## Edgar Filing: GABELLI DIVIDEND & INCOME TRUST - Form POS 8C

**Approximate date of proposed public offering:** As soon as practicable after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, as amended, other than securities offered in connection with a dividend reinvestment plan, check the following box.

It is proposed that this filing will become effective (check appropriate box)

When declared effective pursuant to section 8(c).

If appropriate, check the following box:

This [post-effective] amendment designates a new effective date for a previously filed [post-effective amendment] [registration statement].

This form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act and the Securities Act registration number of the earlier effective registration statement for the same offering is .

### CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities	Amount Being Registered	Proposed Maximum Offering Price Per Share	Proposed Maximum Aggregate Offering Price(1)	Amount of Registration Fee(1)
Common Shares, \$0.001 par value(2)				
Preferred Shares, \$0.001 par value(2)				
Notes(2)				
Subscription Rights for Common Shares(2)				
Subscription Rights for Preferred Shares(2)				
<b>Total</b>	Shares	\$	\$500 million	\$58,050(3)

- (1) Estimated pursuant to Rule 457 solely for the purpose of determining the registration fee. The proposed maximum offering price per security will be determined, from time to time, by the Registrant in connection with the sale by the Registrant of the securities registered under this registration statement.
- (2) There is being registered hereunder an indeterminate principal amount of common or preferred shares, notes, or subscription rights to purchase common or preferred shares as may be sold, from time to time. In no event will the aggregate offering price of all securities issued from time to time pursuant to this registration statement exceed \$500,000,000.
- (3) Previously paid in connection with the filing of the initial registration statement for these securities on May 17, 2011 (including an unused registration fee that was previously paid in connection with the filing of a registration statement for the Registrant on January 15, 2008).

**THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(a) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE SECURITIES AND EXCHANGE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(a), MAY DETERMINE.**

**Notes**

**Subscription Rights for Common or Preferred Shares**

*Investment Objectives.* The Gabelli Dividend & Income Trust (the *Fund*) is a non-diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the *1940 Act*). The *Fund*'s investment objective is to seek a high level of total return with an emphasis on dividends and income. The *Fund* will attempt to achieve its objective by investing, under normal market conditions, at least 80% of its assets in dividend paying or other income producing securities. In addition, under normal market conditions, at least 50% of the *Fund*'s assets will consist of dividend paying equity securities. In making stock selections, Gabelli Funds, LLC (the *Investment Adviser*), which serves as investment adviser to the *Fund*, looks for securities that have a superior yield and capital gains potential. We cannot assure you that the *Fund* will achieve its objective.

The *Investment Adviser*'s investment philosophy with respect to both equity and fixed-income debt securities is to identify assets that are selling in the public market at a discount to their private market value. The *Investment Adviser* defines private market value as the value informed purchasers are willing to pay to acquire assets with similar characteristics. In making equity selections, the *Fund*'s *Investment Adviser* looks for securities that have a superior yield and capital gains potential. See *Investment Objective and Policies*.

We may offer, from time to time, in one or more offerings, our common shares or preferred shares, each with a par value of \$0.001 per share (together, *shares*), our promissory notes (*notes*), or our subscription rights to purchase our common or preferred shares, which we refer to collectively as the *securities*. *Securities* may be offered at prices and on terms to be set forth in one or more supplements to this Prospectus (each a *Prospectus Supplement*). You should read this Prospectus and the applicable *Prospectus Supplement* carefully before you invest in our *securities*.

Our *securities* may be offered directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The *Prospectus Supplement* relating to the offering will identify any agents or underwriters involved in the sale of our

## Edgar Filing: GABELLI DIVIDEND & INCOME TRUST - Form POS 8C

securities, and will set forth any applicable purchase price, fee, commission, or discount arrangement between us and our agents or underwriters, or among our underwriters, or the basis upon which such amount may be calculated. The Prospectus Supplement relating to any sale of preferred shares will set forth the liquidation preference and information about the dividend period, dividend rate, any call protection or non-call period and other matters. The Prospectus Supplement relating to any sale of notes will set forth the principal amount, interest rate, interest payment dates, prepayment protection (if any), and other matters. The Prospectus Supplement relating to any offering of subscription rights will set forth the number of common or preferred shares issuable upon the exercise of each right and the other terms of such rights offering. We may not sell any of our securities through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular offering of our securities. Our common shares are listed on the New York Stock Exchange (the NYSE ) under the symbol GDV and our Series A Preferred Shares and our Series D Preferred Shares are listed on the NYSE under the symbol GDV Pr A and GDV Pr D, respectively. On January 9, 2013 the last reported sale price of our common shares was \$16.90 and the last reported sale prices of our Series A Preferred Shares and Series D Preferred Shares were \$25.73 and \$26.49, respectively. The net asset value of the Fund's Common Shares at the close of business on January 9, 2013 was \$19.11 per share.

**Shares of closed-end funds often trade at a discount from net asset value. This creates a risk of loss for an investor purchasing shares in a public offering.**

**Investing in the Fund's securities involves risks. See Risk Factors and Special Considerations on page 21 for factors that should be considered before investing in securities of the Fund.**

**Table of Contents**

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

This Prospectus may not be used to consummate sales of securities by us through agents, underwriters or dealers unless accompanied by a Prospectus Supplement.

This Prospectus sets forth concisely the information about the Fund that a prospective investor should know before investing. You should read this Prospectus, which contains important information about the Fund, before deciding whether to invest in the securities, and retain it for future reference. A Statement of Additional Information, dated \_\_\_\_\_, 2012, containing additional information about the Fund, has been filed with the Securities and Exchange Commission and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of our annual and semi-annual reports, request a free copy of the Statement of Additional Information, the table of contents of which is on page 51 of this Prospectus, request other information about us and make shareholder inquiries by calling (800) GABELLI (422-3554) or by writing to the Fund, or obtain a copy (and other information regarding the Fund) from the Securities and Exchange Commission's web site (<http://www.sec.gov>).

Our securities do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other government agency.

