In the first nine months of 2009, the Company acquired an office building contiguous to its main facility in Irvine, California for approximately \$20.7 million. The Company assumed a mortgage of \$20.0 million and paid \$0.7 million in cash.

See accompanying notes to unaudited condensed consolidated financial statements.

Table of Contents

ALLERGAN, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1: Basis of Presentation

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary (consisting only of normal recurring accruals) to present fairly the financial information contained therein. These statements do not include all disclosures required by accounting principles generally accepted in the United States of America (GAAP) for annual periods and should be read in conjunction with the Company's audited consolidated financial statements and related notes for the year ended December 31, 2008. The Company prepared the unaudited condensed consolidated financial statements following the requirements of the Securities and Exchange Commission for interim reporting. As permitted under those rules, certain footnotes or other financial information that are normally required by GAAP can be condensed or omitted. The results of operations for the three and nine month periods ended September 30, 2009 are not necessarily indicative of the results to be expected for the year ending December 31, 2009 or any other period(s).

Reclassifications

Certain reclassifications of prior year amounts have been made to conform to the current year presentation.

All prior period information has been retrospectively adjusted to reflect the impact of the adoptions in the first quarter of 2009 of updates to Financial Accounting Standards Board (FASB) guidance related to the accounting for convertible debt instruments that may be settled fully or partially in cash upon conversion and the accounting and financial reporting of noncontrolling ownership interests in subsidiaries held by parties other than the parent.

Goodwill

In July 2009, the Company decided to change the timing of the annual impairment testing for goodwill from January 1 to October 1 of each year as a preferable method of accounting. Accordingly, the Company expects to perform its next annual impairment assessment of goodwill in the fourth quarter of 2009. The Company decided to adopt this change in timing in order to assess the recorded values of goodwill for potential impairment at a time closer to its fiscal year end reporting date. The Company's management believes this change is preferable in reducing the potential risk that an undetected impairment indicator could occur in between the timing of the Company's annual impairment test and the preparation of its year end financial statements. This change has no effect on reported earnings for any current or prior periods.

Subsequent Events

The Company has evaluated subsequent events through November 6, 2009, the date of issuance of the unaudited condensed consolidated financial statements, and disclosed, if necessary, any material subsequent events in the notes to these financial statements.

Recently Adopted Accounting Standards

In June 2009, the FASB issued authoritative guidance that establishes the FASB Accounting Standards CodificationTM as the single source of authoritative U.S. GAAP to be applied by nongovernmental entities and modifies the U.S. GAAP hierarchy to only two levels: authoritative and nonauthoritative. This guidance became effective for interim periods and fiscal years ending after September 15, 2009. The Company adopted the provisions of the guidance in the third quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In May 2009, the FASB issued authoritative guidance that establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. This guidance became effective for interim periods and fiscal years ending after June 15, 2009. The Company adopted the provisions of the guidance in the second quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In April 2009, the FASB issued authoritative guidance that requires publicly traded companies to include in their interim financial reports certain disclosures about the carrying value and fair value of financial instruments previously required only in annual financial statements and to disclose changes in significant assumptions used to calculate the fair value of financial instruments. This guidance became effective for interim reporting periods ending after June 15, 2009, with early adoption permitted for interim reporting periods ending after March 15, 2009. The

Edgar Filing: ALLERGAN INC - Form 10-Q

Company adopted the provisions of the guidance in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated

Table of Contents

ALLERGAN, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

financial statements.

In November 2008, the FASB issued authoritative guidance that clarifies how to account for acquired intangible assets subsequent to initial measurement in situations in which an entity does not intend to actively use the assets but intends to hold the asset to prevent others from obtaining access to the asset (a defensive intangible asset), except for intangible assets that are used in research and development activities. This guidance requires that a defensive intangible asset be accounted for as a separate unit of accounting and assigned a useful life that reflects the entity's consumption of the expected benefits related to that asset. This guidance became effective for intangible assets acquired on or after December 15, 2008. The Company adopted the provisions of the guidance in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In June 2008, the FASB issued authoritative guidance that clarifies the criteria for determining whether certain financial instruments should be classified as derivative instruments or equity instruments. This guidance became effective for fiscal years beginning after December 15, 2008. The Company adopted the provisions of the guidance in the first quarter of 2009 and, as required, evaluated the equity component of its 1.50% Convertible Senior Notes due 2026 (2026 Convertible Notes). The Company determined that the conversion feature of its 2026 Convertible Notes is indexed to its own stock and is therefore classified as an equity instrument.

In May 2008, the FASB issued authoritative guidance that clarifies the accounting for convertible debt instruments that may be settled fully or partially in cash upon conversion. This guidance requires entities to separately measure and account for the liability and equity components of qualifying convertible debt and amortize the value of the equity component to interest cost over the estimated life of the convertible debt instrument. By amortizing the value of the equity component, an entity will effectively recognize interest cost at its non-convertible debt borrowing rate. This guidance also requires re-measurement of the liability and equity components upon extinguishment of a convertible debt instrument, which may result in a gain or loss recognized in the financial statements for the extinguishment of the liability component. This guidance requires retrospective application for all instruments that were outstanding during any periods presented, and became effective for fiscal years beginning after December 15, 2008. The Company adopted the provisions of the guidance on January 1, 2009 and the adoption impacted both current year and historical accounting for its 2026 Convertible Notes, resulting in an increase of \$6.0 million and \$18.4 million, respectively, in interest expense for the three and nine month periods ended September 30, 2009 and a reduction of \$2.3 million and \$7.0 million, respectively, in the provision for income taxes, and for the three and nine month periods ended September 30, 2008, an increase of \$6.3 million and \$18.6 million, respectively, in interest expense and a reduction of \$2.4 million and \$7.1 million, respectively, in the provision for income taxes. The adoption also resulted in an \$80.4 million increase in additional paid-in capital, a \$64.8 million reduction in long-term convertible notes, a \$24.9 million increase in deferred tax liabilities, a \$0.5 million increase in non-current assets and a \$40.0 million decrease in retained earnings as of January 1, 2009. The impact on basic and diluted earnings per share for the three and nine month periods ended September 30, 2009 is a reduction of \$0.01 and \$0.04, respectively. The impact on basic and diluted earnings per share for the three month period ended September 30, 2008 is a reduction of \$0.02 and \$0.01, respectively, and for the nine month period ended September 30, 2008 is a reduction of \$0.04 and \$0.03, respectively.

In April 2008, the FASB issued authoritative guidance that amends the guidance for estimating the useful lives of recognized intangible assets and requires additional disclosure related to renewing or extending the useful lives of recognized intangible assets. This guidance became effective for fiscal years and interim periods beginning after December 15, 2008. The Company adopted the provisions of the guidance in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In March 2008, the FASB issued authoritative guidance that requires entities to disclose: (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. This guidance became effective for fiscal years and interim periods beginning after November 15, 2008. The Company adopted the provisions of the guidance in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In December 2007, the FASB issued authoritative guidance that significantly changes the accounting and reporting requirements for business combination transactions, including capitalization of in-process research and development assets and expensing acquisition costs as incurred. This guidance became effective for business combination transactions occurring in fiscal years beginning after December 15, 2008. The Company adopted the provisions of the guidance in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

Table of Contents

ALLERGAN, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In December 2007, the FASB issued authoritative guidance that changes the accounting and financial reporting of noncontrolling ownership interests in subsidiaries held by parties other than the parent, and the allocation of net income attributable to the parent and the noncontrolling interest. This guidance also establishes disclosure requirements to separately identify the interests of the parent and the interests of the noncontrolling owners. This guidance became effective for fiscal years beginning after December 15, 2008. The Company adopted the provisions of the guidance in the first quarter of 2009. The adoption changed the presentation format of the Company's consolidated statements of earnings and consolidated balance sheets, but did not have an impact on net earnings or equity attributable to the Company's stockholders.

In December 2007, the FASB issued authoritative guidance that defines collaborative arrangements and requires that transactions with third parties that do not participate in the arrangement be reported in the appropriate income statement line items pursuant to existing authoritative accounting literature. Income statement classification of payments made between participants of a collaborative arrangement are to be based on other applicable authoritative accounting literature. If the payments are not within the scope or analogy of other authoritative accounting literature, a reasonable, rational and consistent accounting policy is to be elected. This guidance became effective for fiscal years beginning after December 15, 2008 and was applied as a change in accounting principle to all prior periods retrospectively for all collaborative arrangements existing as of the effective date. The Company adopted the provisions of the guidance in the first quarter of 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

New Accounting Standards Not Yet Adopted

In October 2009, the FASB issued an accounting standards update that requires an entity to allocate arrangement consideration at the inception of an arrangement to all of its deliverables based on their relative selling prices, eliminates the use of the residual method of allocation, and requires the relative-selling-price method in all circumstances in which an entity recognizes revenue of an arrangement with multiple deliverables. This guidance will be effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, which will be the Company's fiscal year 2011, with earlier application permitted. The Company has not yet evaluated the potential impact of adopting this guidance on the Company's consolidated financial statements.

In June 2009, the FASB issued authoritative guidance that requires an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. This analysis identifies the primary beneficiary of a variable interest entity as the enterprise that has both the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance, and the obligation to absorb losses or the right to receive benefits of the entity that could potentially be significant to the variable interest entity. This guidance also requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity and eliminates the quantitative approach previously required for determining the primary beneficiary. This guidance will be effective for fiscal years beginning after November 15, 2009, which will be the Company's fiscal year 2010. The Company does not expect that the adoption of the guidance will have a material impact on the Company's consolidated financial statements.

In December 2008, the FASB issued authoritative guidance that provides guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. This guidance requires an employer to disclose information about how investment allocation decisions are made, and to disclose separately for pension plans and other postretirement benefit plans the fair value of each major category of plan assets based on the nature and risks of assets as of each annual reporting date for which a statement of financial position is presented and information that enables users of financial statements to assess the inputs and valuation techniques used to develop fair value measurements of plan assets at the annual reporting date. The disclosures about plan assets are to be provided for fiscal years ending after December 15, 2009, which will be the Company's fiscal year 2009. Upon initial adoption, the provisions are not required for earlier periods that are presented for comparative purposes. The Company does not expect that the adoption of the guidance will have a material impact on the Company's consolidated financial statements.

Note 2: Acquisitions

Samil Acquisition

On July 7, 2009, the Company and Samil Pharmaceutical Co. Ltd. entered into a joint venture, Samil Allergan Ophthalmic Joint Venture Company (Samil) in Korea by integrating the Samil Eyecare division with the Company's Korean ophthalmology products. In addition, the

Edgar Filing: ALLERGAN INC - Form 10-Q

Company paid approximately \$16.7 million (\$12.8 million, net of cash acquired) to Samil Pharmaceutical Co. Ltd. to acquire the Company's joint venture investment and received a 50.005% stockholder interest (50% plus one share) in the joint venture. The acquisition was funded from cash and equivalents balances. The Company accounted for the Samil acquisition as a business combination.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In connection with the Samil acquisition, the Company acquired assets with a fair value of \$41.4 million, including goodwill of \$23.0 million, intangible assets of \$5.1 million, cash of \$3.9 million and other assets of \$9.4 million, and assumed liabilities of \$8.1 million. The Company believes the fair values assigned to the assets acquired and liabilities assumed were based on reasonable assumptions.

Aczone® Asset Purchase

On July 11, 2008, the Company completed the acquisition of assets related to *Aczone*® (dapson) gel 5%, a topical treatment for acne vulgaris, from QLT USA, Inc. (QLT) for approximately \$150.0 million. The acquisition was funded from cash and equivalents balances. The Company acquired QLT's right, title and interest in and to the intellectual property, assigned contracts, registrations and inventories related to *Aczone*®, which is approved for sale in both the United States and Canada for the treatment of certain dermatological conditions. The Company accounted for the acquisition as a purchase of net assets.

The Company determined that the assets acquired consist of product rights for developed technology for *Aczone*® of \$145.6 million and inventories of \$4.4 million. The useful life of the developed technology was determined to be approximately eight years. The Company believes the fair values assigned to the assets acquired were based on reasonable assumptions.

Note 3: Restructuring Charges and Integration and Transition Costs**2009 Restructuring Plan**

On February 4, 2009, the Company announced a restructuring plan that involves a workforce reduction of approximately 460 employees, primarily in the United States and Europe. The majority of the employees affected by the restructuring plan are U.S. urology sales and marketing personnel as a result of the Company's decision to focus on the urology specialty and to seek a partner to promote *Sanctura XR* to general practitioners, and marketing personnel in the United States and Europe as the Company adjusts its back-office structures to a reduced short-term sales outlook for some businesses. The restructuring plan also includes modest workforce reductions in other functions as the Company re-engineers its processes to increase efficiency and productivity.

As part of the restructuring plan, the Company modified the outstanding stock options issued in its February 2008 full-round employee stock option grant. The stock options were originally granted with an exercise price of \$64.47 with a standard four year graded vesting term, a ten year contractual term, and standard 90 day expiration upon termination of employment provisions. These options were modified to be immediately vested in full and to remove the 90 day expiration upon termination of employment provision. Because the modified awards became fully vested and there was no future derived service period, all unamortized compensation expense related to the original grant and the additional compensation expense attributable to the modification of the awards was recognized in full on the modification date.

In addition, the contractual provisions of outstanding stock options, other than the February 2008 full-round employee stock option grant, held by employees impacted by the workforce reduction were modified to extend the stock option expiration dates. Under the original contractual provisions, outstanding stock options held by employees involved in a workforce reduction automatically become fully vested upon termination of employment and the stock options expire after the earlier of 90 days from termination of employment or the remaining stock option contractual term. Under the modified terms, stock options for the impacted employees will expire after the earlier of three years from termination of employment or the remaining contractual term. All unamortized compensation expense related to the original stock option awards plus the incremental compensation expense associated with the modifications will be recognized ratably from the modification date to the employees' expected termination date.

The Company estimates that the total pre-tax charges related to the 2009 restructuring plan will be between \$119.0 million and \$126.0 million, of which \$39.0 million to \$44.0 million are expected to be cash expenditures. The total estimated pre-tax charges consist primarily of employee severance and other one-time termination benefits of \$39.0 million to \$44.0 million, asset write-offs of \$2.0 million to \$3.0 million, costs associated with the modification of stock options issued in the February 2008 full-round employee stock option grant of approximately \$73.0 million and costs associated with the modification of stock options, other than the February 2008 full-round employee stock option grant, for employees impacted by the workforce reduction of \$5.0 million to \$6.0 million.

Edgar Filing: ALLERGAN INC - Form 10-Q

The Company began to record costs associated with the 2009 restructuring plan in the first quarter of 2009 and expects to continue to recognize costs through the fourth quarter of 2009. As of June 30, 2009, the Company substantially completed all activities related to the restructuring plan. During the three month period ended September 30, 2009, the Company recognized a total of \$0.7 million related to employee stock option modifications, consisting of \$0.5 million in selling,

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

general and administrative (SG&A) expenses and \$0.2 million in research and development (R&D) expenses, and recognized \$0.1 million of accelerated depreciation costs in SG&A expenses. During the nine month period ended September 30, 2009, the Company recorded pre-tax restructuring charges of \$39.1 million and recognized a total of \$78.3 million related to employee stock option modifications, consisting of \$5.0 million of cost of sales, \$52.5 million in SG&A and \$20.8 million in R&D expenses, and recognized \$2.3 million of asset write-offs and accelerated depreciation costs in SG&A expenses.

The following table presents the restructuring charges related to the 2009 restructuring plan during the nine month period ended September 30, 2009:

	Employee Severance	Other (in millions)	Total
Net charge during the nine month period ended September 30, 2009	\$ 32.4	\$ 6.7	\$ 39.1
Spending	(23.0)	(6.2)	(29.2)
Balance at September 30, 2009 (included in Other accrued expenses)	\$ 9.4	\$ 0.5	\$ 9.9

Restructuring and Phased Closure of Arklow Facility

On January 30, 2008, the Company announced the phased closure of its breast implant manufacturing facility at Arklow, Ireland and the transfer of production to the Company's manufacturing plant in Costa Rica. The Arklow facility was acquired by the Company in connection with its 2006 acquisition of Inamed Corporation (Inamed) and employed approximately 360 people. As of March 31, 2009, all production activities at the Arklow facility had ceased. Certain employee retention termination benefits and accelerated depreciation costs related to inventory production in Arklow were capitalized to inventory as incurred and recognized as cost of sales in the periods the related products were sold.

The Company began to record costs associated with the closure of the Arklow manufacturing facility in the first quarter of 2008 and substantially completed all activities related to the restructuring and phased closure of the Arklow facility in the third quarter of 2009. The restructuring charges primarily consist of employee severance, one-time termination benefits, contract termination costs and other costs related to the closure of the Arklow manufacturing facility. During the three and nine month periods ended September 30, 2009, the Company recorded \$4.1 million and \$8.3 million of pre-tax restructuring charges, respectively. During the three and nine month periods ended September 30, 2008, the Company recorded a \$0.7 million restructuring charge reversal and \$26.9 million of pre-tax restructuring charges, respectively. During the three and nine month periods ended September 30, 2009, the Company recognized \$2.8 million and \$14.4 million, respectively, of cost of sales for the rollout of capitalized employee retention termination benefits and accelerated depreciation costs related to inventory production. During the nine month period ended September 30, 2009, the Company also recognized \$0.1 million of R&D expenses related to one-time termination benefits. During the three and nine month periods ended September 30, 2008, the Company recognized \$4.6 million and \$4.7 million, respectively, of cost of sales for the rollout of capitalized employee retention termination benefits and accelerated depreciation costs related to inventory production. During the three and nine month periods ended September 30, 2008, the Company also recognized \$0.1 million and \$0.8 million, respectively, of SG&A expenses and \$0.1 million and \$0.3 million, respectively, of R&D expenses related to one-time termination benefits and asset impairments.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents the restructuring activities related to the phased closure of the Arklow facility through September 30, 2009:

	Employee Severance	Contract Termination Costs	Other	Total
	(in millions)			
Net charge during 2008	\$ 20.5	\$ 5.6	\$ 1.1	\$ 27.2
Spending	(7.2)	(0.5)	(1.0)	(8.7)
Foreign exchange translation effects	(1.8)	(0.6)		(2.4)
Balance at December 31, 2008	11.5	4.5	0.1	16.1
Net charge during the nine month period ended September 30, 2009	3.4	4.0	0.9	8.3
Spending, net	(15.4)	(4.3)	(0.5)	(20.2)
Foreign exchange translation effects	(0.7)	0.2	0.2	(0.3)
Balance at September 30, 2009 (included in Other accrued expenses) (a)	\$ (1.2)	\$ 4.4	\$ 0.7	\$ 3.9

(a) Total accrued expenses are net of expected statutory employee severance reimbursements from government sponsored social benefit programs of approximately \$1.5 million.

Other Restructuring Activities and Integration Costs

Included in the nine month period ended September 30, 2009 is a \$0.3 million restructuring charge reversal related to the Company's closure of its collagen manufacturing facility in Fremont, California. Included in the three and nine month periods ended September 30, 2009 are \$0.1 million and \$0.2 million, respectively, of restructuring charges for an abandoned leased facility related to the Company's fiscal year 2005 restructuring and streamlining of its European operations.

Included in the three and nine month periods ended September 30, 2008 are \$0.5 million and \$0.9 million, respectively, of restructuring charges related to the Company's closure of its collagen manufacturing facility in Fremont, California. Included in the nine month period ended September 30, 2008 are \$3.1 million of restructuring charges for an abandoned leased facility related to the Company's fiscal year 2005 restructuring and streamlining of its European operations, \$6.6 million of restructuring charges related to the Company's 2007 acquisition of Groupe Cornéal Laboratoires (Cornéal) and \$0.1 million of restructuring charges related to the Company's 2007 acquisition of EndoArt SA.

Included in the three and nine month periods ended September 30, 2009 are \$0.2 million and \$0.4 million, respectively, of SG&A expenses related to transaction costs associated with the Samil acquisition. Included in the nine month period ended September 30, 2009 are \$0.4 million of SG&A expenses related to integration costs associated with the Cornéal acquisition. Included in the three month period ended September 30, 2008 are \$0.1 million of SG&A expenses, and in the nine month period ended September 30, 2008 are \$0.1 million of cost of sales and \$1.9 million of SG&A expenses, respectively, related to integration costs associated with the Company's 2007 acquisitions of Esprit Pharma Holding Company, Inc. and Cornéal.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 4: Intangibles**

At September 30, 2009 and December 31, 2008, the components of amortizable and unamortizable intangibles and certain other related information were as follows:

	September 30, 2009			December 31, 2008		
	Gross Amount (in millions)	Accumulated Amortization	Weighted Average Amortization Period (in years)	Gross Amount (in millions)	Accumulated Amortization	Weighted Average Amortization Period (in years)
Amortizable Intangible Assets:						
Developed technology	\$ 1,394.9	\$ (292.5)	14.3	\$ 1,390.8	\$ (215.0)	14.3
Customer relationships	42.3	(41.8)	3.1	42.3	(37.8)	3.1
Licensing	224.7	(96.4)	10.0	223.5	(78.9)	10.0
Trademarks	27.5	(18.4)	6.3	27.3	(14.9)	6.3
Core technology	192.6	(46.5)	15.2	190.4	(36.5)	15.2
Other	5.5	(0.2)	7.1			
	1,887.5	(495.8)	13.5	1,874.3	(383.1)	13.5
Unamortizable Intangible Assets:						
Business licenses				0.7		
	\$ 1,887.5	\$ (495.8)		\$ 1,875.0	\$ (383.1)	

Developed technology consists primarily of current product offerings, primarily saline and silicone gel breast implants, obesity intervention products, dermal fillers, skin care and urologics products acquired in connection with business combinations and asset acquisitions. Customer relationship assets consist of the estimated value of relationships with customers acquired in connection with the Inamed acquisition, primarily in the breast implant market in the United States. Licensing assets consist primarily of capitalized payments to third party licensors related to the achievement of regulatory approvals to commercialize products in specified markets and up-front payments associated with royalty obligations for products that have achieved regulatory approval for marketing. Core technology consists of proprietary technology associated with silicone gel breast implants, gastric bands and intragastric balloon systems acquired in connection with the Inamed acquisition, dermal filler technology acquired in connection with the Cornéal acquisition, gastric band technology acquired in connection with the EndoArt acquisition, and a drug delivery technology acquired in connection with the Company's 2003 acquisition of Oculex Pharmaceuticals, Inc. Other intangible assets consist of acquired product registration rights and distributor relationships.

