Strong Performance in Challenging Markets

Revenue and Income Rise

Book-to-Bill Robust

**Peter Löscher, President and Chief
Executive Officer of Siemens AG**

Siemens got off to a good start in fiscal 2009, including better order development than most of our competitors in the first quarter, commented Siemens CEO Peter Löscher. Revenue increased strongly, and we have a robust book-to-bill above one. Total Sectors profit clearly exceeded the prior-year level. Therefore we are sticking to our 2009 targets, even though reaching them has become more ambitious. While we are closely monitoring market conditions on a quarterly basis, we are progressing through the year strong, confident and focused.

Financial highlights:

Orders of 22.220 billion came in 8% below the record high level of the prior-year quarter. The order backlog included no major cancellations.

Revenue rose 7% to 19.634 billion, supported by strong order growth in recent years.

Total Sectors profit climbed 20%, to 2.005 billion, led by broad-based profit growth in Energy.

Income from continuing operations rose 17%, to 1.260 billion, on higher Total Sectors profit.

Net income was 1.230 billion in the first quarter. A year earlier, net income of 6.475 billion for the quarter included approximately 5.4 billion in income from discontinued operations related to Siemens VDO Automotive.

Free cash flow was a negative 1.574 billion compared to a negative 217 million in the prior-year period. The current period includes payments totaling 1.230 billion associated with legal proceedings, SG&A reduction and transformation programs initiated in fiscal 2008.

Table of Contents

Siemens 2

Orders and Revenue**Revenue rises and book-to-bill remains well above 1**

First-quarter revenue rose to 19.634 billion, a 7% increase compared to the same period a year earlier. Revenue growth was supported strongly by high order growth in the past two fiscal years. Orders exceeded revenue, at 22.220 billion but declined 8% compared to the record high first quarter a year earlier. The book-to-bill ratio for the current period was 1.13.

The net effect of currency translation was neutral for revenues and orders. On an organic basis, excluding currency effects and portfolio transactions, revenue rose 8% and orders came in 7% lower compared to the prior-year quarter.

Revenue increases in all Sectors and regions

Revenue rose in all three Sectors, led by double-digit growth throughout the Energy Sector. The Healthcare Sector also posted double-digit growth including new volume from the acquisition of Dade Behring Holdings Inc. (Dade Behring) at the Diagnostics Division.

On a geographic basis, revenue rose in all three reporting regions of Siemens, with particular strength in the Americas and Asia, Australia. The Fossil Power Generation and Renewable Energy Divisions led revenue higher in the Americas, while in Asia, Australia the largest revenue increases came at the Power Transmission and Industrial Solutions Divisions.

Broad-based order decline takes in all regions, most Divisions

In an environment of slowing global growth and a worldwide financial crisis, weaker demand was noticeable throughout Siemens' business. Orders climbed 3% in Healthcare but declined in Industry and Energy where a majority of Divisions had lower or level orders year-over-year.

All regions posted lower orders. Within the Asia/Australia region volume declined significantly in China, where the Industry Solutions Division and Power Transmission Division had large orders in the prior-year period. Orders came in lower in the Americas due primarily to the Renewable Energy and Oil & Gas Divisions, which benefited from surging demand in the U.S. a year earlier. Orders rose 12% in Germany on the strength of a large order at the Mobility Division.

Table of Contents

Siemens 3

Income and Profit**Total Sectors profit climbs led****by Energy and Healthcare**

Total Sectors profit for the first quarter climbed 20% year-over-year, to 2.005 billion. Energy was the primary driver of Sectors profit growth, with a strong profit rebound in the fossil power business compared to the first quarter a year earlier and double-digit profit increases at all other Divisions. Higher revenue helped lift Sector profit at Healthcare as well. Industry made the largest contribution to Total Sectors profit in the first quarter, but saw a decline compared to the prior-year period due primarily to a sharp decline in the industrial automation business.

Income from continuing operations climbs on higher Sectors profit

Income from continuing operations grew to 1.260 billion, up 17% compared to the first quarter a year earlier. Basic EPS on a continuing basis rose to 1.43 from 1.14 in the prior-year period. The major factor in these increases was higher Total Sectors profit year-over-year. Other positive factors were lower expenses for Corporate items including legal and regulatory matters, higher income from Equity Investments, and continued progress in closing out Other Operations. These positive factors more than offset lower income from Cross-Sector Businesses and Siemens Real Estate (SRE), as well as negative results of hedging activities not qualifying for hedge accounting.

Clean quarter for net income

Net income in the first quarter was 1.230 billion, with a corresponding EPS of 1.40. A year earlier, net income of 6.475 billion and EPS of 7.04 benefited substantially from approximately 5.4 billion in income from discontinued operations, primarily related to the sale of Siemens VDO Automotive (SV).

Table of Contents

Siemens 4

Cash, Return on Capital Employed (ROCE), Pension Funding Status and Investigation Expenses**Free cash flow impacted****by compliance payments**

Free cash flow from continuing operations was a negative 1.574 billion compared to a negative 217 million in the first quarter a year ago. The current quarter includes substantial increases in net working capital in the Sectors and centrally taken cash outflows totaling 1.008 billion related to resolution of legal proceedings in the U.S. and Germany. Cash outflows for previously recorded charges related to project reviews, restructuring, and SG&A reduction totaled 222 million.

