THE ZWEIG TOTAL RETURN FUND, INC.

NOTES TO SCHEDULES OF INVESTMENTS AND SECURITIES SOLD SHORT

September 30, 2006
(Unaudited)

NOTE 1 -- SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Zweig Total Return Fund, Inc. (the "Fund") in the preparation of the Schedule of Investments and Securities Sold Short. The preparation of the Schedule of Investments and Securities Sold Short in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the Schedule of Investments and Securities Sold Short. Actual results could differ from those estimates.

A. Security Valuation

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded, or if no closing price is available, at the last bid price.

Debt securities are valued on the basis of broker quotations or valuations provided by a pricing service, which in determining value utilizes information with respect to recent sales, market transactions in comparable securities, quotations from dealers, and various relationships between securities in determining value.

As required, some securities and assets may be valued at fair value as

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

determined in good faith by or under the direction of the Directors.

Certain foreign common stocks may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that the Fund calculates its net asset value (generally, the close of the NYSE) that may impact the value of securities traded in these foreign markets. In these cases, information from an external vendor may be utilized to adjust closing market prices of certain foreign common stocks to reflect their fair value. Because the frequency of significant events is not predictable, fair valuation of certain foreign common stocks may occur on a frequent basis.

Short-term investments having a remaining maturity of 60 days or less are valued at amortized cost, which approximates market.

B. Security Transactions and Related Income

Security transactions are recorded on the trade date. Dividend income is recorded on the ex-dividend date, or in the case of certain foreign securities, as soon as the Fund is notified. Interest income is recorded on the accrual basis. The Fund amortizes premiums and accretes discounts using the effective interest method. Realized gains and losses are determined on the identified cost basis.

7

C. Foreign Currency Translation

Foreign securities and other assets and liabilities are valued using the foreign currency exchange rate effective at the end of the reporting period. Cost of investments is translated at the currency exchange rate effective at the trade date.

D. Foreign Security Country Determination

A combination of the following criteria is used to assign the countries of risk listed in the schedule of investments and securities sold short: country of incorporation, actual building address, primary exchange on which the security is traded and country in which the greatest percentage of company revenue is generated.

E. Short Sales

A short sale is a transaction in which the Fund sells a security it does not own in anticipation of a decline in market price. To sell a security short, the Fund must borrow the security. The Fund's obligation to replace the security borrowed and sold short will be fully collateralized at all times by the proceeds from the short sale retained by the broker and by cash and securities deposited in a segregated account with the Fund's custodian. If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will realize a loss, and if the price declines during the period, the Fund will realize a gain. Any realized gain will be decreased, and any realized loss increased, by the amount of transaction costs. On ex-dividend date, dividends on short sales are recorded as an expense to the Fund. At September 30, 2006, the value of

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

securities sold short amounted to \$3,661,000 against which collateral of \$20,829,789 was held. The collateral includes the deposits with the broker for securities held short and the value of the segregated investments held long, as shown in the Schedule of Investments and Securities Sold Short. Short selling used in the management of the Fund may accelerate the velocity of potential losses if the prices of securities sold short appreciate quickly. Stocks purchased may decline in value at the same time stocks sold short may appreciate in value, thereby increasing potential losses.

F. Security Lending

The Fund loans securities to qualified brokers through an agreement with State Street Bank (the "Custodian") and the Fund. Under the terms of the agreement, the Fund receives collateral with a market value not less than 100% of the market value of loaned securities. Collateral is adjusted daily in connection with changes in the market value of securities on loan. Collateral may consist of cash, securities issued or guaranteed by the U.S. Government or its agencies and the sovereign debt of foreign countries. Cash collateral has been invested in a short-term money market fund. Dividends earned on the collateral and premiums paid by the borrower are recorded as income by the Fund net of fees and rebates charged by the Custodian for its services in connection with this securities lending program. Lending portfolio securities involves a risk of delay in the recovery of the loaned securities or in the foreclosure on collateral.

NOTE 2 -- CREDIT RISK AND ASSET CONCENTRATIONS

In countries with limited or developing markets, investments may present greater risks than in more developed markets and the prices of such investments may be volatile. The consequences of political, social or economic changes in these markets may have disruptive effects on the market prices of these investments and the income they generate, as well as a Fund's ability to repatriate such amounts.

8

The Fund may invest a high percentage of their assets in specific sectors of the market in their pursuit of a greater investment return. Fluctuations in these sectors of concentration may have a greater impact on a Fund, positive or negative, than if a Fund did not concentrate its investments in such sectors.

NOTE 3 -- INDEMNIFICATIONS

Under the Fund's organizational documents, its directors and officers are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

NOTE 4 -- SUBSEQUENT EVENT

Effective November 9, 2006 Daniel T. Geraci resigned as director and president of the Fund, coincident with the notification of his resignation from Phoenix Investment Partners Ltd., parent of the adviser, and subsidiary of The Phoenix Companies, Inc.
