. Jones and H.M.J. Kraemer, Jr. Our board of directors has determined that each member is an independent director under our corporate governance guidelines.

Ethics and Corporate Responsibility Committee. The ethics and corporate responsibility committee's duties include: (1) reviewing and making recommendations regarding the ethical responsibilities of our employees and consultants under our administrative policies and procedures, (2) reviewing and assessing our policies and procedures addressing the resolution of conflicts of interest involving us, our employees, officers and directors and addressing any potential conflict of interest involving us and a director or an executive officer, (3) reviewing and establishing procedures for the receipt, retention and treatment of complaints regarding violation of our policies, procedures and standards related to ethical conduct and legal compliance and (4) reviewing and evaluating the effectiveness of our ethics, compliance and training programs and related administrative policies. The current members of the Old SAIC ethics and corporate responsibility committee are A.K. Jones (Chair), K.C. Dahlberg, J.A. Drummond, D.H. Foley and J.J. Hamre.

Finance Committee. The finance committee's responsibilities include periodically reviewing and making recommendations to the board of directors and management concerning: (1) our capital structure, including the issuance of equity and debt securities, the incurrence of indebtedness, dividends and related matters, (2) general financial planning, including cash flow and working capital management, capital budgeting and expenditures, tax planning and compliance and related matters, (3) mergers, acquisitions and strategic transactions, (4) proposed offers for the purchase or acquisition of our stock or assets, (5) investor relations programs and policies, (6) investment policies, financial performance and funding of our employee benefit and pension plans and (7) any other transactions or financial issues that the board of directors or management would like the committee to review. The current members of the finance committee of Old SAIC are L.A. Simpson (Chair), W.H. Demisch, E.J. Sanderson, Jr., J.P. Walkush and A.T. Young.

Nominating and Corporate Governance Committee. The nominating and corporate governance committee's responsibilities include: (1) evaluating, identifying and recommending nominees to the board of directors, including nominees proposed by stockholders, (2) reviewing and making recommendations regarding the composition and procedures of the board of directors, (3) making recommendations regarding the size, composition and charters of the committees of the board of directors, (4) reviewing and developing long-range plans for chief executive officer and management succession, (5) developing and recommending to the board of directors a set of corporate governance principles, (6) recommending to the board an independent director to serve as the lead director, and (7) developing and overseeing an annual self-evaluation process of the board of directors and its committees. A.T. Young is currently the lead director. The current members of the Old SAIC nominating and corporate governance committee are J.A. Drummond (Chair), K.C. Dahlberg, J.J. Hamre, L.A. Simpson and A.T. Young. Our board of directors has determined that the following members of the Old SAIC nominating and corporate governance committee are independent under our corporate governance

Table of Contents

guidelines: J.A. Drummond, J.J. Hamre, L.A. Simpson and A.T. Young. Immediately prior to the completion of this offering, the membership of the nominating and corporate governance committee will be modified so that it will be comprised solely of independent directors.

Compensation Committee Interlocks and Insider Participation

None of the members of our compensation committee has, at any time, been one of our officers or employees. None of our executive officers currently serves, or in the past fiscal year has served, as a member of the board of directors or compensation committee of any entity that has one or more executive officers serving on our board of directors or compensation committee.

Director Compensation

We intend to establish director compensation policies for New SAIC subsequent to the completion of this offering that will be substantially similar to the existing policies of Old SAIC. However, where we have described director compensation previously consisting of shares of Old SAIC class A common stock, we instead expect to issue twice as many shares of New SAIC class A preferred stock, after giving effect to the conversion of each share of Old SAIC class A common stock into two shares of New SAIC class A preferred stock in the reorganization merger.

All non-employee directors are paid an annual retainer of \$25,000 and the chairperson of a committee is paid an additional annual retainer of \$10,000, except for the chairperson of the audit committee who is paid an additional annual retainer of \$15,000. The lead director is also paid an additional annual retainer of \$10,000. Non-employee directors also receive \$1,500 for each meeting of the board of directors and \$2,000 for each meeting of a committee on which they serve and are reimbursed for expenses incurred while attending meetings or otherwise performing services as a director. The directors are eligible to defer their fees into our Keystaff Deferral and Key Executive Stock Deferral Plans. In addition, a stock bonus of 1,000 shares of Old SAIC class A common stock is offered to independent director nominees as an inducement to join the board of directors.

Directors are eligible to receive stock options under the 1999 Stock Incentive Plan. For services rendered as a director during fiscal 2006, W.H. Demisch, J.A. Drummond, J.J. Hamre, A.K. Jones, H.M.J. Kraemer, Jr., E.J. Sanderson, Jr. and A.T. Young each received options to purchase 11,000 shares of Old SAIC class A common stock at \$43.92 per share, which was the stock price on the date of grant. All such options vest as to 20%, 20%, 20% and 40% on the first, second, third and fourth year anniversaries of the date of grant, respectively.

See [Certain Relationships and Related Party Transactions](#) for information with respect to transactions between us and certain persons related to or entities in which certain directors may be deemed to have an interest.

Indemnification of Directors and Officers

In conjunction with this offering, we have entered into separate indemnification agreements with our directors and executive officers, in addition to the indemnification provided for in our certificate of incorporation. These agreements, among other things, provide that we will indemnify, subject to applicable law and the terms thereof, our directors and executive officers for certain expenses (including attorneys' fees), judgments,

Edgar Filing: SAIC, Inc. - Form S-1/A

finances and settlement amounts incurred by a director or executive officer in any action or proceeding arising out of such person's service as a director or executive officer of us or any of our subsidiaries or any other company or enterprise to which the person provides services at our request. We believe that these provisions and agreements are necessary to attract and retain qualified persons as directors and executive officers.

Table of Contents**EXECUTIVE COMPENSATION**

We have not paid our executive officers any compensation for their service to New SAIC since its formation in August 2005. The following table sets forth information regarding the annual and long-term compensation for services to Old SAIC for the fiscal years ended January 31, 2006, 2005 and 2004, of those persons who were, at January 31, 2006 (1) the Chief Executive Officer and (2) the other four most highly compensated executive officers of Old SAIC, all of whom are collectively referred to as our Named Executive Officers. The following summary compensation table sets forth the annual and long-term compensation earned by the Named Executive Officers for the relevant fiscal year, whether or not paid in such fiscal year:

Summary Compensation Table

Name and principal position(s)	Year	Annual compensation			Long-term compensation		
		Salary (1)	Bonus (2)	Other annual compensation (3)	Restricted stock awards (4)	Number of securities underlying options	All other compensation (5)
K.C. Dahlberg Chairman and Chief Executive Officer	2006	\$ 1,000,000	\$ 1,100,000	\$ 10,250	\$ 400,023	200,000	\$ 15,482
	2005	1,000,000	1,500,000	77,897(6)	299,989	260,000	
	2004	250,000(7)	1,010,000(8)	229,459(9)	2,687,686	225,000	
D.H. Foley Chief Engineering and Technology Officer	2006	473,846	500,000	650	100,006	40,000	15,336
	2005	457,692	484,994	300	110,012	65,000	9,052
	2004	446,923	415,018		109,998	70,000	13,445
J.H. Warner, Jr.(10) Executive Vice President	2006	475,962	450,000	5,575	100,006	25,000	14,598
	2005	475,962	550,018	5,375	99,996	55,000	9,052
	2004	475,962	510,015	4,725	99,992	50,000	13,445
W.A. Roper, Jr. Executive Vice President	2006	475,962	400,000	350	100,006	40,000	14,691
	2005	475,962	799,996	6,275	130,003	55,000	9,052
	2004	475,962	500,009	5,825	149,988	60,000	13,442

	2005	315,000	400,003	2,594	65,002	45,000	9,052
	2004	273,269	234,998	2,418	49,996	30,000	13,462

(1) Includes amounts paid in lieu of unused comprehensive leave.