ROCE rises on higher income

On a continuing basis, return on capital employed (ROCE) increased to 12.9% from 11.6% in the first quarter a year earlier on higher income from continuing operations in the current period.

Compliance expenses fall again as major legal proceedings conclude

Siemens concluded the legal proceedings mentioned above during the first quarter. Expenses within continuing and discontinued operations for outside advisors in connection with these matters totaled 50 million, well down from 127 million in the prior-year period and 89 million in the previous quarter.

Pension underfunding**increases on higher DBO**

The estimated underfunding of Siemens principal pension plans as of December 31, 2008 amounted to approximately 4.3 billion, compared to an underfunding of approximately 2.5 billion at the end of fiscal 2008. The decline in funding status is due primarily to a significant decrease in the discount rate assumption at December 31, 2008, which increased Siemens estimated defined benefit obligation (DBO).

Table of Contents

Sectors 5

Industry Sector**Market conditions hold back****Sector profit development**

Industry led all Sectors with profit of \$907 million in the first quarter. For comparison, Sector profit was \$994 million in the first quarter a year earlier. The primary factor in the difference year-over-year was the Industry Automation Division, which remained the top income contributor in the Sector but saw profitability drop from a peak profit margin in the prior-year quarter due to lower volume and a less favorable product mix. Osram's contribution to Sector profit fell also, as its markets became more challenging. The other four Divisions within Industry all increased their profit, including double-digit increases at Building Technologies, Industry Solutions and Mobility. First-quarter revenue for Industry rose 2% compared to the prior-year period, while orders came in 11% lower. On an organic basis, excluding currency translation and portfolio effects, revenue rose 1% and orders declined 11% year-over-year. All Divisions except Industry Automation and Osram increased their revenues compared to the prior-year period. Revenue growth was strongest in the Asia, Australia region. Orders showed exposure to global macroeconomic conditions, with declines in all regions. The Industry Sector's book-to-bill ratio was 1.05 compared to 1.2 in the prior-year period.

Profitability below peak but within target range

Industry Automation produced \$255 million in profit in the first quarter and its profit margin remained in its target range. Nevertheless income declined year-over-year, with lower profits and margins in nearly all business units. For comparison, income in the prior-year period benefited from a \$36 million gain on the sale of a business. Purchase price accounting (PPA) effects in the current quarter, associated with the acquisition of UGS Corp., were \$35 million and trimmed approximately 180 basis points from the Division's profit margin. In the same quarter a year earlier, PPA effects of \$48 million and integration costs of \$5 million related to UGS took approximately 250 basis points from the profit margin. Revenue of \$1.977 billion was 5% lower than in the prior-year quarter and orders came in 14% lower year-over-year, as customers delayed restocking in the face of uncertain downstream demand.

Rising revenue lifts profit

Drive Technologies produced profit of \$233 million and 8% revenue growth from a large order backlog benefiting in part from the high-growth wind power business. The Division recorded PPA effects of \$9 million in the current quarter and \$10 million in the prior-year period. Orders declined mainly on slowing demand in short-cycle businesses, most notably the electronics assembly unit which posted a loss of \$27 million on lower business volume.

Table of Contents

Sectors 6

Better business mix benefits profitability

Building Technologies raised its first-quarter profit to 124 million benefiting from a significant improvement in its business mix between the periods under review. Orders were level year-over-year despite a general slowdown in commercial construction, particularly in the U.S.

Revenue and profit lower in weakening markets

Profit at **Osram** decreased to 92 million despite positive effects from hedging activities not qualifying for hedge accounting. Profitability was influenced by lower capacity utilization, as revenue fell 8% including continued weakness in the automotive market. Osram expects charges in coming quarters related to improving its cost structure and product mix.

Metals technologies business again drives performance

All business units in **Industry Solutions** contributed to the increase in first-quarter profit. The Division's large metals technologies unit led first-quarter revenue and profit growth, continuing to convert its substantial backlog into current business. Orders came in lower compared to the record level of the prior-year quarter.

Project execution on track

Mobility delivered profit of 85 million in the first quarter, benefiting from a 10 million positive effect related to settlement of a claim in the rolling stock business. For comparison, profit of 44 million in the prior-year period was burdened by 32 million in charges related to Combino. Orders rose 8% in the quarter, including a major contract win in Germany.

Table of Contents

Sectors 7

Energy Sector**Conversion of order backlog****drives profit increases**

The **Energy Sector** turned in a strong first quarter, with all Divisions delivering higher profits compared to the prior-year period as well as profit margins within their target ranges. This sent Sector profit up to 756 million for the quarter, well above the prior-year period. Fossil Power Generation drove Sector profit growth year-over-year, as its prior-year results were burdened by more than 200 million in charges. Strong order backlogs at Renewable Energy and Oil & Gas enabled both Divisions to raise revenue, increase capacity utilization and significantly improve their profit margins. Power Transmission and Power Distribution continued to compete successfully in increasingly challenging markets for power infrastructure.

