WisdomTree Dreyfus Euro Fund EU (NYSE Arca Ticker)

SUMMARY PROSPECTUS DECEMBER 29, 2010

Before you invest in the WisdomTree Dreyfus Euro Fund (the "Fund"), you may want to review the Fund's prospectus and statement of additional information, which contain more information about the Fund and the risks of investing in the Fund. The Fund's current prospectus and statement of additional information are incorporated by reference into this summary prospectus. You can find the Fund's prospectus and statement of additional information, as well as other information about the Fund, online at <https://www.wisdomtree.com/prospectus>. You may also obtain this information at no charge by calling 1-866-909-9473 or by sending an e-mail request to getinfo@wisdomtree.com.

Investment Objective

The Fund seeks to earn current income reflective of money market rates within the European Union available to foreign investors. The Fund also seeks to maintain liquidity and preserve capital measured in euros.

Fees and Expenses

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

| | |
|---|-------|
| Shareholder Fees (fees paid directly from your investment) | None |
| Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment) | |
| Management Fees | 0.35% |
| Distribution and/or Service (12b-1) Fees | None |
| Other Expenses | 0.00% |
| Total Annual Fund Operating Expenses | 0.35% |
| Example | |

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

| | 1 Year | 3 Years | 5 Years | 10 Years |
|--|---------------|----------------|----------------|-----------------|
| | \$36 | \$113 | \$197 | \$443 |

Investors may pay brokerage commissions on their purchases and sales of fund shares, which are not reflected in the example.

Portfolio Turnover

Edgar Filing: WisdomTree Trust - Form 497K

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, there was no portfolio turnover for the Fund since the Fund invested in short-term securities with maturities less than or equal to 365 days which are excluded from portfolio turnover calculations. The Fund does not pay transaction costs on in-kind creations or redemptions.

The Fund's Investment Strategy

The Fund intends to invest primarily in very short-term, investment grade money market securities denominated in euros. In order to attempt to reduce interest rate risk, the Fund generally will maintain a weighted average portfolio maturity of 60 days or less and will not purchase any security with a remaining maturity of more than 397 calendar days. All money market securities acquired by the Fund will be rated in the upper two short-term ratings by at least two nationally recognized statistical rating organizations or, if unrated, deemed to be of equivalent quality.

WisdomTree Prospectus 1

The Fund plans to use the annualized rate on the London Interbank Bid Rate (LIBID) for 1-month euro deposits (net of expenses) as a portfolio benchmark to guide its investment policy. The restrictions placed upon the quality and the maturities of eligible investments and the portfolio in the aggregate will be the principal factors contributing to the Fund's ability to preserve capital (measured in euros) and liquidity while pursuing its investment objective. The Fund does not seek to preserve capital in U.S. dollars.

Eligible investments include short-term securities issued by European governments and their agencies or instrumentalities that are denominated in euros, bank debt obligations and time deposits, bankers' acceptances, commercial paper, short-term corporate debt obligations, mortgage-backed and asset-backed securities. While the Fund does not intend to do so, it reserves the right to pursue its objectives by investing a portion of its assets in U.S. dollar money market securities and derivative investments, such as forward currency contracts and swaps, if this strategy is deemed to be in the best interest of the Fund. The combination of U.S. money market securities with forward currency contracts and currency swaps is designed to provide exposure equivalent to money market securities denominated in euros. In addition, the Fund may invest a relatively smaller portion of its assets in U.S. money market securities, principally U.S. Treasury obligations, with a remaining maturity consistent with the Fund's next anticipated dividend payment date.

The Fund will invest, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in investments whose combined performance is tied economically to the European Union. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with sixty (60) days prior notice of any change to this policy for the Fund.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (NAV), trading price, yield, total return and/or its ability to meet its objective.

- n **Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or even long periods of time.
- n **Market Risk.** The trading prices of currencies, fixed income securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or even long periods.
- n **Shares of the Fund May Trade at Prices Other Than NAV.** As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of a Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, you may pay more (or less) than NAV intra-day when you buy shares of the Funds in the secondary market, and you may receive more (or less) than NAV when you sell those shares in the secondary market.
- n **Credit Risk.** The financial condition of an issuer of a debt security or other instrument may cause it to default or become unable to pay interest or principal due. The Fund cannot collect interest and principal payments on a security or instrument if the issuer defaults. While the Fund attempts to limit credit exposure in a manner consistent with its investment objective, the value of an investment in the Fund may change quickly and without warning in response to issuer defaults and changes in the credit ratings of the Fund's portfolio securities.