The following table provides amortization expense by major categories of acquired amortizable intangible assets for the three and nine month periods ended September 30, 2009 and 2008, respectively:

	Three months ended		Nine months ended	
	September 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
	(in millions)		(in millions)	
Developed technology	\$ 25.4	\$ 25.7	\$ 75.8	\$ 71.3
Customer relationships	0.3	3.4	3.9	10.2
Licensing	5.8	5.8	17.4	15.2

Edgar Filing: ALLERGAN INC - Form 10-Q

Trademarks	1.1	1.2	3.3	3.6
Core technology	3.2	3.2	9.5	9.7
Other	0.2		0.2	
	\$ 36.0	\$ 39.3	\$ 110.1	\$ 110.0

Amortization expense related to acquired intangible assets generally benefits multiple business functions within the Company, such as the Company's ability to sell, manufacture, research, market and distribute products, compounds and intellectual property. The amount of amortization expense excluded from cost of sales consists primarily of amounts amortized with respect to developed technology and licensing intangible assets.

Estimated amortization expense is \$147.0 million for 2009, \$143.4 million for 2010, \$140.0 million for 2011, \$134.5 million for 2012 and \$121.3 million for 2013.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 5: Inventories**

Components of inventories were:

	September 30, 2009	December 31, 2008
	(in millions)	
Finished products	\$ 152.2	\$ 174.9
Work in process	34.7	36.8
Raw materials	42.6	50.8
Total	\$ 229.5	\$ 262.5

At September 30, 2009 and December 31, 2008, approximately \$5.3 million and \$11.2 million, respectively, of the Company's finished goods medical device inventories, primarily breast implants, were held on consignment at a large number of doctors' offices, clinics and hospitals worldwide. The value and quantity at any one location are not significant.

Note 6: Convertible Notes

In 2006, the Company issued the 2026 Convertible Notes for an aggregate principal amount of \$750.0 million. The 2026 Convertible Notes are unsecured and pay interest semi-annually on the principal amount of the notes at a rate of 1.50% per annum. The 2026 Convertible Notes will be convertible into cash and, if applicable, shares of the Company's common stock based on an initial conversion rate of 15.7904 shares of the Company's common stock per \$1,000 principal amount of the 2026 Convertible Notes if the Company's stock price reaches certain specified thresholds. As of September 30, 2009, the conversion criteria had not been met. The Company is permitted to redeem the 2026 Convertible Notes from and after April 5, 2009 to April 4, 2011 if the closing price of its common stock reaches a specified threshold, and will be permitted to redeem the 2026 Convertible Notes at any time on or after April 5, 2011. Holders of the 2026 Convertible Notes will also be able to require the Company to redeem the 2026 Convertible Notes on April 1, 2011, April 1, 2016 and April 1, 2021 or upon a change in control of the Company. The 2026 Convertible Notes mature on April 1, 2026, unless previously redeemed by the Company or earlier converted by the note holders.

The Company separately measures and accounts for the liability and equity components of the 2026 Convertible Notes. As of September 30, 2009, the carrying value of the liability component is \$611.3 million with an effective interest rate of 5.59%. The difference between the carrying value of the liability component and the principal amount of the 2026 Convertible Notes of \$649.7 million is recorded as debt discount and is being amortized to interest expense through the first noteholder put date in April 2011.

In the first quarter of 2009, the Company paid \$98.3 million to repurchase \$100.3 million principal amount of the 2026 Convertible Notes with a carrying value of \$92.3 million and a calculated fair value of approximately \$97.0 million. The Company recognized a \$4.7 million loss on extinguishment of the convertible debt. In addition, the Company wrote off \$0.6 million of related unamortized deferred debt issuances costs as loss on extinguishment of the convertible debt. The difference between the amount paid to repurchase the 2026 Convertible Notes and the calculated fair value of the liability component was recognized as a reduction to additional paid in capital, net of the effect of deferred taxes.

Note 7: Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally less than the U.S. federal statutory rate, primarily because of lower tax rates in certain non-U.S. jurisdictions, R&D tax credits available in the United States and other foreign jurisdictions and deductions available in the United States for domestic production activities. The effective tax rate may be subject to fluctuations during the year as new information is obtained, which may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pre-tax earnings in the various tax jurisdictions in which the Company operates, valuation allowances

Edgar Filing: ALLERGAN INC - Form 10-Q

against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, utilization of R&D tax credits and changes in or the interpretation of tax laws in jurisdictions where the Company conducts business. The Company recognizes deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of its assets and liabilities along with net operating loss and tax credit carryovers.

The Company records a valuation allowance against its deferred tax assets to reduce the net carrying value to an amount that it believes is more likely than not to be realized. When the Company establishes or reduces the valuation allowance against its deferred tax assets, the provision for income taxes will increase or decrease, respectively, in the period such determination is made. The valuation allowance against deferred tax assets was \$8.4 million as of September 30, 2009 and December 31, 2008.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In February 2009, the California Legislature enacted 2009-2010 budget legislation containing various California tax law changes including an election to apply a single sales factor apportionment formula for taxable years beginning on or after January 1, 2011. The Company anticipates making the election and as a result, the state and federal deferred tax assets and deferred tax liabilities have been re-determined to reflect an adjustment to the resulting tax rate. The impact of the adjustment was an increase to the provision for income taxes of \$1.5 million, which was reflected in the first quarter of 2009.

The total amount of unrecognized tax benefits was \$43.7 million and \$47.5 million as of September 30, 2009 and December 31, 2008, respectively. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate was \$41.7 million and \$42.0 million as of September 30, 2009 and December 31, 2008, respectively. The Company expects that during the next 12 months it is reasonably possible that unrecognized tax benefit liabilities will decrease by approximately \$15.0 million to \$16.0 million due to the settlement of income tax audits in the United States.

Total interest accrued related to uncertainty in income taxes included in the Company's unaudited condensed consolidated balance sheet was \$7.8 million and \$12.8 million as of September 30, 2009 and December 31, 2008, respectively.

The Company has not provided for withholding and U.S. taxes for the unremitted earnings of certain non-U.S. subsidiaries because it has currently reinvested these earnings indefinitely in these foreign operations. At December 31, 2008, the Company had approximately \$1,630.9 million in unremitted earnings outside the United States for which withholding and U.S. taxes were not provided. Income tax expense would be incurred if these funds were remitted to the United States. It is not practicable to estimate the amount of the deferred tax liability on such unremitted earnings. Upon remittance, certain foreign countries impose withholding taxes that are then available, subject to certain limitations, for use as credits against the Company's U.S. tax liability, if any. The Company annually updates its estimate of unremitted earnings outside the United States after the completion of each fiscal year.

Note 8: Share-Based Compensation

The Company recognizes compensation expense for all share-based awards made to employees and directors. The fair value of share-based awards is estimated at the grant date using the Black-Scholes option-pricing model and the portion that is ultimately expected to vest is recognized as compensation cost over the requisite service period using the straight-line single option method. The fair value of modifications to share-based awards is generally estimated using a lattice model.

The determination of fair value using the Black-Scholes and lattice option-pricing models is affected by the Company's stock price as well as assumptions regarding a number of highly complex and subjective variables, including expected stock price volatility, risk-free interest rate, expected dividends and projected employee stock option exercise behaviors. The Company estimates stock price volatility based on an equal weighting of the historical average over the expected life of the award and the average implied volatility of at-the-money options traded in the open market. The Company estimates employee stock option exercise behavior based on actual historical exercise activity and assumptions regarding future exercise activity of unexercised, outstanding options.

Share-based compensation expense is recognized only for those awards that are ultimately expected to vest, and the Company has applied an estimated forfeiture rate to unvested awards for the purpose of calculating compensation cost. These estimates will be revised in future periods if actual forfeitures differ from the estimates. Changes in forfeiture estimates impact compensation cost in the period in which the change in estimate occurs.

For the three and nine month periods ended September 30, 2009 and 2008, share-based compensation expense was as follows:

Three months ended		Nine months ended	
September 30,	September 30,	September 30,	September 30,
2009	2008	2009	2008
(in millions)		(in millions)	

Edgar Filing: ALLERGAN INC - Form 10-Q

Cost of sales	\$ 1.1	\$ 1.6	\$ 9.3	\$ 5.8
Selling, general and administrative	11.7	15.1	89.8	46.5
Research and development	4.1	5.7	34.2	17.3
Pre-tax share-based compensation expense	16.9	22.4	133.3	69.6
Income tax benefit	5.7	8.3	43.6	25.2
Net share-based compensation expense	\$ 11.2	\$ 14.1	\$ 89.7	\$ 44.4

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Share-based compensation expense for the three and nine month periods ended September 30, 2009 includes \$0.7 million and \$78.3 million, respectively, of pre-tax compensation expense from stock option modifications related to the 2009 restructuring plan.

As of September 30, 2009, total compensation cost related to non-vested stock options and restricted stock not yet recognized was approximately \$116.1 million, which is expected to be recognized over the next 48 months (33 months on a weighted-average basis). The Company has not capitalized as part of inventory any share-based compensation costs because such costs were negligible as of September 30, 2009.

Note 9: Employee Retirement and Other Benefit Plans

The Company sponsors various qualified defined benefit pension plans covering a substantial portion of its employees. In addition, the Company sponsors two supplemental nonqualified plans covering certain management employees and officers and one retiree health plan covering U.S. retirees and dependents.

Components of net periodic benefit cost for the three and nine month periods ended September 30, 2009 and 2008, respectively, were as follows:

	Three months ended			
	Pension Benefits		Other Postretirement Benefits	
	September 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
	(in millions)		(in millions)	
Service cost	\$ 5.8	\$ 6.3	\$ 0.4	\$ 0.3
Interest cost	9.4	8.6	0.6	0.5
Expected return on plan assets	(10.7)	(10.5)		
Amortization of prior service cost			(0.1)	
Recognized net actuarial loss	3.1	1.6		
Net periodic benefit cost	\$ 7.6	\$ 6.0	\$ 0.9	\$ 0.8

	Nine months ended			
	Pension Benefits		Other Postretirement Benefits	
	September 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
	(in millions)		(in millions)	
Service cost	\$ 17.1	\$ 19.1	\$ 1.2	\$ 1.1
Interest cost	27.9	26.2	1.8	1.7
Expected return on plan assets	(32.0)	(31.9)		
Amortization of prior service cost			(0.2)	(0.2)
Recognized net actuarial loss	9.4	4.8		
Net periodic benefit cost	\$ 22.4	\$ 18.2	\$ 2.8	\$ 2.6

In 2009, the Company expects to pay contributions of between \$10.0 million and \$15.0 million for its U.S. and non-U.S. pension plans and between \$1.0 million and \$2.0 million for its other postretirement plan.

Note 10: Legal Proceedings

The following supplements and amends the discussion set forth in Note 10 Legal Proceedings in the Company's Quarterly Report on Form 10-Q for the quarterly periods ended March 31, 2009 and June 30, 2009 and in Note 14 Legal Proceedings in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

In July 2008, a complaint entitled Kramer, Bryant, Spears, Doolittle, Clark, Whidden, Powell, Moore, Hennessey, Sody, Breeding, Downey, Underwood-Boswell, Reed-Momot, Purdon & Hahn v. Allergan, Inc. was filed in the Superior Court for the State of California for the County of Orange. The complaint makes allegations against the Company relating to

Table of Contents

ALLERGAN, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Botox[®] and *Botox*[®] Cosmetic including failure to warn, manufacturing defects, negligence, breach of implied and express warranties, deceit by concealment and negligent misrepresentation and seeks damages, attorneys' fees and costs. In 2009, the plaintiffs filed requests for dismissal without prejudice as to plaintiffs Hennessey, Hahn, Underwood-Boswell, Purdon, Moore, Clark, Reed-Momot and Whidden and the court dismissed these plaintiffs without prejudice. On October 7, 2009, the Company filed a motion for summary judgment against plaintiff Dee Spears. The court has scheduled a January 25, 2010 trial date related to plaintiff Dee Spears.

In March 2008, the Company received service of a Subpoena Duces Tecum from the U.S. Attorney, U.S. Department of Justice, Northern District of Georgia (DOJ). The subpoena requests the production of documents relating to the Company's sales and marketing practices in connection with *Botox*[®].

The Company is involved in various other lawsuits and claims arising in the ordinary course of business. These other matters are, in the opinion of management, immaterial both individually and in the aggregate with respect to the Company's consolidated financial position, liquidity or results of operations.

Because of the uncertainties related to the incurrence, amount and range of loss on any pending litigation, investigation, inquiry or claim, management is currently unable to predict the ultimate outcome of any litigation, investigation, inquiry or claim, determine whether a liability has been incurred or make an estimate of the reasonably possible liability that could result from an unfavorable outcome. The Company believes however, that the liability, if any, resulting from the aggregate amount of uninsured damages for any outstanding litigation, investigation or claim, other than the inquiry being conducted by the DOJ discussed herein or any related qui tam or other action and in Note 11, Contingencies, will not have a material adverse effect on the Company's consolidated financial position, liquidity or results of operations. However, an adverse ruling in a patent infringement lawsuit involving the Company could materially affect the Company's ability to sell one or more of its products or could result in additional competition. In view of the unpredictable nature of such matters, the Company cannot provide any assurances regarding the outcome of any litigation, investigation, inquiry or claim to which the Company is a party or the impact on the Company of an adverse ruling in such matters.

Note 11: Contingencies

During fiscal year 2008, the Company incurred approximately \$25.7 million of costs associated with the DOJ's inquiry discussed in Note 10, Legal Proceedings above. During the three and nine month periods ended September 30, 2009, the Company incurred \$8.4 million and \$23.6 million, respectively, of costs associated with the DOJ's inquiry. Costs associated with responding to the DOJ investigation are expected to total approximately \$30.0 million to \$34.0 million during fiscal year 2009. Estimated costs include attorneys' fees and costs associated with document production, imaging and information services support. Because of the uncertainties related to the incurrence, amount and range of loss, if any, that might be incurred related to this inquiry, management is currently unable to predict the ultimate outcome or determine whether a liability has been incurred or make an estimate of the reasonably possible liability that could result from an unfavorable outcome associated with this inquiry.

Note 12: Guarantees

The Company's Restated Certificate of Incorporation, as amended, provides that the Company will indemnify, to the fullest extent permitted by the Delaware General Corporation Law, each person that is involved in or is, or is threatened to be, made a party to any action, suit or proceeding by reason of the fact that he or she, or a person of whom he or she is the legal representative, is or was a director or officer of the Company or was serving at the request of the Company as a director, officer, employee or agent of another corporation or of a partnership, joint venture, trust or other enterprise. The Company has also entered into contractual indemnity agreements with each of its directors and executive officers pursuant to which, among other things, the Company has agreed to indemnify such directors and executive officers against any payments they are required to make as a result of a claim brought against such executive officer or director in such capacity, excluding claims (i) relating to the action or inaction of a director or executive officer that resulted in such director or executive officer gaining illegal personal profit or advantage, (ii) for an accounting of profits made from the purchase or sale of securities of the Company within the meaning of Section 16(b) of the Securities Exchange Act of 1934, as amended, or similar provisions of any state law or (iii) that are based upon or arise out of such director's or executive officer's knowingly fraudulent, deliberately dishonest or willful misconduct. The maximum potential amount of future payments that the Company could be required to make under these indemnification provisions is unlimited. However, the Company has

Edgar Filing: ALLERGAN INC - Form 10-Q

purchased directors and officers liability insurance policies intended to reduce the Company's monetary exposure and to enable the Company to recover a portion of any future amounts paid. The Company has not previously paid any material amounts to defend lawsuits.

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

or settle claims as a result of these indemnification provisions. As a result, the Company believes the estimated fair value of these indemnification arrangements is minimal.

The Company customarily agrees in the ordinary course of its business to indemnification provisions in agreements with clinical trials investigators in its drug, biologics and medical device development programs, in sponsored research agreements with academic and not-for-profit institutions, in various comparable agreements involving parties performing services for the Company in the ordinary course of business, and in its real estate leases. The Company also customarily agrees to certain indemnification provisions in its discovery and development collaboration agreements. With respect to the Company's clinical trials and sponsored research agreements, these indemnification provisions typically apply to any claim asserted against the investigator or the investigator's institution relating to personal injury or property damage, violations of law or certain breaches of the Company's contractual obligations arising out of the research or clinical testing of the Company's products, compounds or drug candidates. With respect to real estate lease agreements, the indemnification provisions typically apply to claims asserted against the landlord relating to personal injury or property damage caused by the Company, to violations of law by the Company or to certain breaches of the Company's contractual obligations. The indemnification provisions appearing in the Company's collaboration agreements are similar, but in addition provide some limited indemnification for the collaborator in the event of third party claims alleging infringement of intellectual property rights. In each of the above cases, the terms of these indemnification provisions generally survive the termination of the agreement. The maximum potential amount of future payments that the Company could be required to make under these provisions is generally unlimited. The Company has purchased insurance policies covering personal injury, property damage and general liability intended to reduce the Company's exposure for indemnification and to enable the Company to recover a portion of any future amounts paid. The Company has not previously paid any material amounts to defend lawsuits or settle claims as a result of these indemnification provisions. As a result, the Company believes the estimated fair value of these indemnification arrangements is minimal.

Note 13: Product Warranties

The Company provides warranty programs for breast implant sales primarily in the United States, Europe and certain other countries. Management estimates the amount of potential future claims from these warranty programs based on actuarial analyses. Expected future obligations are determined based on the history of product shipments and claims and are discounted to a current value. The liability is included in both current and long-term liabilities in the Company's consolidated balance sheets. The U.S. programs include the *ConfidencePlus*® and *ConfidencePlus*® Premier warranty programs. The *ConfidencePlus*® program generally provides lifetime product replacement and \$1,200 of financial assistance for surgical procedures within ten years of implantation. The *ConfidencePlus*® Premier program, which normally requires a low additional enrollment fee, generally provides lifetime product replacement, \$2,400 of financial assistance for surgical procedures within ten years of implantation and contralateral implant replacement. The enrollment fee is deferred and recognized as income over the ten year warranty period for financial assistance. The warranty programs in non-U.S. markets have similar terms and conditions to the U.S. programs. The Company does not warrant any level of aesthetic result and, as required by government regulation, makes extensive disclosures concerning the risks of the use of its products and breast implant surgery. Changes to actual warranty claims incurred and interest rates could have a material impact on the actuarial analysis and the Company's estimated liabilities. A large majority of the product warranty liability arises from the U.S. warranty programs. The Company does not currently offer any similar warranty program on any other product.

The following table provides a reconciliation of the change in estimated product warranty liabilities through September 30, 2009:

	(in millions)
Balance at December 31, 2008	\$ 29.5
Provision for warranties issued during the period	4.6
Settlements made during the period	(4.2)
Balance at September 30, 2009	\$ 29.9
Current portion	\$ 6.6

Edgar Filing: ALLERGAN INC - Form 10-Q

Non-current portion	23.3
Total	\$ 29.9

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 14: Earnings Per Share**

The table below presents the computation of basic and diluted earnings per share:

	Three months ended		Nine months ended	
	September 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
	(in millions, except per share amounts)			
Net earnings attributable to Allergan, Inc.	\$ 179.0	\$ 165.4	\$ 399.8	\$ 416.5
Weighted average number of shares issued	303.5	303.8	303.7	304.4
Net shares assumed issued using the treasury stock method for options and non-vested equity shares and share units outstanding during each period based on average market price	2.5	2.5	1.7	2.8
Diluted shares	306.0	306.3	305.4	307.2
Earnings per share attributable to Allergan, Inc. stockholders:				
Basic	\$ 0.59	\$ 0.54	\$ 1.32	\$ 1.37
Diluted	\$ 0.58	\$ 0.54	\$ 1.31	\$ 1.36

For the three and nine month periods ended September 30, 2009, options to purchase 11.5 million and 16.0 million shares of common stock at exercise prices ranging from \$46.66 to \$65.63 and \$39.67 to \$65.63 per share, respectively, were outstanding but were not included in the computation of diluted earnings per share because the effect from the assumed exercise of these options calculated under the treasury stock method would be anti-dilutive. There were no potentially diluted common shares related to the Company's 2026 Convertible Notes for the three and nine month periods ended September 30, 2009, as the Company's average stock price for the respective periods was less than the conversion price of the notes.

For the three and nine month periods ended September 30, 2008, options to purchase 11.4 million and 11.3 million shares of common stock at exercise prices ranging from \$48.07 to \$65.63 per share, respectively, were outstanding but were not included in the computation of diluted earnings per share because the effect from the assumed exercise of these options calculated under the treasury stock method would be anti-dilutive. There were no potentially diluted common shares related to the Company's 2026 Convertible Notes for the three and nine month periods ended September 30, 2008, as the Company's average stock price for the respective periods was less than the conversion price of the notes.

Note 15: Comprehensive Income

The following table summarizes the components of comprehensive income for the three and nine month periods ended September 30, 2009 and 2008:

Note 16: Financial Instruments

In the normal course of business, operations of the Company are exposed to risks associated with fluctuations in interest rates and foreign currency exchange rates. The Company addresses these risks through controlled risk management that includes the use of derivative financial instruments to economically hedge or reduce these exposures. The Company does not enter into derivative financial instruments for trading or speculative purposes.

The Company has not experienced any losses to date on its derivative financial instruments due to counterparty credit risk.