First-quarter revenue for Energy rose 24% year-over-year, to 6.232 billion, as all Divisions converted a high level of prior orders into current business. The Sector saw no material order cancellations in its backlog during the quarter. As expected, orders declined 6% due primarily to the Renewable Energy and Oil & Gas Divisions. While Renewable Energy took in a lower level of large orders compared to the prior-year quarter, market conditions for Oil & Gas cooled compared to surging demand in the prior-year period. On a geographic basis, revenue rose in all regions led by the Americas, while orders grew in the Asia, Australia region on particular strength at Fossil Power Generation. The Sector's book-to-bill ratio was strong at 1.37, though well down from 1.8 in the prior-year quarter.

Clean quarter, profitable growth

Fossil Power Generation led all Siemens Divisions with 289 million in profit and brought its profit margin into its target range. A year earlier, first-quarter profit was burdened by the substantial charges mentioned above. Revenue climbed 25%, reflecting strong order growth in recent years. Orders continued to grow at a robust rate, rising 16% to 3.997 billion including the growth in Asia, Australia mentioned above. The Division expects substantial volatility in equity investment income in coming quarters.

Continued ramp-up**drives profit higher**

Renewable Energy generated 101 million in profit on revenue of 713 million in the first quarter. Both figures represent high double-digit increases compared to the first quarter a year ago, as the Division matched new production capacity to a robust order backlog. As expected, orders in the quarter came in lower compared to the prior-year period, which included a higher level of large orders.

Table of Contents

Sectors 8

Strong increase in profitability

The **Oil & Gas** Division contributed \$106 million to first-quarter Sector profit and brought its profit margin into the target range. Revenue rose 27% year-over-year on conversion of the Division's strong order backlog. Orders in the current period came in lower than in the prior-year period, as expected, but the Division's book-to-bill ratio for the quarter was well above 1 and its order backlog remained robust.

Delivering sustained profit growth

The Energy Sector's two power grid infrastructure businesses continued to deliver steady profit growth in their profit margin ranges.

Power Transmission posted profit of \$152 million in the first quarter, up 22% compared to the prior-year period, on a 21% increase in revenue. First-quarter orders for the Division were nearly unchanged year-over-year. **Power Distribution** increased first-quarter profit even more sharply, to \$107 million, as all business units improved profitability compared to the same period a year earlier. Revenue rose 10% year-over-year, while orders came in 7% lower.

Table of Contents

Sectors 9

Healthcare Sector**Solid revenue and profit growth in tough market conditions**

The **Healthcare Sector** continued to compete successfully in a challenging environment, as slower growth and tighter credit conditions spread beyond the U.S. to other regions. First-quarter Sector profit increased to 342 million and the Imaging & IT Division was one of Siemens' top profit contributors in the quarter. Charges related to a major project at Workflow & Solutions held back profit growth year-over-year. The Diagnostics Division recorded a total of 66 million in PPA effects and integration costs associated with acquisitions, including Dade Behring. PPA effects and integration costs reduced Sector profit margin by 220 basis points in the first quarter, compared to 320 basis points in the prior-year period.

Healthcare's first-quarter revenue and orders rose 11% and 3%, respectively, including new volume from the acquisition of Dade Behring. Book-to-bill for the Sector was 0.99 compared to 1.06 in the same quarter a year ago.

Profit margin expansion in a challenging environment

Imaging & IT increased first-quarter profit 13% year-over-year, to 262 million. The overall medical imaging market in the U.S. remains challenging, with demand limited by tight credit and the Deficit Reduction Act (DRA).

Nevertheless, Imaging & IT achieved a 7% rise in revenue and a 1% increase in orders. On an organic basis, revenue was up 4% and orders were 2% below the level of the prior-year period.

Solid performance and lower integration costs

Diagnostics contributed 83 million to Sector profit in the first quarter, up from 67 million in the same quarter a year earlier. For comparison, that prior-year period included only two months of income from Dade Behring. PPA effects and integration costs related to acquisitions reduced Diagnostics' profit margin by approximately 760 basis points in the current quarter, including PPA effects of 46 million and integration costs of 20 million.

Table of Contents

Sectors 10

A year earlier, first-quarter PPA and integration costs at Diagnostics were 51 million and 35 million, respectively, and cut more than 1200 basis points from profit margin. Revenue and orders for the Division both rose more than 20% in the current period, benefiting from an additional month of volume from Dade Behring compared to the prior-year period. On an organic basis, revenue rose 2% and orders were up 1%.

Solutions business impacted by further charges

Workflow & Solutions posted a loss of 6 million in the first quarter. This result included 41 million in further charges related to project delays in the particle therapy business, partly offset by 11 million in divestment gains.

Table of Contents

Equity Investments and Cross-Sector Businesses 11

Equity Investments and Cross-Sector Businesses**Higher profits benefit from****lower loss related to NSN**

Equity Investments includes equity stakes not allocated to a Sector or Cross-Sector Business by reason of strategic fit as well as available-for-sale securities. Major components

Lower contribution from Cross-Sector Businesses

of Equity Investments include Nokia Siemens Networks B.V. (NSN) and Bosch und Siemens Hausgeräte GmbH.

