U.S. SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES

EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2017.

Commission file number: 0-22208

QCR HOLDINGS, INC.

(Exact name of registrant as specified in its charter)

Delaware 42-1397595
(State of incorporation) (I.R.S. Employer Identification No.)

3551 7th Street, Moline, Illinois 61265

(Address of principal executive offices)

(309) 736-3580

(Registrant's telephone number, including area code)

Edgar Filing: QCR HOLDINGS INC - Form 10-K

Securities registered pursuant to Section 12(b) of the Exchange Act:

Common stock, \$1.00 Par Value The Nasdaq Global Market

Securities registered pursuant to Section 12(g) of the Exchange Act:

Preferred Share Purchase Rights

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes [] No [X]

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act.

Yes [] No [X]

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for past 90 days. Yes [X] No []

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes [X] No []

Indicate by check mark if disclosure of delinquent filers in response to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [X]

Table of Contents

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer	Non-accelerated filer	Smaller reporting company	Emerging growth company
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	(Do not check if a smaller reporting company)			

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant, based on the last sales price quoted on The Nasdaq Global Market on June 30, 2017, the last business day of the registrant’s most recently completed second fiscal quarter, was approximately \$586,207,934.

As of February 28, 2018 the Registrant had outstanding 13,931,628 shares of common stock, \$1.00 par value per share.

Documents incorporated by reference:

Part III of Form 10-K Certain portions of the proxy statement for annual meeting of stockholders to be held in May 2018.

Table of Contents

Part I

Item 1. Business

General. QCR Holdings, Inc. is a multi-bank holding company headquartered in Moline, Illinois, that was formed in February 1993 under the laws of the state of Delaware. In 2016, the Company elected to operate as a financial holding company under the BHCA. The Company serves the Quad Cities, Cedar Rapids, Waterloo/Cedar Falls, Des Moines/Ankeny and Rockford communities through the following four wholly-owned banking subsidiaries, which provide full-service commercial and consumer banking and trust and asset management services:

QCBT, which is based in Bettendorf, Iowa, and commenced operations in 1994;
CRBT, which is based in Cedar Rapids, Iowa, and commenced operations in 2001;
CSB, which is based in Ankeny, Iowa, and was acquired in 2016; and
RB&T, which is based in Rockford, Illinois, and commenced operations in 2005.

On October 1, 2017, the Company acquired Guaranty Bank, headquartered in Cedar Rapids, Iowa. On December 2, 2017, the Company merged Guaranty Bank with and into CRBT with CRBT as the surviving bank. See Note 2 to the Consolidated Financial Statements for further discussion.

On August 31, 2016, the Company acquired CSB, located in Ankeny, Iowa (Des Moines MSA). See Note 2 to the Consolidated Financial Statements for further discussion.

The Company engages in direct financing lease contracts through m2, a wholly-owned subsidiary of QCBT based in Brookfield, Wisconsin.

Subsidiary Banks. Segments of the Company have been established by management as defined by the structure of the Company's internal organization, focusing on the financial information that the Company's operating decision-makers routinely use to make decisions about operating matters. The Company's primary segment, Commercial Banking, is geographically divided by markets into the secondary segments which are the four subsidiary banks wholly-owned by the Company: QCBT, CRBT, CSB and RB&T. See the consolidated financial statements incorporated herein generally, and Note 22 to the consolidated financial statements specifically, for additional business segment information.

QCBT was capitalized on October 13, 1993, and commenced operations on January 7, 1994. QCBT is an Iowa-chartered commercial bank that is a member of the Federal Reserve System. QCBT provides full service commercial, correspondent, and consumer banking and trust and asset management services in the Quad Cities and adjacent communities through its five offices that are located in Bettendorf and Davenport, Iowa and in Moline, Illinois. QCBT, on a consolidated basis with m2, had total segment assets of \$1.54 billion and \$1.40 billion as of December 31, 2017 and 2016, respectively.

CRBT is an Iowa-chartered commercial bank that is a member of the Federal Reserve System. The Company commenced operations in Cedar Rapids in June 2001, operating as a branch of QCBT. The Cedar Rapids branch operation then began functioning under the CRBT charter in September 2001. The acquired branches of CNB operate as a division of CRBT under the name "Community Bank & Trust." CRBT provides full-service commercial and consumer banking and trust and asset management services to Cedar Rapids and Waterloo/Cedar Falls, Iowa and adjacent communities through its eight facilities. The headquarters for CRBT is located in downtown Cedar Rapids with three other branches located in Cedar Rapids, one branch in Marion, two branches located in Waterloo and one branch located in Cedar Falls. CRBT had total segment assets of \$1.3 billion and \$913.1 million as of December 31, 2017 and 2016, respectively.

CSB is an Iowa-chartered commercial bank that is a member of the Federal Reserve System. CSB was acquired by the Company in 2016. CSB provides full-service commercial and consumer banking to Des Moines and adjacent communities through its headquarters located in Ankeny and its nine other branch facilities throughout the greater Des Moines area. CSB had total segment assets of \$670.5 million and \$600.1 million as of December 31, 2017 and 2016, respectively.

Table of Contents

RB&T is an Illinois-chartered commercial bank that is a member of the Federal Reserve System. The Company commenced operations in Rockford, Illinois in September 2004, operating as a branch of QCBT, and that operation began functioning under the RB&T charter in January 2005. RB&T provides full-service commercial and consumer banking and trust and asset management services to Rockford and adjacent communities through its headquarters located on Guilford Road at Alpine Road in Rockford and its branch facility located in downtown Rockford. RB&T had total segment assets of \$461.7 million and \$391.2 million as of December 31, 2017 and 2016, respectively.

Other Operating Subsidiaries. m2, which is based in Brookfield, Wisconsin, is engaged in the business of leasing machinery and equipment to C&I businesses under direct financing lease contracts.

Trust Preferred Subsidiaries. Following is a listing of the Company's non-consolidated subsidiaries formed for the issuance of trust preferred securities, including pertinent information as of December 31, 2017 and 2016:

Name	Date Issued	Amount Issued as of 12/31/17	Amount Issued as of 12/31/16	Interest Rate	Interest Rate as of 12/31/2017	Interest Rate as of 12/31/2016
QCR Holdings Statutory Trust II	February 2004	\$ 10,310,000	\$ 10,310,000	2.85% over 3-month LIBOR	4.54%	3.85%
QCR Holdings Statutory Trust III	February 2004	8,248,000	8,248,000	2.85% over 3-month LIBOR	4.54%	3.85%
QCR Holdings Statutory Trust V	February 2006	10,310,000	10,310,000	1.55% over 3-month LIBOR	2.91%	2.43%
Community National Statutory Trust II	September 2004	3,093,000	3,093,000	2.17% over 3-month LIBOR	3.80%	3.17%
Community National Statutory Trust III	March 2007	3,609,000	3,609,000	1.75% over 3-month LIBOR	3.32%	2.71%
Guaranty Bankshares Statutory Trust I	May 2005	4,640,000	-	1.75% over 3-month LIBOR	3.34%	N/A
		\$40,210,000	\$35,570,000	Weighted Average Rate	3.82%	3.26%

Securities issued by all of the trusts listed above mature thirty years from the date of issuance, but are all currently callable at par at any time. Interest rate reset dates vary by trust.

Guaranty Bankshares Statutory Trust I was acquired in 2017 as part of the acquisition of Guaranty Bank and is further discussed in Note 12 to the Consolidated Financial Statements.

Business. The Company's principal business consists of attracting deposits and investing those deposits in loans/leases and securities. The deposits of the subsidiary banks are insured to the maximum amount allowable by the FDIC. The Company's results of operations are dependent primarily on net interest income, which is the difference between the interest earned on its loans/leases and securities and the interest paid on deposits and borrowings. The Company's operating results are affected by economic and competitive conditions, particularly changes in interest rates, government policies and actions of regulatory authorities, as described more fully in this Form 10-K. Its operating results also can be affected by trust fees, investment advisory and management fees, deposit service charge fees, gains on the sale of residential real estate and government guaranteed loans, earnings from BOLI and other noninterest income. Operating expenses include employee compensation and benefits, occupancy and equipment expense, professional and data processing fees, advertising and marketing expenses, bank service charges, FDIC and other insurance, loan/lease expenses and other administrative expenses.

The Company and its subsidiaries collectively employed 641 and 572 FTEs at December 31, 2017 and 2016, respectively. The majority of the increase in FTEs during 2017 was the result of the acquisition of Guaranty Bank.

The Federal Reserve is the primary federal regulator of the Company, QCBT, CRBT, RB&T and CSB. QCBT, CRBT and CSB are also regulated by the Iowa Superintendent and RB&T is regulated by the IDFP. The FDIC, as administrator of the DIF, also has regulatory authority over the subsidiary banks. See Appendix A for more information on the federal and state statutes and regulations that are applicable to the Company and its subsidiaries.

