The accompanying Notes to Unaudited Condensed Consolidated Financial Statements are an integral part of these financial statements.

Table of Contents**GLU MOBILE INC.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****(in thousands, except per share data)****Note 1 - The Company, Basis of Presentation and Summary of Significant Accounting Policies**

Glu Mobile Inc. (the Company or Glu) was incorporated in Nevada in May 2001 and reincorporated in the state of Delaware in March 2007. The Company designs, markets and sells mobile games for users of smartphones and tablet devices who purchase its games through direct-to-consumer digital storefronts as well as users of feature phones served by wireless carriers and other distributors. The Company creates games based on its own original intellectual property as well as third-party licensed brands.

The Company has incurred recurring losses from operations since inception and had an accumulated deficit of \$221,672 as of June 30, 2012. For the three months ended June 30, 2012, the Company incurred a net loss from operations of \$5,217. For the six months ended June 30, 2012, the Company incurred a net loss from operations of \$11,252. The Company may incur additional operating losses and negative cash flows in the future. Failure to generate sufficient revenues, reduce spending or raise additional capital could adversely affect the Company's ability to achieve profitability and its intended business objectives.

Principles of Consolidation and Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) regarding interim financial reporting. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles (GAAP) in the United States for complete financial statements and should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011 filed with the SEC on March 14, 2012. In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments, consisting only of normal recurring adjustments, which the Company believes are necessary for a fair statement of the Company's financial position as of June 30, 2012 and its results of operations for the three and six months ended June 30, 2012 and 2011, respectively. These unaudited condensed consolidated financial statements are not necessarily indicative of the results to be expected for the entire year. The unaudited consolidated balance sheet presented as of December 31, 2011 has been derived from the audited consolidated financial statements as of that date, and the consolidated balance sheet presented as of June 30, 2012 has been derived from the unaudited condensed consolidated financial statements as of that date.

The unaudited condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All material intercompany balances and transactions have been eliminated.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to a concentration of credit risk consist of cash, cash equivalents and accounts receivable.

The Company derives its accounts receivable from revenues earned from customers located in the United States and locations outside of the United States. The Company performs ongoing credit evaluations of its customers' financial condition and currently does not require any collateral from its customers. The Company bases its allowance for doubtful accounts on management's best estimate of the amount of probable credit losses in the Company's existing accounts receivable. The Company reviews past due balances over a specified amount individually for collectability on a monthly basis and all other balances quarterly. The Company writes off accounts receivable balances against the allowance when it determines that the amount will not be recovered.

The following table summarizes the revenues from customers that accounted for more than 10% of the Company's revenues for the periods indicated:

Three Months Ended June 30,	Six Months Ended June 30,
--------------------------------	------------------------------

Edgar Filing: GLU MOBILE INC - Form 10-Q

	2012	2011	2012	2011
Apple	35.7%	19.3%	36.6%	17.6%
Google	17.1	*	16.1	*
Tapjoy	12.3	20.6	12.2	15.2

Table of Contents

* Revenues from the customer were less than 10% during the period.

At June 30, 2012, Apple accounted for 33.7%, Tapjoy accounted for 12.7% and Medium Entertainment accounted for 12.2% of total accounts receivable. At December 31, 2011, Apple accounted for 26.6%, Tapjoy accounted for 18.0%, Telecomunicaciones Movilnet accounted for 11.7% and Google accounted for 10.3% of total accounts receivable. No other customer represented more than 10% of the Company's total accounts receivable as of these dates.

Recent Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board (FASB) issued ASU 2011-04, *Fair Value Measurements (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*, (ASU 2011-04). ASU 2011-04 changes the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements to ensure consistency between U.S. GAAP and IFRS. ASU 2011-04 also expands the disclosures for fair value measurements that are estimated using significant unobservable (Level 3) inputs. This new guidance is to be applied prospectively for reporting periods beginning on or after December 15, 2011. The Company adopted the guidance in the first quarter of 2012 and there was no material impact on the consolidated financial statements or related footnotes.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, (ASU 2011-05). ASU 2011-05 eliminates the option to report other comprehensive income and its components in the statement of changes in equity. ASU 2011-05 requires that all non-owner changes in stockholders' equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. This new guidance is to be applied retrospectively for interim and annual periods beginning after December 15, 2011. The Company adopted the guidance in the first quarter of 2012 and there was no material impact on the consolidated financial statements or related footnotes.

In September 2011, the FASB issued ASU 2011-08, *Testing Goodwill for Impairment* (the revised standard). The revised standard is intended to reduce the cost and complexity of the annual goodwill impairment test by providing entities an option to perform a qualitative assessment to determine whether further impairment testing is necessary. The revised standard is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. An entity has the option to first assess qualitative factors to determine whether it is necessary to perform the current two-step test. If an entity believes, as a result of its qualitative assessment, that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, the quantitative impairment test is required. Otherwise, no further testing is required. The Company adopted the guidance in the first quarter of 2012 and there was no material impact on the consolidated financial statements or related footnotes.

Note 2 - Net Loss Per Share

The Company computes basic net loss per share by dividing its net loss for the period by the weighted average number of common shares outstanding during the period less the weighted average unvested common shares subject to restrictions by the Company.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Net loss	\$ (2,988)	\$ (1,752)	\$ (9,829)	\$ (4,924)
Basic and diluted shares:				
Weighted average common shares outstanding	64,523	54,622	64,240	53,335
Weighted average unvested common shares subject to restrictions	(721)	(35)	(724)	(17)
Weighted average shares used to compute basic and diluted net loss per share	63,802	54,587	63,516	53,318
Net loss per share - basic and diluted	\$ (0.05)	\$ (0.03)	\$ (0.15)	\$ (0.09)

Table of Contents

The following weighted average options to purchase common stock, warrants to purchase common stock and unvested shares of common stock subject to restrictions have been excluded from the computation of diluted net loss per share of common stock for the periods presented because including them would have had an anti-dilutive effect:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Warrants to purchase common stock	4,067	5,769	4,216	6,231
Unvested common shares subject to restrictions	721	35	724	17
Options to purchase common stock	10,315	7,810	9,994	7,403
	15,103	13,614	14,934	13,651

Note 3 - Fair Value Measurements*Fair Value Measurements*

ASC 820, *Fair Value Measurements and Disclosures* (ASC 820), defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Fair value is defined under ASC 820 as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value under ASC 820 must maximize the use of observable inputs and minimize the use of unobservable inputs. The standard describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company's cash and cash equivalents are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. As of June 30, 2012 and December 31, 2011, the Company had \$24,532 and \$32,212, respectively, in cash and cash equivalents.

Liabilities for Contingent Consideration

Level 3 liabilities consist of acquisition-related non-current liabilities for contingent consideration (i.e., earnouts) related to the acquisition of Blammo Games Inc., a company organized under the laws of Ontario (Blammo), which was acquired on August 1, 2011. The former Blammo shareholders have the opportunity to earn additional shares of the Company's common stock based on future net revenues generated by Blammo during the fiscal years ending March 31, 2013, March 31, 2014 and March 31, 2015. See Note 5 for further details regarding the Blammo acquisition. The expected number of shares to be issued in each year depends on the probability of Blammo achieving the net revenue targets. The Company uses a risk-neutral framework to estimate the probability of achieving these revenue targets for each year. The fair value of the contingent consideration was determined using a digital option, which captures the present value of the expected payment multiplied by the probability of reaching the revenue targets for each year. Key assumptions for the three months ended June 30, 2012 included a discount rate of 25.0%, volatility of 41.0%, risk free rates of between 0.18% and 0.39% and probability-adjusted revenue levels. Probability-adjusted revenue is a significant input that is not observable in the market, which ASC 820 refers to as a Level 3 input. The fair value of these contingent liabilities recorded on the Company's condensed consolidated balance sheet as of June 30, 2012, was \$6,578. The Company has recorded \$4,292 of the total contingent consideration as a current liability in accrued compensation and the remainder has been recorded in other long-term liabilities as settlement is greater than one year from the end of the period. In accordance with ASC 805, changes in the fair value of non-employee contingent consideration are recognized in general and administrative expense.

Table of Contents**Note 4 - Balance Sheet Components****Accounts Receivable**

	June 30, 2012	December 31, 2011
Accounts receivable	\$ 14,321	\$ 12,621
Less: Allowance for doubtful accounts	(312)	(800)
	\$ 14,009	\$ 11,821

Accounts receivable includes amounts billed and unbilled as of the respective balance sheet dates. The Company had no significant bad debts during the three and six months ended June 30, 2012 and 2011.

Property and Equipment

	June 30, 2012	December 31, 2011
Computer equipment	\$ 5,432	\$ 5,318
Furniture and fixtures	481	485
Software	5,066	4,707
Leasehold improvements	2,162	1,763
	13,141	12,273
Less: Accumulated depreciation and amortization	(9,221)	(8,339)
	\$ 3,920	\$ 3,934

Depreciation expense for the three months ended June 30, 2012 and June 30, 2011 was \$556 and \$406, respectively. Depreciation expense for the six months ended June 30, 2012 and June 30, 2011 was \$1,118 and \$833, respectively.

Other Long-Term Liabilities

	June 30, 2012	December 31, 2011
Uncertain tax position obligations	2,987	5,264
Contingent earnout liability	2,286	796
Deferred income tax liability	1,156	1,150
Unfavorable lease obligations	506	664
Other	801	629
	\$ 7,736	\$ 8,503

Note 5 - Business Combinations**Griptonite, Inc.**

Edgar Filing: GLU MOBILE INC - Form 10-Q

On August 2, 2011, the Company completed the acquisition of Griptonite, Inc., a Washington corporation (Griptonite) and formerly a wholly owned subsidiary of Foundation 9 Entertainment, Inc., a Delaware corporation (Foundation 9), pursuant to an Agreement and Plan of Merger, as amended on August 15, 2011 (the Merger Agreement), by and among the Company, Granite Acquisition Corp., a Washington corporation and wholly owned subsidiary of the Company (Sub), Foundation 9 and Griptonite. Pursuant to the terms of the Merger Agreement, Sub merged with and into Griptonite in a statutory reverse triangular merger (the Merger), with Griptonite surviving the Merger as a wholly owned subsidiary of the Company. Griptonite, which is based in Kirkland, Washington, is a developer of games for advanced platforms, including handheld devices. The Company acquired Griptonite to increase its studio development capacity and augment its existing development efforts to accelerate the introduction of new titles on smartphones and tablets.

In connection with the Merger, the Company issued to Foundation 9, as Griptonite s sole shareholder, in exchange for all of the issued and outstanding shares of Griptonite capital stock, a total of 6,106 shares of the Company s common stock, for consideration of approximately \$28,088, using the \$4.60 closing price of the Company s common stock on The NASDAQ Global Market on August 2, 2011; 600 shares will be held in escrow until November 2, 2012 as security to satisfy potential indemnification claims under the Merger Agreement. In addition, the Company may be required to issue additional shares (not to exceed 5,302 shares) or in specified circumstances pay additional cash (i) in satisfaction of indemnification obligations in the case of breaches of the Company s and Sub s representations, warranties and covenants in the Merger Agreement or (ii) pursuant to potential working capital adjustments.

Table of Contents

The preliminary allocation of the Griptonite purchase price was based upon valuations for certain assets and liabilities assumed. The valuation was based upon preliminary calculations and valuations, and the Company's estimates and assumptions are subject to change as the Company obtains additional information for its estimates during the respective measurement periods (up to one year from the acquisition date). The following table summarizes the preliminary fair values of assets acquired and liabilities assumed at the date of acquisition:

Assets acquired:	
Cash	\$ 10,300
Accounts receivable	1,558
Prepaid and other current assets	1,028
Property and equipment	731
Other long term assets	33
Intangible assets:	
Non-compete agreements	3,200
Developed Technology	2,500
Goodwill	12,735
Total assets acquired	32,085
Liabilities assumed:	
Accounts payable and other accrued liabilities	(1,226)
Deferred tax liability and other long-term liabilities	(2,771)
Total liabilities	(3,997)
Net acquired assets	\$ 28,088

Acquisition-related intangibles included in the above table are finite-lived and are being amortized on a straight-line basis over their estimated lives ranging from three months to two years, which approximates the pattern in which the economic benefits of the intangible assets are realized.

The Company allocated the residual value of \$12,735 to goodwill. Goodwill represents the excess of the purchase price over the fair value of the net tangible and intangible assets acquired. In accordance with ASC 350, *Intangibles – Goodwill and Other* (ASC 350), goodwill will not be amortized but will be tested for impairment at least annually. Goodwill created as a result of the Griptonite acquisition is not deductible for tax purposes.

Assumption of Griptonite Lease

In connection with the Merger, the Company assumed lease obligations related to the premises located in Kirkland, Washington (the Griptonite Lease). The Griptonite Lease covers approximately 54 rentable square feet and has a term that ends on September 30, 2015. As part of the purchase accounting adjustments for Griptonite, the Company eliminated the existing deferred rent balance and recorded a fair value adjustment to reflect the current market value of the unfavorable operating lease commitment. The current and long-term fair value of the unfavorable operating lease obligation was \$258 and \$506, respectively, as of June 30, 2012. The current and long-term fair value of the unfavorable operating lease obligation was \$268 and \$633, respectively, as of December 31, 2011. The Griptonite Lease has been included in the future lease obligations disclosed in Note 7.

Blammo Games Inc.

On August 1, 2011, the Company completed the acquisition of Blammo, by entering into a Share Purchase Agreement (the Share Purchase Agreement) by and among the Company, Blammo and each of the owners of the outstanding share capital of Blammo (the Sellers). Blammo is a developer of freemium games for the iOS platform located in Toronto, Canada.

Pursuant to the terms of the Share Purchase Agreement, the Company purchased from the Sellers all of the issued and outstanding share capital of Blammo (the Share Purchase), and in exchange for such Blammo share capital, the Company (i) issued to the Sellers, in the aggregate, 1,000

Edgar Filing: GLU MOBILE INC - Form 10-Q

shares of the Company's common stock (the Initial Shares), which resulted in initial consideration of \$5,070 using the \$5.07 closing price of the Company's common stock on The NASDAQ Global Market on August 1, 2011, and (ii) agreed to issue to the Sellers, in the aggregate, up to an additional 3,313 shares of the Company's common stock (the Additional Shares) if Blammo achieves certain net revenue targets during the years ending March 31, 2013, March 31, 2014 and March 31, 2015, as more fully described below under Contingent Consideration. 100 of the Initial Shares were held in escrow until August 1, 2012 to satisfy indemnification claims under the Share Purchase Agreement.

Table of Contents

The allocation of the Blammo purchase price was based upon valuations for certain assets and liabilities assumed. The following table summarizes the fair values of assets acquired and liabilities assumed at the date of acquisition:

Assets acquired:	
Cash and other assets	\$ 69
Intangible assets:	
Non-compete agreements	1,400
In-process research and development	300
Goodwill	4,309
Total assets acquired	6,078
Liabilities assumed:	
Accounts payable and other accrued liabilities	(287)
Other long-term liabilities	(721)
Total liabilities	(1,008)
Net acquired assets	\$ 5,070

Acquisition-related intangibles included in the above table are finite-lived and are being amortized on a straight-line basis over their estimated lives ranging from one to four years.

In connection with the acquisition of Blammo, in 2011, the Company recorded net deferred tax liabilities of \$416, with a corresponding adjustment to goodwill. These deferred taxes were primarily related to identifiable intangible assets and net operating losses.

The Company allocated the residual value of \$4,309 to goodwill. Goodwill represents the excess of the purchase price over the fair value of the net tangible and intangible assets acquired. In accordance with ASC 350, goodwill will not be amortized but will be tested for impairment at least annually. Goodwill created as a result of the Blammo acquisition is not deductible for tax purposes.

Contingent Consideration

The Additional Shares will be issued to the Sellers if, and to the extent that, Blammo achieves certain Net Revenue (as such term is defined in the Share Purchase Agreement) performance targets as follows: (i) for fiscal 2013 (April 1, 2012 through March 31, 2013), (a) 227 Additional Shares will be issued to the Sellers if, and only in the event that, Blammo meets its Baseline Net Revenue goal for such fiscal year, and (b) up to an additional 682 Additional Shares will be issued to the Sellers to the extent that Blammo exceeds its Baseline Net Revenue goal and meets its Upside Net Revenue goal for such fiscal year, (ii) for fiscal 2014 (April 1, 2013 through March 31, 2014), (a) 417 Additional Shares will be issued to the Sellers if, and only in the event that, Blammo meets its Baseline Net Revenue goal for such fiscal year, and (b) up to an additional 833 Additional Shares will be issued to the Sellers to the extent that Blammo exceeds its Baseline Net Revenue goal and meets its Upside Net Revenue goal for such fiscal year, and (iii) for fiscal 2015 (April 1, 2014 through March 31, 2015), (a) no Additional Shares will be issued to the Sellers if Blammo does not meet its Baseline Net Revenue goal for such fiscal year and (b) up to 1,154 Additional Shares will be issued to the Sellers to the extent that Blammo exceeds its Baseline Net Revenue goal and meets its Upside Net Revenue goal for such fiscal year. To the extent that Blammo meets its Baseline Net Revenue goal for a fiscal year but does not meet its Upside Net Revenue goal for such fiscal year, Additional Shares will be issued to the Sellers on a straight-line basis based on the amount by which Blammo exceeded the Baseline Net Revenue goal. Blammo's Baseline and Upside Net Revenue goals for fiscal 2013, 2014 and 2015 are as follows:

Fiscal Year	Baseline Net Revenue	Upside Net Revenue
Fiscal 2013	\$ 3,500	\$ 5,000
Fiscal 2014	\$ 5,500	\$ 10,000
Fiscal 2015	\$ 8,500	\$ 15,000

Edgar Filing: GLU MOBILE INC - Form 10-Q

Three of the five Sellers are also employees of Blammo. If any of these employee Sellers voluntarily terminates his employment with Blammo (other than because of a disability that prevents him or her from performing his job) or if the Company or Blammo terminates such Seller's employment for Cause (as such term is defined in the Share Purchase Agreement), then such Seller will be eligible to receive Additional Shares if and when such Additional Shares are earned as described above only with respect to the fiscal year in which such termination of employment occurs (and all previous fiscal years to the extent applicable), but not with respect to any Additional Shares issued in any subsequent fiscal year. In such an event, the Additional Shares that such Seller would have

Table of Contents

otherwise received will be forfeited and will not be issued by the Company or distributed to the other Sellers, but the other Sellers' rights to receive Additional Shares will not otherwise be affected. The fair value of the contingent consideration issued to the three Sellers who are also employees of Blammo is not considered part of the purchase price, as vesting is contingent upon these employees' continued service during the earn-out periods. The Company records the contingent consideration issued to these employees as a compensation expense over the earn-out period of one to three years. See Note 10 for further details. At acquisition, in accordance with ASC 805, *Business Combinations*, the Company recorded \$306 of the contingent consideration as part of the purchase accounting allocation, this amount represents the fair value of the portion of the forecasted Additional Shares to be issued to the Sellers who are not employees of Blammo. This amount is fair valued in every reporting period, and the Company recorded a non-cash adjustment of \$970 as of June 30, 2012, which represents the change in fair value since the date of acquisition.

Valuation Methodology

The Company engaged a third party valuation firm to aid management in its analyses of the fair value of Griptonite and Blammo. All estimates, key assumptions and forecasts were either provided by or reviewed by the Company. While the Company chose to utilize a third party valuation firm, the fair value analyses and related valuations represent the conclusions of management and not the conclusions or statements of any third party.

Intangible assets acquired consist of non-compete agreements, acquired technology and in-process research and development (IPR&D). Each valuation methodology assumes a discount rate of 25%.

The Blammo and Griptonite non-compete agreements were valued using the loss of income method, which is an income approach. Two separate cashflows were prepared, one to model the cashflow with the non-compete agreements in place, and one without the agreements. The difference between the debt-free cashflow of the two models was then discounted to present value using a discount rate.

In the valuation of Griptonite developed technology, the replacement cost method of the cost approach was used; although the Company does not expect to use the acquired technology, it was deemed likely that a market participant would perceive value in acquiring and integrating these technologies into their own platforms. The value was determined based on the engineering costs to replace or recreate the developed technology. Key assumptions used included, man hours to recreate, costs per month and remaining total and economic life.