Equity investments in the first quarter recorded a profit of 85 million compared to 36 million in the first quarter a year earlier. The

increase benefited from sales of equity investments. In addition, the equity investment loss related to NSN fell to

7 million from 37 million in the prior-year period. Income from Equity Investments is expected to be volatile in coming quarters.

Siemens IT Solutions and Services posted a profit of 46 million compared to 70 million in the first quarter a year earlier. Revenue declined 4% year-over-year, to 1.289 billion. Orders came in slightly above the prior-year level at 1.231 billion. On an organic basis, revenue was up 1% and orders rose 6%.

Income before income taxes at **Siemens Financial Services** (SFS) declined, due primarily to a significant increase in reserves for the commercial finance business. This was partly

offset by a higher profit in the

equity business. Total assets rose to 12.042 billion, driven in part by growth in customer financing activity. Return on Equity (ROE) decreased but remained above the target range. ROE calculated as

Income before income taxes divided by average allocated equity, which was 1.129 billion in the first quarter of fiscal 2009 and 863 million in the first quarter of fiscal 2008.

Table of Contents

Other Operations, Corporate Activities and Eliminations 12

Other Operations, Corporate Activities and Eliminations**SHC divested as close-out of Other Operations progresses**

Other Operations consist primarily of operating business activities not allocated to a Sector or Cross-Sector Business. By the end of fiscal 2009, these activities are to be integrated into a Siemens Sector or Cross-Sector Business, divested, moved to a joint venture, or closed. During the first quarter, Siemens again made good progress in the implementation of the program. Accordingly, first-quarter revenue fell to 264 million from 708 million in the prior-year period, and the loss from Other Operations dropped to 13 million from 64 million in the first quarter a year earlier. The prior-year period included a goodwill impairment of 70 million related to a building and infrastructure business, and a profit of 14 million at Siemens Home and Office Communication Devices (SHC). As previously reported, Siemens completed the transfer of an 80.2% stake in Siemens Home and Office Communications Devices GmbH & Co. KG to ARQUES Industries AG at the beginning of the current quarter.

Real estate disposals continue

Income before income taxes at SRE was 45 million in the first quarter, down from 139 million in the same period a year earlier, primarily due to lower gains from sales of real estate. SRE intends to continue real estate disposals in coming quarters, depending on market conditions.

Central costs fall on lower compliance expenses, one-time gains

Corporate items and pensions totaled a negative 236 million in the first quarter compared to a negative 315 million in the same period a year earlier. The improvement was due to Corporate items, which were a negative 166 million compared to a negative 338 million in the prior-year period. Within this change, expenses for outside advisors engaged in connection with investigations into legal and regulatory matters fell to 49 million from 93 million in the first quarter a year earlier. In addition, the current period benefited from a gain relating to a major asset retirement obligation and a positive effect related to shifting an employment bonus program from cash-based to share-based payment.

Centrally carried pension expense swung to a negative 70 million from a positive 23 million in the first quarter a year earlier, due primarily to higher benefit costs related to Siemens' principal pension plans compared to the prior-year period.

Impact from U.S. interest rate hedges

Income before income taxes from Eliminations, Corporate Treasury and other reconciling items in the first quarter was a negative 263 million compared to a negative 99 million in the prior-year period. The decline was due mainly to results of hedging activities not qualifying for hedge accounting related to a decline in U.S. dollar interest rates.

Table of Contents

Subsequent Events & Outlook 13

Subsequent Events

On January 26, 2009, after the close of the first quarter, Siemens announced that it will terminate the Shareholders Agreement for the joint venture Areva NP S.A.S. as contractually specified effective latest January 30, 2012, and sell its 34% minority interest in Areva NP S.A.S. to the majority shareholder Areva S.A. under the terms of a put agreement. The transaction is subject to the approval of antitrust authorities.

Outlook

Achieving previously announced income targets for fiscal 2009 has become even more ambitious due to market conditions. Total Sectors profit is targeted to reach 8.0 to 8.5 billion in fiscal 2009, provided that customers do not materially slow conversion of booked orders to revenue and pricing does not further diminish due to continued adverse market development. This outlook excludes impacts from legal and regulatory matters. As in the past, Siemens continues to closely monitor global financial and macroeconomic developments and their potential impact on Siemens.

Beginning today at 07:45 a.m. CET, the press conference at which CEO Peter Löscher and CFO Joe Kaeser discuss the quarterly figures will be broadcast live on the Internet at www.siemens.com/pressconference.

A recording of the press conference will subsequently be made available as well. Starting at 08:45 CET, Peter Löscher and Joe Kaeser will hold a telephone conference in English for analysts and investors, which can be followed live at www.siemens.com/analystcall.

Starting today at 10 a.m. CET, we will also provide a live video webcast on the internet of Chairman of the Supervisory Board Dr. Gerhard Cromme's and CEO Peter Löscher's speeches to the Annual Shareholders Meeting at the Olympic Hall in Munich, Germany. You can access the webcast at www.siemens.com/pressconference.