Table of Contents

Lending/Leasing. The Company and its subsidiaries provide a broad range of commercial and retail lending/leasing and investment services to corporations, partnerships, individuals, and government agencies. The subsidiary banks actively market their services to qualified lending and deposit clients. Officers actively solicit the business of new clients entering their market areas as well as long-standing members of the local business community. The Company has an established lending/leasing policy which includes a number of underwriting factors to be considered in making a loan/lease, including, but not limited to, location, loan-to-value ratio, cash flow, collateral and the credit history of the borrower.

In accordance with Iowa regulation, the legal lending limit to one borrower for QCBT, CRBT and CSB, calculated as 15% of aggregate capital, was \$22.8 million, \$17.4 million, and \$12.0 million, respectively, as of December 31, 2017. In accordance with Illinois regulation, the legal lending limit to one borrower for RB&T, calculated as 25% of aggregate capital, totaled \$11.4 million as of December 31, 2017.

The Company recognizes the need to prevent excessive concentrations of credit exposure to any one borrower or group of related borrowers. As such, the Company has established an in-house lending limit, which is lower than each subsidiary bank's legal lending limit, in an effort to manage individual borrower exposure levels.

The in-house lending limit is the maximum amount of credit each subsidiary bank will extend to a single borrowing entity or group of related entities. As of January 1, 2017, the Company implemented a tiered approach, based on the risk rating. Under the most recent in-house limit, total credit exposure to a single borrowing entity or group of related entities will not exceed the following, subject to certain exceptions:

	High Quality (Risk Ratings 1-3)	Medium Quality (Risk Rating 4)	Low Quality (Risk Ratings 5-8)
	<i>(dollars in thousands)</i>		
QCBT	\$13,500	\$11,250	\$7,750
CRBT	\$9,500	\$8,000	\$5,500
CSB	\$9,500	\$8,000	\$5,500
RB&T	\$4,000	\$3,250	\$2,250
QCRH Consolidated	\$22,000	\$16,500	\$11,000

The QCRH Consolidated amount represents the maximum amount of credit that all affiliated banks, when combined, will extend to a single borrowing entity or group of related entities, subject to certain exceptions.

In addition, m2's in-house lending limit is \$1.0 million to a single leasing entity or group of related entities, subject to certain exceptions.

As part of the loan monitoring activity at the four subsidiary banks, credit administration personnel interact closely with senior bank management. For example, the internal loan committee of each subsidiary bank meets weekly. The Company has a separate in-house loan review function to analyze credits of the subsidiary banks. To complement the in-house loan review, an independent third-party performs external loan reviews. Historically, management has attempted to identify problem loans at an early stage and to aggressively seek a resolution of those situations.

The Company recognizes that a diversified loan/lease portfolio contributes to reducing risk in the overall loan/lease portfolio. The specific loan/lease portfolio mix is subject to change based on loan/lease demand, the business environment and various economic factors. The Company actively monitors concentrations within the loan/lease portfolio to ensure appropriate diversification and concentration risk is maintained.

Table of Contents

Specifically, each subsidiary bank's total loans as a percentage of average assets may not exceed 85%. In addition, following are established policy limits and the actual allocations for the subsidiary banks as of December 31, 2017 for the loan portfolio organized by loan type, reflected as a percentage of the subsidiary bank's average gross loans:

Type of Loan *	QCBT		CRBT		CSB		RB&T

Proper pricing of loans is necessary to provide adequate return to the Company's stockholders. Loan pricing, as established by the subsidiary banks' internal loan committees, includes consideration for the cost of funds, loan maturity and risk, origination and maintenance costs, appropriate stockholder return, competitive factors, and the economic environment. The portfolio contains a mix of loans with fixed and floating interest rates. Management attempts to maximize the use of interest rate floors on its variable rate loan portfolio. Refer to Item 7A. Quantitative

and Qualitative Disclosures about Market Risk for more discussion on the Company's management of interest rate risk.

Table of Contents

C&I Lending

As noted above, the subsidiary banks are active C&I lenders. The current areas of emphasis include loans to small and mid-sized businesses with a wide range of operations such as wholesalers, manufacturers, building contractors, business services companies, other banks, and retailers. The banks provide a wide range of business loans, including lines of credit for working capital and operational purposes, and term loans for the acquisition of facilities, equipment and other purposes. Since 2010, the subsidiary banks have been active in participating in lending programs offered by the SBA and USDA. Under these programs, the government entities will generally provide a guarantee of repayment ranging from 50% to 85% of the principal amount of the qualifying loan.

Loan approval is generally based on the following factors:

- Ability and stability of current management of the borrower;
- Stable earnings with positive financial trends;
- Sufficient cash flow to support debt repayment;
- Earnings projections based on reasonable assumptions;
- Financial strength of the industry and business; and
- Value and marketability of collateral.

For C&I loans, the Company assigns internal risk ratings which are largely dependent upon the aforementioned approval factors. The risk rating is reviewed annually or on an as needed basis depending on the specific circumstances of the loan. See Note 1 to the consolidated financial statements for additional information, including the internal risk rating scale.

As part of the underwriting process, management reviews current borrower financial statements. When appropriate, certain C&I loans may contain covenants requiring maintenance of financial performance ratios such as, but not limited to:

- Minimum debt service coverage ratio;
- Minimum current ratio;
- Maximum debt to tangible net worth ratio; and/or
- Minimum tangible net worth.

Establishment of these financial performance ratios depends on a number of factors, including risk rating and the specific industry.

Collateral for these loans generally includes accounts receivable, inventory, equipment, and real estate. The Company's lending policy specifies approved collateral types and corresponding maximum advance percentages. The value of collateral pledged on loans must exceed the loan amount by a margin sufficient to absorb potential erosion of its value in the event of foreclosure and cover the loan amount plus costs incurred to convert it to cash. Approved non-real estate collateral types and corresponding maximum advance percentages for each are listed below.

Table of Contents

<u>Approved Collateral Type</u>	<u>Maximum Advance %</u>
<u>Financial Instruments</u>	
U.S. Government Securities	90% of market value
Securities of Federal Agencies	90% of market value
Municipal Bonds rated by Moody's As "A" or better	80% of market value
Listed Stocks	75% of market value
Mutual Funds	75% of market value
Cash Value Life Insurance	95%, less policy loans
Savings/Time Deposits (Bank)	100% of current value
Penny Stocks	0%
<u>General Business</u>	
Accounts Receivable	80% of eligible accounts
Inventory	50% of value
Crop and Grain Inventories	80% of current market value
Livestock	80% of purchase price, or current market value; or higher if cross-collateralized with other assets
Fixed Assets (Existing)	50% of net book value, or 75% of orderly liquidation appraised value
Fixed Assets (New)	80% of cost, or higher if cross-collateralized with other assets
Leasehold Improvements	0%

Generally, if the above collateral is part of a cross-collateralization with other approved assets, then the maximum advance percentage may be higher.

The Company's lending policy specifies maximum term limits for C&I loans. For term loans, the maximum term is generally seven years. Generally, term loans range from three to five years. For lines of credit, the maximum term is typically 365 days.

In addition, the subsidiary banks often take personal guarantees or cosigners to help assure repayment. Loans may be made on an unsecured basis if warranted by the overall financial condition of the borrower.

Following is a summary of the five largest industry concentrations within the C&I portfolio as of December 31, 2017 and 2016:

2017	2016
Amount	Amount
<i>(dollars in thousands)</i>	

Edgar Filing: QCR HOLDINGS INC - Form 10-K

Administration of urban planning & rural development	\$83,344	\$37,097
Hotels & motels	73,200	35,992
Bank holding companies	66,950	66,070
Skilled nursing care facilities	60,989	43,864
General medical & surgical hospitals	35,217	33,175

10

Table of ContentsCRE Lending

The subsidiary banks also make CRE loans. CRE loans are subject to underwriting standards and processes similar to C&I loans, in addition to those standards and processes specific to real estate loans. Collateral for these loans generally includes the underlying real estate and improvements, and may include additional assets of the borrower. The Company's lending policy specifies maximum loan-to-value limits based on the category of CRE (commercial real estate loans on improved property, raw land, land development, and commercial construction). These limits are the same limits as, or in some situations, more conservative than, those established by regulatory authorities. Following is a listing of these limits as well as some of the other guidelines included in the Company's lending policy for the major categories of CRE loans:

CRE Loan Types	Maximum Advance Rate **	Maximum Term
CRE Loans on Improved Property *	80%	7 years
Raw Land	Lesser of 90% of project cost, or 65% of "as is" appraised value	12 months
Land Development	Lesser of 85% of project cost, or 75% of "as-completed" appraised value	24 months
Commercial Construction Loans	Lesser of 85% of project cost, or 80% of "as-completed" appraised value	365 days
Residential Construction Loans to Builders	Lesser of 90% of project cost, or 80% of "as-completed" appraised value	12 months

* Generally, the debt service coverage ratio must be a minimum of 1.25x for non-owner occupied loans and 1.15x for owner-occupied loans. For loans greater than \$500 thousand, the subsidiary banks sensitize this ratio for deteriorated economic conditions, major changes in interest rates, and/or significant increases in vacancy rates.

