Form 424B2
October 31, 2016

Filed Pursuant to Rule 424(b)(2)

Registration Statement No.
333-202584

(To Prospectus dated April 30, 2015,

Prospectus Supplement dated April
30, 2015 and

Product Supplement EQUITY
INDICES SUN-1 dated

June 25, 2015)

859,343 Units	Pricing Date	October 27, 2016
\$10 principal amount per unit	Settlement Date	November 3, 2016
CUSIP No. 13607R530	Maturity Date	October 25, 2019

Market-Linked Step Up Notes Linked to the Dow

Jones Industrial Average®

- ; Maturity of approximately three years
- ; The Starting Value will be the lowest closing level of the Index during the one month period beginning on the pricing date
- ; If the Index is flat or increases up to the Step Up Value, a return of 19.50%
- ; If the Index increases above the Step Up Value, a return equal to the percentage increase in the Index
- ; 1-to-1 downside exposure to decreases in the Index, with up to 100% of your principal at risk
- ; All payments occur at maturity and are subject to the credit risk of Canadian Imperial Bank of Commerce
- ; No periodic interest payments

- ; In addition to the underwriting discount set forth below, the notes include a hedging-related charge of \$0.075 per unit. See Structuring the Notes

- ; Limited secondary market liquidity, with no exchange listing

j The notes are unsecured debt securities and are not savings accounts or insured deposits of a bank. The notes are not insured or guaranteed by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other governmental agency of the United States, Canada, or any other jurisdiction

The notes are being issued by Canadian Imperial Bank of Commerce (CIBC). There are important differences between the notes and a conventional debt security, including different investment risks and certain additional costs. See Risk Factors and Additional Risk Factors beginning on page TS-6 of this term sheet and Risk Factors beginning on page PS-7 of product supplement EQUITY INDICES SUN-1.

The initial estimated value of the notes as of the pricing date is \$9.640 per unit, which is less than the public offering price listed below. See Summary on the following page, Risk Factors beginning on page TS-6 of this term sheet and Structuring the Notes on page TS-12 of this term sheet for additional information. The actual value of your notes at any time will reflect many factors and cannot be predicted with accuracy.

None of the Securities and Exchange Commission (the SEC), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus (as defined below) is truthful or complete. Any representation to the contrary is a criminal offense.

	<u>Per Unit</u>	<u>Total</u>
Public offering price	\$10.000	\$8,593,430.000
Underwriting discount	\$ 0.225	\$193,352.175
Proceeds, before expenses, to CIBC	\$ 9.775	\$8,400,077.825

The notes:

Are Not FDIC Insured

May Lose Value

**Are Not Bank
Guaranteed**

Merrill Lynch & Co.

October 27, 2016

Market-Linked Step Up Notes

Linked to the Dow Jones Industrial Average[®], due October 25, 2019

Summary

The Market-Linked Step Up Notes Linked to the Dow Jones Industrial Average[®], due October 25, 2019 (the notes) are our senior unsecured debt securities. The notes are not guaranteed or insured by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other governmental agency in the United States, Canada or any other jurisdiction or secured by collateral. **The notes will rank equally with all of our other unsecured and unsubordinated debt. Any payments due on the notes, including any repayment of principal, will be subject to the credit risk of CIBC.** The notes provide you with a Step Up Payment if the Ending Value of the Market Measure, which is the Dow Jones Industrial Average[®] (the Index), is equal to or greater than its Starting Value (as determined below), but is not greater than the Step Up Value. If the Ending Value is greater than the Step Up Value, you will participate on a 1-for-1 basis in the increase in the level of the Index above the Starting Value. If the Ending Value is less than the Starting Value, you will lose all or a portion of the principal amount of your notes. Payments on the notes, including the amount you receive at maturity, will be calculated based on the \$10 principal amount per unit and will depend on the performance of the Index, subject to our credit risk. See Terms of the Notes below.

The economic terms of the notes (including the Step Up Payment) are based on our internal funding rate, which is the rate we would pay to borrow funds through the issuance of market-linked notes, and the economic terms of certain related hedging arrangements. Our internal funding rate is typically lower than the rate we would pay when we issue conventional fixed rate debt securities. This difference in funding rate, as well as the underwriting discount and the hedging related charge described below, reduced the economic terms of the notes to you and the initial estimated value of the notes on the pricing date. Due to these factors, the public offering price you pay to purchase the notes is greater than the initial estimated value of the notes.

On the cover page of this term sheet, we have provided the initial estimated value for the notes. This initial estimated value was determined based on our pricing models and was based on our internal funding rate on the pricing date, market conditions and other relevant factors existing at that time, and our assumptions about market parameters. For more information about the initial estimated value and the structuring of the notes, see Structuring the Notes on page TS-12.