A video of the speeches will be available after the live webcast.

This document contains forward-looking statements and information that is, statements related to future, not past, events. These statements may be identified by words such as expects, looks forward to, anticipates, intends, plans, believes, seeks, estimates, will, project or words of similar meaning. Such statements are based on our current expectations and certain assumptions, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens' control, affect our operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. For us, particular uncertainties arise, among others, from changes in general economic and business conditions (including margin developments in major business areas and recessionary trends); the possibility that customers will delay conversion of booked orders into revenue or that our pricing power will be diminished by continued adverse market developments, to a greater extent than we currently expect; the behavior of financial markets, including fluctuations in interest and exchange rates, commodity and equity prices, debt prices (credit spreads) and financial assets generally; continued volatility and further deterioration of the capital markets; the commercial credit environment and, in particular, additional uncertainties arising out of the subprime, financial market and liquidity crises; future financial performance of major industries that we serve, including, without limitation, the Sectors Industry, Energy and Healthcare; the challenges of integrating major acquisitions and implementing joint ventures and other significant portfolio measures; introduction of competing products or technologies by other companies; lack of acceptance of new products or services by customers targeted by Siemens; changes in business strategy; the outcome of pending investigations and legal proceedings, including corruption investigations to which we are currently subject and actions resulting from the findings of these investigations; the potential impact of such investigations and proceedings on our ongoing business including our relationships with governments and other customers; the potential

impact of such matters on our financial statements; as well as various other factors. More detailed information about certain of these factors is contained throughout this report and in our other filings with the SEC, which are available on the Siemens website, www.siemens.com, and on the SEC's website, www.sec.gov. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the relevant forward-looking statement as expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens does not intend or assume any obligation to update or revise these forward-looking statements in light of developments which differ from those anticipated.

- (1) *Profit of the Sectors* as well as of **Equity Investments, Siemens IT Solutions and Services and Other Operations** is earnings before financing interest, certain pension costs and income taxes, whereas certain other items not considered performance indicative by Management may be excluded. *Profit of SFS and SRE* is Income before income taxes.
- (2) *Assets of the Sectors* as well as of **Equity Investments, Siemens IT Solutions and Services and Other Operations** is defined as Total assets less income tax assets, less non-interest bearing liabilities/provisions other than tax liabilities. *Assets of SFS and SRE* is Total assets.
- (3) *Free cash flow* represents net cash provided by (used in) operating activities less additions to

intangible assets and property, plant and equipment. *Free cash flow* of the **Sectors, Equity Investments, Siemens IT Solutions and Services and Other Operations** primarily exclude income tax, financing interest and certain pension related payments and proceeds. *Free cash flow* of **SFS**, a financial services business, and of **SRE** includes related financing interest payments and proceeds; income tax payments and proceeds of **SFS** and **SRE** are excluded.

- (4) *Amortization, depreciation and impairments* contains amortization and impairments of intangible assets (other than goodwill) and depreciation and impairments of property, plant and equipment, net of reversals of impairments. **Siemens** Goodwill impairment and impairment of non-current available-for-sale financial assets and investments accounted for under the equity method, net of reversals of

impairments amount
to 44 income and 87
expense for the three
months ended
December 31, 2008
and 2007,
respectively.

Due to rounding, numbers presented may not add up precisely to totals provided.

Investor Relations

Munich, January 26, 2008

Ad-hoc Announcement

according to § 15 WpHG (Securities Trading Act)

Siemens: Divestment of its stake in Areva NP joint venture

As contractually specified, Siemens AG will terminate the Shareholders Agreement for the Franco-German joint venture Areva NP S.A.S. effective latest January 30, 2012, and sell its entire stake to the majority shareholder Areva S.A. under the terms of a put agreement. Siemens stated its lack of exercising entrepreneurial influence within the joint venture as the reason behind the move. The transaction is subject to the approval of antitrust authorities. The purchase price for the shares to be transferred will be agreed upon by the contractual parties in accordance with the terms and conditions of the Shareholders Agreement. In 2001, Siemens combined its nuclear business activities with those of the French company Framatome and has since then held a minority share (34%) in the joint venture Areva NP (formerly Framatome ANP). Siemens will further evaluate all available options to continue its commitment in nuclear power plant business.

Siemens to divest its stake in Areva NP joint venture

Löscher: Nuclear power essential part of sustainable energy mix

As contractually specified, Siemens AG will terminate the Shareholders Agreement for the Franco-German joint venture Areva NP S.A.S., specified effective latest January 30, 2012, and sell its entire stake to the majority shareholder Areva S.A. under the terms of a put agreement. Siemens stated its lack of exercising entrepreneurial influence within the joint venture as the reason behind the move. The transaction is subject to the approval of antitrust authorities. The purchase price for the shares to be transferred will be agreed upon by the contractual parties in accordance with the terms and conditions of the Shareholders Agreement. In 2001, Siemens combined its nuclear business activities with those of the French company Framatome and has since then held a minority share (34 percent) in the joint venture Areva NP (formerly Framatome ANP).

