Table of Contents**SCHLUMBERGER LIMITED AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****1. Basis of Presentation**

The accompanying unaudited consolidated financial statements of Schlumberger Limited and its subsidiaries (Schlumberger) have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of Schlumberger management, all adjustments considered necessary for a fair statement have been included in the accompanying unaudited financial statements. All intercompany transactions and balances have been eliminated in consolidation. Operating results for the three-month period ended March 31, 2013 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2013. The December 31, 2012 balance sheet information has been derived from the Schlumberger 2012 financial statements. For further information, refer to the *Consolidated Financial Statements* and notes thereto included in the Schlumberger Annual Report on Form 10-K for the year ended December 31, 2012, filed with the Securities and Exchange Commission on January 31, 2013.

2. Charges and Credits

Schlumberger recorded the following charges and credits during the first three months of 2013 and 2012:

2013

Although the functional currency of Schlumberger's operations in Venezuela is the US dollar, a portion of the transactions are denominated in local currency. In February 2013, Venezuela's currency was devalued from the prior exchange rate of 4.3 Bolivar Fuertes per US dollar to 6.3 Bolivar Fuertes per US dollar. As a result of this devaluation, Schlumberger recorded a pretax and after-tax foreign currency loss of \$92 million during the first quarter of 2013. This amount is classified in *Restructuring & other* in the *Consolidated Statement of Income*.

2012

Schlumberger recorded \$15 million of pretax merger and integration-related charges (\$13 million after-tax) in connection with the August 27, 2010 acquisition of Smith International, Inc. This amount is classified in *Merger & integration* in the *Consolidated Statement of Income*.

3. Earnings Per Share

The following is a reconciliation from basic earnings per share of Schlumberger to diluted earnings per share of Schlumberger:

	2013			(Stated in millions, except per share amounts)

Table of Contents

The estimated fair value of Schlumberger's *Long-term Debt* at March 31, 2013 and December 31, 2012, based on quoted market prices, was \$8.5 billion and \$9.9 billion, respectively.

10. Derivative Instruments and Hedging Activities

Schlumberger is exposed to market risks related to fluctuations in foreign currency exchange rates, commodity prices and interest rates. To mitigate these risks, Schlumberger utilizes derivative instruments. Schlumberger does not enter into derivative transactions for speculative purposes.

Foreign Currency Exchange Rate Risk

As a multinational company, Schlumberger conducts business in more than 85 countries. Schlumberger's functional currency is primarily the US dollar, which is consistent with the oil and gas industry. However, outside the United States, a significant portion of Schlumberger's expenses is incurred in foreign currencies. Therefore, when the US dollar weakens (strengthens) in relation to the foreign currencies of the countries in which Schlumberger conducts business, the US dollar reported expenses will increase (decrease).

Schlumberger is exposed to risks on future cash flows to the extent that local currency expenses exceed revenues denominated in local currency that are other than the functional currency. In addition, Schlumberger is also exposed to risks on future cash flows relating to certain of its long-term debt which is denominated in currencies other than the functional currency. Schlumberger uses foreign currency forward contracts and foreign currency options to provide a hedge against a portion of these cash flow risks. These contracts are accounted for as cash flow hedges, with the effective portion of changes in the fair value of the hedge recorded on the *Consolidated Balance Sheet* and in *Accumulated Other Comprehensive Loss*. Amounts recorded in *Accumulated Other Comprehensive Loss* are reclassified into earnings in the same period or periods that the hedged item is recognized in earnings. The ineffective portion of changes in the fair value of hedging instruments, if any, is recorded directly to earnings.

At March 31, 2013, Schlumberger recognized a cumulative net \$44 million loss in *Equity* relating to revaluation of foreign currency forward contracts and foreign currency options designated as cash flow hedges, the majority of which is expected to be reclassified into earnings within the next 12 months.

Schlumberger is also exposed to changes in the fair value of assets and liabilities which are denominated in currencies other than the functional currency. Schlumberger uses foreign currency forward contracts and foreign currency options to hedge this exposure as it relates to certain currencies. These contracts are accounted for as fair value hedges with the fair value of the contracts recorded on the *Consolidated Balance Sheet* and changes in the fair value recognized in the *Consolidated Statement of Income* along with the change in fair value of the hedged item.

At March 31, 2013, contracts were outstanding for the US dollar equivalent of \$7.2 billion in various foreign currencies, of which \$3.9 billion relate to hedges of debt denominated in currencies other than the functional currency.