** These maximum rates are consistent with, or in some situations, more conservative than, those established by regulatory authorities.

The Company's lending policy also includes guidelines for real estate appraisals and evaluations, including minimum appraisal and evaluation standards based on certain transactions. In addition, the subsidiary banks often take personal guarantees to help assure repayment.

In addition, management tracks the level of owner-occupied CRE loans versus non-owner occupied CRE loans. Owner-occupied CRE loans are generally considered to have less risk. As of December 31, 2017 and 2016, approximately 26% and 30%, respectively, of the CRE loan portfolio was owner-occupied.

In accordance with regulatory guidelines, the Company exercises heightened risk management practices when non-owner occupied CRE lending exceeds 300% of total risk-based capital or construction, land development and other land loans exceed 100% of total risk-based capital. Although CSB's loan portfolio has historically been real estate dominated and its real estate portfolio levels exceed these policy limits, it has established a Credit Risk Committee to routinely monitor its real estate loan portfolio.

Table of Contents

Following is a listing of the significant industries within the Company's CRE loan portfolio as of December 31, 2017 and 2016:

	2017		2016	
	Amount	%	Amount	%
	<i>(dollars in thousands)</i>			
Lessors of Nonresidential Buildings	\$388,648	30 %	\$322,337	30 %
Lessors of Residential Buildings	199,047	15 %	141,321	13 %
Hotels	70,447	5 %	35,006	3 %
New Housing For-Sale Builders	61,480	5 %	56,711	5 %
Nonresidential Property Managers	51,621	4 %	70,914	7 %
Nursing Care Facilities	47,008	4 %	34,768	3 %
Land Subdivision	44,192	3 %	45,132	4 %
Other *	441,049	34 %	387,270	35 %
Total Commercial Real Estate Loans	\$1,303,492	100 %	\$1,093,459	100 %

* "Other" consists of all other industries. None of these had concentrations greater than \$26.1 million, or 2%, of total CRE loans as of December 31, 2017.

Following is a breakdown of non owner-occupied CRE by property type as of December 31, 2017 and 2016:

	2017		2016	
	Amount	%	Amount	%
	<i>(dollars in thousands)</i>			
Retail	\$169,655	22 %	\$128,394	22 %
Multi-family	143,685	18 %	112,960	19 %
Office	133,174	17 %	97,878	16 %
Hotel/motel	76,186	10 %	33,828	6 %
Industrial/warehouse	37,401	5 %	46,149	8 %
Other	224,246	29 %	176,713	30 %
Total income-producing CRE	\$784,347	100 %	\$595,922	100 %

A portion of the Company's construction portfolio is considered non-residential construction. Following is a summary of industry concentrations within that category as of December 31, 2017 and 2016:

	2017		2016	
	Amount	%	Amount	%
	<i>(dollars in thousands)</i>			

Edgar Filing: QCR HOLDINGS INC - Form 10-K

Multi-family	\$16,416	19 %	\$17,991	19 %
Retail	12,033	14 %	14,647	16 %
Office	11,580	13 %	9,342	10 %
Hotel/motel	8,407	10 %	1,983	2 %
Industrial/warehouse	3,604	4 %	5,810	6 %
Other	36,195	41 %	43,707	47 %
Total non-residential construction loans	\$88,235	100%	\$93,480	100%

Additionally, the Company had approximately \$81.3 million and \$103.0 million of residential construction loans outstanding as of December 31, 2017 and 2016, respectively. Of this amount, approximately 79% was considered speculative, while 21% was pre-sold at December 31, 2017 and approximately 75% was considered speculative, while 25% was pre-sold at December 31, 2016.

Table of Contents

Direct Financing Leasing

m2 leases machinery and equipment to C&I customers under direct financing leases. All lease requests are subject to the credit requirements and criteria as set forth in the lending/leasing policy. In all cases, a formal independent credit analysis of the lessee is performed.

The following private and public sector business assets are generally acceptable to consider for lease funding:

- Computer systems;
- Photocopy systems;
- Fire trucks;
- Specialized road maintenance equipment;
- Medical equipment;
- Commercial business furnishings;
- Vehicles classified as heavy equipment;
- Trucks and trailers;
- Equipment classified as plant or office equipment; and
- Marine boat lifts.

m2 will generally refrain from funding leases of the following type:

- Leases collateralized by non-marketable items;
- Leases collateralized by consumer items, such as vehicles, household goods, recreational vehicles, boats, etc.;
- Leases collateralized by used equipment, unless its remaining useful life can be readily determined; and
- Leases with a repayment schedule exceeding seven years.

Residential Real Estate Lending

Generally, the subsidiary banks' residential real estate loans conform to the underwriting requirements of Freddie Mac and Fannie Mae to allow the subsidiary banks to resell loans in the secondary market. The subsidiary banks structure most loans that will not conform to those underwriting requirements as adjustable rate mortgages that adjust in one to five years, and then retain these loans in their portfolios. Servicing rights are generally not retained on the loans sold in the secondary market. The Company's lending policy establishes minimum appraisal and other credit guidelines.

The following table presents the originations and sales of residential real estate loans for the Company. Included in originations is activity related to the refinancing of previously held in-house mortgages.

	For the year ended December					
	31,					
	2017		2016		2015	
	<i>(dollars in thousands)</i>					
Originations of residential real estate loans	\$38,079		\$52,721		\$41,279	
Sales of residential real estate loans	\$33,165		\$35,499		\$23,726	
Percentage of sales to originations	87	%	67	%	57	%

Installment and Other Consumer Lending

The consumer lending department of each subsidiary bank provides many types of consumer loans, including home improvement, home equity, motor vehicle, signature loans and small personal credit lines. The Company's lending policy addresses specific credit guidelines by consumer loan type. In particular, for home equity loans and home equity lines of credit, the minimum credit bureau score is 650. For both home equity loans and lines of credit, the maximum advance rate is 90% of value with a minimum credit bureau score of 720, and the maximum advance rate is 80% of value with a credit bureau score of 680 to 719. The maximum term on home equity loans is 10 years and maximum amortization is 15 years. The maximum term on home equity lines of credit is 10 years.

Table of Contents

In some instances for all loans/leases, it may be appropriate to originate or purchase loans/leases that are exceptions to the guidelines and limits established within the Company's lending policy described above. In general, exceptions to the lending policy do not significantly deviate from the guidelines and limits established within the lending policy and, if there are exceptions, they are generally noted as such and specifically identified in loan/lease approval documents.

Competition. The Company currently operates in the highly competitive Quad Cities, Cedar Rapids, Waterloo/Cedar Falls, Des Moines, and Rockford markets. Competitors include not only other commercial banks, credit unions, thrift institutions, and mutual funds, but also insurance companies, FinTech companies, finance companies, brokerage firms, investment banking companies, and a variety of other financial services and advisory companies. Many of these competitors are not subject to the same regulatory restrictions as the Company. Many of these unregulated competitors compete across geographic boundaries and provide customers increasing access to meaningful alternatives to banking services. The Company competes in markets with a number of much larger financial institutions with substantially greater resources and larger lending limits.

Appendices. The commercial banking business is a highly regulated business. See Appendix A for a summary of the federal and state statutes and regulations that are applicable to the Company and its subsidiaries. Supervision, regulation and examination of banks and bank holding companies by bank regulatory agencies are intended primarily for the protection of depositors rather than stockholders of bank holding companies and banks.

See Appendix B for tables and schedules that show selected financial statistical information relating to the business of the Company required to be presented pursuant to federal securities laws. Consistent with the information presented in the Form 10-K, results are presented as of and for the fiscal years ended December 31, 2017, 2016, and 2015, as applicable.

Internet Site, Securities Filings and Governance Documents. The Company maintains an Internet site at www.qcrh.com. The Company makes available free of charge through this site its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and other reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as soon as reasonably practicable after it electronically files such material with, or furnishes it to, the SEC. These filings are available at <http://www.snl.com/IRW/Docs/1024092>. Also available are many of its corporate governance documents, including the Code of Conduct (<http://www.snl.com/IRW/govdocs/1024092>).

Item 1A. Risk Factors

In addition to the other information in this Annual Report on Form 10-K, stockholders or prospective investors should carefully consider the following risk factors:

Conditions in the financial market and economic conditions, including conditions in the markets in which we operate, generally may adversely affect our business.