In the past, Siemens and Areva had a good cooperation including since 2001 the one in the joint venture Areva NP as well. However, the role as a minority shareholder considerably limits the entrepreneurial maneuverability of Siemens within the joint venture. For that reason, the Supervisory Board of Siemens AG followed a corresponding decision of the Managing Board to terminate the Shareholders Agreement for the joint venture at the earliest date possible.

According to the put agreement, the majority shareholder Areva, which owns a 66 percent stake, will acquire the 34 percent of shares Siemens has within a period of three years. Siemens will fulfill its contractual obligations under the terms of the Shareholders Agreement for the Areva NP joint venture.

Siemens supplies the conventional island for nuclear power plants for Areva NP and joint customers. In addition, Siemens also wants to continue the good cooperation with Areva with operational instrumentation and control systems. Siemens will continue to offer those products to the nuclear power plant market. Siemens will further evaluate all available options to continue its commitment in nuclear power plant business.

Peter Löscher, President and CEO of Siemens said: We want to play an active role in shaping developments and this also applies to the nuclear energy market. That's why we've taken the initiative. In view of global climate change and the increasing power demand worldwide, for us nuclear energy remains an essential part of a sustainable energy mix.

Nuclear energy, which is practically CO₂-free, will gain in importance above all with a view to climate protection.

According to general forecast by 2030 there will be approximately 400 new nuclear power plants around the globe, representing a total investment of approximately EUR1,000 billion. Siemens AG, with its new Energy Sector setup, is strategically positioned as the only fully integrated provider along the energy conversion chain, from exploration to distribution. The company focuses on energy efficiency and the entire energy mix including fossil fuels like coal and natural gas as well as nuclear energy and renewables.

Independent of the entrepreneurial decision mentioned above, Siemens in France today holds leading positions in its Industry, Energy and Healthcare Sectors based on its presence there for more than 150 years. Through its workforce of 8,300 employees, seven production sites, partnerships with universities and higher education institutions, Siemens France plays an active part in economic development in France and abroad. Siemens France has centers of expertise working for the company throughout the world in high-tech sectors such as automatic transport systems, metallurgy and energy distribution. In fiscal 2008 (September 30), Siemens France sales amounted to nearly EUR2.2 billion, and new orders totaled approximately EUR2.8 billion.

Siemens AG (Berlin and Munich) is a global powerhouse in electronics and electrical engineering, operating in the industry, energy and healthcare sectors. The company has around 430,000 employees (in continuing operations) working to develop and manufacture products, design and install complex systems and projects, and tailor a wide range of solutions for individual requirements. For over 160 years, Siemens has stood for technical achievements, innovation, quality, reliability and internationality. In fiscal 2008, Siemens had revenue of 77.3 billion and a net income of 5.9 billion (IFRS). Further information is available on the Internet at: www.siemens.com.

Legal Proceedings – First Quarter Fiscal 2009

For information regarding investigations and other legal proceedings in which Siemens is involved, as well as the potential risks associated with such proceedings and their potential financial impact on the Company, please refer to Siemens' Annual Report for the fiscal year ended September 30, 2008 (Annual Report) and its annual report on Form 20-F for the fiscal year ended September 30, 2008 (Form 20-F), and, in particular, to the information contained in Item 3: Key Information – Risk Factors, Item 4: Information on the Company – Legal Proceedings, and Item 15: Controls and Procedures of the Form 20-F.

Significant developments regarding investigations and other legal proceedings that have occurred since the publication of Siemens' Annual Report and Form 20-F are described below.

Public corruption proceedings

Governmental and related proceedings

On December 15, 2008, Siemens AG announced that legal proceedings against it arising from allegations of bribing public officials were concluded on the same day in Munich, Germany, and in Washington, DC.

The Munich public prosecutor announced the termination of legal proceedings alleging the failure of the former Managing Board of Siemens AG to fulfill its supervisory duties. Siemens agreed to pay a fine of 395 million. The payment of the fine marks the conclusion of this legal proceeding against the Company by the Munich public prosecutor. The investigations of former members of the Managing Board, employees of the Company and other individuals remain unaffected by this resolution.

In Washington, DC, Siemens AG pleaded guilty in federal court to criminal charges of knowingly circumventing and failing to maintain adequate internal controls and failing to comply with the books and records provisions of the U.S. Foreign Corrupt Practices Act (FCPA). In related cases, three Siemens foreign subsidiaries, Siemens S.A. (Argentina), Siemens Bangladesh Ltd. and Siemens S.A. (Venezuela), pleaded guilty to individual counts of conspiracy to violate the FCPA. In connection with these pleas, Siemens AG and the three subsidiaries agreed to pay a fine of US\$450 million to resolve the charges of the United States Department of Justice (DOJ). At the same time, Siemens AG settled a civil action against it brought by the U.S. Securities and Exchange Commission (SEC) for violations of the FCPA. Without admitting or denying the allegations of the SEC complaint, Siemens agreed to the entry of a court judgment permanently restraining and enjoining Siemens AG from violations of the FCPA and to the disgorgement of profits in the amount of US\$350 million.