Terms of the Notes

Redemption Amount Determination

Issuer:

Canadian Imperial Bank of
Commerce (CIBC)

On the maturity date, you will receive a cash payment per unit determined as follows:

Principal Amount:	\$10.00 per unit
Term:	Approximately three years
Market Measure:	The Dow Jones Industrial Average® (Bloomberg symbol: INDU), a price return index
Starting Value:	The lowest closing level of the Market Measure on any Market Measure Business Day (subject to adjustment as set forth in Other Terms of the Notes on page TS-7 of this term sheet) during the Starting Value Determination Period. The closing level of the Market Measure on the pricing date was 18,169.68. The actual Starting Value will be made available to investors in the notes after the Starting Value has been determined.
Starting Value Determination Period:	The period from and including the pricing date to and including November 28, 2016.
Ending Value:	The closing level of the Market Measure on the scheduled calculation day. The calculation day is subject to postponement in the event of Market Disruption Events, as described beginning on page PS-20 of product supplement EQUITY INDICES SUN-1.
Step Up Value:	119.50% of the Starting Value, rounded to two decimal places. The actual Step Up Value will depend upon the actual Starting Value, and will be made available to investors after the Starting Value has been determined.
Step Up Payment:	

\$1.95 per unit, which represents a return of 19.5% over the principal amount.

Threshold Value: 100% of the Starting Value.

Calculation Day: October 18, 2019

Fees and Charges: The underwriting discount of \$0.225 per unit listed on the cover page and the hedging related charge of \$0.075 per unit described in Structuring the Notes on page TS-12.

Calculation Agent: Merrill Lynch, Pierce, Fenner & Smith Incorporated (MLPF&S).

Market-Linked Step Up Notes

TS-2

Market-Linked Step Up Notes

Linked to the Dow Jones Industrial Average®, due October 25, 2019

The terms and risks of the notes are contained in this term sheet and in the following:

Product supplement EQUITY INDICES SUN-1 dated June 25, 2015:
<http://www.sec.gov/Archives/edgar/data/1045520/000119312515234031/d945997d424b2.htm>

Prospectus dated April 30, 2015 and prospectus supplement dated April 30, 2015:
<http://www.sec.gov/Archives/edgar/data/1045520/000119312515161379/d916405d424b3.htm>

These documents (together, the Note Prospectus) have been filed as part of a registration statement with the SEC, which may, without cost, be accessed on the SEC website as indicated above or obtained from MLPF&S by calling 1-800-294-1322. Before you invest, you should read the Note Prospectus, including this term sheet, for information about us and this offering. Any prior or contemporaneous oral statements and any other written materials you may have received are superseded by the Note Prospectus. Capitalized terms used but not defined in this term sheet have the meanings set forth in product supplement EQUITY INDICES SUN-1. Unless otherwise indicated or unless the context requires otherwise, all references in this document to we, us, our, or similar references are to CIBC.

Investor Considerations

You may wish to consider an investment in the notes if:

- You anticipate that the Index will increase from the Starting Value to the Ending Value.
- You are willing to risk a loss of principal and return if the Index decreases from the Starting Value to the Ending Value.
- You are willing to forgo the interest payments that are paid on conventional interest bearing debt securities.
- You are willing to forgo dividends or other benefits of owning the stocks included in the Index.

⌋ You are willing to accept a limited or no market for sales prior to maturity, and understand that the market prices for the notes, if any, will be affected by various factors, including our actual and perceived creditworthiness, our internal funding rate and fees and charges on the notes.

⌋ You are willing to assume our credit risk, as issuer of the notes, for all payments under the notes, including the Redemption Amount.

The notes may not be an appropriate investment for you if:

⌋ You believe that the Index will decrease from the Starting Value to the Ending Value, or that it will not increase sufficiently over the term of the notes to provide you with your desired return.

⌋ You seek principal repayment or preservation of capital.

⌋ You seek interest payments or other current income on your investment.

⌋ You want to receive dividends or other distributions paid on the stocks included in the Index.

⌋ You seek an investment for which there will be a liquid secondary market.

⌋ You are unwilling or are unable to take market risk on the notes or to take our credit risk as issuer of the notes.

We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

Market-Linked Step Up Notes

Linked to the Dow Jones Industrial Average®, due October 25, 2019

Hypothetical Payout Profile and Examples of Payments at Maturity

Market-Linked Step Up Notes

This graph reflects the returns on the notes, based on the Threshold Value of 100% of the Starting Value, the Step Up Payment of \$1.95 per unit and the Step Up Value of 119.5% of the Starting Value. The green line reflects the returns on the notes, while the dotted gray line reflects the returns of a direct investment in the stocks included in the Index, excluding dividends.

This graph has been prepared for purposes of illustration only.

The following table and examples are for purposes of illustration only. They are based on **hypothetical** values and show **hypothetical** returns on the notes. They illustrate the calculation of the Redemption Amount and total rate of return based on a hypothetical Starting Value of 100, a hypothetical Threshold Value of 100, a hypothetical Step Up Value of 119.50, the Step Up Payment of \$1.95 per unit and a range of hypothetical Ending Values. **The actual amount you receive and the resulting total rate of return will depend on the actual Starting Value, Threshold Value, Ending Value, Step Up Value, and whether you hold the notes to maturity.**

The following examples do not take into account any tax consequences from investing in the notes. For recent actual levels of the Market Measure, see The Index section below. The Index is a price return index and as such the Ending Value will not include any income generated by dividends paid on the stocks included in the Index, which you would otherwise be entitled to receive if you invested in those stocks directly. In addition, all payments on the notes are subject to issuer credit risk.

