1. DESCRIPTION OF BUSINESS

Companhia Siderúrgica Nacional “CSN”, also referred to as the Company or Parent Company, is a publicly-held company incorporated on April 9, 1941, under the laws of the Federative Republic of Brazil (Companhia Siderúrgica Nacional, its subsidiaries, associates and joint ventures are collectively referred to herein as the “Group”). The Company’s registered office is located in São Paulo, SP, Brazil.

CSN is listed on the São Paulo Stock Exchange (B3 - Brasil, Bolsa, Balcão) and on the New York Stock Exchange (NYSE). Accordingly, the Company reports its information to the Brazilian Securities and Exchange Commission (CVM) and the U.S. Securities and Exchange Commission (SEC).

The Group's main operating activities are divided into five (5) segments as follows:

- **Steel:**

The Company’s main industrial facility is the Presidente Vargas steelworks (“UPV”), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates all operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has operations in the United States, Portugal and Germany aimed at gaining markets and providing excellent services to end consumers. Its steel is used in home appliances, civil construction and automobile industries.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, State of Minas Gerais.

Iron ore is sold basically in the international market, especially in Europe and Asia. The prices charged in these markets are historically cyclical and subject to significant fluctuations over short periods of time, driven by several factors related to global demand, strategies adopted by the major steel producers, and the foreign exchange rate. All these factors are beyond the Company’s control. The ore transportation is carried out through Terminal de Carvão e Minérios do Porto de Itaguaí - TECAR, a solid bulk terminal, one of the four terminals that comprise the Itaguaí Port, in Rio de Janeiro. Imports of coal and coke are also carried out through this terminal by providing services to CSN’s steel segment.

The Company's mining activities also comprise exploitation of tin in the State of Rondônia, to supply the needs of the UPV. The surplus of these raw materials is sold to subsidiaries and third parties.

- **Cement:**

CSN entered the cement market boosted by the synergy between this activity and its existing businesses. Next to the Presidente Vargas Steelworks (UPV) in Volta Redonda (RJ), the Company installed a new business unit that produces CP-III type cement using slag produced by the UPV's blast furnaces. It also exploits limestone and dolomite at the Arcos unit in the State of Minas Gerais, to meet the needs of the UPV and of the cement plant.

In the second half of 2016, the Company started the operation of a new clinker kiln in Arcos, where it already operates a clinker kiln using limestone from a Company's mine and two cement mills. With this project, the cement production capacity in the Southeast may reach 4.4 million tons per year. In a later stage, the Company evaluates the implementation of an advanced milling unit, adding another 1 million tons.

- **Logistics**

Railroads:

CSN has interests in three railroad companies: MRS Logística S.A., which manages the Southeast Railway System of the former Rede Ferroviária Federal S.A. (“RFFSA”), Transnordestina Logística S.A. (“TLSA”) and FTL - Ferrovia Transnordestina Logística S.A. (“FTL”), which operates the former Northeast Railway System of RFFSA, in the States of Maranhão, Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas, with TLSA being responsible for the rail links of Missão Velha-Salgueiro, Salgueiro-Trindade, Trindade-Eliseu Martins, Salgueiro-Porto de Suape and Missão Velha-Porto de Pecém (Railway System II) and FTL being responsible for the rail links of São Luiz-Mucuripe, Arrojado-Recife, Itabaiana-Cabedelo, Paula Cavalcante-Macau and Propriá-Jorge Lins (Railway System I).

Ports:

The Company operates in the State of Rio de Janeiro, through its subsidiary Sepetiba Tecon S.A., the Container Terminal (Tecon) and through its subsidiary CSN Mineração S.A., TECAR, both at the Itaguaí Port. Located in the Bay of Sepetiba, they have privileged highway, railroad and maritime access.

At Tecon, shipment of CSN’s steel products, movement of containers, storage, consolidation and deconsolidation of cargo are carried out and, at Tecar, the shipment of iron ore to overseas market and the unloading of coal and other products, such as petroleum coke, sulfur and zinc concentrate for our own use and for several customers.

- **Energy:**

As energy is fundamental to its production process, the Company has electric energy generation assets to guarantee its self-sufficiency.

Note 24 - "Segment Information" details the financial information per CSN's business segment.

- **Going Concern**

In 2017, the Company paid, including principal and interest, approximately R\$4 billion of its borrowings and financing. During 2018 the borrowings are expected to be paid and, including interest to be incurred next year, amount to approximately R\$7.7 billion.