To ensure the adequacy and effectiveness of its interest rate and foreign exchange hedge positions, the Company continually monitors its interest rate swap positions and foreign exchange forward and option positions both on a stand-alone basis and in conjunction with its underlying interest rate and foreign currency exposures, from an accounting and economic perspective.

However, given the inherent limitations of forecasting and the anticipatory nature of the exposures intended to be hedged, the Company cannot assure that such programs will offset more than a portion of the adverse financial impact resulting from unfavorable movements in either interest or foreign exchange rates. In addition, the timing of the accounting for recognition of gains and losses related to mark-to-market instruments for any given period may not coincide with the timing of gains and losses related to the underlying economic exposures and, therefore, may adversely affect the Company's consolidated operating results and financial position.

Interest Rate Risk Management

The Company's interest income and expense is more sensitive to fluctuations in the general level of U.S. interest rates than to changes in rates in other markets. Changes in U.S. interest rates affect the interest earned on cash and equivalents, interest expense on debt as well as costs associated with foreign currency contracts.

On January 31, 2007, the Company entered into a nine-year, two-month interest rate swap with a \$300.0 million notional amount with semi-annual settlements and quarterly interest rate reset dates. The swap receives interest at a fixed rate of 5.75% and pays interest at a variable interest rate equal to 3-month LIBOR plus 0.368%, and effectively converts \$300.0 million of the Company's \$800.0 million in aggregate

Edgar Filing: ALLERGAN INC - Form 10-Q

principal amount of 5.75% Senior Notes due 2016 (2016 Notes) to a variable interest rate. Based on the structure of the hedging relationship, the hedge meets the criteria for using the short-cut method for a fair value hedge. The investment in the derivative and the related long-term debt are recorded at fair value. At September 30, 2009 and December 31, 2008, the Company recognized in its consolidated balance sheets an asset reported in Investments and other assets and a corresponding increase in Long-term debt associated with the fair value of the derivative of \$38.0 million and \$61.9 million, respectively. The differential to be paid or received as interest rates change is accrued and recognized as an adjustment of interest expense related to the 2016 Notes. During the three and nine month periods ended September 30, 2009, the Company recognized \$3.8 million and \$10.5 million, respectively, as a reduction of interest expense due to the differential to be received. During the three and nine month periods ended September 30, 2008,

Table of Contents

ALLERGAN, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the Company recognized \$1.0 million and \$4.9 million, respectively, as a reduction of interest expense due to the differential to be received.

In February 2006, the Company entered into interest rate swap contracts based on 3-month LIBOR with an aggregate notional amount of \$800.0 million, a swap period of 10 years and a starting swap rate of 5.198%. The Company entered into these swap contracts as a cash flow hedge to effectively fix the future interest rate for the 2016 Notes. In April 2006, the Company terminated the interest rate swap contracts and received approximately \$13.0 million. The total gain was recorded to accumulated other comprehensive loss and is being amortized as a reduction to interest expense over a 10 year period to match the term of the 2016 Notes. During the three and nine month periods ended September 30, 2009 and 2008, the Company recognized \$0.3 million and \$1.0 million, respectively, as a reduction of interest expense due to the amortization of deferred holding gains on derivatives designated as cash flow hedges. These amounts were reclassified from accumulated other comprehensive loss. As of September 30, 2009, the remaining unrecognized gain of \$8.5 million (\$5.1 million, net of tax) is recorded as a component of accumulated other comprehensive loss. The Company expects to reclassify an estimated pre-tax amount of \$1.3 million from accumulated other comprehensive loss as a reduction in interest expense during fiscal year 2009 due to the amortization of deferred holding gains on derivatives designated as cash flow hedges.

No portion of amounts recognized from contracts designated as cash flow hedges were considered to be ineffective during the three and nine month periods ended September 30, 2009 and 2008, respectively.

Foreign Exchange Risk Management

Overall, the Company is a net recipient of currencies other than the U.S. dollar and, as such, benefits from a weaker dollar and is adversely affected by a stronger dollar relative to major currencies worldwide. Accordingly, changes in exchange rates, and in particular a strengthening of the U.S. dollar, may negatively affect the Company's consolidated revenues or operating costs and expenses as expressed in U.S. dollars.

From time to time, the Company enters into foreign currency option and forward contracts to reduce earnings and cash flow volatility associated with foreign exchange rate changes to allow management to focus its attention on its core business issues. Accordingly, the Company enters into various contracts which change in value as foreign exchange rates change to economically offset the effect of changes in the value of foreign currency assets and liabilities, commitments and anticipated foreign currency denominated sales and operating expenses. The Company enters into foreign currency option and forward contracts in amounts between minimum and maximum anticipated foreign exchange exposures, generally for periods not to exceed one year. The Company does not designate these derivative instruments as accounting hedges.

The Company uses foreign currency option contracts, which provide for the sale or purchase of foreign currencies to offset foreign currency exposures expected to arise in the normal course of the Company's business. While these instruments are subject to fluctuations in value, such fluctuations are anticipated to offset changes in the value of the underlying exposures.

Probable but not firmly committed transactions are comprised of sales of products and purchases of raw material in currencies other than the U.S. dollar. A majority of these sales are made through the Company's subsidiaries in Europe, Asia Pacific, Canada and Brazil. The Company purchases foreign exchange option contracts to economically hedge the currency exchange risks associated with these probable but not firmly committed transactions. The duration of foreign exchange hedging instruments, whether for firmly committed transactions or for probable but not firmly committed transactions, generally does not exceed one year.

All of the Company's outstanding foreign currency option contracts are entered into to reduce the volatility of earnings generated in currencies other than the U.S. dollar, primarily earnings denominated in the Canadian dollar, Mexican peso, Australian dollar, Brazilian real, euro, and Japanese yen. Current changes in the fair value of open foreign currency option contracts are recorded through earnings as *Unrealized gain (loss) on derivative instruments, net* while any realized gains (losses) on settled contracts are recorded through earnings as *Other, net* in the accompanying unaudited condensed consolidated statements of earnings. During the three and nine month periods ended September 30, 2009, the Company recognized realized gains on settled foreign currency option contracts of \$1.2 million and \$10.6 million, respectively. During the three and nine month periods ended September 30, 2008, the Company recognized realized gains on settled foreign currency option contracts of \$0.5 million and \$0.7 million, respectively. The premium costs of purchased foreign exchange option contracts are recorded in *Other current assets* and amortized to *Other, net* over the life of the options.

Edgar Filing: ALLERGAN INC - Form 10-Q

All of the Company's outstanding foreign exchange forward contracts are entered into to protect the value of certain intercompany receivables or payables that are subject to fluctuations in foreign currency exchange rates. The realized and unrealized gains and losses from foreign currency forward contracts and the revaluation of the foreign denominated

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

intercompany receivables or payables are recorded through Other, net in the accompanying unaudited condensed consolidated statements of earnings. During the three and nine month periods ended September 30, 2009, the Company recognized total realized and unrealized losses from foreign exchange forward contracts of \$4.8 million and \$10.7 million, respectively. During the three and nine month periods ended September 30, 2008, the Company recognized total realized and unrealized gains from foreign exchange forward contracts of \$17.1 million and \$10.6 million, respectively.

The fair value of outstanding foreign exchange option and forward contracts, collectively referred to as foreign currency derivative financial instruments, are recorded in Other current assets and Accounts payable, respectively. At September 30, 2009 and December 31, 2008, foreign currency derivative assets associated with the foreign exchange option contracts of \$0.8 million and \$24.3 million, respectively, were included in Other current assets. At September 30, 2009 and December 31, 2008, net foreign currency derivative liabilities associated with the foreign exchange forward contracts of \$0.1 million and \$0.9 million, respectively, were included in Accounts payable.

At September 30, 2009 and December 31, 2008, the notional principal and fair value of the Company's outstanding foreign currency derivative financial instruments were as follows:

	September 30, 2009		December 31, 2008	
	Notional Principal	Fair Value	Notional Principal	Fair Value
	(in millions)			
Foreign currency forward exchange contracts (Receive U.S. dollar/pay foreign currency)	\$ 106.5	\$ (1.1)	\$ 112.2	\$ (3.6)
Foreign currency forward exchange contracts (Pay U.S. dollar/receive foreign currency)	43.7	1.0	63.3	2.7
Foreign currency sold put options	63.0	0.8	216.5	24.3

The notional principal amounts provide one measure of the transaction volume outstanding as of September 30, 2009 and December 31, 2008, and do not represent the amount of the Company's exposure to market loss. The estimates of fair value are based on applicable and commonly used pricing models using prevailing financial market information as of September 30, 2009 and December 31, 2008. The amounts ultimately realized upon settlement of these financial instruments, together with the gains and losses on the underlying exposures, will depend on actual market conditions during the remaining life of the instruments.

Other Financial Instruments

At September 30, 2009 and December 31, 2008, the Company's other financial instruments included cash and equivalents, trade receivables, equity investments, accounts payable and borrowings. The carrying amount of cash and equivalents, trade receivables and accounts payable approximates fair value due to the short-term maturities of these instruments. The fair value of marketable equity investments, notes payable and long-term debt were estimated based on quoted market prices and interest rates. The fair value of non-marketable equity investments which represent investments in start-up technology companies or partnerships that invest in start-up technology companies, are estimated based on the fair value and other information provided by these ventures.

The carrying amount and estimated fair value of the Company's other financial instruments at September 30, 2009 and December 31, 2008 were as follows:

	September 30, 2009		December 31, 2008	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value

Edgar Filing: ALLERGAN INC - Form 10-Q

	(in millions)			
Cash and equivalents	\$ 1,698.6	\$ 1,698.6	\$ 1,110.4	\$ 1,110.4
Non-current investments:				
Marketable equity			0.6	0.6
Non-marketable equity	5.1	5.1	5.3	5.3
Notes payable	16.3	16.3	4.4	4.4
Long-term debt	881.5	912.4	885.3	860.9
Long-term convertible notes	611.3	653.5	685.2	712.9

Marketable equity investments include unrealized holding losses, net of tax of \$1.4 million at December 31, 2008, which are included as a component of Accumulated other comprehensive loss in the consolidated balance sheet. The Company sold all of its marketable equity investments in the third quarter of 2009 and recognized a pre-tax loss of \$0.7 million. In July 2009, the Company sold a non-marketable equity investment in connection with a third-party tender offer for

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

the business underlying the equity investment and recognized a \$25.3 million pre-tax gain. During the three and nine month periods ended September 30, 2009, the Company recognized unrealized pre-tax holding gains related to changes in the fair value of marketable equity investments of \$2.0 million and \$2.9 million, respectively, as a component of Other comprehensive income (loss). During the three and nine month periods ended September 30, 2008, the Company recognized unrealized pre-tax holding losses related to changes in the fair value of marketable equity investments of \$0.7 million and \$4.8 million, respectively, as a component of Other comprehensive income (loss).

Concentration of Credit Risk

Financial instruments that potentially subject the Company to credit risk principally consist of trade receivables. Wholesale distributors, major retail chains and managed care organizations account for a substantial portion of trade receivables. This risk is limited due to the number of customers comprising the Company's customer base, and their geographic dispersion. At September 30, 2009, no single customer represented more than 10% of trade receivables, net. Ongoing credit evaluations of customers' financial condition are performed and, generally, no collateral is required. The Company has purchased an insurance policy intended to reduce the Company's exposure to potential credit risks associated with certain U.S. customers. To date, no claims have been made against the insurance policy. The Company maintains reserves for potential credit losses and such losses, in the aggregate, have not exceeded management's estimates.

Note 17: Fair Value Measurements

The Company measures fair value based on the prices that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based on a three-tier hierarchy that prioritizes the inputs used to measure fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs for which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

As of September 30, 2009, the Company has certain assets and liabilities that are required to be measured at fair value on a recurring basis. These include commercial paper and foreign time deposits classified as cash equivalents, other cash equivalents, foreign exchange derivatives and the interest rate swap with a \$300.0 million notional amount. These assets and liabilities are classified in the table below in one of the three categories of the fair value hierarchy described above.

	Total	Level 1	Level 2	Level 3
	(in millions)			
Assets				
Commercial paper	\$ 232.6	\$ 232.6	\$	\$
Foreign time deposits	144.3	144.3		
Other cash equivalents	1,206.7	1,206.7		
Foreign exchange derivative assets	0.7		0.7	
Interest rate swap derivative asset	38.0		38.0	
	\$ 1,622.3	\$ 1,583.6	\$ 38.7	\$
Liabilities				
Interest rate swap derivative liability	\$ 38.0	\$	\$ 38.0	\$

Commercial paper, foreign time deposits and other cash equivalents are valued at cost, which approximates fair value due to the short-term maturities of these instruments. Foreign currency derivative assets and liabilities are valued using quoted forward foreign exchange prices and

Edgar Filing: ALLERGAN INC - Form 10-Q

option volatility at the reporting date. The interest rate swap derivative asset and liability are valued using LIBOR yield curves at the reporting date. The Company believes the fair values assigned to its derivative instruments as of September 30, 2009 are based upon reasonable estimates and assumptions.

Note 18: Business Segment Information

The Company operates its business on the basis of two reportable segments – specialty pharmaceuticals and medical devices. The specialty pharmaceuticals segment produces a broad range of pharmaceutical products, including: ophthalmic products for glaucoma therapy, ocular inflammation, infection, allergy and chronic dry eye; *Botox*® for certain therapeutic and

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

aesthetic indications; skin care products for acne, psoriasis, eyelash growth and other prescription and over-the-counter dermatological products; and urologics products. The medical devices segment produces a broad range of medical devices, including: breast implants for augmentation, revision and reconstructive surgery; obesity intervention products, including the *Lap-Band*[®] System and the *Orbera* Intra-gastric Balloon System (formerly known as the *BIB*[®] System); and facial aesthetics products. The Company provides global marketing strategy teams to ensure development and execution of a consistent marketing strategy for its products in all geographic regions that share similar distribution channels and customers.

The Company evaluates segment performance on a revenue and operating income basis exclusive of general and administrative expenses and other indirect costs, restructuring charges, in-process research and development expenses, amortization of identifiable intangible assets related to business combinations and asset acquisitions and certain other adjustments, which are not allocated to the Company's segments for performance assessment by the Company's chief operating decision maker. Other adjustments excluded from the Company's segments for performance assessment represent income or expenses that do not reflect, according to established Company-defined criteria, operating income or expenses associated with the Company's core business activities. Because operating segments are generally defined by the products they design and sell, they do not make sales to each other. The Company does not discretely allocate assets to its operating segments, nor does the Company's chief operating decision maker evaluate operating segments using discrete asset information.

Operating Segments

	Three months ended		Nine months ended	
	September 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
	(in millions)		(in millions)	
Product net sales:				
Specialty pharmaceuticals	\$ 940.6	\$ 872.5	\$ 2,688.7	\$ 2,656.5

Total operating income	\$ 236.5	\$ 237.4	\$ 611.1	\$ 612.4

(a) Represents amortization of identifiable intangible assets related to business combinations and asset acquisitions and related capitalized licensing costs, as applicable.

Edgar Filing: ALLERGAN INC - Form 10-Q

Product net sales for the Company's various global product portfolios are presented below. The Company's principal markets are the United States, Europe, Latin America and Asia Pacific. The U.S. information is presented separately as it is the Company's headquarters country. U.S. sales, including manufacturing operations, represented 64.9% and 64.1% of the Company's total consolidated product net sales for the three month periods ended September 30, 2009 and 2008, respectively, and 65.8% and 63.8% of the Company's total consolidated product net sales for the nine month periods ended September 30, 2009 and 2008, respectively.

Sales to two customers in the Company's specialty pharmaceuticals segment each generated over 10% of the Company's total consolidated product net sales. Sales to Cardinal Health for the three month periods ended September 30, 2009 and 2008 were 14.8% and 13.2%, respectively, of the Company's total consolidated product net sales, and 13.3% and 11.7%, respectively, of the Company's total consolidated product net sales for the nine month periods ended September 30, 2009 and 2008. Sales to McKesson Drug Company for the three month periods ended September 30, 2009 and 2008 were 13.9% and 12.0%, respectively, of the Company's total consolidated product net sales, and 12.8% and 12.1%, respectively, of the Company's total consolidated product net sales for the nine month periods ended September 30, 2009 and 2008. No other country or single customer generates over 10% of the Company's total consolidated product net sales. Net sales for the

Table of Contents**ALLERGAN, INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Europe region also include sales to customers in Africa and the Middle East, and net sales in the Asia Pacific region include sales to customers in Australia and New Zealand.

Long-lived assets are assigned to geographic regions based upon management responsibility for such items.

Table of Contents**ALLERGAN, INC.****Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

This financial review presents our operating results for the three and nine month periods ended September 30, 2009 and 2008, and our financial condition at September 30, 2009. The following discussion contains forward-looking statements which are subject to known and unknown risks, uncertainties and other factors that may cause our actual results to differ materially from those expressed or implied by such forward-looking statements. We discuss such risks, uncertainties and other factors throughout this report and specifically under the caption *Risk Factors* in Part II, Item 1A below. The following review should be read in connection with the information presented in our unaudited condensed consolidated financial statements and related notes for the three and nine month periods ended September 30, 2009 included in this report and our audited consolidated financial statements and related notes for the year ended December 31, 2008 included in our 2008 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Critical Accounting Policies, Estimates and Assumptions

The preparation and presentation of financial statements in conformity with accounting principles generally accepted in the United States, or GAAP, requires us to establish policies and to make estimates and assumptions that affect the amounts reported in our consolidated financial statements. In our judgment, the accounting policies, estimates and assumptions described below have the greatest potential impact on our consolidated financial statements. Accounting assumptions and estimates are inherently uncertain and actual results may differ materially from our estimates.

Revenue Recognition

We recognize revenue from product sales when goods are shipped and title and risk of loss transfer to our customers. A substantial portion of our revenue is generated by the sale of specialty pharmaceutical products (primarily eye care pharmaceuticals, skin care and urologics products) to wholesalers within the United States, and we have a policy to attempt to maintain average U.S. wholesaler inventory levels at an amount less than eight weeks of our net sales. A portion of our revenue is generated from consigned inventory of breast implants maintained at physician, hospital and clinic locations. These customers are contractually obligated to maintain a specific level of inventory and to notify us upon the use of consigned inventory. Revenue for consigned inventory is recognized at the time we are notified by the customer that the product has been used. Notification is usually through the replenishing of the inventory, and we periodically review consignment inventories to confirm the accuracy of customer reporting.

We generally offer cash discounts to customers for the early payment of receivables. Those discounts are recorded as a reduction of revenue and accounts receivable in the same period that the related sale is recorded. The amounts reserved for cash discounts were \$3.6 million and \$3.3 million at September 30, 2009 and December 31, 2008, respectively. Provisions for cash discounts deducted from consolidated sales in the third quarter of 2009 and 2008 were \$13.2 million and \$10.6 million, respectively. Provisions for cash discounts deducted from consolidated sales in the first nine months of 2009 and 2008 were \$36.2 million and \$31.4 million, respectively.

We permit returns of product from most product lines by any class of customer if such product is returned in a timely manner, in good condition and from normal distribution channels. Return policies in certain international markets and for certain medical device products, primarily breast implants, provide for more stringent guidelines in accordance with the terms of contractual agreements with customers. Our estimates for sales returns are based upon the historical patterns of product returns matched against sales, and management's evaluation of specific factors that may increase the risk of product returns. The amount of allowances for sales returns recognized in our consolidated balance sheets at September 30, 2009 and December 31, 2008 were \$29.7 million and \$25.3 million, respectively, and are recorded in *Other accrued expenses* and *Trade receivables, net* in our consolidated balance sheets. Provisions for sales returns deducted from consolidated sales were \$82.7 million and \$74.7 million in the third quarter of 2009 and 2008, respectively. Provisions for sales returns deducted from consolidated sales were \$263.7 million and \$240.6 million in the first nine months of 2009 and 2008, respectively. The increase in the provision for sales returns in the third quarter and first nine months of 2009 compared to the third quarter and first nine months of 2008 is primarily due to a small increase in estimated product return rates for our specialty pharmaceuticals products and increased sales returns related to breast implant products. Historical allowances for cash discounts and product returns have been within the amounts reserved or accrued.

We participate in various managed care sales rebate and other incentive programs, the largest of which relates to Medicaid, Medicare and Department of Veterans Affairs. Sales rebate and other incentive programs also include contractual volume rebate programs and chargebacks, which are contractual discounts given primarily to federal government agencies, health maintenance organizations, pharmacy benefits managers and group purchasing organizations. We also offer rebate and other incentive programs for our aesthetic products, including *Botox*[®] Cosmetic, *Juvéderm*[®] and *Latisse*[®], and for certain skin

Table of Contents

care products. Sales rebates and incentive accruals reduce revenue in the same period that the related sale is recorded and are included in Other accrued expenses in our consolidated balance sheets. The amounts accrued for sales rebates and other incentive programs were \$120.5 million and \$100.9 million at September 30, 2009 and December 31, 2008, respectively. Provisions for sales rebates and other incentive programs deducted from consolidated sales were \$121.2 million and \$76.9 million in the third quarter of 2009 and 2008, respectively. Provisions for sales rebates and other incentive programs deducted from consolidated sales were \$319.6 million and \$224.6 million in the first nine months of 2009 and 2008, respectively. The increases in the amounts accrued at September 30, 2009 compared to December 31, 2008 and the provisions for sales rebates and other incentive programs in the third quarter and the first nine months of 2009 compared to the third quarter and first nine months of 2008 are primarily due to increased incentive programs, principally related to our eye care pharmaceuticals, *Botox*[®] Cosmetic, skin care and facial aesthetics products. In addition, an increase in our published list prices in the United States for pharmaceutical products, which occurred for several of our products early in each of 2009 and 2008, generally results in higher provisions for sales rebates and other incentive programs deducted from consolidated sales.