Ending Value	Percentage Change from the Starting Value to the Ending Value	Redemption Amount per Unit	Total Rate of Return on the Notes
0.00	-100.00%	\$0.00	-100.00%
50.00	-50.00%	\$5.00	-50.00%
80.00	-20.00%	\$8.00	-20.00%

Edgar Filing: CANADIAN IMPERIAL BANK OF COMMERCE /CAN/ - Form 424B2

90.00	-10.00%	\$9.00	-10.00%
94.00	-6.00%	\$9.40	-6.00%
97.00	-3.00%	\$9.70	-3.00%
100.00 ⁽¹⁾⁽²⁾	0.00%	\$11.95 ⁽³⁾	19.50%
102.00	2.00%	\$11.95	19.50%
105.00	5.00%	\$11.95	19.50%
110.00	10.00%	\$11.95	19.50%
119.50 ⁽⁴⁾	19.50%	\$11.95	19.50%
120.00	20.00%	\$12.00	20.00%
130.00	30.00%	\$13.00	30.00%
132.00	32.00%	\$13.20	32.00%
140.00	40.00%	\$14.00	40.00%
150.00	50.00%	\$15.00	50.00%
160.00	60.00%	\$16.00	60.00%

- (1) The **hypothetical** Starting Value of 100 used in these examples has been chosen for illustrative purposes only. The actual Starting Value will be determined after the expiration of the Starting Value Determination Period and will be less than or equal to 18,169.68, which was the closing level of the Market Measure on the pricing date.
- (2) This is the **hypothetical** Threshold Value.
- (3) This amount represents the sum of the principal amount and the Step Up Payment of \$1.95.
- (4) This is the **hypothetical** Step Up Value.

Market-Linked Step Up Notes

Linked to the Dow Jones Industrial Average[®], due October 25, 2019

Redemption Amount Calculation Examples

Example 1

The Ending Value is 90.00, or 90.00% of the Starting Value:

Starting Value: 100.00

Threshold Value: 100.00

Ending Value: 90.00

Redemption Amount per unit

Example 2

The Ending Value is 110.00, or 110.00% of the Starting Value:

Starting Value: 100.00

Step Up Value: 119.50

Ending Value: 110.00

Redemption Amount per unit, the principal amount plus the Step Up Payment, since the Ending Value is equal to or greater than the Starting Value, but less than the Step Up Value.

Example 3

The Ending Value is 132.00, or 132.00% of the Starting Value:

Starting Value: 100.00

Step Up Value: 119.50

Ending Value: 132.00

Redemption Amount per unit

Market-Linked Step Up Notes

Risk Factors

There are important differences between the notes and a conventional debt security. An investment in the notes involves significant risks, including those listed below. You should carefully review the more detailed explanation of risks relating to the notes in the Risk Factors sections beginning on page PS-7 of product supplement EQUITY INDICES SUN-1, page S-1 of the prospectus supplement, and page 1 of the prospectus identified above. We also urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

- ⌋ Depending on the performance of the Index as measured shortly before the maturity date, your investment may result in a loss; there is no guaranteed return of principal.
- ⌋ Your return on the notes may be less than the yield you could earn by owning a conventional fixed or floating rate debt security of comparable maturity.
- ⌋ Your investment return may be less than a comparable investment directly in the stocks included in the Index.
- ⌋ Payments on the notes are subject to our credit risk, and actual or perceived changes in our creditworthiness are expected to affect the value of the notes. If we become insolvent or are unable to pay our obligations, you may lose your entire investment.
- ⌋ Our initial estimated value of the notes is lower than the public offering price of the notes. The public offering price of the notes exceeds our initial estimated value because costs associated with selling and structuring the notes, as well as hedging the notes, all as further described in Structuring the Notes on page TS-12, are included in the public offering price of the notes.
- ⌋ Our initial estimated value does not represent future values of the notes and may differ from others estimates. Our initial estimated value is only an estimate, which was determined by reference to our internal pricing models when the terms of the notes were set. This estimated value was based on market conditions and other relevant factors existing at that time, our internal funding rate on the pricing date and our assumptions about market parameters, which can include volatility, dividend rates, interest rates and other factors. Different pricing models and assumptions could provide valuations for the notes that are greater or less than our initial estimated value. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect. On future dates, the market value of the notes

could change significantly based on, among other things, changes in market conditions, including the value of the Market Measure, our creditworthiness, interest rate movements and other relevant factors, which may impact the price at which MLPF&S or any other party would be willing to buy notes from you in any secondary market transactions. Our estimated value does not represent a minimum price at which MLPF&S or any other party would be willing to buy your notes in any secondary market (if any exists) at any time.