As of the valuation date, Blammo was in the process of developing one game, which game was launched in December 2011. The Company has estimated the majority of the revenues associated with this game would be generated in 2012 and 2013. The fair value was calculated using the multi-period excess earning method of the income approach, and significant assumptions used included the discount rate, forecasted revenues, forecasted cost of goods sold and forecasted operating expense. The Company capitalized approximately \$300 of IPR&D costs associated with the above game at the acquisition date. These costs were reclassified to *Titles, Content and Technology* in the fourth quarter of 2011 upon launch of the game and amortized over the estimated life of the game of two years.

Pro Forma Financial Information (unaudited)

The results of operations for both Griptonite and Blammo and the estimated fair market values of the assets acquired and liabilities assumed have been included in the Company's condensed consolidated financial statements since the date of each acquisition. For the three and six months ended June 30, 2011, Griptonite and Blammo did not contribute to the Company's net revenue or net losses as this was prior to the acquisition of each company.

The unaudited pro forma financial information in the table below summarizes the combined results of the Company's operations and those of Griptonite for the periods shown as if the acquisition of Griptonite had occurred on January 1, 2011. The pro forma financial information includes the business combination accounting effects of the acquisition, including amortization charges from acquired intangible assets. The pro forma financial information presented below is for informational purposes only, and is subject to a number of estimates, assumptions and other uncertainties. In addition, the pro forma financial information presented below does not include the unaudited financial information of Blammo, as it was not material.

Table of Contents

	Three Months Ended June 30, 2011	Six Months Ended June 30, 2011
Total pro forma revenues	\$ 22,251	\$ 43,248
Pro forma net loss	(2,095)	(6,169)
Pro forma net loss per share basic and diluted	\$ (0.03)	\$ (0.10)

All of the goodwill related to both the Blammo and Griptonite transactions was assigned to the Company's Americas reporting unit. See Note 6 for additional information related to the changes in the carrying amount of goodwill.

Note 6 - Goodwill and Intangible Assets

The Company's intangible assets were acquired in connection with the acquisitions of MacroSpace in 2004, iPhone in 2006, MIG in 2007, Superscape in 2008, Griptonite and Blammo in 2011 and the purchase of the Deer Hunter trademark and brand assets in the second quarter of 2012. The carrying amounts and accumulated amortization expense of the acquired intangible assets, including the impact of foreign currency exchange translation, at June 30, 2012 and December 31, 2011 were as follows:

	Estimated Useful Life	Gross Carrying Value	June 30, 2012 Accumulated Amortization Expense (Including Impact of Foreign Exchange)	Net Carrying Value	December 31, 2011 Accumulated Amortization Expense (Including Impact of Foreign Exchange)	Net Carrying Value
Intangible assets amortized to cost of revenues:						
Titles, content and technology	2 yrs	\$ 11,393	\$ (11,174)	\$ 219	\$ 11,391	\$ 294
Catalogs	1 yr	1,215	(1,215)		1,216	(1,216)
ProvisionX Technology	6 yrs	200	(200)		200	(200)
Carrier contract and related relationships	5 yrs	19,283	(14,910)	4,373	19,206	5,755
Licensed content	5 yrs	2,944	(2,944)		2,924	(2,924)
Service provider license	9 yrs	466	(235)	231	463	255
Trademarks	7 yrs	5,223	(402)	4,821	222	(222)
		40,724	(31,080)	9,644	35,622	6,304
Other intangible assets amortized to operating expenses:						
Emux Technology	6 yrs	1,296	(1,296)		1,297	(1,297)
Noncompete agreement	4 yrs	5,167	(2,384)	2,783	5,167	3,774
		6,463	(3,680)	2,783	6,464	3,774
Total intangibles assets subject to amortization		\$ 47,187	\$ (34,760)	\$ 12,427	\$ 42,086	\$ 10,078

The Company has included amortization of acquired intangible assets directly attributable to revenue-generating activities in cost of revenues. The Company has included amortization of acquired intangible assets not directly attributable to revenue-generating activities in operating expenses. The Company acquired approximately \$7,400 of intangible assets as part of the Griptonite and Blammo acquisitions in the third quarter of 2011, which includes approximately \$300 of Blammo IPR&D that was reclassified as *Titles, Content and Technology* in the fourth quarter of 2011; see Note 5 for further details.

On April 1, 2012, the Company acquired from Atari, Inc. (Atari) its Deer Hunter trademark and associated domain names and also took a license to the other intellectual property associated with the Deer Hunter brand for total consideration of \$5,000 in cash (the Consideration). The

Edgar Filing: GLU MOBILE INC - Form 10-Q

License Agreement has a term equal to the longer of (A) 99 years and (B) the expiration of the copyrights in and copyrightable elements of the Deer Hunter intellectual property assets. The acquisition price has been recorded as acquired intangible assets and classified within *Trademarks* in the above table and will be amortized over the estimated useful life of seven years.

During the three months ended June 30, 2012 and 2011, the Company recorded amortization expense in the amounts of \$932 and \$703 respectively, in cost of revenues. During the six months ended June 30, 2012 and 2011, the Company recorded amortization expense in the amounts of \$1,685 and \$1,520, respectively, in cost of revenues. During the three months ended June 30, 2012 and

Table of Contents

2011, the Company recorded amortization expense in the amounts of \$495 and zero, respectively, in operating expenses. During the six months ended June 30, 2012 and 2011, the Company recorded amortization expense in the amounts of \$990 and zero, respectively, in operating expenses.

As of June 30, 2012, the total expected future amortization related to intangible assets was as follows:

Period Ending Dec 31,	Amortization Included in Cost of Revenues	Amortization Included in Operating Expenses	Total Amortization Expense
2012 (remaining six months)	\$ 1,866	\$ 991	\$ 2,857
2013	3,653	1,315	4,968
2014	988	382	1,370
2015	766	95	861
2016 and thereafter	2,371		2,371
	\$ 9,644	\$ 2,783	\$ 12,427

Goodwill

The Company has goodwill attributable to its MIG, Blammo and Griptonite acquisitions as of June 30, 2012. The Company attributed all of the goodwill resulting from the MIG acquisition to its Asia and Pacific (APAC) reporting unit. The Company acquired \$17,044 of goodwill during the third quarter of 2011 as part of the Blammo and Griptonite acquisitions, which was fully assigned to its Americas reporting unit; see Note 5 for further details. The Company had fully impaired all goodwill allocated to its EMEA reporting unit in prior years. The goodwill allocated to the Americas reporting unit is denominated in U.S. Dollars (USD) and the goodwill allocated to the APAC reporting unit is denominated in Chinese Renminbi (RMB). As a result, the goodwill attributed to the APAC reporting unit is subject to foreign currency fluctuations.

Goodwill by geographic region for the periods indicated was as follows:

	June 30, 2012				December 31, 2011			
	Americas	EMEA	APAC	Total	Americas	EMEA	APAC	Total
Balance as of January 1								
Goodwill	\$ 41,915	\$ 25,354	\$ 24,220	\$ 91,489	\$ 24,871	\$ 25,354	\$ 24,039	\$ 74,264
Accumulated Impairment Losses	(24,871)	(25,354)	(19,273)	(69,498)	(24,871)	(25,354)	(19,273)	(69,498)
	17,044		4,947	21,991			4,766	4,766
Goodwill Acquired during the year					17,044			17,044
Effects of Foreign Currency Exchange			39	39			181	181
Balance as of period ended:	17,044		4,986	22,030	17,044		4,947	21,991
Goodwill	41,915	25,354	24,259	91,528	41,915	25,354	24,220	91,489
Accumulated Impairment Losses	(24,871)	(25,354)	(19,273)	(69,498)	(24,871)	(25,354)	(19,273)	(69,498)
Balance as of period ended:	\$ 17,044	\$	\$ 4,986	\$ 22,030	\$ 17,044	\$	\$ 4,947	\$ 21,991

In accordance with ASC 350, the Company's goodwill is not amortized but is tested for impairment on an annual basis or whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable. Under ASC 350, the Company performs the annual impairment review of its goodwill balance as of September 30 or more frequently if triggering events occur.

Edgar Filing: GLU MOBILE INC - Form 10-Q

ASC 350 requires a two-step approach to testing goodwill for impairment for each reporting unit annually, or whenever events or changes in circumstances indicate the fair value of a reporting unit is below its carrying amount. The first step measures for impairment by applying the fair value-based tests at the reporting unit level. The second step (if necessary) measures the amount of impairment by applying the fair value-based tests to individual assets and liabilities within each reporting unit. The fair value of the reporting units is estimated using a combination of the market approach, which utilizes comparable companies' data, and/or the income approach, which uses discounted cash flows.

The Company has three geographic units comprised of the 1) Americas, 2) EMEA and 3) APAC regions. As of June 30, 2012, the Company had goodwill attributable to the APAC and Americas reporting units. The Company performed an annual impairment review as of September 30, 2011 as prescribed in ASC 350 and concluded that it was not at risk of failing the first step, as the fair

Table of Contents

value of the reporting units exceeded its carrying value and thus no adjustment to the carrying value of goodwill was necessary. As a result, the Company was not required to perform the second step. In order to determine the fair value of the Company's reporting units, the Company utilizes the discounted cash flow method and market method. The Company has consistently utilized both methods in its goodwill impairment tests and weights both results equally. The Company uses both methods in its goodwill impairment tests as it believes both, in conjunction with each other, provide a reasonable estimate of the determination of fair value of the reporting unit—the discounted cash flow method being specific to anticipated future results of the reporting unit and the market method, which is based on the Company's market sector including its competitors. The assumptions supporting the discounted cash flow method were determined using the Company's best estimates as of the date of the impairment review.

Note 7 - Commitments and Contingencies**Leases**

The Company leases office space under non-cancelable operating facility leases with various expiration dates through June 2017. Rent expense for the three months ended June 30, 2012 and 2011 was \$647 and \$530, respectively. Rent expense for the six months ended June 30, 2012 and 2011 was \$1,247 and \$1,092, respectively. The terms of the facility leases provide for rental payments on a graduated scale. The Company recognizes rent expense on a straight-line basis over the lease period, and has accrued for rent expense incurred but not paid. The deferred rent balance was \$413 and \$223 at June 30, 2012 and December 31, 2011, respectively, and was included within other long-term liabilities

At June 30, 2012, future minimum lease payments under non-cancelable operating leases were as follows:

Period Ending Dec 31,	Minimum Operating Lease Payments	Sub-lease Income	Net Lease Payments
2012 (remaining six months)	\$ 1,788	\$ 46	\$ 1,742
2013	3,248		3,248
2014	2,303		2,303
2015	2,120		2,120
2016 and thereafter	2,034		2,034
	\$ 11,493	\$ 46	\$ 11,447

Minimum Guaranteed Royalties and Developer Commitments

The Company has entered into license and development agreements with various owners of brands and other intellectual property to develop and publish games for mobile handsets. Pursuant to some of these agreements, the Company is required to pay minimum royalties over the term of the agreement regardless of actual game sales.

Future minimum royalty payments as of June 30, 2012 were as follows:

Period Ending Dec 31,	Minimum Guaranteed Royalties
2012 (remaining six months)	\$ 246

The minimum guaranteed royalty payments are included in current prepaid and accrued royalties.

Income Taxes

As of June 30, 2012, unrecognized tax benefits and potential interest and penalties are classified within Other long-term liabilities on the Company's condensed consolidated balance sheets. As of June 30, 2012, the settlement of the Company's income tax liabilities could not be determined; however, the liabilities are not expected to become due within the next 12 months.

Table of Contents

Indemnification Agreements

The Company has entered into agreements under which it indemnifies each of its officers and directors during his or her lifetime for certain events or occurrences while the officer or director is or was serving at the Company's request in that capacity. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited; however, the Company has a director and officer insurance policy that limits its exposure and enables the Company to recover a portion of any future amounts paid. As a result of its insurance policy coverage, the Company believes the estimated fair value of these indemnification agreements is minimal. Accordingly, the Company had recorded no liabilities for these agreements as of June 30, 2012 or December 31, 2011.

In the ordinary course of its business, the Company includes standard indemnification provisions in most of its license agreements with carriers and other distributors. Pursuant to these provisions, the Company generally indemnifies these parties for losses suffered or incurred in connection with its games, including as a result of intellectual property infringement and viruses, worms and other malicious software. The term of these indemnity provisions is generally perpetual after execution of the corresponding license agreement, and the maximum potential amount of future payments the Company could be required to make under these indemnification provisions is often unlimited; however, the Company has insurance policies that limit to some extent its exposure and enable the Company to recover a portion of any future amounts paid. To date, the Company has not incurred costs to defend lawsuits or settle indemnified claims of these types. As a result, the Company believes the estimated fair value of these indemnity provisions is minimal. Accordingly, the Company had recorded no liabilities for these provisions as of June 30, 2012 or December 31, 2011.

Contingencies

From time to time, the Company is subject to various claims, complaints and legal actions in the normal course of business. The Company assesses its potential liability by analyzing specific litigation and regulatory matters using available information. The Company's estimate of losses is developed in consultation with inside and outside counsel, which involves a subjective analysis of potential results and outcomes, assuming various combinations of appropriate litigation and settlement strategies. After taking all of the above factors into account, the Company determines whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed reasonable probable and the amount can be reasonably estimated. The Company further determines whether an estimated loss from a contingency should be disclosed by assessing whether a loss is deemed reasonably possible. Such disclosure will include an estimate of the additional loss or range of loss or will state that an estimate cannot be made.

The Company does not believe it is party to any currently pending litigation, the outcome of which is reasonably likely to have a material adverse effect on its operations, financial position or liquidity. However, the ultimate outcome of any litigation is uncertain and, regardless of outcome, litigation can have an adverse impact on the Company because of defense costs, potential negative publicity, diversion of management resources and other factors.

Note 8 - Debt

MIG Notes

In December 2007, the Company acquired MIG to accelerate its presence in China. In December 2008, the Company amended the MIG merger agreement to acknowledge the full achievement of the earnout milestones and at the same time entered into secured promissory notes in the aggregate principal amount of \$20,000 payable to the former MIG shareholders (the "Earnout Notes") as full satisfaction of the MIG earnout. The Earnout Notes required that the Company pay off the remaining principal and interest in installments. In December 2008, the Company also entered into secured promissory notes in the aggregate principal amount of \$5,000 payable to two former shareholders of MIG (the "Special Bonus Notes") as full satisfaction of the special bonus provisions of their employment agreements. The Company had fully repaid both the Earnout Notes and Special Bonus Notes as of March 31, 2011.

Credit Facility

In December 2008, the Company entered into a revolving credit facility (the "Credit Facility"), the terms of which were amended in August 2009, February 2010, March 2010 and February 2011. The Credit Facility, as amended, provided for borrowings of up to \$8,000, subject to a borrowing base equal to 80% of the Company's eligible accounts receivable. The Credit Facility expired on June 30, 2011 and all borrowings were repaid in full.

Table of Contents**Note 9 - Stockholders' Equity****Acquisitions**

On August 1, 2011, the Company issued an aggregate of 1,000 shares of its common stock to the Sellers in connection with the Company's acquisition of Blammo.

On August 2, 2011, the Company issued an aggregate of 6,106 shares of its common stock to Foundation 9 in connection with the Company's acquisition of Griptonite.

See Note 5 for more information about these acquisitions.

Public Offering

In January 2011, the Company sold in an underwritten public offering an aggregate of 8,415 shares of its common stock at a public offering price of \$2.05 per share for net cash proceeds of approximately \$15,661 after underwriting discounts and commissions and offering expenses. The underwriters of this offering were Roth Capital Partners, LLC, Craig-Hallum Capital Group LLC, Merriman Capital, Inc. and Northland Capital Markets.

Warrants to Purchase Common Stock

In August 2010, the Company completed a private placement of its common stock and warrants to purchase shares of its common stock (the 2010 Private Placement). Investors in the 2010 Private Placement received warrants initially exercisable to purchase an aggregate of up to 6,748 shares of the Company's common stock at an initial exercise price of \$1.50 per share (the Warrants). The Warrants were immediately exercisable, have a five-year term and provide for weighted-average anti-dilution protection in addition to customary adjustment for dividends, reorganization and other common stock events. During the six months ended June 30, 2012 and 2011, respectively, investors exercised warrants to purchase 100 and 2,100 shares of the Company's common stock, and the Company received gross proceeds of \$150 and \$3,150 in connection with these exercises.

Warrants outstanding as of June 30, 2012 were as follows:

Issue Date	Term (Years)	Exercise Price per Share	Number of Shares Outstanding Under Warrant
May 2006	7	\$ 9.03	106
August 2010	5	\$ 1.50	4,173
			4,279

Note 10 - Stock Option and Other Benefit Plans**2007 Equity Incentive Plan**

In January 2007, the Company's Board of Directors adopted, and in March 2007 the Company's stockholders approved, the 2007 Equity Incentive Plan (the 2007 Plan). As of June 30, 2012, 1,547 shares were available for future grants under the 2007 Plan.

2007 Employee Stock Purchase Plan

In January 2007, the Company's Board of Directors adopted, and in March 2007 the Company's stockholders approved, the 2007 Employee Stock Purchase Plan (the 2007 Purchase Plan). As of June 30, 2012, 986 shares were available for issuance under the 2007 Purchase Plan.

2008 Equity Inducement Plan

In March 2008, the Company's Board of Directors adopted the 2008 Equity Inducement Plan (the Inducement Plan) to augment the shares available under its existing 2007 Plan. As of June 30, 2012, 310 shares were reserved for future grants under the Inducement Plan.

Table of Contents**Stock Option Activity**

The following table summarizes the Company's stock option activity for the six months ended June 30, 2012:

	Shares Available	Options Outstanding Number of Shares	Weighted Average Exercise Price	Weighted Average Contractual Term (Years)	Aggregate Intrinsic Value
Balances at December 31, 2011	2,861	9,744	\$ 2.80		
Options granted	(1,729)	1,729	4.30		
Options canceled	725	(725)	3.21		
Options exercised		(442)	1.42		
Balances at June 30, 2012	1,857	10,306	\$ 3.08	4.42	\$ 26,697

Options vested and expected to vest at June 30, 2012		8,728	\$ 3.03	4.30	\$ 23,193
Options exercisable at June 30, 2012		3,615	\$ 2.94	3.43	\$ 10,696

The aggregate intrinsic value in the preceding table is calculated as the difference between the exercise price of the underlying awards and the quoted closing price of the Company's common stock on the NASDAQ Global Market of \$5.55 per share as of June 30, 2012. Consolidated net cash proceeds from option exercises were \$628 and \$1,185 for the six months ended June 30, 2012 and 2011, respectively. The Company realized no significant income tax benefit from stock option exercises during the three or six months ended June 30, 2012 or 2011. As required, the Company presents excess tax benefits from the exercise of stock options, if any, as financing cash flows rather than operating cash flows.

The Company applies the fair value provisions of ASC 718, Compensation-Stock Compensation (ASC 718). Under ASC 718, the Company estimated the fair value of each option award on the grant date using the Black-Scholes option valuation model and the weighted average assumptions noted in the following table.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Dividend yield	%	%	%	%
Risk-free interest rate	0.66%	1.46%	0.66%	1.50%
Expected volatility	69.2%	63.9%	69.2%	63.8%
Expected term (years)	4.00	4.00	4.00	4.00

The Company based its expected volatility on its own historic volatility and the historical volatility of a peer group of publicly traded entities. The expected term of options gave consideration to early exercises, post-vesting cancellations and the options' six-year contractual term. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury Constant Maturity Rate as of the date of grant. The weighted-average fair value of stock options granted during the six months ended June 30, 2012 and 2011 was \$2.22 and \$1.85, respectively.

The Company calculated employee stock-based compensation expense recognized in the three and six months ended June 30, 2012 and 2011 based on awards ultimately expected to vest and reduced it for estimated forfeitures. ASC 718 requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

The following table summarizes the consolidated stock-based compensation expense by line items in the consolidated statement of operations:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Research and development	\$ 2,396	\$ 131	\$ 5,656	\$ 231

Edgar Filing: GLU MOBILE INC - Form 10-Q

Sales and marketing	155	94	270	160
General and administrative	487	280	948	511
Total stock-based compensation expense	\$ 3,038	\$ 505	\$ 6,874	\$ 902

The above table includes compensation expense attributable to the contingent consideration potentially issuable to the Blammo employees who were former shareholders of Blammo, which is recorded as research and development expense over the term of the earn-out periods, as these employees are primarily employed in product development. The Company re-measures the fair value of the contingent consideration each reporting period and only records a compensation expense for the portion of the earn-out target which is likely to be achieved. In addition, the Company is exposed to potential continued fluctuations in the fair market value of the

Table of Contents

contingent consideration in each reporting period, as re-measurement is impacted by changes in the Company's share price and the assumptions used by the Company; see Note 5 for further details. The total fair value of this liability has been estimated at \$6,955, of which \$5,303 of stock-based compensation expense was recorded as a contingent liability as of June 30, 2012. During the three and six months ended June 30, 2012, the Company recorded \$1,874 and \$4,751 of stock-based compensation expense related to this contingent consideration.