Our general financial performance is highly dependent upon the business environment in the markets where we operate and in particular, the ability of borrowers to pay interest on and repay principal of outstanding loans and the value of collateral securing those loans, as well as demand for loans and other products and services it offers. A favorable business environment is generally characterized by, among other factors, economic growth, efficient capital markets, low inflation, low unemployment, high business and investor confidence, and strong business earnings. Unfavorable or uncertain economic and market conditions can be caused by declines in economic growth, business activity or investor or business confidence; limitations on the availability or increases in the cost of credit and capital; increases in inflation or interest rates; high unemployment, natural disasters, or a combination of these or other factors.

Table of Contents

While economic conditions have improved since the recession, there can be no assurance that this improvement will continue. Uncertainty regarding continuing economic improvement may result in changes in consumer and business spending, borrowing, and savings habits. Downturns in the markets where our banking operations occur could result in a decrease in demand for our products and services, an increase in loan delinquencies and defaults, high or increased levels of problem assets and foreclosures and reduced wealth management fees resulting from lower asset values. Such conditions could adversely affect the credit quality of our loans, financial condition and results of operations.

Potential future acquisitions could be difficult to integrate, divert the attention of key personnel, disrupt our business, dilute stockholder value and adversely affect our financial results.

As part of our business strategy, we may consider acquisitions of other banks or financial institutions or branches, assets or deposits of such organizations. There is no assurance, however, that we will determine to pursue any of these opportunities or that if we determine to pursue them that we will be successful. Acquisitions involve numerous risks, any of which could harm our business, including:

difficulties in integrating the operations, technologies, products, existing contracts, accounting processes and personnel of the target company and realizing the anticipated synergies of the combined businesses;

difficulties in supporting and transitioning customers of the target company;

diversion of financial and management resources from existing operations;

the price we pay or other resources that we devote may exceed the value we realize, or the value we could have realized if we had allocated the purchase price or other resources to another opportunity;

risks of entering new markets or areas in which we have limited or no experience or are outside our core competencies;

potential loss of key employees, customers and strategic alliances from either our current business or the business of the target company;

risks of acquiring loans with deteriorated credit quality;

assumption of unanticipated problems or latent liabilities; and

inability to generate sufficient revenue to offset acquisition costs.

Future acquisitions may involve the issuance of our equity securities as payment or in connection with financing the business or assets acquired, and as a result, could dilute the ownership interests of existing stockholders. In addition, consummating these transactions could result in the incurrence of additional debt and related interest expense, as well as unforeseen liabilities, all of which could have a material adverse effect on our business, results of operations and financial condition. The failure to successfully evaluate and execute acquisitions or otherwise adequately address the risks associated with acquisitions could have a material adverse effect on our business, results of operations and financial condition.

We must effectively manage our credit risk.

There are risks inherent in making any loan, including risks inherent in dealing with specific borrowers, risks of nonpayment, risks resulting from uncertainties as to the future value of collateral and risks resulting from changes in economic and industry conditions. We attempt to minimize our credit risk through prudent loan application approval procedures, careful monitoring of the concentration of our loans within specific industries and periodic independent reviews of outstanding loans by our credit review department and an external third party. However, we cannot assure you that such approval and monitoring procedures will reduce these credit risks.

Table of Contents

The majority of our subsidiary banks' loan portfolios are invested in C&I and CRE loans, and we focus on lending to small to medium-sized businesses. The size of the loans we can offer to commercial customers is less than the size of the loans that our competitors with larger lending limits can offer. This may limit our ability to establish relationships with the area's largest businesses. Smaller companies tend to be at a competitive disadvantage and generally have limited operating histories, less sophisticated internal record keeping and financial planning capabilities and fewer financial resources than larger companies. As a result, we may assume greater lending risks than financial institutions that have a lesser concentration of such loans and tend to make loans to larger, more established businesses. Collateral for these loans generally includes accounts receivable, inventory, equipment and real estate. However, depending on the overall financial condition of the borrower, some loans are made on an unsecured basis. In addition to C&I and CRE loans, our subsidiary banks are also active in residential mortgage and consumer lending. Our borrowers may experience financial difficulties, and the level of nonperforming loans, charge-offs and delinquencies could rise, which could negatively impact our business through increased provision, reduced interest income on loans/leases, and increased expenses incurred to carry and resolve problem loans/leases.

C&I loans make up a large portion of our loan/lease portfolio.

C&I loans were \$1.1 billion, or approximately 38% of our total loan/lease portfolio, as of December 31, 2017. Our C&I loans are primarily made based on the identified cash flow of the borrower and secondarily on the underlying collateral provided by the borrower. Most often, this collateral is accounts receivable, inventory, equipment and real estate. Credit support provided by the borrower for most of these loans and the probability of repayment is based on the liquidation value of the pledged collateral and enforcement of a personal guarantee, if any exists. Whenever possible, we require a personal guarantee or cosigner on commercial loans. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers. The collateral securing these loans may lose value over time, may be difficult to appraise, and may fluctuate in value based on the success of the business. In addition, a prolonged recovery period could harm or continue to harm the businesses of our C&I customers and reduce the value of the collateral securing these loans.

Our loan/lease portfolio has a significant concentration of CRE loans, which involve risks specific to real estate values.

CRE lending comprises a significant portion of our lending business. Specifically, CRE loans were \$1.3 billion, or approximately 44% of our total loan/lease portfolio, as of December 31, 2017. Of this amount, \$332.7 million, or approximately 26%, was owner-occupied. The market value of real estate securing our CRE loans can fluctuate significantly in a short period of time as a result of market conditions in the geographic area in which the real estate is located. Adverse developments affecting real estate values in one or more of our markets could increase the credit risk associated with our loan portfolio. Additionally, real estate lending typically involves higher loan principal amounts and the repayment of the loans generally is dependent, in large part, on sufficient income from the properties securing the loans to cover operating expenses and debt service. Economic events or governmental regulations outside of the control of the borrower or lender could negatively impact the future cash flow and market values of the affected

properties.

The problems that have occurred in the residential real estate and mortgage markets throughout much of the U.S. in prior years also affected the commercial real estate market. In our market areas, we generally experienced a downturn in credit performance by our CRE loan customers in prior years relative to historical norms, and despite recent improvements in certain aspects of the economy, a level of uncertainty continues to exist in the economy and credit markets. There can be no guarantee that we will not experience further deterioration in the performance of CRE and other real estate loans in the future. In such case, we may not be able to realize the amount of security that we anticipated at the time of originating the loan, which could cause us to increase our provision for loan losses and adversely affect our operating results, financial condition and/or capital.

16

Table of Contents

Our allowance may prove to be insufficient to absorb losses in our loan/lease portfolio.

We establish our allowance for loan and lease losses in consultation with management of our subsidiaries and maintain it at a level considered adequate by management to absorb loan/lease losses that are inherent in the portfolio. The amount of future loan/lease losses is susceptible to changes in economic, operating and other conditions, including changes in interest rates, which may be beyond our control, and such losses may exceed current estimates. At December 31, 2017, our allowance as a percentage of total gross loans/leases was 1.16%, and as a percentage of total NPLs was 184.28%. In accordance with GAAP for acquisition accounting, the loans acquired through the acquisition of Guaranty Bank and CSB were recorded at fair value; therefore, there was no allowance associated with Guaranty Bank's and CSB's loans at acquisition. Management continues to evaluate the allowance needed on the acquired loans factoring in the net remaining discount (\$8.1 million at December 31, 2017). When factoring this remaining discount into the Company's allowance to total loans and leases calculation, the Company's allowance as a percentage of total loans and leases increases from 1.16% to 1.43%.

In addition, we had net charge-offs as a percentage of gross average loans/leases of 0.19% for the year ended December 31, 2017. Because of the concentration of C&I and CRE loans in our loan portfolio, which tend to be larger in amount than residential real estate and installment loans, the movement of a small number of loans to nonperforming status can have a significant impact on these ratios. Although management believes that the allowance as of December 31, 2017 was adequate to absorb losses on any existing loans/leases that may become uncollectible, we cannot predict loan/lease losses with certainty, and we cannot assure you that our allowance will prove sufficient to cover actual loan/lease losses in the future, particularly if economic conditions are more difficult than what management currently expects. Additional provisions and loan/lease losses in excess of our allowance may adversely affect our business, financial condition and results of operations.

The Company's information systems may experience an interruption or breach in security and cyber-attacks, all of which could have a material adverse effect on the Company's business.

The Company relies heavily on internal and outsourced technologies, communications, and information systems to conduct its business. Additionally, in the normal course of business, the Company collects, processes and retains sensitive and confidential information regarding our customers. As the Company's reliance on technology has increased, so have the potential risks of a technology-related operation interruption (such as disruptions in the Company's customer relationship management, general ledger, deposit, loan, or other systems) or the occurrence of a cyber-attacks (such as unauthorized access to the Company's systems). These risks have increased for all financial institutions as new technologies, the use of the Internet and telecommunications technologies (including mobile devices) to conduct financial and other business transactions and the increased sophistication and activities of organized crime, perpetrators of fraud, hackers, terrorists and others have also increased. In addition to cyber-attacks or other security breaches involving the theft of sensitive and confidential information, hackers have engaged in attacks against financial institutions, retailers and government agencies, particularly denial of service attacks that are designed to disrupt key business or government services, such as customer-facing web sites. The Company is not able to anticipate or implement effective preventive measures against all security breaches of these types, especially

because the techniques used change frequently and because attacks can originate from a wide variety of sources. It is also possible that a cyber incident, such as a security breach, may remain undetected for a period of time, further exposing the Company to technology-related risks. However, applying guidance from the Federal Financial Institutions Examination Council, the Company has analyzed and will continue to analyze security related to device specific considerations, user access topics, transaction-processing and network integrity.