**You should rely only on the information contained or incorporated by reference in this Prospectus. The Fund has not authorized anyone to provide you with different information. The Fund is not making an offer to sell these securities in any state where the offer or sale is not permitted. You should not assume that the information contained in this Prospectus is accurate as of any date other than the date of this Prospectus.**

**PROSPECTUS SUMMARY**

*This is only a summary. This summary does not contain all of the information that you should consider before investing in our shares. You should review the more detailed information contained in this Prospectus and the Statement of Additional Information, dated \_\_\_\_\_, 2012 (the SAI ).*

**The Fund**

The Gabelli Dividend & Income Trust is a non-diversified, closed-end management investment company organized under the laws of the State of Delaware on August 20, 2003. Throughout this Prospectus, we refer to The Gabelli Dividend & Income Trust as the Fund or as we. See The Fund.

The Fund's outstanding common shares, par value \$0.001 per share, are listed on the New York Stock Exchange under the symbol GDV. On January 9, 2013, the last reported sale price of our common shares was \$16.90. The net asset value of the Fund's common shares at the close of business on January 9, 2013 was \$19.11 per share. As of September 30, 2012, the net assets of the Fund attributable to its common shares were \$1,537,568,892. As of September 30, 2012, the Fund had outstanding 82,827,719 common shares; 3,048,019 shares of 5.875% Series A Cumulative Preferred Shares, liquidation preference \$25 per share (the Series A Preferred ); 3,600 shares of Series B Auction Market Cumulative Preferred Shares, liquidation preference \$25,000 per share (the Series B Auction Market Preferred ); 4,320 shares of Series C Auction Market Cumulative Preferred Shares, liquidation preference \$25,000 per share (the Series C Auction Market Preferred ); 2,542,296 shares of 6.00% Series D Cumulative Preferred Shares, liquidation preference \$25 per share (the Series D Preferred ); and 4,860 shares of Series E Auction Rate Cumulative Preferred Shares, liquidation preference \$25,000 per share (the Series E Auction Rate Preferred ). The Series A Preferred, Series B Auction Market Preferred, Series C Auction Market Preferred, Series D Preferred, and Series E Auction Rate Preferred have the same seniority with respect to distributions and liquidation preference.

**The Offering**

We may offer, from time to time, in one or more offerings, our common or preferred shares (together, shares ), each \$0.001 par value per share, our notes, or our subscription rights to purchase our common or preferred shares. The preferred shares may be either fixed rate preferred shares or variable rate preferred shares. The securities may be offered at prices and on terms to be set forth in one or more supplements to this Prospectus (each a Prospectus Supplement ). The offering price per common share will not be less than the net asset value per common share at the time we make the offering, exclusive of any underwriting commissions or discounts, provided that rights offerings that meet certain conditions may be offered at a price below the then current net asset value. See Rights Offerings. You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in our securities. Our securities may be offered directly to one or more purchasers, through agents designated from time to time by us or to or through underwriters or dealers. The Prospectus Supplement relating to the offering will identify any agents, underwriters, or dealers involved in the sale of our shares or notes, and will set forth any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters, or among our underwriters, or the basis upon which such amount may be calculated. The Prospectus Supplement relating to any sale of preferred shares will set forth the liquidation preference and information about the dividend period, dividend rate, any call protection or non-call period and other matters. The Prospectus Supplement relating to any sale of notes will set forth the principal amount, interest rate, interest payment dates, prepayment protection (if any), and other matters. The Prospectus Supplement relating to any offering of subscription rights will set forth the number of common or preferred shares issuable upon the exercise of each right and the other terms of such rights offering. We may not sell any of our shares or notes through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular offering.

While the aggregate number and amount of securities we may issue pursuant to this registration statement is limited to \$500,000,000 of securities, our Board of Trustees (the Board ) may, without any action by the shareholders, amend our Agreement and Declaration of Trust from time to time to increase or decrease the aggregate number of shares or the number of shares of any class or series that we have authority to issue.

**Investment Objective**

The Fund's investment objective is to provide a high level of total return on its assets with an emphasis on dividends and income. No assurance can be given that the Fund will achieve its investment objective. The Fund will attempt to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in dividend paying securities (such as common and preferred stock) or other income producing securities (such as fixed-income securities and securities that are convertible into common stock). In addition, under normal market conditions, at least 50% of the Fund's assets will consist of dividend paying equity securities. The Fund may invest up to 35% of its total assets in the securities of non-U.S. issuers (including securities of companies in emerging markets) and up to 25% of its total assets in securities of issuers in a single industry. There is no minimum credit rating for fixed-income debt securities in which the Fund may invest, although the Fund will not

## Edgar Filing: GABELLI DIVIDEND & INCOME TRUST - Form POS 8C

invest more than 10% of its total assets in fixed-income nonconvertible securities rated in the lower rating categories of recognized statistical rating agencies. The Fund's investments in the lower rating categories are typically those rated BB by Standard & Poor's Ratings Services (S&P) or Ba by Moody's Investors Service, Inc. (Moody's) or unrated securities of comparable quality, all of which are commonly referred to as junk bonds.

---

## **Table of Contents**

The Investment Adviser's investment philosophy with respect to both equity and fixed-income debt securities is to identify assets that are selling in the public market at a discount to their private market value. The Investment Adviser defines private market value as the value informed purchasers are willing to pay to acquire assets with similar characteristics. In making equity selections, the Fund's Investment Adviser looks for securities that have a superior yield and capital gains potential. The Fund will invest in securities across all market capitalization ranges. See Investment Objective and Policies.

### **Payment on Notes**

Under applicable state law and our Agreement and Declaration of Trust, we may borrow money without prior approval of holders of common and preferred shares. We may issue debt securities, including notes, or other evidence of indebtedness and may secure any such notes or borrowings by mortgaging, pledging or otherwise subjecting as security our assets to the extent permitted by the 1940 Act or rating agency guidelines. Any borrowings, including without limitation the notes, will rank senior to the preferred shares and the common shares. The Prospectus Supplement will describe the interest payment provisions relating to notes. Interest on notes will be payable when due as described in the related Prospectus Supplement. If we do not pay interest when due, it will trigger an event of default and we will be restricted from declaring dividends and making other distributions with respect to our common shares and preferred shares.