As of June 30, 2012, the Company had \$6,802 of total unrecognized compensation expense under ASC 718, net of estimated forfeitures, which will be recognized over a weighted average period of 2.78 years. As permitted by ASC 718, the Company has deferred the recognition of its excess tax benefit from non-qualified stock option exercises.

Note 11 - Income Taxes

The Company recorded an income tax benefit of \$2,019 and \$1,579 for the three and six months ended June 30, 2012, respectively, primarily related to the release of an uncertain tax position due to the expiration of the statute of limitations in certain foreign jurisdictions, which was partially offset by foreign withholding taxes and income taxes. The Company recorded an income tax provision of \$501 and \$1,275 for the three and six months ended June 30, 2011, respectively, primarily related to foreign withholding taxes and income taxes. The income tax rates vary from the Federal and State statutory rates due to the valuation allowances on the Company's net operating losses, foreign tax rate differences and withholding taxes.

The Company estimates its annual effective tax rate at the end of each quarterly period and records the tax effect of certain discrete items, which are unusual or occur infrequently, in the interim period in which they occur. In addition, jurisdictions with a projected loss for the year or a year-to-date loss where no tax benefit can be recognized and jurisdictions where a reliable estimate of ordinary income cannot be made are excluded from the estimated annual effective tax rate. The impact of such an exclusion could result in a higher or lower effective tax rate during a particular quarter depending on the mix and timing of actual earnings versus annual projections. The Company's ability to use its net operating loss carryforwards and federal and state tax credit carryforwards to offset future taxable income and future taxes, respectively, may be subject to restrictions attributable to equity transactions that result in changes in ownership as defined by Internal Revenue Code Section 382.

The Company accounts for uncertain tax positions in accordance with ASC 740, *Income Taxes* (ASC 740). As of June 30, 2012 and December 31, 2011, the total amount of unrecognized tax benefits was \$3,412 and \$4,034, respectively. As of June 30, 2012 and December 31, 2011, approximately \$15 and \$19, respectively, of unrecognized tax benefits, if recognized, would impact the Company's effective tax rate. The remaining balance, if recognized, would adjust the Company's goodwill from acquisitions or would adjust the Company's deferred tax assets, which are subject to a valuation allowance. At June 30, 2012, the liability for uncertain tax positions decreased by approximately \$629 due to the expiration of certain statutes of limitation in foreign jurisdictions in which the Company does business. At June 30, 2012, the Company anticipated that the liability for uncertain tax positions could decrease by approximately \$714 within the next twelve months due to the expiration of certain statutes of limitation in foreign jurisdictions in which the Company does business.

The Company's policy is to recognize interest and penalties related to unrecognized tax benefits in income tax expense. The Company recorded \$53 and \$61 of interest on uncertain tax positions during the three months ended June 30, 2012 and 2011, respectively. The Company recorded \$114 and \$122 of interest on uncertain tax positions during the six months ended June 30, 2012 and 2011, respectively. During the second quarter of 2012, the Company released \$1,798 of interest and penalties on uncertain tax positions due to the expiration of certain statutes of limitation in foreign jurisdictions in which the Company does business. As of June 30, 2012 and December 31, 2011, the Company had a liability of \$2,275 and \$3,935, respectively, related to interest and penalties for uncertain tax positions.

The Company is subject to taxation in the United States and various foreign jurisdictions. The material jurisdictions subject to examination by tax authorities are primarily the State of California, United States, United Kingdom, Canada and China. The Company's federal and California State tax returns are open by statute for tax years 2002 and forward and could be subject to examination by the tax authorities. The statute of limitations for the Company's 2009 and 2010 tax returns for the various entities in the United Kingdom will close in 2012. The Company's China income tax returns are open by statute for tax years 2007 and forward. In practice, a tax audit, examination or tax assessment notice issued by the Chinese tax authorities does not represent finalization or closure of a tax year.

Table of Contents**Note 12 - Segment Reporting**

ASC 280, *Segment Reporting* (ASC 280), establishes standards for reporting information about operating segments. It defines operating segments as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision-maker, or decision-making group, in deciding how to allocate resources and in assessing performance. The Company's chief operating decision-maker is its Chief Executive Officer. The Company's Chief Executive Officer reviews selected financial information on a geographic basis; however this information is included within one operating segment for purposes of allocating resources and evaluating financial performance.

Accordingly, the Company reports as a single reportable segment - mobile games. It attributes revenues to geographic areas based on the country in which the distributor's, advertising service provider's or carrier's principal operations are located, and in the case of digital storefronts, revenues are attributed to the geographic location where the end-user makes the purchase.

A breakdown of the Company's total sales to customers in the feature phone and smartphone markets is shown below:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(in thousands)		(in thousands)	
Feature phone	\$ 3,710	\$ 8,253	\$ 7,875	\$ 18,731
Smartphone	19,911	9,427	37,290	15,375
Revenues	\$ 23,621	\$ 17,680	\$ 45,165	\$ 34,106

The Company generates its revenues in the following geographic regions:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
United States of America	\$ 13,631	\$ 9,218	\$ 26,122	\$ 16,493
China	1,288	885	2,374	2,312
Americas, excluding the USA	1,134	1,455	2,101	3,371
EMEA	4,639	4,989	9,233	10,060
Other	2,929	1,133	5,335	1,870
	\$ 23,621	\$ 17,680	\$ 45,165	\$ 34,106

The Company attributes its long-lived assets, which primarily consist of property and equipment, to a country primarily based on the physical location of the assets. Property and equipment, net of accumulated depreciation and amortization, summarized by geographic location was as follows:

	June 30, 2012	December 31, 2011
Americas	\$ 2,797	\$ 3,101
EMEA	783	420
Other	340	413
	\$ 3,920	\$ 3,934

Table of Contents**Note 13 Restructuring**

Restructuring information as of June 30, 2012 was as follows:

	2012		2011		Restructuring 2010		2009		Total
	Workforce	Workforce	Facilities Related	Facilities Related	Workforce	Facilities Related	Facilities Related	Facilities Related	
Balance as of January 1, 2011	\$	\$			296	1,585	581		\$ 2,462
Charges to operations			548	96	41				685
Non cash adjustments				(86)	(117)		(23)		(226)
Charges settled in cash			(548)	(10)	(220)	(932)	(324)		(2,034)
Balance as of December 31, 2011						653	234		887
Charges to operations		320							320
Charges settled in cash		(146)				(374)	(146)		(666)
Balance as of June 30, 2012	\$	\$ 174	\$	\$	\$	\$ 279	\$ 88	\$	\$ 541

During 2009, 2010, 2011 and 2012, the Company's management approved restructuring plans to improve the effectiveness and efficiency of its operating model and reduce operating expenses around the world. The 2012 restructuring plan included \$320 of restructuring charges relating to employee termination costs in the Company's APAC offices and a reduction of executive sales and marketing headcount in the United States. The 2011 restructuring plan included \$548 of restructuring charges relating to employee termination costs in the Company's APAC, Latin America, Russia and United Kingdom offices. The remaining restructuring charge of \$96 related primarily to facility-related charges resulting from vacating a portion of the Company's Moscow offices. Since the inception of the 2010 restructuring plan through June 30, 2012, the Company incurred \$1,581 of restructuring charges relating to employee termination costs in the Company's United States, APAC, Latin America and United Kingdom offices. The remaining restructuring charge of \$1,854 related primarily to facility-related charges resulting from the relocation of the Company's corporate headquarters to San Francisco. Since the inception of the 2009 restructuring plan through June 30, 2012, the Company incurred \$1,102 of facility-related charges, comprised mainly of charges associated with changes in the sublease probability assumption for the vacated office space in the Company's United States headquarters. The Company does not expect to incur any additional charges under the 2009 restructuring plan.

As of June 30, 2012, the Company's remaining restructuring liability of \$541 was comprised of employee terminations and facility related costs that are expected to be paid over the remainder of the lease terms, which is less than one year. As of December 31, 2011, the Company's remaining restructuring liability of \$887 was comprised of facility related costs.

Note 14 - Subsequent Events*Acquisition of GameSpy*

On August 2, 2012, the Company completed the acquisition of GameSpy Industries, Inc. (GameSpy) pursuant to an Agreement and Plan of Merger (the GameSpy Merger Agreement) by and among the Company, Galileo Acquisition Corp., a California corporation and wholly owned subsidiary of the Company (Galileo), IGN Entertainment, Inc., a Delaware corporation (IGN), and GameSpy.

In connection with the acquisition, the Company issued to IGN, as GameSpy's sole shareholder, in exchange for all of the issued and outstanding shares of GameSpy capital stock, a total of 600 shares of the Company's common stock, for consideration of approximately \$2,796, using the \$4.66 closing price of the Company's common stock on The NASDAQ Global Market on August 2, 2012; 90 shares will be held in escrow until November 2, 2013 as security to satisfy indemnification claims under the GameSpy Merger Agreement.

The Company has not made all of the required disclosures in accordance with ASC 805-10-50-2, *Business Combinations*, as it is currently in the process of evaluating the purchase accounting implications of the above transaction.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The information in this discussion and elsewhere in this report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). Such statements are based upon current expectations that involve risks and uncertainties. Any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. For example, the words may, will, believe, anticipate, plan, expect, intend, could, estimate, continue and similar expressions or variations are intended to identify forward-looking statements. In this report, forward-looking statements include, without limitation, the following:

our expectations and beliefs regarding the future conduct and growth of our business;

our expectations regarding competition and our ability to compete effectively;

our expectations regarding the development of our freemium games for smartphones and tablets;

our expectation that the substantial majority of the freemium games that we are developing for smartphones and tablets will be based on our own intellectual property, which we believe will significantly enhance our margins and long-term value;

our expectations regarding our revenues, including the expected continued decline in revenues from games we distribute for feature phones in our carrier-based business and our belief that our smartphone revenues will continue to increase as a percentage of our total revenues during each quarter of 2012;

our expectation that the revenues that we derive from in-app purchases, advertisements and offers in our freemium games will continue to grow for the remainder of 2012;

our expectation that our gross margin will remain relatively flat for the remainder of 2012 due to the fact that although we will continue to generate an increasing percentage of our total revenues from games based upon original intellectual property, such reduction to our cost of revenues will be generally offset by an expected increase in our hosting costs related to our freemium games;

our expectations regarding our operating expenses, including anticipated increased spending on sales and marketing and research and development initiatives during 2012 compared with 2011, as well as the anticipated impact that our acquisitions of Blammo Games Inc. (Blammo), Griptonite, Inc. (Griptonite) and GameSpy Industries, Inc. (GameSpy) will have on our operating expenses;

our expectation that we will release 23 new freemium games for smartphones in 2012, with 18 of such titles expected to be launched in the second half of 2012;

our expectation that we will finish 2012 with more than \$21.0 million in cash;

our assumptions regarding the impact of Recent Accounting Pronouncements applicable to us;

our assessments and estimates that determine our effective tax rate and valuation allowance, and our expectation that the liability for uncertain tax positions could decrease by approximately \$714,000 within the next twelve months due to the expiration of certain statutes of limitation in foreign jurisdictions in which we do business; and

our belief that our cash and cash equivalents and cash flows from operations will be sufficient to meet our cash needs for at least the next 12 months.

Our actual results and the timing of certain events may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such a discrepancy include, but are not limited to, those discussed in Risk Factors elsewhere in this report. All forward-looking statements in this document are based on information available to us as of the date hereof, and we assume no obligation to update any such forward-looking statements to reflect future events or circumstances.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the unaudited condensed consolidated financial statements and related notes contained elsewhere in this report. Our Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) includes the following sections:

An Overview that discusses at a high level our operating results and some of the trends that affect our business;

Table of Contents

Critical Accounting Policies and Estimates that we believe are important to understanding the assumptions and judgments underlying our financial statements;

Recent Accounting Pronouncements;

Results of Operations, including a more detailed discussion of our revenues and expenses; and

Liquidity and Capital Resources, which discusses key aspects of our statements of cash flows, changes in our balance sheets and our financial commitments.

Overview

This overview provides a high-level discussion of our operating results and some of the trends that affect our business. We believe that an understanding of these trends is important to understand our financial results for the three and six months ended June 30, 2012, as well as our future prospects. This summary is not intended to be exhaustive, nor is it intended to be a substitute for the detailed discussion and analysis provided elsewhere in this report, including our unaudited consolidated financial statements and accompanying notes.

Financial Results and Trends

Revenues for the three months ended June 30, 2012 were \$23.6 million, a 34% increase compared to the three months ended June 30, 2011 in which we reported revenues of \$17.7 million. Revenues for the six months ended June 30, 2012 were \$45.2 million, a 32% increase compared to the six months ended June 30, 2011, in which we reported revenues of \$34.1 million. These increases in revenues were primarily due to a significant increase in our revenues that we generated from games for smartphones, such as Apple's iPhone and mobile phones utilizing Google's Android operating system. We believe that the migration of users from feature phones to smartphone devices, which offer enhanced functionality, will continue during 2012 and for the foreseeable future as consumers increasingly upgrade their mobile phones. Accordingly, we have concentrated our product development efforts exclusively towards developing new titles for smartphones and tablet devices, such as Apple's iPad and tablets utilizing Google's Android operating system such as Amazon's Kindle Fire, and intend to continue to devote significantly fewer resources towards selling games for feature phones in future periods.

For us to succeed in the remainder of 2012 and beyond, we believe that we must increasingly publish mobile games that are widely accepted and commercially successful on smartphone and tablet digital storefronts, which include Apple's App Store, the Google Play Store, Amazon's Appstore and Microsoft's Windows Marketplace. Our smartphone revenues accounted for approximately 84% and 53% of our revenues for the three months ended June 30, 2012 and June 30, 2011, respectively, and 83% and 45% of our revenues for six months ended June 30, 2012 and June 30, 2011, respectively. Our strategy for increasing our revenues from smartphones and tablets involves becoming the leading publisher of mobile freemium games that are downloadable without an initial charge, but which enable a variety of additional content and features to be accessed for a fee or otherwise monetized through various advertising and offer techniques. Because our games can be downloaded and played for free, we are able to more quickly build a significantly larger customer base than we could if we charged users an upfront fee for downloading our games. In addition, our freemium games are generally designed to be persistent experiences maintained through content updates. We believe this approach will enable us to build and grow a longer lasting and more direct relationship with our customers, which will assist us in our future sales and marketing efforts. We intend to continue to have the substantial majority of our freemium games be based upon our own intellectual property, which we believe will significantly enhance our margins and long-term value.

Our smartphone revenues surpassed our feature phone revenues for the first time on a quarterly basis in the second quarter of 2011 and have continued to grow in each succeeding quarter. However, continuing to significantly grow our revenues from smartphones and tablets may be challenging for us for several reasons, including: (1) we have encountered difficulties in retaining users of our games for any significant length of time after they initially download our games and only a very small percentage of users ever purchase virtual currency in our games, and these factors have combined to reduce the overall average lifetime value of our users; (2) the open nature of many of the smartphone and tablet storefronts substantially increases the number of competitive products and competitors to produce them, many of which may devote large marketing budgets to promoting their titles reducing the likelihood of consumer discovery of our titles; (3) we have only relatively recently concentrated our efforts on developing and marketing freemium games; (4) our relatively limited experience creating games that include micro-transaction capabilities, advertising and offers has caused us, and may continue to cause us, to have difficulty optimizing the monetization of our freemium games; and (5) our freemium

Table of Contents

games may not be widely downloaded by consumers for a variety of reasons, including poor consumer reviews or other negative publicity, ineffective or insufficient marketing efforts, a failure to achieve prominent storefront featuring for such games or as a result of the large file sizes of many of our games.

In addition, our revenues will continue to depend significantly on growth in the mobile games market, our ability to continue to attract new end users in that market and the overall strength of the economy, particularly in the United States. Our revenues may also be adversely impacted by decisions by digital storefront owners or our carriers to alter their terms related to the distribution of our games. For example, during the quarter ended June 30, 2011, Apple stopped permitting publishers to include certain types of offers in games sold through the Apple App Store, and this change in Apple policy has negatively impacted our smartphone revenues. In addition, Apple has begun rejecting applications that access a user unique device identifier (UDID), and this change in policy could negatively impact the smartphone revenues that we derive from advertisements, at least in the short term. Our revenues depend on a variety of other factors, including our relationships with digital storefront owners, carriers, other distributors and our licensors. The loss of any of our key relationships could adversely impact our revenues in the future.

Our net loss in the three months ended June 30, 2012 was \$3.0 million versus a net loss of \$1.8 million in the three months ended June 30, 2011. This increase in our net loss was primarily due to an increase in operating expenses of \$10.3 million driven by additional personnel and facility costs associated with the acquisitions of Griptonite and Blammo, discussed in Significant Transactions below, increased research and development and sales and marketing expenses associated with the development and launch of our freemium titles and additional contingent consideration expense related to the Blammo acquisition. This increase was partially offset by a \$5.9 million increase in revenues due to continued growth in sales of our smartphone games, a decrease in our tax provision of \$2.5 million due primarily to the expiration of statutes of limitations in certain jurisdictions and the subsequent release of uncertain tax provisions and a decrease in our cost of revenues by \$755,000 due to a decrease in royalty-burdened revenues as we continued to focus on developing and selling games based on our own original intellectual property. Our net loss in the six months ended June 30, 2012 was \$9.8 million versus a net loss of \$4.9 million in the six months ended June 30, 2011. This increase in our net loss was primarily due to an increase in operating expenses of \$20.2 million driven by additional personnel and facility costs associated with the acquisitions of Griptonite and Blammo, increased research and development and sales and marketing expenses associated with the development and launch of our freemium titles and additional contingent consideration expense related to the Blammo acquisition. We also had increased expense in our other income and expenses of \$665,000 related primarily to unfavorable foreign exchange movements in the first six months of 2012 compared to the comparable period of 2011. This increase in our net loss was partially offset by an \$11.1 million increase in revenues due to continued growth in sales of our smartphone games, a decrease in our tax provision of \$2.9 million due primarily to the expiration of statutes of limitations in certain jurisdictions and the subsequent release of uncertain tax provisions and a decrease in our cost of revenues by \$2.1 million due to a decrease in royalty-burdened revenues as we continued to focus on developing and selling games based on our own original intellectual property. Our operating results are also affected by fluctuations in foreign currency exchange rates of the currencies in which we incur meaningful operating expenses (principally the British Pound Sterling, Chinese Renminbi, Brazilian Real and Russian Ruble), and our customers' reporting currencies, as we transact business in more than 70 countries in more than 20 different currencies, and these currencies fluctuated significantly in 2011 and the first six months of 2012.

We significantly increased our spending on sales and marketing initiatives in the first six months of 2012 as compared with the first six months of 2011 in connection with the launch and promotion of our freemium games, and we expect our sales and marketing expenditures to continue to increase during the second half of 2012 when we will launch the majority of our titles for the year; we expect to launch a total of 23 new freemium titles in 2012, of which we expect to release 18 in the second half of 2012. We also expect that our expenses to develop and port games for smartphones and tablets will increase as we enhance our existing titles and develop new titles to take advantage of the additional functionality offered by these devices. In addition, we expect our overall operating expenses, particularly our research and development expenses, to significantly increase in 2012 compared with 2011 due to our acquisitions of Griptonite, Blammo and GameSpy. As a result of these acquisitions and the increased spending on sales and marketing and research and development initiatives, we expect to use cash in operations in 2012, though at declining rates as we continue releasing products developed by the Griptonite studio.

Our ability to attain profitability will be affected by our ability to grow our revenues, including our ability to derive significant revenues from the games developed by our Blammo and, in particular, Griptonite, studios. We also believe that our GameSpy acquisition will position us to generate additional revenues and increase the lifetime value of our users by enabling us to increase the number of social features in our games. Our ability to attain profitability will also be affected by the extent to which we must incur additional expenses to expand our sales, marketing, development, and general and administrative capabilities to grow our business. The largest component of our recurring expenses is personnel costs, which consist of salaries, benefits and incentive compensation, including bonuses and stock-based compensation, for our employees. We expect that the restructuring measures we implemented

Table of Contents

during 2010, 2011 and the second quarter of 2012, which primarily consisted of headcount reductions, will have a beneficial effect on our overall operating expenses, but will not fully offset the expected increases in our operating expenses. Our business has historically been impacted by seasonality, as many new mobile handset models are released in the fourth calendar quarter to coincide with the holiday shopping season. Because many end users download our games soon after they purchase new mobile phones and tablets, we generally experience seasonal sales increases based on the holiday selling period. However, due to the time between mobile phone and tablet purchases and game purchases, some of this holiday impact occurs for us in our first calendar quarter. In addition, companies' advertising budgets are generally highest during the fourth quarter and decline significantly in the first quarter of the following year, which affects the smartphone revenues we derive from advertisements in our freemium games. We expect these seasonal trends to continue in the future.