(2) Amounts include the award of the following number of shares of Old SAIC class A common stock with a market value as of the date of grant (calculated by multiplying the fair market value of Old SAIC class A common stock on the date of grant by the number of shares awarded) for fiscal 2006, 2005 and 2004, respectively, as follows: (a) K.C. Dahlberg: 5,000 net shares (on an after taxes basis) with a market value of \$219,600 based on an original bonus amount of \$357,354, 10,000 shares with a market value of \$405,500 and 0 shares; (b) D.H. Foley: 1,701 net shares (on an after taxes basis) with a market value of \$74,750 based on an original bonus amount of \$100,000, 3,699 shares with a market value of \$149,994 and 3,834 shares with a market value of \$140,018; (c) J.H. Warner, Jr.: 1,113 net shares (on an after taxes basis) with a market value of \$48,896.50 based on an original bonus amount of \$50,000, 1,850 shares with a market value of \$75,018 and 2,191 shares with a market value of \$80,015; (d) W.A. Roper, Jr.: 1,170 net shares (on an after taxes basis) with a market value

Edgar Filing: SAIC, Inc. - Form S-1/A

of \$51,400 based on an original bonus amount of \$80,000, 2,466 shares with a market value of \$99,996 and 1,917 shares with a market value of \$70,009; and (e) G.T. Singley, III: 1,543 net shares (on an after taxes basis) with a market value of \$67,800 based on an original bonus amount of \$100,000, 3,206 shares with a market value of \$130,003 and 3,012 shares with a market value of \$109,998.

- (3) Represents amounts paid or reimbursed by us on behalf of the Named Executive Officers for athletic, airline and country club memberships, financial planning and tax preparation services and relocation expenses.

- (4) Amounts reported represent the market value on the date of grant (calculated by multiplying the fair market value of the Old SAIC class A common stock on the date of grant by the number of shares awarded), without giving effect to the diminution in value attributable to the restrictions on such stock. Restricted stock vests as to 20%, 20%, 20% and 40% on the first, second, third and fourth year

Table of Contents

anniversaries of the date of grant, respectively. See Summary of Stock-Based Compensation Plans Continued Vesting on Vesting Stock and Options for Retirees for rights to continued vesting after retirement for certain holders. The amount reported represents the following number of restricted shares of Old SAIC class A common stock awarded for fiscal 2006, 2005 and 2004, respectively: (a) K.C. Dahlberg: 9,108 shares, 7,398 shares and 84,545 shares; (b) D.H. Foley: 2,277 shares, 2,713 shares and 3,012 shares; (c) J.H. Warner, Jr.: 2,277 shares, 2,466 shares and 2,738 shares; (d) W.A. Roper, Jr.: 2,277 shares, 3,206 shares and 4,107 shares; and (e) G.T. Singley, III: 2,277 shares, 1,603 shares and 1,369 shares. As of January 31, 2006, the aggregate restricted stock holdings (other than restricted stock which has been deferred into the Key Executive Stock Deferral Plan) for the Named Executive Officers were as follows: (a) K.C. Dahlberg: 0 shares; (b) D.H. Foley: 3,313 shares with a market value as of such date of \$145,507; (c) J.H. Warner, Jr.: 1,366 shares, with a market value as of such date of \$59,995; (d) W.A. Roper, Jr.: 0 shares; and (e) G.T. Singley, III: 2,449 shares with a market value of \$107,560. Dividends are payable on such restricted stock if and when declared. Although the Company has never declared or paid a dividend on its capital stock, we intend to declare a special dividend immediately prior to the completion of this offering.

- (5) Represents amounts contributed or accrued by us for the Named Executive Officers under our 401(k) Profit Sharing Plan, Employee Stock Retirement Plan and SAIC Retirement Plan.
- (6) Includes \$67,897 for country club dues.
- (7) Mr. Dahlberg joined us as Chief Executive Officer in November 2003. Accordingly, compensation for 2004 is for a partial year.
- (8) Includes \$660,000 paid as a cash sign-on bonus.
- (9) Represents the reimbursement of expenses incurred in connection with the relocation of K.C. Dahlberg and his family to our principal place of business.
- (10) Dr. Warner resigned as an executive officer for purposes of Rule 16a-1(f) of the Securities Exchange Act of 1934, effective July 14, 2006, as a result of reaching the mandatory retirement age for executive officers.

Option Grants in Last Fiscal Year

The following table sets forth information regarding grants of options to purchase shares of Old SAIC class A common stock pursuant to our 1999 Stock Incentive Plan made during fiscal 2006 to the Named Executive Officers:

Name	Number of securities underlying options granted(1)	% of total options granted to employees in fiscal 2006	Exercise price (per share)(2)	Expiration date	Potential realizable value at assumed annual rates of stock price appreciation for option term(3)	
					5%	10%
K.C. Dahlberg	200,000(4)	3.0%	\$40.55	3/31/10	\$ 2,240,643	\$ 4,951,236
D.H. Foley	65,000(4)	1.0	40.55	3/31/10	728,209	1,609,152
J.H. Warner, Jr.	55,000(4)	*	40.55	3/31/10	616,177	1,361,590
W.A. Roper, Jr.	55,000(4)	*	40.55	3/31/10	616,177	1,361,590
G.T. Singley, III	45,000(4)	*	40.55	3/31/10	504,145	1,114,028

* Less than 1% of the total options granted to employees in fiscal 2006.

- (1) All such options vest as to 20%, 20%, 20% and 40% on the first, second, third and fourth year anniversaries of the date of grant, respectively. See Summary of Stock-Based Compensation Plans Continued Vesting on Vesting Stock and Options for Retirees for rights to continued vesting after retirement for certain holders.
- (2) The exercise price is equal to the fair market value of the Old SAIC class A common stock on the date of grant.
- (3) The potential realizable value is based on an assumption that the fair market value of the Old SAIC class A common stock will appreciate at the annual rate shown (compounded annually) from the date of grant until the end of the five-year option term. These values are calculated based on the regulations promulgated by the Securities and Exchange Commission and should not be viewed in any way as an estimate or forecast of the future performance of our common stock.
- (4) Although the listed grants of options were made during fiscal 2006, such grants relate to service for the fiscal year ended January 31, 2005.

Table of Contents**Option Exercises and Fiscal Year-End Values**

The following table sets forth information regarding the exercise of options during fiscal 2006 and unexercised options to purchase Old SAIC class A common stock granted during fiscal 2006 and prior years under our 1999 Stock Incentive Plan to the Named Executive Officers and held by them at January 31, 2006:

Name	Shares acquired on exercise	Value realized	Number of securities underlying unexercised options at January 31, 2006		Value of unexercised in-the-money options at January 31, 2006(1)	
			Exercisable	Unexercisable	Exercisable	Unexercisable
K.C. Dahlberg			102,000	383,000	\$ 1,175,580	\$ 2,647,070
D.H. Foley	50,000	\$ 650,100	85,000	190,000	995,570	1,560,030
J.H. Warner, Jr.	55,000	719,950	64,000	146,000	744,680	1,158,270
W.A. Roper, Jr.	120,000	1,755,600	216,000	184,000	2,711,580	1,624,870
G.T. Singley, III	17,000	222,530	22,200	84,800	248,214	541,726

(1) Based on the fair market value of the Old SAIC class A common stock as of such date less the exercise price of such options.