Commodity Price Risk

Schlumberger is exposed to the impact of market fluctuations in the price of certain commodities, such as fuel. Schlumberger utilizes option contracts to manage a small percentage of the price risk associated with forecasted fuel purchases. The objective of these contracts is to reduce the variability of cash flows associated with the forecasted purchase of those commodities. These contracts do not qualify for hedge accounting treatment and therefore, changes in the fair value of the option contracts are recorded directly to earnings.

The notional amount of outstanding option commodity contracts was \$7 million at March 31, 2013.

Table of Contents*Interest Rate Risk*

Schlumberger is subject to interest rate risk on its debt and its investment portfolio. Schlumberger maintains an interest rate risk management strategy that uses a mix of variable and fixed rate debt combined with its investment portfolio and occasionally interest rate swaps to mitigate the exposure to changes in interest rates.

At March 31, 2013, Schlumberger had fixed rate debt aggregating \$9.5 billion and variable rate debt aggregating \$1.6 billion.

Short-term investments and *Fixed income investments, held to maturity*, totaled \$3.7 billion at March 31, 2013, and were comprised primarily of money market funds, eurodollar time deposits, certificates of deposit, commercial paper, euro notes and Eurobonds, and were substantially all denominated in US dollars. The carrying value of these investments approximated fair value, which was estimated using quoted market prices for those or similar investments.

The fair values of outstanding derivative instruments are summarized as follows:

	<i>(Stated in millions)</i> Fair Value of Derivatives		<i>Consolidated Balance Sheet Classification</i>

Schlumberger recorded pretax charges of \$92 million outside of the US during the first quarter of 2013 and pretax charges of \$15 million during the first quarter of 2012 (\$11 million in the US and \$4 million outside of the US).

These charges are included in the table above and are more fully described in Note 2 *Charges and Credits*.

12. Contingencies

Edgar Filing: SCHLUMBERGER LTD /NV/ - Form 10-Q

In 2009, Schlumberger learned that United States officials began a grand jury investigation and an associated regulatory inquiry, both related to certain Schlumberger operations in specified countries that are subject to United States trade and economic sanctions. Also in 2009, prior to being acquired by Schlumberger, Smith received an administrative subpoena with respect to its historical business practices in certain countries that are subject to United States trade and economic sanctions. Governmental agencies and authorities have a broad range

Table of Contents

of civil and criminal penalties that they may seek to impose for violations of trade and economic sanction laws including, but not limited to, disgorgement, fines, penalties and modifications to business practices. In recent years, these agencies and authorities have obtained a wide range of penalties in settlements with companies arising from trade and economic sanction investigations, including in some cases fines and other penalties in the tens and hundreds of millions of dollars. Schlumberger is cooperating with the governmental authorities and cannot currently predict the outcome or estimate the possible impact of the ultimate resolution of these matters.

On April 20, 2010, a fire and explosion occurred onboard the semisubmersible drilling rig *Deepwater Horizon*, owned by Transocean Ltd. and under contract to a subsidiary of BP plc. Pursuant to a contract between M-I SWACO and BP, M-I SWACO provided certain services under the direction of BP. A number of legal actions, certain of which named an M-I SWACO entity as a defendant, were filed in connection with the *Deepwater Horizon* incident. Many of these claims were consolidated into multidistrict litigation pending in federal court (the MDL). During the first quarter of 2013, the federal court entered its order dismissing all claims against M-I SWACO that were consolidated as part of the MDL.

Schlumberger and its subsidiaries are party to various other legal proceedings from time to time. A liability is accrued when a loss is both probable and can be reasonably estimated. Management believes that the probability of a material loss is remote. However, litigation is inherently uncertain and it is not possible to predict the ultimate disposition of these proceedings.

16. Discontinued Operations

During the second quarter of 2012, Schlumberger sold its Wilson distribution business to National Oilwell Varco Inc. (NOV) for \$906 million in cash.

During July 2012, Schlumberger completed the sale of its 56% interest in CE Franklin Ltd. to NOV for \$122 million in cash.

As Wilson and CE Franklin comprised Schlumberger's entire Distribution segment, the results of this segment were classified as discontinued operations in the *Consolidated Statement of Income*.

The following table summarizes the results of these discontinued operations (in millions):

(Smith).