Cash and cash equivalents at June 30, 2012 totaled \$24.5 million, a decrease of \$7.7 million from the \$32.2 million balance at December 31, 2011. This decrease was primarily due to the \$5.0 million in cash we used for the purchase of Deer Hunter brand assets (see Significant Transactions below), \$2.6 million of cash used in operations and \$1.1 of capital expenditures. These outflows were partially offset by \$1.4 million of proceeds received from warrant exercises, option exercises and purchases under our employee stock purchase program. We expect to finish 2012 with more than \$21.0 million in cash.

Significant Transactions***Acquisition of GameSpy***

On August 2, 2012, we completed the acquisition of GameSpy pursuant to an Agreement and Plan of Merger (the GameSpy Merger Agreement) by and among Glu, Galileo Acquisition Corp., a California corporation and wholly owned subsidiary of Glu (Galileo), IGN Entertainment, Inc., a Delaware corporation (IGN) and GameSpy. Pursuant to the terms of the GameSpy Merger Agreement, Galileo merged with and into GameSpy in a statutory reverse triangular merger (the GameSpy Merger), with GameSpy surviving the GameSpy Merger as a wholly owned subsidiary of Glu.

In connection with the GameSpy Merger, we issued to IGN, as GameSpy's sole shareholder, in exchange for all of the issued and outstanding shares of GameSpy capital stock, a total of 600,000 shares of our common stock, of which 90,000 shares will be held in escrow until November 2, 2013 as security to satisfy indemnification claims under the GameSpy Merger Agreement. In addition, Glu, GameSpy and IGN entered into a Transition Services Agreement, pursuant to which IGN will provide to Glu and GameSpy certain backend data center transition services related to GameSpy's private cloud storage infrastructure for up to two years following the acquisition.

Deer Hunter Brand Assets

On April 1, 2012, we acquired from Atari, Inc. (Atari) its Deer Hunter trademark and associated domain names and also took a license to the other intellectual property associated with the Deer Hunter brand for total consideration of \$5.0 million in cash (the Consideration). This transaction was structured as (1) the assignment of the Deer Hunter trademark and associated domain names (the Brand Assets) for \$1.0 million in cash pursuant to a Trademark and Domain Name Purchase Agreement between Glu and Atari (the Trademark Purchase Agreement) and (2) an exclusive, irrevocable, sublicensable and transferable worldwide license to the other intellectual property associated with the Deer Hunter brand (collectively, the Deer Hunter IP Assets) for \$4.0 million in cash pursuant to a License Agreement between Glu and Atari (the License Agreement) and, together with the Trademark Purchase Agreement, the Agreements). The License Agreement has a term equal to the longer of (A) 99 years and (B) the expiration of the copyrights in and copyrightable elements of the Deer Hunter IP Assets. The Agreements were dated as of March 31, 2012 and the transaction closed on April 1, 2012.

Acquisition of Griptonite

On August 2, 2011, we completed the acquisition of Griptonite pursuant to an Agreement and Plan of Merger, as amended (the Merger Agreement), by and among Glu, Granite Acquisition Corp., a Washington corporation and wholly owned subsidiary of Glu (Sub), Foundation 9 Entertainment, Inc., a Delaware corporation (Foundation 9), and Griptonite. Pursuant to the terms of the Merger Agreement, Sub merged with and into Griptonite in a statutory reverse triangular merger (the Merger), with Griptonite surviving the Merger as a wholly owned subsidiary of Glu.

In connection with the Merger, we issued to Foundation 9, as Griptonite's sole shareholder, in exchange for all of the issued and outstanding shares of Griptonite capital stock, a total of 6,106,015 shares of our common stock, of which 600,000 shares will be held

Table of Contents

in escrow until November 2, 2012 as security to satisfy indemnification claims under the Merger Agreement. In addition, we may be required to issue additional shares (not to exceed 5,301,919 shares) or in specified circumstances pay additional cash (i) in satisfaction of indemnification obligations in the case of, among other things, breaches of our representations, warranties and covenants in the Merger Agreement or (ii) pursuant to potential working capital adjustments.

Acquisition of Blammo

On August 1, 2011, we completed the acquisition of Blammo by entering into a Share Purchase Agreement (the *Share Purchase Agreement*) by and among Glu, Blammo and each of the owners of the outstanding share capital of Blammo (the *Sellers*).

Pursuant to the terms of the Share Purchase Agreement, we purchased from the Sellers all of the issued and outstanding share capital of Blammo (the *Share Purchase*), and in exchange for such Blammo share capital, we (i) issued to the Sellers, in the aggregate, 1,000,000 shares of our common stock (the *Initial Shares*) and (ii) agreed to issue to the Sellers, in the aggregate, up to an additional 3,312,937 shares of our common stock (the *Additional Shares*) if Blammo achieves certain Net Revenue targets during the years ending March 31, 2013, March 31, 2014 and March 31, 2015, as more fully described below. 100,000 of the Initial Shares were held in escrow until August 1, 2012 to satisfy potential indemnification claims under the Share Purchase Agreement.

The Additional Shares will be issued to the Sellers if, and to the extent that, Blammo achieves certain Net Revenue (as such term is defined in the Share Purchase Agreement) performance targets as follows: (i) for fiscal 2013 (April 1, 2012 through March 31, 2013), (a) 227,273 Additional Shares will be issued to the Sellers if, and only in the event that, Blammo meets its Baseline Net Revenue goal for such fiscal year, and (b) up to an additional 681,818 Additional Shares will be issued to the Sellers to the extent that Blammo exceeds its Baseline Net Revenue goal and meets its Upside Net Revenue goal for such fiscal year, (ii) for fiscal 2014 (April 1, 2013 through March 31, 2014), (a) 416,667 Additional Shares will be issued to the Sellers if, and only in the event that, Blammo meets its Baseline Net Revenue goal for such fiscal year, and (b) up to an additional 833,333 Additional Shares will be issued to the Sellers to the extent that Blammo exceeds its Baseline Net Revenue goal and meets its Upside Net Revenue goal for such fiscal year, and (iii) for fiscal 2015 (April 1, 2014 through March 31, 2015), (a) no Additional Shares will be issued to the Sellers if Blammo does not meet its Baseline Net Revenue goal for such fiscal year and (b) up to 1,153,846 Additional Shares will be issued to the Sellers to the extent that Blammo exceeds its Baseline Net Revenue goal and meets its Upside Net Revenue goal for such fiscal year. To the extent that Blammo meets its Baseline Net Revenue goal for a fiscal year but does not meet its Upside Net Revenue goal for such fiscal year, Additional Shares will be issued to the Sellers on a straight-line basis based on the amount by which Blammo exceeded the Baseline Net Revenue goal. Blammo's Baseline and Upside Net Revenue goals for fiscal 2013, 2014 and 2015 are as follows:

Fiscal Year	Baseline Net Revenue	Upside Net Revenue
Fiscal 2013	\$ 3,500,000	\$ 5,000,000
Fiscal 2014	\$ 5,500,000	\$ 10,000,000
Fiscal 2015	\$ 8,500,000	\$ 15,000,000

The first title created by Blammo was released in the fourth quarter of 2011 and the first title created by our Griptonite studio was released in the first quarter of 2012.

Public Offering

In January 2011, we completed an underwritten public offering (the *2011 Public Offering*) in which we sold an aggregate of 8,414,635 shares of our common stock at a price to the public of \$2.05 per share for net proceeds of approximately \$15.7 million after underwriting discounts and commissions and offering expenses. The underwriters of the 2011 Public Offering were Roth Capital Partners, LLC, Craig-Hallum Capital Group LLC, Merriman Capital, Inc. and Northland Capital Markets.

Critical Accounting Policies and Estimates

Management believes there were no significant changes in our Critical Accounting Policies and Estimates during the six months ended June 30, 2012 as compared to the Critical Accounting Policies and Estimates disclosed in Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2011.

Table of Contents**Recent Accounting Pronouncements**

Information with respect to Recent Accounting Pronouncements may be found in Note 1 of Notes to Unaudited Condensed Consolidated Financial Statements in this report, which information is incorporated herein by reference.

Results of Operations***Comparison of the Three Months Ended June 30, 2012 and 2011****Revenues*

	Three Months Ended June 30,	
	2012	2011
	(in thousands)	
Feature phone	\$ 3,710	\$ 8,253
Smartphone	19,911	9,427
Revenues	\$ 23,621	\$ 17,680

Our revenues increased \$5.9 million, or 33.6%, from \$17.7 million for the three months ended June 30, 2011 to \$23.6 million for the three months ended June 30, 2012, due to a \$10.5 million increase in smartphone revenues resulting from increased sales growth on Apple's iOS-based devices and Android-based devices related primarily to micro-transactions, offers and advertisements. This was partially offset by a \$4.5 million decline in feature phone revenues primarily due to the continued migration of users from feature phones to smartphones and our shift in our product development focus towards developing new titles for smartphone devices. Our smartphone revenues do not include approximately \$7.7 million of revenues as of June 30, 2012 relating primarily to offers and in-app-purchases which have been deferred over their average useful lives. International revenues (defined as revenues generated from carriers, distributors and advertising service providers whose principal operations are located outside the United States or, in the case of the digital storefronts, the revenues generated by end-user purchases made outside of the United States) increased by \$1.5 million, from \$8.5 million in the three months ended June 30, 2011 to \$10.0 million in the three months ended June 30, 2012. This was primarily related to a \$1.8 million increase in our other geographic revenues, primarily related to increased revenues from Korea and Australia resulting from additional revenues attributable to smartphone storefronts and OEM relationships, and a \$403,000 increase in China revenues due to increased smartphone revenues. This increase was partially offset by a decrease of \$671,000 in our Americas, excluding the United States and EMEA, revenues, primarily related to declining feature phone revenues. Our smartphone revenues exceeded our feature phone revenues for the fifth consecutive quarter and we believe that this transition will enable us to have continued revenue growth for the longer term. Additionally, we have experienced significant growth with respect to the revenues that we derive from micro-transactions, advertisements and offers in our freemium games, and expect to experience additional growth from these revenue sources during the remainder of 2012.

Cost of Revenues

	Three Months Ended June 30,	
	2012	2011
	(in thousands)	
Cost of revenues:		
Royalties and other cost of revenues	\$ 2,137	\$ 3,121
Amortization of intangible assets	932	703
Total cost of revenues	\$ 3,069	\$ 3,824
Revenues	\$ 23,621	\$ 17,680

Edgar Filing: GLU MOBILE INC - Form 10-Q

Gross margin

87.0%

78.4%

Our cost of revenues decreased \$755,000, or 19.7%, from \$3.8 million in the three months ended June 30, 2011 to \$3.1 million in the three months ended June 30, 2012. This decrease was primarily due to a \$1.2 million decrease in royalties associated with a decline in royalty-burdened revenue. This decrease was partially offset by a \$229,000 increase in amortization of intangible assets and a \$176,000 increase in hosting fees to support our freemium titles. Revenues attributable to games based upon our own original

Table of Contents

intellectual property increased as a percentage of revenues from 47.1% in the three months ended June 30, 2011 to 83.4% in the three months ended June 30, 2012, primarily due to our focus on developing freemium games for smartphones and tablets that are based on our own intellectual property. The average royalty rate that we paid on games based on licensed intellectual property, excluding royalty impairments, increased from 33.4% in the three months ended June 30, 2011 to 40.3% in the three months ended June 30, 2012. Overall royalties, including impairment of prepaid royalties and guarantees, as a percentage of total revenues decreased from 17.7% in the three months ended June 30, 2011 to 6.7% in the three months ended June 30, 2012. We expect that our gross margin will remain relatively flat for the remainder of 2012; as sales of games based on our own original intellectual property replaces branded game sales, we expect that this benefit will be offset by increased hosting costs related to our freemium games.

Research and Development Expenses

	Three Months Ended June 30,	
	2012	2011
	(in thousands)	
Research and development expenses	\$ 15,697	\$ 8,439
Percentage of revenues	66.5%	47.7%

Our research and development expenses increased \$7.3 million, or 86.0%, from \$8.4 million in the three months ended June 30, 2011 to \$15.7 million in the three months ended June 30, 2012. The increase in research and development costs was primarily due to a \$4.5 million increase in salaries, benefits and variable compensation under our employee bonus plans as we increased our research and development headcount from 292 employees at June 30, 2011 to 513 employees as of June 30, 2012, mainly resulting from the acquisition of the Griptonite and Blammo studios in the third quarter of 2011. The increase was also due to a \$2.3 million increase in stock-based compensation expense, primarily resulting from vesting and changes in the fair market values of contingent consideration issued to employees who are former shareholders of Blammo, a \$682,000 increase in allocated facility and overhead costs associated with higher headcount and a \$402,000 increase in temporary and consulting fees associated with the development and testing of our smartphone titles. This was partially offset by a \$748,000 decrease in payments made to external developers of our titles. As a percentage of revenues, research and development expenses increased from 47.7% for the three months ended June 30, 2011 to 66.5% for the three months ended June 30, 2012. Research and development expenses included \$2.4 million of stock-based compensation expense in the three months ended June 30, 2012 and \$131,000 in the three months ended June 30, 2011. We anticipate that our research and development expenses will continue to increase during 2012, primarily due to increased headcount, including headcount and other costs from the GameSpy acquisition. In addition, we may also be exposed to continued fluctuations in the fair market value of the contingent consideration issued to the Blammo employee shareholders, as the fair value of the contingent consideration is re-measured during each quarter until the end of the earn-out period in March 2015.

Sales and Marketing Expenses

	Three Months Ended June 30,	
	2012	2011
	(in thousands)	
Sales and marketing expenses	\$ 4,701	\$ 3,344
Percentage of revenues	19.9%	18.9%

Our sales and marketing expenses increased \$1.4 million, or 40.6%, from \$3.3 million in the three months ended June 30, 2011 to \$4.7 million in the three months ended June 30, 2012. The increase was primarily due to a \$1.3 million increase in marketing promotions associated with our freemium games. Salaries, benefits and variable compensation costs remained relatively flat despite increasing our sales and marketing headcount from 30 at June 30, 2011 to 37 at June 30, 2012, as these headcount additions were mainly in low cost locations and higher aggregate salary costs were partially offset by lower variable compensation. As a percentage of revenues, sales and marketing expenses increased from 18.9% in the three months ended June 30, 2011 to 19.9% in the three months ended June 30, 2012. Sales and marketing expenses included \$155,000 of stock-based compensation expense in the three months ended June 30, 2012 and \$94,000 in the three months ended June 30, 2011. We expect our sales and marketing expenditures to continue to increase during the remainder of 2012 in connection with the sales and marketing initiatives we intend to undertake related to the 23 new freemium games for smartphones we intend to release during 2012, 18 of which we expect will be released in the second half of 2012.

Table of Contents*General and Administrative Expenses*

	Three Months Ended June 30,	
	2012	2011
	(in thousands)	
General and administrative expenses	\$ 4,556	\$ 3,506
Percentage of revenues	19.3%	19.8%

Our general and administrative expenses increased \$1.1 million, or 29.9%, from \$3.5 million in the three months ended June 30, 2011 to \$4.6 million in the three months ended June 30, 2012. The increase was primarily due to a \$402,000 increase in salaries, benefits and variable compensation as headcount increased from 57 at June 30, 2011 to 65 at June 30, 2012, a \$386,000 increase in the fair market value of contingent consideration issued to the Blammo non-employee shareholders, and a \$280,000 increase in sales and use and value-added taxes, or VAT, that we paid in certain jurisdictions relating to our smartphone revenues. As a percentage of revenues, general and administrative expenses decreased from 19.8% in the three months ended June 30, 2011 to 19.3% in the three months ended June 30, 2012. General and administrative expenses included \$487,000 of stock-based compensation expense in the three months ended June 30, 2012 and \$280,000 in the three months ended June 30, 2011. We anticipate that our general and administrative expenses will increase slightly during 2012. In addition, we may also be exposed to continued fluctuations in the fair market value of the contingent consideration issued to the Blammo non-employee shareholders, as the fair value of the contingent consideration will be measured during each reporting period until the end of the earn-out period in March 2015.

Other Operating Expenses

Our amortization of intangible assets increased from zero in the three months ended June 30, 2011 to \$495,000 in the three months ended June 30, 2012. This increase was due to amortization expense associated with non-compete agreements capitalized at their fair value as part of the purchase accounting for both the Griptonite and Blammo acquisitions. Our restructuring charge increased from \$147,000 in the three months ended June 30, 2011 to \$320,000 in the three months ended June, 2012. Our restructuring charges for the three months ended June 30, 2012 were comprised of employee termination costs in our United States and China offices.

Interest and Other Income/(Expense), Net

Interest and other income/(expense), net, decreased from net income of \$329,000 during the three months ended June 30, 2011 to net income of \$210,000 in the three months ended June 30, 2012. This decrease was primarily due to foreign currency losses related to the revaluation of certain assets and liabilities including accounts payable and accounts receivable.

Income Tax Provision

Income tax provision changed from an expense of \$501,000 in the three months ended June 30, 2011 to a tax benefit of \$2.0 million in the three months ended June 30, 2012. This change was primarily due to the release of uncertain tax positions in certain foreign jurisdictions due to the expiration of the statute of limitations, changes in the jurisdictions included in the anticipated effective tax rate computation and changes in pre-tax income in certain foreign entities. We expect our effective tax rate in 2012 to fluctuate on a quarterly basis. The effective tax rate could be affected by changes in the valuation of our deferred tax assets, changes in actual results versus our estimates, or by changes in tax laws, regulations, accounting principles, or interpretations thereof. At June 30, 2012, we anticipated that the liability for uncertain tax positions could decrease by approximately \$714,000 within the next twelve months due to the expiration of certain statutes of limitation in foreign jurisdictions in which we do business.

Table of Contents**Results of Operations****Comparison of the Six Months Ended June 30, 2012 and 2011***Revenues*

	Six Months Ended June 30,	
	2012	2011
	(in thousands)	
Feature phone	\$ 7,875	\$ 18,731
Smartphone	37,290	15,375
Revenues	\$ 45,165	\$ 34,106

Our revenues increased \$11.1 million, or 32.4%, from \$34.1 million for the six months ended June 30, 2011 to \$45.2 million for the six months ended June 30, 2012, due to a \$21.9 million increase in smartphone revenues resulting from increased sales growth on Apple's iOS-based devices and Android-based devices related primarily to micro-transactions, offers and advertisements. This was partially offset by a \$10.9 million decline in feature phone revenues primarily due to the continued migration of users from feature phones to smartphones and our shift in our product development focus towards developing new titles for smartphone devices. Our smartphone revenues do not include approximately \$7.7 million of revenues as of June 30, 2012 relating primarily to offers and in-app-purchases which have been deferred over their average useful lives. International revenues increased by \$1.4 million, from \$17.6 million in the six months ended June 30, 2011 to \$19.0 million in the six months ended June 30, 2012. This was primarily related to a \$3.5 million increase in our other geographic revenues, primarily related to increased revenues from Korea and Australia resulting from additional revenues attributable to smartphone storefronts and OEM relationships. This increase was partially offset by a decrease of \$2.1 million in our Americas, excluding the United States and EMEA, revenues, primarily related to declining feature phone revenues.

	Six Months Ended June 30,	
	2012	2011
	(in thousands)	
Research and development expenses	\$ 30,730	\$ 15,605
Percentage of revenues	68.0%	45.8%

Our research and development expenses increased \$15.1 million, or 96.9%, from \$15.6 million in the six months ended June 30, 2011 to \$30.7 million in the six months ended June 30, 2012. The increase in research and development costs was primarily due to a \$8.3 million increase in salaries, benefits and variable compensation under our employee bonus plans as we increased our research and development headcount from 292 employees at June 30, 2011 to 513 employees as of June 30, 2012, mainly resulting from the acquisition of the Griptonite and Blammo studios in the third quarter of 2011. The increase was also due to a \$5.4 million increase in stock-based compensation expense, primarily resulting from vesting and changes in the fair market values of contingent consideration issued to employees who are former shareholders of Blammo, a \$1.3 million increase in allocated facility and overhead costs associated with higher headcount and a \$589,000 increase in temporary and consulting fees associated with the development and testing of our smartphone titles. This was partially offset by an \$824,000 decrease in payments made to external developers of our titles. As a percentage of revenues, research and development expenses increased from 45.8% for the six months ended June 30, 2011 to 68.0% for the six months ended June 30, 2012. Research and development expenses included \$5.7 million of stock-based compensation expense in the six months ended June 30, 2012 and \$231,000 in the six months ended June 30, 2011.

