NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1 ORGANIZATION AND SIGNIFICANT ACCOUNTING PRINCIPLES

Gulf Island Fabrication, Inc., together with its subsidiaries (the Company), is a leading fabricator of offshore drilling and production platforms and other specialized structures used in the development and production of offshore oil and gas reserves. The Company s corporate offices and three major subsidiaries are located in Houma, Louisiana, and another major subsidiary is located in San Patricio County, Texas. The Company s principal markets are concentrated in the offshore regions and along the coast of the Gulf of Mexico. The consolidated financial statements include the accounts of Gulf Island Fabrication, Inc. and its majority owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Structures and equipment fabricated by the Company include jackets and deck sections of fixed production platforms; hull, tendon, and/or deck sections of floating production platforms (such as TLPs, SPARs, FPSOs and MinDOCs); piles; wellhead protectors; subsea templates; various production, processing, compressor and utility modules; offshore living quarters; brown water towboats; liftboats; tanks and barges. The Company also provides services such as offshore interconnect pipe hook-up; inshore marine construction; manufacture and repair of pressure vessels; heavy lifts such as ship integration and TLP module integration, loading and offloading jack-up drilling rigs, semi-submersible drilling rigs, TLPs, SPARs or other similar cargo; steel warehousing and sales; onshore and offshore scaffolding and piping insulation services.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three-month and nine-month periods ended September 30, 2010 are not necessarily indicative of the results that may be expected for the year ended December 31, 2010. Certain items in 2009 have been reclassified to conform to the 2010 financial statement presentation.

The balance sheet at December 31, 2009 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

For further information, refer to the consolidated financial statements and footnotes thereto included in the Company s Annual Report on Form 10-K for the year ended December 31, 2009.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 2 BLUEWATER and ATP CONTRACTS RECEIVABLE SUBJECT TO OVERRIDING ROYALTY INTEREST

On July 15, 2009, we reached an agreement with Bluewater Industries, Inc. (Bluewater) to restructure the payment terms for the remainder of the amounts owed on the MinDOC I project. Bluewater, an engineering consulting firm, contracted with ATP to oversee the fabrication of the MinDOC I hull and topsides. The amount owed to us on the project at the time of the arrangement was \$64.5 million. An additional \$25.5 million was billed on the project under this arrangement through completion, which occurred in stages during the 4th quarter of 2009. Additional changes in the scope of the project in excess of the agreed upon \$90 million were approved by Bluewater and ATP through change orders.

Bluewater agreed to pay \$42 million of the agreed upon \$90 million in seven equal installments of \$6 million each, with the first payment due September 5, 2009 and each subsequent payment due on the 5th day of each calendar month through March 5, 2010. We have received the entire \$42 million in payments from Bluewater.

Bluewater agreed to pay the remaining \$48 million owed to us pursuant to the assignment of all of its right, title and interest in the Conveyance of Overriding Royalty Interest between Bluewater and ATP. The interest we received from Bluewater is a limited overriding royalty interest because the amount to be received by us is set not to exceed \$48 million. Upon cumulative receipt of the \$48 million, the limited overriding royalty will revert back to Bluewater.

Amounts due from Bluewater and ATP subject to our overriding royalty interest included in contract receivables are as follows:

	September 30, 2010		Dec	December 31, 2009	
Total Bluewater and ATP contracts receivable subject to overriding royalty interest, less	_		_		
discount	\$	38,061	\$	38,764	
Less Bluewater and ATP contracts receivable subject to overriding royalty interest expected after one year		21,451		12,313	
		16,610		26,451	
Other current contracts receivable including all customers and Bluewater and ATP contracts receivable not subject to overriding royalty interest		37,989		50,104	
Current contracts receivable, net, per balance sheet	\$	54,599	\$	76,555	

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In response to the Deepwater Horizon disaster, the Department of Interior imposed a six-month moratorium on offshore deepwater drilling operations on May 28, 2010, the enforcement of which was preliminarily enjoined, and on July 12, 2010, the Department of Interior imposed another similar moratorium set to expire November 30, 2010. As a result, deepwater drilling operations in the Gulf of Mexico were suspended. On October 12, 2010, the Department of Interior lifted the moratorium on deepwater drilling. In addition, as a result of regulatory actions by the Department of Interior, there has been a de facto moratorium on drilling in the shallow water of the Gulf of Mexico, although a limited number of permits have been issued recently.