Table of Contents

OILFIELD SERVICES

First-quarter revenue of \$10.7 billion decreased 5% sequentially principally due to the strong year-end product, software and multiclient sales in the fourth quarter of 2012 and the seasonal activity slowdowns during the first quarter. Sequentially, Reservoir Characterization Group revenue decreased 11% to \$2.8 billion, Production Group revenue decreased 4% to \$3.8 billion and Drilling Group revenue was flat at \$4.1 billion. Geographically, International revenue of \$7.3 billion decreased \$347 million, or 5%, while North America revenue of \$3.3 billion declined \$133 million, or 4%. The strong year-end product, software and multiclient sales in the fourth quarter of 2012 accounted for more than half of the sequential decline in revenue while the rest of the decline reflected the seasonal activity slowdowns in the North Sea, Russia and China, weather-related work delays in the Brunei, Malaysia & Philippines and Australasia GeoMarkets and lower pricing as a result of excess capacity in US land. However, these sequential effects were partially offset by strong exploration and drilling activity in Angola, and strong winter project activity in Western Canada & Alaska.

First-quarter pretax operating income of \$2.0 billion decreased 6% sequentially. International pretax operating income of \$1.5 billion and North America pretax operating income of \$627 million both declined 4% sequentially.

Pretax operating margin of 19.0% decreased 37 basis points (bps) sequentially. International pretax operating margin was stable at 20.5% with strong performances in Latin America and the Middle East & Asia offsetting a decline in Europe/CIS/Africa. North America pretax operating margin was essentially flat at 19.1%. By segment, the Drilling Group pretax operating margin increased to 17.9% while the Reservoir Characterization Group pretax operating margin decreased to 27.0% and the Production Group pretax operating margin was flat at 15.1%.

Reservoir Characterization Group

First-quarter revenue of \$2.8 billion decreased 11% sequentially. Pretax operating income of \$758 million was 18% lower compared to the prior quarter.

Sequentially, the revenue decrease was mainly due to the prior quarter's strong year-end WesternGeco multiclient and Schlumberger Information Solutions (SIS) software sales while Wireline revenue was down due to activity slowdown in Latin America and adverse weather conditions in Asia and Russia.

Pretax operating margin of 27.0% decreased 215 bps sequentially, due to the absence of the effect of the seasonal year-end SIS software sales and WesternGeco multiclient revenue.

Drilling Group

First-quarter revenue of \$4.1 billion was flat sequentially. Pretax operating income of \$741 million was 7% higher than the prior quarter.

Sequentially, a seasonal decline in M-I SWACO revenue was offset by higher revenues from Drilling & Measurements services, on improving pricing from a more favorable technology mix and increased activity in Europe/CIS/Africa Area and the Middle East.

Pretax operating margin of 17.9% increased 111 bps as a result of better pricing from a higher-technology mix for Drilling & Measurements services and improved profitability in Integrated Product Management (IPM) projects in the Middle East.

Production Group

First-quarter revenue of \$3.8 billion decreased 4% sequentially. Pretax operating income of \$573 million was 3% lower sequentially.

Table of Contents

The sequential revenue decline was primarily due to lower Completions and Artificial Lift product sales following their strong year-end highs. In addition, Well Services revenues were also lower due to weaker pricing as a result of excess capacity in US land despite an increase in stage count due to Western Canada winter activity gains.

Pretax operating margin of 15.1% was flat sequentially as improved profitability for Schlumberger Production Management (SPM) project-related activities in Latin America and improved Well Services results in both the US Gulf of Mexico and the International Areas were offset by pricing weakness in US land.

OILFIELD SERVICES

First-quarter revenue of \$10.7 billion increased 8% year-on-year with strong growth in all Product Groups. Geographically, International revenue of \$7.3 billion grew \$853 million, or 13% year-on-year, while North America revenue of \$3.3 billion declined \$144 million, or 4%, year-on-year.

The International revenue growth, which outpaced the 7% rig count increase, was led by the Middle East & Asia with revenue of \$2.5 billion growing 21%, mainly from robust results across all Technologies in Saudi Arabia, strong IPM results in Iraq, and sustained land and offshore drilling activity in the Australasia and China GeoMarkets. Europe/CIS/Africa revenue of \$2.9 billion increased 11%, led by the Sub-Sahara Africa region on strong development and exploration drilling. The Russia and Central Asia region saw strong activity while the North Sea GeoMarket posted firm growth as activity migrated from exploration to development and production-related projects. Latin America revenue of \$1.9 billion grew 8%, mainly in Ecuador from solid progress on the SPM Shushufindi project. Strong revenue was also reported by the Mexico & Central America and the Argentina, Bolivia & Chile GeoMarkets. North America revenue of \$3.3 billion decreased 4% mainly from land activity, which was down 11% year-on-year while offshore was up 26%. The increase in offshore revenue resulted from higher drilling activity as the number of deepwater rigs increased by more than 30% year-on-year in the US Gulf of Mexico. The decline in land revenue was mainly due to pricing weakness for both pressure pumping services and for other Technologies as overall rig count declined by 15% year-on-year.