Sales and Marketing Expenses

	Six Months Ended June 30,	
	2012	2011
	(in thousands)	
Sales and marketing expenses	\$ 9,076	\$ 7,101
Percentage of revenues	20.1%	20.8%

Our sales and marketing expenses increased \$2.0 million, or 27.8%, from \$7.1 million in the six months ended June 30, 2011 to \$9.1 million in the six months ended June 30, 2012. The increase was primarily due to a \$2.0 million increase in marketing promotions associated with our freemium games. Salaries, benefits and variable compensation costs remained relatively flat despite increasing our sales and marketing headcount from 30 at June 30, 2011 to 37 at June 30, 2012, as these headcount additions were mainly in low cost locations and higher aggregate salary costs were partially offset by lower variable compensation. As a percentage of revenues, sales and marketing expenses decreased from 20.8% in the six months ended June 30, 2011 to 20.1% in the six months ended June 30, 2012. Sales and marketing expenses included \$270,000 of stock-based compensation expense in the six months ended June 30, 2012 and \$160,000 in the six months ended June 30, 2011.

General and Administrative Expenses

	Six Months Ended June 30,	
	2012	2011
	(in thousands)	
General and administrative expenses	\$ 8,922	\$ 6,440
Percentage of revenues	19.8%	18.9%

Table of Contents

Our general and administrative expenses increased \$2.5 million, or 38.5%, from \$6.4 million in the six months ended June 30, 2011 to \$8.9 million in the six months ended June 30, 2012. The increase was primarily due to a \$1.0 million change in the fair market value of contingent consideration issued to the Blammo non-employee shareholders, a \$939,000 increase in salaries, benefits and variable compensation as headcount increased from 57 at June 30, 2011 to 65 at June 30, 2012, a \$595,000 increase in professional, consulting and outside service fees associated with external legal, audit and valuation services and a \$437,000 increase in stock based compensation expense. The increase in our general and administrative expenses was partially offset by a \$736,000 decrease in allocated facility and overhead costs. As a percentage of revenues, general and administrative expenses increased from 18.9% in the six months ended June 30, 2011 to 19.8% in the six months ended June 30, 2012. General and administrative expenses included \$948,000 of stock-based compensation expense in the six months ended June 30, 2012 and \$511,000 in the six months ended June 30, 2011.

Other Operating Expenses

Our amortization of intangible assets increased from zero in the six months ended June 30, 2011 to \$990,000 in the six months ended June 30, 2012. This increase was due to amortization expense associated with non-compete agreements capitalized at their fair value as part of the purchase accounting for both the Griptonite and Blammo acquisitions. Our restructuring charge decreased from \$637,000 in the six months ended June 30, 2011 to \$320,000 in the six months ended June 30, 2012. Our restructuring charges for the six months ended June 30, 2012 were comprised of employee termination costs in our United States and China offices.

Interest and Other Income/(Expense), Net

Interest and other income/(expense), net, decreased from net income of \$509,000 during the three months ended June 30, 2011 to net expense of \$156,000 in the six months ended June 30, 2012. This increase was primarily due to foreign currency losses related to the revaluation of certain assets and liabilities including accounts payable and accounts receivable.

Income Tax Provision

Income tax provision changed from an expense of \$1.3 million in the six months ended June 30, 2011 to a tax benefit of \$1.6 million in the six months ended June 30, 2012. This change was primarily due to the release of uncertain tax positions in certain foreign jurisdictions due to the expiration of the statute of limitations, changes in the jurisdictions included in the anticipated effective tax rate computation and changes in pre-tax income in certain foreign entities.

Cash flows used in investing activities	(6,149)	(1,353)
Cash flows provided by financing activities	1,363	17,193

Since our inception, we have incurred recurring losses and negative annual cash flows from operating activities. As of June 30, 2012 we had an accumulated deficit of \$221.7 million.

Operating Activities

For the six months ended June 30, 2012, net cash used in operating activities was \$2.6 million, primarily due to a net loss of \$9.8 million, a decrease in other long-term liabilities of \$2.3 million due to the release of an uncertain tax provision upon expiration of the statute of limitations, an increase in accounts receivable of \$1.3 million due to timing of cash collections and a decrease in accounts payable of \$693,000. These amounts were partially offset by adjustments for non-cash items, including stock-based compensation expense of \$6.9 million, amortization expense of \$2.7 million, depreciation expense of \$1.1 million and change in fair value of the Blammo earn-out of \$1.0 million.

In the six months ended June 30, 2011, net cash used in operating activities was \$2.6 million, primarily due to a net loss of \$5.0 million, a decrease in accrued royalties of \$2.5 million and an increase in accounts receivable of \$1.7 million due to timing of cash collections. These amounts were partially offset by an increase in accounts payable of 1.4 million, a decrease in prepaid royalties of \$1.4 million and an increase in deferred revenues of \$969,000. In addition, we had adjustments for non-cash items, including amortization expense, of \$ 1.5 million, stock-based compensation expense of \$902,000, depreciation expense of \$833,000 and impairment of prepaid royalties of \$371,000.

Investing Activities

In the six months ended June 30, 2012, we used \$6.1 million of cash for investing activities resulting primarily from \$5.0 million used to purchase Deer Hunter trademark and brand assets during the second quarter of 2012 and a \$1.1 million increase in leasehold improvements, purchases of computer, server and networking equipment to support our freemium games and purchases of software.

In the six months ended June 30, 2011, we used \$1.4 million of cash for investing activities resulting primarily from purchases of computer, server and networking equipment to support our freemium games, purchases of software and the making of leasehold improvements.

Financing Activities

In the six months ended June 30, 2012, net cash provided by financing activities was \$1.4 million due to proceeds received from option and warrant exercises and purchases under our employee stock purchase plan.

In the six months ended June 30, 2011, net cash provided by financing activities was \$17.2 million due primarily to \$15.7 million of net proceeds received from the 2011 Public Offering and \$4.5 million of proceeds received from option exercises, warrant exercises and purchases under our employee stock purchase plan. These inflows were partially offset by \$2.3 million that we repaid under our credit facility and a payment of \$698,000 relating to taxes that had been withheld on the December 31, 2010 payment made to the former MIG shareholders with respect to promissory notes we had issued to such shareholders.

Table of Contents**Sufficiency of Current Cash and Cash Equivalents**

Our cash and cash equivalents were \$24.5 million as of June 30, 2012. Cash and cash equivalents held outside of the U.S. in various foreign subsidiaries were \$6.1 million and \$7.4 million as of June 30, 2012 and December 31, 2011, respectively. Under current tax laws and regulations, if cash and cash equivalents held outside the U.S. are distributed to the U.S. in the form of dividends or otherwise, we may be subject to additional U.S. income taxes and foreign withholding taxes. We have not provided deferred taxes on unremitted earnings attributable to foreign subsidiaries because these earnings are intended to be reinvested indefinitely. However, in 2009 and 2010 we repatriated certain distributable earnings from a subsidiary in China. No deferred tax asset was recognized since we do not believe the deferred tax asset will reverse in the foreseeable future.

We expect to fund our operations and satisfy our contractual obligations during the remainder of 2012 primarily through our cash and cash equivalents and cash flows from operations. However, as a result of the acquisitions of Griptonite, Blammo and GameSpy, as well as our plans to increase our spending on sales and marketing and research and development initiatives in connection with the release of our new freemium games, we expect to use cash in our operations during 2012 as we seek to grow our business. We believe our cash and cash equivalents and cash flows from operations will be sufficient to meet our anticipated cash needs for at least the next 12 months. However, our cash requirements for the next 12 months may be greater than we anticipate due to, among other reasons, revenues that are lower than we currently anticipate, greater than expected operating expenses, particularly with respect to our research and development and sales and marketing initiatives, usage of cash to fund our foreign operations and the impact of foreign currency rate changes, unanticipated limitations or timing restrictions on our ability to access funds that are held in our non-U.S. subsidiaries or any investments or acquisitions that we may decide to pursue.

Our \$8.0 million credit facility expired on June 30, 2011. We may seek in the future to enter into a new credit facility, but, in the event that we elect to do so, we cannot assure you that we will be able to enter into a new facility on terms favorable to us or at all.

If our cash sources are insufficient to satisfy our cash requirements, we may seek to raise additional capital by selling convertible debt, preferred stock (convertible into common stock or unconvertible) or common stock, potentially pursuant to our effective universal shelf registration statement, procuring a new credit facility and/or selling some of our assets. We may be unable to raise additional capital through the sale of securities, or to do so on terms that are favorable to us, particularly given current capital market and overall economic conditions. Any sale of convertible debt securities or additional equity securities could result in substantial dilution to our stockholders as was the case with the private placement of our common stock and warrants to purchase our common stock that we completed in August 2010 and the 2011 Public Offering. The holders of new securities may also receive rights, preferences or privileges that are senior to those of existing holders of our common stock. Additionally, we may be unable to procure a new credit facility, or to do so on terms that are acceptable to us, particularly in light of the current credit market conditions.

Contractual Obligations

The following table is a summary of our contractual obligations as of June 30, 2012:

	Total	Payments Due by Period			Thereafter
		1 Year*	1-3 Years	3-5 Years	
Operating lease obligations, net of sublease income	\$ 11,447	\$ 1,742	\$ 7,671	\$ 2,034	\$
Guaranteed royalties(1)	246	246			
Uncertain tax position obligations, including interest and penalties(2)	2,987				2,987
Blammo earn-out (3)	8,231		8,231		
Total contractual obligations	\$ 22,911	\$ 1,988	\$ 15,902	\$ 2,034	\$ 2,987

* Represents the remaining six months of 2012

(1)

Edgar Filing: GLU MOBILE INC - Form 10-Q

We have entered into license and development arrangements with various owners of brands and other intellectual property so that we can create and publish games for mobile devices based on that intellectual property. A significant portion of these agreements require us to pay guaranteed royalties over the term of the contracts regardless of actual game sales.

- (2) As of June 30, 2012, unrecognized tax benefits and potential interest and penalties were classified within Other long-term liabilities on our consolidated balance sheets. As of June 30, 2012, the settlement of our income tax liabilities cannot be determined; however, the liabilities are not expected to become due within the next 12 months.

Table of Contents

- (3) As of June 30, 2012, the contingent consideration issued to the former Blammo shareholders had a fair value of \$8.2 million. The fair value represents the present value of probability-adjusted revenues related to the Blammo earnout for fiscal 2013, fiscal 2014 and fiscal 2015. As of June 30, 2012, we had recorded \$6.6 million on our condensed consolidated balance sheets as employee shareholders of Blammo must continue to provide services during the earnout periods.

Off-Balance Sheet Arrangements

At June 30, 2012, we did not have any significant off-balance sheet arrangements requiring disclosure under Item 303(a)(4)(ii) of Regulation S-K, other than those listed in our contractual obligations table above.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information in this section should be read in connection with the information on financial market risk related to changes in interest rates and non-U.S. currency exchange rates in Part II, Item 7A, Quantitative and Qualitative Disclosures About Market Risk, in our Annual Report on Form 10-K for the year ended December 31, 2011. Our market risk profile has not changed significantly during the first six months of 2012.

Interest Rate and Credit Risk

Our exposure to interest rate risk relates primarily to our investment portfolio and the potential losses arising from changes in interest rates.

We are potentially exposed to the impact of changes in interest rates as they affect interest earned on our investment portfolio. As of June 30, 2012, we had no short-term investments and substantially all \$24.5 million of our cash and cash equivalents was held in operating bank accounts earning nominal interest. Accordingly, we do not believe that a 10% change in interest rates would have a significant impact on our interest income, operating results or liquidity related to these amounts.

The primary objectives of our investment activities are, in order of importance, to preserve principal, provide liquidity and maximize income without significantly increasing risk. We do not currently use or plan to use derivative financial instruments in our investment portfolio.

As of June 30, 2012 and December 31, 2011, our cash and cash equivalents were maintained by financial institutions in the United States, the United Kingdom, Brazil, Canada, China, France, Hong Kong, Russia and Spain and our current deposits are likely in excess of insured limits.

Our accounts receivable primarily relate to revenues earned from domestic and international platform operators, wireless carriers and other customers. We perform ongoing credit evaluations of our customers' financial condition but generally require no collateral from them. At June 30, 2012, Apple accounted for 33.7%, Tapjoy accounted for 12.7% and Medium Entertainment accounted for 12.2% of our total accounts receivable. At December 31, 2011, Apple accounted for 26.6%, Tapjoy accounted for 18.0%, Telecomunicaciones Movilnet accounted for 11.7% and Google accounted for 10.3% of our total accounts receivable. No other customer represented more than 10% of our total accounts receivable as of these dates.

Foreign Currency Exchange Risk

We transact business in more than 70 countries in more than 20 different currencies, and in 2011 and in the first six months of 2012, some of these currencies fluctuated significantly. Our revenues are usually denominated in the functional currency of the carrier or distributor while the operating expenses of our operations outside of the United States are maintained in their local currency, with the significant operating currencies consisting of British Pound Sterling (GBP), Chinese Renminbi, Brazilian Real and Russian Ruble. Although recording operating expenses in the local currency of our foreign operations mitigates some of the exposure of foreign currency fluctuations, variances among the currencies of our customers and our foreign operations relative to the United States Dollar (USD) could have and have had a material impact on our results of operations.

Our foreign currency exchange gains and losses have been generated primarily from fluctuations in GBP versus the USD and in the Euro versus GBP. At month-end, foreign currency-denominated accounts receivable and intercompany balances are marked to market

Table of Contents

and unrealized gains and losses are included in other income (expense), net. Translation adjustments arising from the use of differing exchange rates are included in accumulated other comprehensive income in stockholders' equity. We have in the past experienced, and in the future expect to experience, foreign currency exchange gains and losses on our accounts receivable and intercompany receivables and payables. Foreign currency exchange gains and losses could have a material adverse effect on our business, operating results and financial condition.

There is also additional risk if the currency is not freely or actively traded. Some currencies, such as the Chinese Renminbi, in which our Chinese operations principally transact business, are subject to limitations on conversion into other currencies, which can limit our ability to react to foreign currency devaluations.

To date, we have not engaged in exchange rate hedging activities, and we do not expect to do so in the foreseeable future.

Inflation

We do not believe that inflation has had a material effect on our business, financial condition or results of operations. If our costs were to become subject to significant inflationary pressures, we might not be able to offset these higher costs fully through price increases. Our inability or failure to do so could harm our business, operating results and financial condition.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Based upon an evaluation of the effectiveness of disclosure controls and procedures, our Chief Executive Officer (CEO) and Chief Financial Officer (CFO) have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures, as defined under Exchange Act Rule 13a-15(e) and 15d-15(e), were effective to provide reasonable assurance that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified by the SEC and is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the three months ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

We do not believe we are party to any currently pending litigation, the outcome of which will have a material adverse effect on our operations, financial position or liquidity. However, the ultimate outcome of any litigation is uncertain and, regardless of outcome, litigation can have an adverse impact on us because of defense costs, potential negative publicity, diversion of management resources and other factors.

ITEM 1A. RISK FACTORS

Our business is subject to many risks and uncertainties, which may affect our future financial performance. If any of the events or circumstances described below occurs, our business and financial performance could be harmed, our actual results could differ materially from our expectations and the market value of our stock could decline. The risks and uncertainties discussed below are not the only ones we face. There may be additional risks and uncertainties not currently known to us or that we currently do not believe are material that may harm our business and financial performance. Because of the risks and uncertainties discussed below, as well as other variables affecting our operating results, past financial performance should not be considered as a reliable indicator of future performance and investors should not use historical trends to anticipate results or trends in future periods.

We have a history of net losses, may incur substantial net losses in the future and may not achieve profitability.

We have incurred significant losses since inception, including a net loss of \$13.4 million in 2010, a net loss of \$21.1 million in 2011 and a net loss of \$9.8 million in the six months ended June 30, 2012. As of June 30, 2012, we had an accumulated deficit of \$221.7 million. We expect our costs to increase as we implement additional initiatives designed to increase revenues, such as increased research and development and sales and marketing expenses related to our new games designed for smartphones and tablets, such as Apple's iPhone and iPad and devices based on Google's Android operating system. In addition, our costs have increased significantly as a result of our acquisitions of Blammo and Griptonite due to the addition of nearly 200 employees and independent contractors, and we expect our costs to further increase in connection with our recently announced acquisition of GameSpy. If our revenues do not increase to offset these additional expenses, if we experience unexpected increases in operating expenses or if we are required to take additional charges related to impairments or restructurings, we will continue to incur significant losses and will not become profitable. In addition, our revenues declined in each of 2009 and 2010 from the preceding year, and only increased slightly in 2011 from 2010 levels. If we are not able to significantly increase our revenues, we will likely not be able to achieve profitability in the future. Furthermore, during 2010, 2011 and the first six months of 2012, we incurred aggregate charges of approximately \$4.3 million, \$1.1 million and \$320,000 for royalty impairments and restructuring activities. As of June 30, 2012, an additional \$176,000 of prepaid royalties remained on our balance sheet that are potentially subject to future impairment. If we continue to incur these charges, it will continue to negatively affect our operating results and our ability to achieve profitability.

Our financial results could vary significantly from quarter to quarter and are difficult to predict, particularly in light of the current economic environment, which in turn could cause volatility in our stock price.

Our revenues and operating results could vary significantly from quarter to quarter because of a variety of factors, many of which are outside of our control. As a result, comparing our operating results on a period-to-period basis may not be meaningful. In addition, we may not be able to accurately predict our future revenues or results of operations. We base our current and future expense levels on our internal operating plans and sales forecasts, and our operating costs are to a large extent fixed. As a result, we may not be able to reduce our costs sufficiently to compensate for an unexpected shortfall in revenues, and even a small shortfall in revenues could disproportionately and adversely affect financial results for that quarter.

We are also subject to macroeconomic fluctuations in the United States and global economies, including those that impact discretionary consumer spending, which have deteriorated significantly in many countries and regions, including the United States and Europe due to the effects of the ongoing sovereign debt crisis, and may remain depressed for the foreseeable future. Some of the factors that could influence the level of consumer spending include continuing conditions in the residential real estate and mortgage markets, labor and healthcare costs, access to credit, consumer confidence and other macroeconomic factors affecting consumer spending. If these issues persist, or if the economy enters a prolonged period of decelerating growth or recession, our results of operations may be harmed.

Table of Contents

In addition to other risk factors discussed in this section, factors that may contribute to the variability of our quarterly results include:

the number of new games released by us and our competitors;

the timing of release of new games by us and our competitors, particularly those that may represent a significant portion of revenues in a quarter, which timing can be impacted by internal development delays and how quickly digital storefront operators, such as Apple review and approve our games for commercial release;

the popularity of new games released during the quarter and the ability of games released in prior periods to sustain their popularity;

changes in the prominence of storefront featuring for our leading games and those of our competitors;

fluctuations in the size and rate of growth of overall consumer demand for smartphones, tablets, games and related content;

our success in developing and monetizing freemium games for smartphones and tablets;

our ability to increase the daily and monthly active users of our freemium games that we develop for smartphones and tablets, as well as the level of engagement of these users and the length of time these users continue to play our games;

changes in accounting rules, such as those governing recognition of revenue, including the period of time over which we recognize revenue for in-app purchases of virtual currency and goods within certain of our games;

changes in pricing policies by us, our competitors or our carriers and other distributors, including to the extent that smartphone digital storefront owners impose a platform tax on our revenues derived from offers;

the timing of successful mobile device launches;

the seasonality of our industry;

strategic decisions by us or our competitors, such as acquisitions, divestitures, spin-offs, joint ventures, strategic investments or changes in business strategy;

our ability to successfully migrate talent acquired through our Griptonite transaction to creating successful freemium titles;

fluctuations in the fair market value of the contingent consideration issued to the Blammo non-employee shareholders, as the fair value of the contingent consideration will be measured during each reporting period until the end of the earn-out period in

Edgar Filing: GLU MOBILE INC - Form 10-Q

March 2015;

the amount and timing of charges related to impairments of goodwill, intangible assets, prepaid royalties and guarantees; for example, in 2010 and 2011, we impaired \$663,000 and \$531,000, respectively, of certain prepaid royalties and royalty guarantees;

the timing of compensation expense associated with equity compensation grants; and

decisions by us to incur additional expenses, such as increases in marketing or research and development, or unanticipated increases in vendor-related costs, such as hosting fees.