Employment and Severance Agreements

Old SAIC and Mr. Dahlberg are parties to two letter agreements, each dated October 3, 2003 (Dahlberg Letter Agreements) pursuant to which Mr. Dahlberg serves as Old SAIC's Chief Executive Officer. Pursuant to the Dahlberg Letter Agreements, Mr. Dahlberg received or will receive: (1) a base salary of \$1,000,000 per year, (2) a cash sign-on bonus of \$660,000, (3) an award of 84,545 shares of vesting Old SAIC class A common stock, (4) an award of a vesting option to purchase up to 225,000 shares of Old SAIC class A common stock, (5) reimbursement of expenses incurred in connection with the relocation of Mr. Dahlberg and his family to our principal place of business, (6) a gross up to Mr. Dahlberg's salary to cover the federal, state and local income and employment tax liability on the relocation benefits, (7) a country club membership, (8) first class seating for business travel, (9) up to \$10,000 for financial planning and/or tax preparation within the first two years of employment and (10) disability insurance. The Dahlberg Letter Agreements provide that in the event Mr. Dahlberg's employment is involuntarily terminated before November 2006, for reasons other than cause, we would continue Mr. Dahlberg's base salary, target short-term bonus and benefits until November 2006. In order to receive these severance benefits, Mr. Dahlberg would be required to sign a release and a non-compete/non-solicitation agreement. At the end of the severance period, Mr. Dahlberg would be provided with at least two years of non-paid consulting status during which his unvested options and stock would continue to vest. For purposes of the Dahlberg Letter Agreements, cause is defined as (1) a willful failure to substantially perform his duties, (2) gross misconduct or (3) conviction of a felony.

Old SAIC has entered into severance agreements with all of its executive officers. The severance agreements provide that if the officer is involuntarily terminated without cause or resigns for good reason within a 24 month period following a change in control, the officer will be paid all accrued salary and a pro rata bonus for the year of termination and a single lump sum equal to three times the officer's then current salary and bonus amount. The officer will also receive such life insurance, disability, medical, dental, hospitalization, financial counseling and tax consulting benefits as are provided to other similarly situated executives who continue in the employ of Old SAIC for the 36 months following termination and up to 12 months of outplacement counseling. Vesting will be accelerated as provided in Old SAIC's various equity incentive and deferral plans. The officer is not entitled to receive a gross up payment to account for any excise tax that might be payable under the Internal Revenue Code, although he or she may elect to receive the full value of the severance payments and pay the excise tax or have the severance payments reduced to the extent necessary to avoid an excise tax. These severance agreements will expire effective December 31, 2006, and we currently intend to enter into new agreements with our executive officers on substantially similar terms as the current agreements.

Other than these agreements, we have not entered into any employment or severance agreements with our executive officers.

Table of Contents**Equity Compensation Plans**

Information with respect to our equity compensation plans as of January 31, 2006 is set forth below:

<u>Plan Category</u>	<u>Number of securities to be issued upon exercise of outstanding options, warrants and rights</u>	<u>Weighted- average price of outstanding options, warrants and rights</u>	<u>Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in first column)</u>
Equity compensation plans approved by security holders (1)	27,554,786(2)	\$34.27	33,276,685(3)(4)
Equity compensation plans not approved by security holders (5)			(5)
Total	27,554,786	\$34.27	33,276,685

- (1) The following equity compensation plans approved by security holders are included in this plan category: the 1999 Stock Incentive Plan, the Restated Bonus Compensation Plan and the 2004 Employee Stock Purchase Plan. No information is provided with respect to the New SAIC equity compensation plans described below. See Summary of Stock-Based Compensation Plans.
- (2) Represents shares of Old SAIC class A common stock reserved for issuance upon the exercise of outstanding options awarded under the 1999 Stock Incentive Plan. Does not include shares to be issued pursuant to purchase rights under the 2004 Employee Stock Purchase Plan.
- (3) Represents 8,169,812 shares of Old SAIC class A common stock under the 2004 Employee Stock Purchase Plan and 25,106,873 shares under the 1999 Stock Incentive Plan. The maximum number of shares that may be awarded under the 1999 Stock Incentive Plan is limited to the sum of (a) 24 million shares, (b) the number of shares available for awards under the 1998 Stock Option Plan as of September 30, 1999 and (c) the number of shares which become available under the 1998 Stock Option Plan after September 30, 1999 as a result of forfeitures, expirations, cancellations or sales of shares acquired through the exercise of options to us to satisfy tax withholding obligations. In addition, the 1999 Stock Incentive Plan provides for an automatic share reserve increase on the first day of each calendar year after 1999 by an amount equal to 5% of outstanding shares of Old SAIC class A common stock on such day. However, shares reserved for future awards under the 1999 Stock Incentive Plan is limited to 15% of total outstanding shares of Old SAIC class A common stock.
- (4) The Restated Bonus Compensation Plan provides for bonus awards that may be paid in cash, restricted stock or vested stock. The Restated Bonus Compensation Plan does not provide for a maximum number of shares available for future issuance however, the bonus pool for each fiscal year cannot exceed 7.5% of our revenues for the fiscal year.
- (5) The Stock Compensation Plan and the Management Stock Compensation Plan are not approved by security holders and are included in this plan category. These plans do not provide for a maximum number of shares available for future issuance.

Summary of Stock-Based Compensation Plans

Edgar Filing: SAIC, Inc. - Form S-1/A

Set forth below is a summary of the stock-based compensation plans maintained by Old SAIC, which will be assumed by New SAIC following the reorganization merger, and the new stock-based compensation plans to be adopted by New SAIC in connection with the reorganization merger. All shares of Old SAIC class A common stock outstanding under these compensation plans will be converted into shares of New SAIC class A preferred stock and all stock options and other rights to receive shares of Old SAIC class A common stock under these compensation plans will be assumed by New SAIC pursuant to the reorganization merger and will thereafter represent the right to acquire shares of New SAIC class A preferred stock. The special dividend will be paid with respect to Old SAIC class A common stock held by the Old SAIC stock-based compensation plans following the reorganization merger and conversion of such shares into New SAIC class A preferred stock. See Capitalization and The Merger and the Special Dividend.

1999 Stock Incentive Plan

General. In 1999, our board of directors and stockholders approved the 1999 Stock Incentive Plan. The 1999 Stock Incentive Plan was adopted as a successor to our 1998 Stock Option Plan. The 1999 Stock Incentive

Table of Contents

Plan provides our and our affiliates' employees, directors and consultants the opportunity to receive stock options, stock appreciation rights, vested stock awards, restricted stock awards, restricted stock units, performance awards and other similar types of stock awards. Options granted under the 1999 Stock Incentive Plan may be either incentive stock options, as defined under Section 422 of the Code or nonqualified stock options. The 1999 Stock Incentive Plan terminates on April 9, 2019, but no incentive stock options may be granted under the plan after April 9, 2009.

