## Edgar Filing: ALASKA AIR GROUP INC - Form 8-K

(Former Name or Former Address, if Changed Since Last Report)

---

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (*see* General Instruction A.2. below):

- .. Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
  
  - .. Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
  
  - .. Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
  
  - .. Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

References in this report on Form 8-K to Air Group, Company, we, us, and our refer to Alaska Air Group, Inc. and its subsidiaries, unless otherwise specified. Alaska Airlines, Inc. and Horizon Air Industries, Inc. are referred to as Alaska and Horizon, respectively, and together as our airlines.

#### FORWARD-LOOKING INFORMATION

This report contains forward-looking statements subject to the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. These statements relate to future events and involve known and unknown risks and uncertainties that may cause actual outcomes to be materially different from those indicated by any forward-looking statements. Some of the things that could cause our actual results to differ from our expectations are:

the competitive environment and other trends in our industry;

changes in our operating costs, including fuel, which can be volatile;

labor disputes and our ability to attract and retain qualified personnel;

the timing of the MD-80 fleet disposal and the amounts of potential lease termination payments with lessors and sublease payments from sublessees;

our significant indebtedness;

compliance with our financial covenants;

potential downgrades of our credit ratings and the availability of financing;

the implementation of our growth strategy;

our ability to meet our cost reduction goals;

operational disruptions;

general economic conditions, as well as economic conditions in the geographic regions we serve;

the concentration of our revenue from a few key markets;

actual or threatened terrorist attacks; global instability and potential U.S. military actions or activities;

## Edgar Filing: ALASKA AIR GROUP INC - Form 8-K

insurance costs;

changes in laws and regulations;

increases in government fees and taxes;

our inability to achieve or maintain profitability;

fluctuations in our quarterly results;

an aircraft accident or incident;

liability and other claims asserted against us;

our reliance on automated systems; and

our reliance on third-party vendors and partners.

For a discussion of these and other risk factors, see Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2006. All of the forward-looking statements are qualified in their entirety by reference to the risk factors discussed therein. These risk factors may not be exhaustive. We operate in a continually changing business environment, and new risk factors emerge from time to time. Management cannot predict such new risk factors, nor can it assess the impact, if any, of such new risk factors on our business or events described in any forward-looking statements. We expressly disclaim any obligation to publicly update or revise any forward-looking statements after the date of this report to conform them to actual results. Over time, our actual results, performance or achievements will likely differ from the anticipated results; performance or achievements that are expressed or implied by our forward-looking statements, and such differences might be significant and materially adverse.

**ITEM 7.01. Regulation FD Disclosure**

Pursuant to 17 CFR Part 243 ( Regulation FD ), the Company is submitting information relating to its financial and operational outlook for 2007. This report includes information regarding forecasts of available seat miles (ASMs), cost per available seat mile (CASM) excluding fuel consumption, as well as certain actual results for revenue passenger miles (RPMs), load factor and revenue per available seat mile (RASM), for its subsidiaries Alaska Airlines, Inc. and Horizon Air. Our disclosure of operating cost per available seat mile, excluding fuel and other noted items, provides us the ability to measure and monitor our performance without these items. The most directly comparable GAAP measure is total operating expense per available seat mile. However, due to the large fluctuations in fuel prices, we are unable to predict total operating expense for any future period with any degree of certainty. In addition, we believe the disclosure of fuel expense on an economic basis is useful to investors in evaluating our ongoing operational performance. Please see the cautionary statement under Forward-Looking Information.

In accordance with General Instruction B.2 of Form 8-K, the following information shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the Exchange Act ), nor shall such information be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, except as shall be expressly set forth by specific reference in such a filing. This report will not be deemed an admission as to the materiality of any information required to be disclosed solely to satisfy the requirements of Regulation FD.

**Capacity Purchase Arrangement**

On February 12, 2007, we furnished an 8-K describing Alaska's new capacity purchase arrangement with Horizon beginning January 1, 2007. As a result of this new agreement, Alaska will begin to report passenger revenue and associated costs related to certain flying provided by Horizon. This passenger revenue will be the actual amount collected from paying passengers. Horizon will also report revenue associated with this agreement, which will reflect the negotiated payment made by Alaska to Horizon for the specified flying. The amount paid to Horizon will be eliminated in the consolidation of Air Group financial statements.

The arrangement will impact the separately reported Alaska and Horizon financial and statistical information. Currently, we expect that Alaska will report a \$5 - \$6 million loss from regional flying arrangements for the first quarter of 2007. However, because of the seasonal variability of revenues, we currently expect the first-quarter loss from regional flying will represent approximately half to two-thirds of the anticipated full-year loss.

**Alaska Airlines**

The information for Alaska below reflects mainline information, which excludes contract flying provided by Horizon and contract flying between Anchorage and Dutch Harbor, AK provided by a third party. Additionally, as described in the February 12, 2007 Form 8-K, Alaska will reclassify the revenues and costs for prior periods that are associated with the Dutch Harbor flying. As a result of this reclassification, CASM excluding fuel and other noted items for the first quarter of 2006 that was originally reported as 7.97 cents will now be reported as 7.90 cents. Mainline total RASM that was originally reported as 10.65 cents will now be reported as 10.57 cents.