Table of Contents

Our strategy to grow our business involves developing a significant number of new titles for smartphones and tablets rather than for feature phones, which historically comprised a significant majority of our revenues. If we do not succeed in generating considerable revenues and gross margins from smartphones and tablets, our revenues, financial position and operating results will suffer.

As a result of the continued migration of users from traditional feature phones to smartphones, we expect our feature phone revenues, which represented 17.4%, 47.0% and 84.7% of our revenues in the six months ended June 30, 2012 and the years ended December 31, 2011 and 2010, respectively, to continue to decrease significantly for the foreseeable future. For us to succeed in 2012 and beyond, we believe that we must increasingly publish mobile games that are widely accepted and commercially successful on the smartphone and tablet digital storefronts (such as Apple's App Store, the Google Play Store, Amazon's Appstore and Microsoft's Windows Marketplace), as well as significantly increase the number of players of our games and the average lifetime value of these players. Our efforts to continue to significantly increase our revenues derived from games for smartphones and tablets may prove unsuccessful or, even if successful, it may take us longer to achieve the revenue growth that we anticipate because, among other reasons:

the open nature of many of these digital storefronts increases substantially the number of our competitors and competitive products and makes it more difficult for us to achieve prominent placement or featuring for our games;

the billing and provisioning capabilities of some smartphones and tablets are currently not optimized to enable users to purchase games or make in-app purchases, which could make it difficult for users of these smartphones and tablets to purchase our games or make in-app purchases and could reduce our addressable market, at least in the short term;

competitors may have substantially greater resources available to invest in developing and publishing products for smartphones and tablets;

these digital storefronts are relatively new and rapidly evolving markets, for which we are less able to forecast with accuracy revenue levels, required marketing and developments expenses, and net income or loss;

we have less experience with open storefront distribution channels than with carrier-based distribution;

the pricing and revenue models for titles on these digital storefronts are rapidly evolving (for example, the introduction of in-app purchasing capabilities and the potential introduction of usage-based pricing for games), and have resulted, and may continue to result, in significantly lower average selling prices for our premium games developed for smartphones as compared to games developed for feature phones, and a lower than expected return on investment for these games;

many of our content licenses do not grant us the rights to develop games for devices utilizing Apple's iOS operating system and certain other smartphones and tablets; and

many OEMs and carriers are developing their own storefronts and it may be difficult for us to predict which ones will be successful, and we may expend time and resources developing games for storefronts that ultimately do not succeed.

Due to the expected continued decrease in our feature phone revenues, if we do not succeed in generating considerable revenues and gross margins from smartphones and tablets, our operating results will suffer.

We have focused our development efforts for smartphones and tablets on creating freemium games rather than premium games, and if our freemium strategy is unsuccessful, it will seriously harm our business.

Edgar Filing: GLU MOBILE INC - Form 10-Q

We expect that substantially all of our development activities for smartphones and tablets in the remainder of 2012 and beyond will be focused on freemium games—games that are downloadable without an initial charge, but which enable a variety of additional content and features to be accessed for a fee or otherwise monetized through various advertising and offer techniques. Our efforts to develop freemium games for smartphones and tablets may prove unsuccessful or, even if successful, may take us longer to achieve significant revenue than anticipated because, among other reasons:

we have relatively limited experience in successfully developing and marketing freemium games, having launched our first freemium titles in the fourth quarter of 2010;

Table of Contents

our relatively limited experience with respect to creating games that include micro-transaction capabilities, advertising and offers may cause us to have difficulty optimizing the monetization of our freemium games;

changes in Apple's policies that have limited our ability to use certain types of virtual currency-incented advertising offers and other monetization techniques in our games;

changes in Apple's policies with regard to the ability of applications to access a user's unique device identifier (UDID), which could negatively impact the smartphone revenues that we derive from advertisements, at least in the short term;

some of our competitors have released a significant number of freemium games on smartphones and tablets, and the number of freemium games available on the smartphone and tablet digital storefronts has been steadily increasing, and this competition will make it more difficult for us to differentiate our games and derive significant revenues from them;

we intend to continue to develop the significant majority of our freemium games based upon our own intellectual property rather than well-known licensed brands, and, as a result, we may encounter difficulties in generating sufficient consumer interest in our games, particularly since prior to 2011, we had relatively limited success in generating significant revenues from games based on our own intellectual property;

freemium games have a limited history and it is unclear how popular this style of game will become or remain or its revenue potential;

our strategy with respect to developing freemium games assumes that a large number of consumers will download our games because they are free and that we will subsequently be able to effectively monetize these games via in-app purchases, offers and advertisements; however, some carriers charge users a fee for downloading content to their smartphones, and users of these smartphones may be reluctant to download our freemium games because of these fees, which would reduce the effectiveness of our product strategy;

our freemium games may otherwise not be widely downloaded by consumers for a variety of reasons, including poor consumer reviews or other negative publicity, ineffective or insufficient marketing efforts, lack of sufficient social features that encourage users to invite their friends to play our games with them, a failure to achieve prominent storefront featuring for such games or the inconvenience associated with downloading our thick-client games—our thick-client games often utilize a significant amount of the available memory on a user's device, and due to the inherent limitations of the smartphone platforms and telecommunications networks, which only allow applications that are less than 50 megabytes to be downloaded over a carrier's wireless network, players must download one of our thick-client games either via a wireless Internet (wifi) connection or initially to their computer and then side-loaded to their device.

even if our freemium games are widely downloaded, we may fail to retain users of these games or optimize the monetization of these games for a variety of reasons, including poor game design or quality, lack of social features, gameplay issues such as game unavailability, long load times or an unexpected termination of the game due to data server or other technical issues, or our failure to effectively respond and adapt to changing user preferences through updates to our games;

we have encountered difficulties in keeping users engaged in our freemium games for a significant amount of time subsequent to their initial download of the games, in part due to the relative lack of social features in our games compared to those of some of our competitors, and we may have difficulty increasing consumer retention in our games;

Edgar Filing: GLU MOBILE INC - Form 10-Q

the Federal Trade Commission has indicated that it intends to review issues related to in-app purchases, particularly with respect to games that are marketed primarily to minors (a class action lawsuit has been filed relating to this issue; we have not been named as a party to this lawsuit) and the Federal Trade Commission might issue rules significantly restricting or even prohibiting in-app purchases or we could potentially be named as a defendant in a future class action lawsuit; and

because these are effectively new products for us, we are less able to forecast with accuracy revenue levels, required marketing and development expenses, and net income or loss.

Table of Contents

If we do not achieve a sufficient return on our investment with respect to developing and selling freemium games, it will negatively affect our operating results and may require us to formulate a new business strategy.

We derive the significant majority of our smartphone revenues from Apple's iOS and Google's Android platforms, and if we are unable to maintain a good relationship with each of Apple and Google or if the Apple App Store or the Google Play Store were unavailable for any prolonged period of time, our business will suffer.

The significant majority of our smartphone revenues are derived from Apple's iOS and Google's Android platforms, which accounted for 34% and 11%, respectively, of our total revenues in 2011 and 55% and 22%, respectively, of our total revenues in the six months ended June 30, 2012. We believe that we have maintained a good relationship with both Apple and Google, which has contributed to the majority of our games receiving featuring on their storefronts when they are commercially released. Accordingly, any deterioration in our relationship with either Apple or Google would materially harm our business and likely cause our stock price to decline.

We are subject to each of Apple's and Google's standard terms and conditions for application developers, which govern the promotion, distribution and operation of games and other applications on their respective storefronts. Each of Apple and Google has broad discretion to change its standard terms and conditions. In addition, these standard terms and conditions can be vague and subject to changing interpretations by Apple or Google. For example, in the second quarter of 2011, Apple began prohibiting certain types of virtual currency-incented advertising offers in games sold on the Apple App Store. These offers accounted for approximately one-third of our smartphone revenues during the six months ended June 30, 2011, and our inability to subsequently utilize such offers negatively impacted our smartphone revenues thereafter. In addition, Apple has begun rejecting applications that access a user's UDID, and this change in policy could negatively impact the smartphone revenues that we derive from advertisements, at least in the short term. Any similar changes in the future that impact our freemium revenues could materially harm our business, and we may not receive any advance warning of such change. In addition, each of Apple and Google have the right to prohibit a developer from distributing its applications on its storefront if the developer violates its standard terms and conditions. In the event that either Apple or Google ever determines that we are in violation of its standard terms and conditions, including by a new interpretation, and prohibits us from distributing our games on its storefront, it would materially harm our business and likely cause our stock price to significantly decline.

We also rely on the continued function of the Apple App Store and the Google Play Store, as the majority of our smartphone revenues are derived from these two digital storefronts. There have been occasions in the past when these digital storefronts were unavailable for short periods of time or where there have been issues with the in-app purchasing functionality within the storefront. In the event that either the Apple App Store or the Google Play Store is unavailable or if in-app purchasing functionality within the storefront is non-operational for a prolonged period of time, it would have a material adverse effect on our revenues and operating results.

We have a relatively new business model with a short operating history and rely on a small portion of our total players for nearly all of our smartphone revenue that we derive from in-app purchases.

In early 2010, we revised our business model to focus on becoming a leading publisher of mobile freemium games. Our freemium games are provided as a live service and are generally designed to be persistent experiences maintained through content updates, which requires continuous investment by us. We have a short history operating in this business model, which limits the experience upon which we can draw when making operating decisions, and we may be less successful executing our new business than we anticipate.

The fact that our freemium games can be downloaded and played for free has contributed to our success in generating large numbers of installs and significantly growing our user base. However, only a very small portion of our daily and monthly active users ever purchase virtual currency or goods in our games. In order to significantly increase our smartphone revenues, we must increase the number of users of our games and keep them playing our games for a longer period of time so that we can more effectively monetize these users. To attract and retain players, we must devote significant resources so that the games they play retain their interest and attract them to our other games. We have to date encountered difficulties in keeping users engaged in our freemium games for a significant amount of time subsequent to their initial download of the games, and we might not succeed in our efforts to increase the average lifetimes of our users, particularly if we are unable to increase the number of social features in our games. If we fail to grow our daily and monthly active users, if the rates at which we attract and retain players does not increase or if the average amount our users pay declines, our business may not grow, our financial results will suffer, and our stock price may decline.

Table of Contents

Acquisitions could result in operating difficulties, dilution and other harmful consequences.

In August 2011, we completed the acquisitions of Griptonite and Blammo, in April 2012, we acquired from Atari, Inc. the Deer Hunter trademark and associated domain names and entered into an exclusive, irrevocable, worldwide, long-term license with Atari with respect to the other intellectual property assets associated with the Deer Hunter brand, and in August 2012, we completed the acquisition of GameSpy. We expect to continue to evaluate and consider a wide array of potential strategic transactions, including business combinations and acquisitions of studio teams, technologies, services, products and other assets. At any given time, we may be engaged in discussions or negotiations with respect to one or more of these types of transactions. Any of these transactions could be material to our financial condition and results of operations. The process of integrating any acquired business, including Griptonite, Blammo and GameSpy, may create unforeseen operating difficulties and expenditures and is itself risky. The areas where we may face difficulties include:

diversion of management time and a shift of focus from operating the businesses to issues related to integration and administration;

declining employee morale and retention issues resulting from changes in compensation, management, reporting relationships, future prospects or the direction of the business;

the need to integrate each acquired company's accounting, management, information, human resource and other administrative systems to permit effective management, and the lack of control if such integration is delayed or not implemented;

the need to implement controls, procedures and policies appropriate for a larger public company that the acquired companies lacked prior to acquisition;

in the case of foreign acquisitions, the need to integrate operations across different cultures and languages and to address the particular economic, currency, political and regulatory risks associated with specific countries; and

liability for activities of the acquired companies before the acquisition, including violations of laws, rules and regulations, commercial disputes, tax liabilities and other known and unknown liabilities.

If the anticipated benefits of any future acquisitions do not materialize, we experience difficulties integrating businesses acquired in the future, or other unanticipated problems arise, our business, operating results and financial condition may be harmed.

The operation of the GameSpy business will pose a number of challenges for us. For example, we do not have a direct contract with the data center in which the GameSpy equipment is located, but instead will receive the services that we will require to support many of our future game launches and service GameSpy's existing customers pursuant to a transition services agreement with IGN Entertainment, Inc., GameSpy's former parent corporation. Accordingly, to the extent that IGN does not provide us with transitional data center services in a timely, reliable and otherwise professional manner, it could (1) adversely impact many of the games we expect to launch in the second half of 2012 and beyond, which would negatively impact our revenues, and (2) place us in breach with respect to GameSpy's existing customer contracts. In addition, this transition services agreement has a term of no more than two years and is subject to early termination under certain circumstances, including in the event that IGN is no longer affiliated with its parent corporation, News Corp. Once the transition services agreement terminates, we will need to procure our own data center agreement, which may require us to move the GameSpy equipment to another facility, potentially on short notice. Such a transition could result in disruption to some of our games, which would likely negatively impact our revenues and reputation. Furthermore, we may encounter difficulties in fulfilling our obligations under the existing GameSpy contracts, as we have no experience in operating this type of services business.

The integration of Griptonite has been, and may continue to prove to be, particularly challenging due to its size, as Griptonite has nearly 200 employees and independent contractors compared with approximately 400 employees at Glu prior to the Blammo and Griptonite acquisitions, as well as the fact that Griptonite had historically built premium games on a work-for-hire basis for non-smartphone platforms such as Microsoft's Xbox 360, Nintendo's Wii, Nintendo's DS and Sony's PSP. We have invested, and will continue to invest, considerable management time and

Edgar Filing: GLU MOBILE INC - Form 10-Q

resources in order to educate the Griptonite studio personnel with respect to the development of freemium games for smartphone platforms, and cannot yet be sure that these efforts will prove successful since we have to date commercially released only four freemium games that were developed by the Griptonite studio and have encountered significant development delays with respect to some Griptonite titles. If we are not successful in these efforts, it will adversely impact our operating results given the significant increase in our operating expenses that have resulted from such acquisition.

Table of Contents

In addition, a significant portion of the purchase price of companies we acquire may be allocated to acquired goodwill and other intangible assets, which must be assessed for impairment at least annually. In the future, if our acquisitions, including the Griptonite, Blammo, Deer Hunter brand and GameSpy acquisitions, do not yield expected returns, we may be required to take charges to our earnings based on this impairment assessment process, which could harm our operating results. For example, during 2008 we incurred an aggregate goodwill impairment charge related to write-downs in the third and fourth quarters of 2008 of \$69.5 million as the fair values of our three reporting units were determined to be below their carrying values.

Moreover, the terms of acquisitions may require that we make future cash or stock payments to shareholders of the acquired company, which may strain our cash resources or cause substantial dilution to our existing stockholders at the time the payments are required to be made. For example, our Blammo acquisition agreement provides that the former Blammo shareholders may earn up to 3,312,937 shares of our common stock if Blammo achieves certain net revenue targets during the years ending March 31, 2013, March 31, 2014 and March 31, 2015. In addition, our merger agreement with Griptonite provides that we may be required to issue up to 5,301,919 additional shares or in specified circumstances pay additional cash (i) in satisfaction of indemnification obligations in the case of, among other things, breaches of our representations, warranties and covenants in the merger agreement or (ii) pursuant to potential working capital adjustments.

The markets in which we operate are highly competitive, and many of our competitors have significantly greater resources than we do.

The development, distribution and sale of mobile games is a highly competitive business, characterized by frequent product introductions and rapidly emerging new platforms, technologies and storefronts. For end users, we compete primarily on the basis of game quality, brand, customer reviews and, with respect to our premium products, price. We compete for promotional and storefront or deck placement based on these factors, as well as the relationship with the digital storefront owner or wireless carrier, historical performance, perception of sales potential and relationships with licensors of brands and other intellectual property. For content and brand licensors, we compete based on royalty and other economic terms, perceptions of development quality, porting abilities, speed of execution, distribution breadth and relationships with storefront owners or carriers. We also compete for experienced and talented employees.

With respect to our freemium games that we publish for smartphones and tablets, we compete with a continually increasing number of companies, including Zynga, DeNA, Gree, Tencent and many well-funded private companies. We also compete for consumer spending with large companies, such as Activision, Electronic Arts (EA Mobile), Gameloft and Take-Two Interactive, whose games for smartphones and tablets are primarily premium rather than freemium; Electronic Arts and Gameloft have historically been our two primary feature phone competitors with regard to feature phone gaming. In addition, given the open nature of the development and distribution for smartphones and tablets, we also compete or will compete with a vast number of small companies and individuals who are able to create and launch games and other content for these mobile devices utilizing relatively limited resources and with relatively limited start-up time or expertise. As an example of the competition that we face, it has been estimated that more than 120,000 active games were available on Apple's App Store as of July 31, 2012. The proliferation of titles in these open developer channels makes it difficult for us to differentiate ourselves from other developers and to compete for end users without substantially increasing spending to market our products or increasing our development costs.

Some of our competitors' and our potential competitors' advantages over us, either globally or in particular geographic markets, include the following:

significantly greater revenues and financial resources;

stronger brand and consumer recognition regionally or worldwide;

greater experience with the freemium games business model;

greater experience in integrating social features into their games and increasing the lifetime value of their users;

the capacity to leverage their marketing expenditures across a broader portfolio of mobile and non-mobile products;

Table of Contents

larger installed customer bases from related platforms such as console gaming or social networking websites to which they can market and sell mobile games;

more substantial intellectual property of their own from which they can develop games without having to pay royalties;

lower labor and development costs and better overall economies of scale;

greater resources to make acquisitions;

greater platform-specific focus, experience and expertise; and

broader global distribution and presence.

If we are unable to compete effectively or we are not as successful as our competitors in our target markets, our sales could decline, our margins could decline and we could lose market share, any of which would materially harm our business, operating results and financial condition.

Consumer tastes are continually changing and are often unpredictable, and we compete for consumer discretionary spending against other forms of entertainment; if we fail to develop and publish new mobile games that achieve market acceptance, our sales would suffer.

Our business depends on developing and publishing mobile games that consumers will want to download and spend time and money playing. We must continue to invest significant resources in research and development, analytics and marketing to introduce new games and continue to update our successful freemium games, and we often must make decisions about these matters well in advance of product release to timely implement them. Our success depends, in part, on unpredictable and volatile factors beyond our control, including consumer preferences, competing games, new mobile platforms and the availability of other entertainment activities. If our games and related applications do not meet consumer expectations, or they are not brought to market in a timely and effective manner, our business, operating results and financial condition would be harmed. For example, although we have enjoyed success with respect to a number of our action/adventure freemium games, such as *Big Time Gangsta*, *Blood & Glory*, *Contract Killer*, *Contract Killer: Zombies*, *Deer Hunter Reloaded*, *Eternity Warriors*, *Frontline Commando*, *Gun Bros and Samurai vs. Zombies Defense*, we have had more limited success with respect to our casual titles, with only *Bug Village*, *Small Street* and *Stardom: The A-List* generating significant revenues. If we fail to develop casual titles that achieve broad market acceptance, particularly given the fact that the market size for freemium casual games is currently larger than that for freemium action/adventure games, it could limit our potential revenue growth and harm our operating results. Even if our games are successfully introduced and initially adopted, a failure to continue to update them with compelling content or a subsequent shift in the entertainment preferences of consumers could cause a decline in our games' popularity that could materially reduce our revenues and harm our business, operating results and financial condition. Furthermore, we compete for the discretionary spending of consumers, who face a vast array of entertainment choices, including games played on personal computers and consoles, television, movies, sports and the Internet. If we are unable to sustain sufficient interest in our games compared to other forms of entertainment, our business and financial results would be seriously harmed.

If we are unsuccessful in establishing and increasing awareness of our brand and recognition of our games or if we incur excessive expenses promoting and maintaining our brand or our games, our potential revenues could be limited, our costs could increase and our operating results and financial condition could be harmed.