If the 2006 Equity Incentive Plan becomes effective, we will cease granting awards under the 1999 Stock Incentive Plan. If the 2006 Equity Incentive Plan does not become effective, the 1999 Stock Incentive Plan will continue in operation pursuant to its terms.

Share Reserve. We are authorized to grant stock options and stock awards for the purchase of 24,000,000 shares of Old SAIC class A common stock, plus the shares described below, under the 1999 Stock Incentive Plan. Shares of Old SAIC class A common stock available for issuance under the 1998 Stock Option Plan as of September 30, 1999 and shares of Old SAIC class A common stock subject to outstanding options under the 1998 Stock Option Plan as of September 30, 1999 that may be returned to us because the options are forfeited, expire or are canceled without delivery of shares of stock, the shares are retained to satisfy tax withholding on option exercises or the options result in the forfeiture of shares of stock back to us will continue to be available for issuance under the 1999 Stock Incentive Plan.

Automatic Annual Increase of Share Reserve. The 1999 Stock Incentive Plan provides that the share reserve will be cumulatively increased for each year after 1999 by a number of shares that is equal to 5% of the outstanding shares of Old SAIC class A common stock as of the first business day of each calendar year, provided that in no event will the number of shares authorized for issuance exceed 15% of the outstanding shares of Old SAIC class A common stock. If the 2006 Equity Incentive Plan becomes effective, this annual share increase will cease.

Administration. The 1999 Stock Incentive Plan is administered by our board of directors or a committee or employee as the board of directors may appoint to administer the plan. The board, board committee or employee is referred in the 1999 Stock Incentive Plan as the administrator.

Eligibility. Awards under the 1999 Stock Incentive Plan may be granted to our employees, directors and consultants. Incentive stock options may be granted only to our employees. The administrator determines the individuals who are granted awards under the 1999 Stock Incentive Plan.

Nontransferability of Awards. Unless otherwise provided in an award agreement, awards granted under the 1999 Stock Incentive Plan are not transferable except to a designated beneficiary upon death and may be exercised during the awardee's lifetime only by the awardee or by his or her legal representative.

Right of Repurchase. Pursuant to Old SAIC's certificate of incorporation, all shares of Old SAIC class A common stock acquired pursuant to awards under the 1999 Stock Incentive Plan are subject to our right of repurchase upon the participant's termination of employment or affiliation with us at the fair market value of Old SAIC class A common stock. These restrictions will lapse following the completion of the reorganization merger. See, The Merger and the Special Dividend.

Stock Options. An option represents the right to purchase shares of Old SAIC class A common stock upon the payment of a pre-established exercise price. The 1999 Stock Incentive Plan authorizes the administrator to determine the exercise price of options at the time the options are granted. Unless otherwise specified in an award agreement, the exercise price will be the fair market value of Old SAIC class A common stock

Edgar Filing: SAIC, Inc. - Form S-1/A

on the date of the grant. The exercise price of an incentive stock option may not be less than 100% of the fair market value of Old SAIC class A common stock on the date of grant. The exercise price of a nonqualified stock option may not be less than 85% of the fair market value of Old SAIC class A common stock on the date of grant. The 1999 Stock Incentive Plan authorizes the administrator to determine the vesting schedule applicable to options, as well

Table of Contents

as the means of payment for shares issued on exercise of an option. The term of an option may be no more than ten years from the date of grant, except that an incentive stock option granted to a 10% stockholder may not have a term of more than five years. No option may be exercised after the expiration of its term.

Stock Awards. Stock awards may be restricted stock awards, vested stock awards, restricted stock units, stock appreciation rights, performance awards or other similar stock awards. Restricted stock awards and vested stock awards are grants of a specific number of shares of Old SAIC class A common stock that either vest or have restrictions that lapse over time in accordance with a vesting schedule. Restricted stock units represent a promise to deliver shares of Old SAIC class A common stock, or an amount of cash or property equal to the value of the underlying shares, at a future date. Stock appreciation rights are rights to receive cash and/or shares of Old SAIC class A common stock based on the amount by which the fair market value of a specific number of shares of Old SAIC class A common stock on the exercise date exceeds the exercise price established by the administrator. Performance awards are rights to receive amounts, in cash or shares of Old SAIC class A common stock, based upon our or a participant's performance during the period between the date of grant and a pre-established future date. The terms and conditions of a stock award will be found in an award agreement. Vesting and restrictions on the ability to exercise stock awards may be conditioned upon the achievement of one or more goals, as determined by the administrator in its discretion. Recipients of restricted shares may have voting rights and may receive dividends on the granted shares prior to the time the restrictions lapse.

Change in Control. The 1999 Stock Incentive Plan provides that, except as provided in an award agreement, outstanding awards will become fully vested upon the occurrence of a change of control. The reorganization merger will not constitute a change of control.

Amendment and Termination. Our board of directors may at any time amend, suspend or terminate the 1999 Stock Incentive Plan. However, no amendment may, without stockholder approval, increase the maximum number of shares for which awards may be granted or change the class of employees eligible to participate in the 1999 Stock Incentive Plan.

2004 Employee Stock Purchase Plan

General. In 2004, our board of directors and stockholders approved the 2004 Employee Stock Purchase Plan. The 2004 Employee Stock Purchase Plan was adopted as a successor to our 2001 Employee Stock Purchase Plan. The 2004 Employee Stock Purchase Plan provides our employees with an opportunity to purchase Old SAIC class A common stock through voluntary payroll deductions. The 2004 Employee Stock Purchase Plan terminates on July 31, 2007, unless earlier terminated by our board of directors.

If the 2006 Employee Stock Purchase Plan becomes effective, we will cease issuing shares under the 2004 Employee Stock Purchase Plan. If the 2006 Employee Stock Purchase Plan does not become effective, the 2004 Employee Stock Purchase Plan will continue in operation pursuant to its terms.

Share Reserve. We have reserved a total of 6,000,000 shares of Old SAIC class A common stock for purchase under the 2004 Employee Stock Purchase Plan.

Administration. The 2004 Employee Stock Purchase Plan is administered by a committee of the board.

Edgar Filing: SAIC, Inc. - Form S-1/A

Eligibility. Generally, all of our employees are eligible to participate in the 2004 Employee Stock Purchase Plan, except for employees of subsidiaries that have not been designated as eligible for participation. However, no person may participate in the 2004 Employee Stock Purchase Plan who owns stock having more than 5% of the total combined voting power or value of all classes of our capital stock.

Purchase of Shares. Shares of Old SAIC class A common stock purchased under the 2004 Employee Stock Purchase Plan may be acquired in our limited market or purchased from us out of authorized but unissued shares. Shares are purchased for the account of each participant on four predetermined purchase dates during the year.

Table of Contents

Payroll Deductions. The 2004 Employee Stock Purchase Plan permits participants to purchase shares of Old SAIC class A common stock through payroll deductions of between 1% and 10% of the participant's compensation up to a maximum of \$25,000 per year. Compensation is defined by a committee of the board and includes at a minimum regular wages, salary or commissions paid to the employee.

Company Contribution. We contribute a certain percent of the purchase price of each share of Old SAIC class A common stock purchased under the 2004 Employee Stock Purchase Plan. The percent we contribute is determined by a committee of the board within a range between 0% and 15% of the purchase price.