### **Dividends and Distributions**

*Preferred Share Distributions.* Under current law, all preferred shares of the Fund must have the same seniority with respect to distributions. Accordingly, no full distribution will be declared or paid on any series of preferred shares of the Fund for any dividend period, or part thereof, unless full cumulative dividends due through the most recent dividend payment dates for all series of outstanding preferred shares of the Fund are declared and paid. If full cumulative distributions due have not been declared and made on all outstanding preferred shares of the Fund, any distributions on such preferred shares will be made as nearly pro rata as possible in proportion to the respective amounts of distributions accumulated but unmade on each such series of preferred shares on the relevant dividend date.

In the event that for any calendar year the total distributions on the Fund's preferred shares exceed the Fund's ordinary income and net capital gain allocable to those shares, the excess distributions will generally be treated as a tax-free return of capital (to the extent of the shareholder's tax basis in his or her shares). Any return of capital that is a component of a distribution is not sourced from realized or unrealized profits of the Fund and that portion should not be considered by investors as yield or total return on their investment in the Fund. The amount treated as a tax-free return of capital will reduce a shareholder's adjusted tax basis in his or her preferred shares, thereby increasing the shareholder's potential taxable gain or reducing his or her potential taxable loss on the sale of the shares.

The distributions to the Fund's preferred shareholders for the fiscal year ended December 31, 2011, were comprised exclusively of net investment income and did not include any return of capital. The composition of each distribution is estimated based on the earnings of the Fund as of the record date for each distribution. The actual composition of each of the current year's distributions will be based on the Fund's investment activity through the end of the calendar year.

*Fixed Rate Preferred Shares.* Distributions on fixed rate preferred shares, at the applicable annual rate of the per share liquidation preference, are cumulative from the original issue date and are payable, when, as and if declared by the Board of Trustees of the Fund, out of funds legally available therefor.

*Variable Rate Preferred Shares.* The holders of variable rate preferred shares are entitled to receive cash distributions, based on the applicable per share liquidation preference, that vary from dividend period to dividend period.

*Common Share Distributions.* In order to allow its holders of common shares to realize a predictable, but not assured, level of cash flow and some liquidity periodically on their investment without having to sell shares, the Fund has adopted a policy, which may be changed at any time by the Board of Trustees, of paying monthly distributions on its common shares. If necessary, the Fund will pay an adjusting distribution in December which includes any additional income and net realized capital gains in excess of the monthly distributions for that year to satisfy the minimum distribution requirements of the Internal Revenue Code of 1986, as amended (the Code). The Fund's annualized distributions may contain return of capital and should not be considered as the dividend yield or total return of an investment in its common shares. A portion of the Fund's common share distributions for the years ending 2011, 2010, 2009, 2008, and 2004 have included a return of capital. For the fiscal year ended December 31, 2011, the Fund made distributions of \$0.90 per common share, \$0.50 of which constituted a return of capital. The amount treated as a tax-free return of capital will reduce a shareholder's adjusted tax basis in the stock, thereby increasing the shareholder's potential taxable gain or reducing the potential taxable loss on the sale of the shares. **Any return of capital should not be considered by investors as yield or total return on their investment in the Fund. Common shareholders who periodically receive the payment of a dividend or other distribution consisting of a return of capital may be under the impression that they are receiving net profits when they**

## Edgar Filing: GABELLI DIVIDEND & INCOME TRUST - Form POS 8C

**are not. Shareholders should not assume that the source of a distribution from the Fund is net profit.** The composition of each distribution is estimated based on earnings as of the record date for the distribution. The actual composition of each distribution may change based on the Fund's investment activity through the end of the calendar year.

---

## **Table of Contents**

*Limitations on Distributions.* If at any time the Fund has notes or borrowings outstanding, the Fund will be prohibited from paying any distributions on any of its common shares (other than in additional shares), and from repurchasing any of its common shares or preferred shares, unless, the value of its total assets, less certain ordinary course liabilities, exceed 300% of the amount of the debt outstanding and exceed 200% of the sum of the amount of debt and preferred shares outstanding. In addition, in such circumstances the Fund will be prohibited from paying any sister distributions on its preferred shares unless the value of its total assets, less certain ordinary course liabilities, exceed 200% of the amount of debt outstanding.

### **Tax Treatment of Interest Payments on Notes**

Noteholders will be required to include payments of interest on the notes in their gross income in accordance with their method of accounting for U.S. federal income tax purposes. For a more detailed discussion, see [Taxation](#).

### **Tax Treatment of Share Distributions**

The Fund expects that distributions on the common and preferred shares will consist of (i) long-term capital gain (gain from the sale of a capital asset held longer than 12 months), (ii) qualified dividend income (dividend income from certain domestic and foreign corporations), (iii) investment company taxable income (other than qualified dividend income), including interest income, short-term capital gain and income from certain hedging and interest rate transactions, and (iv) with respect to common shares, return of capital. For individuals, the maximum federal income tax rate on long-term capital gain is currently 20%, on qualified dividend income is currently 20%, and on ordinary income (such as distributions from investment company taxable income that are not eligible for treatment as qualified dividend income) is currently 35%. We cannot assure you, however, as to what percentage of the distributions paid on the common or preferred shares will consist of long-term capital gain and qualified dividend income, which are currently taxed at lower rates for individuals than ordinary income. For a more detailed discussion, see [Taxation](#).

### **Use of Proceeds**

The Fund will use the net proceeds from the offering to purchase additional portfolio securities in accordance with its investment objective and policies. Proceeds will be invested as appropriate investment opportunities are identified, which is expected to substantially be completed within three months; however, changes in market conditions could result in the Fund's anticipated investment period extending to as long as six months. The Fund may also use net proceeds to redeem one or more of its Series A Preferred, Series B Preferred, Series C Preferred, Series D Preferred or Series E Preferred. Depending on market conditions and operations, a portion of the cash held by the Fund, including any proceeds raised from this offering, may be used to pay distributions in accordance with the Fund's distribution policy. Such distribution, may constitute a return of capital and should not be considered as dividend yield or the total return from an investment in the Fund. See [Use of Proceeds](#).