The Company also faces risks related to cyber-attacks and other security breaches in connection with credit card and debit card transactions that typically involve the transmission of sensitive information regarding the Company's customers through various third parties, including merchant acquiring banks, payment processors, payment card networks and its processors. Some of these parties have in the past been the target of security breaches and cyber-attacks, and because the transactions involve third parties and environments such as the point of sale that the Company does not control or secure, future security breaches or cyber-attacks affecting any of these third parties could impact the Company through no fault of its own, and in some cases it may have exposure and suffer losses for breaches or attacks relating to them. Despite third-party security risks that are beyond our control, the Company offers its customers protection against fraud and attendant losses for unauthorized use of debit cards in order to stay competitive in the marketplace. Offering such protection (including the cost of replacing compromised cards) to our customers exposes the Company to potential losses which, in the event of a data breach at one or more retailers of considerable magnitude, may adversely affect its business, financial condition, and results of operations. Further cyber-attacks or other breaches in the future, whether affecting the Company or others, could intensify consumer concern and regulatory focus and result in increased costs, all of which could have a material adverse effect on the Company's business. To the extent we are involved in any future cyber-attacks or other breaches, the Company's reputation could be affected, which could also have a material adverse effect on the Company's business, financial condition or results of operations.

Table of Contents

System failure or breaches of our network security could subject us to increased operating costs as well as litigation and other liabilities.

The computer systems and network infrastructure we use could be vulnerable to unforeseen problems. Our operations are dependent upon our ability to protect our computer equipment against damage from physical theft, fire, power loss, telecommunications failure or a similar catastrophic event, as well as from security breaches, denial of service attacks, viruses, worms and other disruptive problems caused by hackers. Any damage or failure that causes an interruption in our operations could have a material adverse effect on our financial condition and results of operations. Computer break-ins, phishing and other disruptions could also jeopardize the security of information stored in and transmitted through our computer systems and network infrastructure, as well as that of our customers engaging in internet banking activities, which may result in significant liability to us and may cause existing and potential customers to refrain from doing business with us. Although we, with the help of third-party service providers, intend to continue to implement security technology and establish operational procedures to prevent such damage, there can be no assurance that these security measures will be successful. In addition, advances in computer capabilities, new discoveries in the field of cryptography or other developments could result in a compromise or breach of the algorithms we and our third-party service providers use to encrypt and protect customer transaction data. Any interruption in, or breach of security of, our computer systems and network infrastructure, or that of our internet banking customers, could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could have a material adverse effect on our financial condition and results of operations. The Company may also need to spend additional resources to enhance protective and detective measures or to conduct investigations to remediate any vulnerabilities that arise.

We are subject to certain operational risks, including, but not limited to, customer or employee fraud and data processing system failures and errors.

Employee errors and employee and customer misconduct could subject us to financial losses or regulatory sanctions and seriously harm our reputation. Misconduct by our employees could include hiding unauthorized activities from us, improper or unauthorized activities on behalf of our customers or improper use of confidential information. It is not always possible to prevent employee errors and misconduct, and the precautions we take to prevent and detect this activity may not be effective in all cases. Employee errors could also subject us to financial claims for negligence.

We maintain a system of internal controls and insurance coverage to mitigate operational risks, including data processing system failures and errors and customer or employee fraud. Despite having business continuity plans and other safeguards, the Company could still be affected. Should our internal controls fail to prevent or detect an occurrence, and if any resulting loss is not insured or exceeds applicable insurance limits, such failure could have a material adverse effect on our business, financial condition and results of operations.

We may be materially and adversely affected by the highly regulated environment in which we operate.

The Company and its bank subsidiaries are subject to extensive federal and state regulation, supervision and examination. Banking regulations are primarily intended to protect depositors' funds, FDIC funds, customers and the banking system as a whole, rather than stockholders. These regulations affect our lending practices, capital structure, investment practices, dividend policy and growth, among other things.

As a bank holding company, we are subject to regulation and supervision primarily by the Federal Reserve. QCBT, CRBT and CSB, as Iowa-chartered state member banks, are subject to regulation and supervision primarily by both the Iowa Superintendent and the Federal Reserve. RB&T, as an Illinois-chartered state member bank, is subject to regulation and supervision primarily by both the IDFPB and the Federal Reserve. We and our banks undergo periodic examinations by these regulators, who have extensive discretion and authority to prevent or remedy unsafe or unsound practices or violations of law by banks and bank holding companies.

Table of Contents

The primary federal and state banking laws and regulations that affect us are described in Appendix A to this report. These laws, regulations, rules, standards, policies and interpretations are constantly evolving and may change significantly over time. For example, the Dodd-Frank Act significantly changed the regulation of financial institutions and the financial services industry. In addition, in recent years the Federal Reserve has adopted numerous new regulations addressing banks' overdraft and mortgage lending practices. Further, the Basel III regulatory capital reforms increased both the amount and quality of capital that financial institutions must hold.

U.S. financial institutions are also subject to numerous monitoring, recordkeeping, and reporting requirements designed to detect and prevent illegal activities such as money laundering and terrorist financing. These requirements are imposed primarily through the Bank Secrecy Act which was most recently amended by the Patriot Act. We have instituted policies and procedures to protect us and our employees, to the extent reasonably possible, from being used to facilitate money laundering, terrorist financing and other financial crimes. There can be no guarantee, however, that these policies and procedures are effective.

Failure to comply with applicable laws, regulations or policies could result in sanctions by regulatory agencies, civil monetary penalties, and/or damage to our reputation, which could have a material adverse effect on us. Although we have policies and procedures designed to mitigate the risk of any such violations, there can be no assurance that such violations will not occur.

The financial services industry, as well as the broader economy, may be subject to new legislation, regulation, and government policy.

At this time, it is difficult to predict the legislative and regulatory changes that will result from the combination of a new President of the United States and the first year since 2010 in which both Houses of Congress and the White House have majority memberships from the same political party. Recently, however, both the new President and senior members of the House of Representatives have advocated for significant reduction of financial services regulation, to include amendments to the Dodd-Frank Act and structural changes to the CFPB. The new Administration and Congress also may cause broader economic changes due to changes in governing ideology and governing style. New appointments to the Federal Reserve could affect monetary policy and interest rates, and changes in fiscal policy could affect broader patterns of trade and economic growth. Future legislation, regulation, and government policy could affect the banking industry as a whole, including our business and results of operations, in ways that are difficult to predict. In addition, our results of operations also could be adversely affected by changes in the way in which existing statutes and regulations are interpreted or applied by courts and government agencies.

Monetary policies and regulations of the Federal Reserve could adversely affect our business, financial condition and results of operations.

In addition to being affected by general economic conditions, our earnings and growth are affected by the policies of the Federal Reserve. An important function of the Federal Reserve is to regulate the money supply and credit conditions. Among the instruments used by the Federal Reserve to implement these objectives are open market operations in U.S. government securities, adjustments of the discount rate and changes in reserve requirements against bank deposits. These instruments are used in varying combinations to influence overall economic growth and the distribution of credit, bank loans, investments and deposits. Their use also affects interest rates charged on loans or paid on deposits.

The monetary policies and regulations of the Federal Reserve have had a significant effect on the operating results of commercial banks in the past and are expected to continue to do so in the future. The effects of such policies upon our business, financial condition and results of operations cannot be predicted.

Table of Contents

Interest rates and other conditions impact our results of operations.

Our profitability is in large part a function of the spread between the interest rates earned on investments and loans/leases and the interest rates paid on deposits and other interest bearing liabilities. Like most banking institutions, our net interest spread and margin will be affected by general economic conditions and other factors, including fiscal and monetary policies of the federal government that influence market interest rates and our ability to respond to changes in such rates. At any given time, our assets and liabilities will be such that they are affected differently by a given change in interest rates. As a result, an increase or decrease in rates, the length of loan/lease terms, the mix of adjustable and fixed rate loans/leases in our portfolio, the length of time deposits and borrowings, and the rate sensitivity of our deposit customers could have a positive or negative effect on our net income, capital and liquidity. We measure interest rate risk under various rate scenarios using specific criteria and assumptions. A summary of this process, along with the results of our net interest income simulations is presented at “Quantitative and Qualitative Disclosures about Market Risk” included under Item 7A of Part II of this Form 10-K. Although we believe our current level of interest rate sensitivity is reasonable and effectively managed, significant fluctuations in interest rates may have an adverse effect on our business, financial condition and results of operations.