We believe that establishing and maintaining our brand is critical to establishing a direct relationship with end users who purchase our products from direct-to-consumer channels, such as Apple's App Store and the Google Play Store, and maintaining our existing relationships with wireless carriers, distributors and content licensors, as well as potentially developing new such relationships. Increasing awareness of our brand and recognition of our games is particularly important in connection with our strategic focus of developing freemium games based on our own intellectual property. Our ability to promote the Glu brand depends on our success in providing high-quality games. Similarly, recognition of our games by end users depends on our ability to develop engaging games of high quality with attractive titles. However, our success also depends, in part, on the services and efforts of third parties, over which we have little or no control. For instance, if digital storefront owners or wireless carriers fail to provide high levels of service, our end users' ability to access our games may be interrupted or end users may not receive the virtual currency or goods for which they have paid, which may adversely affect our brand. If end users, digital storefront owners, branded content owners and wireless carriers do not perceive our existing games as high-quality or if we introduce new games that are not favorably

received by

Table of Contents

our end users, digital storefront owners and wireless carriers, then we may not succeed in building brand recognition and brand loyalty in the marketplace. In addition, globalizing and extending our brand and recognition of our games will be costly and will involve extensive management time to execute successfully, particularly as we expand our efforts to increase awareness of our brand and games among international consumers. Moreover, if a game is introduced with defects, errors or failures or unauthorized objectionable content or if a game has playability issues such as game unavailability, long load times or a unexpected termination of the game due to data server or other technical issues, we could experience damage to our reputation and brand, and our attractiveness to digital storefront owners, wireless carriers, licensors, and end users might be reduced. These issues could be exacerbated if our customer service department does not timely and adequately address issues that our users have encountered with our games. In addition, although we have significantly increased our sales and marketing-related expenditures in connection with the launch of our freemium games, these efforts may not succeed in increasing awareness of our brand and new games. If we fail to increase and maintain brand awareness and consumer recognition of our games, our potential revenues could be limited, our costs could increase and our business, operating results and financial condition could suffer.

Inferior storefront featuring or deck placement would likely adversely impact our revenues and thus our operating results and financial condition.

The open nature of the digital storefronts, such as Apple's App Store and the Google Play Store, substantially increases the number of our competitors and competitive products, which makes it more difficult for us to achieve prominent placement or featuring for our games. In addition, neither Apple nor Google will generally feature more than one of our games simultaneously, which could result in our inability to get optimal featuring when we launch multiple games during a limited period, which we expect to occur in the second half of 2012 when we expect to launch 18 titles during the last five months of the year. Our failure to achieve prominent placement or featuring for our games on the digital storefronts could make it more difficult for users to discover our games and, as a result, cause our games to not generate significant revenues. It may also require us to expend significantly increased amounts on marketing campaigns in order to generate substantial revenues on these platforms, reducing or eliminating the profitability of publishing games for them. We believe that a number of factors may influence the featuring or placement of a game in these digital storefronts, including:

the perceived attractiveness of the title or brand;

the past critical or commercial success of the game or of other games previously introduced by a publisher;

the publisher's relationship with the applicable digital storefront owner and future pipeline of quality titles for it;

the game's inclusion of new features and functionality that highlight the capabilities of new smartphones and tablets; and

the current market share of the publisher.

Conversely, wireless carriers provide a limited selection of games that are accessible to their subscribers through a deck on their mobile handsets. The inherent limitation on the number of games available on the deck is a function of the limited screen size of handsets and carriers' perceptions of the depth of menus and numbers of choices end users will generally utilize. Carriers typically provide one or more top-level menus highlighting games that are recent top sellers, that the carrier believes will become top sellers or that the carrier otherwise chooses to feature, in addition to a link to a menu of additional games sorted by genre. We believe that deck placement on the top-level or featured menu or toward the top of genre-specific or other menus, rather than lower down or in sub-menus, is likely to result in higher game sales. If carriers choose to give our games less favorable deck placement, our games may be less successful than we anticipate and our feature phone revenues will decline more steeply than we anticipate.

We have depended on a small number of games for a significant portion of our revenues in recent fiscal periods. If these games do not continue to succeed or we do not release highly successful new games, our revenues would decline.

In our industry, new games are frequently introduced, but a relatively small number of games account for a significant portion of industry sales. Similarly, a significant portion of our revenues comes from a limited number of mobile games, although the games in that group have shifted over time. For example, in 2011 and 2010, we generated approximately 49.5% and 41.6% of our revenues, respectively, from our top ten games.

Edgar Filing: GLU MOBILE INC - Form 10-Q

However, other than *Gun Bros*, which generated 11.1% of our total revenues in 2011, no individual game represented more than 10% of our revenues in either of those years. Our growth depends on our ability to consistently launch new freemium games that generate significant revenues. In addition, we seek to extend the lives of our successful

Table of Contents

freemium games through regular content updates. The development and launch of our new freemium games and regular content updates require the investment of significant time and resources with no guarantee that they will result in significant revenues. If our new freemium games are not successful or if we are not able to cost-effectively extend the lives of our successful freemium games, our revenues could be limited and our business and operating results would suffer in both the year of release and thereafter.

If we fail to maintain and enhance our capabilities for porting games to a broad array of mobile devices, particularly those utilizing the Android operating system, our smartphone revenues and financial results could suffer.

The majority of our smartphone revenues are derived from the sale of games for smartphones and tablets that utilize Apple's iOS or Google's Android operating systems. Unlike the Apple ecosystem in which Apple controls both the device (iPhone, iPod Touch and iPad) and the storefront (Apple's App Store), there is a high-degree of fragmentation with respect to Android, as a large number of OEMs manufacture and sell Android-based devices with a variety of versions of the Android operating system, and there are many Android-based storefronts in addition to the Google Play Store. In order for us to sell our games to as wide as possible an audience of Android users, we must port, or convert into separate versions, our games to a significant percentage of the numerous Android-based devices that are commercially available, many of which have different technological requirements. These include devices with various combinations of underlying technologies, Android operating system version, user interfaces, keypad layouts, screen resolutions, sound capabilities and other OEM-specific customizations. Since the number of Android-based smartphones and tablets shipped worldwide is growing significantly, it is important that we maintain and enhance our porting capabilities, which could require us to invest considerable resources in this area. These additional costs could harm our business, operating results and financial condition. In addition, we must continue to increase the efficiency of our porting processes or it may take us longer to port games to an equivalent number of devices, which would negatively impact our margins. If we fail to maintain or enhance our porting capabilities, our smartphone revenues and financial results could suffer.

We utilize a game development engine licensed from Unity Technologies to create many of our freemium games. If we experience any prolonged issues with regard to the operation of this engine or if we lose access to this engine for any reason, it could delay our game development efforts and cause us to not meet revenue expectations for a quarterly or annual period, which would likely cause our stock price to decline.

We utilize a game development engine licensed from Unity Technologies to create many of our freemium games, including our 3-D games, and expect to continue to utilize this engine for the foreseeable future. Because we do not own this game development engine, we do not control its operation or maintenance. As a result, if we were to experience any issues with regard to the operation of this engine, these issues might not be resolved as quickly as if it were an internally developed engine, despite the fact that we have contractual service level commitments from Unity. In addition, although Unity does not have the right to terminate our agreement absent an uncured material breach of the agreement by Glu, we could lose access to this engine under certain circumstances such as a natural disaster that impacts Unity or a bankruptcy event. If we experience any prolonged issues with regard to the operation of the Unity game development engine or if we lose access to this engine for any reason, it could delay our game development efforts and cause us to not meet revenue expectations for a quarterly or annual period, which would likely cause our stock price to decline. Furthermore, in the event that Unity were to be acquired by one of our competitors, it would be less likely that our agreement would be renewed, which could impact our game development efforts in the future, particularly with respect to the development of sequels to games that were developed on the Unity engine.

We derive a significant portion of our smartphone revenues from advertisements and offers that are incorporated into our games through relationships with third parties. If we lose the ability to provide these advertisements and offers for any reason, or if any events occur that negatively impact the revenues we receive from these sources, it would negatively impact our operating results.

We derive revenues from our freemium games through in-app purchases, advertisements and offers. We incorporate advertisements and offers into our games by implementing third parties' software development kits. We rely on these third parties to provide us with sufficient inventory of advertisements and offers to meet the demand of our large and growing daily and monthly active user base. If we exhaust the available inventory of these third parties, it will negatively impact our smartphone revenues. In addition, a large amount of consolidation has occurred, and will likely continue to occur, in the mobile gaming space, including with respect to companies that provide advertisements and offers. If our relationship with any of the companies that we work with (including Tapjoy, which accounted for 13% and 12% of our total revenues in 2011 and the six months ended June 30, 2012, respectively) terminates for any reason, including due to acquisition, or if the commercial terms of our relationships do not continue to be renewed on favorable terms, we would need to locate and implement other third party solutions, which would negatively impact our revenues, at least in the short term. Furthermore, the revenue we derive from advertisements and offers is subject to seasonality, as companies' advertising budgets are generally highest during the fourth quarter and decline significantly in the first quarter of the following year, which negatively impacts our revenues in the quarter.

Table of Contents

The actions of the operators of the platforms on which we distribute our games can also negatively impact the revenues that we generate from advertisements and offers. For example, in the second quarter of 2011, Apple began prohibiting certain types of virtual currency-incented advertising offers in games sold on the Apple App Store. These offers accounted for approximately one-third of our smartphone revenues during the three months ended June 30, 2011, and our inability to subsequently utilize such offers negatively impacted our smartphone revenues thereafter. In addition, Apple has begun rejecting applications that access a user's UDID, and this change in policy could negatively impact the smartphone revenues that we derive from advertisements, at least in the short term. Any similar changes in the future that impact our revenues that we generate from advertisements and offers could materially harm our business, and we may not receive any advance warning of such change.

If sales of feature phones in our carrier-based business or the average selling prices of our games sold through wireless carriers decline more rapidly than we currently expect, it could have a material adverse impact on our revenues, financial position and results of operations.

We currently derive a significant portion of our revenues from sales of our games on feature phones through wireless carriers. However, our feature phone revenues declined from \$54.5 million in 2010 to \$31.1 million in 2011 and from \$18.7 million for the six months ended June 30, 2011 to \$7.9 million for the six months ended June 30, 2012, which was primarily due to the continuing migration of consumers from feature phones to smartphones. We believe that the decline in the sales of feature phones and the transition of consumers to smartphones will continue during the remainder of 2012 and beyond. In addition, due to the continuing decline in the sales of feature phones, we intend to distribute significantly fewer games for feature phones in future periods, which will further reduce our revenues that we derive from feature phones. However, if our feature phone revenues decline more rapidly than we currently anticipate, it would negatively impact our overall revenues and cash flows from operations, which could in turn negatively impact our ability to invest resources in developing and marketing our freemium games for smartphone platforms. In addition, games sold on smartphones typically have lower average prices than our games sold on feature phones, and as consumers continue to migrate to smartphones, it could result in lower average prices for our games sold on feature phones. Any unexpected acceleration in the slowdown in revenues generated from feature phones, or any reduction in the average prices of our games sold through our wireless carriers, could have a material adverse impact on our revenues, financial position and results of operations.

Changes in foreign exchange rates and limitations on the convertibility of foreign currencies could adversely affect our business and operating results.

We currently transact business in more than 70 countries in more than 20 different currencies, with Pounds Sterling and Euros being the primary international currencies in which we transact business. Conducting business in currencies other than U.S. Dollars subjects us to fluctuations in currency exchange rates that could have a negative impact on our reported operating results. We experienced significant fluctuations in currency exchange rates in 2010, 2011 and the first six months of 2012, and expect to experience continued significant fluctuations in the future. These issues may continue to negatively impact the economy and our growth. To date, we have not engaged in exchange rate hedging activities, and we do not expect to do so in the foreseeable future. Even if we were to implement hedging strategies to mitigate this risk, these strategies might not eliminate our exposure to foreign exchange rate fluctuations and would involve costs and risks of their own, such as cash expenditures, ongoing management time and expertise, external costs to implement the strategies and potential accounting implications.

We face additional risk if a currency is not freely or actively traded. Some currencies, such as the Chinese Renminbi in which our Chinese operations principally transact business, are subject to limitations on conversion into other currencies, which can limit our ability to react to rapid foreign currency devaluations and to repatriate funds to the United States should we require additional working capital.

We might elect not, or may be unable, to renew our existing brand and content licenses when they expire and might not choose to obtain additional licenses, which would negatively impact our feature phone revenues and might negatively impact our smartphone revenues to the extent that we do not create successful games based on our own intellectual property.

Revenues derived from mobile games and other applications based on or incorporating brands or other intellectual property licensed from third parties accounted for 50.7% and 78.1% of our revenues in 2011 and 2010, respectively. In 2011, revenues derived under various licenses from our five largest licensors, Activision, Atari, Caesar's, Fremantle Media and 2waytraffic, together

Table of Contents

accounted for approximately 30.9% of our revenues. Creating games based on well-known, licensed brands has historically been critical to the success of our feature phone business, as this helped us achieve more prominent placement on our wireless carriers' decks and contributed to greater commercial success with feature phone consumers. In addition, the majority of our premium games that we initially released for smartphones were based on licensed brands. However, we have shifted our business strategy towards becoming the leading publisher of mobile freemium games, and we intend to continue to have the substantial majority of these freemium games be based upon our own intellectual property. As a result, we have allocated a significantly smaller amount of our operating budget to licensing deals and might elect not to renew our existing brand and content licenses when they expire. In addition, we intend to only selectively enter into new licensing arrangements in future periods. Our existing licenses expire at various times during the next several years, and our revenues will be negatively impacted to the extent that we lose the right to distribute games based on licensed content. For example, our right to publish our *World Series of Poker* game for smartphones and tablets expired on March 31, 2012. The expected decline in the revenues we derive from games based on licensed brands could have an unexpectedly greater impact on our overall revenues and operating results to the extent that we are not successful in significantly increasing our revenues from games developed for smartphones and tablets based on our own intellectual property.

We rely on a combination of our own servers and third party infrastructure to operate our freemium games. If we experience any system or network failures, cyber attacks or any other interruption to our freemium games delivered as a live service, it could reduce our sales, increase costs or result in a loss of revenues or end users of our games.

We rely on digital storefronts, wireless carriers and other third-party networks to deliver games to our customers and on their or other third parties' billing systems to track and account for the downloading of our games. We also rely on our own servers and third-party infrastructure to operate our freemium games that are delivered as a live service, to maintain and provide our analytics data and to deliver games on demand to end users through our carriers' networks. In particular, a significant portion of our freemium game traffic is hosted by Amazon Web Services, which service provides server redundancy and uses multiple locations on various distinct power grids; Amazon experienced a power outage during the second quarter of 2012 which affected our games for approximately one day. In addition, we intend to utilize GameSpy's services and equipment, which is housed in a data center in Las Vegas, for many of our freemium games that we intend to release in the second half of 2012 and beyond, which is subject to a transitional data center services agreement between us and IGN, GameSpy's former parent corporation. Any technical problem with, cyber attack on, or loss of access to these third parties' or our systems, servers or other technologies could result in the inability of end users to download or play our games, prevent the completion of billing for a game or result in the loss of users' virtual currency or other in-app purchases or our analytics data, interfere with access to some aspects of our games or result in the theft of end-user personal information. For example, some users of our Android-based games have experienced issues receiving the virtual currency that they purchased and paid for. In addition, in connection with the release of our *Gun Bros* game on Apple's App Store in the fourth quarter of 2010, we experienced issues with our data servers that resulted in gameplay issues and the loss of some users' virtual assets they acquired through in-app purchases. If virtual assets are lost, or if users do not receive their purchased virtual currency, we may be required to issue refunds, we may receive negative publicity and game ratings, we may lose users of our games, and we may become subject to regulatory investigation or class action litigation, any of which would negatively affect our business. Furthermore, during the fourth quarter of 2010 and first half of 2011, we lost some of our analytics data, including data with respect to our daily and monthly average users. Any of these problems could harm our reputation or cause us to lose end users or revenues or incur substantial repair costs and distract management from operating our business.

Third parties have developed some of our freemium games, and to the extent that they do not timely deliver high-quality games that meet our and consumer expectations, our business will suffer.

In the first quarter of 2011, we initiated our Glu Partners program, which provided for the external development of some of our games; five of the freemium games that we released during 2011 and the first quarter of 2012 were produced by third parties with which we had a strategic relationship. Prior to 2011, we had previously created and developed all of our games in our internal studios, and we had no prior experience in outsourcing and managing the production of our game concepts by external developers. This inexperience combined with the fact that we had no direct supervision and reduced control over the external development process resulted in games that took longer to develop, were of lesser quality and were more costly to develop than comparable games produced by our internal studios. We may continue to selectively utilize third party developers in the future, and we may face the same challenges that we faced in 2011, or new and unforeseen challenges, as part of these efforts.

We pay our external developers significant development fees, and to the extent that the games developed by external studios are not commercially successful, we may not generate sufficient revenues to recoup our development costs or produce a sufficient return on investment, which would adversely affect our operating results. We also may be required to pay these external developers significant termination fees in the event that we cancel a project prior to its completion. In addition, we may lose the services of one

Table of Contents

of our external developers for a number of reasons, including that a competitor acquires its business or signs the developer to an exclusive development arrangement. In addition, the developer might encounter financial or other difficulties that cause it to go out of business, potentially prior to completing production of our games, or otherwise render it unable to fulfill its obligations under the development agreement, and we may be unable to recoup our upfront payment to the developer under such circumstances. There is also significant demand for the services of external developers which may cause our developers to work for a competitor in the future or to renegotiate agreements with us on terms less favorable for us.

We face added business, political, regulatory, operational, financial and economic risks as a result of our international operations and distribution, any of which could increase our costs and adversely affect our operating results.

International sales represented approximately 50.1% and 55.1% of our revenues in 2011 and 2010, respectively. To target international markets, we develop games that are localized and customized for consumers in those markets. We have international offices located in a number of foreign countries including Brazil, Canada, China, England and Russia. We expect to maintain our international presence, and we expect international sales will continue to be an important component of our revenues. Risks affecting our international operations include:

challenges caused by distance, language and cultural differences;

multiple and conflicting laws and regulations, including complications due to unexpected changes in these laws and regulations;

our ability to develop, customize and localize games that appeal to the tastes and preferences of consumers in international markets;

competition from local game developers that have significant market share in certain foreign markets and a better understanding of local consumer preferences;

foreign currency exchange rate fluctuations;

difficulties in staffing and managing international operations, as well as issues related to having a labor union in our Sao Paulo studio;

potential violations of the Foreign Corrupt Practices Act or U.K.'s Bribery Act, particularly in certain emerging countries in East Asia, Eastern Europe and Latin America;

greater fluctuations in sales through storefronts and carriers in developing countries, including longer payment cycles and greater difficulty collecting accounts receivable;

protectionist laws and business practices that favor local businesses in some countries;

regulations that could potentially affect the content of our products and their distribution, particularly in China;

potential adverse foreign tax consequences, since due to our international operations, we must pay income tax in numerous foreign jurisdictions with complex and evolving tax laws;

foreign exchange controls that might prevent us from repatriating income earned in countries outside the United States, particularly China;

price controls;

the servicing of regions by many different carriers;

imposition of public sector controls;

Table of Contents

political, economic and social instability;

restrictions on the export or import of technology;

trade and tariff restrictions and variations in tariffs, quotas, taxes and other market barriers; and

difficulties in enforcing intellectual property rights in certain countries.

These risks could harm our international operations, which, in turn, could materially and adversely affect our business, operating results and financial condition.

If we fail to deliver our games at the same time as new mobile devices are commercially introduced, our sales may suffer.

Our business depends, in part, on the commercial introduction of new mobile devices with enhanced features, including larger, higher resolution color screens, improved audio quality, and greater processing power, memory, battery life and storage. For example, the introduction of new and more powerful versions of Apple's iPhone and iPad and devices based on Google's Android operating system have helped drive the growth of the mobile games market. In addition, consumers generally purchase the majority of content, such as our games, for a new phone or tablet within a few months of purchasing the device. We do not control the timing of these mobile device launches. Some manufacturers give us access to their mobile devices prior to commercial release. If one or more major manufacturers were to cease to provide us access to new mobile device models prior to commercial release, we might be unable to introduce compatible versions of our games for those mobile devices in coordination with their commercial release, and we might not be able to make compatible versions for a substantial period following their commercial release. If, because we do not adequately build into our title plan the demand for games for a particular mobile device or experience game launch delays, we miss the opportunity to sell games when new mobile devices are shipped or our end users upgrade to a new mobile device, our revenues would likely decline and our business, operating results and financial condition would likely suffer.

If consumers or digital platform operators believe that our games contain objectionable content, our reputation and operating results could suffer.