As a result, two of the ATP wells originally scheduled for completion in the third and fourth quarters of 2010 are not expected to be completed until 2011, causing further delay to their field development and causing us to extend our projected payment schedule through the fourth quarter of 2012 beginning in mid-year 2010. We previously projected the payment schedule to extend over a fourteen-month period beginning in mid-year 2010. Our projected payment schedule may be subject to further adjustment as a result of any additional regulatory responses to the Deepwater Horizon disaster, changes in the price of oil and gas, the amount of oil and gas produced, increases in expenses associated with producing the oil and gas and changes in the anticipated production schedule.

While we believe the available oil and gas reserves for the properties subject to our limited overriding royalty interest significantly exceed \$48 million, we have no guarantees to receive any remaining amounts from Bluewater or ATP if the limited overriding royalty interest does not fund the entire \$48 million balance. To the extent the limited overriding royalty interest does not fund all or a part of the \$48 million, we will be required to recognize a charge against earnings, which may be significant depending on the shortfall. Through October 29, 2010, we received \$3.4 million of payments related to our overriding royalty interest.

The cash flows we expect to receive from the limited overriding royalty interest are sensitive to the normal risks associated with oil and gas production such as changes in the price of oil and gas, increased regulation of offshore oil and gas, the amount of oil and gas produced, increases in the expenses associated with producing the oil and gas and changes in the anticipated production schedule. These cash flows can be adversely affected by a decline in the price of oil and gas or production level of the oil and gas wells being serviced by the MinDOC I hull and topsides. Also, the estimates of oil and gas reserves depend on many factors and assumptions, including various assumptions that are based on conditions in existence as of the dates of the estimates. Any material change in those conditions, or other factors affecting those assumptions, could impair the quantity and value of oil and gas reserves. As a result of these risks, the payments we expect to receive from this agreement have been discounted using interest rates ranging from 10% to 18% with a discounted amount of \$11.0 million included in our final estimated contract price on this project. We continue to recognize the remaining discount over the period the remaining payments are expected to be received.

NOTE 3 OTHER RECEIVABLES

At September 30, 2010, we have recorded \$5.9 million in Other receivables related to an insurance claim for costs that we have determined are recoverable under our various insurance policies. Certain costs that were deemed unrecoverable based on either our insurance coverage or our deductibles related to these insurance claims were expensed at the time incurred. The amounts of the deductibles associated with our various insurance policies are generally based on a percentage of the repair costs. Until all property is restored to pre-damaged condition, we will incur costs for repairs and record the deductibles accordingly. We have not recorded any gains related to this claim in our income statement and will not record any gains until the claim is settled.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The \$5.9 million claim relates to costs incurred in connection with an accident that occurred in April 2008 at our Texas facility involving four cranes. This amount represents costs incurred by us to rent replacement cranes while our damaged cranes were repaired. Our insurance provider has alleged that the amount recoverable for rental costs is limited to \$450,000 in the aggregate and has requested declatory judgment to deny that it has any further obligation to pay us for rental costs related to the crane accident. We have filed a counterclaim asserting breach of contract and are pursuing full reimbursement of those costs. We, in consultation with outside legal counsel, believe it is probable that the amounts subject to the claim are fully recoverable under our insurance policies.

NOTE 4 CONTINGENICIES

In December 2004, we received notice from Louisiana Department of Environmental Quality (LDEQ) that the Corrective Action Plan submitted in October 2004 was not acceptable. The Corrective Action Plan was developed to provide remediation to several isolated areas located on property we sold in 2001. In mid 2005, the LDEQ approved a sampling plan with the proposed sampling to begin in September of 2005. Due to the hurricanes that struck the Louisiana coast in 2005, the scheduled sampling was cancelled. In October 2006, the sampling was completed. This sampling plan was rejected by the LDEQ in April 2008. We submitted a revised sampling plan to the LDEQ in September 2008 and it was later approved with stipulations. After sampling, we filed a report with the LDEQ in mid July 2010 and now await the agency s review. At September 30, 2010 we have recorded \$340,000 in Accrued Expenses, which is the current estimated cost to remediate the site and includes professional fees such as engineering and consulting costs.

