Item 7.01 Regulation FD Disclosure.

WellCare Health Plans, Inc. ("WellCare") (NYSE: WCG) is reaffirming its full-year 2018 adjusted earnings per diluted share (EPS) range of \$10.70 to \$10.90 and is providing full-year 2018 total revenue (GAAP) guidance of approximately \$20.0 billion, inclusive of the financial effects of the acquisition of Meridian, as defined below, at the Morgan Stanley 16th Annual Global Healthcare Conference on September 13, 2018.

Basis of Presentation

In addition to results determined under GAAP, WellCare provides certain non-GAAP financial measures that management believes are useful in assessing the company's performance. Non-GAAP financial measures should be considered in addition to, but not as a substitute for, or superior to, financial measures prepared in accordance with GAAP.

Earnings per share have been adjusted for the effect of certain expenses, and as appropriate, the related tax effect, related to previously disclosed government investigations and related litigation and resolution costs ("investigation costs"); amortization expense associated with acquisitions ("acquisition-related amortization expenses"); and certain one-time transaction and integration costs related to the acquisition of Universal American Corp. and the acquisition effective September 1, 2018 of Meridian Health Plan of Michigan, Inc., Meridian Health Plan of Illinois, Inc., and MeridianRx, a pharmacy benefit manager (PBM) (collectively, "Meridian") ("transaction and integration costs").

Although the excluded items may recur, WellCare believes that by providing non-GAAP measures exclusive of these items, it facilitates period-over-period comparisons and provides additional clarity about events and trends affecting its core operating performance, as well as providing comparability to competitor results. The investigation costs are related to a discrete incident which management does not expect to reoccur. WellCare has adjusted for acquisition-related amortization expenses as these transactions do not directly relate to the servicing of products for our customers and are not directly related to the core performance of its business operations. The transaction and integrations costs are related to a specific 2017 and 2018 events, which do not reflect the underlying ongoing performance of the business.

WellCare is not able to project at the time of this Current Report on Form 8-K the amount of expenses associated with investigation costs, the timing of transaction and integration costs and, therefore, cannot reconcile projected non-GAAP measures affected by these items to projected GAAP measures.