The majority of our successful freemium games are in the action/adventure genre, and we expect that the majority of the games that we will release in the remainder of 2012 will be of a similar nature. Some of these games contain violence or other content that certain consumers may find objectionable, particularly with respect to their children. For example, our *Big Time Gangsta* game has been assigned a 17 and older rating by Apple due to its violence and drug and alcohol references. In addition, Google required us to submit two versions of our *Blood & Glory* and *Contract Killer: Zombies* games, one version which had no depictions of blood. Despite these ratings and precautions, consumers may be offended by certain of the content in our games and children to whom these games are not targeted may choose to play them anyway. In addition, there is a risk that one of our employees or an employee of an outside developer could include hidden features in one of our games without our knowledge, which hidden features might contain profanity, graphic violence or sexually explicit or otherwise objectionable material. If consumers believe that a game we published contains objectionable content, consumers could refuse to buy it or demand a refund of their money and they could pressure the digital platform operators to no longer allow us to publish the game on their platforms. This could have a materially negative impact on our business, operating results and financial condition.

Our business and growth may suffer if we are unable to hire and retain key personnel.

Our future success will depend, to a significant extent, on our ability to retain and motivate our key personnel, namely our management team, particularly Niccolo de Masi, our President and Chief Executive Officer, as well as experienced game development personnel, including those at GameSpy, Blammo and Griptonite who may experience, or continue to experience, uncertainty due to our acquisition of their companies. In addition, in order to grow our business, execute on our business strategy and replace departing employees, we must be able to identify, hire and retain qualified personnel. Competition for qualified management, game development and other personnel can be intense, and we may not be successful in attracting and retaining such personnel. This may be particularly the case for us to the extent our stock price remains at a relatively depressed level, as individuals may elect to seek employment with other companies that they believe have better long-term prospects. Competitors have in the past and may in the future attempt to recruit our employees, and our management and key employees are not bound by agreements that could prevent them from terminating their employment at any time. We may also experience difficulty assimilating our newly hired personnel, including those at GameSpy, Blammo and Griptonite, and they may be less effective or productive than we anticipated, which may adversely affect our business. In addition, we do not maintain a key-person life insurance policy on any of our officers. Our business and growth may suffer if we are unable to hire and retain key personnel.

Table of Contents

We may need to raise additional capital or borrow funds to grow our business, and we may not be able to raise capital or borrow funds on terms acceptable to us or at all.

As a result of our GameSpy, Blammo and Griptonite acquisitions, as well as our plans to increase our spending on sales and marketing and research and development initiatives in connection with our freemium games that we will release in 2012, we expect to use a significant amount of cash in our operations in 2012 as we seek to grow our business. As of June 30, 2012, we had \$24.5 million of cash and cash equivalents. If our cash and cash equivalents and cash generated from operations are insufficient to meet our cash requirements, we will need to seek additional capital, potentially through an additional debt or equity financing (potentially pursuant to our effective universal shelf registration statement), procuring a new debt facility or selling some of our assets, to fund our operations. We may not be able to raise needed cash on terms acceptable to us or at all. Financings, if available, may be on terms that are dilutive or potentially dilutive to our stockholders, such as the case with respect to the private placement transaction we completed in August 2010 and the underwritten offering of our common stock that we completed in January 2011, particularly given our current stock price. The holders of new securities may also receive rights, preferences or privileges that are senior to those of existing holders of our common stock. Additionally, our \$8.0 million credit facility expired on June 30, 2011, and, if we wish to enter into a new facility, we may be unable to procure one on terms that are acceptable to us, particularly in light of the current credit market conditions. If new sources of financing are required but are insufficient or unavailable, we would be required to modify our growth and operating plans to the extent of available funding, which would harm our ability to grow our business.

Our business is subject to increasing governmental regulation in the key territories in which we conduct business. If we do not successfully respond to these regulations, our business may suffer.

We are subject to a number of domestic and foreign laws and regulations that affect our business. Not only are these laws constantly evolving, which could result in them being interpreted in ways that could harm our business, but legislation is also continually being introduced that may affect both the content of our products and their distribution. In the United States, for example, numerous federal and state laws have been introduced which attempt to restrict the content or distribution of games. Legislation has been adopted in several states, and proposed at the federal level, that prohibits the sale of certain games to minors. If such legislation is adopted, it could harm our business by limiting the games we are able to offer to our customers or by limiting the size of the potential market for our games. We may also be required to modify certain games or alter our marketing strategies to comply with new and possibly inconsistent regulations, which could be costly or delay the release of our games. The Federal Trade Commission has also indicated that it intends to review issues related to in-app purchases, particularly with respect to games that are marketed primarily to minors. If the Federal Trade Commission issues rules significantly restricting or even prohibiting in-app purchases, it would significantly impact our business strategy. In addition, two self-regulatory bodies in the United States (the Entertainment Software Rating Board) and the European Union (Pan European Game Information) provide consumers with rating information on various products such as entertainment software similar to our products based on the content (for example, violence, sexually explicit content, language). Furthermore, the Chinese government has adopted measures designed to eliminate violent or obscene content in games. In response to these measures, some Chinese telecommunications operators have suspended billing their customers for certain mobile gaming platform services, including those services that do not contain offensive or unauthorized content, which could negatively impact our revenues in China. Any one or more of these factors could harm our business by limiting the products we are able to offer to our customers, by limiting the size of the potential market for our products, or by requiring costly additional differentiation between products for different territories to address varying regulations.

Furthermore, the growth and development of freemium gaming and the sale of virtual goods may prompt calls for more stringent consumer protection laws that may impose additional burdens on companies such as ours. We anticipate that scrutiny and regulation of our industry will increase and we will be required to devote legal and other resources to addressing such regulation. For example, existing laws or new laws regarding the regulation of currency and banking institutions may be interpreted to cover virtual currency or goods. If that were to occur we may be required to seek licenses, authorizations or approvals from relevant regulators, the granting of which may depend on us meeting certain capital and other requirements and we may be subject to additional regulation and oversight, all of which could significantly increase our operating costs. Changes in current laws or regulations or the imposition of new laws and regulations in the United States or elsewhere regarding these activities may dampen the growth of freemium gaming and impair our business.

Table of Contents

We sometimes offer our players various types of sweepstakes, giveaways and promotional opportunities. We are subject to laws in a number of jurisdictions concerning the operation and offering of such activities and games, many of which are still evolving and could be interpreted in ways that could harm our business. Any court ruling or other governmental action that imposes liability on providers of online services could result in criminal or civil liability and could harm our business.

In addition, because our services are available worldwide, certain foreign jurisdictions and others may claim that we are required to comply with their laws, including in jurisdictions where we have no local entity, employees or infrastructure.

The laws and regulations concerning data privacy and data security are continually evolving, and our actual or perceived failure to comply with these laws and regulations could harm our business.

We are subject to federal, state and foreign laws regarding privacy and the protection of the information that we collect regarding our users, which laws are currently in a state of flux and likely to remain so for the foreseeable future. The U.S. government, including the Federal Trade Commission and the Department of Commerce, has announced that it is reviewing the need for greater regulation for the collection of information concerning consumer behavior on the Internet, and the European Union is in the process of proposing reforms to its existing data protection legal framework. Various government and consumer agencies have also called for new regulation and changes in industry practices. For example, in February 2012, the California Attorney General announced a deal with Amazon, Apple, Google, Hewlett-Packard, Microsoft and Research in Motion to strengthen privacy protection for users that download third-party apps to smartphones and tablet devices. If we do not follow existing laws and regulations, as well as the rules of the smartphone platform operators, with respect to privacy related matters, or if any concerns are raised by consumer about our privacy practices, even if unfounded, it could damage our reputation and operating results.

We currently collect certain personally identifiable information regarding our customers, including the unique device identifiers (UDIDs) of our customers' smartphones and tablets, and expect in the future to collect additional personally identifiable information regarding our customers. Apple has begun rejecting applications that access a user's UDID, and this change in policy has required us to modify our business practices. We post our privacy policy and our terms of service on our corporate website. In these policies, we describe our practices concerning the use, transmission and disclosure of the information that we collect regarding our users. Any failure by us to comply with our posted privacy policy, terms of service or privacy related laws and regulations could result in proceedings against us by governmental authorities or others, which could harm our business. In addition, the interpretation of data protection laws, and their application to the mobile gaming industry is often unclear. There is a risk that these laws may be interpreted and applied in conflicting ways from state to state, country to country, or region to region, and in a manner that is not consistent with our current data protection practices. Complying with these varying international requirements could cause us to incur additional costs and change our business practices. Further, any failure by us to adequately protect our users' privacy and data could result in a loss of player confidence in our services and ultimately in a loss of users, which could adversely affect our business.

In the area of information security and data protection, many states have passed laws requiring notification to users when there is a security breach for personal data, such as the 2002 amendment to California's Information Practices Act, or requiring the adoption of minimum information security standards that are often vaguely defined and difficult to implement. The costs of compliance with these laws may increase in the future as a result of changes in interpretation. Furthermore, any failure on our part to comply with these laws may subject us to significant liabilities.

Our facilities are located near known earthquake fault zones, and the occurrence of an earthquake or other natural disaster could cause damage to our facilities and equipment, which could require us to curtail or cease operations.

Our principal offices are located in the San Francisco Bay Area, an area known for earthquakes, and are thus vulnerable to damage. We are also vulnerable to damage from other types of disasters, including power loss, fire, explosions, floods, communications failures, terrorist attacks and similar events. If any disaster were to occur, our ability to operate our business at our facilities could be impaired.

If we do not adequately protect our intellectual property rights, it may be possible for third parties to obtain and improperly use our intellectual property and our business and operating results may be harmed.

Our intellectual property is an essential element of our business. We rely on a combination of copyright, trademark, trade secret and other intellectual property laws and contractual restrictions on disclosure to protect our intellectual property rights. To date,

Table of Contents

we have not sought patent protection. Consequently, we will not be able to protect our technologies from independent invention by third parties. Despite our efforts to protect our intellectual property rights, unauthorized parties may attempt to copy or otherwise to obtain and use our technology and games, and some parties have distributed jail broken versions of our games where all of the content has been unlocked and made available for free. Monitoring unauthorized use of our games is difficult and costly, and we cannot be certain that the steps we have taken will prevent piracy and other unauthorized distribution and use of our technology and games, particularly in certain international jurisdictions such as China where the laws may not protect our intellectual property rights as fully as in the United States. In the future, we may have to resort to litigation to enforce our intellectual property rights, which could result in substantial costs and divert our management's attention and our resources. In addition, some of our competitors have in the past released games that are nearly identical to successful games released by their competitors in an effort to confuse the market and divert users from the competitor's game to the copycat game. To the extent that these tactics are employed with respect to any of our games, it could reduce our revenues that we generate from these games.

In addition, although we require our third-party developers to sign agreements not to disclose or improperly use our trade secrets and acknowledging that all inventions, trade secrets, works of authorship, developments and other processes generated by them on our behalf are our property and to assign to us any ownership they may have in those works, it may still be possible for third parties to obtain and improperly use our intellectual properties without our consent. This could harm our brand, business, operating results and financial condition.

We may become involved in intellectual property disputes, which may disrupt our business and could require us to pay significant damage awards.

Third parties may sue us, including for intellectual property infringement, or initiate proceedings to invalidate our intellectual property, which, if successful, could disrupt the conduct of our business, cause us to pay significant damage awards or require us to pay licensing fees. In the event of a future successful claim against us, we might be enjoined from using our or our licensed intellectual property, we might incur significant licensing fees and we might be forced to develop alternative technologies. Our failure or inability to develop non-infringing technology or games or to license the infringed or similar technology or games on a timely basis could force us to withdraw games from the market or prevent us from introducing new games. We might also incur substantial expenses in defending against third-party claims, regardless of their merit.

In addition, we use open source software in some of our games and expect to continue to use open source software in the future. From time to time, we may face claims from companies that incorporate open source software into their products, claiming ownership of, or demanding release of, the source code, the open source software and/or derivative works that were developed using such software, or otherwise seeking to enforce the terms of the applicable open source license. These claims could also result in litigation, require us to purchase a costly license or require us to devote additional research and development resources to change our games, any of which would have a negative effect on our business and operating results.

Our reported financial results could be adversely affected by changes in financial accounting standards or by the application of existing or future accounting standards to our business as it evolves.

Our reported financial results are impacted by the accounting policies promulgated by the SEC and accounting standards bodies and the methods, estimates, and judgments that we use in applying our accounting policies. Due to recent economic events, the frequency of accounting policy changes may accelerate, including conversion to unified international accounting standards. Policies affecting software revenue recognition have and could further significantly affect the way we account for revenue related to our products and services. For example, the accounting for revenue derived from smartphone platforms and freemium games, particularly with regard to micro-transactions, is still evolving and, in some cases, uncertain. We currently defer revenues related to virtual currency over the average playing period of paying users which approximates the useful life of the transaction. While we believe our estimates are reasonable based on available game player information, we may revise such estimates in the future as our games' operation periods change. Any adjustments arising from changes in the estimates of the lives of these virtual items would be applied prospectively on the basis that such changes are caused by new information indicating a change in the game player behavior patterns of our paying users. Any changes in our estimates of useful lives of these virtual items may result in our revenues being recognized on a basis different from prior periods and may cause our operating results to fluctuate. As we enhance, expand and diversify our business and product offerings, the application of existing or future financial accounting standards, particularly those relating to the way we account for revenue, could have a significant adverse effect on our reported results although not necessarily on our cash flows.

Table of Contents

If we fail to maintain an effective system of internal controls, we might not be able to report our financial results accurately or prevent fraud; in that case, our stockholders could lose confidence in our financial reporting, which could negatively impact the price of our stock.

Effective internal controls are necessary for us to provide reliable financial reports and prevent fraud. In addition, Section 404 of the Sarbanes-Oxley Act of 2002 requires us to evaluate and report on our internal control over financial reporting. We have incurred, and expect to continue to incur, substantial accounting and auditing expenses and expend significant management time in complying with the requirements of Section 404. Even if we conclude that our internal control over financial reporting provides reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles, because of its inherent limitations, internal control over financial reporting may not prevent or detect fraud or misstatements. Failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or cause us to fail to meet our reporting obligations. If we or our independent registered public accounting firm discover a material weakness or a significant deficiency in our internal control, the disclosure of that fact, even if quickly remedied, could reduce the market's confidence in our financial statements and harm our stock price. In addition, a delay in compliance with Section 404 could subject us to a variety of administrative sanctions, including ineligibility for short form resale registration, action by the SEC, the suspension or delisting of our common stock from the NASDAQ Global Market and the inability of registered broker-dealers to make a market in our common stock, which would further reduce our stock price and could harm our business.

Maintaining and improving our financial controls and the requirements of being a public company may strain our resources, divert management's attention and affect our ability to attract and retain qualified members for our board of directors.

As a public company, we are subject to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act of 2002, the Dodd-Frank Wall Street Reform and Consumer Protection Act, and the rules and regulations of the NASDAQ Stock Market. The requirements of these rules and regulations has significantly increased our legal, accounting and financial compliance costs, makes some activities more difficult, time-consuming and costly and may also place undue strain on our personnel, systems and resources.

The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. This can be difficult to do. To maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, we expend significant resources and provide significant management oversight to implement appropriate processes, document our system of internal control over relevant processes, assess their design, remediate any deficiencies identified and test their operation. As a result, management's attention may be diverted from other business concerns, which could harm our business, operating results and financial condition. These efforts also involve substantial accounting-related costs. In addition, if we are unable to continue to meet these requirements, we may not be able to remain listed on the NASDAQ Global Market.

Changes in our tax rates or exposure to additional tax liabilities could adversely affect our earnings and financial condition.

We are subject to income taxes in the United States and in various foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes, and, in the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain.

We are also required to estimate what our tax obligations will be in the future. Although we believe our tax estimates are reasonable, the estimation process and applicable laws are inherently uncertain, and our estimates are not binding on tax authorities. The tax laws' treatment of software and internet-based transactions is particularly uncertain and in some cases currently applicable tax laws are ill-suited to address these kinds of transactions. Apart from an adverse resolution of these uncertainties, our effective tax rate could also be adversely affected by our profit level, by changes in our business or changes in our structure, changes in the mix of earnings in countries with differing statutory tax rates, changes in the elections we make, changes in applicable tax laws (in the United States or foreign jurisdictions), or changes in the valuation allowance for deferred tax assets, as well as other factors. For example, the current administration has made public statements indicating that it has made international tax reform a priority, and key members of the U.S. Congress have conducted hearings and proposed new legislation. Recent changes to U.S. tax laws, including limitations on the ability of taxpayers to claim and utilize foreign tax credits and the deferral of certain tax deductions until earnings outside of the United States are repatriated to the United States, as well as changes to U.S. tax laws that may be enacted in the future, could impact the tax treatment of our foreign earnings.

Table of Contents

We incur certain tax expenses that do not decline proportionately with declines in our consolidated pre-tax income or loss. As a result, in absolute dollar terms, our tax expense will have a greater influence on our effective tax rate at lower levels of pre-tax income or loss than at higher levels. In addition, at lower levels of pre-tax income or loss, our effective tax rate will be more volatile.

We are also required to charge, collect and/or pay taxes other than income taxes, such as payroll, value-added, sales and use, net worth, property and goods and services taxes, in both the United States and foreign countries based on our determination of whether we have taxable nexus in the respective jurisdictions. We are subject to examination by tax authorities with respect to these non-income taxes. The outcomes from examinations, changes in our business or changes in applicable tax rules may have an adverse effect on our earnings and financial condition. If tax authorities assert that we have taxable nexus in the jurisdiction, those authorities might seek to impose past as well as future liability for taxes and/or penalties. Such impositions could also impose significant administrative burdens and decrease our future sales. Moreover, state and federal legislatures have been considering various initiatives that could change our position regarding sales and use taxes.

Furthermore, as we change our international operations, adopt new products and new distribution models, implement changes to our operating structure or undertake intercompany transactions in light of changing tax laws, acquisitions and our current and anticipated business and operational requirements, our tax expense could increase.

Our stock price has fluctuated and declined significantly since our initial public offering in March 2007, and may continue to fluctuate, may not rise and may decline further.

The trading price of our common stock has fluctuated in the past and is expected to continue to fluctuate in the future, as a result of a number of factors, many of which are outside our control, such as:

price and volume fluctuations in the overall stock market, including as a result of trends in the U.S. or global economy as a whole and the continuing unprecedented volatility in the financial markets;

changes in the operating performance and stock market valuations of other technology companies generally, or those in our industry in particular;

actual or anticipated fluctuations in our operating results;

the financial projections we may provide to the public, any changes in these projections or our failure to meet these projections;

failure of securities analysts to initiate or maintain coverage of us, changes in financial estimates or ratings by any securities analysts who follow our company or our industry, our failure to meet these estimates or failure of those analysts to initiate or maintain coverage of our stock;

announcements by us or our competitors of significant technical innovations, acquisitions, strategic partnerships, joint ventures, capital raising activities or capital commitments;

the public's response to our press releases or other public announcements, including our filings with the SEC;

any significant sales of our stock by our directors, executive officers or large stockholders, including the investors in our 2010 private placement transaction or by the former stockholders of Blammo and Griptonite, each of whose shares have been registered for resale under the Securities Act and may be freely sold at any time; and

lawsuits threatened or filed against us.

In addition, the stock markets, including the NASDAQ Global Market on which our common stock is listed, have recently and in the past, experienced extreme price and volume fluctuations that have affected the market prices of many companies, some of which appear to be unrelated or disproportionate to the operating performance of these companies. These broad market fluctuations could adversely affect the market price of our common stock. In the past, following periods of volatility in the market price of a particular company's securities, securities class action litigation has often been brought against that company. Securities class action litigation against us could result in substantial costs and divert our management's attention and resources.

Table of Contents

Some provisions in our certificate of incorporation and bylaws may deter third parties from seeking to acquire us.

Our certificate of incorporation and bylaws contain provisions that may make the acquisition of our company more difficult without the approval of our board of directors, including the following:

our board of directors is classified into three classes of directors with staggered three-year terms;

only our chairman of the board, our lead independent director, our chief executive officer, our president or a majority of our board of directors is authorized to call a special meeting of stockholders;

our stockholders are able to take action only at a meeting of stockholders and not by written consent;

only our board of directors and not our stockholders is able to fill vacancies on our board of directors;

our certificate of incorporation authorizes undesignated preferred stock, the terms of which may be established and shares of which may be issued without stockholder approval; and

advance notice procedures apply for stockholders to nominate candidates for election as directors or to bring matters before a meeting of stockholders.