In January and February 2007, our mainline passenger RASM declined by 0.8% and 1.9%, respectively. The decrease is mainly due to a 2.5-point and a 2.9-point year-over-year decline in load factors for January and February, respectively, offset by increases in ticket yields of 2.8% in January and 2.1% in February. At this point, we expect our March load factor to be down 2 to 3 points compared to the prior year. Year-over-year mainline total RASM was up 1.3% in January, but down 0.8% in February.

Our forecast for first-quarter mainline unit costs at Alaska is as follows:

	Forecast		Change
<i>Mainline Statistics</i>	Q1 2007		Yr/Yr
Capacity (ASMs in millions)	5,692		3%
Fuel gallons (000,000)	84.4		
Cost per ASM as reported on a GAAP basis (cents)*	10.8	10.9	(15-16)%
Less: Fuel cost per ASM (cents)*	2.9		13%
<b>Cost per ASM excluding fuel (cents)*</b>	<b>7.9</b>	<b>8.0</b>	<b>0 - 1%</b>

\* For Alaska, our forecasts of mainline cost per ASM and fuel cost per ASM are based on forward-looking estimates, which will likely differ from actual results due to several factors including, but not limited to, the volatility of fuel prices. Fuel cost per ASM above includes our estimate of raw fuel cost for the quarter and the actual adjustments to our fuel-hedging portfolio in January and February. See page 6 for additional information regarding fuel costs.

Alaska's February mainline traffic decreased 0.8% to 1.25 billion RPMs from 1.26 billion flown a year earlier. Mainline capacity for February was 1.769 billion ASMs, 3.4% higher than the 1.711 billion in February 2006. The mainline passenger load factor (the percentage of available seats occupied by fare-paying passengers) for the month was 70.7%, compared to 73.6% in February 2006. The airline carried 1,197,800 passengers compared to 1,209,400 in February 2006.

#### Horizon Air

Year-over-year *total* RASM for Horizon was up 7.1% in January and 5.6% in February. The RASM improvement occurred both in the Native Network (which includes flying under the Capacity Purchase Arrangement (CPA) with Alaska) and the Frontier JetExpress flying. Native Network flying represented approximately 82% of Horizon's ASMs during the 2-month period.

The Native Network RASM increase was driven by higher yields, partially offset by a 1.3-point and a 2.8-point decline in load factors for January and February, respectively. The higher yields were due in large part to the impact of the CPA whereby the revenue recorded by Horizon under the agreement exceeded the actual passenger revenue recorded by Alaska (and would have been recorded by Horizon absent the Capacity Purchase Arrangement). Revenue recognized by Horizon under the Capacity Purchase Arrangement (CPA) will be eliminated on a consolidated basis.

Currently, we expect Horizon's system-wide year-over-year load factor for March to be down approximately 3 to 4 points.

**Horizon Air**

	Forecast Q1 2007	Change Yr/Yr
Capacity (ASMs in millions)	924	5%
Fuel gallons (000,000)	14.5	12%
Cost per ASM as reported on a GAAP basis (cents)*	18.6	12%
Less: Fuel cost per ASM (cents)*	3.1	29%
<b>Cost per ASM excluding fuel (cents)*</b>	<b>15.5</b>	<b>9%</b>

\* For Horizon, our forecasts of cost per ASM and fuel cost per ASM are based on forward-looking estimates, which will likely differ significantly from actual results. There are several factors impacting our estimates including, but not limited to, the volatility of fuel prices. Fuel cost per ASM above includes our estimate of raw fuel cost for the quarter and the actual adjustments to our fuel hedging portfolio in January and February. See page 6 for an additional information regarding fuel costs.

Horizon's cost per ASM includes the expected loss on the sublease of Q200 aircraft to a third party. We expect the loss will be approximately \$1.5 million per aircraft, which will be recorded when the aircraft leave our operating fleet. Currently, we expect to deliver two of the Q200s to the third party during the first quarter.

Horizon's February traffic increased 3.5% to 202.2 million RPMs from 195.3 million flown a year earlier. Capacity during February was 293.9 million ASMs, 7.6% higher than the 273.2 million in February 2006. The passenger load factor for the month was 68.8%, compared to 71.5% in February 2006. The airline carried 513,000 passengers compared to 502,400 in February 2006.

**Consolidated Air Group**

Based on our unit revenue performance for the first two months of 2007 and our expectation of March results, we expect to report a net loss for the first quarter of 2007.

**Other Financial Information***Liquidity and Capital Resources*

As of February 28, 2007, Air Group cash and short-term investments totaled approximately \$957 million.

