News Release

February 27, 2012

**Ivanhoe Mines reports construction of first phase of Oyu Tolgoi
copper-gold-silver project in Mongolia nearing 75% completion,
with start-up on schedule for later this year**

Progress being made on supply of interim electrical power

**Ivanhoe Mines and Rio Tinto continuing discussion
of financing arrangements for Oyu Tolgoi**

VANCOUVER, CANADA Ivanhoe Mines founder and Chief Executive Officer Robert Friedland said today that construction of the first phase of the Oyu Tolgoi mining complex in southern Mongolia has surpassed an estimated 73% completion and is on track to meet the mine's targeted start of initial production in the third quarter of this year.

Installation of the two production lines in the concentrator and pre-commissioning works are progressing ahead of plan. The concentrator, which will have an initial capacity of 100,000 tonnes per day, now is more than 80% complete. The first production line is scheduled to be completed during the third quarter, followed by completion of the second production line in the fourth quarter this year, Mr. Friedland said.

After achieving the scheduled milestones of the production of first ore and the production of the first copper, gold and silver concentrate this year, Oyu Tolgoi will ramp up to reach commercial production during the first half of next year.

Progress achieved on supply of interim electrical power

Mr. Friedland said a goal is to have the Oyu Tolgoi mine site connected to a 220-kilovolt power line reaching into China's Inner Mongolia by the end of July this year.

Contractors have begun construction of the power line and switching station as part of the 87-kilometre link to be built within China that will connect Oyu Tolgoi with the established distribution grid.

Power transmission towers already have been erected along the 95-kilometre route from Oyu Tolgoi, in Mongolia's South Gobi Region, to the Mongolia-China border.

A separate electricity-purchase agreement establishing a supply arrangement between Mongolian and Chinese authorities is required before power can be imported into Mongolia. Oyu Tolgoi LLC, which owns the Oyu Tolgoi Project and is 66%-owned by Ivanhoe Mines, will be a party to a final power-supply agreement.

The long-term Investment Agreement signed with the Mongolian government in 2009 permits Oyu Tolgoi to import electrical power from China for up to four years after the start of commercial production, following which power will be sourced from within Mongolia.

Comprehensive financing plan under discussion with Rio Tinto

Mr. Friedland said that a comprehensive financing plan for the completion and start-up of the Oyu Tolgoi Project in Mongolia remains under discussion with Rio Tinto, which increased its holding in Ivanhoe Mines to 51% last month.

The Ivanhoe Mines plan was presented to Rio Tinto earlier this month by a team of management executives, independent directors and advisers, Mr. Friedland said.

Both companies have exchanged proposals and we are continuing to work together in an attempt to reach agreement on a comprehensive financing approach that will accommodate our mutual interests in advancing Oyu Tolgoi's development.

Mr. Friedland said that Ivanhoe Mines has invested more than US\$5 billion to date in Oyu Tolgoi's exploration and development during the past decade. The expenditures have been financed through a combination of equity and short-term debt facilities. A proposed major project financing facility has been under negotiation for more than a year.

The emergence of a majority shareholder does not diminish the long-standing commitment of the Ivanhoe Mines Board of Directors and management to all of our shareholders to ensure that an appropriate financing plan is put in place as soon as possible, Mr. Friedland said.

More than eight years ago we dedicated ourselves to building one of the world's greatest copper-gold complexes in Mongolia. Today, Oyu Tolgoi is our flagship asset. We have a plan that will provide the remaining fiscal resources to complete construction of the first phase of Oyu Tolgoi's development and also to continue progressing development work on the phase-two underground mine that is scheduled to begin production in 2015.

Key elements of Ivanhoe's financing plan

The Ivanhoe Mines comprehensive financing plan contains three principal pillars: project finance, bridge finance and equity.

The cornerstone of the financing plan continues to be a US\$4 billion project-finance facility, which now is in an advanced stage of discussion with a core lending group comprised of European Bank for Reconstruction and Development, International Finance Corporation, Export Development Canada, BNP Paribas and Standard Chartered Bank. An objective is to sign loan documentation early in the second half of this year.

Ivanhoe Mines is seeking the required approvals for the project-finance facility from Erdenes OT and the Mongolian government. Erdenes OT, which holds the Mongolian government's 34% stake in Oyu Tolgoi, presently is appointing a legal adviser. The comprehensive Environmental and Social Impact Assessment (ESIA) required by the potential lenders to finalize the proposed finance facility is substantially complete and will be released for public review following its formal approval by the Oyu Tolgoi LLC Board of Directors.

Ivanhoe Mines, as previously announced, has approved a US\$1.8 billion facility to be provided by a major international bank as an interim, bridge-financing measure. The formal loan agreement has been submitted to the international bank's credit committee for final approval and remains subject to approval by Rio Tinto. Alternative bridge-financing arrangements proposed by Rio Tinto also are being considered.

The bridge financing facility would be in addition to the existing US\$1.8 billion interim funding facility provided by Rio Tinto last year. To date, Ivanhoe Mines has accessed a total of US\$867 million from the Rio Tinto facility.

The Rio Tinto interim funding facility and any additional bridge financing facilities are expected to be repaid from the planned project-finance facility.

The Ivanhoe Mines Board of Directors also is considering a number of equity alternatives, including a possible rights offering. Ivanhoe Mines' cash position on a consolidated basis at February 24 was approximately US\$960 million. The company's non-consolidated cash position, excluding cash at Ivanhoe Australia and SouthGobi Resources and including cash at Oyu Tolgoi LLC, was approximately US\$683 million.

Expressions of interest in Ivanhoe asset divestment

Mr. Friedland said that in addition to pursuing the key elements of the comprehensive financing plan, Ivanhoe Mines is highly encouraged by the progress of discussions regarding asset divestment. He said Ivanhoe Mines has received detailed, written expressions of interest on potential asset divestments that could realize significant capital to support the ongoing development of Oyu Tolgoi.

Discussions on governance at Ivanhoe Mines

Rio Tinto also has initiated discussions with independent Ivanhoe Mines directors on a number of governance and management matters. The independent Ivanhoe directors intend to work constructively and expeditiously with Rio Tinto to implement various changes to reflect Rio Tinto's majority ownership of Ivanhoe Mines while, at the same time, seeking to ensure, to the greatest extent possible, that the rights of the minority shareholders are not prejudiced by such changes.

About Ivanhoe Mines

Ivanhoe Mines (NYSE, NASDAQ & TSX: IVN) is an international mining company with operations focused in the Asia Pacific region. Assets include the company's 66% interest in the Oyu Tolgoi copper-gold mine development project in southern Mongolia; its 58% interest in Mongolian coal miner SouthGobi Resources (TSX: SGQ; HK: 1878); a 59% interest in Ivanhoe Australia (ASX, TSX: IVA), a copper-gold-uranium-molybdenum-rhenium exploration and development company; and a 50% interest in Altynalmas Gold, a private company developing the Kyzyl Gold Project in Kazakhstan.

Ivanhoe Mines' shares are listed on the New York, NASDAQ and Toronto stock exchanges under the symbol IVN.