Our procedures for estimating amounts accrued for sales rebates and other incentive programs at the end of any period are based on available quantitative data and are supplemented by management's judgment with respect to many factors, including but not limited to, current market dynamics, changes in contract terms, changes in sales trends, an evaluation of current laws and regulations and product pricing. Quantitatively, we use historical sales, product utilization and rebate data and apply forecasting techniques in order to estimate our liability amounts. Qualitatively, management's judgment is applied to these items to modify, if appropriate, the estimated liability amounts. There are inherent risks in this process. For example, customers may not achieve assumed utilization levels; customers may misreport their utilization to us; and actual movements of the U.S. Consumer Price Index-Urban, or CPI-U, which affect our rebate programs with U.S. federal and state government agencies, may differ from those estimated. On a quarterly basis, adjustments to our estimated liabilities for sales rebates and other incentive programs related to sales made in prior periods have not been material and have generally been less than 0.5% of consolidated product net sales. An adjustment to our estimated liabilities of 0.5% of consolidated product net sales on a quarterly basis would result in an increase or decrease to net sales and earnings before income taxes of approximately \$5.0 million to \$6.0 million. The sensitivity of our estimates can vary by program and type of customer. Additionally, there is a significant time lag between the date we determine the estimated liability and when we actually pay the liability. Due to this time lag, we record adjustments to our estimated liabilities over several periods, which can result in a net increase to earnings or a net decrease to earnings in those periods. Material differences may result in the amount of revenue we recognize from product sales if the actual amount of rebates and incentives differ materially from the amounts estimated by management.

We recognize license fees, royalties and reimbursement income for services provided as other revenues based on the facts and circumstances of each contractual agreement. In general, we recognize income upon the signing of a contractual agreement that grants rights to products or technology to a third party if we have no further obligation to provide products or services to the third party after entering into the contract. We defer income under contractual agreements when we have further obligations that indicate that a separate earnings process has not been completed.

Pensions

We sponsor various pension plans in the United States and abroad in accordance with local laws and regulations. Our U.S. pension plans account for a large majority of our aggregate pension plans' net periodic benefit costs and projected benefit obligations. In connection with these plans, we use certain actuarial assumptions to determine the plans' net periodic benefit costs and projected benefit obligations, the most significant of which are the expected long-term rate of return on assets and the discount rate.

Our assumption for the weighted average expected long-term rate of return on assets in our U.S. funded pension plans for determining the net periodic benefit cost is 8.25% for 2009, which is the same rate used for 2008. Our assumptions for the weighted average expected long-term rate of return on assets in our non-U.S. funded pension plans are 6.03% and 6.82% for 2009 and 2008, respectively. For our U.S. funded pension plan, we determine, based upon recommendations from our pension plans' investment advisors, the expected rate of return using a building block approach that considers diversification and rebalancing for a long-term portfolio of invested assets. Our investment advisors study historical market returns and preserve long-term historical relationships between equities and fixed income in a manner consistent with the widely-accepted capital market principle that assets with higher volatility generate a greater return over the long run. They also evaluate market factors such as inflation and interest rates before long-term capital market assumptions are determined. For our non-U.S. funded pension plans, the expected rate of return was determined based on asset distribution and assumed long-term rates of return on fixed income instruments and equities. Market conditions and other factors can vary over time and could significantly affect our estimates of the weighted average expected long-term rate of return on plan assets. The expected rate of return is applied to the market-related value of plan assets. As a sensitivity measure, the effect of a 0.25% decline in our rate of return on assets assumptions for our U.S. and non-U.S. funded pension plans would increase our

Table of Contents

expected 2009 pre-tax pension benefit cost by approximately \$1.4 million.

The weighted average discount rates used to calculate our U.S. and non-U.S. pension benefit obligations at December 31, 2008 were 6.19% and 5.71%, respectively. The weighted average discount rates used to calculate our U.S. and non-U.S. net periodic benefit costs for 2009 are 6.19% and 5.71%, respectively, and for 2008 were 6.25% and 5.50%, respectively. We determine the discount rate based upon a hypothetical portfolio of high quality fixed income investments with maturities that mirror the pension benefit obligations at the plans' measurement date. Market conditions and other factors can vary over time and could significantly affect our estimates for the discount rates used to calculate our pension benefit obligations and net periodic benefit costs for future years. As a sensitivity measure, the effect of a 0.25% decline in the discount rate assumption for our U.S. and non-U.S. pension plans would increase our expected 2009 pre-tax pension benefit costs by approximately \$3.6 million and increase our pension plans' projected benefit obligations at December 31, 2008 by approximately \$26.9 million.

Share-Based Compensation

We recognize compensation expense for all share-based awards made to employees and directors. The fair value of share-based awards is estimated at the grant date using the Black-Scholes option-pricing model and the portion that is ultimately expected to vest is recognized as compensation cost over the requisite service period using the straight-line single option method. The fair value of modifications to share-based awards is generally estimated using a lattice model.

The determination of fair value using the Black-Scholes and lattice option-pricing models is affected by our stock price as well as assumptions regarding a number of complex and subjective variables, including expected stock price volatility, risk-free interest rate, expected dividends and projected employee stock option exercise behaviors. We currently estimate stock price volatility based upon an equal weighting of the historical average over the expected life of the award and the average implied volatility of at-the-money options traded in the open market. We estimate employee stock option exercise behavior based on actual historical exercise activity and assumptions regarding future exercise activity of unexercised, outstanding options.

Share-based compensation expense is recognized only for those awards that are ultimately expected to vest, and we have applied an estimated forfeiture rate to unvested awards for the purpose of calculating compensation cost. These estimates will be revised in future periods if actual forfeitures differ from the estimates. Changes in forfeiture estimates impact compensation cost in the period in which the change in estimate occurs.

Income Taxes

The provision for income taxes is determined using an estimated annual effective tax rate, which is generally less than the U.S. federal statutory rate, primarily because of lower tax rates in certain non-U.S. jurisdictions, research and development, or R&D, tax credits available in the United States and other foreign jurisdictions and deductions available in the United States for domestic production activities. Our effective tax rate may be subject to fluctuations during the year as new information is obtained, which may affect the assumptions used to estimate the annual effective tax rate, including factors such as the mix of pre-tax earnings in the various tax jurisdictions in which we operate, valuation allowances against deferred tax assets, the recognition or derecognition of tax benefits related to uncertain tax positions, utilization of R&D tax credits and changes in or the interpretation of tax laws in jurisdictions where we conduct business. We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities along with net operating loss and tax credit carryovers.

We record a valuation allowance against our deferred tax assets to reduce the net carrying value to an amount that we believe is more likely than not to be realized. When we establish or reduce the valuation allowance against our deferred tax assets, our provision for income taxes will increase or decrease, respectively, in the period such determination is made. The valuation allowance against deferred tax assets was \$8.4 million as of September 30, 2009 and December 31, 2008.

In February 2009, the California Legislature enacted 2009-2010 budget legislation containing various California tax law changes including an election to apply a single sales factor apportionment formula for taxable years beginning on or after January 1, 2011. We anticipate making the election and as a result, the state and federal deferred tax assets and deferred tax liabilities have been re-determined to reflect an adjustment to the resulting tax rate. The impact of the adjustment was an increase to the provision for income taxes of \$1.5 million, which was reflected in the first quarter of 2009.

We have not provided for withholding and U.S. taxes for the unremitted earnings of certain non-U.S. subsidiaries because we have currently reinvested these earnings indefinitely in these foreign operations. At December 31, 2008, we had approximately \$1,630.9 million in unremitted earnings outside the United States for which withholding and U.S. taxes were not provided. Income tax expense would be incurred if these funds

were remitted to the United States. It is not practicable to

Table of Contents

estimate the amount of the deferred tax liability on such unremitted earnings. Upon remittance, certain foreign countries impose withholding taxes that are then available, subject to certain limitations, for use as credits against our U.S. tax liability, if any. We annually update our estimate of unremitted earnings outside the United States after the completion of each fiscal year.

Purchase Price Allocation

The purchase price allocation for acquisitions requires extensive use of accounting estimates and judgments to allocate the purchase price to the identifiable tangible and intangible assets acquired, including in-process research and development, and liabilities assumed based on their respective fair values. Additionally, we must determine whether an acquired entity is considered to be a business or a set of net assets, because a portion of the purchase price can only be allocated to goodwill in a business combination.

Impairment Evaluations for Goodwill and Purchased Intangible Assets

We evaluate goodwill for impairment on an annual basis, or more frequently if we believe indicators of impairment exist, by comparing the carrying value of each of our reporting units to their estimated fair value. We have two reporting units, specialty pharmaceuticals and medical devices, and historically performed our evaluation as of January 1 of each year. We primarily use the income approach and the market approach to valuation that include the discounted cash flow method, the guideline company method, as well as other generally accepted valuation methodologies to determine the fair value of our reporting units. Upon completion of the January 2009 annual impairment assessment, we determined that no impairment was indicated as the estimated fair value of each of the two reporting units exceeded its respective carrying value. As of September 30, 2009, we do not believe any significant indicators of impairment exist for our goodwill that would require additional analysis before our next annual evaluation.

In July 2009, we decided to change the timing of our annual impairment testing for goodwill from January 1 to October 1 of each year as a preferable method of accounting. Accordingly, we expect to perform our next annual impairment assessment of goodwill in the fourth quarter of 2009. We decided to adopt this change in timing in order to assess the recorded values of goodwill for potential impairment at a time closer to our fiscal year end reporting date. We believe this change is preferable in reducing the potential risk that an undetected impairment indicator could occur in between the timing of our annual impairment test and the preparation of our year end financial statements. This change has no effect on reported earnings for any current or prior periods.

We also review purchased intangible assets for impairment when events or changes in circumstances indicate that the carrying value of our intangible assets may not be recoverable. An impairment in the carrying value of an intangible asset is recognized whenever anticipated future undiscounted cash flows from an intangible asset are estimated to be less than its carrying value.

Significant management judgment is required in the forecasts of future operating results that are used in our impairment evaluations. The estimates we have used are consistent with the plans and estimates that we use to manage our business. It is possible, however, that the plans may change and estimates used may prove to be inaccurate. If our actual results, or the plans and estimates used in future impairment analyses, are lower than the original estimates used to assess the recoverability of these assets, we could incur future impairment charges.

Operations

Headquartered in Irvine, California, we are a multi-specialty health care company focused on discovering, developing and commercializing innovative pharmaceuticals, biologics and medical devices that enable people to see more clearly, move more freely and express themselves more fully. Our diversified approach enables us to follow our research and development into new specialty areas where unmet needs are significant.

We discover, develop and commercialize specialty pharmaceutical, medical device and over-the-counter products for the ophthalmic, neurological, medical aesthetics, medical dermatology, breast aesthetics, obesity intervention, urological and other specialty markets in more than 100 countries around the world. We are a pioneer in specialty pharmaceutical research, targeting products and technologies related to specific disease areas such as chronic dry eye, glaucoma, retinal disease, psoriasis, acne, movement disorders, neuropathic pain and genitourinary diseases. Additionally, we are a leader in discovering, developing and marketing therapeutic and aesthetic biologic, pharmaceutical and medical device products, including saline and silicone gel breast implants, dermal fillers and obesity intervention products. At September 30, 2009, we employed approximately 8,300 persons around the world. Our principal markets are the United States, Europe, Latin America and Asia Pacific.

Table of Contents

Results of Operations

We operate our business on the basis of two reportable segments – specialty pharmaceuticals and medical devices. The specialty pharmaceuticals segment produces a broad range of pharmaceutical products, including: ophthalmic products for glaucoma therapy, ocular inflammation, infection, allergy and chronic dry eye; *Botox*[®] for certain therapeutic and aesthetic indications; skin care products for acne, psoriasis, eyelash growth and other prescription and over-the-counter dermatological products; and urologics products. The medical devices segment produces a broad range of medical devices, including: breast implants for augmentation, revision and reconstructive surgery; obesity intervention products, including the *Lap-Band*[®] System and the *Orbera*[™] Intra-gastric Balloon System (formerly known as the *BIB*[®] System); and facial aesthetics products. We provide global marketing strategy teams to coordinate the development and execution of a consistent marketing strategy for our products in all geographic regions that share similar distribution channels and customers.

Management evaluates our business segments and various global product portfolios on a revenue basis, which is presented below in accordance with GAAP. We also report sales performance using the non-GAAP financial measure of constant currency sales. Constant currency sales represent current period reported sales, adjusted for the translation effect of changes in average foreign exchange rates between the current period and the corresponding period in the prior year. We calculate the currency effect by comparing adjusted current period reported sales, calculated using the monthly average foreign exchange rates for the corresponding period in the prior year, to the actual current period reported sales. We routinely evaluate our net sales performance at constant currency so that sales results can be viewed without the impact of changing foreign currency exchange rates, thereby facilitating period-to-period comparisons of our sales. Generally, when the U.S. dollar either strengthens or weakens against other currencies, the growth at constant currency rates will be higher or lower, respectively, than growth reported at actual exchange rates.

The following table compares net sales by product line within each reportable segment and certain selected pharmaceutical products for the three and nine month periods ended September 30, 2009 and 2008:

(a) Percentage change in selected product net sales is calculated on amounts reported to the nearest whole dollar.

Product Net Sales

Product net sales increased by \$45.9 million in the third quarter of 2009 compared to the third quarter of 2008 due to an increase of \$68.1 million in our specialty pharmaceuticals product net sales, partially offset by a decrease of \$22.2 million in our medical devices product net sales. The increase in specialty pharmaceuticals product net sales is due primarily to increases in product net sales of our eye care pharmaceuticals, *Botox*[®], and skin care product lines, partially offset by a decrease in product net sales of our urologics product line. The decrease in medical devices product net sales reflects a decrease in product net sales across all of our medical devices product lines.

Several of our products, including *Botox*[®] Cosmetic, and our facial aesthetics, obesity intervention and breast implant products, are purchased based on consumer choice and have limited reimbursement or are not reimbursable by government or other health care plans and are, therefore, partially or wholly paid for directly by the consumer. If the negative economic environment and related decline in consumer spending that have prevailed since early 2008 continue, we believe there could be a corresponding negative effect on our sales, operations and profitability for the remainder of 2009.

Eye care pharmaceuticals sales increased in the third quarter of 2009 compared to the third quarter of 2008 primarily due to an increase in net sales of *Restasis*[®], our therapeutic treatment for chronic dry eye disease, an increase in sales of *Combigan*, our *Alphagan*[®] and timolol combination for the treatment of glaucoma, an increase in sales of *Ganfort*[®], our *Lumigan*[®] and timolol combination for the treatment of glaucoma, an increase in sales of *Alphagan*[®] P 0.1%, a small increase in sales of *Lumigan*[®], and an increase in new product sales of *Acuvail*, our

Edgar Filing: ALLERGAN INC - Form 10-Q

advanced, preservative-free formulation of ketorolac which we launched in the United States during the third quarter of 2009, partially offset by a decrease in sales of our glaucoma drugs *Alphagan*[®] and *Alphagan*[®] P 0.15%. International product net sales in the third quarter of 2009 compared to the third quarter of 2008 were negatively impacted by a general weakening of foreign currencies compared to the U.S. dollar. During 2009, we increased the published list prices for certain eye care pharmaceutical products in the United States. Effective January 3, 2009, we increased the published U.S. list price for *Combigan*[®], *Lumigan*[®] and *Zymar*[®] by five percent,

Table of Contents

Alphagan[®] P 0.15%, *Alphagan*[®] P 0.1%, *Acular*[®] and *Acular LS*[®] by eight percent, and *Elestar*[®] by seven percent, and effective January 24, 2009, we increased the published list price in the United States for *Restasis*[®] by five percent. Effective April 1, 2009, we increased the published U.S. list price of *Acular*[®] and *Acular LS*[®] by an additional nine percent, and effective May 2, 2009, we increased the published U.S. list price of *Alphagan*[®] P 0.15% by an additional eight percent. Effective August 1, 2009, we increased the published U.S. list price of *Alphagan*[®] P 0.15%, *Acular*[®] and *Acular LS*[®] by an additional eight percent and *Alphagan*[®] P 0.1% by an additional five percent. These price increases had a positive net effect on our U.S. sales for the third quarter of 2009 compared to the third quarter of 2008, but the actual net effect is difficult to determine due to the various managed care sales rebate and other incentive programs in which we participate. Wholesaler buying patterns and the change in dollar value of the prescription product mix also affected our reported net sales dollars, although we are unable to determine the impact of these effects.

Total sales of *Botox*[®] increased in all of our principal geographic markets in the third quarter of 2009 compared to the third quarter of 2008. *Botox*[®] sales increased in the third quarter of 2009 compared to the third quarter of 2008 primarily due to increased sales in the United States for therapeutic use and increased total international sales for cosmetic and therapeutic use. Although total sales of *Botox*[®] increased, we believe sales of *Botox*[®] Cosmetic in the United States continued to be negatively impacted in the third quarter of 2009 by declines in consumer spending and the introduction of a competitive product. We believe our share in the worldwide neuromodulator market is currently approximately 82%.

Skin care sales, which are presently concentrated in the United States, increased in the third quarter of 2009 compared to the third quarter of 2008 primarily due to new product sales of *Latisse*[®], our treatment for inadequate or insufficient eyelashes, which we launched in the United States in January 2009, and sales of *Aczone*[®] (dapsone) gel 5%, a topical treatment for acne vulgaris, which we launched in the fourth quarter of 2008. These increases were partially offset by a decrease in sales of *Tazorac*[®], *Zorac*[®] and *Avage*[®], our topical tazarotene treatments for acne and psoriasis. Net sales of *Tazorac*[®], *Zorac*[®] and *Avage*[®] were \$18.4 million in the third quarter of 2009 compared to \$19.8 million in the third quarter of 2008. We increased the published U.S. list price for *Tazorac*[®], *Zorac*[®] and *Avage*[®] by approximately ten percent effective January 3, 2009.

Urologics sales, which are presently concentrated in the United States and consist primarily of our *Sanctura*[®] franchise products for the treatment of overactive bladder, decreased in the third quarter of 2009 compared to the third quarter of 2008. Net sales of our *Sanctura*[®] franchise products decreased \$2.3 million to \$14.7 million in the third quarter of 2009 compared to \$17.0 million in the third quarter of 2008. In February 2009, we announced a restructuring plan to focus our sales efforts on the urology specialty market and to seek a partner to promote *Sanctura XR*[®], our once-daily anticholinergic for the treatment of overactive bladder, to general practitioners, which resulted in a significant reduction in our urology sales force. In September 2009, we announced a co-promotion agreement with Quintiles Transactional Corporation, or Quintiles, under which Quintiles will promote *Sanctura XR*[®] to general practitioners in the United States. Effective June 1, 2009, we increased the published U.S. list price for *Sanctura*[®], our twice-a-day anticholinergic for the treatment of overactive bladder, by approximately nine percent.

We have a policy to attempt to maintain average U.S. wholesaler inventory levels of our specialty pharmaceutical products at an amount less than eight weeks of our net sales. At September 30, 2009, based on available external and internal information, we believe the amount of average U.S. wholesaler inventories of our specialty pharmaceutical products was at the lower end of our stated policy levels.

Breast aesthetics product net sales, which consist primarily of sales of silicone gel and saline breast implants and tissue expanders, decreased in the third quarter of 2009 compared to the third quarter of 2008 primarily due to a decrease in sales in the United States, partially offset by an increase in sales in Asia Pacific, Canada and Brazil. The decline in sales of breast aesthetics products in the United States was primarily due to lower unit volume, partially offset by the transition from lower priced saline products to higher priced silicone gel products. We believe that sales of our breast aesthetics products continued to be negatively impacted in the third quarter of 2009 by declines in consumer spending in all of our principal geographic markets.

Obesity intervention product net sales, which consist primarily of sales of devices used for minimally invasive long-term treatments of obesity such as our *Lap-Band*[®] and *Lap-Band AP*[®] Systems and *Orbera* System, decreased in the third quarter of 2009 compared to the third quarter of 2008 primarily due to decreases in sales in the United States and all of our other principal geographic markets. We believe sales of obesity intervention products in the United States and other principal geographic markets continued to be negatively impacted in the third quarter of 2009 by declines in consumer spending given substantial patient co-pays.

Facial aesthetics product net sales, which consist primarily of sales of hyaluronic acid-based and collagen-based dermal fillers used to correct facial wrinkles, decreased in the third quarter of 2009 compared to the third quarter of 2008 primarily due to a decrease in sales in the United States, partially offset by an increase in sales in Europe, Latin America, Asia Pacific

Table of Contents

and Canada. Sales of facial aesthetics products were also negatively impacted by a general decline in sales of older generation collagen-based dermal fillers. We believe sales of facial aesthetics products continued to be negatively impacted in the third quarter of 2009 by declines in consumer spending in all of our principal geographic markets.

Foreign currency changes decreased product net sales by \$30.2 million in the third quarter of 2009 compared to the third quarter of 2008, primarily due to the weakening of the euro, U.K. pound, Brazilian real, Mexican peso, Australian dollar and Canadian dollar compared to the U.S. dollar.

U.S. sales as a percentage of total product net sales increased by 0.8 percentage points to 64.9% in the third quarter of 2009 compared to U.S. sales of 64.1% in the third quarter of 2008, due primarily to an increase in U.S. skin care net sales and an increase in U.S. sales of eye care pharmaceuticals as a percentage of total eye care pharmaceutical net sales, partially offset by a decline in U.S. product net sales as a percentage of total product net sales for *Botox*[®] and our medical device product lines.

Product net sales decreased by \$57.6 million in the first nine months of 2009 compared to the first nine months of 2008 due to the combined result of an increase of \$32.2 million in our specialty pharmaceuticals product net sales and a decrease of \$89.8 million in our medical devices product net sales.

The increase in specialty pharmaceutical product net sales in the first nine months of 2009 compared to the first nine months of 2008 is primarily due to an increase in net sales of our skin care products, partially offset by decreases in net sales of eye care pharmaceuticals, *Botox*[®] and urologics products.

