

Flaherty & Crumrine PREFERRED SECURITIES INCOME FUND INC

Form N-30B-2

April 27, 2018

*FLAHERTY & CRUMRINE Preferred Securities Income Fund*

To the Shareholders of Flaherty & Crumrine Preferred Securities Income Fund (“FFC”):

Despite general weakness in most fixed-income markets (e.g., investment-grade corporate bonds), attributable mostly to higher benchmark interest rates, preferred securities performed reasonably well on a relative basis. Total return<sup>1</sup> on net asset value (“NAV”) for the first fiscal quarter was -0.2%, while total return on market price was -5.1%.

The U.S. economy remains on solid footing, with most economists forecasting faster growth in 2018. Inflation has remained in check thus far, and modest wage growth and strong business investment suggest that faster economic growth can be accommodated without the economy overheating. Faster economic growth combined with optimism around tax reform has caused interest rates to move modestly higher. Tax reform should be supportive of growth and investment, but much of it will be deficit-financed and could result in higher Treasury rates as government borrowing increases.

Investors often associate higher long-term interest rates with lower prices for preferred securities, and to some extent this is true. However, sensitivity of the Fund’s preferred portfolio to benchmark interest rates is much lower today than it was ten years ago. That is primarily attributable to larger holdings of fixed-to-floating rate securities relative to traditional fixed-for-life preferreds. Including these securities in a portfolio (~74% as of 2/28/2018) reduces sensitivity to benchmark interest rates. Moderate interest-rate sensitivity, along with a tightening of preferred credit spreads during the quarter, offset much of the weakness experienced by other fixed-income asset classes.

Most of the portfolio experienced credit-spread tightening as noted above, but one area of mixed performance was the energy sector, notably master limited partnerships (MLPs). The MLP industry appears to be in transition. The traditional MLP structure has struggled to meet investor expectations, leading some to collapse partnership structures into simpler organizations. Lower corporate tax rates from recent tax reform may accelerate that trend. While a simpler structure should benefit preferred investors over time, many MLPs issued preferreds in the last few months, causing yields to increase as concessions were offered to entice demand. Importantly, individual MLPs are in various stages of transition, and we remain comfortable with the level of MLP exposure in the Fund’s portfolio (~6.4% as of 2/28/2018). Many of the MLPs held by the Fund are among the strongest credits in the sector and a step ahead of peers in navigating these rough waters.

The Fund’s dividend rate was reduced during the quarter to reflect changes in interest rates and credit spreads that have cumulated over time. Tightening by the Federal Reserve has raised short-term interest rates and, therefore, leverage cost, while lower preferred yields have gradually reduced portfolio income. The investment objective of the Fund is to provide high current income consistent with the preservation of capital, and we believe the Fund will continue to meet that objective – although distributable income may be reduced as we proceed through this economic cycle. Fund shareholders have benefited from years of record-low interest rates and low leverage costs, but rates have moved up as the economy has improved. We believe the Fund’s strategy of investing in preferred securities and using leverage to increase income will continue to produce a competitive distribution rate for shareholders. We encourage shareholders to read the Fund’s 2017 annual report for a more-thorough discussion of this important topic.

---

<sup>1</sup> Following the methodology required by the Securities and Exchange Commission, total return assumes dividend reinvestment.

<sup>2</sup> December 1, 2017 — February 28, 2018

Market volatility is likely to increase from record-low levels as we move into later stages of this economic cycle, but we believe preferreds will continue to offer competitive performance. Their combination of credit quality and yield (much of which is tax-advantaged) will be difficult to replicate in other fixed-income asset classes.

As always, we encourage you to visit the Fund's website, [www.preferredincome.com](http://www.preferredincome.com), for timely and important information.

Sincerely,

The Flaherty & Crumrine Portfolio Management Team

§Date shown is maturity date unless referencing the end of the fixed-rate period of a fixed-to-floating rate security.

\*Securities eligible for the Dividends Received Deduction and distributing Qualified Dividend Income.

\*\*Securities distributing Qualified Dividend Income only.

\*\*\*Aggregate cost of securities held.

\*\*\*\*Securities exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional buyers. At February 28, 2018, these securities amounted to \$333,078,949 or 25.0% of total managed assets.

<sup>(1)</sup>All or a portion of this security is pledged as collateral for the Fund's loan. The total value of such securities was \$792,198,367 at February 28, 2018.

<sup>(2)</sup>Foreign Issuer.

<sup>(3)</sup>Level 3, illiquid security (designation is unaudited; see Note 2: Additional Accounting Standards).

<sup>(4)</sup>Valued at fair value as determined in good faith by or under the direction of the Board of Directors as of February 28, 2018.

<sup>(5)</sup>Represents the rate in effect as of the reporting date.

†Non-income producing.

††The issuer has filed for bankruptcy protection. As a result, the Fund may not be able to recover the principal invested and also does not expect to receive income on this security going forward.

‡The percentage shown for each investment category is the total value of that category as a percentage of total managed assets.