The financial leverage may adversely affect the businesses, financial conditions and operating results, entailing the following:

- Allocation of a substantial part of the cash generated from operations for repayment of the borrowings and financing.
- Exposure to (i) fluctuations in interest rates due to the renegotiation of debts and eventual new borrowings taken, and (ii) fluctuations in exchange rates since a significant part of the borrowings and financing is denominated in foreign currency.
- Increase in economic and financial vulnerability due to adverse conditions of the industry and segment, limiting the funds available in the short term, considering the high financial leverage and the expected cash disbursements;
- Limitation of the Company's ability to enter into new businesses (acquisitions) until the financial leverage is reduced;
- Limitation of the Company's ability to obtain new credit lines under more favorable interest conditions due to the risks associated to the current financial leverage.

The Company's ability to continue as a going concern depends, therefore, on the achievement of operating targets defined by Management, and on the refinancing of existing debts and/or actions related to financial deleveraging.

In addition to the continuous focus on operating income improvement, Management has various initiatives in progress to increase the Company's liquidity through the extension of payment terms of borrowings and financing.

This plan was started in 2015 with the renegotiation of R\$ 2.5 billion with Caixa Econômica Federal and R\$ 2.2 billion with Banco do Brasil S.A, postponing the maturities from 2016 and 2017 to 2018 through 2022. In 2016, the Company extended the installments of certain NCE contracts amounting to R\$ 100 million and prepayments of US\$ 66 million with Bradesco, postponing the maturities from 2016 to 2019. For 2017, Management remains committed to the plan to extend its debt payment term, mainly those of short term, seeking the renegotiation of borrowings and financing in the amount of R\$ 1.5 billion.

Additionally, Management studies financial deleveraging alternatives based on the disposal of non-strategic assets; however, it is not possible to affirm that these assets will occur within a twelve-month period. Thus, the Company did not segregate and did not reclassify any assets in the financial statements as discontinued operations in accordance with CPC 31 (IFRS 5).

Based on Management's cash flow projections that covered the operating period until December 2018, which depend on factors such as the achievement of production targets, sales volumes and prices, as well as on renegotiations of borrowings and financing, Management believes that the Company has the appropriate resources to continue as a going concern in a reasonably foreseeable period of time. Accordingly, the Company's financial information for the quarter ended September 30, 2017 has been prepared on the assumption that the Company will continue as a going concern.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.a) Basis of preparation

The Group's parent company and consolidated condensed interim financial information ("condensed quarterly information") has been prepared in accordance with International Financial Reporting Standards ("IFRS"), implemented in Brazil through the Accounting Pronouncements Committee ("CPC"), approved by the Brazilian Securities and Exchange Commission ("CVM") and the Federal Accounting Council ("CFCF") the relevant information of the interim financial statements, and only this information, is being disclosed and corresponds to the information used by the Company's management in its activities

The condensed interim financial information has been prepared and is being presented in accordance with CPC 21 (R1) - "Interim Financial Reporting" and IAS 34 - "Interim Financial Reporting", consistently with the standards issued by the CVM.

The significant accounting policies applied in this condensed interim financial information are consistent with the policies described in Note 2 to the Company's financial statements for the year ended December 31, 2016, filed with CVM.

This condensed interim financial information does not include all requirements of annual or full financial statements and, accordingly, should be read in conjunction with the Company's financial statements for the year ended December 31, 2016.

Therefore, in this condensed interim financial information the following notes are not repeated, either due to redundancy or to the materiality in relation to those already presented in the annual financial statements:

Note 02 – Summary of significant accounting policies

The funds available at the parent company and subsidiaries established in Brazil are basically invested in investment funds, considered exclusive, and their financial statements were consolidated into the Company's statements. The funds include repurchase agreements backed by private and government securities, with fixed rate income and immediate liquidity.

Private securities are short-term investments in Bank Deposit Certificates (CDBs) with yields pegged to the Interbank Deposit Certificate (CDI) fluctuation, and government securities are basically repurchase agreements backed by National Treasury Notes. The funds are managed by BNY Mellon Serviços Financeiros DTVM S.A. and Caixa Econômica Federal (CEF) and their assets collateralize any losses on investments and transactions carried out. The investments in funds were consolidated.

A significant part of the funds is invested abroad in time deposits in banks considered by management as top rated banks and the returns are based on fixed interest rates.

- TRANSNORDESTINA LOGÍSTICA S.A. (“TLSA”)

TLSA is primarily engaged in the public service operation and development of a railroad network in the Northeast of Brazil, comprising the rail links Velha-Salgueiro, Salgueiro-Trindade, Trindade-Eliseu Martins, Salgueiro- Porto de Suape, and Missão Velha-Porto de Pecém (“Railway System II”).