The decrease in eye care pharmaceuticals net sales in the first nine months of 2009 compared to the first nine months of 2008 was primarily due to the negative impact of a general weakening of foreign currencies compared to the U.S. dollar on our international eye care pharmaceuticals net sales. Sales of our eye care pharmaceuticals in the first nine months of 2009 compared to the first nine months of 2008 benefited from increases in net sales of *Restasis*[®], *Combigan*, *Ganfort*[®], *Alphagan*[®] P 0.1% and *Acuvail*, and were negatively impacted by decreases in net sales of *Lumigan*[®], *Alphagan*[®], *Alphagan*[®] P 0.15%, *Zymar*[®], *Ocuflox*[®] and our *Refresh*[®] brand of artificial tears products.

Botox[®] sales decreased in the first nine months of 2009 compared to the first nine months of 2008 primarily due to the negative impact of a general weakening of foreign currencies compared to the U.S. dollar on our international *Botox*[®] net sales, declines in consumer spending in most of our principal geographic markets and the introduction of a competitive product in the United States in the third quarter of 2009.

The increase in skin care net sales for the first nine months of 2009 is primarily due to the same factors discussed above with respect to the increase in skin care net sales for the third quarter of 2009. Net sales of *Tazorac*[®], *Zorac*[®] and *Avage*[®] were \$49.1 million in the first nine months of 2009 compared to \$59.0 million in the first nine months of 2008.

The decrease in urologics product net sales in the first nine months of 2009 is primarily due to the same factors discussed above with respect to the decrease in urologics product net sales for the third quarter of 2009.

The decrease in medical devices product net sales in the first nine months of 2009 compared to the first nine months of 2008 is primarily due to the same factors discussed above with respect to the decrease in medical devices product net sales for the third quarter of 2009. In addition, net sales of breast aesthetics products in Asia Pacific and net sales of facial aesthetics products in Europe decreased in the first nine months of 2009 compared to the first nine months of 2008.

Foreign currency changes decreased product net sales by \$155.0 million in the first nine months of 2009 compared to the first nine months of 2008, primarily due to the weakening of the euro, Brazilian real, U.K. pound, Australian dollar and Canadian dollar compared to the U.S. dollar.

U.S. sales as a percentage of total product net sales increased by 2.0 percentage points to 65.8% in the first nine months of 2009 compared to U.S. sales of 63.8% in the first nine months of 2008, due primarily to an increase in U.S. product net sales as a percentage of total product net sales in all of our specialty pharmaceuticals product lines, and in our breast aesthetics and obesity intervention product lines, partially offset by a decline in U.S. product net sales as a percentage of total product net sales for our facial aesthetics product line. A significant portion of the increase in U.S. sales as a percentage of total product net sales in the first nine months of 2009 compared to the first nine months of 2008 is related to the general weakening of foreign currencies compared to the U.S. dollar in countries where we operate.

Other Revenues

Edgar Filing: ALLERGAN INC - Form 10-Q

Other revenues decreased \$2.8 million to \$13.5 million in the third quarter of 2009 compared to \$16.3 million in the third quarter of 2008. The decrease in other revenues is primarily related to a decrease in royalty income, a decrease in reimbursement income for services provided to GlaxoSmithKline related to certain licensing and strategic support

Table of Contents

agreements, and a decrease in other reimbursement income.

Other revenues decreased \$9.9 million to \$38.2 million in the first nine months of 2009 compared to \$48.1 million in the first nine months of 2008. The decrease in other revenues in the first nine months of 2009 is due primarily to the same factors discussed above with respect to the decrease in other revenues in the third quarter of 2009.

Cost of Sales

Cost of sales decreased \$4.5 million, or 2.3%, in the third quarter of 2009 to \$190.2 million, or 16.9% of product net sales, compared to \$194.7 million, or 18.0% of product net sales, in the third quarter of 2008. Cost of sales in the third quarter of 2009 and 2008 include the rollout of retention termination benefits and accelerated depreciation costs capitalized in inventory related to the phased closure of our Arklow, Ireland breast implant manufacturing facility of \$2.8 million and \$4.6 million, respectively. Cost of sales in the third quarter of 2009 includes a charge of \$0.8 million for the purchase accounting fair market value inventory adjustment rollout related to our acquisition of Samil Allergan Ophthalmic Joint Venture Company, or Samil. Excluding the effect of these charges, cost of sales decreased \$3.5 million, or 1.8%, in the third quarter of 2009 compared to the third quarter of 2008. This decrease in cost of sales, excluding the charges described above, primarily resulted from a change in the mix of product net sales. Cost of sales as a percentage of product net sales, excluding the effect of the charges described above, decreased to 16.5% in the third quarter of 2009 compared to 17.6% in the third quarter of 2008, primarily due to an increase in the specialty pharmaceutical net sales as a percentage of our total net sales. Specialty pharmaceutical products generally have a lower cost of sales as a percentage of product net sales compared to our medical device products. Additionally, cost of sales for our medical device products as a percentage of medical device product net sales decreased in the third quarter of 2009 compared to the third quarter of 2008, due primarily to improvements in the ratio of cost of sales as a percentage of product net sales in our facial aesthetics product line, and to a lesser extent improvements in our breast aesthetics and obesity intervention product lines.

Cost of sales decreased \$8.1 million, or 1.4%, in the first nine months of 2009 to \$566.3 million, or 17.5% of product net sales, compared to \$574.4 million, or 17.4% of product net sales, in the first nine months of 2008. Cost of sales in the first nine months of 2009 and 2008 include the rollout of retention termination benefits and accelerated depreciation costs capitalized in inventory related to the phased closure of our Arklow, Ireland breast implant manufacturing facility of \$14.4 million and \$4.7 million, respectively. Cost of sales in the first nine months of 2009 also includes a \$5.0 million charge related to the modification of certain employee stock options in connection with our 2009 restructuring plan and \$0.8 million for the purchase accounting fair market value inventory adjustment rollout related to the Samil acquisition. Cost of sales in the first nine months of 2008 also includes a charge of \$11.7 million for the purchase accounting fair market value inventory adjustment rollout related to the acquisition of Esprit Pharma Holding Company, Inc., or Esprit. Excluding the effect of these charges, cost of sales decreased \$11.9 million, or 2.1%, in the first nine months of 2009 compared to the first nine months of 2008. This decrease in cost of sales, excluding the charges described above, primarily resulted from the 1.7% decrease in product net sales. Cost of sales as a percentage of product net sales, excluding the effect of the charges described above, was 16.8% in the first nine months of 2009 compared to 16.9% in the first nine months of 2008. Cost of sales as a percentage of product net sales remained relatively flat for our total specialty pharmaceuticals products and decreased slightly for our total medical devices products in the first nine months of 2009 compared to the same period in 2008.

Selling, General and Administrative

Selling, general and administrative, or SG&A, expenses increased \$57.1 million, or 13.0%, to \$497.5 million, or 44.1% of product net sales, in the third quarter of 2009 compared to \$440.4 million, or 40.7% of product net sales, in the third quarter of 2008. The overall increase in SG&A expenses during the third quarter of 2009 compared to the third quarter of 2008 was primarily due to an increase in direct-to-consumer advertising for *Latisse*[®], *Juvéderm*[®], *Restasis*[®] and *Lap-Band*[®]. SG&A expenses in the third quarter of 2009 include a \$0.5 million charge related to the modification of certain employee stock options in connection with our 2009 restructuring plan, a \$18.0 million contribution to the The Allergan Foundation, and \$8.4 million of costs associated with the U.S. Department of Justice, or DOJ, investigation relating to sales and marketing practices in connection with *Botox*[®]. SG&A expenses in the third quarter of 2008 include \$6.7 million of costs associated with the DOJ investigation described above and \$0.9 million of gains on the sale of fixed assets and technology related to the phased closure of our collagen manufacturing facility in Fremont, California. Costs associated with responding to the DOJ investigation are expected to total approximately \$30.0 million to \$34.0 million during fiscal year 2009.

SG&A expenses decreased \$5.6 million, or 0.4%, to \$1,423.9 million, or 43.9% of product net sales, in the first nine months of 2009 compared to \$1,429.5 million, or 43.3% of product net sales, in the first nine months of 2008. The decrease in SG&A expenses primarily relates to a significant decrease in selling expenses, partially offset by an increase in direct-to-consumer and other promotional expenses and an increase in general and administrative expenses. The decrease in selling expenses in the first nine months of 2009 compared to the first nine months of 2008 principally relates to a decline in personnel and related incentive compensation costs due to the impact of our 2009 restructuring plan. The increase in

Table of Contents

promotion expenses in the first nine months of 2009 is primarily due to the same factors described above with respect to the increase in promotional expenses in the third quarter of 2009. The increase in general and administrative expenses in the first nine months of 2009 is primarily due to charges related to the modification of certain employee stock options in connection with our 2009 restructuring plan, an increase in costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®] and a contribution to The Allergan Foundation. SG&A expenses in the first nine months of 2009 include a \$52.5 million charge related to the modification of certain employee stock options and \$2.3 million in asset write-offs in connection with our 2009 restructuring plan, \$23.6 million of costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®], and a \$18.0 million contribution to the The Allergan Foundation. SG&A expenses in the first nine months of 2008 include \$15.7 million of costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®], \$1.9 million of integration and transition costs related to our acquisitions of Esprit and Groupe Cornéal Laboratoires, or Cornéal, \$0.6 million of costs related to our acquisition of the *Aczone*[®] assets and \$0.8 million of termination benefits and asset impairments related to the phased closure of our breast implant manufacturing facility in Arklow, Ireland.

Research and Development

Research and development, or R&D, expenses decreased \$9.7 million, or 5.2%, to \$176.9 million in the third quarter of 2009, or 15.7% of product net sales, compared to \$186.6 million, or 17.2% of product net sales, in the third quarter of 2008. R&D expenses for the third quarter of 2009 included a charge of \$10.0 million for an upfront payment for the in-licensing of technology for treatment of diseases of the eye from Pieris AG, or Pieris, that has not yet achieved regulatory approval and a \$0.2 million charge related to the modification of certain employee stock options in connection with our 2009 restructuring plan. R&D expenses for the third quarter of 2008 included a charge of \$6.3 million for an upfront payment for the in-licensing of preclinical drug compounds to treat diseases of the eye from Asterand plc, or Asterand. Excluding the effect of these charges, R&D expenses decreased by \$13.6 million, or 7.5%, to \$166.7 million in the third quarter of 2009, or 14.8% of product net sales, compared to \$180.3 million, or 16.7% of product net sales in the third quarter of 2008. The decrease in R&D expenses in dollars, excluding the charges described above, was primarily due to a reduction in expenses for eye care pharmaceutical products, including *Ozurdex*[®], *Trivaris*, and *Acuvail*, and a reduction in expenses on the development of *Botox*[®] for the treatment of chronic migraine, partially offset by an increase in expenses for urology products, primarily apaziquone.

R&D expenses decreased \$62.3 million, or 10.7%, to \$520.6 million in the first nine months of 2009, or 16.1% of product net sales, compared to \$582.9 million, or 17.7% of product net sales, in the first nine months of 2008. R&D expenses for the first nine months of 2009 included a charge of \$10.0 million for an upfront payment for the in-licensing of technology for treatment of diseases of the eye from Pieris and \$20.8 million charge related to the modification of certain employee stock options in connection with our 2009 restructuring plan. R&D expenses for the first nine months of 2008 included a charge of \$6.3 million for an upfront payment for the in-licensing of preclinical drug compounds to treat diseases of the eye from Asterand and a charge of \$13.9 million for an upfront payment for the in-licensing of *Sanctura XR*[®] product rights in Canada, where the product had not yet achieved regulatory approval. Excluding the effect of these charges, R&D expenses decreased by \$72.9 million, or 13.0%, to \$489.8 million in the first nine months of 2009, or 15.1% of product net sales, compared to \$562.7 million, or 17.1% of product net sales in the first nine months of 2008. The decrease in R&D expenses, excluding the charges described above, is primarily due to the same factors described above with respect to the decrease in R&D expenses for the third quarter of 2009. In addition, R&D expenses decreased in the first nine months of 2009 compared to the first nine months of 2008 due to a reduction in expenses on the development of *Latisse*[®].

Amortization of Acquired Intangible Assets

Amortization of acquired intangible assets decreased \$3.3 million to \$36.0 million in the third quarter of 2009, or 3.2% of product net sales, compared to \$39.3 million, or 3.6% of product net sales, in the third quarter of 2008. The decrease in amortization expense in dollars is primarily due to a decline in amortization expense associated with customer relationships acquired in connection with our 2006 acquisition of Inamed Corporation, or Inamed, the majority of which became fully amortized at the end of the first quarter of 2009, partially offset by an increase in the balance of other intangible assets subject to amortization, primarily related to our July 2008 purchase of the *Aczone*[®] developed technology and a December 2008 milestone payment related to *Latisse*[®].

Amortization of acquired intangible assets increased \$0.1 million to \$110.1 million in the first nine months of 2009, or 3.4% of product net sales, compared to \$110.0 million, or 3.3% of product net sales, in the first nine months of 2008. The increase in amortization expense in dollars is primarily due to the increase in the balance of other intangible assets subject to amortization described above in the analysis of the third quarter, a buyout payment in 2008 of contingent licensing obligations related to the *Sanctura*[®] products and a milestone payment in 2008 related to expected annual *Restasis*[®] net sales,

Table of Contents

partially offset by a decline in amortization expense associated with customer relationships acquired in connection with our 2006 acquisition of Inamed.

Restructuring Charges and Integration and Transition Costs

Restructuring charges in the third quarter of 2009 were \$4.2 million, consisting of \$4.1 million related to the restructuring and phased closure of the Arklow facility and \$0.1 million of other restructuring charges. Restructuring charges in the third quarter of 2008 were a net \$0.2 million reversal of restructuring charges, consisting of a \$0.7 million restructuring charge reversal related to the restructuring and phased closure of the Arklow facility and \$0.5 million of other restructuring charges.

Restructuring charges in the first nine months of 2009 were \$47.3 million, consisting of \$39.1 million related to the 2009 restructuring plan, \$8.3 million related to the restructuring and phased closure of the Arklow facility and a \$0.1 million other restructuring charge net reversal. Restructuring charges in the first nine months of 2008 were \$37.6 million, consisting of \$26.9 million related to the restructuring and phased closure of the Arklow facility, \$6.6 million related to the restructuring and integration of the Cornéal operations and \$4.1 million of other restructuring charges.

2009 Restructuring Plan

On February 4, 2009, we announced a restructuring plan that involves a workforce reduction of approximately 460 employees, primarily in the United States and Europe. The majority of the employees affected by the restructuring plan are U.S. urology sales and marketing personnel as a result of our decision to focus on the urology specialty and to seek a partner to promote *Sanctura XR*[®] to general practitioners, and marketing personnel in the United States and Europe as we adjust our back-office structures to a reduced short-term sales outlook for some businesses. The restructuring plan also includes modest workforce reductions in other functions as we re-engineer our processes to increase efficiency and productivity.

As part of the restructuring plan, we modified the outstanding stock options issued in our February 2008 full-round employee stock option grant. The stock options were originally granted with an exercise price of \$64.47 with a standard four year graded vesting term, a ten year contractual term, and standard 90 day expiration upon termination of employment provisions. These options were modified to be immediately vested in full and to remove the 90 day expiration upon termination of employment provision. Because the modified awards became fully vested and there was no future derived service period, all unamortized compensation expense related to the original grant and the additional compensation expense attributable to the modification of the awards was recognized in full on the modification date.

In addition, the contractual provisions of outstanding stock options, other than the February 2008 full-round employee stock option grant, held by employees impacted by the workforce reduction were modified to extend the stock option expiration dates. Under the original contractual provisions, outstanding stock options held by employees involved in a workforce reduction automatically become fully vested upon termination of employment and the stock options expire after the earlier of 90 days from termination of employment or the remaining stock option contractual term. Under the modified terms, stock options for the impacted employees will expire after the earlier of three years from termination of employment or the remaining contractual term. All unamortized compensation expense related to the original stock option awards plus the incremental compensation expense associated with the modifications will be recognized ratably from the modification date to the employees' expected termination date.

We estimate that the total pre-tax charges related to the 2009 restructuring plan will be between \$119.0 million and \$126.0 million, of which \$39.0 million to \$44.0 million are expected to be cash expenditures. The total estimated pre-tax charges consist primarily of employee severance and other one-time termination benefits of \$39.0 million to \$44.0 million, asset write-offs of \$2.0 million to \$3.0 million, costs associated with the modification of stock options issued in our February 2008 full-round employee stock option grant of approximately \$73.0 million and costs associated with the modification of stock options, other than the February 2008 full-round employee stock option grant, for employees impacted by the workforce reduction of \$5.0 million to \$6.0 million.

We began to record costs associated with the 2009 restructuring plan in the first quarter of 2009 and expect to continue to recognize costs through the fourth quarter of 2009. As of June 30, 2009, we substantially completed all activities related to the restructuring plan. During the three month period ended September 30, 2009, we recognized a total of \$0.7 million related to employee stock option modifications, consisting of \$0.5 million in SG&A expenses and \$0.2 million in R&D expenses, and recognized \$0.1 million of accelerated depreciation costs in SG&A expenses. During the nine month period ended September 30, 2009, we recorded pre-tax restructuring charges of \$39.1 million and recognized a total of \$78.3 million related to employee stock option modifications, consisting of \$5.0 million of cost of sales, \$52.5 million in SG&A and \$20.8 million in R&D expenses, and recognized \$2.3 million of asset write-offs and accelerated depreciation costs in SG&A expenses.

Table of Contents

The following table presents the restructuring charges related to the 2009 restructuring plan during the nine month period ended September 30, 2009:

	Employee Severance	Other (in millions)	Total
Net charge during the nine month period ended September 30, 2009	\$ 32.4	\$ 6.7	\$ 39.1
Spending	(23.0)	(6.2)	(29.2)
Balance at September 30, 2009 (included in Other accrued expenses)	\$ 9.4	\$ 0.5	\$ 9.9

Restructuring and Phased Closure of Arklow Facility

On January 30, 2008, we announced the phased closure of our breast implant manufacturing facility at Arklow, Ireland and the transfer of production to our manufacturing plant in Costa Rica. The Arklow facility was acquired by us in connection with our 2006 acquisition of Inamed and employed approximately 360 people. As of March 31, 2009, all production activities at our Arklow facility had ceased. Certain employee retention termination benefits and accelerated depreciation costs related to inventory production in Arklow were capitalized to inventory as incurred and recognized as cost of sales in the periods the related products were sold.

We began to record costs associated with the closure of the Arklow manufacturing facility in the first quarter of 2008 and substantially completed all activities related to the restructuring and phased closure of the Arklow facility in the third quarter of 2009. The restructuring charges primarily consist of employee severance, one-time termination benefits, contract termination costs and other costs related to the closure of the Arklow manufacturing facility. During the three and nine month periods ended September 30, 2009, we recorded \$4.1 million and \$8.3 million of pre-tax restructuring charges, respectively. During the three and nine month periods ended September 30, 2008, we recorded a \$0.7 million restructuring charge reversal and \$26.9 million of pre-tax restructuring charges, respectively. During the three and nine month periods ended September 30, 2009, we recognized \$2.8 million and \$14.4 million, respectively, of cost of sales for the rollout of capitalized employee retention termination benefits and accelerated depreciation costs related to inventory production. During the nine month period ended September 30, 2009, we also recognized \$0.1 million of R&D expenses related to one-time termination benefits. During the three and nine month periods ended September 30, 2008, we recognized \$4.6 million and \$4.7 million, respectively, of cost of sales for the rollout of capitalized employee retention termination benefits and accelerated depreciation costs related to inventory production. During the three and nine month periods ended September 30, 2008, we also recognized \$0.1 million and \$0.8 million, respectively, of SG&A expenses and \$0.1 million and \$0.3 million, respectively, of R&D expenses related to one-time termination benefits and asset impairments.

The following table presents the restructuring activities related to the phased closure of the Arklow facility through September 30, 2009:

	Employee Severance	Contract Termination Costs (in millions)	Other	Total
Net charge during 2008	\$ 20.5	\$ 5.6	\$ 1.1	\$ 27.2
Spending	(7.2)	(0.5)	(1.0)	(8.7)
Foreign exchange translation effects	(1.8)	(0.6)		(2.4)
Balance at December 31, 2008	11.5	4.5	0.1	16.1
Net charge during the nine month period ended September 30, 2009	3.4	4.0	0.9	8.3
Spending, net	(15.4)	(4.3)	(0.5)	(20.2)

Edgar Filing: ALLERGAN INC - Form 10-Q

Foreign exchange translation effects	(0.7)	0.2	0.2	(0.3)
Balance at September 30, 2009 (included in Other accrued expenses) (a)	\$ (1.2)	\$ 4.4	\$ 0.7	\$ 3.9

- (a) Total accrued expenses are net of expected statutory employee severance reimbursements from government sponsored social benefit programs of approximately \$1.5 million.

Table of Contents

Other Restructuring Activities and Integration Costs

Included in the nine month period ended September 30, 2009 is a \$0.3 million restructuring charge reversal related to the closure of our collagen manufacturing facility in Fremont, California. Included in the three and nine month periods ended September 30, 2009 are \$0.1 million and \$0.2 million, respectively, of restructuring charges for an abandoned leased facility related to the fiscal year 2005 restructuring and streamlining of our European operations.

Included in the three and nine month periods ended September 30, 2008 are \$0.5 million and \$0.9 million, respectively, of restructuring charges related to the closure of our collagen manufacturing facility in Fremont, California. Included in the nine month period ended September 30, 2008 are \$3.1 million of restructuring charges for an abandoned leased facility related to the fiscal year 2005 restructuring and streamlining of our European operations, \$6.6 million of restructuring charges related to our 2007 acquisition of Cornéal and \$0.1 million of restructuring charges related to our 2007 acquisition of EndoArt SA.