NOTE 5 LINE OF CREDIT AND NOTES PAYABLE

Effective July 15, 2010, we entered into the Ninth Amendment to the Ninth Amended and Restated Credit Agreement (the Revolver) which, among other things, extended the term of the \$60 million Revolver from December 31, 2011 to December 31, 2012. The Revolver is secured by some of our real estate, machinery and equipment, and fixtures. Amounts borrowed under the Revolver bear interest, at our option, at the prime lending rate established by JPMorgan Chase Bank, N.A. or LIBOR plus 1.5%. We pay a fee on a quarterly basis of one-fourth of one percent per annum on the weighted-average unused portion of the Revolver.

At September 30, 2010, no amounts were borrowed under the Revolver, but we had letters of credit outstanding staling \$20.2 million. As of October 29, 2010, \$10.4 million of these letters of credit outstanding expired, which increased the unused portion of the Revolver to \$50.2 million. We are required to maintain certain covenants, including balance sheet and cash flow ratios. As of September 30, 2010, the Company was in compliance with these covenants.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 6 CONTRACT COSTS

Pass-through costs are material and sub-contract costs associated with projects that are included as revenue of a project, but add little or no margin to the project. Pass-through costs, as a percentage of revenue, for the three-month period ended September 30, 2010 were 29.2% compared to 32.3% for the three-month period ended September 30, 2009. Pass-through costs, as a percentage of revenue, for the nine-month period ended September 30, 2010 were 37.2% compared to 36.4% for the nine-month period ended September 30, 2009.

During the current quarter, the Company revised its remaining estimates for one of its contracts, which resulted in an increase to gross margin during the period of \$928,000. This revision was attributed primarily to a favorable materials variance on the project and additional labor incurred related to the testing phase and final delivery.

NOTE 7 INCOME TAXES

Our effective income tax rate for the three-month and nine-month periods ended September 30, 2010 was 42.2% and 38.0% compared to effective tax rates of 35.1% and 35.5%, respectively, for the comparable periods of 2009. The increase from the three-month and nine-month periods in 2009 relates primarily to the Federal Work Opportunity Tax Credits (WOTC) available to us in 2009, which were no longer available in 2010, a decrease in the Federal qualified production activities income deduction due to a decrease in activity at our Texas facility, and an increase in Louisiana state income tax apportionments for 2010.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 9 SUBSEQUENT EVENTS

On October 28, 2010, our Board of Directors declared a dividend of \$0.01 per share on the shares of our common stock outstanding, payable December 1, 2010 to shareholders of record on November 15, 2010.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Gulf Island Fabrication, Inc.

We have reviewed the consolidated balance sheet of Gulf Island Fabrication, Inc. as of September 30, 2010, and the related consolidated statements of income for the three-month and nine-month periods ended September 30, 2010 and 2009, consolidated statements of cash flows for the nine-month periods ended September 30, 2010 and 2009, and consolidated statement of changes in shareholders equity for the nine-month period ended September 30, 2010. These financial statements are the responsibility of the Company s management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures, and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the consolidated interim financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Gulf Island Fabrication, Inc. as of December 31, 2009, and the related consolidated statements of income, changes in shareholders—equity and cash flows for the year then ended (not presented herein) and in our report dated March 4, 2010, we expressed an unqualified opinion on those consolidated financial statements. In our opinion the information set forth in the accompanying consolidated balance sheet as of December 31, 2009, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

/s/ Ernst & Young LLP

New Orleans, Louisiana October 29, 2010

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations. Forward-Looking Statements

Statements under Backlog, Results of Operations and Liquidity and Capital Resources and other statements in this report and the exhibits hereto that are not statements of historical fact are forward-looking statements. These statements are subject to certain risks and uncertainties that could cause actual results and outcomes to differ materially from the results and outcomes predicted in the statement and investors are cautioned not to place undue reliance upon them. Important factors that may cause our actual results to differ materially from expectations or projections include the risk factors set forth in Item 1A. herein, as well as those described in Item 1A. Risk Factors included in our Annual Report on Form 10-K for the year ended December 31, 2009. Such factors include, among others, the timing and extent of changes in the prices of oil and gas; regulatory changes; the timing of new projects and our ability to obtain them; competitive factors in the heavy marine fabrication industry; and our ability to attract and retain qualified production employees at acceptable compensation rates.