<sup>(1)</sup>Whenever the net asset value per share of the Fund's Common Stock is less than or equal to the market price per share on the reinvestment date, new shares issued will be valued at the higher of net asset value or 95% of the then current market price. Otherwise, the reinvestment shares of Common Stock will be purchased in the open market.

Flaherty & Crumrine Preferred Securities Income Fund Incorporated

**Notes to Financial Statements (Unaudited)**

**1. Aggregate Information for Federal Income Tax Purposes**

At February 28, 2018, the aggregate cost of securities for federal income tax purposes was \$1,331,182,492, the aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$90,476,862 and the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$96,336,475.

**2. Additional Accounting Standards**

*Fair Value Measurements:* The Fund has analyzed all existing investments to determine the significance and character of all inputs to their fair value determination. The levels of fair value inputs used to measure the Fund's investments are characterized into a fair value hierarchy. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment's valuation. The three levels of the fair value hierarchy are described below:

Level 1 – quoted prices in active markets for identical securities

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period.

During the reporting period, securities with an aggregate market value of \$18,614,778 were transferred into Level 2 from Level 1. The securities were transferred due to a decrease in the quantity and quality of the information related to trading activity or broker quotes for these securities. During the period, there were no transfers into Level 1 from Level 2. During the reporting period, there were no transfers into or out of Level 3.

The fair values of the Fund's investments are generally based on market information and quotes received from brokers or independent pricing services that are approved by the Board of Directors and are unaffiliated with the Adviser. To assess the continuing appropriateness of security valuations, management, in consultation with the Adviser, regularly compares current prices to prior prices, prices across comparable securities, actual sale prices for securities in the

Fund's portfolio, and market information obtained by the Adviser as a function of being an active market participant.

Securities with quotes that are based on actual trades or actionable bids and offers with a sufficient level of activity on or near the measurement date are classified as Level 1. Securities that are priced using quotes derived from implied values, indicative bids and offers, or a limited number of actual trades—or the same information for securities that are similar in many respects to those being valued—are classified as Level 2. If market information is not available for securities being valued, or materially-comparable securities, then those securities are classified as Level 3. In considering market information, management evaluates changes in liquidity, willingness of a broker to execute at the quoted price, the depth and consistency of prices from pricing services, and the existence of observable trades in the market.

## Flaherty &amp; Crumrine Preferred Securities Income Fund Incorporated

**Notes to Financial Statements (Unaudited) (Continued)**

The following is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

|  | <b>Total<br/>Investments</b> | <b>Preferred<br/>Securities<br/><br/>Banking</b> | <b>Corporate<br/>Debt<br/>Securities<br/><br/>Financial<br/>Services</b> |
|--|------------------------------|--|--|
| <b>Balance as of 11/30/17</b>                    | \$97,085                     | \$3,510  | \$93,575   |
| Accrued discounts/premiums                       | —                            | —  | —  |
| Realized gain/(loss)                             | —                            | —  | —  |
| Change in unrealized appreciation/(depreciation) | (28,356 )                    | —  | (28,356 )  |
| Purchases  | —                            | —  | —  |
| Sales  | —                            | —  | —  |
| Transfer in                                      | —                            | —  | —  |
| Transfer out                                     | —                            | —  | —  |
| <b>Balance as of 02/28/18</b>                    | \$68,729                     | \$3,510  | \$65,219   |

For the three months ended February 28, 2018, total change in unrealized gain/(loss) on Level 3 securities still held at period-end and included in the change in net assets was \$(28,356).

The following table summarizes the valuation techniques used and unobservable inputs developed to determine the fair value of Level 3 investments:

| <b>Category</b>                                   | <b>Fair<br/>Value<br/>at<br/>02/28/18</b> | <b>Valuation Technique</b>                    | <b>Unobservable Input</b>             | <b>Input Range<br/>(Wgt Avg)</b> |
|---|---|---|---------------------------------------|----------------------------------|
| Preferred Securities<br>(Banking)                 | \$3,510                                   | Bankruptcy recovery                           | Credit/Structure-specific<br>recovery | 0.00% - 0.02%<br>(0.01%)         |
| Corporate Debt Securities<br>(Financial Services) | 65,219                                    | Bankruptcy recovery and<br>market information | Credit/Structure-specific<br>recovery | 1% - 4%<br>(1.4%)                |

The significant unobservable inputs used in the fair value measurement technique for bankruptcy recovery are based on recovery analysis that is specific to the security being valued, including the level of subordination and structural features of the security, and the current status of any bankruptcy or liquidation proceedings. Observable market trades in bankruptcy claims are utilized by management, when available, to assess the appropriateness of valuations, although the frequency of trading depends on the specific credit and seniority of the claim. Expected recoveries in bankruptcy by security type and industry do not tend to deviate much from historical recovery rates, which are very

low (sometimes zero) for preferred securities and more moderate for senior debt. Significant changes in these inputs would result in a significantly higher or lower fair value measurement.