The agreement reflects the U.S. prosecutors' express recognition of Siemens' extraordinary cooperation as well as Siemens' new and comprehensive compliance program and extensive remediation efforts. Based on these facts, the lead agency for U.S. federal government contracts, the Defense Logistics Agency (DLA), issued a formal determination that Siemens remains a responsible contractor for U.S. government business.

Under the terms of the plea and settlement agreements reached in the United States, Siemens has engaged Dr. Theo Waigel, former German federal finance minister, as compliance monitor to evaluate and report, for a period of up to four years, on the Company's progress in implementing and operating its new compliance programs.

In the fourth quarter of fiscal 2008, the Company accrued a provision in the amount of approximately 1 billion in connection with the discussions with the Munich public prosecutor, the SEC and DOJ for the purpose of resolving their respective investigations. Cash outflows relating to the fines and disgorgements referred to above during the first quarter of fiscal 2009 amounted to 1.008 billion.

As previously reported, in October 2007, the Munich public prosecutor terminated a similar investigation relating to Siemens' former telecommunications or Communications (Com) Group. Siemens paid 201 million in connection with the termination of this investigation. This brings the total amount paid to authorities in Germany in connection with these legal proceedings to 596 million.

Table of Contents

As previously reported, in August 2007, the Nuremberg-Fürth prosecutor began an investigation into possible violations of law in connection with the United Nations Oil-for-Food Program. In December 2008, the prosecutor dismissed charges against all accused.

The Sao Paulo, Brazil, Public Prosecutor's Office has launched an investigation against Siemens. According to press reports, this may be with regard to suspicious payments relating to the former Com Group in 2000.

The Company remains subject to corruption-related investigations in several jurisdictions around the world. As a result, additional criminal or civil sanctions could be brought against the Company itself or against certain of its employees in connection with possible violations of law. In addition, the scope of pending investigations may be expanded and new investigations commenced in connection with allegations of bribery and other illegal acts. The Company's operating activities, financial results and reputation may also be negatively affected, particularly due to imposed penalties, fines, disgorgements, compensatory damages, third-party litigation, including by competitors, the formal or informal exclusion from public procurement contracts or the loss of business licenses or permits. Additional expenses and provisions may need to be recorded in the future for penalties, fines, damages or other charges, which could be material, in connection with the investigations.

Civil litigation

As previously reported, an alleged holder of Siemens AG American Depositary Shares filed a derivative lawsuit in February 2007 with the Supreme Court of the State of New York against certain current and former members of Siemens AG's Managing and Supervisory Boards as well as against Siemens AG as a nominal defendant, seeking various forms of relief relating to the allegations of corruption and related violations at Siemens. The stay agreement with respect to the suit was terminated in December 2008.

Siemens response

As previously reported, the Company investigates evidence of bank accounts at various locations, as well as the amount of the funds. Certain funds have been frozen by authorities. During the first quarter of fiscal 2009, the Company recorded immaterial amounts in other operating income from the recovery of funds from certain such accounts.

Antitrust proceedings

As previously reported, in February 2007, the Norwegian Competition Authority launched an investigation into possible antitrust violations involving Norwegian companies active in the field of fire security, including Siemens Building Technologies AS. In December 2008, the Norwegian Competition Authority issued a final decision that Siemens Building Technologies AS had not violated antitrust regulations.

As previously reported, in February 2007, the European Commission launched an investigation into possible antitrust violations involving European producers of power transformers, including Siemens AG and VA Tech, which Siemens acquired in July 2005. The German Antitrust Authority (Bundeskartellamt) has become involved in the proceeding and is responsible for investigating those allegations that relate to the German market. Power transformers are electrical equipment used as major components in electric transmission systems in order to adapt voltages. The Company is cooperating in the ongoing investigation with the European Commission and the German Antitrust Authority. In November 2008, the European Commission finalized its investigation and forwarded its statement of objections to the involved companies.

As previously reported, on October 25, 2007, upon the Company's appeal, a Hungarian competition court reduced administrative fines imposed on Siemens AG for alleged antitrust violations in the market of high-voltage gas-insulated switchgear from 320,000 to 120,000 and from 640,000 to 110,000 regarding VA Tech. The Company and the Competition Authority appealed the decision. In November 2008, the Court of Appeal confirmed the reduction of the fines. On December 5, 2008, the Competition Authority filed an extraordinary challenge with the Supreme Court based on alleged violations of law.

As previously reported, a suit and motion for approval of a class action was filed in Israel in December 2007 to commence a class action based on the fines imposed by the European Commission for alleged antitrust violations in the high-voltage gas-insulated switchgear market. Thirteen companies were named as defendants in the suit and motion, among them Siemens AG Germany, Siemens AG Austria and Siemens Israel Ltd. The class action alleged damages to electricity consumers in Israel in the amount of approximately 575 million

related to higher electricity prices claimed to have been paid because of the alleged antitrust violations. At a hearing on December 11, 2008, the plaintiff requested to withdraw from the action and from the motion to certify the action as a class action. The court approved the request and dismissed the action and the motion to certify.