### **Exchange Listing**

The Fund's common shares are listed on the NYSE under the trading or ticker symbol GDV and our Series A Preferred and our Series D Preferred are listed on the NYSE under the symbol GDV Pr A and GDV Pr D, respectively. See [Description of the Securities](#). Any additional series of fixed rate preferred shares issued by the Fund would also likely be listed on the NYSE. Variable rate preferred shares and notes may not be listed on a stock exchange.

### **Market Price of Shares**

Common shares of closed-end investment companies often trade at prices lower than their net asset value. Common shares of closed-end investment companies may trade during some periods at prices higher than their net asset value and during other periods at prices lower than their net asset value. The Fund cannot assure you that its common shares will trade at a price higher than or equal to net asset value. The Fund's net asset value will be reduced immediately following this offering by the sales load and the amount of the offering expenses paid by the Fund. See [Use of Proceeds](#).

In addition to net asset value, the market price of the Fund's common shares may be affected by such factors as the Fund's dividend and distribution levels (which are affected by expenses) and stability, market liquidity, market supply and demand, unrealized gains, general market and economic conditions and other factors. See [Risk Factors and Special Considerations](#), [Description of the Shares](#) and [Repurchase of Common Shares](#).

### **Risk Factors and Special Considerations**

## Edgar Filing: GABELLI DIVIDEND & INCOME TRUST - Form POS 8C

Risk is inherent in all investing. Therefore, before investing in securities of the Fund, you should consider the risks carefully. See Risk Factors and Special Considerations.

*Dilution.* Shareholders who do not exercise their subscription rights may, at the completion of such an offering, own a smaller proportional interest in the Fund than if they exercised their subscription rights. As a result of such an offering, a shareholder may experience dilution in net asset value per share if the subscription price per share is below the net asset value per share on the expiration date. If the subscription price per share is below the net asset value per share of the Fund's shares on the expiration date, a shareholder will experience an immediate dilution of the aggregate net asset value of such shareholder's shares if the shareholder does not participate in such an offering and the shareholder will experience a reduction in the net asset value per share of such shareholder's shares whether or not the shareholder participates in such an offering. The Fund cannot state precisely the extent of this dilution (if any) if the shareholder does not exercise such shareholder's subscription rights because the Fund does not know what the net asset value per share will be when the offer expires or what proportion of the Rights will be exercised.

There is also a risk that the Fund's largest shareholders, record date shareholders of more than 5% of the outstanding shares of common stock of the Fund, may increase their percentage ownership of the Fund through the exercise of the primary subscription and over-subscription privilege.

*Our Notes.* An investment in our notes is subject to special risks. There may not be an established market for our notes. To the extent that our notes trade, they may trade at a price either higher or lower than their principal amount depending on interest rates, the rating (if any) on such notes and other factors. See Risk Factors and Special Considerations Special Risks to Holders of Notes.

---

## **Table of Contents**

*Our Fixed Rate Preferred Shares.* Prior to the offering of any additional series of fixed rate preferred shares, there will be no public market for such shares. During an initial period, not expected to exceed 30 days after the date of initial issuance, such shares may not be listed on any securities exchange. Consequently, an investment in such shares may be illiquid during such period. Fixed rate preferred shares may trade at a premium to or discount from liquidation preference for a variety of reasons, including changes in interest rates. See Risk Factors and Special Considerations Special Risks to Holders of Fixed Rate Preferred Shares.

*Our Variable Rate Preferred Shares.* In the event any auction-rate preferred shares are issued, you may not be able to sell your auction-rate preferred shares at an auction if the auction fails, i.e., if more auction-rate preferred shares are offered for sale than there are buyers for those shares. In the event any auction-rate preferred shares are issued, if you try to sell your auction-rate preferred shares between auctions, you may not be able to sell them for their liquidation preference per share or such amount per share plus accumulated dividends. Since February 2008 all of the auctions of our Series B Preferred, Series C Preferred, and Series E Preferred have failed. Most auction-rate preferred share auctions have been unable to hold successful auctions and holders of such shares have suffered reduced liquidity. Holders of our variable rate preferred have continued to receive their dividends on the auction-rate preferred shares at the maximum rate determined by reference to short term rates, rather than at a price set by auction. At present, the maximum rate for Series B Preferred and Series C Preferred is equal to the greater of (a) 150% of or (b) 150 bps over the 7-day LIBOR, and equal to the greater of (a) 250% of or (b) 250 bps over the 7-day LIBOR for Series E Preferred. A failed auction is not a default and the Fund has no obligation to redeem its auction-rate preferred shares because the auctions continue to fail. There can be no assurance that liquidity will improve. There appears to be a secondary market in certain auction market preferred issues, although the Fund is not aware whether there is or will be an active trading market for the Fund's auction-rate preferred shares. See Risk Factors and Special Considerations Special Risks to Holders of Variable Rate Preferred Shares.

*Our Subscription Rights.* There is a risk that changes in market conditions may result in the underlying common or preferred shares purchaseable upon exercise of the subscription rights being less attractive to investors at the conclusion of the subscription period. This may reduce or eliminate the value of the subscription rights. Investors who receive transferable subscription rights may find that there is no market to sell rights they do not wish to exercise. If investors exercise only a portion of the rights, the number of common or preferred shares issued may be reduced, and the common or preferred shares may trade at less favorable prices than larger offerings for similar securities.

*Common Share Repurchases.* Repurchases of common shares by the Fund may reduce the net asset coverage of the notes and preferred shares, which could adversely affect their liquidity or market prices. See Risk Factors and Special Considerations Special Risks to Holders of Notes and Preferred Shares Common Share Repurchases.

*Common Share Distribution Policy.* In the event the Fund does not generate a total return from dividends and interest received and net realized capital gains in an amount at least equal to its distributions for a given year, the Fund may return capital as part of its distributions on common shares. This would decrease the asset coverage per share with respect to the Fund's notes or preferred shares, which could adversely affect their liquidity or market prices. See Risk Factors and Special Considerations Special Risks to Holders of Notes and Preferred Shares Common Share Distribution Policy.

