Andre F. Perold resigned as a Director of Apex Municipal Fund, Inc. effective October 22, 2004.

Effective January 1, 2005, Terry K. Glenn retired as President and Director of the Fund. The Fund's Board of Directors wishes Mr. Glenn well in his retirement.

Effective January 1, 2005, Robert C. Doll, Jr. became President and Director of the Fund.

A Letter From the President and Chief Investment Officer

Dear Shareholder

The U.S. equity market ended 2004 in positive territory, although not without some suspense along the way. Fixed income markets also performed well, with high yield bond investors enjoying some of the greatest returns.

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-CSRS

Over the past year, the equity market generally found support from a healthy economic environment, above-average corporate earnings, increased capital spending and still-low interest rates. Stalling the momentum somewhat throughout the year was a contentious election, negligible inflation amid a rising federal funds interest rate, record-high oil prices and the seemingly ever-present worries over terrorism and the war in Iraq.

Still, the Standard & Poor's 500 Index posted a 12-month return of +10.88% and a six-month return of +7.19% as of December 31, 2004. The fourth quarter of the year proved to be the most telling, as the S&P 500 Index was up only 1.51% year-to-date as of September 30, 2004. As the price of oil relaxed and election uncertainties subsided, the market headed more convincingly upward in the last quarter of the year.

Given the relatively positive environment for equities, the favorable performance of the bond market came as somewhat of a surprise. The Lehman Brothers Aggregate Bond Index posted a 12-month return of +4.34% and a six-month return of +4.18% as of December 31, 2004. The tax-exempt market performed just as well, with a 12-month return of +4.48% and a six-month return of +5.19%, as measured by the Lehman Brothers Municipal Bond Index. Those comfortable with a higher degree of risk benefited this past year, as the Credit Suisse First Boston High Yield Index posted a 12-month return of +11.95% and a six-month return of +9.26%. Interestingly, as the Federal Reserve Board began raising its target short-term interest rate, long-term bond yields were little changed. In fact, the yield on the 10-year Treasury was 4.24% at year-end compared to 4.27% at December 31, 2003. The yield on the two-year Treasury climbed to 3.08% at year-end 2004 from 1.84% a year earlier.

As always, our investment professionals are closely monitoring the markets, the economy and the overall environment in an effort to make well-informed decisions for the portfolios they manage. For the individual investor, the key to investment success -- particularly during uncertain times -- is to maintain a long-term perspective and adhere to the disciplines of asset allocation, diversification and rebalancing. We encourage you to work with your financial advisor to ensure these time-tested techniques are incorporated into your investment plan.

We thank you for trusting Merrill Lynch Investment Managers with your investment assets, and we look forward to serving you in the new year and beyond.

Sincerely,

/s/ Robert C. Doll, Jr.

A Discussion With Your Fund's Portfolio Manager

The Fund provided a positive total return for the period, as we continued to pursue opportunities to diversify the portfolio and enhance yield.

Describe the recent market environment relative to municipal bonds.

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-CSRS

Over the past six months, long-term bond yields declined significantly as their prices, which move in the opposite direction, increased. The rise in bond prices came as somewhat of a surprise, as the economy generally continued to improve. Gross domestic product growth was recently reported at 4% for the third quarter of 2004, up from 3.4% in the second quarter. However, recent improvements in domestic business activity have been offset by inflationary measures remaining in the 1.5% - 2% range.

For its part, the Federal Reserve Board (the Fed) raised its short-term interest rate target by 25 basis points (.25%) to 1.25% in June, the first change in more than a year. In its accompanying statement, the Fed called for a "measured" approach to interest rate increases, removing much of the earlier concern that it might embark on a dramatic series of interest rate hikes. The prospect for a more moderate tightening sequence helped support higher bond prices for the remainder of the period. Four subsequent Fed interest rate hikes brought the federal funds rate to 2.25% by period-end, but had limited market impact as monthly U.S. employment gains remained modest. In addition, strong currency-related demand for U.S. Treasury issues from many foreign governments helped bolster fixed income bond prices. By the end of December 2004, long-term U.S. Treasury bond yields stood at 4.85%, a decline of 46 basis points over the past six months. The 10-year U.S. Treasury note yield fell 36 basis points to 4.24%.