*Fuel Hedging*

We are providing unaudited information about fuel price movements and the impact of our hedging program on our financial results. Management believes it is useful to compare results between periods on an economic basis. *Economic fuel expense* is defined as the raw or into-plane fuel cost less the cash we receive from hedge counterparties for hedges that settle during the period, offset by the premium expense that we recognize. A reconciliation of *economic fuel expense* to our *GAAP fuel expense* is presented below. *GAAP fuel expense* is defined as the raw fuel cost plus the effect of mark-to-market adjustments that we include in our income statement as the value of our fuel-hedging portfolio increases and decreases. A key difference between *GAAP fuel expense* and *economic fuel expense* is the timing of gain or loss recognition.

*Calculation of Economic Fuel Cost Per Gallon*

January and February 2007 (unaudited)	Alaska Airlines		Horizon Air	
	(\$ in millions)	Alaska Airlines Cost/Gal	(\$ in millions)	Horizon Air Cost/Gal
Raw or into-plane fuel cost	\$ 106.3	\$ 1.94	\$ 18.9	\$ 2.01
(Gains) or losses on settled hedges	(0.5)	(0.01)	(0.1)	(0.01)
<b>Economic fuel expense</b>	<b>\$ 105.8</b>	<b>\$ 1.93</b>	<b>\$ 18.8</b>	<b>\$ 2.00</b>
Adjustments to reflect timing of gain or loss recognition resulting from mark-to-market accounting	1.5	0.03	(0.4)	(0.04)
<b>GAAP fuel expense</b>	<b>\$ 107.3</b>	<b>\$ 1.96</b>	<b>\$ 18.4</b>	<b>\$ 1.96</b>

The majority of the Company's hedge instruments are call options. Call options are intended to effectively cap our pricing on the crude oil component of fuel prices. With call option contracts, we benefit from the decline in crude oil prices as there is no downward exposure other than the premiums we pay to enter into the contracts. These premiums are expensed when the contracts settle. Alaska Air Group's future hedge positions are as follows:

	Approximate % of Expected Fuel Requirements	Approximate Crude Oil Price per Barrel
First Quarter 2007	52%	\$ 58.78
Second Quarter 2007	53%	\$ 57.31
Third Quarter 2007	49%	\$ 56.98
Fourth Quarter 2007	41%	\$ 59.68
First Quarter 2008	34%	\$ 61.92
Second Quarter 2008	28%	\$ 63.53
Third Quarter 2008	14%	\$ 63.20
Fourth Quarter 2008	16%	\$ 63.56
First Quarter 2009	5%	\$ 67.68
Second Quarter 2009	5%	\$ 67.50

**Operating Fleet Plan**

The following table provides a fleet summary for Alaska and Horizon for actual airplanes on hand as of the date of this report.

Alaska Airlines	Seats	On Hand
		March 19, 2007
B737-200**	111	2
B737-400F**		1
B737-400C**	72	2
B737-400	144	37
B737-700	124	20
B737-800	157	18
B737-900	172	12
MD-80	140	21
Total		113

		<b>On Hand</b>
	<b>Seats</b>	<b>March 19, 2007</b>
<b>Horizon Air</b>		
Q200	37	26
Q400	74	25
CRJ 700	70	21
Total		72

Edgar Filing: ALASKA AIR GROUP INC - Form 8-K

The following table summarizes firm aircraft commitments for Alaska (B737-800) and Horizon (Q400) by year, excluding aircraft that have already been delivered in 2007.

	2007	2008	2009	2010	Thereafter	Total
B737-800	11	12	4	6	3	36
Q-400	9					9
<b>Totals</b>	<b>20</b>	<b>12</b>	<b>4</b>	<b>6</b>	<b>3</b>	<b>45</b>

In addition to the firm orders noted above, Alaska has options to acquire 24 additional B737-800s and purchase rights for 27 more. The company expects to exercise additional options and purchase rights on B737-800 order in the future as a result of acceleration of the retirement of its MD-80 fleet. Horizon has options to acquire 19 Q400s and 15 CRJ700s.

Giving consideration to the current fleet transition plan, the following table displays the currently anticipated fleet count for Alaska and Horizon as of the end of each quarter in 2007 and as of December 31, 2008:

	31-Mar-07	30-Jun-07	30-Sep-07	31-Dec-07	31-Dec-08
<b>Alaska Airlines</b>					
MD80	21	20	17	15	
737-400					
737-400F**	37	35	35	35	35
	1	1	1	1	1
737-400C**	2	4	4	4	4
737-700	20	20	20	20	20
737-800*	21	22	25	29	42
737-900	12	12	12	12	12
<b>Totals</b>	<b>114</b>	<b>114</b>	<b>114</b>	<b>116</b>	<b>114</b>
<b>Horizon Air</b>					
Q200	26	23	20	17	12
Q400	26	32	33	33	33
CRJ-700	21	20	20	20	20
	73	75	73	70	65

\* The total assumes Alaska will identify one airplane for delivery in 2008 for which the Company has not yet secured a delivery position.

\*\* F=Freighter; C=Combination freighter/passenger
