This communication may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and Canadian securities laws. These forward-looking statements include, but are not limited to, statements regarding Valeant Pharmaceuticals International, Inc.'s (Valeant) offer to acquire Allergan, Inc. (Allergan), its financing of the proposed transaction, its expected future performance (including expected results of operations and financial guidance), and the combined company's future financial condition, operating results, strategy and plans. Forward-looking statements may be identified by the use of the words

anticipates, expects, intends, plans, should, could, would, may, will, believes, estimates, potential, target, opportunity, tentative, positioning, designed, create, predict, project, seek, ongoing, upside, increases or continue and variations or similar expressions. These statements are based upon the current expectations and beliefs of management and are subject to numerous assumptions, risks and uncertainties that change over time and could cause actual results to differ materially from those described in the forward-looking statements. These assumptions, risks and uncertainties include, but are not limited to, assumptions, risks and uncertainties discussed in the company's most recent annual or quarterly report filed with the Securities and Exchange Commission (the SEC) and the Canadian Securities Administrators (the CSA) and assumptions, risks and uncertainties relating to the proposed merger, as detailed from time to time in Valeant's filings with the SEC and the CSA, which factors are incorporated herein by reference. Important factors that could cause actual results to differ materially from the forward-looking statements we make in this communication are set forth in other reports or documents that we file from time to time with the SEC and the CSA, and include, but are not limited to:

Forward-looking statements (2/2)

the effects of governmental regulation on our business or potential business combination transaction;
ability to obtain regulatory approvals and meet other closing conditions to the transaction, including all necessary stockholder approvals, on a timely basis;
our ability to sustain and grow revenues and cash flow from operations in our markets and to maintain and grow our customer base, the need for innovation and the related capital expenditures and the unpredictable economic conditions in the United States and other markets;
the impact of competition from other market participants;
the development and commercialization of new products;
the availability and access, in general, of funds to meet our debt obligations prior to or when they become due and to fund our operations and necessary capital expenditures, either through (i) cash on hand, (ii) free cash flow, or (iii) access to the capital or credit markets;
our ability to comply with all covenants in our indentures and credit facilities, any violation of which, if not cured in a timely manner, could trigger a default of our other obligations under cross-default provisions; and
the
risks
and
uncertainties
detailed
by
Allergan

with
respect
to
its
business
as
described
in
its
reports
and
documents filed with the SEC.

All forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by this cautionary statement. Readers are cautioned not to place undue reliance on any of these forward-looking statements. These forward-looking statements speak only as of the date hereof. Valeant undertakes no obligation to update any of these forward-looking statements to reflect events or circumstances after the date of this communication or to reflect actual outcomes.

Valeant Operating Principles

1. Put patients and our customers first by maintaining the highest ethical standards in the industry
2. Select high-growth business segments (therapeutic areas and geographies) where the healthcare professional is still the primary decision maker
3. Maintain a bias toward durable products that are largely cash pay, or are reimbursed through private insurance
4. Focus our resources on bringing new products to the market (output), not R&D spend (input)
5. Maintain a decentralized operating model to ensure decisions are made close to the customer
6. Focus our promotional spending on customer-facing activities
7. Measure all of our operating units on organic growth and cash flow generation
8. Require Internal Rates of Return (IRR) significantly above our cost of capital, coupled with short-term cash paybacks for all of our deals
9. Directly link senior management compensation to long-term shareholder returns
10. Ensure tight controls and rigorous compliance standards while avoiding overspending

Valeant Emerging Market portfolio

Diversified geographic mix including Poland, Russia & CIS, Turkey, China, Brazil, Mexico, Indonesia, South Africa, Vietnam, and Middle East

Extensive experience selling branded generics, OTCs, and innovative products

Tailored local market strategies

Sales forces with strong physician and pharmacy relationships

Augment selling efforts with direct to consumer advertising

Branded generic products are equivalent to US Healthcare OTCs (i.e., Advil vs. Perrigo Ibuprofen)

Recommended by physicians & largely cash-pay

Typically 10-20% premium over pure generics

Products targeting the growing middle class

Doctors recommend and patients make brand decisions based on perceptions of quality, value, and brand loyalty

No patent cliffs, launching 300+ branded generic products per year across markets

What is a durable healthcare product?

Products with similar characteristics to branded consumer products

Established brand names with brand equity

Lack of reliance on patent or regulatory exclusivity

Physicians or patients are making the purchasing decision

Mostly cash or 3 party commercial pay

Within consumer goods, healthcare OTCs offer the most attractive margins

Included product categories

Physician-dispensed products (e.g., aesthetics, IOLs, contact lenses, dental products)

Consumer products (e.g., Biotrue, Renu)

Emerging market branded generics, OTCs, and innovative products

(e.g., Bedoyceta, Bioscard, Monopril)

Off-patent brands & generic drugs (e.g., Virazole)

Our observations on Allergan R&D

~80%+ of Allergan current revenue was sourced externally and ~50% was originally sourced prior to 1998

Based on our project-by-project estimates (verified by 3 party consultants), bringing Allergan line extensions and lower-risk development (since 1998) to market would have cost ~\$2B (approx. \$125M per year) under the Valeant model

Over this time period, Allergan spent \$9.5B, including on higher-risk programs

Allergan R&D track record includes ~35 failures over this same time frame

The industry track-record on R&D over the past two decades is also not impressive

Next Steps

We would expect to engage in discussion with the company to negotiate the transaction

We intend to meet with shareholders from both Valeant & Allergan

We encourage Allergan shareholders to communicate views to both Valeant and Allergan management

63

Why the transaction is compelling for Allergan shareholders

Compelling premium and expected long-term returns through continued ownership

Each Allergan share receives: \$48.30 in cash + 0.83 Valeant shares

43% ownership

Continued high single-digit organic growth

\$2.7B+ in annual cost synergies + additional revenue synergies

High single-digit tax rate

Yearly \$0.20 per share dividend expected

19 US launches in 2014 with estimated peak sales potential:\$1.6B-2.8B

Shareholder friendly capital allocation: accretive business development, debt reduction, and

share buybacks

Diversification

Greater portfolio diversification with increased durability

Reduced reliance on blockbuster patents

Low risk R&D

Focus on output vs. input

Development of line extensions and reformulations

Strong late-stage pipeline with estimated peak sales potential of \$2.0B-3.2B

High-return approach to business development

Strong track record of high-return business development

Target 20%+ IRRs at statutory tax rates and quick payback periods

Multi-billion dollars per year in free cash flow to deploy

64

Valeant + Allergan

strategically compelling transaction

Unrivaled portfolio in Ophthalmology, Dermatology, and Aesthetics

Great for patients & physicians around the world

High single-digit organic growth rate for foreseeable future

25%-30% pro forma 2014* Cash EPS accretion, year 2 and beyond expected 15-20%+ Cash

EPS growth depending on deployment of free cash flow

\$2.7B+ in annual operating cost synergies, not including significant revenue synergies

~80% in first 6 months with the remaining ~20% in the following 12 months

Maintaining \$300M+ in annual R&D spend to complete high-probability projects

High single-digit tax rate for combined company in addition to cost synergies

Pershing Square is Allergan's largest shareholder with a 9.7% stake, supporting the transaction and will elect for 100% stock

Delivered merger agreement, no antitrust uncertainty, committed financing for \$15.5B

Flexible with any and all social issues