We are required to maintain capital to meet regulatory requirements, and if we fail to maintain sufficient capital, whether due to losses, an inability to raise additional capital or otherwise, our financial condition, liquidity and results of operations, as well as our ability to maintain regulatory compliance, would be adversely affected.

The Company and each of its banking subsidiaries are required by federal and state regulatory authorities to maintain adequate levels of capital to support their operations, which have recently increased due to the effectiveness of the Basel III regulatory capital reforms. We intend to grow our business organically and to explore opportunities to grow our business by taking advantage of attractive acquisition opportunities, and such growth plans may require us to raise additional capital to ensure that we have adequate levels of capital to support such growth on top of our current operations. Our ability to raise additional capital, when and if needed or desired, will depend on conditions in the capital markets, economic conditions and a number of other factors, including investor perceptions regarding the banking industry and market conditions, and governmental activities, many of which are outside our control, and on our financial condition and performance. Accordingly, we cannot assure you that we will be able to raise additional capital if needed or on terms acceptable to us. Our failure to meet these capital and other regulatory requirements could affect customer confidence, our ability to grow, our costs of funds and FDIC insurance costs, our ability to pay dividends on common and preferred stock and to make distributions on our trust preferred securities, our ability to make acquisitions, and our business, results of operations and financial condition.

Failure to pay interest on our debt may adversely impact our ability to pay common stock dividends.

As of December 31, 2017, we had \$40.2 million of junior subordinated debentures held by six business trusts that we control. Interest payments on the debentures, which totaled \$1.5 million for 2017, must be paid before we pay dividends on our capital stock, including our common stock. We have the right to defer interest payments on the debentures for up to 20 consecutive quarters. However, if we elect to defer interest payments, all deferred interest must be paid before we may pay dividends on our capital stock. Deferral of interest payments on the debentures could cause a subsequent decline in the market price of our common stock because we would not be able to pay dividends on our common stock.

As a bank holding company, our sources of funds are limited.

We are a bank holding company, and our operations are primarily conducted by our subsidiary banks, which are subject to significant federal and state regulation. When available, cash to pay dividends to our stockholders is derived primarily from dividends received from our subsidiary banks. Our ability to receive dividends or loans from our subsidiary banks is restricted. Dividend payments by our subsidiaries to us in the future will require generation of future earnings by them and could require regulatory approval if any proposed dividends are in excess of prescribed guidelines. Further, as a structural matter, our right to participate in the assets of our subsidiary banks in the event of a liquidation or reorganization of any of the banks would be subject to the claims of the creditors of such bank, including depositors, which would take priority except to the extent we may be a creditor with a recognized claim. As of December 31, 2017, our subsidiary banks had deposits and other liabilities in the aggregate of approximately \$3.6 billion.

Table of Contents

Declines in asset values may result in impairment charges and adversely affect the value of our investments, financial performance and capital.

The market value of investments in our securities portfolio has become increasingly volatile in recent years, and as of December 31, 2017, we had gross unrealized losses of \$5.4 million, or 0.8% of amortized cost, in our investment portfolio (partially offset by gross unrealized gains of \$4.5 million). The market value of investments may be affected by factors other than the underlying performance of the servicer of the securities or the mortgages underlying the securities, such as ratings downgrades, adverse changes in the business climate and a lack of liquidity in the secondary market for certain investment securities. On a quarterly basis, we formally evaluate investments and other assets for impairment indicators. We may be required to record additional impairment charges if our investments suffer a decline in value that is considered other-than-temporary. If we determine that a significant impairment has occurred, we would be required to charge against earnings the credit-related portion of the OTTI, which could have a material adverse effect on our results of operations in the periods in which the write-offs occur. Based on management's evaluation, it was determined that the gross unrealized losses at December 31, 2017 were temporary and primarily a function of the changes in certain market interest rates.

Liquidity risks could affect operations and jeopardize our business, results of operations and financial condition.

Liquidity is essential to our business. An inability to raise funds through deposits, borrowings, the sale of securities and/or loans and other sources could have a substantial negative effect on our liquidity. Our primary sources of funds consist of cash from operations, deposits, investment maturities, repayments, and calls, and loan/lease repayments. Additional liquidity is provided by federal funds purchased from the FRB or other correspondent banks, FHLB advances, wholesale and customer repurchase agreements, brokered deposits, and the ability to borrow at the FRB's Discount Window. Our access to funding sources in amounts adequate to finance or capitalize our activities or on terms that are acceptable to us could be impaired by factors that affect us directly or the financial services industry or economy in general, such as disruptions in the financial markets or negative views and expectations about the prospects for the financial services industry.

During periods of economic turmoil, the financial services industry and the credit markets generally may be materially and adversely affected by significant declines in asset values and depressed levels of liquidity. Furthermore, regional and community banks generally have less access to the capital markets than do the national and super-regional banks because of their smaller size and limited analyst coverage. Any decline in available funding could adversely impact our ability to originate loans/leases, invest in securities, meet our expenses, pay dividends to our stockholders, or fulfill obligations such as repaying our borrowings or meeting deposit withdrawal demands, any of which could have a material adverse impact on our liquidity, business, results of operations and financial condition.

The success of our SBA lending program is dependent upon the continued availability of SBA loan programs, our status as a preferred lender under the SBA loan programs and our ability to comply with applicable SBA lending requirements.

As an SBA Preferred Lender, we enable our clients to obtain SBA loans without being subject to the potentially lengthy SBA approval process necessary for lenders that are not SBA Preferred Lenders. The SBA periodically reviews the lending operations of participating lenders to assess, among other things, whether the lender exhibits prudent risk management. When weaknesses are identified, the SBA may request corrective actions or impose other restrictions, including revocation of the lender's Preferred Lender status. If we lose our status as a Preferred Lender, we may lose our ability to compete effectively with other SBA Preferred Lenders, and as a result we would experience a material adverse effect to our financial results. Any changes to the SBA program, including changes to the level of guaranty provided by the federal government on SBA loans or changes to the level of funds appropriated by the federal government to the various SBA programs, may also have an adverse effect on our business, results of operations and financial condition.

Historically we have sold the guaranteed portion of our SBA 7(a) loans in the secondary market. These sales have resulted in our earning premium income and/or have created a stream of future servicing income. There can be no assurance that we will be able to continue originating these loans, that a secondary market will exist or that we will continue to realize premiums upon the sale of the guaranteed portion of these loans. When we sell the guaranteed portion of our SBA 7(a) loans, we incur credit risk on the retained, non-guaranteed portion of the loans.

In the event of a loss resulting from default and the SBA determines there is a deficiency in the manner in which the loan was originated, funded or serviced by the us, the SBA may require us to repurchase the loan, deny its liability under the guaranty, reduce the amount of the guaranty, or, if it has already paid under the guaranty, seek recovery of the principal loss related to the deficiency from us, any of which could adversely affect our business, results of operations and financial condition.

Table of Contents

Our business is concentrated in and dependent upon the continued growth and welfare of the Quad Cities, Cedar Rapids, Waterloo/Cedar Falls, Des Moines/Ankeny, and Rockford markets.

We operate primarily in the Quad Cities, Cedar Rapids, Waterloo/Cedar Falls, Des Moines/Ankeny and Rockford markets, and as a result, our financial condition, results of operations and cash flows are subject to changes in the economic conditions in those areas. We have developed a particularly strong presence in Bettendorf, Cedar Falls, Cedar Rapids, Davenport, Waterloo, and Ankeny, Iowa and Moline, Rock Island, and Rockford, Illinois and their surrounding communities. Our success depends upon the business activity, population, income levels, deposits and real estate activity in these markets. Although our customers' business and financial interests may extend well beyond these market areas, adverse economic conditions that affect these market areas could reduce demand for our products and services, affect the ability of our customers to repay their loans to us, increase the levels of our nonperforming and problem loans, and generally affect our financial condition and results of operations. Because of our geographic concentration, we are less able than other regional or national financial institutions to diversify our credit risks across multiple markets.

We face intense competition in all phases of our business from other banks and financial institutions.

The banking and financial services businesses in our markets are highly competitive. Our competitors include large regional banks, local community banks, savings and loan associations, securities and brokerage companies, mortgage companies, insurance companies, finance companies, money market mutual funds, credit unions, online lenders and other non-bank financial services providers. Many of these competitors are not subject to the same regulatory restrictions as we are. Many of our unregulated competitors compete across geographic boundaries and are able to provide customers with a feasible alternative to traditional banking services.

