Identification No.)

803 Main Street, Willimantic, Connecticut
(Address of principal executive offices)

06226
(Zip Code)

(860) 423-4581

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of Exchange on which registered
Common stock, par value \$0.01 per share	Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer
Non-Accelerated Filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.) Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates was \$55.7 million, which was computed by reference to the closing price of \$11.31, at which the common equity was sold as of June 30, 2007. Solely for the purposes of this calculation, the shares held by SI Bancorp, MHC and the directors and officers of the registrant are deemed to be affiliates.

As of March 14, 2008, there were 11,891,600 shares of the registrant's common stock outstanding.

Forward-Looking Statements

This report may contain certain forward-looking statements within the meaning of the federal securities laws, which are made in good faith pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not historical facts; rather, they are statements based on management's current expectations regarding our business strategies, intended results and future performance. Forward-looking statements are generally preceded by terms such as expects, believes, anticipates, intends, estimates, projects and similar expressions. Management's ability to predict results of the effect of future plans or strategies is inherently uncertain. Factors that could have a material adverse effect on the operations of SI Financial Group, Inc. (the Company) and its subsidiaries include, but are not limited to, changes in interest rates, national and regional economic conditions, legislative and regulatory changes, monetary and fiscal policies of the United States government, including policies of the United States Treasury and the Federal Reserve Board, the quality and composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the Company's market area, changes in real estate market values in the Company's market area and changes in relevant accounting principles and guidelines. Additional factors that may affect the Company's results are discussed in Item 1A. Risk Factors in the Company's annual report on Form 10-K and in other reports filed with the Securities and Exchange Commission. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Except as required by applicable law or regulation, the Company does not undertake, and specifically disclaims any obligation, to release publicly the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of the statements or to reflect the occurrence of anticipated or unanticipated events.

PART I.

Item 1. Business.

General

In certain instances where appropriate, the terms we, us and our refer to SI Financial Group, Inc. and Savings Institute Bank and Trust Company or both.

SI Financial Group, Inc. was established on August 6, 2004 to become the parent holding company for Savings Institute Bank and Trust Company (the Bank or Savings Institute) upon the conversion of the Bank's former parent, SI Bancorp, Inc., from a state-chartered to a federally-chartered mutual holding company. At the same time, the Bank also converted from a state-chartered to a federally-chartered savings bank. On September 30, 2004, the Company completed its minority stock offering with the sale of 5,025,500 shares of its common stock to the public, 251,275 shares contributed to SI Financial Group Foundation and 7,286,975 issued to SI Bancorp, MHC. The Bank is a wholly-owned subsidiary of the Company and management of the Company and the Bank are substantially similar. The Company neither owns nor leases any property, but instead uses the premises, equipment and other property of the Bank. Thus, the financial information and discussion contained herein primarily relates to the activities of the Bank.

The Bank operates as a community-oriented financial institution offering a full range of financial services to consumers and businesses in its market area, including insurance, trust and investment services. The Bank attracts deposits from the general public and uses those funds to originate one- to four-family residential, multi-family and commercial real estate, commercial business and consumer loans, which it holds primarily for investment.

Table of Contents

Branch Acquisitions

On January 14, 2008, the Company completed its acquisition of Eastern Federal Bank's branch office located in Colchester, Connecticut, which was announced in October 2007. In accordance with Financial Accounting Standards Board No. 141, *Business Combinations* the Company accounted for the branch acquisition as a purchase in January 2008. The Company acquired assets, including cash, loans and fixed assets totaling \$423,000 and assumed deposit liabilities of \$18.4 million.

On November 14, 2007, the Company reached an agreement with The Bank of Southern Connecticut to acquire their New London branch office. The Company completed the acquisition, which was accounted for as a purchase, during the first quarter of 2008. The Company acquired assets, including cash, loans and fixed assets, aggregating \$8.0 million and assumed deposit liabilities totaling \$9.3 million.

Availability of Information

The Company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, are made available free of charge on the Company's website, www.mysifi.com, as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the Securities and Exchange Commission (the "SEC"). The information on the Company's website shall not be considered as incorporated by reference into this Form 10-K.

Market Area

The Company is headquartered in Willimantic, Connecticut, which is located in eastern Connecticut approximately 30 miles east of Hartford. The Bank operates offices in Windham, New London, Tolland and Hartford Counties, which the Bank considers its primary market area. The economy in its market area is primarily oriented to the educational, service, entertainment, manufacturing and retail industries.

The major employers in the area include several institutions of higher education, the Mohegan Sun and Foxwoods casinos, General Dynamics Defense Systems and Pfizer, Inc. According to published statistics, Windham County's population in 2007 was 118,000 and consisted of 43,000 households. The population increased 8.6% from 2000. Median household income in Windham County is \$54,000, compared to \$66,000 for Connecticut as a whole and \$44,000 nationally. The surrounding counties of Hartford, New London and Tolland Counties have median household incomes of \$61,000, \$61,000 and \$72,000, respectively.

Competition

The Bank faces significant competition for the attraction of deposits and origination of loans. The most direct competition for deposits has historically come from the several financial institutions operating in the Bank's market area and, to a lesser extent, from other financial service companies, such as brokerage firms, credit unions and insurance companies. The Bank also faces competition for investors' funds from money market funds and other corporate and government securities. At June 30, 2007, which is the most recent date for which data is available from the Federal Deposit Insurance Corporation ("FDIC"), the Bank held approximately 19.38% of the deposits in Windham County, which is the largest market share out of 10 financial institutions with offices in this county. Also, at June 30, 2007, the Bank held approximately 0.97% of the deposits in Hartford, New London and Tolland Counties, which is the 15th market share out of 38 financial institutions with offices in these counties. Banks owned by Bank of America Corp., Webster Bank Financial Corporation, TD Banknorth Group, Inc., Sovereign Bancorp., Inc. and Citizens Financial Group, Inc., all of which are large regional bank holding companies, also operate

Table of Contents

in the Bank's market area. These institutions are significantly larger and, therefore, have significantly greater resources than the Bank does and may offer products and services that the Bank does not provide.

The Bank's competition for loans comes primarily from financial institutions in its market area, and to a lesser extent from other financial service providers, such as mortgage companies and mortgage brokers. Competition for loans also comes from the increasing number of non-depository financial service companies entering the mortgage market, such as insurance companies, securities companies and specialty finance companies.

The Bank expects competition to increase in the future as a result of legislative, regulatory and technological changes and the continuing trend of consolidation in the financial services industry. Technological advances, for example, have lowered barriers to entry, allowed banks to expand their geographic reach by providing services over the Internet and made it possible for non-depository institutions to offer products and services that traditionally have been provided by banks. Changes in federal law permit affiliation among banks, securities firms and insurance companies, which promotes a competitive environment in the financial services industry. Competition for deposits and the origination of loans could limit the Company's growth in the future.

Lending Activities

General. The Bank's loan portfolio consists primarily of one- to four-family residential mortgage loans, multi-family and commercial real estate loans and commercial business loans. To a much lesser extent, the loan portfolio includes construction and consumer loans. The Bank historically and currently originates loans primarily for investment purposes. At December 31, 2007, the Bank had \$410,000 in loans that were held for sale.

The following table summarizes the composition of the Bank's loan portfolio in dollar amounts and as a percentage of the respective portfolio at the dates indicated.

<i>(Dollars in Thousands)</i>	2007		2006		At December 31, 2005		2004		2003

Table of Contents

One- to Four-Family Residential Loans. The Bank's primary lending activity is the origination of mortgage loans to enable borrowers to purchase or refinance existing homes or to construct new residential dwellings in its market area. The Bank offers fixed-rate and adjustable-rate mortgage loans with terms up to 40 years. Borrower demand for adjustable-rate loans versus fixed-rate loans is a function of the level of interest rates, the expectations of changes in the level of interest rates, the difference between the interest rates and loan fees offered for fixed-rate mortgage loans and the initial period interest rates and loan fees for adjustable-rate loans. The relative amount of fixed-rate mortgage loans and adjustable-rate mortgage loans that can be originated at any time is largely determined by the demand for each in a competitive environment and the effect each has on the Bank's interest rate risk. The loan fees charged, interest rates and other provisions of mortgage loans are determined on the basis of the Bank's own pricing criteria and competitive market conditions. Additionally, the Bank offers reverse mortgages to its customers, through a correspondent relationship with another institution, in response to increasing demand for this type of product.

The Bank offers fixed-rate loans with terms of 10, 15, 20, 30 or 40 years. The Bank's adjustable-rate mortgage loans are based primarily on 30 year amortization schedules. Interest rates and payments on adjustable-rate mortgage loans adjust annually after a one, three, five, seven or ten-year initial fixed period. Interest rates and payments on adjustable-rate loans are adjusted to a rate typically equal to 2.75% (2.875% for jumbo loans) above the one-year constant maturity Treasury index. The maximum amount by which the interest rate may be increased or decreased is generally 2% per adjustment period and the lifetime interest rate cap is generally 6% over the initial interest rate of the loan.

While the Bank anticipates that adjustable-rate loans will better offset the adverse effects of an increase in interest rates as compared to fixed-rate mortgages, the increased mortgage payments required of adjustable-rate loan borrowers in a rising interest rate environment could cause an increase in delinquencies and defaults. The marketability of the underlying property also may be adversely affected in a high interest rate environment. In addition, although adjustable-rate mortgage loans help make the Bank's asset base more responsive to changes in interest rates, the extent of this interest sensitivity is limited by the annual and lifetime interest rate adjustment limits.

Generally, the Bank does not originate conventional loans with loan-to-value ratios exceeding 95% and generally originates loans with a loan-to-value ratio in excess of 80% only when secured by first liens on owner-occupied one- to four-family residences. Loans with loan-to-value ratios in excess of 80% generally require private mortgage insurance or additional collateral. The Bank requires all properties securing mortgage loans to be appraised by a board approved independent licensed appraiser and requires title insurance on all first mortgage loans. Borrowers must obtain hazard insurance and flood insurance for loans on property located in a flood zone, before closing the loan.

In an effort to provide financing for moderate income and first-time buyers, the Bank offers Federal Housing Authority, Veterans Administration and Connecticut Housing Finance Agency loans and a first-time home buyers program. The Bank offers fixed-rate residential mortgage loans through these programs to qualified individuals and originates the loans using modified underwriting guidelines.

Multi-Family and Commercial Real Estate Loans. The Bank offers fixed-rate and adjustable-rate mortgage loans secured by multi-family and commercial real estate. The Bank's multi-family and commercial real estate loans are generally secured by condominiums, apartment buildings, single-family subdivisions as well as owner-occupied properties located in its market area and used for businesses. The Bank intends to continue to emphasize this segment of its loan portfolio.

The Bank originates adjustable-rate multi-family and commercial real estate loans for terms up to 25 years. Interest rates and payments on these loans typically adjust every five years after a five-year initial fixed-rate period. Interest rates and payments on adjustable-rate loans are adjusted to a rate typically

Table of Contents

2.0-3.0% above the classic advance rates offered by the Federal Home Loan Bank of Boston (the "FHLB"). There are no adjustment period or lifetime interest rate caps. Loans are secured by first mortgages that generally do not exceed 75% of the property's appraised value. At December 31, 2007, the largest outstanding multi-family or commercial real estate loan was \$4.2 million. This loan is secured by office space and storage units and was performing according to its terms at December 31, 2007.

Loans secured by multi-family and commercial real estate generally have larger balances and involve a greater degree of risk than one- to four-family residential mortgage loans. Of primary concern in multi-family and commercial real estate lending is the borrower's creditworthiness and the feasibility and cash flow potential of the project. Payments on loans secured by income properties often depend on successful operation and management of the properties. As a result, repayment of such loans may be subject, to a greater extent than residential real estate loans, to adverse conditions in the real estate market or the economy. To monitor cash flows on income properties, the Bank requires borrowers and loan guarantors, if any, to provide annual financial statements on multi-family and commercial real estate loans. In reaching a decision on whether to make a multi-family or commercial real estate loan, consideration is given to the net operating income of the property, the borrower's expertise, credit history and profitability and the value of the underlying property. In addition, with respect to commercial real estate rental properties, the Bank will also consider the term of the lease and the quality of the tenants. The Bank generally requires that the properties securing these real estate loans have debt service coverage ratios of at least 1.20. The debt service coverage ratio is equal to cash flows before interest, depreciation and required principal payments. Appropriate environmental assessments are generally required for commercial real estate loans over \$100,000, based upon the environmental risk factors for the subject collateral property.