- ‡ Our initial estimated value of the notes was not determined by reference to credit spreads for our conventional fixed-rate debt. The internal funding rate that was used in the determination of our initial estimated value of the notes generally represents a discount from the credit spreads for our conventional fixed-rate debt. The discount is based on, among other things, our view of the funding value of the notes as well as the higher issuance, operational and ongoing liability management costs of the notes in comparison to those costs for our conventional fixed-rate debt. If we were to have used the interest rate implied by our conventional fixed-rate debt, we would expect the economic terms of the notes to be more favorable to you. Consequently, our use of an internal funding rate for market-linked notes had an adverse effect on the economic terms of the notes and the initial estimated value of the notes on the pricing date, and could have an adverse effect on any secondary market prices of the notes.
- ‡ A trading market is not expected to develop for the notes. Neither we nor MLPF&S is obligated to make a market for, or to repurchase, the notes. There is no assurance that any party will be willing to purchase your notes at any price in any secondary market.
- ‡ Our business, hedging and trading activities, and those of MLPF&S and our respective affiliates (including trades in shares of companies included in the Index), and any hedging and trading activities we, MLPF&S or our respective affiliates engage in for our clients' accounts, may affect the market value and return of the notes and may create conflicts of interest with you.
- ‡ The Index Sponsor (as defined below) may adjust the Index in a way that affects its level, and has no obligation to consider your interests.
- ‡ You will have no rights of a holder of the securities represented by the Index, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.
- ‡ While we, MLPF&S or our respective affiliates may from time to time own securities of companies included in the Index, we, MLPF&S and our respective affiliates do not control any company included in the Index, and have not verified any disclosure made by any other company.
- ‡ There may be potential conflicts of interest involving the calculation agent, which is MLPF&S. We have the right to appoint and remove the calculation agent.
- ‡ The U.S. federal income tax consequences of the notes are uncertain, and may be adverse to a holder of the notes. See Summary of U.S. Federal Income Tax Consequences below and U.S. Federal Income Tax Summary beginning on page PS-32 of product supplement EQUITY INDICES SUN-1. For a discussion of the Canadian federal income tax consequences

Market-Linked Step Up Notes

Market-Linked Step Up Notes

Linked to the Dow Jones Industrial Average[®], due October 25, 2019

of investing in the notes, see Certain Income Tax Consequences Certain Canadian Income Tax Considerations in the prospectus supplement dated April 30, 2015, as supplemented by the discussion under Summary of Canadian Federal Income Tax Considerations herein.

Additional Risk Factors

The Starting Value will be determined after the pricing date of the notes.

The Starting Value of the Market Measure will be determined based on the lowest closing level of the Index during the Starting Value Determination Period. The Starting Value Determination Period will, as described above, end on a day that is approximately one month after the pricing date for the notes. As a result, the Starting Value will not be determined, and neither you nor we (nor MLPF&S or any of our respective affiliates) can be certain of what the Starting Value will be, until after the pricing date and the settlement date of the notes.

Other Terms of the Notes

Occurrence of a Market Disruption Event during the Starting Value Determination Period

If a Market Disruption Event occurs on any Market Measure Business Day during the Starting Value Determination Period (any such day being a Market Disruption Day), the calculation agent will establish the closing level of the Index for such Market Disruption Day as follows:

- ⌋ The closing level of the Index for the applicable Market Disruption Day will be disregarded, except as set forth below.
- ⌋ Notwithstanding the foregoing, if a Market Disruption Event occurs for three or more consecutive scheduled Market Measure Business Days during the Starting Value Determination Period, then, on the second Market Measure Business Day on which no Market Disruption Event occurs following such Market Disruption Days, the closing level of the Index for each such Market Disruption Day will be determined (or, if not determinable, estimated) by the calculation agent in a manner which the calculation agent considers commercially reasonable under the circumstances.
- ⌋ If a Market Disruption Event occurs on the final date of the Starting Value Determination Period, then the closing level of the Index for that day will be the closing level of the Index on the first scheduled Market Measure Business Day thereafter on which no Market Disruption Event occurs or is continuing, *provided that* if a Market Disruption Event occurs on the final date of the Starting Value Determination Period and on the first two scheduled Market Measure Business Days thereafter, the calculation agent will determine or, if not determinable, estimate the closing level of the Index as of that final date on the second scheduled Market

Measure Business Day after that final date acting in a commercially reasonable manner.

The Index

All disclosures contained in this term sheet regarding the Index, including, without limitation, its make-up, method of calculation, and changes in its components, have been derived from publicly available sources. The information reflects the policies of, and is subject to change by, S&P Dow Jones Indices LLC (the Index Sponsor or S&P). The Index Sponsor, which licenses the copyright and all other rights to the Index, has no obligation to continue to publish, and may discontinue publication of, the Index. The consequences of the Index Sponsor discontinuing publication of the Index are discussed in the section entitled Description of the Notes Discontinuance of an Index beginning on page PS-21 of product supplement EQUITY INDICES SUN-1. None of us, the calculation agent, or MLPF&S accepts any responsibility for the calculation, maintenance or publication of the Index or any successor index.

The Dow Jones Industrial Average[®]

The Dow Jones Industrial Average[®] (the DJIA) is a price-weighted index, which means an underlying stock's weight in the DJIA is based on its price per share rather than the total market capitalization of the issuer. The DJIA is designed to provide an indication of the composite performance of 30 common stocks of corporations representing a broad cross-section of U.S. industry. The index covers all industries except transportation and utilities. The corporations represented in the DJIA tend to be market leaders in their respective industries and their stocks are typically widely held by individuals and institutional investors.