Purchase Price. Unless otherwise determined by our board of directors, the purchase price of each share of Old SAIC class A common stock purchased under the 2004 Employee Stock Purchase Plan is equal to the fair market value of the Old SAIC class A common stock.

Withdrawals. Participants may withdraw from the 2004 Employee Stock Purchase Plan, terminate their election to purchase shares and obtain repayment of the balance of any funds held in their accounts, without interest, at any time prior to the purchase of shares.

Restrictions on Shares Purchased. All shares purchased pursuant to the 2004 Employee Stock Purchase Plan are subject to our right of repurchase upon the participant's termination of employment or affiliation with us at fair market value of shares of Old SAIC class A common stock. These restrictions will lapse following the completion of the reorganization merger. See, The Merger and the Special Dividend.

Qualification Under the Code. The 2004 Employee Stock Purchase Plan is designed to qualify as an employee stock purchase plan under Section 423(b) of the Code.

Nontransferability. Amounts credited to a participant employee's stock purchase account may not be transferred by a participant other than by will or the laws of descent and distribution.

Amendment and Termination. Our board of directors has the authority to amend or terminate the 2004 Employee Stock Purchase Plan, except that no amendment may, without stockholder approval, increase the maximum number of shares available for purchase under the 2004 Employee Stock Purchase Plan or deny to participating employees the right to withdraw from the 2004 Employee Stock Purchase Plan and obtain all amounts then held in their stock purchase accounts.

Amended and Restated 1984 Bonus Compensation Plan

General. Our 1984 Bonus Compensation Plan was approved by our directors and stockholders in 1984 and amended and restated by our directors and stockholders in 1999. The Amended and Restated 1984 Bonus Compensation Plan provides for the grant of annual and long-term bonuses and other stock- and cash-based performance awards. If the 2006 Equity Incentive Plan becomes effective, we will cease granting awards under the Restated Bonus Compensation Plan. If the 2006 Equity Incentive Plan does not become effective, the Restated Bonus Compensation Plan will continue in effect until terminated by our board of directors.

Authorized Awards. The Restated Bonus Compensation Plan authorizes the grant to eligible participants of bonus awards in each of our fiscal years with an aggregate fair market value of up to the bonus pool for that year. The bonus pool for each fiscal year is established by the committee of our board of directors administering the Restated Bonus Compensation Plan, but may not exceed 7.5% of our consolidated revenue for the year. The maximum fair market value of awards that may be granted to any individual during a fiscal year under the Restated Bonus Compensation Plan is \$25,000,000. Bonus awards may be denominated in cash or shares of Old SAIC class A common stock, or any combination of cash and stock.

Administration. The Restated Bonus Compensation Plan is administered by a committee of our board of directors as determined in accordance with the provisions of the Restated Bonus Compensation Plan.

Table of Contents

Eligibility. Employees, directors and consultants of us and our affiliates are eligible to participate in the Restated Bonus Compensation Plan. The committee, in its discretion, determines the eligible individuals who will be granted bonus awards.

Form of Bonus Award. Bonus awards under the Restated Bonus Compensation Plan may be granted in the form of cash, restricted stock or vested stock. Restricted stock awards are grants of shares of Old SAIC class A common stock subject generally to forfeiture and transfer restrictions which lapse in accordance with a vesting schedule or upon the satisfaction of specified conditions. Vested stock awards are grants of shares of Old SAIC class A common stock that have rights that vest in accordance with a vesting schedule or upon the satisfaction of specified conditions. The vesting schedule or conditions are established by the committee at the time of grant.

Bonus Programs. Awards under the Restated Bonus Compensation Plan are granted under one of several programs, as described below:

- *CEO Bonus Program.* The CEO bonus program provides for the grant of bonus awards to employees who are involved in corporate development or administration or are senior employees. Awards are made upon recommendation of our chief executive officer and may be granted up to the aggregate amount of the CEO bonus fund for the year.
- *Group Bonus Program.* The group bonus fund provides for the grant of bonus awards to individuals who contribute to the success of each of our major operating groups. Awards are granted upon recommendation of each group manager and may be granted up to the amount of the group bonus fund for the year.
- *Performance Awards.* Performance awards are rights to receive amounts, in cash or shares of Old SAIC class A common stock, based upon our or a participant's performance during the period between the date of grant and a pre-established future date.

Nontransferability. Except as otherwise provided in the award agreement, bonus awards granted pursuant to the Restated Bonus Compensation Plan are not transferable except to a designated beneficiary upon death. All shares of Old SAIC class A common stock acquired pursuant to bonus awards under the Restated Bonus Compensation Plan are subject to our right of repurchase upon the participant's termination of employment or affiliation with us at the fair market value.

Change in Control. The Restated Bonus Compensation Plan provides that, except as provided in the award agreement, outstanding bonus awards become fully vested on the occurrence of a change in control. The reorganization merger will not constitute such a change in control.

Amendment and Termination. Our board of directors or its committee administering the Restated Bonus Compensation Plan may at any time amend, suspend or terminate the Restated Bonus Compensation Plan.

Management Stock Compensation Plan

General. Our Management Stock Compensation Plan was approved by our board of directors in 1996. The Management Stock Compensation Plan is an unfunded compensation arrangement established to make deferred awards of Old SAIC class A common stock to selected management and highly compensated employees. The Management Stock Compensation Plan will continue in effect until all amounts have been distributed in accordance with the terms of the plan or our board of directors terminates the plan.

Administration. The Management Stock Compensation Plan is administered by a committee appointed by our board of directors.

Table of Contents

Eligibility. Awards under the Management Stock Compensation Plan may be granted to members of our management or highly compensated employees as determined by a committee appointed by our board of directors.

Participation and Awards. Awards are made by an individual or group of individuals appointed by our board called the awarding authority. The awarding authority has discretion to designate those employees who are to receive share units to be credited to an account created for that employee.

Awards Held in Trust. Within a reasonable period of time following the date of an award, we contribute to a trust fund, formed for purposes of the Management Stock Compensation Plan, shares of Old SAIC class A common stock or an amount of money sufficient for the trustee to purchase shares of Old SAIC class A common stock corresponding to the share units awarded.

Vesting and Forfeiture. Each award is subject to a vesting schedule not to exceed seven years. Awards granted prior to January 1, 2006 will generally vest at the rate of one-third at the end of each of the fifth, sixth and seventh year following the date of award. New awards issued on or after January 1, 2006 will generally vest 100% at the end of the fourth year following the date of award. Vesting ceases upon termination of the awardee's employment for any reason other than death of the awardee. In the event of the death of an awardee, all of his or her accounts become immediately vested. The unvested portion of an awardee's account upon termination of employment is immediately forfeited by the awardee, and the unvested shares are returned to us or reallocated in accordance with the committee's directions and the terms of the trust.

Distribution. For awards made prior to 2006, generally, an awardee may elect to have the vested portion of his or her account distributed within a reasonable period of time following the date it becomes vested or the awardee's employment terminates. If the awardee fails to make an election, his or her account is distributed in full within a reasonable period of time following the seventh anniversary of the date of the award. For awards made after January 1, 2006, participants will generally receive a distribution of their award following termination or retirement. Each distribution is made in the form of Old SAIC class A common stock.

Nontransferability. No awardee may assign any of the benefits or payments or proceeds which the awardee may expect to receive under the Management Stock Compensation Plan except pursuant to the laws of descent and distribution or to a designated beneficiary in the event of the awardee's death.