Construction and Land Loans. The Bank originates loans to individuals, and to a lesser extent, builders, to finance the construction of residential dwellings. The Bank also originates construction loans for commercial development projects, including condominiums, apartment buildings, single-family subdivisions as well as owner-occupied properties used for businesses. Residential construction loans generally provide for the payment of interest only during the construction phase, which is usually twelve months. At the end of the construction phase, the loan generally converts to a permanent mortgage loan. Commercial construction loans generally provide for the payment of interest only during the construction phase which may range from three months to a maximum of twenty-four months as allowed by the Bank's Loan Policy. Loans generally can be made with a maximum loan-to-value ratio of 90% on residential construction and 75% on commercial construction for nonresidential properties and 80% on commercial multi-family construction of the lower of appraised value or cost of the project, whichever is less. At December 31, 2007, the largest outstanding residential construction loan commitment was for \$580,000, of which \$554,000 was outstanding. At December 31, 2007, the largest outstanding commercial construction loan commitment, for the construction of a nursing home and rehabilitation facility, was \$7.3 million, of which all was outstanding. These loans were performing according to their terms at December 31, 2007. Primarily all commitments to fund construction loans require an appraisal of the property by a board approved independent licensed appraiser. Also, inspections of the property are required before the disbursement of funds during the term of the construction loan.

Construction financing is generally considered to involve a higher degree of risk of loss than long-term financing on improved, occupied real estate. Risk of loss on a construction loan depends largely upon the accuracy of the initial estimate of the property's value at completion of construction or development and the estimated cost, including interest, of construction. During the construction phase, a number of factors could result in delays and cost overruns. If the estimate of construction costs proves to be inaccurate, we may be required to advance funds beyond the amount originally committed to permit completion of the development. If the estimate of value proves to be inaccurate, the Bank may be confronted, at or before the maturity of the loan, with a project having a value which is insufficient to assure full repayment. As a result of the foregoing, construction lending often involves the disbursement of substantial funds with

Table of Contents

repayment dependent, in part, on the success of the ultimate project rather than the ability of the borrower or guarantor to repay principal and interest. If the Bank is forced to foreclose on a project before or at completion due to a default, there can be no assurance that the Bank will be able to recover all of the unpaid balance of, and accrued interest on, the loan as well as related foreclosure and holding costs.

The Bank also originates land loans to individuals and local contractors and developers only for the purpose of making improvements on approved building lots, subdivisions and condominium projects within two years of the date of the loan. Such loans to individuals generally are written with a maximum loan-to-value ratio based upon the appraised value or purchase price of the land. Maximum loan-to-value ratio on raw land is 50%, while the maximum loan-to-value ratio for land development loans involving approved projects is 65%. The Bank offers fixed-rate land loans and variable-rate land loans that adjust annually. Interest rates and payments on adjustable-rate land loans are adjusted to a rate typically equal to the then current *The Wall Street Journal* prime rate plus a 1.0 - 2.0% margin. The maximum amount by which the interest rate may be increased or decreased is generally 2% annually and the lifetime interest rate cap is generally 6% over the initial rate of the loan.

Commercial Business Loans. The Bank originates commercial business loans to a variety of professionals, sole proprietorships and small businesses primarily in its market area. The Bank offers a variety of commercial lending products, the maximum amount of which is limited by the Bank's in-house loans to one borrower limit. At December 31, 2007, the largest commercial loan was a \$1.4 million loan, which is secured by a business asset consisting of a waste processing system. This loan was performing according to its terms at December 31, 2007.

The Bank offers loans secured by business assets other than real estate, such as business equipment and inventory. These loans are originated with maximum loan-to-value ratios of 75% of the value of the personal property. The Bank originates lines of credit to finance the working capital needs of businesses to be repaid by seasonal cash flows or to provide a period of time during which the business can borrow funds for planned equipment purchases. These loans convert to a term loan at the expiration of a draw period, which is not to exceed twelve months and will be paid over a pre-defined amortization period. Additional products such as time notes, letters of credit and Small Business Administration guaranteed loans are offered.

When originating commercial business loans, the Bank considers the financial statements of the borrower, the borrower's payment history of both corporate and personal debt, the debt service capabilities of the borrower, the projected cash flows of the business, viability of the industry in which the customer operates and the value of the collateral.

Unlike residential mortgage loans, which generally are made on the basis of the borrower's ability to make repayment from his or her employment or other income, and which are secured by real property whose value tends to be more easily ascertainable, commercial loans are of higher risk and typically are made on the basis of the borrower's ability to make repayment from the cash flow of the borrower's business. As a result, the availability of funds for the repayment of commercial loans may depend substantially on the success of the business itself. Further, any collateral securing such loans may depreciate over time, may be difficult to appraise and may fluctuate in value.

The Bank offers equipment lease financing to its commercial customers. Financing is available up to 100% of the leased equipment and amortized over a period of one to three years. All commercial leasing loans, totaling \$561,000, were performing according to terms at December 31, 2007.

Consumer Loans. The Bank offers a variety of consumer loans, primarily home equity lines of credit, and, to a lesser extent, loans secured by marketable securities, passbook or certificate accounts, motorcycles,

Table of Contents

automobiles and recreational vehicles as well as unsecured loans. Generally, the Bank offers automobile loans with a maximum loan-to-value ratio of 100% of the purchase price for new vehicles. Unsecured loans generally have a maximum borrowing limit of \$15,000 and a maximum term of five years.

In February 2006, the Bank purchased a participation interest in a pool of automobile loans from UnitedOne Credit Union, which were serviced by Flatiron Financial Services, Inc. (formerly Centrix Financial, LLC), for a total purchase price of \$10.3 million. These loans were secured by new and used automobiles. The indirect automobile loans had fixed interest rates and generally had terms up to seven years. In June 2007, the Company sold the remaining \$5.2 million of the indirect automobile loan portfolio in accordance with the recourse provisions of the original purchase agreement.

The procedures for underwriting consumer loans include an assessment of the applicant's payment history on other debts and their ability to meet existing obligations and payments on the proposed loans. Although the applicant's creditworthiness is a primary consideration, the underwriting process also includes a comparison of the value of the collateral, if any, to the proposed loan amount. Home equity lines of credit have adjustable rates of interest that are indexed to the prime rate as reported in *The Wall Street Journal*. The Bank will offer home equity loans with maximum combined loan-to-value ratio of 100%, provided that loans in excess of 80% will be charged a higher rate of interest and require private mortgage insurance. A home equity line of credit may be drawn down by the borrower for an initial period of five years from the date of the loan agreement. During this period, the borrower has the option of paying, on a monthly basis, either principal and interest or only interest. If not renewed, the borrower has to pay back the amount outstanding under the line of credit over a term not to exceed ten years, beginning at the end of the five-year period.

Consumer loans may entail greater risk than do residential mortgage loans, particularly in the case of consumer loans that are unsecured or secured by assets that depreciate rapidly. In such cases, repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment for the outstanding loan and the remaining deficiency often does not warrant further substantial collection efforts against the borrower. In addition, consumer loan collections depend on the borrower's continuing financial stability, and therefore, are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Furthermore, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans.

Loan Originations, Purchases, Sales and Servicing. Loan originations come from a number of sources. The primary source of loan originations are the Bank's in-house loan originators, and to a lesser extent, local mortgage brokers, advertising and referrals from customers.

From time to time, the Bank will purchase whole participations in loans fully guaranteed by the United States Department of Agriculture and the Small Business Administration. The loans are primarily for commercial and agricultural properties located throughout the United States. The Bank purchased no loans during 2007 and \$675,000 of these loans in fiscal 2006. Additionally, the Bank purchased no indirect automobile loans during 2007 and \$10.3 million of indirect automobile loans in 2006.

The Bank generally originates loans for portfolio but from time to time will sell loans in the secondary market, primarily fixed-rate one- to four-family residential mortgage loans with servicing retained, based on prevailing market interest rate conditions, an analysis of the composition and risk of the loan portfolio, liquidity needs and interest rate risk management. Generally, loans are sold without recourse. The Bank utilizes the proceeds from these sales primarily to meet liquidity needs. Proceeds from the sale of loans totaled \$13.8 million and \$11.0 million for the years ended December 31, 2007 and 2006, respectively.

Table of Contents

At December 31, 2007, the Bank retained the servicing rights on \$75.7 million of loans for others, consisting primarily of fixed-rate mortgage loans sold with or without recourse to third parties. Loan repurchase commitments are agreements to repurchase loans previously sold upon the occurrence of conditions established in the contract, including default by the underlying borrower. At December 31, 2007, the balance of loans sold with recourse totaled \$52,000. Loan servicing includes collecting and remitting loan payments, accounting for principal and interest, contacting delinquent mortgagors, processing insurance and tax payments on behalf of borrowers, assisting in foreclosures and property dispositions when necessary and general administration of loans. The gross servicing fee income from loans sold with servicing rights retained is typically 25.0 or 37.5 basis points of the total balance of serviced loans. The related servicing rights for these loans was \$422,000 and \$392,000 at December 31, 2007 and 2006, respectively. Amortization of mortgage servicing rights totaled \$94,000 and \$78,000 for the years ended December 31, 2007 and 2006, respectively.

The following table sets forth the Bank's loan originations, loan purchases, loan sales, principal repayments, charge-offs and other reductions on loans for the years indicated.

<i>(Dollars in Thousands)</i>	Years Ended December 31,		
	2007	2006	2005
Loans at beginning of year	\$ 577,218	\$ 516,398	\$ 450,414
Originations:

Loans at end of year	\$ 591,393	\$ 577,218	\$ 516,398

Table of Contents

Loan Maturity. The following table shows the contractual maturity of the Bank's loan portfolio at December 31, 2007. The table does not reflect any estimate of prepayments, which significantly shortens the average life of all loans, and may cause actual repayment experience to differ from that shown below. Demand loans having no stated schedule of repayment and no stated maturity are reported as due in one year or less.

<i>(Dollars in Thousands)</i>	Amounts Due In			Total Amount Due
	One Year or Less	More Than One Year to Five Years	More Than Five Years	
Real estate loans:				
Residential 1 to 4 family	\$ 87	\$ 5,737	\$ 324,565	\$ 330,389
Multi-family and commercial	2,395	5,305	125,119	132,819
Construction	10,831	1,007	25,393	37,231
Total real estate loans	13,313	12,049	475,077	500,439
Commercial business loans	9,208	6,751	53,891	69,850
Consumer loans	187	1,703	19,214	21,104
Total loans	\$ 22,708	\$ 20,503	\$ 548,182	\$ 591,393

While one- to four-family residential real estate loans are normally originated with terms of up to 40 years, such loans typically remain outstanding for substantially shorter periods because borrowers often prepay their loans in full upon the sale of the property pledged as security or upon refinancing the original loan. Therefore, average loan maturity is a function of, among other factors, the level of purchase, sale and refinancing activity in the real estate market, prevailing interest rates and the interest rates payable on outstanding loans.

The following table sets forth, at December 31, 2007, the dollar amount of gross loans receivable contractually due after December 31, 2008, and whether such loans have either fixed interest rates, floating or adjustable interest rates. The amounts shown below exclude deferred loan fees and costs and the allowance for loan losses but include \$7.6 million of nonperforming loans.

<i>(Dollars in Thousands)</i>	Due After December 31, 2008		
	Fixed Rates	Floating or Adjustable Rates	Total
Real estate loans:			
Residential 1 to 4 family	\$ 199,153	\$ 131,149	\$ 330,302
Multi-family and commercial	10,792	119,632	130,424
Construction	20,749	5,651	26,400
Total real estate loans	230,694	256,432	487,126
Commercial business loans	34,685	25,957	60,642
Consumer loans	6,768	14,149	20,917
Total loans	\$ 272,147	\$ 296,538	\$ 568,685

Table of Contents

Loan Approval Procedures and Authority. The Bank's lending activities follow written, nondiscriminatory, underwriting standards and loan origination procedures established by the Board of Directors and management. All residential mortgages and consumer home equity lines of credit in excess of \$6.0 million or all commercial loans and other consumer loans in excess of \$2.0 million require the approval of the Board of Directors. The Loan Committee of the Board of Directors has the authority to approve: (1) residential mortgage loans and consumer home equity lines of credit of up to \$6.0 million and (2) commercial and other consumer loans of up to \$2.0 million. The President and the Senior Credit Officer have approval for: (1) residential mortgage loans that conform to Fannie Mae and Freddie Mac standards up to \$2.0 million or \$417,000 for those that are non-conforming, (2) consumer and commercial loans up to \$250,000 individually or \$2.0 million jointly for consumer home equity lines of credit or \$1.0 million jointly for commercial and other consumer loans. The Senior Commercial Real Estate Officer may approve home equity lines of credit and commercial loans of up to \$250,000 individually or \$500,000 with the additional approval of the President or Senior Credit Officer. Various Bank personnel have been delegated authority to approve loans up to \$417,000.