The DJIA is maintained by an Averages Committee comprised of three representatives of S&P Dow Jones Indices LLC and two representatives of *The Wall Street Journal* (WSJ). The Averages Committee was created in March 2010. Generally, composition changes occur only after mergers, corporate acquisitions or other significant changes in a component company's core business. When such an event necessitates that one component be replaced, the entire DJIA is reviewed. As a result, when changes are made they typically involve more than one component. While there are no rules for component selection, a stock typically is added only if it has an excellent reputation, demonstrates sustained growth and is of interest to a large number of investors. Maintaining adequate sector representation within the DJIA is also a consideration in the selection process.

Changes in the composition of the DJIA are made entirely by the Averages Committee without consultation with the corporations represented in the DJIA, any stock exchange, any official agency or us. Unlike most other indices, which are reconstituted according to a fixed review schedule, constituents of the DJIA are reviewed on an as-needed basis. Changes to the common stocks included in the DJIA tend to be made infrequently, and the underlying stocks of the DJIA may be changed at any time for any reason. The companies currently represented in the DJIA are incorporated in the United States and its territories and their stocks are listed on the New York Stock Exchange and NASDAQ.

The DJIA initially consisted of 12 common stocks and was first published in the WSJ in 1896. The DJIA was increased to include 20 common stocks in 1916 and to 30 common stocks in 1928. The number of common stocks in the DJIA has remained at 30 since 1928, and, in an effort to maintain continuity, the constituent corporations represented in the DJIA have been changed on a relatively infrequent basis. Nine main groups of companies constitute the DJIA, with the approximate sector weights of the DJIA as of September 30, 2016 indicated in parentheses:

Technology (14.9%); Industrials (19.8%); Financials (18.3%); Consumer Services (15.3%); Healthcare (13.3%); Oil & Gas (7.1%); Consumer Goods (6.9%); Telecommunications (1.9%); and Basic Materials (2.5%).

Computation of the Dow Jones Industrial Average®

The level of the DJIA is the sum of the primary exchange prices of each of the 30 component stocks included in the DJIA, divided by a divisor that is designed to provide a meaningful continuity in the level of the DJIA. Because the DJIA is price-weighted, stock splits or changes in the component stocks could result in distortions in the DJIA level. In order to prevent these distortions related to extrinsic factors, the divisor is periodically changed in accordance with a mathematical formula that reflects adjusted proportions within the DJIA. The current divisor of the DJIA is published daily in the WSJ and other publications. In addition, other statistics based on the DJIA may be found in a variety of publicly available sources.

Market-Linked Step Up Notes

Linked to the Dow Jones Industrial Average[®], due October 25, 2019

The following table presents the listing symbol, industry group, and component stock weight for the ten highest weighted component stocks in the DJIA based on publicly available information on September 30, 2016.

Issuer of Component Stock	Symbol	Industry	Component Stock Weight
3M Company	MMM	Industrials	6.59%
The Goldman Sachs Group, Inc.	GS	Financials	6.03%
International Business Machines Corporation	IBM	Technology	5.94%
UnitedHealth Group Incorporated	UNH	Health Care	5.24%
The Boeing Company	BA	Industrials	4.93%
The Home Depot, Inc.	HD	Consumer Services	4.81%
Johnson & Johnson	JNJ	Health Care	4.42%
McDonald's Corporation	MCD	Consumer Services	4.32%
The Travelers Companies, Inc.	TRV	Financials	4.28%
Apple Inc.	AAPL	Computer Hardware	4.23%

Neither we nor any of our affiliates, including the selling agent, accepts any responsibility for the calculation, maintenance, or publication of, or for any error, omission, or disruption in, the DJIA or any successor to the DJIA. The Index Sponsor does not guarantee the accuracy or the completeness of the DJIA or any data included in the DJIA. The Index Sponsor assumes no liability for any errors, omissions, or disruption in the calculation and dissemination of the DJIA. The Index Sponsor disclaims all responsibility for any errors or omissions in the calculation and dissemination of the DJIA or the manner in which the DJIA is applied in determining the amount payable on the notes at maturity.

The following graph shows the daily historical performance of the Index in the period from January 1, 2008 through October 27, 2016. We obtained this historical data from Bloomberg L.P. We have not independently verified the accuracy or completeness of the information obtained from Bloomberg L.P. On the pricing date, the closing level of the Index was 18,169.68.

Historical Performance of the Index

This historical data on the Index is not necessarily indicative of the future performance of the Index or what the value of the notes may be. Any historical upward or downward trend in the level of the Index during any period set forth above is not an indication that the level of the Index is more or less likely to increase or decrease at any time over the term of the notes.

Before investing in the notes, you should consult publicly available sources for the levels of the Index.

License Agreement

Dow Jones[®] is a registered trademark of Dow Jones Trademark Holdings LLC (Dow Jones), and the DJIA is a product of S&P. We and S&P have entered into a non-transferable, non-exclusive license agreement providing for the sublicense to us, in exchange for a fee, of the right to use the Index in connection with the issuance of the notes.