Included in the three and nine month periods ended September 30, 2009 are \$0.2 million and \$0.4 million, respectively, of SG&A expenses related to transaction costs associated with our Samil acquisition. Included in the nine month period ended September 30, 2009 are \$0.4 million of SG&A expenses related to integration costs associated with our Cornéal acquisition. Included in the three month period ended September 30, 2008 are \$0.1 million of SG&A expenses, and in the nine month period ended September 30, 2008 are \$0.1 million of cost of sales and \$1.9 million of SG&A expenses, respectively, related to integration costs associated with our 2007 acquisitions of Esprit and Cornéal.

Operating Income (Loss)

Management evaluates business segment performance on an operating income basis exclusive of general and administrative expenses and other indirect costs, restructuring charges, in-process research and development expenses, amortization of identifiable intangible assets related to business combinations and asset acquisitions and certain other adjustments, which are not allocated to our business segments for performance assessment by our chief operating decision maker. Other adjustments excluded from our business segments for purposes of performance assessment represent income or expenses that do not reflect, according to established Company-defined criteria, operating income or expenses associated with our core business activities.

For the third quarter of 2009, general and administrative expenses, other indirect costs and other adjustments not allocated to our business segments for purposes of performance assessment consisted of general and administrative expenses of \$77.3 million, compensation expense from stock option modifications of \$0.7 million and accelerated depreciation costs of \$0.1 million related to the 2009 restructuring plan, costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®] of approximately \$8.4 million, termination benefits and accelerated depreciation costs related to the phased closure of the Arklow facility of \$2.8 million, a contribution to The Allergan Foundation of \$18.0 million, an upfront payment for the in-licensing of technology that has not achieved regulatory approval of \$10.0 million, a purchase accounting fair market value inventory adjustment of \$0.8 million and transaction costs of \$0.2 million related to our joint venture investment in Korea, and other net indirect costs of \$1.8 million.

For the third quarter of 2008, general and administrative expenses, other indirect costs and other adjustments not allocated to our business segments for purposes of performance assessment consisted of general and administrative expenses of \$79.6 million, a \$6.3 million charge for an upfront payment for the in-licensing of preclinical drug compounds from Asterand, costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®] of approximately \$6.7 million, termination benefits and accelerated depreciation costs related to the phased closure of the Arklow facility of \$4.8 million, integration and transition costs related to the acquisitions of Esprit and Cornéal of \$0.1 million, transaction costs related to the *Aczone*[®] asset acquisition of \$0.3 million, gains on the sale of technology and fixed assets related to the phased closure of the Fremont facility of \$0.9 million, and other net indirect costs of \$4.5 million.

For the first nine months of 2009, general and administrative expenses, other indirect costs and other adjustments not allocated to our business segments for purposes of performance assessment consisted of general and administrative expenses of \$219.1 million, compensation expense from stock option modifications of \$78.3 million and asset impairments and accelerated depreciation costs of \$2.3 million related to the 2009 restructuring plan, costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®] of approximately \$23.6 million, termination benefits and accelerated depreciation costs related to the phased closure of the Arklow facility of \$14.5 million, a contribution to The Allergan Foundation of \$18.0 million, an upfront payment for the in-licensing of technology that has not achieved regulatory approval of \$10.0 million, integration and transition costs related to the Cornéal acquisition of \$0.4 million, a purchase accounting fair market value inventory adjustment of \$0.8 million and transaction costs of \$0.4 million related to our joint venture investment in Korea, and other net indirect costs of \$8.4 million.

Edgar Filing: ALLERGAN INC - Form 10-Q

For the first nine months of 2008, general and administrative expenses, other indirect costs and other adjustments not allocated to our business segments for purposes of performance assessment consisted of general and administrative expenses of \$246.2 million, a \$13.9 million charge for an upfront payment for the in-licensing of *Sanctura XR*[®] product rights in Canada, where the product had not yet achieved regulatory approval, a \$6.3 million charge for an upfront payment for the

Table of Contents

in-licensing of preclinical drug compounds from Asterand, costs associated with the DOJ investigation relating to sales and marketing practices in connection with *Botox*[®] of approximately \$15.7 million, a purchase accounting fair market value inventory adjustment related to the Esprit acquisition of \$11.7 million, termination benefits, asset impairments and accelerated depreciation costs related to the phased closure of the Arklow facility of \$5.8 million, integration and transition costs related to the acquisitions of Esprit and Cornéal of \$2.0 million, transaction costs related to the *Aczone*[®] asset acquisition of \$0.6 million, gains on the sale of technology and fixed assets related to the phased closure of the Fremont facility of \$0.9 million, and other net indirect costs of \$11.3 million.

The following table presents operating income for each reportable segment for the three and nine month periods ended September 30, 2009 and 2008 and a reconciliation of our segments' operating income to consolidated operating income:

	Three months ended		Nine months ended	
	September 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
	(in millions)		(in millions)	
Operating income:				
Specialty pharmaceuticals	\$ 345.9	\$ 310.0	\$ 991.9	\$ 886.8
Medical devices	45.4	62.4	136.0	170.0
Total segments	391.3	372.4	1,127.9	1,056.8
General and administrative expenses, other indirect costs and other adjustments	120.1	101.4	375.8	312.6
Amortization of acquired intangible assets (a)	30.5	33.8	93.7	94.2
Restructuring charges	4.2	(0.2)	47.3	37.6
Total operating income	\$ 236.5	\$ 237.4	\$ 611.1	\$ 612.4

(a) Represents amortization of identifiable intangible assets related to business combinations and asset acquisitions and related capitalized licensing costs, as applicable.

Our consolidated operating income in the third quarter of 2009 was \$236.5 million, or 21.0% of product net sales, compared to consolidated operating income of \$237.4 million, or 21.9% of product net sales in the third quarter of 2008. The \$0.9 million decrease in consolidated operating income was due to a \$2.8 million decrease in other revenues, a \$57.1 million increase in SG&A expenses and a \$4.4 million increase in restructuring charges, partially offset by a \$45.9 million increase in product net sales, a \$4.5 million decrease in cost of sales, a \$9.7 million decrease in R&D expenses and a \$3.3 million decrease in amortization of acquired intangible assets. Our consolidated operating income in the third quarter of 2009 includes charges totaling \$0.7 million for compensation costs associated with the modifications of certain employee stock options related to our 2009 restructuring plan.

Our specialty pharmaceuticals segment operating income in the third quarter of 2009 was \$345.9 million, compared to operating income of \$310.0 million in the third quarter of 2008. The \$35.9 million increase in our specialty pharmaceuticals segment operating income was due primarily to an increase in product net sales of our eye care pharmaceuticals, *Botox*[®] and skin care product lines and a decrease in R&D expenses, partially offset by an increase in promotion, selling and marketing expenses.

Our medical devices segment operating income in the third quarter of 2009 was \$45.4 million, compared to operating income of \$62.4 million in the third quarter of 2008. The \$17.0 million decrease in our medical devices segment operating income was due primarily to the \$22.2 million decrease in product net sales across all product lines and an increase in promotion expenses.

Our consolidated operating income in the first nine months of 2009 was \$611.1 million, or 18.9% of product net sales, compared to consolidated operating income of \$612.4 million, or 18.6% of product net sales in the first nine months of 2008. The \$1.3 million decrease in consolidated operating income was due to a \$57.6 million decrease in product net sales, a \$9.9 million decrease in other revenues, a \$0.1 million increase in amortization of acquired intangible assets and a \$9.7 million increase in restructuring charges, partially offset by an \$8.1 million decrease in cost of sales, a \$5.6 million decrease in SG&A expenses and a \$62.3 million decrease in R&D expenses. Our consolidated operating income in the first nine months of 2009 includes charges totaling \$78.3 million for compensation costs associated with the modifications of certain employee stock options related to our 2009 restructuring plan.

Edgar Filing: ALLERGAN INC - Form 10-Q

Our specialty pharmaceuticals segment operating income in the first nine months of 2009 was \$991.9 million, compared to operating income of \$886.8 million in the first nine months of 2008. The \$105.1 million increase in our specialty pharmaceuticals segment operating income was due primarily to a decrease in promotion, selling and marketing expenses and R&D expenses, and an increase in our skin care product net sales, partially offset by a decrease in product net sales of our eye care pharmaceuticals and *Botox*[®] product lines.

Table of Contents

Our medical devices segment operating income in the first nine months of 2009 was \$136.0 million, compared to operating income of \$170.0 million in the first nine months of 2008. The \$34.0 million decrease in our medical devices segment operating income was due primarily to the \$89.8 million decrease in product net sales across all product lines, partially offset by an overall decrease in promotion, selling and marketing expenses.

Non-Operating Income and Expense

Total net non-operating expense in the third quarter of 2009 was \$4.2 million compared to total net non-operating expense of \$4.4 million in the third quarter of 2008. Interest income in the third quarter of 2009 was \$1.4 million compared to interest income of \$6.5 million in the third quarter of 2008. The decrease in interest income was primarily due to a decrease in average interest rates earned on all cash equivalent balances earning interest of approximately 2.3 percentage points, partially offset by higher average cash equivalent balances earning interest of approximately \$469.0 million in the third quarter of 2009 compared to the third quarter of 2008. Interest expense decreased \$3.0 million to \$17.8 million in the third quarter of 2009 compared to \$20.8 million in the third quarter of 2008, primarily due to \$3.8 million recognized as an offset to interest expense in the third quarter of 2009 as the interest rate differential under our \$300.0 million notional amount fixed to variable interest rate swap agreement compared to \$1.0 million recognized as an offset to interest expense in the third quarter of 2008. During the third quarter of 2009, we recorded a net unrealized loss on derivative instruments of \$2.7 million compared to a net unrealized gain of \$7.9 million in the third quarter of 2008. In the third quarter of 2009, we recorded a net gain of \$24.6 million on the sale of third party equity investments. Other, net expense was \$9.7 million in the third quarter of 2009, consisting primarily of \$9.7 million in net realized losses from foreign currency transactions. Other, net income was \$2.0 million in the third quarter of 2008, consisting primarily of \$1.7 million in net realized gains from foreign currency transactions.

Total net non-operating expense in the first nine months of 2009 was \$58.4 million compared to total net non-operating expense of \$40.0 million in the first nine months of 2008. Interest income in the first nine months of 2009 was \$5.6 million compared to interest income of \$28.0 million in the first nine months of 2008. The decrease in interest income was primarily due to a decrease in average interest rates earned on all cash equivalent balances earning interest of approximately 2.4 percentage points, partially offset by higher average cash equivalent balances earning interest of approximately \$210.0 million in the first nine months of 2009 compared to the first nine months of 2008. Interest income in the first nine months of 2008 also included \$3.5 million of statutory interest income related to income taxes. Interest expense decreased \$7.6 million to \$55.7 million in the first nine months of 2009 compared to \$63.3 million in the first nine months of 2008, primarily due to \$10.5 million recognized as an offset to interest expense in the first nine months of 2009 as the interest rate differential under our \$300.0 million notional amount fixed to variable interest rate swap agreement compared to \$4.9 million recognized as an offset to interest expense in the first nine months of 2008. Additionally, interest expense also decreased in the first nine months of 2009 compared to the first nine months of 2008 due to a decrease in average outstanding borrowings during the respective periods. During the first nine months of 2009, we recorded a net unrealized loss on derivative instruments of \$17.2 million compared to a net unrealized gain of \$4.4 million in the first nine months of 2008. In the first nine months of 2009, we recorded a net gain of \$24.6 million on the sale of third party equity investments. Other, net expense was \$15.7 million in the first nine months of 2009, consisting primarily of \$10.4 million in net realized losses from foreign currency transactions and a loss of \$5.3 million on the extinguishment of a portion of our 1.50% Convertible Senior Notes due 2026, or 2026 Convertible Notes. Other, net expense was \$9.1 million in the first nine months of 2008, consisting primarily of \$9.4 million in net realized losses from foreign currency transactions.

Income Taxes

Our effective tax rate for the third quarter of 2009 was 22.9%. Included in our operating income for the third quarter of 2009 are a \$24.6 million net gain on the sale of investments, restructuring charges of \$4.2 million, a charge of \$0.7 million related to the modification of certain employee stock options in conjunction with our 2009 restructuring plan and the rollout of retention termination benefits and accelerated depreciation costs capitalized in inventory related to the closure of our Arklow, Ireland breast implant manufacturing facility of \$2.8 million, a \$10.0 million charge for an upfront payment for technology that has not achieved regulatory approval, and a \$18.0 million contribution to The Allergan Foundation. In the third quarter of 2009, we recorded income tax expense of \$9.4 million related to the net gain on the sale of investments and income tax benefits of \$0.1 million related to the restructuring charges, \$0.3 million related to the modification of certain employee stock options, \$0.3 million related to the costs described above related to the closure of our breast implant manufacturing facility in Arklow, Ireland, \$0.7 million related to an upfront payment for technology that has not achieved regulatory approval, and \$6.9 million related to the contribution to The Allergan Foundation. In the third quarter of 2009 we also recorded an income tax benefit of \$6.7 million related to foreign R&D tax credits received for tax years prior to 2008. Excluding the impact of the pre-tax charges of \$11.1 million and the net income tax benefits of \$5.6 million for the items discussed above, our adjusted effective tax rate for the third quarter of 2009 was 24.1%. We believe that the use of an adjusted effective tax rate provides a more meaningful measure of the impact of income taxes on our results of operations because it excludes the effect of certain

Table of Contents

discrete items that are not included as part of our core business activities. This allows stockholders to better determine the effective tax rate associated with our core business activities.

The calculation of our adjusted effective tax rate for the third quarter of 2009 is summarized below:

	(in millions)
Earnings before income taxes, as reported	\$ 232.3
Net gain on sale of investments	(24.6)
Restructuring charges	4.2
Charges related to the modification of certain employee stock options	0.7
Rollout of retention termination benefits and accelerated depreciation related to the closure of our Arklow, Ireland breast implant manufacturing facility	2.8
Upfront payment of technology that has not achieved regulatory approval	10.0
Contribution to The Allergan Foundation	18.0
	\$ 243.4
Provision for income taxes, as reported	\$ 53.1
Income tax benefit (provision) for:	
Net gain on sale of investments	(9.4)
Restructuring charges	0.1
Charges related to the modification of certain employee stock options	0.3
Rollout of retention termination benefits and accelerated depreciation related to the closure of our Arklow, Ireland breast implant manufacturing facility	0.3
Upfront payment of technology that has not achieved regulatory approval	0.7
Contribution to The Allergan Foundation	6.9
Foreign R&D tax credits received for tax years prior to 2008	6.7
	\$ 58.7
Adjusted effective tax rate	24.1%

Our effective tax rate for the first nine months of 2009 was 27.4%. Included in our operating income for the first nine months of 2009 are a \$24.6 million net gain on the sale of investments, restructuring charges of \$47.3 million, a charge of \$78.3 million related to the modification of certain employee stock options in conjunction with our 2009 restructuring plan, the rollout of retention termination benefits and accelerated depreciation costs capitalized in inventory and expenses for one-time termination benefits related to the closure of our Arklow, Ireland breast implant manufacturing facility of \$14.5 million, a loss on the extinguishment of a portion of our 2026 Convertible Notes of \$5.3 million, a \$10.0 million charge for an upfront payment for technology that has not achieved regulatory approval, and a \$18.0 million contribution to The Allergan Foundation. In the first nine months of 2009, we recorded income tax expense of \$9.4 million related to the net gain on the sale of investments and income tax benefits of \$9.9 million related to the restructuring charges, \$27.6 million related to the modification of certain employee stock options, \$1.5 million related to the costs described above related to the closure of our breast implant manufacturing facility in Arklow, Ireland, \$1.2 million related to the loss on the extinguishment of a portion of our 2026 Convertible Notes, \$0.7 million related to an upfront payment for technology that has not achieved regulatory approval, and \$6.9 million related to the contribution to The Allergan Foundation. In the first nine months of 2009, we also recorded \$9.3 million of income tax expense for a change in estimated taxes related to pre-acquisition periods associated with business combinations and uncertain tax positions included in prior year income tax filings and a \$6.7 million income tax benefit related to foreign R&D tax credits received for tax years prior to 2008. Excluding the impact of the net pre-tax charges of \$148.8 million and the net income tax benefits of \$35.8 million for the items discussed above, our adjusted effective tax rate for the first nine months of 2009 was 26.7%.

Table of Contents

The calculation of our adjusted effective tax rate for the first nine months of 2009 is summarized below:

	(in millions)
Earnings before income taxes, as reported	\$ 552.7
Net gain on sale of investments	(24.6)
Restructuring charges	47.3
Charges related to the modification of certain employee stock options	78.3

Upfront payment of technology that has not achieved regulatory approval	0.7
Contribution to The Allergan Foundation	6.9
Change in estimated taxes related to pre-acquisition periods associated with business combinations and uncertain tax positions included in prior year income tax filings	(9.3)
Foreign R&D tax credits received for tax years prior to 2008	6.7
	\$ 187.5
Adjusted effective tax rate	26.7%

Our effective tax rate for the third quarter and first nine months of 2008 was 28.8% and 27.0%, respectively, our effective tax rate for the year ended December 31, 2008 was 25.9%, and our adjusted effective tax rate for the year ended December 31, 2008 was 25.3%. The effective tax rate for the third quarter of 2008, the first nine months of 2008, the year ended December 31, 2008 and the adjusted effective tax rate for the year ended December 31, 2008 reflect the retrospective effects of our adoption in the first quarter of 2009 of updates to Financial Accounting Standards Board guidance related to the accounting for convertible debt instruments that may be settled fully or partially in cash upon conversion. Included in our operating income for the year ended December 31, 2008 were pre-tax charges of \$68.7 million for upfront payments for technologies that have not achieved regulatory approval, an \$11.7 million charge to cost of sales associated with the Esprit purchase accounting fair market value inventory adjustment rollout, a \$13.2 million charge for a settlement related to the termination of a distribution agreement in Korea, a \$5.6 million charge for the impairment of an intangible asset related to the phase out of a collagen product and total restructuring charges of \$41.3 million. For the year ended December 31, 2008, we recorded income tax benefits of \$21.6 million related to the upfront payments for technologies that have not achieved regulatory approval, \$4.6 million related to the Esprit purchase accounting fair market value inventory adjustment rollout, \$1.3 million related to the charge for a settlement related to the termination of a distribution agreement in Korea, \$2.0 million related to the impairment of an intangible asset, \$4.7 million related to the total restructuring charges and \$2.4 million related to deferred tax benefits related to the legal entity integration of Esprit and Inamed. In 2008, our tax provision was also affected by a \$5.5 million negative income tax impact from non-deductible losses associated with the liquidation of corporate-owned life insurance contracts previously used to fund our executive deferred compensation program. Excluding the impact of the total pre-tax charges of \$140.5 million and the total net income tax benefit of \$31.1 million for the items discussed above, our adjusted effective tax rate for 2008 was 25.3%.

Table of Contents

The calculation of our adjusted effective tax rate for the year ended December 31, 2008 is summarized below:

	(in millions)
Earnings from continuing operations before income taxes, as reported	\$ 762.2
Upfront payments for technologies that have not achieved regulatory approval	68.7
Esprit fair market value inventory rollout	11.7
Settlement related to the termination of a distribution agreement in Korea	13.2
Impairment of an intangible asset	5.6
Total restructuring charges	41.3
	\$ 902.7
Provision for income taxes, as reported	\$ 197.5
Income tax benefit (provision) for:	
Upfront payments for technologies that have not achieved regulatory approval	21.6
Esprit fair market value inventory rollout	4.6
Settlement related to the termination of a distribution agreement in Korea	1.3
Impairment of an intangible asset	2.0
Total restructuring charges	4.7
Deferred tax benefit from the legal entity integration of Esprit and Inamed	2.4
Negative tax impact from non-deductible losses associated with the liquidation of corporate-owned life insurance contracts	(5.5)
	\$ 228.6
Adjusted effective tax rate	25.3%

The increase in the adjusted effective tax rate to 26.7% in the first nine months of 2009 compared to the adjusted effective tax rate for the year ended December 31, 2008 of 25.3% is primarily due to an increase in the mix of earnings in higher tax rate jurisdictions.

The lower adjusted effective tax rate of 24.1% in the third quarter of 2009 compared to the adjusted effective tax rate of 26.7% for the first nine months of 2009 is primarily due to the favorable catch-up effect in the third quarter of 2009 related to adjusting the full year 2009 estimated annual effective tax rate due to a decrease in the mix of earnings in higher tax rate jurisdictions.

Net Earnings Attributable to Allergan, Inc.

Our net earnings attributable to Allergan, Inc. in the third quarter of 2009 were \$179.0 million compared to \$165.4 million in the third quarter of 2008. The \$13.6 million increase in net earnings attributable to Allergan, Inc. was primarily the result of the decrease in net non-operating expense of \$0.2 million, the decrease in the provision for income taxes of \$13.9 million and the decrease in net earnings attributable to noncontrolling interest of \$0.4 million, partially offset by the decrease in operating income of \$0.9 million.

Our net earnings attributable to Allergan, Inc. in the first nine months of 2009 were \$399.8 million compared to \$416.5 million in the first nine months of 2008. The \$16.7 million decrease in net earnings attributable to Allergan, Inc. was primarily the result of the decrease in operating income of \$1.3 million and the increase in net non-operating expense of \$18.4 million, partially offset by the decrease in the provision for income taxes of \$3.0 million.

Liquidity and Capital Resources

We assess our liquidity by our ability to generate cash to fund our operations. Significant factors in the management of liquidity are: funds generated by operations; levels of accounts receivable, inventories, accounts payable and capital expenditures; the extent of our stock repurchase

Edgar Filing: ALLERGAN INC - Form 10-Q

program; funds required for acquisitions and other transactions; funds available under our credit facilities; and financial flexibility to attract long-term capital on satisfactory terms.