Loans to One Borrower. The maximum amount that the Bank may lend to one borrower and the borrower's related entities is limited, by regulation, to generally 15% of the Bank's stated capital and reserves. At December 31, 2007, the Bank's regulatory limit on loans to one borrower was \$10.7 million. At that date, the Bank's largest lending relationship was \$8.5 million, representing two commercial business loans and a commercial construction loan for the construction of a nursing home and rehabilitation facility, of which \$8.1 million was outstanding and performing according to the original repayment terms at December 31, 2007.

Loan Commitments. The Bank issues commitments for fixed-rate and adjustable-rate mortgage loans conditioned upon the occurrence of certain events. Commitments to originate mortgage loans are legally binding agreements to lend to customers and generally expire in 90 days or less from the date of the application.

Delinquencies. When a borrower fails to make a required loan payment, the Bank takes a number of steps to have the borrower cure the delinquency and restore the loan to current status. The Bank makes initial contact with the borrower when the loan becomes 15 days past due. If payment is not then received by the 30th day of delinquency, additional letters and phone calls generally are made. When the loan becomes 90 days past due, a letter is sent notifying the borrower that foreclosure proceedings will commence if the loan is not brought current within 30 days. Generally, when the loan becomes 120 days past due, the Bank will commence foreclosure proceedings against any real property that secures the loan or attempt to repossess any personal property that secures a consumer or commercial loan. If a foreclosure action is instituted and the loan is not brought current, paid in full, or refinanced before the foreclosure sale, the real property securing the loan is typically sold at foreclosure. The Bank may consider loan repayment arrangements with certain borrowers under certain circumstances.

On a monthly basis, management informs the Board of Directors of the amount of loans delinquent more than 30 days, all loans in foreclosure and all foreclosed and repossessed property.

Table of Contents

The following table sets forth the delinquencies in the Bank's loan portfolio as of the dates indicated.

	December 31, 2007				December 31, 2006

⁽¹⁾ Includes 110 indirect automobile loans totaling \$1.2 million at December 31, 2006.

At December 31, 2007, total delinquencies of 60 days or more past due totaled \$7.8 million, which represented an increase of \$6.3 million compared to \$1.5 million at December 31, 2006. Of the \$6.3 million increase during 2007, \$6.1 million represented two commercial construction loan relationships. The Company has identified the aforementioned loans as nonperforming and has recorded a specific reserve of \$1.0 million against the outstanding balance of these loans.

Classified Assets. Management of the Bank, including the Managed Asset Committee, consisting of a number of the Bank's officers, review and classify the assets of the Bank on a monthly basis and the Board of Directors reviews the results of the reports on a quarterly basis. Federal regulations and the Bank's internal policies require that management utilize an internal asset classification system to monitor and evaluate the credit risk inherent in its loan portfolio. The Bank currently classifies problem and potential problem assets as *substandard*, *doubtful*, *loss* or *special mention*. An asset is considered *substandard* if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. *Substandard* assets include those assets that are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Assets characterized as *doubtful* have all the weaknesses inherent in those classified as *substandard* with the additional characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions and values, questionable, and there is a high probability of loss. Assets classified as *loss* are those assets considered uncollectible and of such little value that their continuance as assets, without the establishment of a specific loss reserve, is not warranted. In addition, assets that do not currently expose the Bank to sufficient risk to warrant classification in one of the aforementioned categories but possess credit deficiencies or potential weaknesses are required to be designated *special mention*. When an asset is classified as *substandard* or *doubtful*, a specific allowance for loan losses may be established. If an asset is classified as a *loss*, the Bank charges-off an amount equal to the portion of the asset classified as *loss*. All the loans mentioned above are included in the Bank's Managed Asset Report. This report serves as an integral part in the evaluation of the adequacy of the Bank's allowance for loan losses.

Table of Contents

The following table sets forth the principal balance of the Bank's classified loans as of December 31, 2007.

<i>(Dollars in Thousands)</i>	Loss	Doubtful	Substandard	Special Mention
Real estate loans:				
Residential 1 to 4 family	\$	\$	\$ 754	\$
Multi-family and commercial			658	7,393
Construction			6,082	5,511
Total real estate loans			7,494	12,904
Consumer loans:				
Home equity				
Other	1	18	3	
Total consumer loans	1	18	3	
Commercial business loans		9	800	418
Total classified loans	\$ 1	\$ 27	\$ 8,297	\$ 13,322

At December 31, 2007, the Bank had one loss rated loan and five loans rated as doubtful. Of the \$8.3 million of substandard loans at December 31, 2007, \$7.6 million were considered nonperforming loans. The largest substandard loan, a commercial construction loan, was \$2.3 million, which is not more than 90 days past due. Of the \$13.3 million of special mention loans, only one loan, a commercial mortgage loan, totaling \$896,000, was 30 days past due at December 31, 2007.

At December 31, 2007, total classified loans related predominately to seven commercial construction loans totaling \$11.6 million and eleven commercial real estate loans totaling \$8.1 million. Declining economic conditions have negatively impacted the residential and commercial construction markets and contributed to the decrease in credit quality for commercial loans. The continued weakening of both the local and national real estate markets has contributed to the inability of commercial developers to sell completed units, which resulted in declining collateral values and an increased risk of default.

Nonperforming Assets and Restructured Loans. When a loan becomes 90 days delinquent, the loan is placed on nonaccrual status at which time the accrual of interest ceases and the allowance for any uncollectible accrued interest is established and charged against operations. Typically, payments received on nonaccrual loans are applied to the outstanding principal and interest balance as determined at the time of collection of the loan.

The Bank considers repossessed assets and loans that are 90 days or more past due to be nonperforming assets. Real estate acquired as a result of foreclosure or by deed-in-lieu of foreclosure is classified as real estate owned until it is sold. When property is acquired it is recorded at the lower of its cost, which is the unpaid balance of the loan plus foreclosure costs or fair value at the date of the foreclosure. Holding costs and declines in fair value after acquisition of the property are charged against income as incurred.

Table of Contents

The following table provides information with respect to the Bank's nonperforming assets and troubled debt restructurings as of the dates indicated.

<i>(Dollars in Thousands)</i>	2007	2006	December 31, 2005	2004	2003

⁽¹⁾ Includes indirect automobile loans totaling \$925,000 at December 31, 2006.

⁽²⁾ Real estate owned balances are shown net of related loss allowance.

In addition to the loans disclosed in the above table, at December 31, 2007, management identified 21 loans totaling \$9.8 million in which the borrowers had possible credit problems that caused management to have doubts about the ability of the borrowers to comply with the present loan repayment terms and that may result in the future inclusion of such loans in the table above. All of the aforementioned loans have been classified as either substandard or special mention and are contained in the classified loan table on the previous page and are not more than 30 days delinquent.

Table of Contents

Interest income that would have been recorded for the year ended December 31, 2007 had nonaccruing loans and troubled debt restructurings been current in accordance with their original terms and had been outstanding throughout the period amounted to \$462,000. The amount of interest related to nonaccrual loans and troubled debt restructurings included in interest income was \$21,000 for the year ended December 31, 2007.

Allowance for Loan Losses. The allowance for loan losses, a material estimate which could change significantly in the near-term, is established through a provision for loan losses charged to earnings to account for losses that are inherent in the loan portfolio and estimated to occur, and is maintained at a level that management considers adequate to absorb losses in the loan portfolio. Loan losses are charged against the allowance for loan losses when management believes that the uncollectibility of the principal loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance for loan losses when received. The Bank evaluates the allowance for loan losses on a monthly basis.

The methodology for assessing the appropriateness of the allowance for loan losses consists of the following key elements:

Specific allowances for identified impaired loans;

General valuation allowance on the remainder of the loan portfolio

The loan portfolio is segregated first between loans that are on the Bank's Managed Asset Report and loans that are not. The Managed Asset Report includes: (1) loans that are 60 or more days delinquent, (2) loans with anticipated losses, (3) loans referred to attorneys for collection or in the process of foreclosure, (4) nonaccrual loans, (5) loans classified as substandard, doubtful, loss or special mention by either the Bank's internal classification system or by regulators during the course of their examination of the Bank and (6) troubled debt restructurings and other nonperforming loans.

Specific Allowance for Identified Impaired Loans. For such loans that are identified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of the loan.

The Bank reviews and establishes, as needed, a specific allowance for certain identified non-homogeneous problem loans. In accordance with Statement of Financial Accounting Standards No. 114, *Accounting by Creditors for Impairment of a Loan* as amended by Statement of Financial Accounting Standards No. 118, *Accounting by Creditors for Impairment of a Loan- an amendment of FASB Statement No. 114*, a loan is impaired when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due under the contractual terms of the original loan agreement. Measurement of the impairment is based on the present value of expected future cash flows or the fair value of the collateral, if the loan is collateral dependent. A specific allowance on impaired loans is established if the present value of the expected future cash flows, or fair value of the collateral for collateral dependent loans, is lower than the carrying value of the loan.

General Valuation Allowance on the Remainder of the Loan Portfolio. The Bank establishes a general allowance on the remainder of the loan portfolio, after excluding impaired loans. This general valuation allowance is determined by segregating the loans by loan category and assigning allowance percentages based on the Bank's historical loss experience and delinquency trends. The allowance may be adjusted for significant factors that, in management's judgment, affect the collectibility of the portfolio as of the evaluation date. These significant factors may include changes in lending policies and procedures, changes in existing general economic and business conditions affecting the Bank's primary lending areas, credit quality trends, collateral value, loan volumes and concentrations, seasoning of the loan portfolio, specific industry conditions within portfolio segments, recent loss experience in particular segments of the portfolio, duration of the current business cycle and bank regulatory examination results. The applied loss factors are re-evaluated annually to ensure their relevance in the current economic environment.

Table of Contents

Although management believes that it uses the best information available to establish the allowance for loan losses, future adjustments to the allowance for loan losses may be necessary and the Company's results of operations could be adversely affected if circumstances differ substantially from the assumptions used in making the determinations. In addition, because future events affecting borrowers and collateral cannot be predicted with certainty, there can be no assurance that the existing allowance for loan losses is adequate or that increases will not be necessary should the quality of any loans deteriorate as a result of the factors discussed above. Any material increase in the allowance for loan losses would adversely affect the Company's financial condition and results of operations.

The following table sets forth an analysis of the allowance for loan losses for the years indicated.

<i>(Dollars in Thousands)</i>	Years Ended December 31,				
	2007	2006	2005	2004	2003
Allowance at beginning of year	\$ 4,365	\$ 3,671	\$ 3,200	\$ 2,688	\$ 3,067
Provision for loan losses	1,062	881	410	550	1,602
Charge-offs:

Recoveries to charge-offs	58.06	6.03	310.34	49.30	6.25

The higher provision for 2007 reflects increases in the Bank's classified and nonperforming loans, specific reserves for impaired loans and loan growth from the prior year-end. Specific reserves relating to impaired loans increased to \$1.3 million at December 31, 2007 compared to \$14,000 at December 31, 2006. The ratio of the allowance for loan losses to total loans increased from 0.76% at December 31, 2006 to 0.89% at December 31, 2007. At December 31, 2007, nonperforming loans totaled \$7.6 million, compared to \$1.4 million at December 31, 2006. Two commercial construction loans accounted for \$6.1 million of nonperforming loans and \$1.0 million in specific reserves. While the Company has no direct exposure to sub-prime mortgages in its loan portfolio, declining economic conditions have negatively impacted the residential and commercial construction markets and contributed to the decrease in credit quality for

Table of Contents

commercial loans. As a result, the Company has increased its provision for loan losses on this portion of the loan portfolio during the second half of 2007 to reflect the increased risk of loss associated with this type of lending.