The license agreement between us and S&P provides that the following language must be stated in this document:

The Index is a product of S&P, and has been licensed for use by us. Standard & Poor[®], S&P[®] and S&P 500[®] are registered trademarks of Standard & Poor's Financial Services LLC; and these trademarks have been licensed for use by S&P and sublicensed for certain purposes by us. The notes are not sponsored, endorsed, sold or promoted by S&P, Standard & Poor's Financial Services LLC, any of their respective affiliates (collectively, S&P Dow Jones Indices). S&P Dow Jones Indices make no representation or warranty, express or implied, to the holders of the notes or any member of the public regarding the advisability of investing in securities generally or in the notes particularly or the ability of the Index to track general market performance. S&P Dow Jones Indices' only relationship to us with respect to the Index is the licensing of the Index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices or its licensors. The Index is determined, composed and calculated by S&P Dow Jones Indices without regard to us or the notes. S&P Dow Jones Indices have no obligation to take our needs or the needs of holders of the notes into consideration in determining, composing or calculating the Index. S&P Dow Jones Indices are not responsible for and have not participated in the determination of the prices, and amount of the notes or the timing of the issuance or sale of the notes or in the determination or calculation of the equation by which the notes are to be converted into cash, surrendered or redeemed, as the case may be. S&P Dow Jones Indices have no obligation or liability in connection with the administration, marketing or trading of the notes. There is no assurance that investment products based on the Index will accurately track index performance or provide positive investment returns. S&P is not an investment advisor. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice. Notwithstanding the foregoing, CME Group Inc. and its affiliates may independently issue and/or sponsor financial products unrelated to the notes currently being issued by us, but which may be similar to and competitive with the notes. In addition, CME Group Inc. and its affiliates may trade financial products which are linked to the performance of the Index.

Supplement to the Plan of Distribution

Under our distribution agreement with MLPF&S, MLPF&S will purchase the notes from us as principal at the public offering price indicated on the cover of this term sheet, less the indicated underwriting discount.

We will deliver the notes against payment therefor in New York, New York on a date that is greater than three business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

The notes will not be listed on any securities exchange. In the original offering of the notes, the notes will be sold in minimum investment amounts of 100 units. If you place an order to purchase the notes, you are consenting to MLPF&S acting as a principal in effecting the transaction for your account.

MLPF&S may repurchase and resell the notes, with repurchases and resales being made at prices related to then-prevailing market prices or at negotiated prices, and these prices will include MLPF&S's trading commissions and mark-ups. MLPF&S may act as principal or agent in these market-making transactions; however, it is not obligated to engage in any such transactions. At MLPF&S's discretion, for a short, undetermined initial period after the issuance of the notes, MLPF&S may offer to buy the notes in the secondary market at a price that may exceed the initial estimated value of the notes. Any price offered by MLPF&S for the notes will be based on then-prevailing market conditions and other considerations, including the performance of the Index and the remaining term of the notes. However, none of us, MLPF&S, or any of our respective affiliates is obligated to purchase your notes at any price or at any time, and we cannot assure you that we, MLPF&S or any of our respective affiliates will purchase your notes at a price that equals or exceeds the initial estimated value of the notes.

The value of the notes shown on your account statement will be based on MLPF&S's estimate of the value of the notes if MLPF&S or another of its affiliates were to make a market in the notes, which it is not obligated to do. That estimate will be based upon the price that MLPF&S may pay for the notes in light of then-prevailing market conditions, and other considerations, as mentioned above, and will include transaction costs. At certain times, this price may be higher than or lower than the initial estimated value of the notes.

The distribution of the Note Prospectus in connection with these offers or sales will be solely for the purpose of providing investors with the description of the terms of the notes that was made available to investors in connection with their initial offering. Secondary market investors should not, and will not be authorized to, rely on the Note Prospectus for information regarding CIBC or for any purpose other than that described in the immediately preceding sentence.

Structuring the Notes

The notes are our debt securities, the return on which is linked to the performance of the Index. As is the case for all of our debt securities, including our market-linked notes, the economic terms of the notes reflect our actual or perceived creditworthiness at the time of pricing. The internal funding rate we use in pricing the market-linked notes is typically lower than the rate we would pay when we issue conventional fixed-rate debt securities of comparable maturity. This difference is based on, among other things, our view of the funding value of the notes as well as the higher issuance, operational and ongoing liability management costs of the notes in comparison to those costs for our conventional fixed-rate debt. This generally relatively lower internal funding rate, which is reflected in the economic terms of the notes, along with the fees and charges associated with market-linked notes, resulted in the initial estimated value of the notes on the pricing date being less than their public offering price.