*Credit Quality Ratings.* In order to obtain and maintain attractive credit quality ratings for preferred shares or borrowings, the Fund's portfolio must satisfy over-collateralization tests established by the relevant rating agencies. These tests are more difficult to satisfy to the extent the Fund's portfolio securities are of lower credit quality, longer maturity or not diversified by issuer and industry. These guidelines could affect portfolio decisions and may be more stringent than those imposed by the 1940 Act. A rating by a rating agency does not eliminate or necessarily mitigate the risks of investing in our preferred shares or notes, and a rating may not fully or accurately reflect all of the securities' credit risks. A rating does not address liquidity or any other market risks of the securities being rated. A rating agency could downgrade the rating of our preferred shares or notes, which may make such securities less liquid in the secondary market. If a rating agency downgrades the rating assigned to preferred shares or notes, we may alter our portfolio or redeem the preferred shares or notes under certain circumstances. See Risk Factors and Special Considerations Special Risks to Holders of Notes and Preferred Shares Credit Quality Ratings.

*Preferred Shares Subordinated to Debt Securities.* As provided in the 1940 Act, and subject to compliance with the Fund's investment limitations, the Fund may issue debt securities. In the event the Fund were to issue such securities, the Fund's obligations to make distributions and, upon liquidation of the Fund, liquidation payments in respect of its preferred shares would be subordinate to the Fund's obligations to make any principal and interest payments due and owing with respect to its outstanding debt securities. Accordingly, the Fund's issuance of debt securities would have the effect of creating special risks for the Fund's preferred shareholders that would not be present in a capital structure that did not include such securities. See Risk Factors and Special Considerations Special Risks of Notes to Holders of Preferred Shares.

*Restrictions on Dividends and Other Distributions.* Restrictions imposed on the declaration and payment of dividends or other distributions to the holders of the Fund's common shares and preferred shares, both by the 1940 Act and by requirements imposed by rating agencies, might impair the Fund's ability to maintain its qualification as a regulated investment company for federal income tax purposes. While the Fund intends to redeem its preferred shares or prepay its notes to the extent necessary to enable the Fund to distribute its income as required to maintain its

## Edgar Filing: GABELLI DIVIDEND & INCOME TRUST - Form POS 8C

qualification as a regulated investment company under the Code, there can be no assurance that such actions can be effected in time to meet the Code requirements. See "Taxation" in the SAI.

---

**Table of Contents**

*Leverage Risk.* The Fund currently uses, and intends to continue to use, financial leverage for investment purposes by issuing preferred shares. As of June 30, 2012, the amount of leverage represented approximately 24% of the Fund's net assets. The Fund's leveraged capital structure creates special risks not associated with unleveraged funds having a similar investment objective and policies. These include the possibility of greater loss and the likelihood of higher volatility of the net asset value of the Fund and the asset coverage for the preferred shares. Such volatility may increase the likelihood of the Fund having to sell investments in order to meet its obligations to make distributions on the preferred shares or principal or interest payments on debt securities, or to redeem preferred shares or repay debt, when it may be disadvantageous to do so. The use of leverage magnifies both the favorable and unfavorable effects of price movements in the investments made by the Fund. To the extent that the Fund determines to employ leverage in its investment operations, the Fund will be subject to substantial risk of loss. The Fund cannot assure you that borrowings or the issuance of preferred shares will result in a higher yield or return to the holders of the common shares. Also, if the Fund is utilizing leverage, a decline in net asset value could affect the ability of the Fund to make common share distributions and such a failure to make distributions could result in the Fund ceasing to qualify as a regulated investment company under the Code.

The issuance of preferred shares or notes causes the net asset value and market value of the common shares to become more volatile. If the interest rate on the notes or the dividend rate on the preferred shares approaches the net rate of return on the Fund's investment portfolio, the benefit of leverage to the holders of the common shares would be reduced. If the interest rates on the notes or the dividend rate on the preferred shares plus the management fee annual rate of 1.00% (as applicable) exceeds the net rate of return on the Fund's portfolio, the leverage will result in a lower rate of return to the holders of common shares than if the Fund had not issued preferred shares or notes.

Any decline in the net asset value of the Fund's investments would be borne entirely by the holders of common shares. Therefore, if the market value of the Fund's portfolio declines, the leverage will result in a greater decrease in net asset value to the holders of common shares than if the Fund were not leveraged. This greater net asset value decrease will also tend to cause a greater decline in the market price for the common shares. The Fund might be in danger of failing to maintain the required asset coverage of the notes or preferred shares or of losing its ratings on the preferred shares or notes or, in an extreme case, the Fund's current investment income might not be sufficient to meet the distribution requirements on the preferred shares or notes. In order to counteract such an event, the Fund might need to liquidate investments in order to fund redemption of some or all of the preferred shares or notes.

In addition, the Fund would pay (and the holders of common shares will bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred shares or notes, including any additional advisory fees on the incremental assets attributable to such preferred shares or notes. Holders of preferred shares may have different interests than holders of common shares and at times may have disproportionate influence over the Fund's affairs. In the event the Fund fails to maintain the specified level of asset coverage of any notes outstanding, the holders of the preferred shares will have the right to elect a majority of the Fund's trustees. In addition, holders of preferred shares, voting separately as a single class, have the right to elect two members of the Board of Trustees at all times and in the event dividends become in arrears for two full years would have the right (subject to the rights of noteholders) to elect a majority of the Trustees until the arrearage is completely eliminated. In addition, preferred shareholders have class voting rights on certain matters, including changes in fundamental investment restrictions and conversion of the Fund to open-end status, and accordingly can veto any such changes. See Risk Factors and Special Considerations Special Risks to Holders of Common Shares Leverage Risk.

*Market Discount Risk.* Whether investors will realize gains or losses upon the sale of common shares of the Fund will depend upon the market price of the shares at the time of sale, which may be less or more than the Fund's net asset value per share. Since the market price of the common shares will be affected by such factors as the Fund's dividend and distribution levels (which are in turn affected by expenses), dividend and distribution stability, net asset value, market liquidity, the relative demand for and supply of the shares in the market, general market and economic conditions and other factors beyond the control of the Fund, we cannot predict whether the common shares will trade at, below or above net asset value or at, below or above the public offering price. Common shares of closed-end funds often trade at a discount to their net asset values and the Fund's common shares may trade at such a discount. This risk may be greater for investors expecting to sell their common shares of the Fund soon after completion of the public offering. The common shares of the Fund are designed primarily for long-term investors, and investors in the shares should not view the Fund as a vehicle for trading purposes. See Risk Factors and Special Considerations Special Risks to Holders of Common Shares Market Discount Risk.