In addition to the cautionary statements above, we are closely monitoring the continued disruption in the global financial and credit markets, the impact of the Deepwater Horizon incident on the offshore oil and gas industry in the Gulf of Mexico, and the changes in the market price of oil and gas, which continue to have a material effect on our operations and those of our significant customers. For additional information, see Item 1A. Risk Factors herein and our Annual Report on Form 10-K for the year ended December 31, 2009.

Critical Accounting Policies and Estimates

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States, which require us to make estimates and assumptions (see Note 1 to the consolidated financial statements included in the annual report on Form 10-K for the year ended December 31, 2009). We believe that our accounting policy on revenue recognition involves a high degree of judgment and complexity. Critical accounting policies are discussed more fully in our Annual Report on Form 10-K for the year ended December 31, 2009. There have been no changes in our evaluation of our critical accounting policies since that date.

Backlog

Our backlog is based on management sestimate of the direct labor hours required to complete, and the remaining revenue to be recognized with respect to, those projects as to which a customer has authorized us to begin work or purchase materials pursuant to written contracts, letters of intent or other forms of authorization. Often, however, management sestimates are based on preliminary engineering and design specifications. As engineering and design plans are finalized or changes to existing plans are made, management sestimate of the direct labor hours and revenue to be recognized is likely to change. In addition, all projects currently included in our backlog

are subject to termination at the option of the customer, although the customer is generally required to pay us for work performed and materials purchased through the date of termination and, in some instances, cancellation fees. However, due to the large dollar amounts of backlog estimated for certain projects, a termination of any one of these projects could substantially decrease our backlog, and could have a material adverse effect on our revenue, net income and cash flow.

As of September 30, 2010, we had a revenue backlog of \$140.3 million and a labor backlog of approximately 1.4 million man-hours, which consists of work remaining at September 30, 2010 and commitments received through October 29, 2010, compared to the revenue backlog of \$136.8 million and a labor backlog of 1.5 million man-hours reported in our Form 10-K at December 31, 2009. Our backlog as of September 30, 2010 does not include any amounts associated with a Letter of Authorization on a deepwater Gulf of Mexico project we received and announced on September 20, 2010.

Of the backlog at September 30, 2010, \$32.0 million, or 22.8%, of total backlog, represented projects destined for deepwater locations compared to \$7.7 million, or 5.6%, of projects destined for deepwater locations included in the December 31, 2009 backlog.

Included in the backlog at September 30, 2010 is \$38.6 million, or 27.5% of total backlog, related to a project destined for a foreign location compared to none included in the backlog at December 31, 2009.

Of the backlog at September 30, 2010, we expect to recognize revenues of approximately \$57.8 million (41.0%) during the fourth quarter of 2010 and the remaining \$82.5 million during calendar year 2011 and thereafter.

Workforce

As of September 30, 2010, we had approximately 1,250 employees and approximately 15 contract employees, compared to approximately 1,395 employees and approximately 50 contract employees as of December 31, 2009.

Results of Operations

Our revenue for the three-month and nine-month periods ended September 30, 2010 was \$60.7 million and \$205.3 million, respectively, compared to \$76.6 million and \$240.8 million for the three-month and nine-month periods ended September 30, 2009. This represents a decrease of 20.7% and 14.7%, respectively.

The following factors contributed to the decrease in revenues for the three-month and nine-month periods ended September 30, 2010:

Man-hours worked have decreased. The amount of man-hours worked was 625,000 and 2.0 million during the three-month and nine-month periods ended September 30, 2010, compared to 811,000 and 2.5 million for the comparative periods ended September 30, 2009.

The most significant impact of the reduction in man-hours worked was to our Texas facility which is a direct result of the reduction in new job awards for deepwater projects. Since 2006, the majority of the work performed at our Texas facility was on larger deepwater projects. The MinDOC hull was the last large deepwater project fabricated in our Texas facility and it sailed in November 2009. Since then, the fabrication awards for the facility have been limited to large diameter tanks, multi-size modules and a 10,000 ton lifting system. Consequently, the continued decrease in activity in our Texas facility contributed to the majority of the decrease in man-hours worked and the reduction in the labor force.