It is in pre-operational phase and will continue as such until the completion of Railway System II. The approved schedule, which estimated the completion of the work by January 2017, is currently under review and discussion with the responsible agencies; however, Management believes that new deadlines for project completion will not have material adverse effects on the expected return on the investment. After analyzing this matter, Management considered as appropriate the use of the accounting basis of operational continuity (going concern) of the project in the preparation of its financial statements.

During 2017, the other shareholders of TLSA subscribed 5,708,087 shares in the amount of R\$723,858, diluting CSN's interest in TLSA's capital to 46.30%. As a result of the transactions described above and the change in the shareholders' interest in TLSA's capital in 2017, the Company recognized a gain of R\$2,814 in shareholders' equity under other comprehensive income.

Even though as of December 31, 2016 the Company reports negative net working capital of R\$ 182,339, Management counts on the funds from its shareholders and third parties for completion of the work, which are expected to be available based on agreements previously entered into and recent discussions between the involved parties. After analyzing this matter, Management considered as appropriate the use of the accounting basis of operational continuity (going concern) of the project in the preparation of the financial statements for the year ended December 31, 2016.

Accordingly, TLSA conducted an impairment test of its long-lived assets using the discounted cash flow method. In order to perform the test, TLSA adopted the following main assumptions:

CONVENIENCE TRANSLATION INTO ENGLISH FROM THE ORIGINAL PREVIOUSLY ISSUED IN PORTUGUESE

Quarterly Financial Information - September 30, 2017
– CIA SIDERURGICA NACIONAL

Version: 1

Measurement of recoverable amount:

Cash flow projection	Until 2057
Gross margin	Estimated based on market study to capture cargo and operating costs according to market trend studies
Cost estimate	Costs based on study and market trends
Growth rate in perpetuity	Growth rate was not considered because the model projection is until the end of the concession.
Discount rate	Ranges from 4.25% to 7.90% in real terms.

In addition, CSN, as an investor, conducted an impairment test of its interest in TLISA, based on TLISA's dividend payment capacity, a methodology known as Dividend Discount Model, or DDM, to remunerate the capital invested by its shareholders. In order to conduct this test, some factors were taken into account, such as:

Another important aspect that was considered in the impairment analysis of CSN's investment in TLISA was the need to apply an additional risk percentage to the discount rate in addition to that already used to determine TLISA's discounted cash flow. Due to the sharing of investor risks and the fact that the asset that is being tested represents the cash-generating unit, which in turn equals the legal entity, the risk determined by CSN's management is the same as that applied by TLISA in the evaluation of the investment, and therefore an additional risk factor to the model would not apply.

As a result of the test performed, the Company recognized in 2016 a loss on the surplus value of TLISA's investment in the amount of R\$ 387,989 recorded in other operating expenses and R \$ 131,916 in deferred

taxes.

II – Investments in securities classified as available-for-sale and measured at fair value through OCI

The Company has investments in common (USIM3) and preferred (USIM5) shares of Usiminas (“Usiminas Shares”), designated as available-for-sale financial assets. The Company adopts this designation because the nature of the investment is not included in any other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss). The asset is classified as a non-current asset in line item “investments” and is carried at fair value based on the quoted price on the stock exchange (B3 - Brasil, Bolsa, Balcão). According to the Company's policy, the gains and losses arising from changes in share prices are recorded directly in shareholders' equity, as other comprehensive income.

The Company's accounting policy requires a quarterly analysis based on quantitative and qualitative information available in the market from the moment the instrument demonstrates a drop of more than 20% in its market value or from a significant drop in market value compared to their acquisition cost for more than 12 months. If the Company concludes that there was a significant drop in the instrument's price, an impairment loss must be recognized. In 2012, considering the price of Usiminas shares on B3 - Brasil, Bolsa, Balcão, the first impairment of these shares was recognized. Under this policy, whenever the share price reaches a level lower than the last impairment recognized, the Company must recognize new losses in profit or loss, redefining the new minimum level of the share price.

During 2016 and until the third quarter of 2017, no impairment was recognized and the gains arising from change in share prices in the period was recognized in other comprehensive income:

Class of shares	Quantity	09/30/2017		Quantity	12/31/2016		Variation in the period	
		Share price	Closing Balance		Share price	Closing Balance	Share price	Variation in the carrying amount
Common	107,156,651	10.05	1,076,924	107,156,651	8.26	885,114	1.79	191,810

	221,437,207		1,966,027	221,437,207		1,353,664		612,363

As of September 30, 2017, and December 31, 2016, the Company's interest in USIMINAS comprised 15.19% in common shares and 20.86% in preferred shares.

As of September 30, 2017, the amount recognized in comprehensive income for available-for-sale investments, net of taxes, is R\$1,083,693 (R\$678,035 as of December 31, 2016).