*Inflation Risk.* Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions thereon can decline. In addition, during any periods of rising inflation, dividend rates of any variable rate preferred stock or debt securities issued by the Fund would likely increase, which would tend to further reduce returns to common shareholders. See Risk Factors and Special Considerations Special Risks to Holders of Common Shares Inflation Risk.

## **Table of Contents**

*Value Investing Risk.* The Fund focuses its investments on dividend-paying common and preferred stocks that the Investment Adviser believes are undervalued or inexpensive relative to other investments. These types of securities may present risks in addition to the general risks associated with investing in common and preferred stocks including the risk of incorrectly estimating certain fundamental factors. In addition, during certain time periods market dynamics may strongly favor growth stocks of issuers that do not display strong fundamentals relative to market price based upon positive price momentum and other factors. See Risk Factors and Special Considerations Risks of Investing in the Fund Value Investing Risk.

*Non-Diversified Status.* As a non-diversified, closed-end management investment company under the 1940 Act, the Fund may invest a greater portion of its assets in a more limited number of issuers than may a diversified fund, and accordingly, an investment in the Fund may, under certain circumstances, present greater risk to an investor than an investment in a diversified company. See Risk Factors and Special Considerations Risks of Investing in the Fund Non-Diversified Status.

*Interest Rate Risk for Fixed Income Securities.* The primary risk associated with fixed income securities is interest rate risk. A decrease in interest rates will generally result in an increase in the value of a fixed income security, while increases in interest rates will generally result in a decline in its value. This effect is generally more pronounced for fixed rate securities than for securities whose income rate is periodically reset. Market interest rates recently have declined significantly below historical average rates, which may increase the risk that these rates will rise in the future. See Risk Factors and Special Considerations Risks of Investing in the Fund Interest Rate Risk for Fixed Income Securities.

*Distribution Risk for Equity Income Securities.* In selecting equity income securities in which the Fund will invest, the Investment Adviser will consider the issuer's history of making regular periodic distributions (i.e., dividends) to its equity holders. An issuer's history of paying dividends, however, does not guarantee that the issuer will continue to pay dividends in the future. See Risk Factors and Special Considerations Risks of Investing in the Fund Distribution Risk for Equity Income Securities.

*Equity Risk.* Equity risk is the risk that the price of an equity security will fall due to general market and economic conditions, perceptions regarding the industry in which the issuer participates or the issuing company's particular circumstances. Common stock in which the Fund will invest or receive upon conversion of convertible securities is subject to such equity risk. In the case of convertible securities, it is the conversion value of a convertible security that is subject to the equity risk; that is, if the appreciation potential of a convertible security is not realized, the premium paid for its conversion value may not be recovered. See Investment Objective and Policies Investment Practices Convertible Securities.

*Prepayment Risks on Government Sponsored Mortgage-Backed Securities.* The yield and maturity characteristics of government sponsored mortgage-backed securities differ from traditional debt securities. A major difference is that the principal amount of the obligations may generally be prepaid at any time because the underlying assets (i.e., loans) generally may be prepaid at any time. See Investment Objective and Policies Investment Practices Prepayment Risks on Government Sponsored Mortgage-Backed Securities.

*Illiquid Investments.* The Fund has no limit on the amount of its net assets it may invest in unregistered and otherwise illiquid investments. The Fund currently does not intend to invest more than 15% of its total net assets in illiquid securities. Unregistered securities are securities that cannot be sold publicly in the United States without registration under the Securities Act of 1933. Unregistered securities generally can be resold only in privately negotiated transactions with a limited number of purchasers or in a public offering registered under the Securities Act of 1933. Considerable delay could be encountered in either event and, unless otherwise contractually provided for, the Fund's proceeds upon sale may be reduced by the costs of registration or underwriting discounts. The difficulties and delays associated with such transactions could result in the Fund's inability to realize a favorable price upon disposition of unregistered securities, and at times might make disposition of such securities impossible. See Risk Factors and Special Considerations Risks of Investing in the Fund Illiquid Securities.

*Industry Concentration Risk.* The Fund may invest up to 25% of its assets in the securities of companies principally engaged in a single industry. In the event the Fund makes substantial investments in a single industry, the Fund would become more susceptible to adverse economic or regulatory occurrences affecting that industry. See Risk Factors and Special Considerations Risks of Investing in the Fund Industry Concentration Risk.

*Foreign Securities Risk.* The Fund may invest up to 35% of its total assets in foreign securities. Investing in securities of foreign companies (or foreign governments), which are generally denominated in foreign currencies, may involve certain risks and opportunities not typically associated with investing in domestic companies and could cause the Fund to be affected favorably or unfavorably by changes in currency exchange rates and revaluation of currencies. See Risk Factors and Special Considerations Risks of Investing in the Fund Foreign Securities Risk.

---

## **Table of Contents**

*Emerging Markets Risk.* The Fund may invest in securities of issuers whose primary operations or principal trading market is in an emerging market. An emerging market country is any country that is considered to be an emerging or developing country by the International Bank for Reconstruction and Development (the World Bank). Investing in securities of companies in emerging markets may entail special risks relating to potential political and economic instability and the risks of expropriation, nationalization, confiscation or the imposition of restrictions on foreign investment, the lack of hedging instruments and restrictions on repatriation of capital invested. Emerging securities markets are substantially smaller, less developed, less liquid and more volatile than the major securities markets. The limited size of emerging securities markets and limited trading value compared to the volume of trading in U.S. securities could cause prices to be erratic for reasons apart from factors that affect the quality of the securities. For example, limited market size may cause prices to be unduly influenced by traders who control large positions. Adverse publicity and investors' perceptions, whether or not based on fundamental analysis, may decrease the value and liquidity of portfolio securities, especially in these markets. Other risks include high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of investors and financial intermediaries; overdependence on exports, including gold and natural resources exports, making these economies vulnerable to changes in commodity prices; overburdened infrastructure and obsolete or unseasoned financial systems; environmental problems; less developed legal systems; and less reliable securities custodial services and settlement practices. See Risk Factors and Special Considerations-Risks of Investing in the Fund-Emerging Markets Risk.