Charge-offs for 2003 included the charge-off of two commercial business loans and two commercial real estate loans that aggregated \$1.8 million. The larger of the two commercial real estate loans, which at the time of charge-off had a principal balance of \$1.6 million, was charged-off after the loan was nonperforming and the Bank determined that the value of the real estate underlying the loan was insufficient to cover the outstanding principal balance. Additionally, because we held a junior collateral position, the Bank determined that the likelihood of any recovery was remote. During the year ended December 31, 2003, charge-offs exceeded the provision for loan losses as specific allowances of \$237,000 were established in prior periods for a portion of the charged-off loans once it had been determined that collection or liquidation in full was unlikely.

The following table sets forth the breakdown of the allowance for loan losses by loan category at the dates indicated.

Table of Contents

Investment Activities

The Company has legal authority to invest in various types of liquid assets, including U.S. Treasury obligations, securities of various federal agencies, government-sponsored enterprises, state and municipal governments, mortgage-backed securities and certificates of deposit of federally-insured institutions. Within certain regulatory limits, the Company also may invest a portion of its assets in corporate securities and mutual funds. The Company is also required to maintain an investment in FHLB stock. While the Company has the authority under applicable law and its investment policies to invest in derivative securities, the Company had no such investments at December 31, 2007.

The Company's primary source of income continues to be derived from its loan portfolio. The investment portfolio is mainly used to meet the cash flow needs of the Company, provide adequate liquidity for the protection of customer deposits and yield a favorable return on investments. The type of securities and the maturity periods are dependent on the composition of the loan portfolio, interest rate risk, liquidity position and tax strategies of the Company. The Company's investment objectives are to provide and maintain liquidity, to maintain a balance of high quality, diversified investments to minimize risk, to provide collateral for pledging requirements, to establish an acceptable level of interest rate and credit risk, to provide an alternate source of low-risk investments when demand for loans is weak, to generate a favorable return and to assist in the financing needs of various local public entities, subject to credit quality review and liquidity concerns. The Company's Board of Directors has the overall responsibility for the investment portfolio, including approval of the Company's Investment Policy and appointment of the Investment Committee. The Investment Committee is responsible for the approval of investment strategies and monitoring investment performance. The execution of specific investment initiatives and the day-to-day oversight of the Company's investment portfolio is the responsibility of the Chief Executive Officer and the Chief Financial Officer. These officers, and others designated by the Board, are authorized to execute investment transactions up to specified limits based on the type of security without prior approval of the Investment Committee. Transactions exceeding these limitations require the approval of two of these officers, one of whom must be either the President and Chief Executive Officer or the Chief Financial Officer. Individual investment transactions are reviewed and approved by the Board of Directors on a monthly basis, while portfolio composition and performance are reviewed at least quarterly by the Investment Committee.

Statement of Financial Accounting Standards No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (SFAS 115), requires that securities be categorized as either held to maturity, trading securities or available for sale based on management's intent as to the ultimate disposition of each security. Debt securities may be classified as held to maturity, and reported in the financial statements at amortized cost, only if the Company has the positive intent and ability to hold those securities until maturity. Securities purchased and held principally for the purpose of trading in the near term are classified as trading securities. These securities are reported at fair value in the financial statements, with unrealized gains and losses recognized in earnings. Debt and equity securities not classified as either held to maturity or trading securities are classified as available for sale securities. These securities are reported at fair value with unrealized gains and losses excluded from earnings and reported in other comprehensive income (loss), net of taxes.

At December 31, 2007, the Company's investment portfolio, which consisted solely of available for sale securities, totaled \$141.9 million and represented 18.0% of assets. The Company's available for sale securities consisted primarily of agency mortgage-backed securities issued by Fannie Mae, Freddie Mac and Ginnie Mae with stated final maturities of 30 years or less, AAA-rated private-label mortgage-backed securities with maturities of 30 years or less, government-sponsored enterprises with maturities of five years or less and corporate debt securities.

Table of Contents

The following table sets forth the amortized costs and fair values of the Company's securities portfolio at the dates indicated.

	2007		December 31, 2006		2005	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value	Amortized Cost	Fair Value
<i>(Dollars in Thousands)</i>						
U.S. Government and agency obligations	\$ 1,156	\$ 1,132	\$ 1,596	\$ 1,602	\$ 4,820	\$ 4,813

Marketable equity securities	2,734	2,650	1,336	1,382	555	540
Total available for sale securities	\$ 141,150	\$ 141,914	\$ 121,040	\$ 119,508	\$ 122,457	\$ 120,019

The Company had no individual investments that had an aggregate book value in excess of 10% of its stockholders' equity at December 31, 2007.

The following table sets forth the amortized cost, weighted-average yields and contractual maturities of securities at December 31, 2007. Weighted-average yields on tax-exempt securities are not presented on a tax equivalent basis because the impact would be insignificant. Certain mortgage-backed securities have adjustable interest rates and will reprice periodically within the various maturity ranges. These repricing schedules are not reflected in the table below. At December 31, 2007, the amortized cost of mortgage-backed securities with adjustable rates totaled \$15.3 million.

	One Year or Less		More than One Year to Five Years		More than Five Years to Ten Years		More than Ten Years		Total

Table of Contents**Deposit Activities and Other Sources of Funds**

General. Deposits and loan repayments are the major sources of the Company's funds for lending and other investment purposes. Loan repayments are a relatively stable source of funds, while deposit inflows and outflows and loan prepayments are significantly influenced by general interest rates and money market conditions.

Deposit Accounts. Substantially all of the Bank's depositors are residents of the State of Connecticut. Deposits are attracted from within the Bank's market area through the offering of a broad selection of deposit instruments, including NOW, money market accounts, regular savings accounts and certificates of deposit. The Bank also utilizes brokered certificates of deposits, which at December 31, 2007 amounted to \$2.1 million, as an alternate source of funds. Deposit account terms vary according to the minimum balance required, the time periods the funds must remain on deposit and the interest rates offered, among other factors. In determining the terms of the Bank's deposit accounts, the Bank considers the rates offered by its competition, liquidity needs, profitability, matching deposit and loan products and customer preferences and concerns. The Bank generally reviews its deposit mix and pricing weekly. The Bank's current strategy is to offer competitive rates, and even higher rates on long-term deposits, but not be the market leader in every account type and maturity.

The Bank also offers a variety of deposit accounts designed for the businesses operating in its market area. Business banking deposit products include a commercial checking account that provides an earnings credit to offset monthly service charges and a checking account specifically designed for small business and nonprofit organizations. Additionally, sweep accounts and money market accounts are available for businesses. The Bank has sought to increase its commercial deposits through the offering of these products, particularly to its commercial borrowers and to local municipalities.

The following table sets forth the deposit activity for the years indicated, including mortgagors' and investors' escrow accounts and brokered deposits.

<i>(Dollars in Thousands)</i>	Years Ended December 31,		
	2007	2006	2005
Beginning balance	\$ 541,922	\$ 512,282	\$ 460,480
(Decrease) increase before interest credited	(5,928)	16,483	43,265
Interest credited	15,778	13,157	8,537
Net increase in deposits	9,850	29,640	51,802
Ending balance ⁽¹⁾	\$ 551,772	\$ 541,922	\$ 512,282

(1) Includes mortgagors' and investors' escrow accounts in the amount of \$3.4 million, \$3.2 million and \$3.0 million at December 31, 2007, 2006 and 2005, respectively. Includes brokered deposits of \$2.1 million, \$7.1 million and \$5.0 million at December 31, 2007, 2006 and 2005, respectively.

Table of Contents

The following table sets forth the distribution of the Bank's deposit accounts for the dates indicated.

<i>(Dollars in Thousands)</i>	2007		December 31, 2006		2005	
	Balance	% of Total	Balance	% of Total	Balance	% of Total
Noninterest-bearing demand deposits	\$ 56,762	10.29%	\$ 55,703	10.28%	\$ 51,996	10.15%

Table of Contents

Borrowings. The Bank utilizes advances from the FHLB to supplement its supply of lendable funds and to meet deposit withdrawal requirements. The FHLB functions as a central reserve bank providing credit for member financial institutions. As a member, the Bank is required to own capital stock in the FHLB and is authorized to apply for advances on the security of such stock and certain mortgage loans and other assets (principally securities which are obligations of, or guaranteed by, the United States), provided certain standards related to creditworthiness have been met. Advances are made under several different programs, each having its own interest rate and range of maturities. Depending on the program, limitations on the amount of advances are based either on a fixed percentage of an institution's net worth or on the FHLB's assessment of the institution's creditworthiness. The FHLB determines specific lines of credit for each member institution.

Advances from the FHLB increased \$29.7 million, or 26.5%, for the year ended December 31, 2007 to \$141.6 million. For 2007, new advances tended to be shorter in duration to provide the Company flexibility to repay the advances in the future because of their higher interest rates. The increased borrowings were used to fund asset growth.

Junior Subordinated Debt Owed to Unconsolidated Trusts. In 2002, SI Capital Trust I (the Trust), a business trust, issued \$7.0 million of preferred securities in a private placement and issued approximately 217 shares of common stock at \$1,000 par value to the Company. The Trust used the proceeds of these issuances to purchase \$7.2 million of the Company's floating rate junior subordinated deferrable interest debentures. The interest rate on the debentures and the trust preferred securities was variable based on 3.70% over the six-month LIBOR. The trust securities were redeemed at par on April 22, 2007 and the Trust was subsequently dissolved.

In 2006, the Company formed SI Capital Trust II (Trust II), which issued \$8.0 million of trust preferred securities through a pooled trust preferred securities offering. The Company owns all of the common securities of Trust II, which has no independent assets or operations. Trust II was formed to issue trust preferred securities and invest the proceeds in an equivalent amount of junior subordinated debentures issued by the Company. A portion of the proceeds from the offering were used to redeem trust preferred securities of the Trust. The trust preferred securities mature in 30 years and bear interest at three-month LIBOR plus 1.70%. The interest rate on these securities at December 31, 2007 was 6.69%. The Company may redeem the trust preferred securities, in whole or in part, on or after September 15, 2011, or earlier under certain conditions.

The debentures are the sole assets of Trust II and are subordinate to all of the Company's existing and future obligations for borrowed money, its obligations under letters of credit and certain derivative contracts and any guarantees by the Company of any such obligations. The trust preferred securities generally rank equal to the trust common securities in priority of payment, but rank before the trust common securities if and so long as the Company fails to make principal or interest payments on the debentures. Concurrently with the issuance of the debentures and the trust preferred and common securities, the Company issued a guarantee related to the trust securities for the benefit of the holders. The Company's obligations under the guarantee and the Company's obligations under the debentures, the related indentures and the trust agreement relating to the trust securities, constitute a full and unconditional guarantee by the Company of the obligations of Trust II under the trust preferred securities. If the Company defers interest payments on the junior subordinated debt, or otherwise is in default of the obligations, the Company would be prohibited from making dividend payments to its shareholders.

The debentures are also subject to redemption before September 15, 2011, at a specified price after the occurrence of certain events that would either have a negative tax effect on Trust II or the Company or would result in Trust II being treated as an investment company that is required to be registered under the Investment Company Act of 1940. Upon repayment of the debentures at their stated maturity or

Table of Contents

following their redemption, Trust II will use the proceeds of such repayment to redeem an equivalent amount of outstanding trust preferred securities and trust common securities.

Additionally, the Company occasionally utilizes collateralized borrowings, which represent loans sold that do not meet the criteria for derecognition, due primarily to recourse and other provisions that could not be measured at the date of transfer. Such borrowings are derecognized when all recourse and other provisions that could not be measured at the time of transfer either expire or become measurable. The Company had no collateralized borrowings at December 31, 2007.

The following table sets forth information regarding the Company's borrowings at the dates or for the years indicated.