Year-on-year, pretax operating margin of 19.0% declined 59 bps, as International pretax operating margin improved 135 bps to 20.5% while North America pretax operating margin declined 356 bps to 19.1%. Middle East & Asia showed a 125 bps year-on-year margin improvement to reach 24.3%, Europe/CIS/Africa increased by 120 bps to 17.8%, and Latin America improved by 123 bps to 19.5%. The decline in North America margin was mainly due to pricing pressure for Well Services production technologies on land, while the expansion in International margin was due to strong contributions from Testing Services and Drilling & Measurements Technologies on improved profitability from higher offshore exploration and drilling activity. Improved profitability of IPM and SPM project-related activities in the Latin America and Middle East & Asia Areas also contributed to the expanded international margin. By segment, Reservoir Characterization Group pretax operating margin increased 94 bps to 27.0% due to improved profitability in Testing Services while the pretax operating margin of the Drilling Group increased 57 bps to 17.9% from better margins from Drilling & Measurements. Production Group pretax operating margin declined 237 bps to 15.1% due mainly to lower prices for Well Services production technologies in US land, although the effect of this was partially offset by improved profitability on SPM projects in Latin America.

Reservoir Characterization Group

First-quarter revenue of \$2.8 billion increased 9% year-on-year led by double-digit growth in Testing Services activity and SIS software sales, which were driven by improved offshore exploration activity and increased sales across all international Areas. WesternGeco grew on higher marine vessel utilization at better pricing and improved UniQ and conventional land seismic productivity in the Middle East and Australia.

Pretax operating margin of 27.0% increased 94 bps year-on-year due mainly to improved profitability in Testing Services which benefited from high-margin offshore exploration activity.

Drilling Group

First-quarter revenue of \$4.1 billion grew 9% year-on-year led by robust growth in Drilling & Measurements technologies as offshore drilling activity strengthened in the US Gulf of Mexico, Sub-Sahara Africa, Sakhalin, Asia and Australia, and as rig count grew in key international land markets in Saudi Arabia, China and Australia. Drilling Tools & Remedial activity increased across all Areas and IPM grew strongly as projects in Iraq and Australia ramped up.

Table of Contents

Pretax operating margin of 17.9% increased 57 bps year-on-year reflecting increased drilling activity in the US Gulf of Mexico and the international Areas, and more favorable pricing from an improved technology mix, particularly in Drilling & Measurements.

Production Group

First-quarter revenue of \$3.8 billion increased 7% year-on-year led by double-digit growth in Artificial Lift, Well Intervention, Completions and Well Services production technologies in the international Areas. Fraco and the Subsea Services Technologies posted growth of more than 50% while SPM revenue more than doubled as projects in Latin America came in ahead of plans. The Group revenue increase, however, was partly reduced by a decline in pressure pumping revenues in North America land.

Pretax operating margin of 15.1% declined 237 bps mainly due to pricing weakness in Well Services production technologies in US land, although the effect of this was partially offset by improved profitability in SPM projects in Latin America.

INTEREST & OTHER INCOME

Interest & other income consisted of the following for the first quarter ended March 31, 2013 and 2012:

	<i>(Stated in millions)</i>	
	First Quarter	
	2013	2012
Equity in net earnings of affiliated companies	\$ 27	\$ 37

OTHER

Research & engineering and *General & administrative* expenses, as a percentage of *Revenue*, for the first quarter ended March 31, 2013 and 2012 were as follows:

	First Quarter	
	2013	2012
Research & engineering	2.8%	2.8%
General & administrative	0.9%	1.0%

The effective tax rate for the first quarter of 2013 was 24.5% compared to 23.7% for the same period of 2012. This increase was primarily attributable to the impact of the \$92 million charge relating to the foreign currency devaluation in Venezuela that was recorded in the first quarter of 2013 which had no related tax benefit.