For the three-month and nine-month periods ended September 30, 2010, gross profit was \$6.9 million (11.4% of revenue) and \$21.1 million (10.3% of revenue), respectively, compared to \$11.2 million (14.6% of revenue) and \$31.3 million (13.0% of revenue), respectively, for the three-month and nine-month periods ended September 30, 2009. Billable man-hours decreased due to the reduction in work volume at our Texas facility, contributing to the decrease in gross margin for the three-month and nine-month periods ended September 30, 2010. The current low level of production man-hours at our Texas facility does not allow us to cover certain fixed costs. Although we have taken steps to reduce costs at the facility while awaiting the award of some larger oil and gas fabrication projects, certain fixed costs cannot be eliminated.

The Company s general and administrative expenses were \$2.0 million and \$6.1 million for the three-month and nine-month periods ended September 30, 2010. This compares to \$2.1 million and \$6.2 million for the three-month and nine-month periods ended September 30, 2009. As a percentage of revenue, general and administrative expenses were 3.3% and 3.0%, compared to 2.7% and 2.6%, of revenue for the three-month and nine-month periods ended September 30, 2010 and 2009, respectively.

The Company had net interest income of \$1.0 million for the three-month period ended September 30, 2010, compared to net interest income of \$58,000 for the three-month period ended September 30, 2009. The Company had net interest income of \$2.3 million for the nine-month period ended September 30, 2010, compared to net interest income of \$43,000 for the nine-month period ended September 30, 2009. The increase in interest income is primarily related to the financing arrangement with Bluewater and ATP on the fabrication of the MinDOC I hull. For additional information, see footnote 2 to the consolidated financial statements.

The Company had other income of \$23,000 for the three-month period ended September 30, 2010, compared to \$2,000 for the three-month period ended September 30, 2009. The Company had other income of \$1.1 million for the nine-month period ended September 30, 2010, compared to \$4,000 for the nine-month period ended September 30, 2009. The increase in other income for the nine-month periods in 2010 is a result of the settlement of claims related to damages incurred in connection with the hurricanes that hit the Gulf Coast in 2008.

Our effective income tax rate for the three-month and nine-month periods ended September 30, 2010 was 42.2% and 38.0% compared to effective tax rates of 35.1% and 35.5%, respectively, for the comparable periods of 2009. The increase from the three-month and nine-month periods in 2009 relates primarily to the Federal Work Opportunity Tax Credits (WOTC) available to us in 2009, which were no longer available

in 2010, a decrease in the Federal qualified production activities income deduction due to a decrease in activity at our Texas facility, and an increase in Louisiana state income tax apportionments for 2010.

Liquidity and Capital Resources

Historically we have funded our business activities through funds generated from operations. Effective July 15, 2010, we entered into the Ninth Amendment to the Ninth Amended and Restated Credit Agreement (the Revolver) which, among other things, extended the term of the \$60 million Revolver from December 31, 2011 to December 31, 2012. The Revolver is secured by our real estate, machinery and equipment, and fixtures, and amounts borrowed under the Revolver bear interest, at our option, at the prime lending rate established by JPMorgan Chase Bank, N.A. or LIBOR plus 1.5%. We pay a fee on a quarterly basis of one-fourth of one percent per annum on the weighted-average unused portion of the Revolver.

At September 30, 2010, no amounts were borrowed under the Revolver, but we had letters of credit outstanding staling \$20.2 million. As of October 29, 2010, \$10.4 million of these letters of credit outstanding expired, which increased the unused portion of the Revolver to \$50.2 million. We are required to maintain certain covenants, including balance sheet and cash flow ratios. As of September 30, 2010, the Company was in compliance with these covenants.

On July 15, 2009, we reached an agreement with Bluewater Industries, Inc. (Bluewater) to restructure the payment terms for the agreed upon \$90 million owed on the MinDOC I project. For additional information, see Note 2 to the consolidated financial statements contained herein.

At September 30, 2010, our cash and cash equivalents totaled \$35.7 million. Working capital was \$86.6 million at September 30, 2010. The ratio of current assets to current liabilities was 3.74 to 1 at September 30, 2010. Net cash provided by operating activities was \$38.7 million for the nine-months ended September 30, 2010, compared to \$7.7 million for the nine-months ended September 30, 2009.