Change in Control. Every account will become fully vested and will be immediately distributed to the awardees upon the occurrence of a change in control. The reorganization merger will not constitute such a change in control.

Amendment and Termination. Our board of directors may at any time amend or terminate the Management Stock Compensation Plan for any reason. In the event of an amendment or termination, benefits will either be paid out when due under the terms of the Management Stock Compensation Plan or as soon as possible as determined by the committee in its sole discretion.

Distribution. For awards made prior to 2006, generally, an awardee may elect to have the vested portion of his or her account distributed within a reasonable period of time following the date it becomes vested or the awardee's employment terminates. If the awardee fails to make this election, his or her account is distributed in full within a reasonable period of time following the seventh anniversary of the date of the award. For awards made after January 1, 2006, participants will receive a distribution of their award once it becomes vested. Each distribution is made in the form of Old SAIC class A common stock.

Nontransferability. No awardee may transfer any of the benefits or payments or proceeds which the awardee may expect to receive under the plan except pursuant to the laws of descent and distribution or to a designated beneficiary in the event of awardee's death.

Change in Control. Every account will become fully vested and will be immediately distributed to the awardees upon the occurrence of a change in control. The reorganization merger will not constitute such a change in control.

Amendment and Termination. Our board of directors may at any time amend or terminate the Stock Compensation Plan for any reason. In the event of an amendment or termination, benefits will either be paid out when due under the terms of the Stock Compensation Plan or as soon as possible as determined by the committee in its sole discretion.

2006 Equity Incentive Plan

General. Our board of directors has adopted the 2006 Equity Incentive Plan, which was subsequently approved by our stockholders and will become effective upon the closing of the reorganization merger. The 2006 Equity Incentive Plan provides for the grant of stock options, restricted stock, restricted stock units, deferred stock, stock appreciation rights, performance shares and other similar types of awards, as well as cash awards. New SAIC stock subject to the 2006 Equity Incentive Plan will either be class A preferred stock or common stock, as determined by the plan administrator. Options granted under the 2006 Equity Incentive Plan may be either incentive stock options, as defined under Section 422 of the Code or nonstatutory stock options. The 2006 Equity Incentive Plan will terminate in fiscal 2016 unless it is extended or terminated earlier pursuant to its terms.

Share Reserve. A total of up to 75,000,000 shares of New SAIC stock, plus the shares described below, will be available for issuance under the 2006 Equity Incentive Plan. Shares that are forfeited or repurchased by us at the original purchase price or less, are issuable upon exercise of awards that expire or become unexercisable

Table of Contents

for any reason without having been exercised, are restored by our board of directors or a designated committee pursuant to provisions in the 2006 Equity Incentive Plan that permit options to be settled in shares on a net appreciation basis at our election, or are not delivered to a holder in consideration for applicable tax withholding will continue to be available for issuance under the 2006 Equity Incentive Plan.

Automatic Annual Increase of Share Reserve. The 2006 Equity Incentive Plan provides that the shares available for issuance will be automatically increased beginning February 1, 2007 and on each February 1 for nine years thereafter. The number of shares that may be added each year will equal the least of 30,000,000 shares, 5% of the outstanding shares of New SAIC common stock as of the preceding January 31 (measured on an as-converted basis with respect to our outstanding shares of class A preferred stock) and a number of shares set by our board of directors or the committee of our board of directors administering the 2006 Equity Incentive Plan.

Administration. The 2006 Equity Incentive Plan will be administered by our board of directors or a committee of our board of directors, either of which may further delegate certain of its responsibilities to a delegated officer in certain instances. The board, committee or officer is referred to in the 2006 Equity Incentive Plan as the administrator.

Eligibility. Awards under the 2006 Equity Incentive Plan may be granted to our employees, directors and consultants. Incentive stock options may be granted only to our employees. The administrator determines which individuals are granted awards under the 2006 Equity Incentive Plan.

Termination of Awards. Generally, if an awardee's service to us terminates other than by reason of death, disability or for cause, vested awards will remain exercisable for a period of 90 days following the termination of the awardee's service, or if earlier, until the expiration of the term of the award. If an awardee's service to us terminates for cause, all of his or her awards will immediately terminate as of the date of termination unless otherwise provided for in the award agreement. Unless otherwise provided for by the administrator, if an awardee dies or becomes disabled while an employee, consultant or director, the vesting of all of the awardee's unvested awards will accelerate, and all of awardee's awards will remain exercisable until the expiration of the term of the award.

Nonassignability of Awards. Unless otherwise determined by the administrator, awards granted under the 2006 Equity Incentive Plan are not assignable other than by will, the laws of descent and distribution, a qualified domestic relations order or to a designated beneficiary upon death and may be exercised, purchased or settled during the awardee's lifetime only by the awardee.

Stock Options. An option represents the right to purchase shares of stock upon the payment of a pre-established exercise price. At the time of grant, the following terms for each option will be established:

- *Exercise Price.* The administrator determines the exercise price of options at the time the options are granted. The exercise price of an incentive stock option may not be less than 100% of the fair market value of New SAIC stock on the date of grant. The exercise price of a nonstatutory stock option may not be less than 85% of the fair market value of New SAIC stock on the date of grant.
- *Exercise of Option; Form of Consideration.* The administrator determines when options vest and become exercisable. The means of payment for shares issued on exercise of an option are specified in each option agreement. The 2006 Equity Incentive Plan permits payment to be made by cash, check, wire transfer, other shares of New SAIC stock (with some restrictions), broker-assisted same day sales, cancellation of any debt owed by us or any of our affiliates to the optionholder, or in certain instances a delivery of cash or stock for any net appreciation in the shares at the time of exercise over the exercise price or by other means of consideration permitted by

applicable law and the administrator.

- *Term of Options.* The term of an option may be no more than 10 years from the date of grant. No option may be exercised after the expiration of its term. An incentive stock option granted to a greater than 10% stockholder may not have a term of more than five years.

Table of Contents

Stock Awards. Stock awards may be restricted stock grants, restricted stock units, deferred stock, stock appreciation rights, performance shares or other similar stock awards. Restricted stock grants are awards of a specific number of shares of New SAIC stock. Restricted stock units represent a promise to deliver shares of New SAIC stock, or an amount of cash or property equal to the value of the underlying shares, at a future date. Deferred stock is a grant of shares of New SAIC stock that are distributed in the future upon vesting. Stock appreciation rights are rights to receive cash and/or shares of New SAIC stock based on the amount by which the fair market value of a specific number of shares of New SAIC stock on the exercise date exceeds the exercise price established by the administrator. Performance shares are rights to receive amounts, in cash or shares of New SAIC stock, based upon our or the awardee's performance during the period between the date of grant and a pre-established future date.

Each stock award is evidenced by a stock award agreement between us and the participant. The 2006 Equity Incentive Plan allows the administrator broad discretion to determine the terms of individual stock awards, including the number and type of shares subject to a stock award; the purchase price of the shares, if any, and the means of payment for the shares; the performance criteria; the terms, conditions and restrictions on the grant, issuance, vesting and forfeiture of the shares subject to the stock award; and the restrictions on the transferability of the stock award.

Cash Awards. Cash awards may be granted either alone, in addition to, or in tandem with other awards granted under the 2006 Equity Incentive Plan. A cash award granted under the 2006 Equity Incentive Plan may be made contingent on the achievement of performance conditions. The agreement for the cash award may contain provisions regarding the target and maximum amount payable to the participant as a cash award, performance conditions, restrictions on the alienation or transfer of the cash award prior to actual payment, forfeiture provisions, and further terms and conditions, as may be determined from time to time by the administrator.