<i>(Dollars in Thousands)</i>	At or For the Years Ended December 31,		
	2007	2006	2005
Maximum amount of advances outstanding at any month-end during the year:			
FHLB advances	\$ 141,619	\$ 117,982	\$ 93,190
Subordinated debt	15,465	15,465	7,217
Average balance outstanding during the year:			
FHLB advances	\$ 114,960	\$ 101,902	\$ 79,596
Subordinated debt	10,463	9,522	7,217
Weighted-average interest rate during the year:			
FHLB advances	4.59%	4.27%	3.90%

Balance outstanding at end of year:			
FHLB advances	\$ 141,619	\$ 111,956	\$ 87,929
Subordinated debt	8,248	15,465	7,217
Weighted-average interest rate at end of year:			
FHLB advances	4.53%	4.44%	3.97%
Subordinated debt	6.69	8.01	8.15

Trust Services

The Bank's trust department provides fiduciary services, investment management and retirement services, to individuals, partnerships, corporations and institutions. Additionally, the Bank acts as guardian, conservator, executor or trustee under various trusts, wills and other agreements. The Bank has implemented comprehensive policies governing the practices and procedures of the trust department, including policies relating to investment of trust property, maintaining confidentiality of trust records, avoiding conflicts of interest and maintaining impartiality. Consistent with its operating strategy, the Bank will continue to emphasize the growth of its trust business in order to accumulate assets and increase fee-based income. At December 31, 2007, trust assets under administration were \$169.8 million, consisting of 340 accounts, the largest of which totaled \$9.2 million, or 5.4%, of the trust department's total assets. The acquisition of SI Trust Servicing, in Rutland, Vermont, in November 2005 represented an opportunity for significant growth of the Bank's wealth management business. SI Trust Servicing offers third-party trust outsourcing services to other community banks located throughout the

Table of Contents

country. As of December 31, 2007, SI Trust Servicing provided trust outsourcing services to 12 clients, consisting of 4,937 accounts totaling \$5.4 billion in assets. For the years ended December 31, 2007, 2006 and 2005, total trust services revenue was \$3.6 million, \$3.2 million and \$1.0 million, respectively.

Subsidiary Activities

The Company's subsidiaries include Savings Institute Bank and Trust Company and SI Capital Trust II. SI Capital Trust II was established in 2006 as a statutory trust under Delaware law to issue trust preferred securities. The trust has no independent assets or operations. SI Capital Trust II issued \$8.0 million of trust preferred securities in September 2006. All of the common securities of SI Capital Trust II are owned by the Company.

The following are descriptions of the Bank's wholly-owned subsidiaries.

803 Financial Corp. 803 Financial Corp. was established in 1995 as a Connecticut corporation to maintain an ownership interest in a third-party registered broker-dealer, Infinex Investments, Inc. Infinex operates offices at the Bank and offers customers a complete range of nondeposit investment products, including mutual funds, debt, equity and government securities, retirement accounts, insurance products and fixed and variable annuities. The Bank receives a portion of the commissions generated by Infinex from sales to customers. Due to a regulatory restriction on federally-chartered thrifts, on December 31, 2004, 803 Financial Corp. sold its interest in Infinex which was subsequently purchased by the Company. As a result, 803 Financial Corp. had no other holdings or business activities.

SI Realty Company, Inc. SI Realty Company, Inc., established in 1999 as a Connecticut corporation, holds real estate owned by the Bank, including foreclosure properties. At December 31, 2007, SI Realty Company, Inc. had \$1.1 million in assets.

SI Mortgage Company. In January 1999, the Bank formed SI Mortgage Company to manage and hold loans secured by real property. SI Mortgage Company qualifies as a passive investment company, which exempts it from Connecticut income tax under current law. Income tax savings to the Bank from the use of a passive investment company was \$89,000 and \$188,000 for the years ended December 31, 2007 and 2006, respectively.

Personnel

At December 31, 2007, the Company had 227 full-time employees and 42 part-time employees. None of the Company's employees are represented by a collective bargaining unit. The Company believes its relationship with its employees is good.

Table of Contents

REGULATION AND SUPERVISION

General

The Bank is subject to extensive regulation, examination and supervision by the Office of Thrift Supervision (OTS), as its primary federal regulator, and the FDIC, as the insurer of its deposits. The Bank is a member of the Federal Home Loan Bank System and its deposit accounts are insured up to applicable limits by the Deposit Insurance Fund managed by the FDIC. The Bank must file reports with the OTS and the FDIC concerning its activities and financial condition in addition to obtaining regulatory approvals before entering into certain transactions such as mergers with, or acquisitions of, other financial institutions. There are periodic examinations by the OTS and, under certain circumstances, the FDIC, to evaluate the Bank's safety and soundness and compliance with various regulatory requirements. This regulatory structure is intended primarily for the protection of the insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Any change in such policies, whether by the OTS, the FDIC or Congress, could have a material adverse impact on the Company, SI Bancorp, MHC and the Bank and their operations. The Company and SI Bancorp, MHC, as savings and loan holding companies, are required to file certain reports with, are subject to examination by, and otherwise must comply with the rules and regulations of the OTS. The Company is also subject to the rules and regulations of the Securities and Exchange Commission under the federal securities laws.

Certain of the regulatory requirements that are applicable to the Bank, the Company and SI Bancorp, MHC are described below. This description of statutes and regulations is not intended to be a complete explanation of such statutes and regulations and their effects on the Bank, the Company and SI Bancorp, MHC are qualified in their entirety by reference to the actual statutes and regulations.

Regulation of Federal Savings Associations

Business Activities. Federal law and regulations, primarily the Home Owners' Loan Act and the regulations of the OTS, govern the activities of federal savings banks, such as the Bank. These laws and regulations delineate the nature and extent of the activities in which federal savings banks may engage. In particular, certain lending authority for federal savings banks, *e.g.*, commercial, non-residential real property loans and consumer loans, is limited to a specified percentage of the institution's capital or assets.

Capital Requirements. The OTS's capital regulations require federal savings institutions to meet three minimum capital standards:

a tangible capital ratio requirement of 1.5% of adjusted total assets;

a leverage ratio of 4% of Tier 1 (core) capital to adjusted total assets (3% for institutions receiving the highest rating on the CAMELS examination rating system); and

a risk-based capital ratio requirement of 8% of total capital (core and supplementary capital) to total risk-weighted assets of which at least half must be core capital

In addition, the prompt corrective action standards discussed below also established, in effect, a minimum 2% tangible capital standard, a 4% leverage ratio standard (3% for institutions receiving the highest rating on the CAMELS examination rating system) and, together with the risk-based capital standard itself, a 4% Tier 1 risk-based capital standard. The OTS regulations also require that, in meeting the tangible, leverage and risk-based capital standards, institutions must generally deduct investments in and loans to subsidiaries engaged in activities as principal that are not permissible for a national bank.

Table of Contents

In determining compliance with the risk-based capital requirement, savings institutions must compute its risk-weighted assets by multiplying its assets, including certain off-balance sheet assets, recourse obligations, residual interests and direct credit substitutes, by risk-weight factors ranging from 0% for cash and obligations of the United States Government or its agencies to 100% for consumer and commercial loans, as assigned by the OTS capital regulation based on the risks believed inherent in the type of asset.

Core (Tier 1) capital is defined as common stockholders' equity (including retained earnings), certain noncumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries, less intangibles (other than certain mortgage servicing rights) and credit card relationships. The components of supplementary capital currently include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance for loan and lease losses is limited to a maximum of 1.25% of risk-weighted assets and up to 45% of unrealized gains on available for sale equity securities with readily determinable fair market values. Overall, the amount of supplementary capital included as part of total capital cannot exceed 100% of core capital.

The OTS also has authority to establish individual minimum capital requirements in appropriate cases upon a determination that an institution's capital level is or may become inadequate in light of the particular circumstances. At December 31, 2007, the Bank exceeded each of these capital requirements.

Prompt Corrective Regulatory Action. The OTS is required to take certain supervisory actions against undercapitalized institutions, the severity of which depends upon the institution's degree of undercapitalization. Generally, a savings institution that has a ratio of total capital to risk-weighted assets of less than 8%, a ratio of Tier 1 (core) capital to risk-weighted assets of less than 4% or a ratio of core capital to total assets of less than 4% (3% or less for institutions with the highest examination rating) is considered to be undercapitalized. A savings institution that has a total risk-based capital ratio less than 6%, a Tier 1 capital ratio of less than 3% or a leverage ratio that is less than 3% is considered to be significantly undercapitalized and a savings institution that has a tangible capital to assets ratio equal to or less than 2% is deemed to be critically undercapitalized. Subject to a narrow exception, the OTS is required to appoint a receiver or conservator within specified time frames for an institution that is critically undercapitalized. An institution must file a capital restoration plan with the OTS within 45 days of the date it receives notice that it is undercapitalized, significantly undercapitalized or critically undercapitalized. Compliance with the plan must be guaranteed by any parent holding company. In addition, numerous mandatory supervisory actions become immediately applicable to an undercapitalized institution, including, but not limited to, increased monitoring by regulators and restrictions on growth, capital distributions and expansion. Significantly undercapitalized and critically undercapitalized institutions are subject to more extensive mandatory regulatory actions. The OTS could also take any one of a number of discretionary supervisory actions, including the issuance of a capital directive and the replacement of senior executive officers and directors.

Loans to One Borrower. Federal law provides that savings institutions are generally subject to the limits on loans to one borrower applicable to national banks. Generally, a savings institution may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of its unimpaired capital and surplus. An additional amount may be lent, equal to 10% of unimpaired capital and surplus, if secured by specified readily-marketable collateral. *See Item 1. Business. Lending Activities. Loans to One Borrower.*

Standards for Safety and Soundness. The federal banking agencies have adopted Interagency Guidelines, which set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the OTS

Table of Contents

determines that a savings institution fails to meet any standard prescribed by the guidelines, the OTS may require the institution to submit an acceptable plan to achieve compliance with the standard. The Bank has not received any notice from the OTS that it has failed to meet any standard prescribed by the guidelines.

Limitation on Capital Distributions. OTS regulations impose limitations upon all capital distributions by a savings institution, including cash dividends, payments to repurchase its shares and payments to shareholders of another institution in a cash-out merger. Under the regulations, an application to and the prior approval of the OTS is required before any capital distribution if the institution does not meet the criteria for expedited treatment of applications under OTS regulations (*i.e.*, generally, examination and Community Reinvestment Act ratings in the two top categories), the total capital distributions for the calendar year exceed net income for that year plus the amount of retained net income for the preceding two years, the institution would be undercapitalized following the distribution or the distribution would otherwise be contrary to a statute, regulation or agreement with the OTS. If an application is not required, the institution must still provide prior notice to the OTS of the capital distribution if, like the Bank, it is a subsidiary of a holding company. If the Bank's capital were ever to fall below its regulatory requirements or the OTS notified it that it was in need of increased supervision, its ability to make capital distributions could be restricted. In addition, the OTS could prohibit a proposed capital distribution that would otherwise be permitted by the regulation, if the agency determines that such distribution would constitute an unsafe or unsound practice.

Qualified Thrift Lender Test. Federal law requires savings institutions to meet a qualified thrift lender test. Under the test, a savings association is required to either qualify as a domestic building and loan association under the Internal Revenue Code or maintain at least 65% of its portfolio assets in certain qualified thrift investments (primarily residential mortgages and related investments, including certain mortgage-backed securities) in at least nine months out of each twelve-month period. Portfolio assets represent, in general, total assets less the sum of:

specified liquid assets up to 20% of total assets;

goodwill and other intangible assets; and

the value of property used to conduct business

A savings institution that fails the qualified thrift lender test is subject to certain operating restrictions and may be required to convert to a bank charter. Recent legislation has expanded the extent to which education loans, credit card loans and small business loans may be considered qualified thrift investments. As of December 31, 2007, the Bank maintained 78.28% of its portfolio assets in qualified thrift investments and, therefore, met the qualified thrift lender test.

Transactions with Related Parties. Federal law limits the Bank's authority to lend to, and engage in certain other transactions with (collectively, covered transactions), affiliates (*e.g.*, any company that controls or is under common control with an institution, including the Company, SI Bancorp, MHC and their non-savings institution subsidiaries). The aggregate amount of covered transactions with any individual affiliate is limited to 10% of the capital and surplus of the savings institution. The aggregate amount of covered transactions with all affiliates is limited to 20% of the savings institution's capital and surplus. Loans and other specified transactions with affiliates are required to be secured by collateral in an amount and of a type described in federal law. The purchase of low quality assets from affiliates is generally prohibited. Transactions with affiliates must be on terms and under circumstances that are at least as favorable to the institution as those prevailing at the time for comparable transactions with non-affiliated companies. In addition, savings institutions are prohibited from lending to any affiliate that is engaged in activities that are not permissible for bank holding companies and no savings institution may purchase the securities of any affiliate other than a subsidiary.

