The Fund

The Fund is a non-diversified, closed-end management investment company whose objective is to seek long-term capital appreciation through investment in equity and equity-linked securities of Swiss companies. The Fund also may acquire and hold equity and equity-linked securities of non-Swiss companies in limited instances.

The Fund is listed on the New York Stock Exchange under the symbol "SWZ".

Net Asset Value is calculated daily by 6:15 P.M. (Eastern Time). The most recent calculation is available by calling 1-888-SWISS-00 or by accessing our Website. Net Asset Value is also published weekly in Barron's, the Monday edition of The Wall Street Journal and the Sunday Edition of The New York Times.

1

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders

GLOBAL OVERVIEW

After a strong start, most world equity markets went through a sudden correction at the end of February. The two triggers for that correction included the fear of a sharp decrease in U.S. real estate prices (brought on by reports showing increased stress in the sub-prime market) and a severe drop in Chinese indexes after official comments about a bubble in financial assets.

Market volatility increased significantly over a very short period of time, very similar to what occurred in March 2006. After reassuring comments from the Chairman of the Federal Reserve about the strength of the economy and continued

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

good corporate earnings reports, the markets returned to and then exceeded their prior levels. Despite increases in short-term interest rates by many central banks across the globe, liquidity continued to be created at a fast pace. This was partly due to the unabated accumulation of foreign currency reserves by the central banks of the emerging market countries. In particular the current accounts of commodity and energy producers such as the OPEC countries, Russia and Brazil have been steadily increasing since 2004. The U.S. trade deficit and the increase in private household, corporate and public sector savings in the emerging markets were contributing factors as well.

In addition to the increase in liquidity, investment in equities has continued to benefit from a positive backdrop. With increases in productivity that exceed labor costs in China and Europe, there are very few indications of inflation outside of the food, raw materials and energy sectors. In addition, world economic growth is still forecasted to be around 5% this year despite the slowdown in the U.S. economy.

SWISS ECONOMIC NOTES

The Swiss National Bank ("SNB"), continuing its policy of interest rate normalization, raised the target range for the three-month Libor by 0.25% to 1.75%-2.75% on March 15, 2007. The drop in oil prices in the second half of 2006 should hold back inflation until the middle of 2007 with inflation projected to be 0.5% in 2007, 1.4% in 2008 and 1.6% in 2009. There is a debate over the extent of the SNB's concern about possible pressure on the Swiss franc and, therefore, when there will be a convergence in Swiss and European interest rates. The Swiss franc's depreciation against the Euro accelerated to 3% during the first quarter of 2007.

Nevertheless, the Swiss franc continues to be strong versus the U.S. dollar. Year-over-year the Swiss franc increased by around 7% against the U.S. dollar but during the first quarter, the above mentioned currencies were stable against each other mainly due to the Fed decision to leave interest rates unchanged. With the Fed being still concerned about inflation, the much talked about potential cut in interest rates seems to have been pushed off, leaving the U.S. dollar likely to remain relatively stable for now.

2

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (continued)

Swiss exports have benefited from the strength of the Euro, especially since Euroland, mainly Germany is Switzerland's biggest trading partner. The SNB continues to forecast a healthy economic situation for 2007 with real growth of 2% for the year, helped by Germany's economic development which has seen strong acceleration.

The unemployment rate in Switzerland reached a four year low of 3% at the end of the quarter.

The yield on the 10 year confederation bond increased from 2.5% to 2.7% at the end of the quarter. The yield curve, following higher short-term rates has not flattened, with the exception of medium-term maturities, as economic activity continues to be very strong.

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

SWISS MARKET REVIEW AND FUND PERFORMANCE

The Swiss market has been strong since the beginning of the year. Financial services and capital goods have done particularly well, as can be expected in an atmosphere of strong capital market performance driven by a low premium for risk and vibrant exports. The utility sector has been a notable laggard on the back of weak quarterly results mainly due to lower margins caused by pressure on wholesale prices of electricity. In addition, the market has become more circumspect in light of an approaching period of large investments which are susceptible to significant changes arising from governmental decisions. Utility company assets, however, are very valuable due to their peak load production capacity (hydro-power) and their lack of CO₂ emissions (hydro and nuclear power). Their medium-term prospects are very good as Switzerland is expected to need additional production of capacity in the next seven years.

The industrial sector also benefited from the seemingly unstoppable merger and acquisition rumors and activity from large investors and private equity funds. Since this sector is very rich in high quality companies with international footholds, companies which at the same time could benefit from an increase in scale, support from merger and acquisition speculation will likely continue.

Real estate companies were, for the most part, in a consolidation mode during the quarter despite apparent under-valuation of their commercial assets. In that respect, the case of Jelmoli, a company in retail and substantial commercial real estate properties, is interesting. Subsequent to a January announcement from its board of directors that the company's real estate assets could be spun-off, the stock had increased by more than 50% by the end of March.