Historically, we have generated cash from operations in excess of working capital requirements. The net cash provided by operating activities for the first nine months of 2009 was \$791.5 million compared to \$481.4 million for the first nine months of 2008. Cash flow from operating activities increased in the first nine months of 2009 compared to the first nine months of 2008 primarily as a result of a net decrease in cash required to fund changes in net operating assets and liabilities, principally trade receivables, inventories and accounts payable, partially offset by an increase in cash used to fund payments of accrued expenses, and an increase in cash from net earnings from operations, including the effect of adjusting for non-cash

Table of Contents

items. In the first nine months of 2008, we paid pension contributions of \$7.5 million to our U.S. defined benefit pension plan. We did not make any pension contributions to our U.S. defined benefit pension plan in the first nine months of 2009.

Net cash used in investing activities was \$45.5 million in the first nine months of 2009 compared to \$372.5 million in the first nine months of 2008. In the first nine months of 2009, we received \$27.9 million from the sale of equity investments and \$11.6 million related to contractual purchase price adjustments to our 2007 acquisitions of Cornéal and Esprit. During the first nine months of 2009, we paid \$12.8 million, net of cash acquired, to acquire our joint venture investment in Korea. Additionally, we invested \$50.1 million in new facilities and equipment and \$22.1 million in capitalized software. In the first nine months of 2009, we purchased an office building contiguous to our main facility in Irvine, California for approximately \$20.7 million. We assumed a mortgage of \$20.0 million and paid \$0.7 million in cash. In the first nine months of 2008, we collected \$3.1 million on a receivable related to the 2007 sale of the ophthalmic surgical device business that we acquired as a part of the Cornéal acquisition and \$3.0 million from the sale of assets that we acquired as a part of the Esprit acquisition. During the first nine months of 2008, we paid approximately \$150.1 million primarily for the acquisition of assets related to *Aczone*[®]. Additionally, we invested \$124.2 million in new facilities and equipment and \$42.1 million in capitalized software, and capitalized \$63.0 million as intangible assets including a buyout payment of contingent licensing obligations related to *Sanctura*[®] products and a milestone payment related to expected annual *Restasis*[®] net sales. We currently expect to invest between \$100 million and \$120 million in capital expenditures for manufacturing and administrative facilities, manufacturing equipment and other property, plant and equipment during 2009.

Net cash used in financing activities was \$164.6 million in the first nine months of 2009 compared to \$250.9 million in the first nine months of 2008. In the first nine months of 2009, we repurchased approximately 1.3 million shares of our common stock for \$66.6 million, paid \$98.3 million to repurchase \$100.3 million principal amount of our 2026 Convertible Notes and paid \$45.5 million in dividends. This use of cash was partially offset by \$10.3 million in net borrowings of notes payable, \$32.6 million received from the sale of stock to employees and \$2.9 million in excess tax benefits from share-based compensation. In the first nine months of 2008, we repurchased approximately 4.0 million shares of our common stock for \$230.1 million, had net repayments of notes payable of \$35.5 million and paid \$45.5 million in dividends. This use of cash was partially offset by \$50.5 million received from the sale of stock to employees and \$9.7 million in excess tax benefits from share-based compensation.

Effective October 22, 2009, our Board of Directors declared a cash dividend of \$0.05 per share, payable November 30, 2009 to stockholders of record on November 9, 2009.

We maintain an evergreen stock repurchase program. Our evergreen stock repurchase program authorizes us to repurchase our common stock for the primary purpose of funding our stock-based benefit plans. Under the stock repurchase program, we may maintain up to 18.4 million repurchased shares in our treasury account at any one time. As of September 30, 2009, we held approximately 3.4 million treasury shares under this program. Effective February 6, 2009, we entered into a Rule 10b5-1 plan that authorizes our broker to purchase our common stock traded in the open market pursuant to our evergreen stock repurchase program. The terms of the plan set a maximum annual limit of 2.0 million shares to be repurchased, and certain quarterly maximum and minimum volume limits. The term of our Rule 10b5-1 plan ends on December 31, 2009 and is cancellable at any time in our sole discretion and in accordance with applicable insider trading laws.

Our 2026 Convertible Notes pay interest semi-annually on the principal amount of the notes at a rate of 1.50% per annum and are convertible, at the holder's option, at an initial conversion rate of 15.7904 shares per \$1,000 principal amount of notes. In certain circumstances the 2026 Convertible Notes may be convertible into cash in an amount equal to the lesser of their principal amount or their conversion value. If the conversion value of the 2026 Convertible Notes exceeds their principal amount at the time of conversion, we will also deliver common stock or, at our election, a combination of cash and common stock for the conversion value in excess of the principal amount. We are permitted to redeem the 2026 Convertible Notes from and after April 5, 2009 to April 4, 2011 if the closing price of our common stock reaches a specified threshold, and will be permitted to redeem the 2026 Convertible Notes at any time on or after April 5, 2011. Holders of the 2026 Convertible Notes will also be able to require us to redeem the 2026 Convertible Notes at the principal amount on April 1, 2011, April 1, 2016 and April 1, 2021 or upon a change in control of us. The 2026 Convertible Notes mature on April 1, 2026, unless previously redeemed by us or earlier converted by the note holders.

Our 5.75% Senior Notes due 2016, or 2016 Notes, were sold at 99.717% of par value with an effective interest rate of 5.79%, pay interest semi-annually at a rate of 5.75% per annum, and are redeemable at any time at our option, subject to a make-whole provision based on the present value of remaining interest payments at the time of the redemption. The aggregate outstanding principal amount of the 2016 Notes is due and payable on April 1, 2016, unless earlier redeemed by us.

At September 30, 2009, we had a committed long-term credit facility, a commercial paper program, a medium-term note program, an unused shelf registration statement that allows us to issue additional securities, including debt securities, in

Table of Contents

one or more offerings from time to time, and various foreign bank facilities. Our committed long-term credit facility expires in May 2012. The termination date can be further extended from time to time upon our request and acceptance by the issuer of the facility for a period of one year from the last scheduled termination date for each request accepted. The committed long-term credit facility allows for borrowings of up to \$800 million. The commercial paper program also provides for up to \$600 million in borrowings. Borrowings under the committed long-term credit facility and medium-term note program are subject to certain financial and operating covenants that include, among other provisions, maximum leverage ratios. Certain covenants also limit subsidiary debt. We believe we were in compliance with these covenants at September 30, 2009. As of September 30, 2009, we had no borrowings under our committed long-term credit facility, \$25.0 million in borrowings outstanding under the medium-term note program, \$16.3 million in borrowings outstanding under various foreign bank facilities and no borrowings under the commercial paper program. Commercial paper, when outstanding, is issued at current short-term interest rates. Additionally, any future borrowings that are outstanding under the long-term credit facility will be subject to a floating interest rate. We may from time to time seek to retire or purchase our outstanding debt.

As of December 31, 2008, we had net pension and postretirement benefit obligations totaling \$197.2 million. Future funding requirements are subject to change depending on the actual return on net assets in our funded pension plans and changes in actuarial assumptions. In 2009, we expect to pay pension contributions of between \$10.0 million and \$15.0 million for our U.S. and non-U.S. pension plans and between \$1.0 million and \$2.0 million for our other postretirement plan.

On February 4, 2009, we announced a restructuring plan that involves a workforce reduction of approximately 460 employees, primarily in the United States and Europe. We began to record charges in the first quarter of 2009 and currently expect to continue to recognize pre-tax charges through the fourth quarter of 2009 of between \$119.0 million and \$126.0 million, of which \$39.0 million to \$44.0 million are expected to be cash expenditures. The remaining charges are non-cash charges associated with the modifications of certain employee stock options and other non-cash asset write-offs and accelerated depreciation.

A significant amount of our existing cash and equivalents are held by non-U.S. subsidiaries. We currently plan to use these funds in our operations outside the United States. Withholding and U.S. taxes have not been provided for unremitted earnings of certain non-U.S. subsidiaries because we have reinvested these earnings indefinitely in such operations. As of December 31, 2008, we had approximately \$1,630.9 million in unremitted earnings outside the United States for which withholding and U.S. taxes were not provided. Tax costs would be incurred if these funds were remitted to the United States.

We believe that the net cash provided by operating activities, supplemented as necessary with borrowings available under our existing credit facilities and existing cash and equivalents, will provide us with sufficient resources to meet our current expected obligations, working capital requirements, debt service and other cash needs over the next year.

Table of Contents**ALLERGAN, INC.****Item 3. Quantitative and Qualitative Disclosures About Market Risk**

In the normal course of business, our operations are exposed to risks associated with fluctuations in interest rates and foreign currency exchange rates. We address these risks through controlled risk management that includes the use of derivative financial instruments to economically hedge or reduce these exposures. We do not enter into financial instruments for trading or speculative purposes.

To ensure the adequacy and effectiveness of our interest rate and foreign exchange hedge positions, we continually monitor our interest rate swap positions and foreign exchange forward and option positions both on a stand-alone basis and in conjunction with our underlying interest rate and foreign currency exposures, from an accounting and economic perspective.

However, given the inherent limitations of forecasting and the anticipatory nature of the exposures intended to be hedged, we cannot assure you that such programs will offset more than a portion of the adverse financial impact resulting from unfavorable movements in either interest or foreign exchange rates. In addition, the timing of the accounting for recognition of gains and losses related to mark-to-market instruments for any given period may not coincide with the timing of gains and losses related to the underlying economic exposures and, therefore, may adversely affect our consolidated operating results and financial position.

Interest Rate Risk

Our interest income and expense is more sensitive to fluctuations in the general level of U.S. interest rates than to changes in rates in other markets. Changes in U.S. interest rates affect the interest earned on our cash and equivalents, interest expense on our debt as well as costs associated with foreign currency contracts.

On January 31, 2007, we entered into a nine-year, two-month interest rate swap with a \$300.0 million notional amount with semi-annual settlements and quarterly interest rate reset dates. The swap receives interest at a fixed rate of 5.75% and pays interest at a variable interest rate equal to 3-month LIBOR plus 0.368%, and effectively converts \$300.0 million of the \$800.0 million aggregate principal amount of our 2016 Notes to a variable interest rate. Based on the structure of the hedging relationship, the hedge meets the criteria for using the short-cut method for a fair value hedge. The investment in the derivative and the related long-term debt are recorded at fair value. At September 30, 2009 and December 31, 2008, we recognized in our consolidated balance sheets an asset reported in Investments and other assets and a corresponding increase in Long-term debt associated with the fair value of the derivative of \$38.0 million and \$61.9 million, respectively. The differential to be paid or received as interest rates change is accrued and recognized as an adjustment of interest expense related to the 2016 Notes. During the three and nine month periods ended September 30, 2009, we recognized \$3.8 million and \$10.5 million, respectively, as a reduction of interest expense due to the differential to be received. During the three and nine month periods ended September 30, 2008, we recognized \$1.0 million and \$4.9 million, respectively, as a reduction of interest expense due to the differential to be received.

In February 2006, we entered into interest rate swap contracts based on 3-month LIBOR with an aggregate notional amount of \$800.0 million, a swap period of 10 years and a starting swap rate of 5.198%. We entered into these swap contracts as a cash flow hedge to effectively fix the future interest rate for our 2016 Notes. In April 2006, we terminated the interest rate swap contracts and received approximately \$13.0 million. The total gain is being amortized as a reduction to interest expense over a 10 year period to match the term of the 2016 Notes. As of September 30, 2009, the remaining unrecognized gain, net of tax, of \$5.1 million is recorded as a component of accumulated other comprehensive loss.

At September 30, 2009, we had approximately \$16.3 million of variable rate debt. If interest rates were to increase or decrease by 1% for the year, annual interest expense, including the effect of the \$300.0 million notional amount of the interest rate swap entered into on January 31, 2007, would increase or decrease by approximately \$3.2 million. Commercial paper, when outstanding, is issued at current short-term interest rates. Additionally, any future borrowings that are outstanding under the long-term credit facility will be subject to a floating interest rate. Therefore, higher interest costs could occur if interest rates increase in the future.

The tables below present information about certain of our investment portfolio and our debt obligations at September 30, 2009 and December 31, 2008.

Table of Contents

Foreign Currency Risk

Overall, we are a net recipient of currencies other than the U.S. dollar and, as such, benefit from a weaker dollar and are adversely affected by a stronger dollar relative to major currencies worldwide. Accordingly, changes in exchange rates, and in particular a strengthening of the U.S. dollar, may negatively affect our consolidated revenues or operating costs and expenses as expressed in U.S. dollars.

From time to time, we enter into foreign currency option and forward contracts to reduce earnings and cash flow volatility associated with foreign exchange rate changes to allow our management to focus its attention on our core business issues. Accordingly, we enter into various contracts which change in value as foreign exchange rates change to economically offset the effect of changes in the value of foreign currency assets and liabilities, commitments and anticipated foreign currency denominated sales and operating expenses. We enter into foreign currency option and forward contracts in amounts between minimum and maximum anticipated foreign exchange exposures, generally for periods not to exceed one year.

We use foreign currency option contracts, which provide for the sale or purchase of foreign currencies to offset foreign currency exposures expected to arise in the normal course of our business. While these instruments are subject to fluctuations in value, such fluctuations are anticipated to offset changes in the value of the underlying exposures.

All of our outstanding foreign currency option contracts are entered into to reduce the volatility of earnings generated in currencies other than the U.S. dollar, primarily earnings denominated in the Canadian dollar, Mexican peso, Australian dollar, Brazilian real, euro, and Japanese yen. Current changes in the fair value of open foreign currency option contracts are recorded through earnings as *Unrealized gain (loss) on derivative instruments, net* while any realized gains (losses) on settled contracts are recorded through earnings as *Other, net* in the accompanying unaudited condensed consolidated statements of earnings. The premium costs of purchased foreign exchange option contracts are recorded in *Other current assets* and amortized to *Other, net* over the life of the options.

All of our outstanding foreign exchange forward contracts are entered into to protect the value of certain intercompany receivables or payables that are subject to fluctuations in foreign currency exchange rates. The realized and unrealized gains and losses from foreign currency forward contracts and the revaluation of the foreign denominated intercompany receivables or payables are recorded through *Other, net* in the accompanying unaudited condensed consolidated statements of earnings.

Table of Contents

The following table provides information about our foreign currency derivative financial instruments outstanding as of September 30, 2009 and December 31, 2008. The information is provided in U.S. dollars, as presented in our unaudited condensed consolidated financial statements:

	September 30, 2009		December 31, 2008	
	Notional Amount (in millions)	Average Contract Rate or Strike Amount	Notional Amount (in millions)	Average Contract Rate or Strike Amount
Foreign currency forward contracts:

ALLERGAN, INC.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Principal Executive Officer and our Principal Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Our management, including our Principal Executive Officer and our Principal Financial Officer, does not expect that our disclosure controls or procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. Also, we have investments in certain unconsolidated entities. As we do not control or manage these entities, our disclosure controls and procedures with respect to such entities are necessarily substantially more limited than those we maintain with respect to our consolidated subsidiaries.

We carried out an evaluation, under the supervision and with the participation of our management, including our Principal Executive Officer and our Principal Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of September 30, 2009, the end of the quarterly period covered by this report. Based on the foregoing, our Principal Executive Officer and our Principal Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective and were operating at the reasonable assurance level.

Further, management determined that, as of September 30, 2009, there were no changes in our internal control over financial reporting that occurred during the first nine month period of 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**ALLERGAN, INC.****PART II OTHER INFORMATION****Item 1. Legal Proceedings**

The following supplements and amends the discussion set forth under Part II, Item 1 Legal Proceedings of our Quarterly Report on Form 10-Q for the quarterly periods ended March 31, 2009 and June 30, 2009 and Part I, Item 3, Legal Proceedings in our Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

In February 2007, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Exela PharmSci, Inc., or Exela, indicating that Exela had filed an Abbreviated New Drug Application, or ANDA, with the U.S. Food and Drug Administration, or FDA, for a generic form of *Alphagan*[®] P 0.15%. In the certification, Exela contends that U.S. Patent Nos. 5,424,078, 6,562,873, 6,627,210, 6,641,834 and 6,673,337, all of which are assigned to us and are listed in the Orange Book under *Alphagan*[®] P 0.15%, are invalid and/or not infringed by the proposed Exela product. In March 2007, we filed a complaint against Exela in the U.S. District Court for the Central District of California entitled *Allergan, Inc. v. Exela PharmSci, Inc., et al.*, or the Exela Action. In it, we allege that Exela's proposed product infringes U.S. Patent No. 6,641,834. In April 2007, we filed an amended complaint adding Paddock Laboratories, Inc. and PharmaForce, Inc. as defendants.

In April 2007, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Apotex, Inc., or Apotex, indicating that Apotex had filed ANDAs with the FDA for generic versions of *Alphagan*[®] P 0.15% and *Alphagan*[®] P 0.1%. In the certification, Apotex contends that U.S. Patent Nos. 5,424,078, 6,562,873, 6,627,210, 6,641,834 and 6,673,337, all of which are assigned to us and are listed in the Orange Book under *Alphagan*[®] P 0.15% and *Alphagan*[®] P 0.1%, are invalid and/or not infringed by the proposed Apotex products. In May 2007, we filed a complaint against Apotex in the U.S. District Court for the District of Delaware entitled *Allergan, Inc. v. Apotex, Inc. and Apotex Corp.*, or the Apotex Action. In it, we allege that Apotex's proposed products infringe U.S. Patent Nos. 5,424,078, 6,562,873, 6,627,210, 6,641,834 and 6,673,337. In June 2007, Apotex filed its answer, including defenses and counterclaims. In July 2007, we filed a response to Apotex's counterclaims.

In May 2007, we filed a motion with the multidistrict litigation panel to consolidate the Exela Action and the Apotex Action in the District of Delaware. A hearing on the motion took place on July 26, 2007. On August 20, 2007, the panel granted the motion and transferred the Exela Action to the District of Delaware for coordinated or consolidated pretrial proceedings with the Apotex Action. On March 26, 2008, the defendants in the Exela Action consented to trial in Delaware. On January 20, 2009, we and defendants Paddock Laboratories, Inc. and Pharmaforce, Inc. entered into a settlement agreement. Trial was held in March 2009 for the remaining defendants in the Apotex Action and the Exela Action. In April 2009, the parties filed their post-trial briefs. On October 23, 2009, the court ruled that all five patents (U.S. Patent Nos. 5,424,078, 6,562,873, 6,627,210, 6,641,834 and 6,673,337) asserted by us are valid and enforceable against the defendants, that Apotex's proposed generic versions of *Alphagan*[®] P 0.1% and 0.15% infringe each of the five patents, and that Exela's proposed generic version of *Alphagan*[®] P 0.15% infringes U.S. Patent No. 6,641,834, which was the only patent asserted against it. Pursuant to the Hatch-Waxman Act, the FDA is required to delay approval of defendants' proposed generic products until after our last applicable patent expires in 2022.

In March 2009, we filed a complaint in the U.S. District Court for the Central District of California alleging infringement of U.S. Patent Nos. 6,262,105, 7,351,404, and 7,388,029 against 13 defendants, including Athena Cosmetics, Inc., Pharma Tech, Dimensional Merchandising, Stella International, LLC, Product Innovations, LLC, Metics, LLC, Nutra-Luxe M.D., LLC, Skin Research Laboratories, Inc., Lifetech Resources LLC, Rocasuba, Inc., La Canada Ventures, Inc., Susan Lin, M.D., Peter Thomas Roth Labs, LLC and Peter Thomas Roth, Inc. In June 2009, we and La Canada Ventures, Inc. and Susan Lin, M.D. entered into a settlement agreement under which La Canada and Susan Lin, M.D. agreed to cease manufacturing and selling certain products and acknowledge the validity of our patents in exchange for our dismissing all claims against La Canada and Susan Lin, M.D. On June 29, 2009, the court consolidated this matter with *Allergan, Inc. v. Cayman Chemical Company, Jan Marini Skin Research, Inc., Athena Cosmetics, Inc., Dermaquest, Inc., Intuit Beauty, Inc., Civic Center Pharmacy and Photomedex, Inc.* and set an October 12, 2010 trial date for both cases. On July 7, 2009, we filed a motion to file a first amended complaint. On July 13, 2009, Athena Cosmetics filed a second amended answer and counterclaims to the complaint. On July 20, 2009, Lifetech Resources and Rocasuba filed an opposition to the motion to file a first amended complaint. In August 2009, the court granted our motion for leave to file a first amended complaint and we filed a motion to dismiss certain of Athena Cosmetics' claims and counterclaims. In September 2009, the court dismissed one of Athena's claims without prejudice and two of Athena's counterclaims with prejudice. In October 2009, the defendants filed answers, amended answers and/or counterclaims to our first amended complaint.

Table of Contents

In July 2008, a complaint entitled *Kramer, Bryant, Spears, Doolittle, Clark, Whidden, Powell, Moore, Hennessey, Sody, Breeding, Downey, Underwood-Boswell, Reed-Momot, Purdon & Hahn v. Allergan, Inc.* was filed in the Superior Court for the State of California for the County of Orange. The complaint makes allegations against us relating to *Botox*[®] and *Botox*[®] Cosmetic including failure to warn, manufacturing defects, negligence, breach of implied and express warranties, deceit by concealment and negligent misrepresentation and seeks damages, attorneys' fees and costs. In 2009, the plaintiffs filed requests for dismissal without prejudice as to plaintiffs Hennessey, Hahn, Underwood-Boswell, Purdon, Moore, Clark, Reed-Momot and Whidden and the court dismissed these plaintiffs without prejudice. On October 7, 2009, we filed a motion for summary judgment against plaintiff Dee Spears. The court has scheduled a January 25, 2010 trial date related to plaintiff Dee Spears.