*Non-Investment Grade Securities.* The Fund may invest up to 10% of its total assets in fixed-income securities rated below investment grade by recognized statistical rating agencies or unrated securities of comparable quality. The prices of these non-investment grade securities are more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher grade securities. Securities of below investment grade quality are predominantly speculative with respect to the issuer's capacity to pay interest and repay principal when due and therefore involve a greater risk of default and are commonly referred to as junk bonds. See Risk Factors and Special Considerations Risks of Investing in the Fund Non-Investment Grade Securities.

*Loans of Portfolio Security.* The Fund may seek to earn income by lending portfolio securities to broker-dealers or other institutional borrowers. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the securities loaned if the borrower of the securities violates the terms of the loan or fails financially. The Fund currently does not intend to lend securities representing more than 33% of its total net assets. See Risk Factors and Special Considerations Risks of Investing in the Fund Loans of Portfolio Securities.

*Management Risk.* The Fund is subject to management risk because it is an actively managed portfolio. The Investment Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. See Risk Factors and Special Considerations Risks of Investing in the Fund Management Risk.

*Dependence on Key Personnel.* The Investment Adviser is dependent upon the expertise of Mr. Mario J. Gabelli in providing advisory services with respect to the Fund's investments. If the Investment Adviser were to lose the services of Mr. Gabelli, its ability to service the Fund could be adversely affected. There can be no assurance that a suitable replacement could be found for Mr. Gabelli in the event of his death, resignation, retirement, or inability to act on behalf of the Investment Adviser. See Risk Factors and Special Considerations Risks of Investing in the Fund Dependence on Key Personnel.

*Geopolitical Risks.* Geopolitical events, such as terrorist attacks and wars, have led to, and may in the future lead to, increased short-term market volatility and may have long-term effects on U.S. and world economies and markets. The nature, scope and duration of the war and occupation cannot be predicted with any certainty. Similar events in the future or other disruptions of financial markets could affect interest rates, securities exchanges, auctions, secondary trading, ratings, credit risk, inflation, energy prices and other factors relating to the common stock or preferred stock. See Risk Factors and Special Considerations Geopolitical Risks.

*Recent Economic Events.* The debt and equity capital markets in the United States have been negatively impacted by significant write-offs in the financial services sector relating to subprime mortgages and the repricing of credit risk in the broadly syndicated market, among other things. These events, along with the downgrade to the United States credit rating, deterioration of the housing market, the failure of major financial institutions and the resulting United States federal government actions have led to worsening general economic conditions, which have materially and adversely impacted the broader financial and credit markets and have reduced the availability of debt and equity capital for the market as a whole and financial firms in particular. These events have been adversely affecting the willingness of some lenders to extend credit, in general, which may make it more difficult for issuers of debt securities to obtain financings or refinancings for their investment or lending activities or operations. There is a risk that such issuers will be unable to successfully complete such financings or refinancings.

While the extreme volatility and disruption that U.S. and global markets experienced for an extended period of time beginning in 2007 and 2008 has generally subsided, uncertainty and periods of volatility remain, and risks to a robust resumption of growth persist. In 2010, several European Union (EU) countries, including Greece, Ireland, Italy, Spain, and Portugal, began to face budget issues,

## **Table of Contents**

some of which may have negative long-term effects for the economies of those countries and other EU countries. There is continued concern about national-level support for the Euro and the accompanying coordination of fiscal and wage policy among European Economic and Monetary Union member countries. Moreover, as the European debt crisis has progressed the possibility of one or more eurozone countries exiting the European Economic and Monetary Union, or even the collapse of the Euro as a common currency, has arisen. The effects of the collapse of the Euro, or of the exit of one or more countries from the Economic and Monetary Union, on the U.S. and global economy and securities markets are impossible to predict and any such events could have a significant adverse impact on the value and risk profile of the Fund's portfolio. Moreover, recent downgrades to the credit ratings of major banks could result in increased borrowing costs for such banks and negatively affect the broader economy. A return to unfavorable economic conditions could impair the Fund's ability to achieve its investment objectives. See Risk Factors and Special Considerations Risks of Investing in the Fund Recent Economic Developments.

*Government Intervention in Financial Markets Risk.* The recent instability in the financial markets discussed above has led the U.S. government and certain foreign governments to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that have experienced extreme volatility, and in some cases a lack of liquidity, including through direct purchases of equity and debt securities. Federal, state, and other governments, their regulatory agencies or self-regulatory organizations may take actions that affect the regulation of the issuers in which the Fund invests, or the issuers of such securities, in ways that are unforeseeable. Legislation or regulation may also change the way in which the Fund is regulated. Such legislation or regulation could limit or preclude the Fund's ability to achieve its investment objectives. See Risk Factors and Special Considerations Risks of Investing in the Fund Government Intervention in Financial Markets Risk.

*Long-term Objective.* The Fund is intended for investors seeking a high level of total return over the long-term. The Fund is not meant to provide a vehicle for those who wish to play short-term swings in the stock market. An investment in shares of the Fund should not be considered a complete investment program. Each shareholder should take into account the Fund's investment objective as well as the shareholder's other investments when considering an investment in the Fund. See Risk Factors and Special Considerations Risks of Investing in the Fund Long-term Objective.

*Anti-Takeover Provisions.* The Fund's Governing Documents (as defined herein) include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to an open-end fund. See Risk Factors and Special Considerations Risks of Investing in the Fund Anti-Takeover Provisions of the Fund's Governing Documents.