III - Financial risk management:

As of September 30, 2017, there were no changes in financial risk policies and management in relation to those disclosed in the Company's financial statements for the year ended December 31, 2016.

12.a) Foreign exchange rate and interest rate risks:

• **Foreign exchange rate risk:**

The exposure arises from the existence of assets and liabilities denominated in Dollar or Euro, since the Company's functional currency is substantially the real and is denominated natural currency hedge. The net exposure is the result of offsetting the natural currency exposure by hedging instruments adopted by CSN.

The consolidated net exposure as of September 30, 2017 is as follows:

Foreign Exchange Exposure	(Amounts in US\$'000)	09/30/2017 (Amounts in €'000)
Cash and cash equivalents overseas	845,766	3,045
Trade receivables	387,127	1,273

Perpetual Bonds	1,000,000	
Net foreign exchange exposure excluding perpetual bonds	(741,950)	(4,634)

CSN is currently in process of redefining its currency hedge strategy. The Company began to focus its hedging strategy to preserve its cash flow capturing the existing natural relationships and the use of derivative instruments to hedge CSN's future cash flows.

- **Interest rate risk:**

The risk arises from short and long-term liabilities with fixed or floating interest rates and inflation indices.

In item 12b) we show the derivatives and hedging strategies to hedge foreign exchange and interest rate risks.

12.b) Hedging instruments: Derivatives and hedge accounting:

CSN uses various instruments to hedge foreign exchange and interest rate risks, as shown in the following topics:

- ***Cash flow hedge accounting***

Beginning November 1, 2014, the Company formally designated cash flow hedging relationships to hedge highly probable future cash flows against US dollar fluctuations.

In order to better reflect the accounting impacts of this foreign exchange hedging strategy on the Company's results, CSN designated part of its US dollar-denominated liabilities as a hedging instrument of its future exports. As a result, foreign exchange differences arising from designated liabilities will be temporarily recognized in shareholders' equity and recognized in profit or loss when such exports are carried out, allowing the concurrent recognition of the dollar impact on liabilities and on exports.

The adoption of this hedge accounting does not entail entering into any financial instrument. The adoption of this hedge accounting does not entail entering into any financial instrument. As of September 30, 2017, US\$1.4 billion in exports to be carried out until October 2022 is designated.

Through hedge accounting, the exchange gains and losses on debt instruments will not immediately affect the Company's profit or loss except to the extent that exports are carried out.

(1) - During the designation in August 2015, we reviewed the future export projections and identified that the amount of US\$ 9 million designated previously was no longer probable to be realized due to the decrease of the Platt's value. Therefore, we discontinued the hedging relationship in August 2015. The exchange rate for the period remains recorded in shareholders' equity until the settlement of the debt.

In the hedging relationships described above, the amounts of the debt instruments were fully designated for equivalent iron ore export portions.

The movement in hedge accounting amounts recognized in shareholders' equity as of September 30, 2017 is as follows:

Version: 1

As of September 30, 2017, the hedging relationships established by the Company were effective, according to the prospective tests conducted. Thus, no reversal for hedge accounting ineffectiveness was recognized.

- ***Hedge of net investment in foreign operation***

CSN has a natural currency exposure in Euros substantially arising from a borrowing taken by a foreign subsidiary with functional currency in Reais, for the acquisition of investments abroad where the functional currency is Euro. Such exposure arises from translating the balance sheets of these subsidiaries for consolidation into CSN, where the exchange difference on the borrowings affected the statement of income, in the finance income and costs line item, and the exchange difference on the net assets of the foreign operation directly affected the shareholders equity, in other comprehensive income.

As from September 1, 2015, CSN began to adopt the net investment hedge to eliminate such exposure and cover future fluctuations of the Euro on such borrowings. Non-derivative financial liabilities were designated, represented by borrowing agreements with financial institutions in the amount of € 120 million. The account balances as of September 30, 2017 are as follows:

Designation Date	Hedging Instrument	Hedged item	Type of hedged	Exchange rate on	Designated amounts	09/30/2017 Impact on shareholders'
------------------	--------------------	-------------	----------------	------------------	--------------------	---------------------------------------

			risk	designation	(EUR'000)	equity

Total					72,000	(34,205)

1. In January 201, the portion of a debt designated as hedging instrument was settled.

The movement in the amounts related to net investment hedge recognized in shareholders' equity as of September 30, 2017 is as follows:

	12/31/2016	Movement	Realization	9/30/2017
Net investment hedge accounting	(57,804)	23,599		(34,205)
Fair value of net investment hedge in foreign operations	(57,804)	23,599		(34,205)

As of September 30, 2017, the hedging relationships established by the Company were effective, according to prospective tests conducted. Therefore, no reversal for hedge ineffectiveness was recognized.
