This Form 6-K consists of:

An announcement on power generation in the first quarter of 2010 of Huaneng Power International, Inc. (the “Registrant”), made by the Registrant on April 15, 2010.

Hong Kong Exchanges and Clearing Limited and The Stock Exchange of Hong Kong Limited take no responsibility for the contents of this document, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this document.

POWER GENERATION INCREASES 40.06%
IN THE FIRST QUARTER OF 2010

This announcement is made pursuant to Rules 13.09(1) and (2) of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Huaneng Power International, Inc. (the "Company") announces its power generation in the first quarter of 2010.

According to the Company's preliminary statistics, as of 31 March 2010, the Company's total domestic power generation within China on consolidated basis amounted to 58.578 billion kWh, representing an increase of 40.06% over the same period last year. The increase in power generation of the Company was mainly attributable to the following reasons:

1. The general economy in China has improved, resulting in a relatively greater increase in the national electricity utilization in the first quarter. Likewise, the base number of the power generation was relatively lower because there had been a low demand for electricity under the impact of the global financial crisis during the same period of last year;
 2. The newly operating generating units contributed to the growth of the power generation; and
 3. The Company has increased its sales efforts and expanded various marketing channels, thus facilitating a growth in the Company's power generation.
-

The power generation of each of the Company's domestic power plants in the first quarter of 2010 is listed below (in billion kWh):

Domestic Power Plant	Power generation in the first quarter of 2010	Power generation in the first quarter of 2009	Change