Increased competition in our markets may result in a decrease in the amounts of our loans and deposits, reduced spreads between loan/lease rates and deposit rates or loan/lease terms that are more favorable to the borrower. Any of these results could have a material adverse effect on our ability to grow and remain profitable. If increased competition causes us to significantly discount the interest rates we offer on loans or increase the amount we pay on deposits, our net interest income could be adversely impacted. If increased competition causes us to modify our underwriting standards, we could be exposed to higher losses from lending and leasing activities. Additionally, many of our competitors are much larger in total assets and capitalization, have greater access to capital markets, have larger lending limits and offer a broader range of financial services than we can offer.

The stock market can be volatile, and fluctuations in our operating results and other factors, could cause our stock price to decline.

The stock market has experienced, and may continue to experience, fluctuations that significantly impact the market prices of securities issued by many companies. Most recently, like the stock of other financial institutions generally, the price of the Company's common stock as reported on the Nasdaq Global Market has increased substantially since the U.S. presidential election. Market fluctuations could also adversely affect our stock price. These fluctuations have often been unrelated or disproportionate to the operating performance of particular companies. These broad market fluctuations, as well as general economic, systemic, political and market conditions, such as recessions, loss of investor confidence, interest rate changes, or international currency fluctuations, may negatively affect the market price of our common stock. Moreover, our operating results may fluctuate and vary from period to period due to the risk factors set forth herein. As a result, period-to-period comparisons should not be relied upon as an indication of future performance. Our stock price could fluctuate significantly in response to our quarterly or annual results and the impact of these risk factors on our operating results or financial position.

Table of Contents

If securities or industry analysts do not publish or cease publishing research reports about us, if they adversely change their recommendations regarding our stock or if our operating results do not meet their expectations, the price of our stock could decline.

The trading market for our common stock can be influenced by the research and reports that industry or securities analysts may publish about us, our business, our market or our competitors. If there is limited or no securities or industry analyst coverage of us, the market price for our stock could be negatively impacted. Moreover, if any of the analysts who elect to cover us downgrade our common stock, provide more favorable relative recommendations about our competitors or if our operating results or prospects do not meet their expectations, the market price of our common stock may decline. If one or more of these analysts ceases coverage of us or fails to publish reports on us regularly, demand for our stock could decrease, which could cause our stock price and trading volume to decline.

The soundness of other financial institutions could negatively affect us.

Our ability to engage in routine funding and other transactions could be negatively affected by the actions and commercial soundness of other financial institutions. Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. Defaults by, or even rumors or questions about, one or more financial services institutions, or the financial services industry generally, have led to market-wide liquidity problems and losses of depositor, creditor and counterparty confidence and could lead to losses or defaults by us or by other institutions. We could experience increases in deposits and assets as a result of the difficulties or failures of other banks and government-sponsored financial institutions, which would increase the capital we need to support our growth.

Our community banking strategy relies heavily on our subsidiaries' independent management teams, and the unexpected loss of key managers may adversely affect our operations.

We rely heavily on the success of our bank subsidiaries' independent management teams. Accordingly, much of our success to date has been influenced strongly by our ability to attract and to retain senior management experienced in banking and financial services and familiar with the communities in our market areas. Our ability to retain the executive officers and current management teams of our operating subsidiaries will continue to be important to the successful implementation of our strategy. It is also critical, as we manage our existing portfolio and grow, to be able to attract and retain qualified additional management and loan officers with the appropriate level of experience and knowledge about our market areas to implement our community-based operating strategy. The unexpected loss of services of any key management personnel, or the inability to recruit and retain qualified personnel in the future, could have an adverse effect on our business, financial condition and results of operations. Effective succession planning is also important to our long-term success. Failure to ensure effective transfer of knowledge and smooth transitions involving key employees could hinder our strategic planning and execution.

We have a continuing need for technological change, and we may not have the resources to effectively implement new technology.

The financial services industry continues to undergo rapid technological changes with frequent introductions of new technology-driven products and services. In addition to enabling us to better serve our customers, the effective use of technology increases efficiency and the potential for cost reduction. Our future success will depend in part upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands for convenience as well as to create additional efficiencies in our operations as we continue to grow our market share. Many of our larger competitors have substantially greater resources to invest in technological improvements. As a result, they may be able to offer additional or superior products to those that we will be able to offer, which would put us at a competitive disadvantage. Accordingly, we cannot provide you with assurance that we will be able to effectively implement new technology-driven products and services or be successful in marketing such products and services to our customers.

Our reputation could be damaged by negative publicity.

Reputational risk, or the risk to our business, financial condition or results of operations from negative publicity, is inherent in our business. Negative publicity can result from actual or alleged conduct in a number of areas, including legal and regulatory compliance, lending practices, corporate governance, litigation, inadequate protection of customer data, ethical behavior of our employees, and from actions taken by regulators, ratings agencies and others as a result of that conduct. Damage to our reputation could impact our ability to attract new or maintain existing loan and deposit customers, employees and business relationships.

Table of Contents

The preparation of our consolidated financial statements requires us to make estimates and judgments, which are subject to an inherent degree of uncertainty and which may differ from actual results.

Our consolidated financial statements are prepared in accordance with U.S. GAAP and general reporting practices within the financial services industry, which require us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. Some accounting policies, such as those pertaining to our allowance, require the application of significant judgment by management in selecting the appropriate assumptions for calculating financial estimates. By their nature, these estimates and judgments are subject to an inherent degree of uncertainty and actual results may differ from these estimates and judgments under different assumptions or conditions, which may have a material adverse effect on our financial condition or results of operations in subsequent periods.

From time to time, the FASB and the SEC change the financial accounting and reporting standards or the interpretation of those standards that govern the preparation of our external financial statements. These changes are beyond our control, can be difficult to predict and could materially impact how we report our financial condition and results of operations.

For example, the FASB has adopted a new accounting standard that will be effective for our first fiscal year after December 15, 2019. This standard, referred to as Current Expected Credit Loss, or CECL, will require financial institutions to determine periodic estimates of lifetime expected credit losses on loans, and recognize the expected credit losses as allowances. This will change the current method of providing allowances that are probable, which may require us to increase our allowance, and to greatly increase the types of data we will need to collect and review to determine the appropriate level of the allowance. Any increase in our allowance or expenses incurred to determine the appropriate level of the allowance may have a material adverse effect on our financial condition and results of operations.

Secondary mortgage, government guaranteed loan and interest rate swap market conditions could have a material impact on our financial condition and results of operations.

Currently, we sell a portion of the residential real estate and government guaranteed loans we originate. The profitability of these operations depends in large part upon our ability to make loans and to sell them in the secondary market at a gain. Thus, we are dependent upon the existence of an active secondary market and our ability to profitably sell loans into that market.

In addition to being affected by interest rates, the secondary markets are also subject to investor demand for residential mortgages and government guaranteed loans and investor yield requirements for those loans. These conditions may

fluctuate or even worsen in the future. As a result, a prolonged period of secondary market illiquidity may reduce our loan production volumes and could have a material adverse effect on our financial condition and results of operations.

The interest rate swap market is dependent upon market conditions. If interest rates move, interest rate swap transactions may no longer make sense for the Company and/or its customers. Interest rate swaps are generally appropriate for commercial customers with a certain level of expertise and comfort with derivatives, so our success is dependent upon the ability to make loans to these types of commercial customers. Additionally, our ability to execute interest rate swaps is also dependent upon counterparties that are willing to enter into the interest rate swap that is equal and offsetting to the interest rate swap we enter into with the commercial customer.

Consumers and businesses are increasingly using non-banks to complete their financial transactions, which could adversely affect our business and results of operations.

Technology and other changes are allowing consumers and businesses to complete financial transactions that historically have involved banks through alternative methods. For example, the wide acceptance of Internet-based commerce has resulted in a number of alternative payment processing systems and lending platforms in which banks play only minor roles. Customers can now maintain funds in prepaid debit cards or digital currencies, and pay bills and transfer funds directly without the direct assistance of banks. The diminishing role of banks as financial intermediaries has resulted and could continue to result in the loss of fee income, as well as the loss of customer deposits and the related income generated from those deposits. The loss of these revenue streams and the potential loss of lower cost deposits as a source of funds could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

New lines of business or new products and services may subject us to additional risks.

From time to time, we may seek to implement new lines of business or offer new products and services within existing lines of business in our current markets or new markets. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services, we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved and price and profitability targets may not prove feasible, which could in turn have a material negative effect on our operating results.

Item 3. Legal Proceedings

There are no material pending legal proceedings to which the Company or any of its subsidiaries is a party other than ordinary routine litigation incidental to their respective businesses.

Item 4. Mine Safety Disclosures

Not applicable.

Table of Contents**Part II****Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Market Information. The common stock, par value \$1.00 per share, of the Company is listed on The Nasdaq Global Market under the symbol “QCRH”. The stock began trading on Nasdaq on October 6, 1993. The Company transferred its listing from the Nasdaq Capital Market to the Nasdaq Global Market on March 1, 2010. As of February 28, 2018, there were 13,931,628 shares of common stock outstanding held by 741 holders of record. Additionally, there are an estimated 3,548 beneficial holders whose stock was held in the street name by brokerage houses and other nominees as of that date. The following table sets forth the high and low sales prices of the common stock, as reported by Nasdaq for the periods indicated.