Edgar Filing: WisdomTree Trust - Form 497K

Currency Exchange Rate Risk. The Fund invests a significant portion of its assets in investments denominated in non-U.S. currencies, or in securities that provide exposure to such currencies, currency exchange rates or interest rates denominated in such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Because the Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

WisdomTree Prospectus 2

- n **Derivatives Investment Risk.** The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying asset, index, interest rate or currency exchange rate. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as interest rate risk, market risk, and credit risk. They also involve the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, or that the counterparty to a derivative contract might default on its obligations. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.
- n **Foreign Securities Risk.** The Fund invests a significant portion of its assets in non-U.S. securities and instruments, or in securities that provide exposure to such securities and instruments. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. With respect to certain countries, there is the possibility of government intervention and expropriation or nationalization of assets. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries.
- n **Geographic Concentration in Europe.** Because the Fund concentrates its investments in Europe, the Fund's performance is expected to be closely tied to social, political, and economic conditions within Europe and to be more volatile than the performance of more geographically diversified funds. Most developed countries in Western Europe are members of the European Union (EU), and many are also members of the European Monetary Union (EMU), which requires compliance with restrictions on inflation rates, deficits, and debt levels. Unemployment in certain European nations is historically high. In addition, the tight fiscal and monetary controls necessary to join the EMU can significantly affect every country in Europe. These and other factors could have a negative impact on the Fund's performance and increase the volatility of an investment in the Fund.
- n **Interest Rate Risk.** Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. As interest rates rise, the value of certain fixed income securities is likely to decrease. Similarly, if interest rates decline, the value of fixed income securities is likely to increase. Fixed income securities with longer maturities tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter maturities.
- n **Low Interest Rate Risk.** Financial crisis, recession, and deflation could contribute to declines in U.S. and international interest rates. Recent events in the financial sector have resulted, and may continue to result, in downward pressure on interest rates and returns on money market instruments and other investments. If this continues to occur, rates may decline to levels where the interest earned by the Fund's investments limits the Fund's ability to make distributions or becomes insufficient to cover the expenses of the Fund. In these circumstances, the Fund may need to use available cash or sell securities out of the Fund to compensate for this shortfall. In addition, in order to invest in higher-quality, more liquid investments, the Fund may need to accept lower returns on investment. These circumstances could cause a decline in the NAV of the Fund, could have negative tax consequences and could cause investors to lose money.
- n **Non-Diversification Risk.** Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. The table also shows how the Fund's performance compares to the Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index, a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

WisdomTree Prospectus 3

The Fund's year-to-date total return as of November 30, 2010 was (9.23)%.

Best and Worst Quarter Returns (for the period reflected in the bar chart above)

| | Return | Quarter/Year |
|----------------|---------|--------------|
| Highest Return | 5.69% | 2/09 |
| Lowest Return | (4.28)% | 1/09 |

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2009

| WisdomTree Dreyfus Euro Fund | Since Inception (5/14/2008) | |
|---|--------------------------------|---------|
| | 1 Year | (3.09)% |
| Return Before Taxes Based on NAV | 3.44% | (3.63)% |
| Return After Taxes on Distributions | 3.44% | (2.93)% |
| Return After Taxes on Distributions and Sale of Fund Shares | 2.23% | (2.24)% |
| Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index (Reflects no deduction for fees, expenses or taxes) | 4.21% | |
| Management | | |

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as the investment adviser to the Fund. The Dreyfus Corporation serves as the sub-adviser to the Fund.

Portfolio Managers

David C. Kwan, a Managing Director, Fixed Income, has been a portfolio manager of the Fund since its inception.

Zandra Zelaya, CFA, a Director, Fixed Income, has been a portfolio manager of the Fund since its inception.

Buying and Selling Fund Shares

The Fund is an exchange traded fund, also known as an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (Creation Units) which only institutions or large investors may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are

Edgar Filing: WisdomTree Trust - Form 497K

not expected to consist of less than 50,000 shares. The Fund generally issues and redeems Creation Units in exchange for a portfolio of money market securities closely approximating the holdings of the Fund or a designated basket of non-U.S. currency and/or an amount of U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains.
