## Section 1 Conflict Minerals Disclosures

### Item 1.01 Conflict Minerals Disclosure and Report

#### Conflict Minerals Disclosure

Sealed Air Corporation ( Sealed Air, the Company, we or our ) has determined that during the 2013 calendar year, we manufactured and contracted to manufacture certain products containing tin, tungsten, tantalum and/or gold (referred to hereafter as conflict minerals or 3TG ). We have further determined that these minerals are necessary to the functionality or production of these products.

We conducted a Reasonable Country of Origin Inquiry (RCOI) to assess whether the necessary conflict minerals in our products originated from the Covered Countries<sup>1</sup>. Under our RCOI methodology, Sealed Air sought to identify suppliers of components or materials to us that contain 3TG. In late 2012 Sealed Air created a cross-functional task force to address the requirements of the Securities and Exchange Commission minerals rules under Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act ( Dodd-Frank Act ). Following an internal review of our products to determine those that may contain 3TG, we contacted all of the suppliers relating to those products. These suppliers were then surveyed using a template inquiry letter developed by our task force to address the requirements of the Dodd-Frank Act.

Sealed Air sent surveys to over 500 suppliers and received an approximate 99% response rate. We reviewed the responses and followed-up with suppliers as necessary to obtain additional information or clarification regarding the responses. Approximately 97% of the suppliers from whom we received survey responses indicated that they did not have conflict minerals in the goods they provided us or that the conflict minerals they supplied to us did not originate in the Covered Countries. As to the remaining suppliers, we have no reason to believe that our necessary conflict minerals may have originated in the Covered Countries.