Among the large caps, Nestle, Holcim and Swatch Group performed the best. Their strong emerging market exposure and strong pricing power contributed to very good earnings. Nestle has benefited from its efforts over the years to transform the company's main products from food to higher value added nutrition products, a shift which allowed it to increase prices to compensate for the hike in raw material costs.

3

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (continued)

Swatch is moving up the ladder from a company producing a mix of industrial and luxury goods, to a company that produces almost all luxury goods. It has been able to increase the value of its main brands and has benefited from improvement in profitability in its industrial division. As the biggest producer of mechanical movements, with, in fact, a quasi monopoly, Swatch is reaping the fruits of the tight supply of movements in the watch industry.

The Fund has a large exposure to mid-size bio-pharmaceutical companies and utilities. The former sector helped the Fund to outperform its benchmark, the Swiss Performance Index ("SPI") by 1.87% in Swiss francs and in U.S. dollar terms. On the other hand, the Fund's relatively low exposure to mid and small cap industrial companies has somewhat hampered its performance. Management, however, is looking to increase its exposure to the mid- and small- cap sector, especially to companies that benefit from the structural growth of environmental technologies.

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

The Fund drew on its credit line in the amount of 48 million Swiss francs to help finance the payment of its distribution to stockholders in January, since all of its cash had been reinvested. During the first two months of the year the amount of the loan was reduced to 22 million Swiss francs through the orderly sale of some portfolio positions. It is currently at 5 million Swiss francs.

SWISS INDEX COMPOSITION CHANGES

On January 5/th/ 2007, The Swiss Stock exchange ("SWX") announced significant changes to the SPI and Swiss Market Index ("SMI") component stocks. The first important change was to reduce the number of stocks in the SMI index, from 25 to 20, bringing it in line with other top international indices. The SMI Mid-Cap Index ("SMIM") will be expanded by including some of the stocks removed from the SMI. Smaller securities in the SMI will therefore gain importance by having a stronger weighting in the SMIM. The SMIM will be comprised of a fixed number of 30 securities.

The next important change was the launch of a capped equity index for the 30 largest Swiss securities. It will be comprised of the 20 securities from the restructured SMI and the 10 largest securities of the SMIM (according to the rankings as of June 30, 2007). The maximum weighting of each of the four largest securities in the index (Nestle, Novartis, Roche, and UBS) will each comprise only 9% of the index. The SWX said that the reasons for this new index were to improve risk diversification, allow the sale of options and futures at Eurex USA and increase the liquidity of the basket companies, because the new index will meet the provisions of Swiss, European and U.S. laws. Prior to this change, U.S. regulatory restrictions prevented institutional investors from trading SMI index products because the weighting of the four biggest companies exceeded 40%. This index should attract foreign investors.

OUTLOOK

Increases in raw material costs will have to be offset by productivity improvements and by the ability to pass the increases on to customers, an action that requires a strong market position (brand name and market share). Otherwise, margins will be under pressure. Management will therefore emphasize analysis of competitive advantage and pricing power in its stock selection. The Fund is expected to be more oriented toward underappreciated growth companies that play a critical role in solving the challenges of today's society. Such companies can be found in healthcare, clean energy supply, energy savings, and conservation of water. All companies in all sectors can contribute to overall environmental protection and such contribution should pay off in terms of better innovation rates, improved efficiencies and better relationships with regulators. Exposure to emerging markets countries will continue to be very important as a source of growth. Even if the Chinese government implemented measures in an effort to slow down its economy, its rate of GDP growth will not likely be much lower than 9%. This rate of growth will continue to benefit its neighboring Asian countries and Europe. Despite the slowdown in the U.S. and the reduction in domestic construction activity due to the high level of mortgage debt and high home ownership, Management expects relatively strong activity on the back of strong exports and higher real wage growth.

STOCK REPURCHASE PROGRAM

Pursuant to authorization by the Board, the Fund began open market purchases of its common stock on the New York Stock Exchange ("NYSE") in 1999

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

and has continued purchases in each subsequent year. The principal purpose of the stock repurchase program is to enhance stockholder value by increasing the Fund's net asset value per share without creating a meaningful adverse effect upon the Fund's expense ratio. The

6

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (concluded)

Board has authorized the Fund to repurchase up to 500,000 shares during 2007.