The municipal bond market benefited from a generally supportive technical environment throughout the six-month period. Consequently, while tax-exempt bond yields followed the same pattern as their taxable counterparts, yield volatility was more subdued than that seen in the U.S. Treasury market. Long-term revenue bond yields, as measured by the Bond Buyer Revenue Bond Index, fell 30 basis points over the six months. As reported by Municipal Market Data, AAA-rated issues maturing in 30 years saw their yields decline 41 basis points to 4.61%, while yields on 10-year, AAA-rated issues declined 43 basis points to 3.52%.

During the period, more than \$170 billion in new long-term tax-exempt bonds was underwritten, a decline of nearly 7.5% versus the same six months a year ago. The declining supply trend allowed tax-exempt bond prices to register significant gains over the period, performing similarly to their taxable counterparts. New-issue municipal volume should be easily manageable in early 2005, continuing to support the tax-exempt market's favorable technical position.

Relative to Treasury issues, long-term tax-exempt bond yield ratios have remained in the 85% - 95% range, at or above their recent historic average of 85% - 88%. These attractive yield ratios should continue to attract both traditional and non-traditional investors to the tax-exempt market.

How did the Fund perform during the period in light of the existing market conditions?

For the six-month period ended December 31, 2004, the Common Stock of Apex Municipal Fund, Inc. had net annualized yields of 5.99% and 6.46%, based on a period-end per share net asset value of \$9.53 and a per share market price of \$8.84, respectively, and \$.288 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +7.85%, based on a change in per share net asset value from \$9.13 to \$9.53, and assuming reinvestment of all distributions.

The Fund's total return for the period, based on net asset value, slightly lagged the +8.13% average return of the Lipper High Yield Municipal Debt Funds category. Funds in this Lipper category invest at least 50% of their assets in lower-rated municipal debt issues. Several funds in the Lipper group also employ leverage, a strategy that is not within the Fund's investment parameters. Given the low borrowing rates we have seen for some time now, leverage has been a

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-CSRS

competitive advantage for these funds. Absent the levered funds, the Fund's return exceeded the average of its unlevered peers.

Benefiting performance during the period was the Fund's overweight exposure to corporate-related tax-exempt debt as well as tax-backed debt and bonds in the transportation and health care sectors. The strong performance in these areas has been driven largely by the continued narrowing of credit spreads, a trend observed in both the municipal market and the taxable bond market. The narrowing of spreads has

4

APEX MUNICIPAL FUND, INC.

DECEMBER 31, 2004

been supported by a generally improving economy, a moderate pace of inflation and the Fed's measured approach to interest rate increases, which generally served to sustain investors' appetites for risk.

In terms of specific securities, we saw strong performance from a capital appreciation bond (or zero coupon bond) representing toll-road financing for the Pocahontas Parkway in Virginia. In conjunction with the toll road's opening in 2002 and the subsequent increase in traffic, spreads on the bond narrowed significantly, making it a meaningful contributor to Fund performance in the past six months.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

We continued to focus on capturing relative value within the high yield municipal arena as a means of enhancing Fund returns over time. To that end, we continued to pursue opportunities to diversify the portfolio and enhance yield. This involved reductions in the corporate sector and increased exposure to non-rated credits.

In light of the significant rally seen in corporate-related debt, we began to realize profits through selective sales of some of our holdings, particularly in wood and forest products, capital goods and technology sectors. We made these reductions with the realization that the corporate sector traditionally tends to be the most volatile in the municipal market. Thus, when the credit cycle does turn and spreads begin to widen, we would expect corporate-related bonds to suffer the most. Our goal, therefore, has been to realize profits where we can and reduce exposure to a sector that has experienced the greatest volatility over time.

In our previous report to shareholders, we mentioned that the Fund had above-market concentrations in credits rated BBB and BB. At that time, we stated our desire to boost portfolio income through a reallocation of assets into lesser-rated, or non-rated issues. We have since pursued that strategy with some success, and as a result, the Fund's income reserves have increased. At the same time, we were able to reduce our overweighting and approach a market weighting in credits rated BBB and BB.