This increase was mainly due to an improvement in the change in our net contract position of \$37.3 million for the nine months ended September 30, 2010 as compared to the nine months ended September 30, 2009. Changes to our contract position include changes in contracts receivable, contract retainage, costs and estimated earnings in excess of billings on uncompleted contracts, accounts payable, and billings in excess of costs and estimated earnings on uncompleted contracts. We collected \$33.8 million on the remaining amounts owed on the MinDOC I project during the nine months ending September 30, 2010, which was the primary factor contributing to the

improvement. We anticipate that future collections of the \$45.8 million balance remaining on the MinDOC I project at September 30, 2010 will continue to positively affect the change in our net contract position.

Partially offsetting the change in our net contract position was our earnings decrease of \$4.8 million for the nine months ended September 30, 2010, compared to the nine months ended September 30, 2009, due to the decrease in manhours worked. The amount of man-hours worked was 2.0 million during the nine-month period ended September 30, 2010, compared to 2.5 million for the comparative period ended September 30, 2009.

Net cash used in investing activities for the nine-months ended September 30, 2010, was \$11.4 million, which related to capital expenditures for equipment and improvements to our production facilities. Included in capital expenditures for the nine-months ended September 30, 2010 was \$1.9 million representing approximately one-third of the cost of constructing a gate for the graving dock at our Gulf Marine facilities. The graving dock gate will be completed in the first quarter of 2011. Also included in capital expenditures for the period was \$5.5 million for a fabrication shop and warehouse in the west yard of our Gulf Island facility to support our increase in marine activities.

Net cash used in financing activities for the nine-months ended September 30, 2010, was \$371,000, consisting of \$51,000 provided by the exercise of stock options, \$12,000 provided by the excess tax benefit of stock options exercised and \$434,000 used to pay dividends on common stock.

An adverse change in the anticipated payment stream from Bluewater could cause a strain on our liquidity and other resources. Also, job awards may require us to issue additional letters of credit further reducing the capacity available on our Revolver. However, we believe that for the next twelve months, our cash generated by operating activities and funds available under the Revolver will be sufficient to fund our capital expenditures and meet our working capital needs.

We may expand our operations through acquisitions in the future, which may require additional equity or debt financing which we believe would be available to us; however, there can be no assurance that amounts will be available or commercial terms acceptable.

Contractual Obligations

There have been no material changes from the information included in our Annual Report on Form 10-K for the year ended December 31, 2009.

Off-Balance Sheet Arrangements

There have been no material changes from the information included in our Annual Report on Form 10-K for the year ended December 31, 2009.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There have been no material changes in the Company s market risks during the nine months ended September 30, 2010. For more information on market risk, refer to Part II, Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2009.

Item 4. Controls and Procedures.

The Company s management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the design and operation of our disclosure controls and procedures were effective as of such date to provide assurance that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

There have been no changes during the fiscal quarter ended September 30, 2010 in the Company s internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company s internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

The Company is subject to various routine legal proceedings in the normal conduct of its business primarily involving commercial claims, workers compensation claims, and claims for personal injury under general maritime laws of the United States and the Jones Act. While the outcome of these lawsuits, legal proceedings and claims cannot be predicted with certainty, management believes that the outcome of any such proceedings, even if determined adversely, would not have a material adverse effect on the financial position, results of operations or cash flows of the Company.

Item 1A. Risk Factors

Except as set forth below, there have been no material changes to the Risk Factors included in the Company s Annual Report on Form 10-K for the year ended December 31, 2009.

The Deepwater Horizon incident could have a material adverse effect on our oil and gas fabrication operations.

In April 2010, the drilling rig Deepwater Horizon, which was engaged in deepwater drilling operations in the Gulf of Mexico, sank after an explosion and fire, resulting in one of the most significant oil spills in U.S. history. As a result, on May 28, 2010, the Department of Interior imposed a six-month moratorium on offshore deepwater drilling operations, the enforcement of which was preliminarily enjoined. On July 12, 2010, the Department of Interior imposed another similar moratorium set to expire November 30, 2010. As a result, deepwater drilling operations in the Gulf of Mexico were suspended. On October 12, 2010, the Department of Interior lifted the moratorium on deepwater drilling. Additionally, as a result of regulatory actions by the Department of the Interior, there has been a de facto moratorium on drilling in the shallow waters of the Gulf of Mexico, although a limited number of new permits have been issued recently. It is not possible to estimate whether or when drilling operations in the Gulf of Mexico will return to normal activity levels.