Table of Contents

The Sarbanes-Oxley Act of 2002 generally prohibits a company from making loans to its executive officers and directors. However, that act contains a specific exception for loans by a depository institution to its executive officers and directors in compliance with federal banking laws. Under such laws, the Bank's authority to extend credit to executive officers, directors and 10% shareholders (insiders), as well as entities in which such persons control, is limited. The law restricts both the individual and aggregate amount of loans the Bank may make to insiders based, in part, on the Bank's capital position and requires certain board approval procedures to be followed. Such loans must be made on terms substantially the same as those offered to unaffiliated individuals and not involve more than the normal risk of repayment. There is an exception for loans made pursuant to a benefit or compensation program that is widely available to all employees of the institution and does not give preference to insiders over other employees. In addition, loans made to a director or executive officer in an amount that, when aggregated with the amount of all other loans to the person and his or her related interest, are in excess of the greater of \$25,000, or 5% of the Bank's capital and surplus, and in any event any loans totaling \$500,000 or more, must be approved in advance by a majority of the disinterested members of the Board of Directors.

Enforcement. The OTS has primary enforcement responsibility over federal savings institutions and has the authority to bring actions against the institution and all institution-affiliated parties, including stockholders, and any attorneys, appraisers and accountants who knowingly or recklessly participate in wrongful action likely to have an adverse effect on an insured institution. Formal enforcement action may range from the issuance of a capital directive or cease and desist order for removal of officers and/or directors to institution of receivership, conservatorship or termination of deposit insurance. Civil penalties cover a wide range of violations and can amount to \$25,000 per day, or even \$1.0 million per day in especially egregious cases. The FDIC has authority to recommend to the Director of the OTS that enforcement action be taken with respect to a particular savings institution. If action is not taken by the Director, the FDIC has authority to take such action under certain circumstances. Federal law also establishes criminal penalties for certain violations.

Assessments. Federal savings banks are required to pay assessments to the OTS to fund its operations. The general assessments, paid on a semi-annual basis, are based upon the savings institution's total assets, including consolidated subsidiaries, as reported in the institution's latest quarterly thrift financial report, financial condition and complexity of portfolio. The OTS assessments paid by the Bank for 2007 were \$190,000.

Insurance of Deposit Accounts. The Bank's deposits are insured up to applicable limits by the Deposit Insurance Fund of the FDIC. The Deposit Insurance Fund is the successor to the Bank Insurance Fund and the Savings Association Insurance Fund, which were merged in 2006. The FDIC recently amended its risk-based assessment system for 2007 to implement authority granted by the Federal Deposit Insurance Reform Act of 2005 (Reform Act). Under the revised system, insured institutions are assigned to one of four risk categories based on supervisory evaluations, regulatory capital levels and certain other factors. An institution's assessment rate depends upon the category to which it is assigned. Risk Category I, which contains the least risky depository institutions, is expected to include more than 90% of all institutions. Unlike the other categories, Risk Category I contains further risk differentiation based on the FDIC's analysis of financial ratios, examination component ratings and other information. Assessment rates are determined by the FDIC and currently range from five to seven basis points for the healthiest institutions (Risk Category I) to 43 basis points of assessable deposits for the riskiest (Risk Category IV). The FDIC may adjust rates uniformly from one quarter to the next, except that no single adjustment can exceed three basis points. No institution may pay a dividend if in default of the FDIC assessment.

The Reform Act also provided for a one-time credit for eligible institutions based on their assessment base as of December 31, 1996. Subject to certain limitations with respect to institutions that are exhibiting weaknesses, credits can be used to offset assessments until exhausted. The Bank's one-time credit was

Table of Contents

approximately \$344,000, of which \$100,000 is remaining as of December 31, 2007. The Reform Act also provided for the possibility that the FDIC may pay dividends to insured institutions once the Deposit Insurance fund reserve ratio equals or exceeds 1.35% of estimated insured deposits.

In addition to the assessment for deposit insurance, institutions are required to make payments on bonds issued in the late 1980s by the Financing Corporation to recapitalize a predecessor deposit insurance fund. This payment is established quarterly and during the calendar year ending December 31, 2007 averaged 1.18 basis points of assessable deposits.

The Reform Act provided the FDIC with authority to adjust the Deposit Insurance Fund ratio to insured deposits within a range of 1.15% and 1.50%, in contrast to the prior statutorily fixed ratio of 1.25%. The ratio, which is viewed by the FDIC as the level that the fund should achieve, was established by the agency at 1.25% for 2008, which is unchanged from 2007.

The FDIC has authority to increase insurance assessments. A significant increase in insurance premiums would likely have an adverse effect on the operating expenses and results of operations of the Bank. Management cannot predict what insurance assessment rates will be in the future.

Insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC or the OTS. The management of the Bank does not know of any practice, condition or violation that might lead to termination of deposit insurance.

Federal Home Loan Bank System. The Bank is a member of the Federal Home Loan Bank System, which consists of twelve regional Federal Home Loan Banks. The FHLB provides a central credit facility primarily for member institutions. The Bank, as a member of the FHLB, is required to acquire and hold shares of capital stock in FHLB. The Bank was in compliance with this requirement with an investment in FHLB at December 31, 2007 of \$7.8 million.

The Federal Home Loan Banks are required to provide funds for the resolution of insolvent thrifts in the late 1980s and to contribute funds for affordable housing programs. These requirements could reduce the amount of dividends that the Federal Home Loan Banks pay to their members and could also result in the Federal Home Loan Banks imposing a higher rate of interest on advances to their members. If dividends were reduced, or interest on future FHLB advances increased, the Company's net interest income would be negatively impacted.

Community Reinvestment Act. Under the Community Reinvestment Act, as implemented by OTS regulations, a savings association has a continuing and affirmative obligation consistent with its safe and sound operation to help meet the credit needs of its entire community, including low and moderate income neighborhoods. The Community Reinvestment Act does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with the Community Reinvestment Act. The Community Reinvestment Act requires the OTS, in connection with its examination of a savings association, to assess the institution's record of meeting the credit needs of its community and to take such record into account in its evaluation of certain applications by such institution.

The Community Reinvestment Act requires public disclosure of an institution's rating and requires the OTS to provide a written evaluation of an association's Community Reinvestment Act performance utilizing a four-tiered descriptive rating system. The Bank received an outstanding rating, which is the highest possible rating, as a result of its most recent Community Reinvestment Act assessment.

Table of Contents

Federal Reserve System. The Federal Reserve Board regulations require savings institutions to maintain noninterest earning reserves against their transaction accounts (primarily Negotiable Order of Withdrawal NOW and regular checking accounts). The regulations generally provide that reserves be maintained against aggregate transaction accounts as follows: a 3% reserve ratio is assessed on net transaction accounts up to and including \$43.9 million; a 10% reserve ratio is applied above \$43.9 million. The first \$9.3 million of otherwise reservable balances (subject to adjustments by the Federal Reserve Board) are exempted from the reserve requirements. The amounts are adjusted annually. The Bank complies with the foregoing requirements.

Holding Company Regulation

General. The Company and SI Bancorp, MHC are savings and loan holding companies within the meaning of federal law. As such, they are registered with the OTS and are subject to OTS regulations, examinations, supervision, reporting requirements and regulations concerning corporate governance and activities. In addition, the OTS has enforcement authority over the Company, SI Bancorp, MHC and their non-savings institution subsidiaries. Among other things, this authority permits the OTS to restrict or prohibit activities that are determined to be a serious risk to the Bank.

Restrictions Applicable to Mutual Holding Companies. According to federal law and OTS regulations, a mutual holding company, such as SI Bancorp, MHC, may generally engage in the following activities: (1) investing in the stock of a bank; (2) acquiring a mutual association through the merger of such association into a bank subsidiary of such holding company or an interim bank subsidiary of such holding company; (3) merging with or acquiring another holding company, one of whose subsidiaries is a bank; (4) investing in a corporation, the capital stock of which is available for purchase by a savings association under federal law or under the law of any state where the subsidiary savings association or associations share their home offices; (5) furnishing or performing management services for a savings association subsidiary of such company; (6) holding, managing or liquidating assets owned or acquired from a savings subsidiary of such company; (7) holding or managing properties used or occupied by a savings association subsidiary of such company; (8) acting as trustee under deeds of trust; (9) any other activity (A) that the Federal Reserve Board, by regulation, has determined to be permissible for bank holding companies under Section 4(c) of the Bank Holding Company Act, unless the OTS, by regulation, prohibits or limits any such activity for savings and loan holding companies; or (B) in which multiple savings and loan holding companies were authorized (by regulation) to directly engage on March 5, 1987; and (10) purchasing, holding or disposing of stock acquired in connection with a qualified stock issuance if the purchase of such stock by such savings and loan holding company is approved by the OTS.

The Gramm-Leach Bliley Act of 1999 was designed to modernize the regulation of the financial services industry by expanding the ability of bank holding companies to affiliate with other types of financial services companies such as insurance companies and investment banking companies. The legislation also expanded the activities permitted for mutual savings and loan holding companies to include any activity permitted a financial holding company under the legislation, including a broad array of insurance and securities activities.

Federal law prohibits a savings and loan holding company, including a federal mutual holding company, from directly or indirectly, or through one or more subsidiaries, acquiring more than 5% of the voting stock of another savings institution, or its holding company, without prior written approval of the OTS. Federal law also prohibits a savings and loan holding company from acquiring more than 5% of a company engaged in activities other than those authorized for savings and loan holding companies by federal law; or acquiring or retaining control of a depository institution that is not insured by the FDIC. In evaluating applications by holding companies to acquire savings institutions, the OTS must consider

Table of Contents

the financial and managerial resources and future prospects of the company and institution involved, the effect of the acquisition on the risk to the insurance funds, the convenience and needs of the community and competitive factors.

The OTS is prohibited from approving any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, except: (1) the approval of interstate supervisory acquisitions by savings and loan holding companies, and (2) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permits such acquisitions. The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

If the savings institution subsidiary of a savings and loan holding company fails to meet the qualified thrift lender test, the holding company must register with the Federal Reserve Board as a bank holding company within one year of the savings institution's failure to so qualify.

Although savings and loan holding companies are not currently subject to regulatory capital requirements or specific restrictions on the payment of dividends or other capital distributions, federal regulations do prescribe such restrictions on subsidiary savings institutions as described below. The Bank must notify the OTS 30 days before declaring any dividend. In addition, the financial impact of a holding company on its subsidiary institution is a matter that is evaluated by the OTS and the agency has authority to order cessation of activities or divestiture of subsidiaries deemed to pose a threat to the safety and soundness of the institution.

Stock Holding Company Subsidiary Regulation. The OTS has adopted regulations governing the two-tier mutual holding company form of organization and subsidiary stock holding companies that are controlled by mutual holding companies. The Company has adopted this form of organization. The Company is the stock holding company subsidiary of SI Bancorp, MHC. The Company is permitted to engage in activities that are permitted for SI Bancorp, MHC subject to the same restrictions and conditions.

Waivers of Dividends by SI Bancorp, MHC. OTS regulations require SI Bancorp, MHC to notify the OTS if it proposes to waive receipt of dividends from the Company. The OTS reviews dividend waiver notices on a case-by-case basis, and, in general, does not object to any such waiver if: (i) the waiver would not be detrimental to the safe and sound operating of the savings association subsidiary; and (ii) the mutual holding company's Board of Directors determines that such waiver is consistent with such directors' fiduciary duties to the mutual holding company's members.

Acquisition of Control. Under the federal Change in Bank Control Act, a notice must be submitted to the OTS if any person (including a company), or group acting in concert, seeks to acquire control of a savings and loan holding company or savings association. An acquisition of control can occur upon the acquisition of 10% or more of the voting stock of a savings and loan holding company or savings institution or as otherwise defined by the OTS. Under the Change in Bank Control Act, the OTS has 60 days from the filing of a complete notice to act, taking into consideration certain factors, including the financial and managerial resources of the acquirer and the anti-trust effects of the acquisition. Any company that so acquires control would then be subject to regulation as a savings and loan holding company.

Other Regulations

Interest and other charges collected or contracted for by the Bank are subject to state usury laws and federal laws concerning interest rates. The Bank's loan operations are also subject to federal laws applicable to credit transactions, such as the:

Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers;

Table of Contents

Home Mortgage Disclosure Act of 1975, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;

Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, creed or other prohibited factors in extending credit;

Fair Credit Reporting Act of 1978, governing the use and provision of information to credit reporting agencies;

Fair Debt Collection Act, governing the manner in which consumer debts may be collected by collection agencies; and

Rules and regulations of the various federal agencies charged with the responsibility of implementing such federal laws. The deposit operations of the Bank also are subject to the:

Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumers' financial records and prescribes procedures for complying with administrative subpoenas of financial records;

Electronic Funds Transfer Act and Regulation E promulgated thereunder, which governs automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services; and

Check Clearing for the 21st Century Act (also known as Check 21), which gives substitute checks, such as digital check images and copies made from that image, the same legal standing as the original paper check.