Finally, we maintained the Fund's exposure to debt issued by the State of

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-CSRS

California, and performance has benefited as investors' appetite for risk has continued to drive the spreads on these bonds tighter.

How would you characterize the Fund's position at the close of the period?

We maintain a largely positive view on credit spreads, although we believe we have seen the majority of the contraction at this point. Having said that, we will continue to further reduce our overweight exposure to the corporate-related debt sectors, using the proceeds from the sales to increase the Fund's exposure to health care and tax-backed debt. These represent higher-quality, lower-volatility securities, and also complement our efforts to improve the overall diversification of the portfolio.

Theodore R. Jaeckel Jr., CFA
Vice President and Portfolio Manager

APEX MUNICIPAL FUND, INC.

DECEMBER 31, 2004

Notes to Financial Statements

1. Significant Accounting Policies:

Apex Municipal Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The Fund's financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-CSRS

management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The Fund determines and makes available for publication the net asset value of its Common Stock on a daily basis. The Fund's Common Stock is listed on the New York Stock Exchange under the symbol APX. The following is a summary of significant accounting policies followed by the Fund.

(a) Valuation of investments -- Municipal bonds are traded primarily in the over-the-counter markets and are valued at the last available bid price in the over-the-counter market or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of the Fund under the general direction of the Board of Directors. Such valuations and procedures are reviewed periodically by the Board of Directors of the Fund. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the over-the-counter market, valuation is the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Fund's pricing service. Short-term investments with a remaining maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a straight line basis to maturity. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund.

(b) Derivative financial instruments -- The Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

- o Financial futures contracts -- The Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.
- o Options -- The Fund may write covered call options and purchase put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-CSRS

of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

APEX MUNICIPAL FUND, INC.

DECEMBER 31, 2004

15

[LOGO] Merrill Lynch Investment Managers

Notes to Financial Statements (concluded)

o Forward interest rate swaps -- The Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed, the Fund records a realized gain or loss in an amount equal to the value of the agreement.

(c) Income taxes -- It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

(d) Security transactions and investment income -- Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Interest income is recognized on the accrual basis. The Fund amortizes all premiums and discounts on debt securities.

(e) Dividends and distributions -- Dividends from net investment income are declared daily and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

2. Investment Advisory Agreement and Transactions with Affiliates:

The Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of the Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, the Fund pays a monthly fee at an annual rate of .65% of the Fund's average daily net assets.

For the six months ended December 31, 2004, the Fund reimbursed FAM \$1,958 for certain accounting services.

Certain officers and/or directors of the Fund are officers and/or directors of FAM, PSI, and/or ML & Co.

3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended December 31, 2004 were \$25,115,544 and \$24,939,734, respectively.

4. Common Stock Transactions:

At December 31, 2004, the Fund had one class of shares of Common Stock, par value \$.10 per share, of which 150,000,000 shares were authorized.

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-CSRS

5. Subsequent Event:

On January 6, 2005, the Fund paid a tax-exempt income dividend to holders of Common Stock in the amount of \$.048000 per share, payable on January 28, 2005 to shareholders of record on January 19, 2005.

6. Capital Loss Carryforward:

On June 30, 2004, the Fund had a net capital loss carryforward of \$16,465,384, of which \$1,311,769 expires in 2005, \$938,156 expires in 2006, \$2,975,000 expires in 2008, \$5,341,699 expires in 2009, \$2,075,987 expires in 2010, \$2,163,492 expires in 2011 and \$1,659,281 expires in 2012. This amount will be available to offset like amounts of any future taxable gains.

16

APEX MUNICIPAL FUND, INC.

DECEMBER 31, 2004

About Inverse Floaters

As a part of its investment strategy, the Fund may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Fund to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed rate, tax-exempt securities. To the extent the Fund invests in inverse securities, the market value of the Fund's portfolio and the net asset value of the Fund's shares may also be more volatile than if the Fund did not invest in these securities. As of December 31, 2004, none of the Fund's total net assets were invested in these securities.

Dividend Policy

The Fund's dividend policy is to distribute all or a portion of its net investment income to its shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the Fund may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any particular month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Fund for any particular month may be more or less than the amount of net investment income earned by the Fund during such month. The Fund's current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Assets, Liabilities and Capital, which comprises part of the financial information included in this report.