Change in Control. The 2006 Equity Incentive Plan provides that in the event of our merger with or into another corporation, a sale of substantially all of our assets or another change of control transaction as determined by the administrator, the successor entity may assume or substitute all outstanding awards. If the successor entity does not assume or substitute all outstanding awards, the vesting of all awards will accelerate and any repurchase rights relating to awards will terminate. In addition, in the event of a change of control transaction, all outstanding awards of non-employee directors will automatically vest in full. If a successor entity assumes or substitutes all awards and a participant is involuntarily terminated by the successor entity for any reason other than death, disability or cause within 18 months following the change of control, all outstanding awards of the terminated participant will immediately vest and be exercisable for a period of six months following termination.

Amendment and Termination. Our board of directors may amend, suspend or terminate the 2006 Equity Incentive Plan. However, we will solicit stockholder approval for any amendment to the 2006 Equity Incentive Plan to the extent necessary to comply with applicable laws or NYSE listing requirements. Generally, no action by our board of directors or stockholders may alter or impair any award previously granted under the 2006 Equity Incentive Plan without the written consent of the awardee.

2006 Employee Stock Purchase Plan

General. Our board of directors has adopted the 2006 Employee Stock Purchase Plan, which was subsequently approved by our stockholders. Subject to the closing of the reorganization merger, the Plan will become effective on the date the first offering period commences as determined by the compensation committee. The 2006 Employee Stock Purchase Plan provides our employees with an opportunity to purchase our class A preferred stock (or our common stock, as determined by the compensation committee of our board of directors), at a discounted purchase price through accumulated payroll deductions. The 2006 Employee Stock Purchase Plan will terminate in 2016 unless it is terminated earlier pursuant to its terms.

Share Reserve. The 2006 Employee Stock Purchase Plan provides that an aggregate of up to 9,000,000 shares of New SAIC stock will be available for issuance under the 2006 Employee Stock Purchase Plan, plus

Table of Contents

additional shares that may be added to the 2006 Employee Stock Purchase Plan as described below. The 2006 Employee Stock Purchase Plan provides that additional shares will automatically be added to the shares available for issuance under the 2006 Employee Stock Purchase Plan beginning February 1, 2007 and on each February 1 thereafter for nine more years. The number of shares that may be added each year will equal the least of 9,000,000 shares, 2% of New SAIC outstanding common stock as of the last day of the immediately preceding fiscal year (measured on an as-converted basis with respect to New SAIC outstanding class A preferred stock) and a number of shares established by our compensation committee.

Administration. The 2006 Employee Stock Purchase Plan will be administered by the compensation committee of our board of directors or a committee consisting of management employees which has been delegated administrative responsibilities.

Eligibility. Generally, any person who is employed by us or any of our majority-owned subsidiaries designated by our board of directors is eligible to participate in the 2006 Employee Stock Purchase Plan, provided that the employee is employed on the first day of an offering period and subject to certain limitations imposed by Section 423(b) of the Code.

Offering Periods. Unless and until the compensation committee determines to implement longer periods, except for the first offering period, each offering period will have a duration of three months and will commence on April 1, July 1, October 1 or January 1 of each year. Each offering period will have only one purchase period which will run simultaneously with the offering period. The first offering period will commence and end on dates determined by the compensation committee.

Payroll Deductions. The 2006 Employee Stock Purchase Plan permits participants to purchase our stock through payroll deductions of between 1% and 10% of the participant's compensation, up to a maximum of \$25,000 per year and up to a maximum of 2,500 shares per offering period. Compensation includes base salary, wages, bonuses, incentive compensation, commissions, overtime, shift premiums and draws against commissions, but excludes long-term disability or workers' compensation payments, car allowances, relocation payments and expense reimbursements.

Purchase Price. The purchase price per share at which shares are purchased under the 2006 Employee Stock Purchase Plan is 85% of the fair market value of New SAIC stock subject to the 2006 Employee Stock Purchase Plan on the purchase date. The compensation committee has authority to change the purchase price within a range of 85% to 100% of the fair market value of New SAIC stock on the offering date or the purchase date.

Holding Period. The compensation committee has the authority to establish a minimum holding period for shares purchased under the 2006 Employee Stock Purchase Plan.

Withdrawals. Participants may withdraw from the 2006 Employee Stock Purchase Plan, terminate their election to purchase shares and obtain repayment of the balance of any funds held in their accounts, without interest, at any time prior to the end of an offering period.

Qualification Under the Code. The 2006 Employee Stock Purchase Plan is designed to qualify as an employee stock purchase plan under Sections 421 and 423 of the Code.

Edgar Filing: SAIC, Inc. - Form S-1/A

Nonassignability. Neither payroll deductions credited to a participant's account nor any rights with regard to the exercise of an option or to receive shares under the 2006 Employee Stock Purchase Plan may be assigned, transferred, pledged or otherwise disposed of in any way other than by will, the laws of descent and distribution or designation of a beneficiary in event of death.

Change in Control. In the event of a change in control transaction of us, the 2006 Employee Stock Purchase Plan will continue with regard to offering periods that commenced prior to the closing of the proposed transaction and shares will be purchased based on the fair market value of the successor entity's stock on each purchase date, unless otherwise provided by the compensation committee.

Table of Contents

Amendment and Termination of the 2006 Employee Stock Purchase Plan. Our board of directors may amend, terminate or extend the 2006 Employee Stock Purchase Plan, but we will obtain stockholder approval for any amendment to the 2006 Employee Stock Purchase Plan to the extent required by applicable laws or NYSE listing requirements. Unless approved by our stockholders, our board of directors will not make any amendment that would increase the maximum number of shares that may be issued under the 2006 Employee Stock Purchase Plan or change the designation or class of persons eligible to participate under the 2006 Employee Stock Purchase Plan. Generally, no action by our board of directors or stockholders may impair any outstanding option without the written consent of the participant.

Continued Vesting on Vesting Stock and Options for Retirees

Certain qualifying retirees may continue holding and vesting in their vesting stock (including units of vesting stock held in the Key Executive Stock Deferral Plan) and stock options after retirement, if they have held such securities for at least 12 months prior to retirement. Qualifying retirement is defined as terminating service with us (1) after age 59 1/2 with at least ten years of service with us, (2) after age 59 1/2 when age at termination plus years of service with us equals at least 70 or (3) after reaching the applicable mandatory retirement age regardless of their length of service with us for officers and directors subject to the reporting requirements of Section 16 of the Securities Exchange of 1934, so-called Section 16 Officers and Directors. We have the right to terminate this continued vesting in certain circumstances. We also have the right to repurchase shares held by retirees after their options are exercised and/or their shares are fully vested. If a retiree is a participant in our Alumni Program (a program for eligible retirees where we have no repurchase right on their shares during the first five years after termination, but would have the right to repurchase the shares during the second five years on an established schedule with the ability to accelerate the repurchase during the second five years), we have the right to repurchase shares held by the retiree upon the termination of the retiree's participation in the Alumni Program. The policy change was implemented for all unvested stock and options awarded after July 1, 2004. However, for Section 16 Officers and Directors retiring after reaching mandatory retirement age, this policy change applies to all unvested stock and options held by them, regardless of when the vesting stock and options were awarded.