*Status as a Regulated Investment Company.* The Fund has elected and has qualified for, and intends to remain qualified for, federal income tax purposes as a regulated investment company. Qualification requires, among other things, compliance by the Fund with certain distribution requirements. Statutory limitations on distributions on the common shares if the Fund fails to satisfy the 1940 Act's asset coverage requirements could jeopardize the Fund's ability to meet such distribution requirements. The Fund presently intends, however, to purchase or redeem preferred shares to the extent necessary in order to maintain compliance with such asset coverage requirements. See Taxation for a more complete discussion of these and other federal income tax considerations.

*Special Risks Related to Preferred Securities.* Special risks associated with the Fund investing in preferred securities include deferral of distributions or dividend payments, in some cases the right of an issuer never to pay missed dividends, subordination to debt and other liabilities, illiquidity, limited voting rights and redemption by the issuer. Because the Fund has no limit on its investment in non-cumulative preferred securities, the amount of dividends the Fund pays may be adversely affected if an issuer of a non-cumulative preferred stock held by the Fund determines not to pay dividends on such stock. There is no assurance that dividends or distributions on preferred stock in which the Fund invests will be declared or otherwise made payable. See Risk Factors and Special Considerations Risks of Investing in the Fund Special Risks Related to Preferred Securities.

## **Management and Fees**

Gabelli Funds, LLC serves as the Fund's Investment Adviser and its fee is calculated on the basis of the Fund's average weekly net assets including assets attributable to any outstanding preferred shares, with no deduction for the liquidation preference of any preferred shares and subject to voluntary reduction in certain situations. The fee may be higher when leverage is utilized, giving the Investment Adviser an incentive to utilize such leverage. However, the Investment Adviser has agreed to reduce the management fee on the incremental assets attributable to the currently outstanding Series A Preferred, Series B Auction Market Preferred, Series C Auction Market Preferred, Series D Preferred and Series E Auction Rate Preferred during the fiscal year if the total return of the net asset value of the common shares, including distributions and management fee subject to reduction for that year, does not exceed the stated dividend rate or corresponding swap rate of each particular series of preferred shares for the period. This fee waiver is voluntary and may be discontinued at any time, and will not apply to any preferred shares or notes issued pursuant to this offering. The Fund's total return on the net asset value of the common shares is monitored on a monthly basis to assess whether the total return on the net asset value of the common shares exceeds the stated dividend rate or corresponding swap rate of each particular series of preferred shares for the period. The test to confirm the accrual of the management fee on the assets attributable to each

## Edgar Filing: GABELLI DIVIDEND & INCOME TRUST - Form POS 8C

particular series of preferred shares is annual. The Fund will accrue for the management fee on these assets during the fiscal year if it appears probable that the Fund will incur the management fee on those additional assets.

## **Table of Contents**

For the year ended December 31, 2011, the Fund's total return on the net asset value of the common shares did not exceed the stated dividend rate of the outstanding Series A and Series D Preferred Shares. Thus, advisory fees in the amount of \$1,397,579 were not accrued or paid with respect to the liquidation value of the Series A and Series D Preferred Shares. For the year ended December 31, 2011, the Fund's total return on the net asset value of the common shares exceeded the stated dividend rate for Series B, Series C, and Series E Preferred Shares. Thus, advisory fees were accrued and paid on the liquidation value of Series B, Series C, and Series E Preferred Shares.

A discussion regarding the basis for the Board's approval of the continuation of the investment advisory contract of the Fund is available in the Fund's annual report to shareholders dated December 31, 2011.

### **Repurchase of Common Shares**

The Fund's Board of Trustees has authorized the Fund to repurchase its common shares in the open market when the common shares are trading at a discount of 7.5% or more from net asset value (or such other percentage as the Board of Trustees may determine from time to time). Although the Board of Trustees has authorized such repurchases, the Fund is not required to repurchase its common shares. The Board of Trustees has not established a limit on the number of common shares that could be purchased during such period. Such repurchases are subject to certain notice and other requirements under the 1940 Act. See "Repurchase of Common Shares."

### **Anti-takeover Provisions**

Certain provisions of the Fund's Agreement and Declaration of Trust and By-Laws (collectively, the "Governing Documents") may be regarded as "anti-takeover" provisions. Pursuant to these provisions, only one of three classes of trustees is elected each year, and the affirmative vote of the holders of 75% of the outstanding shares of the Fund are necessary to authorize the conversion of the Fund from a closed-end to an open-end investment company. The overall effect of these provisions is to render more difficult the accomplishment of a merger with, or the assumption of control by, a principal shareholder. These provisions may have the effect of depriving Fund common shareholders of an opportunity to sell their shares at a premium to the prevailing market price. See "Anti-Takeover Provisions of the Fund's Governing Documents."

### **Custodian, Transfer Agent and Dividend Disbursing Agent**

State Street Bank and Trust Company ("State Street" or the "Custodian"), located at 1776 Heritage Drive, North Quincy, Massachusetts 02171, serves as the custodian of the Fund's assets pursuant to a custody agreement. Under the custody agreement, the Custodian holds the Fund's assets in compliance with the 1940 Act. For its services, the Custodian receives a monthly fee based upon, among other things, the average value of the total assets of the Fund, plus certain charges for securities transactions.

Computershare Trust Company, N.A. ("Computershare"), located at 250 Royall Street, Canton, Massachusetts 02021, serves as the Fund's dividend disbursing agent, as agent under the Fund's automatic dividend reinvestment and voluntary cash purchase plan, and as transfer agent and registrar with respect to the common shares of the Fund.

Computershare also serves as the transfer agent, registrar, dividend disbursing agent and redemption agent with respect to the Series A Preferred and Series D Preferred.

The Bank of New York Mellon, located at 101 Barclay Street, New York, New York 10014, serves as auction agent, transfer agent and redemption agent with respect to the Series B Auction Market Preferred, and Series C Auction Market Preferred, and Series E Auction Market Preferred.

**Table of Contents**

**SUMMARY OF FUND EXPENSES**

The following table shows the Fund's expenses, including preferred shares offering expenses, as a percentage of net assets attributable to common shares.

<b>Shareholder Transaction Expenses</b>	
Sales Load (as a percentage of offering price)	2.08%(1)
Offering Expenses Borne by the Fund (excluding Preferred Shares Offering Expenses) (as a percentage of offering price)	0.03%(1)
Dividend R