In November 2008, a claim was issued by National Grid Electricity Transmission Plc. (National Grid) in the High Court of England and Wales in connection with the January 24, 2007 decision of the European Commission regarding alleged antitrust violations in the high-voltage gas-insulated switchgear market. Twenty-one companies have been named as defendants, including Siemens AG and Siemens affiliates. National Grid asserts claims in the aggregate amount of approximately £249 million for damages and compound interest. Siemens believes National Grid's claim to be without merit and intends to contest it.

In December 2008, the Company was informed that the Turkish Competition Authority has opened an investigation into violations of competition law in the area of medical equipment spare parts and service keys.

Other proceedings

In February 2007, the Company announced that public prosecutors in Nuremberg are conducting an investigation of certain current and former employees of the Company on suspicion of criminal breach of fiduciary duties against Siemens, tax evasion and a violation of the German Works Council Constitution Act (Betriebsverfassungsgesetz). The investigation related to an agreement entered into by Siemens with an entity controlled by the former head of the independent employee association AUB (Arbeitsgemeinschaft Unabhängiger Betriebsangehöriger) and payments made during the period 2001 to 2006 for which Siemens may not have received commensurate services in return. In April 2007, the labor union IG Metall lodged a criminal complaint against unknown individuals on suspicion that the Company breached the provisions of Section 119 of the Works Council Constitution Act by providing undue preferential support to AUB in connection with elections of the members of the Company's works councils. In November 2008, the Regional Court of Nuremberg-Fürth found a former member of the Managing Board of Siemens AG guilty of criminal breach of fiduciary duty and tax evasion. The Nuremberg-Fürth prosecutor is also conducting an investigation against two other former members of the Managing Board on suspicion of abetting breach of fiduciary duty.

As reported, Siemens AG is member of a supplier consortium consisting of Siemens AG and a further consortium consisting of Areva NP SAS and its 100 % affiliate Areva NP GmbH. The Company holds a 34% share in Areva NP SAS. The supplier consortium was contracted by Teollisuuden Voima Oyj (TVO) for the nuclear power plant project Olkiluoto 3 in Finland. The Company's participation in the project is approximately 27%. The Company's Areva consortium partners recently announced that they expect the project to be delayed by 38 months. Since the reasons for the delay are disputed by the parties, the supplier consortium filed a request for arbitration in December 2008 against TVO demanding an extension of time for construction and approximately 1 billion for outstanding payments and additional compensation. TVO has not yet filed its response to the request for arbitration, but has alleged in pre-arbitral correspondence that it is entitled to delay damages from the supplier consortium of approximately 2.4 billion.

On November 25, 2008, Siemens announced that the Company and the BenQ Mobile GmbH & Co. OHG Insolvency Administrator had reached a settlement after constructive discussions that began in 2006. In the settlement agreement, Siemens agreed to a gross payment of 300 million, which is expected to result in a net payment of approximately 255 million after taking into account Siemens' creditor claims. Since Siemens has made a sufficient provision for the expected settlement, the settlement will not have any material negative impact on results of operations for fiscal 2009. In December 2008, the Polish Agency of Internal Security (AWB) remanded into custody an employee of Siemens Healthcare Poland, in connection with an investigation regarding a public tender issued by the hospital of Wroclaw in 2008. According to the AWB, the Siemens employee and the deputy hospital director are accused of having manipulated the tender procedure.

The first quarter of fiscal 2009 included a total of 50 million in expenses for outside advisors engaged by Siemens in connection with the investigations into alleged violations of anti-corruption laws and related matters as well as remediation activities.

This document contains forward-looking statements and information that is, statements related to future, not past, events. These statements may be identified by words such as expects, looks forward to, anticipates, intends, plans, believes, seeks, estimates, will, project or words of similar meaning. Such statements are based on our current expectations and certain assumptions, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens' control, affect our operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. For us, particular uncertainties arise, among others, from changes in general economic and business conditions (including margin developments in major business areas and recessionary trends); the possibility that customers will delay conversion of booked orders into revenue or that our pricing power will be diminished by continued adverse market developments, to a greater extent than we currently expect; the behavior of financial markets, including fluctuations in interest and exchange rates, commodity and equity prices, debt prices (credit spreads) and financial assets generally; continued volatility and further deterioration of the capital markets; the commercial credit environment and, in particular, additional uncertainties arising out of the subprime, financial market and liquidity crises; future financial performance of major industries that we serve, including, without limitation, the Sectors Industry, Energy and Healthcare; the challenges of integrating major acquisitions and implementing joint ventures and other significant portfolio measures; introduction of competing products or technologies by other companies; lack of acceptance of new products or services by customers targeted by Siemens; changes in business strategy; the outcome of pending investigations and legal proceedings, including corruption investigations to which we are currently subject and actions resulting from the findings of these investigations; the potential impact of such investigations and proceedings on our ongoing business including our relationships with governments and other customers; the potential impact of such matters on our financial statements; as well as various other factors. More detailed information about certain of these factors is contained throughout this report and in our other filings with the SEC, which are available on the Siemens website, www.siemens.com, and on the SEC's website, www.sec.gov. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the relevant forward-looking statement as expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens does not intend or assume any obligation to update or revise these forward-looking statements in light of developments which differ from those anticipated.