CHARGES AND CREDITS

Schlumberger recorded the following charges during the first three months of 2013 and 2012.

2013

Although the functional currency of Schlumberger's operations in Venezuela is the US dollar, a portion of the transactions are denominated in local currency. In February 2013, Venezuela's currency was devalued from the prior exchange rate of 4.3 Bolivar Fuertes per US dollar to 6.3 Bolivar Fuertes per US dollar. Although this devaluation does result in a reduction in the US dollar reported amount of local currency denominated revenue and expenses, the impact is not material to Schlumberger's consolidated financial statements. As a result

Table of Contents

of this devaluation, Schlumberger recorded a pretax and after-tax foreign currency loss of \$92 million during the first quarter of 2013. This amount is classified in *Restructuring & other* in the *Consolidated Statement of Income*.

2012

Schlumberger recorded \$15 million of pretax merger and integration-related charges (\$13 million after-tax) in connection with the 2010 acquisition of Smith. This amount is classified in *Merger & integration* in the *Consolidated Statement of Income*.

Key liquidity events during the first three months of 2013 and 2012 included:

On April 17, 2008, the Schlumberger Board of Directors approved an \$8 billion share repurchase program for shares of Schlumberger common stock, to be acquired in the open market before December 31, 2011. On July 21, 2011, the Schlumberger Board of Directors approved an extension of this repurchase program to December 31, 2013. Schlumberger had repurchased \$7.3 billion of shares under this program as of March 31, 2013.

The following table summarizes the activity, during the three months ended March 31, under this share repurchase program:

Cash flow provided by operations was \$1.1 billion in the first three months of 2013 compared to \$0.8 billion in the first three months of 2012 reflecting a lower increase in working capital requirements quarter-on-quarter.

Capital expenditures were \$0.9 billion in the first three months of 2013 compared to \$1.0 billion during the first three months of 2012. Capital expenditures for the full year of 2013 are expected to be approximately \$3.9 billion as compared to \$4.7 billion in 2012.

At times in recent quarters, Schlumberger has experienced delays in payments from its national oil company customer in Venezuela. Schlumberger operates in more than 85 countries. At March 31, 2013, only five of those countries (including Venezuela) individually accounted for greater than 5% of Schlumberger's accounts receivable balance of which only one, the United States, represented greater than 10%.

As of March 31, 2013 Schlumberger had \$5.6 billion of cash and short-term investments on hand. Schlumberger had separate committed debt facility agreements aggregating \$4.1 billion with commercial banks, of which \$3.8 billion was available and unused as of March 31, 2013. This included \$3.5 billion of committed facilities which support commercial paper programs in the United States and Europe. Schlumberger believes that these amounts are sufficient to meet future business requirements for at least the next 12 months.

Schlumberger had no commercial paper outstanding as of March 31, 2013.

Other Matters

During the first quarter of 2013, certain non-US subsidiaries of Schlumberger provided oilfield services to the National Iranian Oil Company and certain of its affiliates (NIOC). Schlumberger has not bid on any new contracts relating to Iran's petroleum production since March 2009. Schlumberger's first-quarter 2013 revenue attributable to this activity was \$98 million, which resulted in net income of \$56 million in its consolidated financial statements. Schlumberger intends to discontinue such activity in Iran in 2013 and is currently winding down its operations there. As a result, Schlumberger anticipates presenting the results of this business as a discontinued operation once the wind down is complete.

Schlumberger's activity in Iran included obtaining services from and engaging in other dealings with the government of Iran that are incidental to operating in Iran, and the expenses of which are reflected in the net income disclosed above. These services and other dealings consisted of paying taxes, duties, license fees and other typical governmental charges, along with payments for utilities, transportation, hotel accommodations, facility rentals, telecommunications services, newspaper advertisements, recreational and fitness memberships, and the purchase of routine office and similar supplies from entities associated with the government of Iran. Collections of amounts owed to Schlumberger were received in part by depository accounts held by two non-US subsidiaries of Schlumberger at a branch of Bank Saderat Iran (Saderat), and in part by a depository account held by one of such non-US subsidiaries at Bank Tejarat (Tejarat) in Tehran. The accounts at

Saderat are

maintained solely for the deposit by NIOC of amounts owed to non-US subsidiaries of Schlumberger. The account at Tejarat is maintained also for payment of expenses in connection with operating in Iran, such as payroll expenses, rental payments and taxes. In addition, NIOC maintains bank accounts at Bank Melli Iran (Melli) through which it made payments to a non-US subsidiary of Schlumberger for services provided in Iran under letters of credit issued by Melli. Schlumberger maintains no bank accounts at Melli. Schlumberger will discontinue its dealings with Melli, Saderat and Tejarat following the receipt of all amounts owed to Schlumberger for services in Iran.