Deferred Compensation Plans

We maintain two deferred compensation plans, the Keystaff Deferral Plan and the Key Executive Stock Deferral Plan, for the benefit of key executives and directors that allow eligible participants to elect to defer all or a portion of their annual bonus compensation. We make no contributions under the Keystaff Deferral Plan but do credit participant accounts for deferred compensation amounts and interest earned. Interest is accrued based on the Moody's Seasoned Corporate Bond Rate (5.59% in 2006). Deferred balances will generally be paid upon termination. Under the Key Executive Stock Deferral Plan, eligible participants may elect to defer all or a portion of their annual bonus compensation. We make no contributions to the accounts of participants, which generally correspond to shares of Old SAIC class A common stock held in a trust for the benefit of participants. Deferred balances will generally be paid upon retirement or termination.

Employee Stock Retirement Plan

Prior to adoption of the SAIC Retirement Plan in January 2006, we maintained an Employee Stock Retirement Plan (ESRP), in which eligible employees participated. Cash or stock contributions to the ESRP were based upon amounts determined annually by our board of directors and were allocated to participants' accounts based on their annual eligible compensation. We recognized the fair value of Old SAIC class A common stock or the amount of cash contributed in the year of contribution as compensation expense. The vesting requirements for the ESRP were the same as the vesting requirements for our contributions to the 401(k) Plan. Any participant who left us, whether by retirement or otherwise, was able to elect to receive either cash or shares of our common stock as a distribution from their account. Shares of Old SAIC class A common stock distributed from the ESRP bore a limited put right that, if exercised, required us to repurchase all or a portion of the shares at their then

Table of Contents

current fair value during two specified 60-day periods following distribution. If the shares were not put to us during the specified periods, the shares no longer bore a put right, and we were not required to repurchase the shares.

401(k) Plan

Prior to adoption of the SAIC Retirement Plan in January 2006, we maintained a principal 401(k) Profit Sharing Plan (401(k) Plan), which was the result of the merger of our Profit Sharing Retirement Plan with our Cash or Deferred Arrangement effective November 28, 2003. The 401(k) Plan was qualified under Section 401(a) of the Code and its associated trust was exempt from federal income taxation under Section 501(a) of the Code. The 401(k) Plan allowed eligible participants to defer a portion of their income through payroll deductions. Such deferrals were fully vested, were not taxable to the participant until distributed from the 401(k) Plan upon termination, retirement, permanent disability or death and could be matched by us. In addition, we could also provide a profit sharing contribution. Participants' interests in our matching and profit sharing contributions vested ratably over five years. Participants also became fully vested upon reaching age 59 1/2, permanent disability or death.

SAIC Retirement Plan

Effective January 1 2006, Old SAIC adopted the SAIC Retirement Plan, which is the result of the merger of our ESRP with our 401(k) Plan. The plan is a combined 401(k) plan and an employee stock ownership plan (ESOP). The plan is qualified under Section 401(a) of the Code and its associated trust is exempt from federal income taxation under Section 501(a) of the Code. The ESOP feature of the plan is intended to qualify under Sections 401(a) and 4975(e)(7) of the Code and is designed as such to invest primarily in company stock. The plan allows eligible participants to defer a portion of their income through payroll deductions. Such deferrals are fully vested, are not taxable to the participant until distributed from the plan upon termination, retirement, permanent disability or death and may be matched by us. In addition, we may also provide a profit sharing and/or ESOP contribution. Cash or stock contributions to the plan are based upon amounts determined annually by our board of directors and are allocated to participants' accounts based on their annual eligible compensation. We recognize the fair value of Old SAIC class A common stock or the amount of cash contributed in the year of contribution as compensation expense. Participants' interests in our matching, profit sharing and ESOP contributions vest ratably over five years. Participants also become fully vested upon reaching age 59 1/2, permanent disability or death. We currently provide a matching 50% contribution for each dollar an employee contributes to the plan, up to a certain percentage of the employee's eligible compensation. Any participant who leaves us, whether by retirement or otherwise, may be able to elect to take a distribution in shares of our common stock from the balances of their account invested in our stock. Shares of Old SAIC class A common stock distributed from the plan bear a limited put right that, if exercised, would require us to repurchase all or a portion of the shares at their then current fair value during two specified 60-day periods following distribution. If the shares are not put to us during the specified periods, the shares no longer bear a put right, and we will not be required to repurchase the shares. Although we have no current intention to do so, if necessary, we believe we have the ability to eliminate the limited put right feature on shares held by the plan.

Table of Contents**CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS**

In conjunction with the retirement of J.R. Beyster from the board of directors, in fiscal 2005, we made a \$4 million cash donation in the name of J.R. Beyster, our former Chairman of the Board, Chief Executive Officer and President, to the UC San Diego Foundation for the benefit of the Beyster Institute, a part of the Rady School of Management at the University of California, San Diego. The Beyster Institute at the Rady School of Management engages in teaching, research, public education and outreach related to advancing and encouraging others in the field of employee ownership and entrepreneurship. The Beyster Institute was previously a part of the Foundation for Enterprise Development (the Foundation), a non-profit organization established by J.R. Beyster, which is engaged in a broad range of research and education activities. In addition, in each of fiscal 2006 and fiscal 2005, we donated \$150,000 in cash to the Foundation and we have a commitment to donate \$150,000 per year for three more years. In fiscal 2004, we made total annual contributions of \$700,000 to the Foundation, in the form of cash, rent-free occupancy in our facilities and donated services. J.R. Beyster is the President and a member of the Board of Trustees of the Foundation and M.A. Walkush, sister of J.P. Walkush, an Executive Vice President and a Director, and a consulting employee of us, is a consultant and a Senior Fellow for the Foundation. S.P. Fisher, a Senior Vice President and our Treasurer, is a member of the Board of Trustees of the Foundation, and T.E. Darcy, an Executive Vice President, and J.P. Walkush have each previously served as members of the Board.

On July 9, 2004, we and J.R. Beyster entered into a letter agreement in conjunction with J.R. Beyster's retirement from the board of directors. Pursuant to this letter, in fiscal 2005, we (1) paid J.R. Beyster \$104,000 as compensation for providing business and strategic support to assist with the transition to our new Chairman, Chief Executive Officer and President, (2) provided J.R. Beyster and his spouse with medical, dental, vision and life insurance benefits equivalent to those generally provided to our employees, (3) transferred ownership of the company car utilized by J.R. Beyster and (4) provided travel agency services to J.R. Beyster and his spouse.

J.R. Beyster, as Trustee of the Beyster Family Trust, entered into a Rule 10b5-1 trading plan with Bull, Inc., our wholly-owned broker-dealer subsidiary. The Rule 10b5-1 trading plan, dated June 15, 2004, directed Bull, Inc. to sell on behalf of the Beyster Family Trust 190,639 shares of Old SAIC class A common stock in Old SAIC's limited market in the July 2004 trade and 190,639 shares of Old SAIC class A common stock in Old SAIC's limited market in the October 2004 trade, provided the sale price was at or above \$25.00 per share. Pursuant to this trading plan, the Beyster Family Trust sold 190,639 shares of Old SAIC class A common stock in Old SAIC's limited market in the July 2004 trade and 190,639 shares of Old SAIC class A common stock in Old SAIC's limited market in the October 2004 trade.