SUBSEQUENT EVENTS

The Fund's Board of Directors has authorized the Fund to issue transferable rights to stockholders of record as of the close of business on May 24, 2007, entitling the holders of those rights to subscribe for up to an aggregate of 8,149,552 shares of the Fund's common stock. Record date stockholders will receive one right for each outstanding whole share of common stock held on that date. The rights entitle their holders to purchase one new share of common stock for every three rights held (1-for-3). The offering will be made only by means of a prospectus. Before investing in the Fund, investors should carefully consider the investment objective, strategies, risks, and charges and expenses of the Fund. This information, and other information about the Fund, can be found in the Fund's prospectus. An investor should carefully read the Fund's prospectus before investing. For more information or a copy of the Fund's prospectus, please call Georgeson, Inc., the Information Agent for the offering, at 1-800-561-3947.

THE SWISS HELVETIA FUND, INC.

Dividend Reinvestment Plan (Unaudited)

The Plan

The Fund's Dividend Reinvestment Plan (the "Plan") offers a convenient way for

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

you to reinvest capital gains distributions and ordinary income dividends, payable in whole or in part in cash, in additional shares of the Fund.

Some of the Plan features are:

- . Once you enroll in the Plan, all of your future distributions and dividends payable in whole or in part in cash will be automatically reinvested in Fund shares in accordance with the terms of the Plan.
- . You will receive shares valued at the lower of the Fund's net asset value or the Fund's market price as described below. The entire amount of your distribution or dividend will be reinvested automatically in additional Fund shares. For any balance that is insufficient to purchase full shares of the Fund, your account will be credited with fractional shares.
- . Your shares will be held in an account with the Plan agent. You will be sent regular statements for your records.
- . You may terminate participation in the Plan at any time.

The following are answers to frequently asked questions about the Plan.

How do I enroll in the Plan?

If you are holding certificates for your shares, contact American Stock Transfer & Trust Company (AST) at the address shown below. If your shares are held in a brokerage account, contact your broker. Not all brokerage firms permit their clients to participate in dividend reinvestment plans such as the Plan and, even if your brokerage firm does permit participation, you may not be able to transfer your Plan shares to another broker who does not permit participation. Your brokerage firm will be able to advise you about its policies.

How does the Plan work?

The cash portion of any dividends or distributions you receive, payable in whole or in part in cash, will be reinvested in shares of the Fund. The number of shares credited to your Plan account as a result of the reinvestment will depend upon the relationship between the Fund's market price and its net asset value per share on the record date of the distribution or dividend, as described below:

- . If the net asset value is greater than the market price (the Fund is trading at a discount), AST, as Plan Agent, will buy Fund shares for your account on the open market on the New York Stock Exchange or elsewhere. Your dividends or distributions will be reinvested at the average price AST pays for those purchases.
- . If the net asset value is equal to the market price (the Fund is trading at parity), the Fund will issue for your account new shares at net asset value.
- . If the net asset value is less than but within 95% of the market price (the Fund is trading at a premium of less than 5%), the Fund will issue for your account new shares at net asset value.
- . If the net asset value is less than 95% of the market price (the Fund is trading at a premium of 5% or more), the Fund will issue for your account new shares at 95% of the market price.

If AST begins to buy Fund shares for your account at a discount to net asset value but, during the course of the purchases, the Fund's market price increases to a level above the net asset value, AST will complete its purchases, even

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

THE SWISS HELVETIA FUND, INC.

Dividend Reinvestment Plan (Unaudited) (concluded)

though the result may be that the average price paid for the purchases exceeds net asset value.

Will the entire amount of my distribution or dividend be reinvested?

The entire amount of your distribution or dividend, payable in cash, will be reinvested in additional Fund shares. If a balance remains after the purchase of whole shares, your account will be credited with any fractional shares (rounded to three decimal places) necessary to complete the reinvestment.

How can I sell my shares?

You can sell any or all of the shares in your Plan account by contacting AST. AST charges \$15 for the transaction plus \$.10 per share for this service. You can also withdraw your shares from your Plan account and sell them through your broker.

Does participation in the Plan change the tax status of my distributions or dividends?

No. The distributions and dividends are paid in cash and their taxability is the same as if you received the cash. It is only after the payment of distributions and dividends that AST reinvests the cash for your account.

Can I get certificates for the shares in the Plan?

AST will issue certificates for whole shares upon your request. Certificates for fractional shares will not be issued.

Is there any charge to participate in the Plan?

There is no charge to participate in the Plan. You will, however, pay a pro rata share of brokerage commissions incurred with respect to AST's open market purchases of shares for your Plan account.

How can I discontinue my participation in the Plan?

Contact your broker or AST in writing. If your shares are in a Plan account, AST will send you a certificate for your whole shares and a check for any fractional shares.

Where can I direct my questions and correspondence?

Contact your broker, or contact AST as follows:

By mail:

American Stock Transfer & Trust Company
PO Box 922
Wall Street Station
New York, NY 10269-0560

Through the Internet:

www.amstock.com

Through AST's automated voice response system:

1-888-556-0425

AST will furnish you with a copy of the Terms and Conditions of the Plan without charge.