In February 2009 and in April 2009, we received paragraph 4 invalidity and noninfringement Hatch-Waxman Act certifications from Sandoz, Inc., or Sandoz, and Hi-Tech Pharmaceutical Co., or Hi-Tech, respectively, indicating that Sandoz and Hi-Tech had filed ANDAs seeking approval of generic forms of *Combigan*[®], a brimonidine tartrate 0.2%, timolol maleate 0.5% ophthalmic solution. In their separate certifications, Sandoz and Hi-Tech each contend that U.S. Patent Nos. 7,030,149 and 7,320,976, listed in the Orange Book under *Combigan*[®], are invalid and/or not infringed by the proposed Sandoz product and by the proposed Hi-Tech product. In April 2009, we filed a complaint against Sandoz in the U.S. District Court for the Eastern District of Texas. The complaint alleges that Sandoz's proposed product infringes U.S. Patent Nos. 7,030,149 and 7,320,976. On June 2, 2009, Sandoz filed a motion to dismiss for lack of personal jurisdiction and for improper venue. On June 5, 2009, we filed a complaint against Hi-Tech in the U.S. District Court for the Eastern District of Texas. The complaint alleges that Hi-Tech's proposed product infringes U.S. Patent Nos. 7,030,149 and 7,320,976. On July 17, 2009, we filed a response to Sandoz's motion to dismiss.

On July 23, 2009, Hi-Tech filed a motion to dismiss. In August 2009, Sandoz filed an unopposed motion to withdraw its motion to dismiss and the court granted Sandoz's motion. On September 8, 2009, we filed a response to Hi-Tech's motion to dismiss. On October 2, 2009, Hi-Tech filed a reply to our response. In October 2009, we filed a motion to consolidate the Hi-Tech action and the Sandoz action and the Court granted our motion to consolidate the two actions.

In March 2009, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Barr Laboratories, Inc., or Barr, indicating that Barr had filed an Abbreviated New Drug Application, or ANDA, seeking approval of a generic form of *Lumigan*[®], a bimatoprost 0.3% ophthalmic solution. In the certification, Barr contends that U.S. Patent Nos. 5,688,819 and 6,403,649, listed in the Orange Book under *Lumigan*[®], are invalid and/or not infringed by the proposed Barr product. In May 2009, we filed a complaint against Barr in the U.S. District Court for the District of Delaware. The complaint alleges that Barr's proposed product infringes U.S. Patent Nos. 5,688,819 and 6,403,649. On June 26, 2009, Barr filed an answer to the complaint. The court has scheduled a January 10, 2011 trial date.

In June 2009, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Watson Pharmaceuticals, Inc., or Watson, through its subsidiary Watson Laboratories, Inc. Florida, indicating that Watson had filed an ANDA seeking approval of a generic form of *Sanctura XR*[®], trospium 60 mg. chloride extended release capsules. In the certification, Watson contends that U.S. Patent No. 7,410,978, listed in the Orange Book under *Sanctura XR*[®], is invalid and/or not infringed by the proposed Watson product. In July 2009, we, Endo Pharmaceuticals Solutions, Inc., and Supernus Pharmaceuticals, Inc. filed a complaint against Watson, Watson Laboratories, Inc. Florida, and Watson Pharma, Inc. in the U.S. District Court for the District of Delaware. The complaint alleges that Watson's proposed product infringes U.S. Patent No. 7,410,978. In August and September 2009, Watson filed an answer and counterclaims to our complaint and we filed an answer to Watson's counterclaims.

In September 2009, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Alcon Research, Ltd., or Alcon, indicating that Alcon had filed an ANDA seeking approval of a generic version of *Combigan*[®], a brimonidine tartrate 0.2% timolol maleate 0.5% ophthalmic solution. In the certification, Alcon contends that U.S. Patent Nos. 7,030,149, 7,320,976 and 7,323,463 listed in the Orange Book under *Combigan*[®], are invalid and/or not infringed by the proposed Alcon product.

On October 1, 2009, we filed a declaratory relief action in the U.S. District Court for the District of Columbia against the United States of America, the FDA, Dr. Margaret Hamburg, Commissioner of the FDA, and Kathleen Sebelius, Secretary of the United States Department of Health and Human Services, seeking a ruling that would allow us to share truthful, non-misleading information with the medical community to assist physicians in evaluating the risks and benefits of *Botox*[®] for off-label therapeutic uses. The court has scheduled a March 2, 2010 hearing date.

In November 2009, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Sandoz indicating that Sandoz had filed an ANDA seeking approval of a generic form of *Sanctura XR*[®], trospium 60 mg. chloride extended release capsules. In the certification, Sandoz contends that U.S. Patent No. 7,410,978, listed in the Orange Book under *Sanctura XR*[®], is invalid and/or not infringed by the proposed Sandoz product.

We are involved in various other lawsuits and claims arising in the ordinary course of business. These other matters

Table of Contents

are, in the opinion of management, immaterial both individually and in the aggregate with respect to our consolidated financial position, liquidity or results of operations.

Because of the uncertainties related to the incurrence, amount and range of loss on any pending litigation, investigation, inquiry or claim, management is currently unable to predict the ultimate outcome of any litigation, investigation, inquiry or claim, determine whether a liability has been incurred or make an estimate of the reasonably possible liability that could result from an unfavorable outcome. We believe, however, that the liability, if any, resulting from the aggregate amount of uninsured damages for any outstanding litigation, investigation or claim, other than the inquiry being conducted by the DOJ or any related qui tam or other action, will not have a material adverse effect on our consolidated financial position, liquidity or results of operations. However, an adverse ruling in a patent infringement lawsuit involving us could materially affect our ability to sell one or more of our products or could result in additional competition. In view of the unpredictable nature of such matters, we cannot provide any assurances regarding the outcome of any litigation, investigation, inquiry or claim to which we are a party or the impact on us of an adverse ruling in such matters.

Item 1A. Risk Factors

The risk factors presented below update, and should be considered in addition to, the risk factors previously disclosed by us in Part II, Item 1A of our Quarterly Report on Form 10-Q for the quarterly periods ended March 31, 2009 and June 30, 2009 and Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

We operate in a highly competitive business.

The pharmaceutical and medical device industries are highly competitive and they require an ongoing, extensive search for technological innovation. They also require, among other things, the ability to effectively discover, develop, test and obtain regulatory approvals for products, as well as the ability to effectively commercialize, market and promote approved products, including communicating the effectiveness, safety and value of products to actual and prospective customers and medical professionals.

Many of our competitors have greater resources than we have. This enables them, among other things, to make greater research and development investments and spread their research and development costs, as well as their marketing and promotion costs, over a broader revenue base. Our competitors may also have more experience and expertise in obtaining marketing approvals from the FDA, and other regulatory authorities. In addition to product development, testing, approval and promotion, other competitive factors in the pharmaceutical and medical device industries include industry consolidation, product quality and price, product technology, reputation, customer service and access to technical information.

It is possible that developments by our competitors could make our products or technologies less competitive or obsolete. Our future growth depends, in part, on our ability to develop products which are more effective. For instance, for our eye care products to be successful, we must be able to manufacture and effectively market those products and effectively detail them to a sufficient number of eye care professionals such that they determine to use or continue to use our current products and the new products we may introduce. Glaucoma must be treated over an extended period and doctors may be reluctant to switch a patient to a new treatment if the patient's current treatment for glaucoma remains effective. Sales of our existing products may decline rapidly if a new product is introduced by one of our competitors or if we announce a new product that, in either case, represents a substantial improvement over our existing products. Similarly, if we fail to make sufficient investments in research and development programs, our current and planned products could be surpassed by more effective or advanced products developed by our competitors.

Until December 2000, *Botox*[®] was the only neuromodulator approved by the FDA. At that time, the FDA approved *Myobloc*[®], a neuromodulator formerly marketed by Elan Pharmaceuticals and now marketed by Solstice Neurosciences, Inc. On April 30, 2009, the FDA approved *Dysport* (abobotulinumtoxinA) for the treatment of cervical dystonia and glabellar lines to be marketed by Ipsen Ltd., or Ipsen, and Medicis Pharmaceutical Corporation, or Medicis, respectively. The approved package for *Dysport* included a boxed warning regarding the symptoms associated with the spread of botulinum toxin beyond the injection site. Additionally, the FDA approved Ipsen's and Medicis' Risk Evaluation and Mitigation Strategy, or REMS, program, which addresses the lack of interchangeability of botulinum toxin products and the risks associated with the spread of botulinum toxin beyond the injection site. Ipsen has marketed *Dysport* in Europe since 1991, prior to our European commercialization of *Botox*[®] in 1992. In June 2006, Ipsen received marketing authorization for a cosmetic indication for *Dysport* in Germany. In 2007, Ipsen granted Galderma, a joint venture between Nestle and L'Oréal Group, an exclusive development and marketing license for *Dysport* for cosmetic indications in the European Union, Russia, Eastern Europe and the Middle East, and first rights of negotiation for other countries around the world, except the United States, Canada and Japan. In January 2008, Galderma became Ipsen's sole distributor for *Dysport* in Brazil, Argentina and Paraguay. Ipsen is also seeking approval for *Dysport* for cosmetic indications in the European Union, having submitted a

Table of Contents

file to the French regulatory authority in May 2003. In January 2009, the health authorities of 15 European Union countries granted approval of *Dysport* for glabellar lines under the trade name *Azzalure* .

Mentor Corporation, or Mentor, which was acquired by Johnson & Johnson, is conducting clinical trials for a competing neuromodulator in the United States. In addition, we are aware of competing neuromodulators currently being developed and commercialized in Asia, Europe, South America and other markets. A Chinese entity received approval to market a botulinum toxin in China in 1997, and we believe that it has launched or is planning to launch its botulinum toxin product in other lightly regulated markets in Asia, South America and Central America. These lightly regulated markets may not require adherence to the FDA's current Good Manufacturing Practice regulations, or cGMPs, or the regulatory requirements of the European Medical Evaluation Agency or other regulatory agencies in countries that are members of the Organization for Economic Cooperation and Development. Therefore, companies operating in these markets may be able to produce products at a lower cost than we can. In addition, Merz Pharmaceuticals, or Merz's, botulinum toxin product *Xeomin* is currently approved and for sale in certain countries in the European Union, and in Argentina, Canada and Mexico. Merz is pursuing approval of *Xeomin* in the United States for cervical dystonia, blepharospasm, spasticity and cosmetic indications, and is awaiting approval of *Xeomin* for therapeutic indications in many countries in the European Union. In October 2009, Merz launched *Bocouture*, its botulinum toxin product for cosmetic glabellar lines in Germany, and recently filed *Bocouture* for this indication in other European Union countries. A Korean botulinum toxin, *Meditoxin*, was approved for sale in Korea in June 2006. The company, Medy-Tox Inc., received exportation approval from Korean authorities in early 2005 to ship their product under the trade name *Neuronox*. Our sales of *Botox* could be materially and negatively impacted by this competition or competition from other companies that might obtain FDA approval or approval from other regulatory authorities to market a neuromodulator.

Mentor is our principal competitor in the United States for breast implants. Mentor announced that, like us, it received FDA approval in November 2006 to sell its silicone breast implants. The conditions under which Mentor is allowed to market its silicone breast implants in the United States are similar to ours, including indications for use and the requirement to conduct post-marketing studies. If patients or physicians prefer Mentor's breast implant products to ours or perceive that Mentor's breast implant products are safer than ours, our sales of breast implants could materially suffer. In addition, Sientra, Inc. is currently conducting clinical studies of breast implant products in the United States. Internationally, we compete with several manufacturers, including Mentor, Silimed, MediCor Ltd and its subsidiaries BioSil Ltd, Nagor and Eurosilicone, Poly Implant Protheses, Sebbin Laboratories and certain Chinese implant manufacturers.

Medicis began marketing the dermal fillers *Restylane* in January 2004 and *Perlane* in May 2007. Through our purchase of Cornéal, we acquired the rights to sell the *Juvéderm* family of dermal filler products worldwide. *Juvéderm* 30, *Juvéderm* Ultra and *Juvéderm* Ultra Plus were approved by the FDA for sale in the United States in June 2006, and we announced nationwide availability of *Juvéderm* Ultra and *Juvéderm* Ultra Plus in January 2007. We cannot assure you that our *Juvéderm* family of products will offer equivalent or greater facial aesthetic benefits to competitive dermal filler products, that it will be competitive in price or gain acceptance in the marketplace.

In addition, in June 2007, the FDA approved label extensions for *Juvéderm* Ultra and *Juvéderm* Ultra Plus based on new clinical data demonstrating that the effects of both products may last for up to one year, which is a longer period of time than was reported in clinical studies that supported FDA approval of other hyaluronic acid dermal fillers. In addition, in 2008, we filed a supplement to our premarket approval, or PMA, for *Juvéderm* Ultra and *Juvéderm* Ultra Plus related to a new formulation containing lidocaine, an anesthetic that alleviates pain during injections. We cannot assure you that the FDA will continue to grant our label extensions, approve the supplement to our PMA or that other dermal fillers, including hyaluronic acid dermal fillers, do not have or will not obtain labels or label extensions that demonstrate product effects that are equivalent to or better than our products. Should our competitors obtain such labels or label extensions demonstrating product effects that are equivalent to or better than our products, our sales of *Juvéderm* could be materially and negatively impacted.

In September 2007, Ethicon Endo-Surgery, Inc., a subsidiary of Johnson & Johnson, announced FDA approval of its gastric band product, the *Realize* band, which competes with our *Lap-Band* System in the U.S. market. The *Lap-Band* System also competes with surgical obesity procedures, including gastric bypass, vertical banded gastroplasty, sleeve gastrectomy and biliopancreatic diversion.

Our products for the treatment of overactive bladder, or OAB, *Sanctura* and *Sanctura XR*, compete with several other OAB treatment products, many of which have been on the market for a longer period of time, including Pfizer Inc.'s *Detrol*, *Detrol* LA and *Toviaz*, Watson Pharmaceuticals, Inc.'s *Oxytrol* and *Gelnique*, Novartis Pharmaceuticals Corporation and the Procter & Gamble Company's *Enablex* and Astellas Pharma US, Inc. and GlaxoSmithKline's *Vesicare* and certain generic OAB products. While we believe that *Sanctura* and *Sanctura XR* have advantages over these competing products, we cannot assure you that *Sanctura* and *Sanctura XR* offer more effective treatment of OAB for all patients, will be competitive in price or will obtain, maintain or increase market share in the OAB treatment market.

Table of Contents

We also face competition from generic drug manufacturers in the United States and internationally. In February 2009 and in April 2009, we received paragraph 4 invalidity and noninfringement Hatch-Waxman Act certifications from Sandoz, Inc., or Sandoz, and Hi-Tech Pharmacal Co., or Hi-Tech, respectively, indicating that Sandoz and Hi-Tech had each filed an ANDA seeking approval of a generic form of *Combigan*[®], a brimonidine tartrate 0.2%, timolol maleate 0.5% ophthalmic solution. In April and June 2009, we filed complaints against Sandoz and Hi-Tech, respectively. In March 2009, we received a paragraph 4 invalidity and non-infringement Hatch-Waxman Act certification in which Barr Laboratories, Inc., or Barr, seeks FDA approval to market a generic form of *Lumigan*[®], a bimatoprost 0.3% ophthalmic solution. In May 2009, we filed a complaint against Barr. In June 2009, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Watson Pharmaceuticals, Inc., or Watson, through its subsidiary Watson Laboratories, Inc. Florida, indicating that Watson had filed an ANDA seeking approval of a generic form of *Sanctura XR*[®], trospium 60 mg. chloride extended release capsules. In July 2009, we filed a complaint against Watson. In November 2009, we received a paragraph 4 invalidity and noninfringement Hatch-Waxman Act certification from Sandoz indicating that Sandoz had filed an ANDA seeking approval of a generic form of *Sanctura XR*[®]. See Part II, Item 1 of this report, Legal Proceedings for information concerning our current litigation.

Compliance with the extensive government regulations to which we are subject is expensive and time consuming, and may result in the delay or cancellation of product sales, introductions or modifications.

Extensive industry regulation has had, and will continue to have, a significant impact on our business, especially our product development and manufacturing capabilities. All companies that manufacture, market and distribute pharmaceuticals and medical devices, including us, are subject to extensive, complex, costly and evolving regulation by federal governmental authorities, principally by the FDA and the U.S. Drug Enforcement Administration, or DEA, and similar foreign and state government agencies. Failure to comply with the regulatory requirements of the FDA, DEA and other U.S. and foreign regulatory agencies may subject a company to administrative or judicially imposed sanctions, including, among others, a refusal to approve a pending application to market a new product or a new indication for an existing product. The Federal Food, Drug, and Cosmetic Act, the Controlled Substances Act and other domestic and foreign statutes and regulations govern or influence the research, testing, manufacturing, packing, labeling, storing, record keeping, safety, effectiveness, approval, advertising, promotion, sale and distribution of our products.

Under certain of these regulations, we are subject to periodic inspection of our facilities, production processes and control operations and/or the testing of our products by the FDA, the DEA and other authorities, to confirm that we are in compliance with all applicable regulations, including the FDA's cGMPs, with respect to drug and biologic products, and the FDA's Quality System Regulation, or QSR, with respect to medical device products. The FDA conducts pre-approval and post-approval reviews and plant inspections of us and our direct and indirect suppliers to determine whether our record keeping, production processes and controls, personnel and quality control are in compliance with the cGMPs, the QSR and other FDA regulations. We are also required to perform extensive audits of our vendors, contract laboratories and suppliers to ensure that they are compliant with these requirements. In addition, in order to commercialize our products or new indications for an existing product, we must demonstrate that the product or new indication is safe and effective, and that our and our suppliers' manufacturing facilities are compliant with applicable regulations, to the satisfaction of the FDA and other regulatory agencies.

The process for obtaining governmental approval to manufacture and to commercialize pharmaceutical and medical device products is rigorous, typically takes many years and is costly, and we cannot predict the extent to which we may be affected by legislative and regulatory developments. We are dependent on receiving FDA and other governmental approvals prior to manufacturing, marketing and distributing our products. We may fail to obtain approval from the FDA or other governmental authorities for our product candidates, or we may experience delays in obtaining such approvals, due to varying interpretations of data or our failure to satisfy rigorous efficacy, safety and manufacturing quality standards. Consequently, there is always a risk that the FDA or other applicable governmental authorities will not approve our products, or will take post-approval action limiting or revoking our ability to sell our products, or that the rate, timing and cost of such approvals will adversely affect our product introduction plans, results of operations and stock price. Despite the time and expense exerted, regulatory approval is never guaranteed.

Even after we obtain regulatory approval or clearance for a product candidate or new indication, we are subject to extensive additional regulation, including implementation of REMS programs, completion of post-marketing clinical studies mandated by the FDA, and compliance with regulations relating to labeling, advertising, marketing and promotion. In addition, we are subject to adverse event reporting regulations that require us to report to the FDA if our products are associated with a death or serious injury. If we or any third party that we involve in the testing, packaging, manufacture, labeling, marketing and distribution of our products fail to comply with any such regulations, we may be subject to, among other things, warning letters, product seizures, recalls, fines or other civil penalties, injunctions, suspension or revocation of approvals, operating restrictions and/or criminal prosecution.

Table of Contents

In the past few years, the FDA has increased its enforcement activities related to the advertising and promotion of pharmaceutical, biological and medical device products. In particular, the FDA has expressed concern regarding the pharmaceutical and medical device industry's compliance with the agency's regulations and guidance governing direct-to-consumer advertising, and has increased its scrutiny of such promotional materials. The FDA may limit or, with respect to certain products, terminate our dissemination of direct-to-consumer advertisements in the future, which could cause sales of those products to decline. Physicians may prescribe pharmaceutical and biologic products, and utilize medical device products for uses that are not described in the product's labeling or differ from those tested by us and approved or cleared by the FDA. While such off-label uses are common and the FDA does not regulate a physician's choice of treatment, the FDA takes the position that a manufacturer's communications regarding an approved product's off-label uses are restricted by federal statutes, FDA regulations and other governmental communications. For example, the FDA issued final guidelines on January 13, 2009 setting forth good reprint practices for drug and medical device manufacturers, which provide detailed requirements drug and device companies must follow when disseminating journal articles and referencing publications describing off-label uses of their approved products to health care professionals and entities. The standards associated with such laws and rules are complex, not well defined or articulated and are subject to conflicting interpretations. If, in the view of the FDA or other governmental agency, our promotional activities fail to comply with applicable laws, regulations, guidelines or interpretations, we may be subject to enforcement actions by the FDA or other governmental enforcement authorities.

On October 1, 2009, we filed a declaratory relief action in the U.S. District Court for the District of Columbia seeking a ruling that would allow us to share truthful, non-misleading information with the medical community to assist physicians in evaluating the risks and benefits of *Botox*[®] for off-label therapeutic uses. We cannot predict the outcome of this action.

From time to time, legislative or regulatory proposals are introduced that could alter the review and approval process relating to our products. It is possible that the FDA or other governmental authorities will issue additional regulations further restricting the sale of our present or proposed products. Any change in legislation or regulations that govern the review and approval process relating to our current and future products could make it more difficult and costly to obtain approval for new products, or to produce, market and distribute existing products.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table discloses the purchases of our equity securities during the third fiscal quarter of 2009.

Period	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet be Purchased Under the Plans or Programs(2)
July 1, 2009 to July 31, 2009	183,000	\$ 47.72	183,000	14,947,643
August 1, 2009 to August 31, 2009	207,000	54.71	207,000	15,194,718
September 1, 2009 to September 30, 2009	277,000	56.59	277,000	15,025,654
Total	667,000	\$ 53.57	667,000	N/A

(1) We maintain an evergreen stock repurchase program, which we first announced on September 28, 1993. Under the stock repurchase program, we may maintain up to 18.4 million repurchased shares in our treasury account at any one time. As of September 30, 2009, we held approximately 3.4 million treasury shares under this program. Effective February 6, 2009, we entered into a Rule 10b5-1 plan that authorizes our broker to purchase our common stock traded in the open market pursuant to our evergreen stock repurchase program. The terms of the plan set forth a maximum annual limit of 2.0 million shares to be repurchased, and certain quarterly maximum and minimum volume limits. The term of our Rule 10b5-1 plan ends on December 31, 2009 and is cancellable at any time in our sole discretion and in accordance with applicable insider trading laws.

(2) The share numbers reflect the maximum number of shares that may be purchased under our stock repurchase program and are as of the end of each of the respective periods.