At maturity, we are required to pay the Redemption Amount to holders of the notes, which will be calculated based on the performance of the Index and the \$10 per unit principal amount. In order to meet these payment obligations, at the time we issue the notes, we may choose to enter into certain hedging arrangements (which may include call options, put options or other derivatives) with MLPF&S or one of its affiliates. The terms of these hedging arrangements are determined by seeking bids from market participants, including MLPF&S and its affiliates, and take into account a number of factors, including our creditworthiness, interest rate movements, the volatility of the Index, the tenor of the notes and the tenor of the hedging arrangements. The economic terms of the notes and their initial estimated value depend in part on the terms of these hedging arrangements.

MLPF&S has advised us that the hedging arrangements will include a hedging related charge of approximately \$0.075 per unit, reflecting an estimated profit to be credited to MLPF&S from these transactions. Since hedging entails risk and may be influenced by unpredictable market forces, additional profits and losses from these hedging arrangements may be realized by MLPF&S or any third party hedge providers.

Summary of Canadian Federal Income Tax Considerations

In the opinion of Blake, Cassels & Graydon LLP, our Canadian tax counsel, the following summary describes the principal Canadian federal income tax considerations under the *Income Tax Act* (Canada) (the Canadian Tax Act) generally applicable at the date hereof to a purchaser who acquires beneficial ownership of a note pursuant to this term sheet and who for the purposes of the Canadian Tax Act and the regulations thereto and at all relevant times: (a) is neither resident nor deemed to be resident in Canada; (b) deals at arm's length with CIBC and any transferee resident (or deemed to be resident) in Canada to whom the purchaser disposes of the note; (c) does not use or hold and is not deemed to use or hold the note in, or in the course of, carrying on a business in Canada; (d) is entitled to receive all payments (including any interest and principal) made on the note, and (e) is not a, and deals at arm's length with any, specified shareholder of CIBC for purposes of the thin capitalization rules in the Canadian Tax Act (a Non-Resident Holder). A specified shareholder for these purposes generally includes a person who (either alone or together with persons with whom that person is not dealing at arm's length for the purposes of the Canadian Tax Act) owns or has the right to acquire or control or is otherwise deemed to own 25% or more of CIBC's shares determined on a votes or fair market value basis. Special rules which apply to non-resident insurers carrying on business in Canada and elsewhere are not discussed in this summary.

This summary is supplemental to and should be read together with the description of material Canadian federal income tax considerations relevant to a Non-Resident Holder owning notes under Certain Income Tax Consequences Certain Canadian Income Tax Considerations in the accompanying prospectus supplement and a Non-Resident Holder should carefully read that description as well.

Based on Canadian tax counsel's understanding of the Canada Revenue Agency's administrative policies and having regard to the terms of the notes, interest payable on the notes should not be considered to be participating debt interest as defined in the Canadian Tax Act and accordingly, a Non-Resident Holder should not be subject to Canadian non-resident withholding tax in respect of amounts paid or credited or deemed to have been paid or credited by CIBC on a note as, on account of or in lieu of payment of, or in satisfaction of, interest.

Non-Resident Holders should consult their own tax advisors regarding the consequences to them of a disposition of the notes to a person with whom they are not dealing at arm's length for purposes of the Canadian Tax Act. The Minister of Finance (Canada) has released proposals to amend the Canadian Tax Act that impact the treatment of secondary market sales of prescribed debt obligations such as the notes occurring after 2016 (the Budget Proposals). It is not clear whether the Budget Proposals could impact the Canadian tax consequences of a transfer or assignment of a note by a Non-Resident Holder to a transferee resident in Canada for purposes of the Canadian Tax Act, and in particular, whether Canadian withholding tax could apply in respect of such a transfer or assignment, regardless of whether such note is an excluded obligation as described under Certain Income Tax Consequences Certain Canadian Income Tax Considerations in the accompanying prospectus supplement. Non-Resident Holders should consult with their own tax advisors in this regard.

Summary of U.S. Federal Income Tax Consequences

The following discussion is a brief summary of the material U.S. federal income consequences relating to an investment in the notes. The following summary is not complete and is both qualified and supplemented by, or in some cases supplements, the discussion entitled U.S. Federal Income Tax Summary beginning on page PS-32 of product supplement EQUITY INDICES SUN-1, which you should carefully review prior to investing in the notes.

The U.S. federal income tax consequences of your investment in the notes are uncertain. No statutory, judicial or administrative authority directly discusses how the notes should be treated for U.S. federal income tax purposes. In the opinion of our tax counsel, Mayer Brown LLP, it would generally be reasonable to treat the notes as prepaid cash-settled derivative contracts. Pursuant to the terms of the notes, you agree to treat the notes in this manner for all U.S. federal income tax purposes. If your notes are so treated, you should generally recognize capital gain or loss upon the sale, exchange, redemption or payment on maturity in an amount equal to the difference between the amount you receive at such time and the amount that you paid for your notes. Such gain or loss should generally be long-term capital gain or loss if you have held your notes for more than one year.

The characterization described above is not binding on the U.S. Internal Revenue Service (the IRS) or the courts. Thus, it is possible that the IRS would seek to characterize your notes in a manner that results in tax consequences to you that are different from those described above or in the accompanying product supplement. For a more detailed discussion of certain alternative characterizations with respect to your notes and certain other considerations with respect to your investment in the notes, you should consider the discussion set forth in U.S. Federal Income Tax Summary of the product supplement. We are not responsible for any adverse consequences that you may experience as a result of any alternative characterization of the notes for U.S. federal income tax or other tax purposes.