Federal Income Taxation

General. The Company reports its income on a calendar year basis using the accrual method of accounting. The federal income tax laws apply to the Company in the same manner as to other corporations with some exceptions, including particularly the Bank's reserve for bad debts discussed below. The following discussion of tax matters is intended only as a summary and does not purport to be a comprehensive description of the tax rules applicable to the Company and its subsidiaries. The Company's federal income tax returns have been either audited or closed under the statute of limitations through tax year 2003. The Company's maximum federal income tax rate was 34.0% for 2007.

Bad Debt Reserves. For fiscal years beginning before June 30, 1996, thrift institutions that qualified under certain definitional tests and other conditions of the Internal Revenue Code were permitted to use certain favorable provisions to calculate their deductions from taxable income for annual additions to their bad debt reserve. A reserve could be established for bad debts on qualifying real property loans, generally secured by interests in real property improved or to be improved, under the percentage of taxable income method or the experience method. The reserve for nonqualifying loans was computed using the experience method. Federal legislation enacted in 1996 repealed the reserve method of accounting for bad debts for institutions with assets in excess of \$500.0 million and the percentage of taxable income method for all institutions for tax years beginning after 1995 and required savings institutions to recapture or take into income certain portions of their accumulated bad debt reserves. However, those tax-based bad debt reserves accumulated prior to 1988 (Base Year Reserves) were not required to be recaptured unless the institution failed certain tests. Approximately \$3.7 million of the Bank's accumulated tax-based bad debt reserves would not be recaptured into taxable income unless it makes a non-dividend distribution to the Company as described below.

Table of Contents

Distributions. If the Bank makes non-dividend distributions to the Company, the distributions will be considered to have been made from the Bank's unrecaptured tax-based bad debt reserves, including the balance of its Base Year Reserves as of December 31, 1987, to the extent of the non-dividend distributions, and then from the Bank's supplemental reserve for losses on loans, to the extent of those reserves, and an amount based on the amount distributed, but not more than the amount of those reserves, will be included in the Bank's taxable income. Non-dividend distributions include distributions in excess of the Bank's current and accumulated earnings and profits as calculated for federal income tax purposes, distributions in redemption of stock and distributions in partial or complete liquidation. Dividends paid out of the Bank's current or accumulated earnings and profits will not be so included in the Bank's taxable income.

The amount of additional taxable income triggered by a non-dividend is an amount that, when reduced by the tax attributable to the income, is equal to the amount of the distribution. Therefore, if the Bank makes a non-dividend distribution to the Company, approximately one and one-half times the amount of the distribution not in excess of the amount of the reserves would be includable in income for federal income tax purposes, assuming a 34% federal corporate income tax rate. The Bank does not intend to pay non-dividend distributions that would result in a recapture of any portion of its bad debt reserves.

State Income Taxation

The Company and its subsidiaries are subject to the Connecticut corporation business tax. The Company and its subsidiaries are eligible to file a combined Connecticut income tax return and pay the regular corporation business tax. The Connecticut corporation business tax is based on the federal taxable income before net operating loss and special deductions of the Company and its subsidiaries and makes certain modifications to federal taxable income to arrive at Connecticut taxable income. Connecticut taxable income is multiplied by the state tax rate (7.5% for fiscal year 2007) to arrive at Connecticut income tax.

In May 1998, the State of Connecticut enacted legislation permitting the formation of passive investment company subsidiaries by financial institutions. This legislation exempts qualifying passive investment companies from the Connecticut corporation business tax and excludes dividends paid from a passive investment company from the taxable income of the parent financial institution. The Bank's formation of a passive investment company in January 1999 substantially eliminates the state income tax expense of the Company and its subsidiaries under current law. See *Item 1. Business. Subsidiary Activities. SI Mortgage Company* for a discussion of the Bank's passive investment company.

Table of Contents**Executive Officers of the Registrant**

Certain executive officers of the Bank also serve as executive officers of the Company. The day-to-day management duties of the executive officers of the Company and the Bank relate primarily to their duties as to the Bank. The executive officers of the Company currently are as follows:

Name	Age ⁽¹⁾	Position
Rheo A. Brouillard	53	President and Chief Executive Officer of Savings Institute Bank and Trust Company, SI Financial Group and SI Bancorp, MHC
Brian J. Hull	47	Executive Vice President, Chief Financial Officer and Treasurer of Savings Institute Bank and Trust Company, SI Financial Group and SI Bancorp, MHC
Sonia M. Dudas	57	Senior Vice President and Senior Trust Officer of Savings Institute Bank and Trust Company
William E. Anderson, Jr.	38	Vice President and Retail Banking Officer of Savings Institute Bank and Trust Company
Laurie L. Gervais	43	Vice President and Director of Human Resources of Savings Institute Bank and Trust Company
John P. Kearney	54	Senior Vice President and Senior Credit Officer of Savings Institute Bank and Trust Company

⁽¹⁾ Ages presented are as of December 31, 2007.

Biographical Information:

Rheo A. Brouillard has been the President and Chief Executive Officer of Savings Institute Bank and Trust Company, SI Financial Group and SI Bancorp, MHC since 1995, 2000 and 2004, respectively. Mr. Brouillard has been a director of the Company since 1995.

Brian J. Hull has been Executive Vice President since 2002 and Chief Financial Officer and Treasurer since he joined Savings Institute Bank and Trust Company in 1997. Mr. Hull has served as Chief Financial Officer and Treasurer of Savings Institute Bank and Trust Company, SI Financial Group and SI Bancorp, MHC since 2000 and 2004, respectively.

Sonia M. Dudas has been Senior Vice President and Senior Trust Officer since 1999. Ms. Dudas oversees wealth management services, which includes trust, investment and insurance operations since she joined Savings Institute Bank and Trust Company in 1992.

William E. Anderson, Jr. has been Vice President and Retail Banking Officer since 2002 and 2004, respectively. Mr. Anderson joined Savings Institute Bank and Trust Company in 1995.

Laurie L. Gervais has been Vice President and Director of Human Resources since 2003 and 2001, respectively. Ms. Gervais joined Savings Institute Bank and Trust Company in 1983.

John P. Kearney has been Senior Vice President and Senior Credit Officer since 2007. Mr. Kearney joined Savings Institute Bank and Trust Company in 2006. Prior to joining Savings Institute Bank & Trust Company, Mr. Kearney was a Partner in a Connecticut-based public accounting firm and a Senior Vice President of HSBC Group, a banking and financial services organization.

Table of Contents

Item 1A. Risk Factors.

Prospective investors in the Company's common stock should carefully consider the following factors.

The Company's increased emphasis on commercial lending may expose it to increased lending risks. At December 31, 2007, \$202.7 million, or 34.3%, of the Company's loan portfolio consisted of commercial real estate and commercial business loans. The Company intends to continue to emphasize these types of lending. These types of loans generally expose a lender to greater risk of non-payment and loss than one- to four-family residential mortgage loans because repayment of the loans often depends on the successful operation of the property and the income stream of the borrowers. Such loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to one- to four-family residential mortgage loans. Also, many of the Company's commercial borrowers have more than one loan outstanding with the Company. Consequently, an adverse development with respect to one loan or one credit relationship can expose the Company to a significantly greater risk of loss compared to an adverse development with respect to a one- to four-family residential mortgage loan.

The Company's inability to achieve profitability on new branches may negatively impact its earnings. The Company considers its primary market area to consist of Hartford, New London, Tolland and Windham counties. However, the majority of the Company's facilities are located in and a substantial portion of the Company's business is derived from Windham county, which has a lower median household income and a higher unemployment rate than other counties in the Company's market area and the rest of Connecticut. To address this, in recent years, the Company has expanded its presence throughout its market area and intends to pursue further expansion through the establishment of additional branches in Hartford, New London, Tolland and Middlesex counties, each of which has more favorable economic conditions than Windham County. The profitability of the Company's expansion policy will depend on whether the income that it generates from the additional branches it establishes or purchases will offset the increased expenses resulting from operating new branches. The Company expects that it may take a period of time before new branches can become profitable, especially in areas in which it does not have an established presence. During this period, operating these new branches may negatively impact the Company's net income.

Fluctuations in interest rates could reduce the Company's profitability and affect the value of its assets. Like other financial institutions, the Company is subject to interest rate risk. The Company's primary source of income is net interest income, which is the difference between interest earned on loans and investments and the interest paid on deposits and borrowings. Changes in the general level of interest rates can affect the Company's net interest income by affecting the difference between the weighted-average yield earned on the Company's interest-earning assets and the weighted-average rate paid on the Company's interest-bearing liabilities, or interest rate spread and the average life of the Company's interest-earning assets and interest-bearing liabilities. Changes in interest rates also can affect: (1) the ability to originate loans; (2) the value of the Company's interest-earning assets and the Company's ability to realize gains from the sale of such assets; (3) the ability to obtain and retain deposits in competition with other available investment alternatives; and (4) the ability of the Company's borrowers to repay adjustable or variable rate loans. Interest rates are highly sensitive to many factors, including government monetary policies, domestic and international economic and political conditions and other factors beyond the Company's control. Although the Company believes that the estimated maturities of its interest-earning assets currently are well balanced in relation to the estimated maturities of its interest-bearing liabilities, there can be no assurance that the Company's profitability would not be adversely affected during any period of changes in interest rates.

Table of Contents

Strong competition within the Company's market area could hurt the Company's profits and slow growth. The Company faces intense competition both in making loans and attracting deposits. This competition has made it more difficult for the Company to make new loans and at times has forced the Company to offer higher deposit rates. Price competition for loans and deposits might result in the Company earning less on its loans and paying more on its deposits, which reduces net interest income. As of June 30, 2007, the Company held approximately 0.97% of the deposits in Hartford, New London, Tolland and Windham counties in Connecticut, which represented the 15th market share of deposits out of 38 financial institutions in these counties. Some of the institutions with which the Company competes have substantially greater resources and lending limits than the Company has and may offer services that the Company does not provide. The Company expects competition to increase in the future as a result of legislative, regulatory and technological changes and the continuing trend of consolidation in the financial services industry. The Company's profitability depends upon its continued ability to compete successfully in its market area.

The trading history of the Company's common stock is characterized by low trading volume. The Company's common stock may be subject to sudden decreases due to the volatility of the price of the Company's common stock. The Company's common stock trades on the NASDAQ Global Market. Over the past 50 days, the average daily trading volume of its common stock was approximately 8,000 shares. The Company cannot predict whether a more active trading market in its common stock will occur or how liquid that market might become. A public trading market having the desired characteristics of depth, liquidity and orderliness depends upon the presence in the marketplace of willing buyers and sellers of its common stock at any given time, which presence is dependent upon the individual decisions of investors, over which we have no control.

The market price of the Company's common stock may be highly volatile and subject to wide fluctuations in response to numerous factors, including, but not limited to, the factors discussed in other risk factors and the following:

actual or anticipated fluctuations in the Company's operating results;

changes in interest rates;

changes in the legal or regulatory environment in which the Company operates;

press releases, announcements or publicity relating to the Company or the Company's competitors or relating to trends in the Company's industry;

changes in expectations as to the Company's future financial performance, including financial estimates or recommendations by securities analysts and investors;

future sales of the Company's common stock;

changes in economic conditions in the Company's marketplace, general conditions in the U.S. economy, financial markets or the banking industry; and

other developments affecting the Company's competitors or the Company

These factors may adversely affect the trading price of the Company's common stock, regardless of its actual operating performance, and could prevent you from selling your common stock at or above the price you desire. In addition, the stock markets, from time to time, experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of companies. These broad fluctuations may adversely affect the market price of the Company's common stock, regardless of its trading performance.

If the value of real estate in eastern Connecticut were to decline materially, a significant portion of the Company's loan portfolio could become under-collateralized, which would have a material adverse effect on the Company. With most of the Company's loans concentrated in eastern Connecticut, a decline in local economic conditions could adversely affect the value of the

Table of Contents

real estate collateral securing the Company's loans. A decline in property values would diminish the Company's ability to recover on defaulted loans by selling the real estate collateral, making it more likely that the Company would suffer losses on defaulted loans. Additionally, a decrease in asset quality could require additions to the allowance for loan losses through increased provisions for loan losses, which would hurt the Company's profits. Also, a decline in local economic conditions may have a greater effect on earnings and capital than on the earnings and capital of larger financial institutions whose real estate loan portfolios are more geographically diverse. Real estate values are affected by various factors in addition to local economic conditions, including, among other things, changes in general or regional economic conditions, governmental rules or policies and natural disasters.