We believe that the Deepwater Horizon incident is likely to result in increased exploration and production costs, increased regulation of deepwater drilling operations and greater difficulty in obtaining drilling permits. Any one or more of these may cause some of our customers to decrease or eliminate drilling activities in the Gulf of Mexico, which could have a material adverse effect on our business.

We have no guarantee that our limited overriding royalty interest will be sufficient to fund the remaining balance owed to us on the MinDOC project.

On July 15, 2009, we reached an agreement with Bluewater Industries, Inc. to restructure the payment terms for the agreed upon \$90 million owed to us on the MinDOC project. In connection with this restructure, Bluewater agreed to pay us \$48 million of the \$90 million agreed upon contract amount pursuant to the assignment of all of its right, title and interest in the Conveyance of Overriding Royalty Interest between Bluewater and ATP. The interest we received from Bluewater is a limited overriding royalty interest because the amount to be received by us is set not to exceed \$48 million. Upon cumulative receipt of the \$48 million, the limited overriding royalty will revert back to Bluewater.

In response to the Deepwater Horizon disaster, the Department of Interior imposed a six-month moratorium on offshore deepwater drilling operations on May 28, 2010, the enforcement of which was preliminarily enjoined, and on July 12, 2010, the Department of Interior imposed another similar moratorium set to expire November 30, 2010. As a result, deepwater drilling operations in the Gulf of Mexico were suspended. On October 12, 2010, the Department of Interior lifted the moratorium on deepwater drilling. In addition, as a result of regulatory actions by the Department of Interior, there has been a de facto moratorium on drilling in the shallow water of the Gulf of Mexico, although a limited number of permits have been issued recently.

As a result, two of the ATP wells originally scheduled for completion in the third and fourth quarters of 2010 are not expected to be completed until 2011, causing further delay to their field development and causing us to extend our projected payment schedule through the fourth quarter of 2012 beginning in mid-year 2010. We previously projected the payment schedule to extend over a fourteen-month period beginning in mid-year 2010. Our projected payment schedule may be subject to further adjustment as a result of any additional regulatory responses to the Deepwater Horizon disaster, changes in the price of oil and gas, the amount of oil and gas produced, increases in expenses associated with producing the oil and gas and changes in the anticipated production schedule.

While we believe the available oil and gas reserves for the properties subject to our limited overriding royalty interest significantly exceed \$48 million, we have no guarantees to receive any remaining amounts from Bluewater or ATP if the limited overriding royalty interest does not fund the entire \$48 million balance. To the extent the limited overriding royalty interest does not fund all or a part of the \$48 million, we will be required to recognize a charge against earnings, which may be significant depending on the shortfall. Through October 29, 2010, we received \$3.4 million of payments related to our overriding royalty interest.

Item 6. Exhibits

- 3.1 Composite Amended and Restated Articles of Incorporation of the Company incorporated by reference to the Company s Form 10-Q filed April 23, 2009.
- 3.2 Bylaws of the Company, as amended and Restated through February 28, 2008, incorporated by reference to the Company s Form 8-K filed on March 4, 2008.
- 4.1 Specimen Common Stock Certificate, incorporated by reference to Amendment No. 2 to the Company s Form S-1 filed March 19, 1997 (Registration No. 333-21863).
- 10.1 Ninth Amendment to Ninth Amended and Restated Credit Agreement dated July 15, 2010, incorporated by reference to the Company s Form 8-K filed July 16, 2010.
- 15.1 Letter regarding unaudited interim financial information.

- 31.1 CEO Certifications pursuant to Rule 13a-14 under the Securities Exchange Act of 1934.
- 31.2 CFO Certifications pursuant to Rule 13a-14 under the Securities Exchange Act of 1934.
- 32 Section 906 Certification furnished pursuant to 18 U.S.C. Section 1350.
- Press release issued by the Company on October 18, 2010, announcing the scheduled time for the release of its 2010 third quarter earnings and its quarterly conference call.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

GULF ISLAND FABRICATION, INC.