FORWARD-LOOKING STATEMENTS

This Form 10-Q, and other statements we make contain forward-looking statements within the meaning of the federal securities laws, which include any statements that are not historical facts, such as our forecasts or expectations regarding business outlook; growth for Schlumberger as a whole and for each of its segments (and for specified products or geographic areas within each segment); oil and natural gas demand and production growth; oil and natural gas prices; improvements in operating procedures and technology; capital expenditures by Schlumberger and the oil and gas industry; the business strategies of Schlumberger's customers; future global economic conditions; and future results of operations. These statements are subject to risks and uncertainties, including, but not limited to, global economic conditions; changes in exploration and production spending by Schlumberger's customers and changes in the level of oil and natural gas exploration and development; general economic, political and business conditions in key regions of the world; pricing erosion; weather and seasonal factors; operational delays; production declines; changes in government regulations and regulatory requirements, including those related to offshore oil and gas exploration, radioactive sources, explosives, chemicals, hydraulic fracturing services and climate-related initiatives; the inability of technology to meet new challenges in exploration; and other risks and uncertainties detailed in our first-quarter 2013 earnings release, our most recent Form 10-K and other filings that we make with the Securities and Exchange Commission. If one or more of these or other risks or uncertainties materialize (or the consequences of such a development changes), or should our underlying assumptions prove incorrect, actual outcomes may vary materially from those reflected in our forward-looking statements. Schlumberger disclaims any intention or obligation to update publicly or revise such statements, whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

For quantitative and qualitative disclosures about market risk affecting Schlumberger, see Item 7A, Quantitative and Qualitative Disclosures about Market Risk, of the Schlumberger Annual Report on Form 10-K for the fiscal year ended December 31, 2012. Schlumberger's exposure to market risk has not changed materially since December 31, 2012.

Item 4. Controls and Procedures.

Schlumberger has carried out an evaluation under the supervision and with the participation of Schlumberger's management, including the Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), of the effectiveness of Schlumberger's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)) as of the end of the period covered by this report. Based on this evaluation, the CEO and the CFO have concluded that, as of the end of the period covered by this report, Schlumberger's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports that Schlumberger files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Schlumberger's disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is accumulated and communicated to its management, including the CEO and the CFO, as appropriate, to allow timely decisions regarding required disclosure. There has been no change in Schlumberger's internal control over financial reporting that occurred during the quarter to which this report relates that has materially affected, or is reasonably likely to materially affect, Schlumberger's internal control over financial reporting.

Issuer Repurchases of Equity Securities

On April 17, 2008, the Schlumberger Board of Directors (the Board) approved an \$8 billion share repurchase program for Schlumberger common stock, which may be acquired in the open market or in negotiated transactions. On July 21, 2011, the Board approved an extension of this repurchase program to December 31, 2013. As of March 31, 2013, \$0.7 billion remained available for repurchase under the existing repurchase authorization.

Schlumberger's common stock repurchase program activity for the three months ended March 31, 2013 was as follows:

(Stated in thousands, except per share amounts)

	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced program	Maximum value of shares that may yet be purchased under the program
January 1 through January 31, 2013		\$		\$ 879,372
February 1 through February 28, 2013	1,193.6	\$ 78.84	1,193.6	\$ 785,270
March 1 through March 31, 2013	1,289.7	\$ 76.52	1,289.7	\$ 686,581
	2,483.3	\$ 77.63	2,483.3	

In connection with the exercise of stock options under Schlumberger's incentive compensation plans, Schlumberger routinely receives shares of its common stock from optionholders in consideration of the exercise price of the stock options. Schlumberger does not view these transactions as requiring disclosure under this Item as the number of shares of Schlumberger common stock received from optionholders is not material.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

The barite and bentonite mining operations of M-I LLC, an indirect wholly-owned subsidiary, are subject to regulation by the federal Mine Safety and Health Administration under the Federal Mine Safety and Health Act of 1977. Information concerning mine safety violations or other regulatory matters required by section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K is included in Exhibit 95 to this Report.