Additionally, the following changes are hereby made to the U.S. Federal Income Tax Summary section of the product supplement EQUITY INDICES SUN-1 to reflect certain changes to the U.S. federal income tax law as a result of U.S. taxing authority guidance and activity:

The fourth paragraph in the section captioned Non-U.S. Holders is hereby deleted and replaced with the following: A dividend equivalent payment made with respect to an equity-linked instrument is treated as a U.S.-source dividend. Such payments are generally subject to a 30% U.S. withholding tax (or lower rate if a tax treaty applies) when paid to a non-U.S. holder. Treasury regulations provide that certain equity-linked instruments with payments that are contingent upon or determined by reference to U.S.-source dividends (including payments reflecting adjustments for dividends), are considered to pay dividend equivalents. Regulations exempt equity-linked instruments issued prior to 2017 from these rules. Depending on the composition of the Market Measure, a note might be treated as an equity-linked instrument; however, since it is issued prior to 2017, it is expected to be exempt from the withholding tax rules specified for dividend equivalents.

The following sentences are hereby added immediately after the sentence in the section captioned "Additional Information for Investors": FATCA may impose a 30% withholding tax on payments of gross proceeds from the sale, exchange or redemption of property that gives rise to U.S.-source dividends or interest. The Internal Revenue Service recently announced in published guidance its intent to amend the regulations to extend the effective date of withholding on gross proceeds to 1 January 2019. Similarly the Internal Revenue Service announced its intention to delay the effective date of withholding tax on foreign passthru payments to the later of 1 January 2019 or the date of publication of final U.S. Treasury regulations defining such term.

You should consult your tax advisor as to the tax consequences of such characterization and any possible alternative characterizations of the notes for U.S. federal income tax purposes. You should also consult your tax advisor concerning the U.S. federal income tax and other tax consequences of your investment in the notes in your particular circumstances, including the application of state, local or other tax laws and the possible effects of changes in federal or other tax laws.

Validity of the Notes

In the opinion of Blake, Cassels & Graydon LLP, as Canadian counsel to the Bank, the issue and sale of the notes has been duly authorized by all necessary corporate action of the Bank in conformity with the Indenture, and when the notes have been duly executed, authenticated and issued in accordance with the Indenture, the notes will be validly issued and, to the extent validity of the notes is a matter governed by the laws of the Province of Ontario or the federal laws of Canada applicable therein, will be valid obligations of the Bank, subject to applicable bankruptcy, insolvency and other laws of general application affecting creditors' rights, equitable principles, and subject to limitations as to the currency in which judgments in Canada may be rendered, as prescribed by the *Currency Act* (Canada). This opinion is given as of the date hereof and is limited to the laws of the Province of Ontario and the federal laws of Canada applicable therein. In addition, this opinion is subject to customary assumptions about the Trustee's authorization, execution and delivery of the Indenture and the genuineness of signature, and to such counsel's reliance on the Bank and other sources as to certain factual matters, all as stated in the opinion letter of such counsel dated October 2, 2015, which has been filed as Exhibit 5.2 to the Bank's Form 6-K filed with the SEC on October 2, 2015.

In the opinion of Mayer Brown LLP, when the notes have been duly completed in accordance with the Indenture and issued and sold as contemplated by the prospectus supplement and the prospectus, the notes will constitute valid and binding obligations of the Bank, entitled to the benefits of the Indenture, subject to bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium and similar laws of general applicability relating to or affecting creditors' rights and to general equity principles. This opinion is given as of the date hereof and is limited to the laws of the State of New York. This opinion is subject to customary assumptions about the Trustee's authorization, execution and delivery of the Indenture and such counsel's reliance on the Bank and other sources as to certain factual matters, all as stated in the legal opinion dated October 2, 2015, which has been filed as Exhibit 5.1 to the Bank's Form 6-K filed on October 2, 2015.

Where You Can Find More Information

We have filed a registration statement (including a product supplement, a prospectus supplement, and a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the Note Prospectus, including this term sheet, and the other documents that we have filed with the SEC, for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, we, any agent, or any dealer participating in this offering will arrange to send you these documents if you so request by calling MLPF&S toll-free at 1-800-294-1322.

Market-Linked Investments Classification

MLPF&S classifies certain market-linked investments (the "Market-Linked Investments") into categories, each with different investment characteristics. The following description is meant solely for informational purposes and is not

intended to represent any particular Enhanced Return Market-Linked Investment or guarantee any performance.

Enhanced Return Market-Linked Investments are short- to medium-term investments that offer you a way to enhance exposure to a particular market view without taking on a similarly enhanced level of market downside risk. They can be especially effective in a flat to moderately positive market (or, in the case of bearish investments, a flat to moderately negative market). In exchange for the potential to receive better-than market returns on the linked asset, you must generally accept market downside risk and capped upside potential. As these investments are not market downside protected, and do not assure full repayment of principal at maturity, you need to be prepared for the possibility that you may lose all or part of your investment.