The Company's level of nonperforming loans and classified assets expose it to increased lending risks. Further, the Company's allowance for loan losses may prove to be insufficient to absorb losses in its loan portfolio. At December 31, 2007, loans that were classified as either special mention, substandard, doubtful or loss totaled \$21.6 million, representing 3.7% of total loans, including nonperforming loans of \$7.6 million, representing 1.29% of total loans. In addition, the Company's nonperforming and classified loans have increased in each of the last two years. If these loans do not perform according to their terms and the value of the collateral is insufficient to pay the remaining loan balance, we would experience loan losses, which could have a material adverse effect on our operating results. Like all financial institutions, we maintain an allowance for loan losses at a level representing management's best estimate of known losses in the portfolio based upon management's evaluation of the portfolio's collectibility as of the corresponding balance sheet date. However, the Company's allowance for loan losses may be insufficient to cover actual loan losses, and future provisions for loan losses could materially adversely affect the Company's operating results.

At December 31, 2007, the Company's allowance for loan losses totaled \$5.2 million, which represented 0.89% of total loans, 68.72% of nonperforming loans and 242.30% of classified assets. The Company's regulators, as an integral part of their examination process, periodically review the allowance for loan losses and may require us to increase the allowance for loan losses by recognizing additional provisions for loan losses charged to income, or to charge-off loans, which, net of any recoveries, would decrease the allowance for loan losses. Any such additional provisions for loan losses or charge-offs, as required by these regulatory agencies, could have a material adverse effect on the Company's operating results.

Office of Thrift Supervision policy on remutualization transactions could prohibit acquisition of the Company, which may adversely affect its stock price. Current OTS regulations permit a mutual holding company to be acquired by a mutual institution in a remutualization transaction. The possibility of a remutualization transaction has recently resulted in a degree of takeover speculation for mutual holding companies that is reflected in the per share price of mutual holding companies' common stock. However, the OTS has issued a policy statement indicating that it views remutualization transactions as raising significant issues concerning disparate treatment of minority stockholders and mutual members of the target entity and raising issues concerning the effect on the mutual members of the acquiring entity. Under certain circumstances, the OTS intends to give these issues special scrutiny and reject applications providing for the remutualization of a mutual holding company unless the applicant can clearly demonstrate that the OTS's concerns are not warranted in the particular case. Should the OTS prohibit or otherwise restrict these transactions in the future, the Company's per share stock price may be adversely affected.

Table of Contents

SI Bancorp, MHC's majority control of the Company's common stock enables it to exercise voting control over most matters put to a vote of shareholders, including preventing a sale, a merger or a second-step conversion transaction. SI Bancorp, MHC owns a majority of the Company's common stock and, through its Board of Directors, is able to exercise voting control over most matters put to a vote of shareholders. The same directors and officers who manage the Company and the Bank also manage SI Bancorp, MHC. As a federally-chartered mutual holding company, the Board of Directors of SI Bancorp, MHC must ensure that the interests of depositors of the Bank are represented and considered in matters put to a vote of shareholders of the Company. Therefore, the votes cast by SI Bancorp, MHC may not be in your personal best interests as a shareholder. For example, SI Bancorp, MHC may exercise its voting control to prevent a sale or merger transaction in which shareholders could receive a premium for their shares or to defeat a shareholder nominee for election to the Board of Directors of the Company. In addition, SI Bancorp, MHC may exercise its voting control to prevent a second-step conversion transaction. Preventing a second-step conversion transaction may result in a lower value of the Company's stock price than otherwise could be achieved as, historically, fully-converted institutions trade at higher multiples than mutual holding companies. The matters as to which shareholders, other than SI Bancorp, MHC, will be able to exercise voting control are limited.

The Company operates in a highly regulated environment and it may be adversely affected by changes in laws and regulations. The Company is subject to extensive regulation, supervision and examination by the OTS, the Company's chartering authority and the FDIC, as insurer of the Bank's deposits. SI Bancorp, MHC, the Company and the Bank are all subject to regulation and supervision by the OTS. Such regulation and supervision governs the activities in which an institution and its holding company may engage, and are intended primarily for the protection of the insurance fund and depositors. Regulatory authorities have extensive discretion in their supervisory and enforcement activities, including the imposition of restrictions on the Company's operations, the classification of its assets and determination of the level of the Bank's allowance for loan losses. Any change in such regulation and oversight, whether in the form of regulatory policy, regulations, legislation or supervisory action, may have a material impact on the Company's operations.

The Company is subject to security and operational risks relating to use of its technology that could damage its reputation and business. Security breaches in the Company's internet banking activities could expose it to possible liability and damage its reputation. Any compromise of the Company's security also could deter customers from using its internet banking services that involve the transmission of confidential information. The Company relies on standard internet security systems to provide the security and authentication necessary to effect secure transmission of data. These precautions may not protect its systems from compromises or breaches of its security measures that could result in damage to its reputation and business. Additionally, the Company outsources its data processing to a third party. If the Company's third party provider encounters difficulties or if the Company has difficulty in communicating with such third party, it will significantly affect the Company's ability to adequately process and account for customer transactions, which would significantly affect its business operations.

Item 1B. Unresolved Staff Comments.

None.

Table of Contents**Item 2. Properties.**

The Bank conducts its business through its main office, branch offices and other properties. The following table sets forth certain information relating to these facilities as of December 31, 2007.

- (1) The relocation of the Norwich, Connecticut office was completed in January 2008 and the Bank intends to relocate its Brooklyn, Connecticut office in June 2008.
- (2) The Company has an option to renew this lease for two additional five-year periods.
- (3) The Company has an option to renew this lease for four additional five-year periods.
- (4) The Company has an option to renew this lease for one additional five-year period.
- (5) The Company has an option to renew this lease for three additional five-year periods.
- (6) The Company has an option to renew this lease for two additional ten-year periods.
- (7) A portion of this property includes a parking lot for the main office. The remainder of this property has been leased to a subtenant under a lease that expires in December 2013. The subtenant has an option to renew this lease for two additional five-year periods.
- (8) A portion of this facility is used for an employee training center.
- (9) This facility houses trust operations.

Table of Contents**Item 3. Legal Proceedings.**

At December 31, 2007, neither the Company nor the Bank was involved in any pending legal proceedings believed by management to be material to the Company's financial condition or results of operations. Periodically, there have been various claims and lawsuits against us, such as claims to enforce liens, condemnation proceedings on properties in which we hold security interest, claims involving the making and servicing of real property loans and other issues incident to our business. However, neither the Company nor the Bank is a party to any pending legal proceedings that management believes would have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Item 4. Submission of Matters to a Vote of Security Holders.

None.

PART II.**Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.**

The market for the registrant's common equity and related stockholder matters required by this item is incorporated herein by reference to the section captioned *Common Stock Information* in the Company's Annual Report to Stockholders.

For a description of restrictions on the Company's ability to pay cash dividends, see *Item 1. Business. Regulation and Supervision. Limitation on Capital Distributions* in this annual report on Form 10-K and *Note 17 in the Company's Consolidated Financial Statements included in the Company's Annual Report to Stockholders, attached hereto as Exhibit 13, for more information.*

The following table provides certain information with regard to shares repurchased by the Company in the fourth quarter of 2007.

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
October 1, 2007 through October 31, 2007	25,000	\$ 10.81	25,000	275,350
November 1, 2007 through November 30, 2007	100,000	10.44	100,000	175,350
December 1, 2007 through December 31, 2007	40,000	9.93	40,000	135,350
Total	165,000	\$ 10.37	165,000	

⁽¹⁾ On November 23, 2005, the Company announced that the Board of Directors had approved a stock repurchase program authorizing the Company to repurchase up to 628,000 shares of the Company's common stock. The repurchase program will continue until it is completed or terminated by the Board of Directors.

Table of Contents

On September 22, 2006, a trust formed by the Company completed the sale of \$8.0 million of trust preferred capital securities to a pooled investment vehicle in a private placement offering pursuant to an applicable exemption from registration under Section 4(2) of the Securities Act of 1933, as amended. FTN Financial Capital Markets and Keefe Bruyette & Woods, Inc. acted as underwriters. There were no underwriting discounts or commissions. In April 2007, the Company utilized a portion of the net proceeds from the offering for the redemption of previously issued trust preferred securities which carried significantly higher interest rates.

Item 6. Selected Financial Data.

The Company has derived the following selected consolidated financial and other data in part from its consolidated financial statements and notes appearing elsewhere in this annual report.

Selected Financial Condition Data:

<i>(Dollars in Thousands)</i>	At December 31,				
	2007	2006	2005	2004	2003
Total assets	\$ 790,198	\$ 757,037	\$ 691,868	\$ 624,649	\$ 518,141

Average equity to average assets	10.88	11.07	12.45	8.21	6.51
<u>Regulatory Capital Ratios:</u>					
Total risk-based capital ratio	15.21	15.84	16.79	18.03	12.45
Tier 1 risk-based capital ratio	14.37	14.86	15.87	17.12	11.50
Tier 1 capital ratio ⁽⁷⁾	8.75	8.97	9.31	9.99	6.81
<u>Asset Quality Ratios:</u>					
Allowance for loan losses as a percent of total loans	0.89	0.76	0.71	0.71	0.69
Allowance for loan losses as a percent of nonperforming loans	68.72	313.58	1529.58	338.98	207.57
Net (charge-offs) recoveries to average outstanding loans during the year	(0.03)	(0.03)	0.01	0.01	0.55

(1) Includes mortgagors and investors escrow accounts.

(2) Represents the difference between the weighted-average yield on average interest-earning assets and the weighted-average cost of interest-bearing liabilities.

(3) Represents net interest income as a percent of average interest-earning assets.

(4) The noninterest expenses to average assets ratio, excluding the effect of the contribution expense to SI Financial Group Foundation, was 3.27% for the year ended December 31, 2004.

(5) Dividends declared per share divided by basic net income per common share. Dividends paid on shares held by SI Bancorp, MHC are waived and are excluded from this ratio. Comparable figures for 2004 and 2003 are not available since no dividends were paid during these periods.

(6) Represents noninterest expenses divided by the sum of net interest income and noninterest income, less any realized gains or losses on the sale of securities. The efficiency ratio, excluding the effect of the contribution to SI Financial Group Foundation, was 78.62% for the year ended December 31, 2004.

(7) Represents Tier 1 capital to total assets as required by OTS regulations at December 31, 2007, 2006, 2005 and 2004 and Tier 1 capital to total average assets at December 31, 2003 as required by FDIC regulations.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The information required by this item is incorporated herein by reference to the section captioned *Management's Discussion and Analysis of Financial Condition and Results of Operations* in the Company's Annual Report to Stockholders attached hereto as Exhibit 13.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Not applicable as the Company is a smaller reporting company.

Item 8. Financial Statements and Supplementary Data.

The financial statements and supplementary data required by this item are incorporated herein by reference to the audited consolidated financial statements and notes thereto included in the Company's Annual Report to Stockholders attached hereto as Exhibit 13.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A(T). Controls and Procedures.

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's disclosure controls and procedures, as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the Exchange Act). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (2) is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. In addition, based on that evaluation, no changes in the Company's internal control over financial reporting occurred during the quarter ended December 31, 2007 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and of the preparation of our consolidated financial statements for external purposes in accordance with United States generally accepted accounting principles.

A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

The Company's management assessed the effectiveness of its internal control over financial reporting as of December 31, 2007, using the criteria established in Internal Control-Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has concluded that, as of December 31, 2007, the Company's internal control over financial reporting was effective based on the criteria.

This annual report does not include an attestation report of the Company's Independent Registered Public Accounting Firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's Independent Registered Public Accounting Firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

Item 9B. Other Information.

None.

PART III.

Item 10. Directors, Executive Officers and Corporate Governance.

Directors

Information relating to the directors of the Company required by this item is incorporated herein by reference to the section captioned *Item to be Voted on by Stockholders - Item 1 - Election of Directors* in the Company's Proxy Statement for the 2008 Annual Meeting of Stockholders.

Executive Officers

Information relating to officers of the Company required by this item is incorporated herein by reference to *Part I, Item 1, Business - Executive Officers of the Registrant* to this annual report on Form 10-K.

Compliance with Section 16(a) of the Exchange Act