	2017 Sales		2016 Sales	
	Price High	Price Low	Price High	Price Low
First quarter	\$45.00	\$40.65	\$24.15	\$18.05
Second quarter	49.80	40.45	28.74	22.96
Third quarter	50.00	39.85	32.19	26.41
Fourth quarter	49.70	41.50	44.80	30.31

Dividends on Common Stock. Dividends paid on common stock during the years ending December 31, 2017 and 2016 are as follows:

Declaration Date	Amount Declared Per Share	Record Date	Total Amount	
			Paid to Stockholders (in thousands)	Date Paid
February 11, 2016	\$0.04	March 18, 2016	\$471	April 6, 2016
May 13, 2016	\$0.04	June 17, 2016	\$521	July 6, 2016
August 25, 2016	\$0.04	September 16, 2016	\$521	October 5, 2016
December 15, 2016	\$0.04	December 23, 2016	\$522	January 6, 2017

Edgar Filing: QCR HOLDINGS INC - Form 10-K

February 9, 2017	\$0.05	March 17, 2017	\$657	April 5, 2017
May 12, 2017	\$0.05	June 16, 2017	\$657	July 6, 2017
August 24, 2017	\$0.05	September 15, 2017	\$658	October 4, 2017
November 16, 2017	\$0.05	December 15, 2017	\$693	January 4, 2018

The Company is heavily dependent on dividend payments from its subsidiary banks to provide cash flow for the operations of the holding company and dividend payments on the Company's common stock. Under applicable state laws, the banks are restricted as to the maximum amount of dividends that they may pay on their common stock. Iowa and Illinois law provide that state-chartered banks in those states may not pay dividends in excess of their undivided profits.

The Company's ability to pay dividends to its stockholders may be affected by both general corporate law considerations and policies of the Federal Reserve applicable to bank holding companies. The payment of dividends by any financial institution or its holding company is affected by the requirement to maintain adequate capital pursuant to applicable capital adequacy guidelines and regulations, and a financial institution generally is prohibited from paying any dividends if, following payment thereof, the institution would be undercapitalized. See Appendix A for additional information regarding regulatory restrictions on the payment of dividends.

The Company also has certain contractual restrictions on its ability to pay dividends. The Company has issued junior subordinated debentures in private placements. Under the terms of the debentures, the Company may be prohibited, under certain circumstances, from paying dividends on shares of its common stock. None of these circumstances existed through the date of filing of this Form 10-K. See Note 16 to the Consolidated Financial Statements for additional information regarding dividend restrictions.

Table of Contents

Purchase of Equity Securities by the Company. There were no purchases of common stock by the Company during the years ended December 31, 2017, 2016, and 2015.

Stockholder Return Performance Graph. The following graph indicates, for the period commencing December 31, 2012 and ending December 31, 2017, a comparison of cumulative total returns for the Company, the Nasdaq Composite Index, and the SNL Bank Nasdaq Index prepared by SNL Financial, Charlottesville, Virginia. The graph was prepared at the Company's request by SNL Financial. The information assumes that \$100 was invested at the closing price on December 31, 2012 in the common stock of the Company and in each index, and that all dividends were reinvested.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion provides additional information regarding our operations for the years ending December 31, 2017, 2016, and 2015, and our financial condition at December 31, 2017 and 2016. This discussion should be read in conjunction with “Selected Financial Data” and our consolidated financial statements and the accompanying notes thereto included or incorporated by reference elsewhere in this document.

Additionally, a comprehensive list of the acronyms and abbreviations used throughout this discussion is included in Note 1 to the Consolidated Financial Statements.

GENERAL

The Company was formed in February 1993 for the purpose of organizing QCBT. Over the past twenty-four years, the Company has grown to include three additional banking subsidiaries and a number of nonbanking subsidiaries. As of December 31, 2017, the Company had \$4.0 billion in consolidated assets, including \$3.0 billion in total loans/leases and \$3.3 billion in deposits. The financial results of both Guaranty Bank and CSB for the periods since acquisition are included in this report.

EXECUTIVE OVERVIEW

The Company reported net income of \$35.7 million for the year ended December 31, 2017, and diluted EPS of \$2.61. For the same period in 2016, the Company reported net income of \$27.7 million, and diluted EPS of \$2.17. By comparison, for 2015, the Company reported net income of \$16.9 million, and diluted EPS of \$1.61.

The year ended December 31, 2017 was highlighted by several significant items:

- The successful acquisition of Guaranty Bank (described in Note 2 to the Consolidated Financial Statements);
- Net interest income improvement of 23%, when comparing 2017 to 2016;
- Organic deposit growth of 14.4% for the year;
- Organic loan and lease growth of 15.2% for the year;
- Solid wealth management revenue growth of 21%; and

Edgar Filing: QCR HOLDINGS INC - Form 10-K

Strong gains on the sale of government guaranteed portions of loans and swap fee income totaling \$4.3 million for the year.

Following is a table that represents the various net income measurements for the years ended December 31, 2017, 2016, and 2015.

	Year Ended December 31,		
	2017	2016	2015
Net income attributable to QCR Holdings, Inc. common stockholders	\$35,706,507	\$27,686,787	\$16,927,881
Diluted EPS	\$2.61	\$2.17	\$1.61
Weighted average common and common equivalent shares outstanding*	13,680,472	12,766,003	10,499,841

*The 2017 and 2016 increase in the weighted average common and common equivalent shares outstanding was primarily due to the common stock issued in connection with the acquisitions of CSB and Guaranty Bank discussed in Note 2 to the Consolidated Financial Statements.

Table of Contents

The Company reported core net income (non-GAAP) of \$36.3 million, with diluted core EPS of \$2.66. See section titled “GAAP to Non-GAAP Reconciliations” for additional information. Core net income for the year excludes a number of non-recurring items, most significantly \$3.5 million of after-tax acquisition and post-acquisition related costs. See Note 13 to the Consolidated Financial Statements for additional information regarding the impact of Tax Act on deferred tax assets and income tax expense.

Following is a table that represents the major income and expense categories.

	Year Ended December 31,		
	2017	2016	2015
Net interest income	\$116,065,281	\$94,516,777	\$76,296,724
Provision for loan/lease losses	8,469,919	7,478,166	6,870,900
Noninterest income	30,482,292	31,036,875	24,363,321
Noninterest expense	97,424,697	81,485,912	73,192,022
Federal and state income tax	4,946,450	8,902,787	3,669,242
Net income	\$35,706,507	\$27,686,787	\$16,927,881

The following are some noteworthy developments in the Company’s financial results:

Net interest income grew \$21.5 million, or 23% in 2017, compared to the prior year. Net interest income for 2016 grew \$18.2 million, or 24%, compared to 2015.

Provision increased \$992 thousand when comparing 2017 to 2016, while provision increased \$607 thousand when comparing 2016 to 2015.

Noninterest income decreased \$555 thousand, or 2%, when compared to the prior year. Noninterest income increased \$6.7 million, or 27%, when comparing 2016 to 2015, primarily due to \$4.6 million of gains on sale of securities associated with a balance sheet restructuring strategy executed in 2016.

Noninterest expense increased \$15.9 million, or 20% in 2017, compared to the prior year including certain costs related to our recent acquisitions, including:

Acquisition and post-acquisition compensation, transition and integration costs totaled \$5.4 million and \$2.4 million in 2017 and 2016, respectively. The increase primarily was due to legal and accounting costs with the acquisition of Guaranty Bank and IT integration and conversion costs associated with the acquisition of Guaranty Bank and CSB.

Professional and data processing fees increased \$3.6 million in 2017, primarily due to the acquisitions of Guaranty Bank and CSB and increased legal fees.

Salaries and benefits increased \$9.4 million with the addition of personnel with the Guaranty Bank and CSB acquisitions.

Noninterest expense increased \$8.3 million, when comparing 2016 to 2015. Included in 2016 noninterest expense was \$4.6 million of losses on debt extinguishment, net, as well as \$2.4 million of acquisition and post-acquisition

related costs

LONG-TERM FINANCIAL GOALS

The Company has established certain financial goals by which it manages its business and measures its performance. The goals are periodically updated to reflect business developments. While the Company is determined to work prudently to achieve these goals, there is no assurance that they will be met. Moreover, the Company's ability to achieve these goals will be affected by the factors discussed under "Forward Looking Statements" as well as the factors detailed in the "Risk Factors" section included under Item 1A. of Part I of this Form 10-K. The Company's long-term financial goals are as follows:

Improve balance sheet efficiency by maintaining a gross loans and leases to total assets ratio in the range of 73 – 78%;

Table of Contents

Improve profitability (measured by NIM and ROAA);

Improve asset quality by reducing NPAs to total assets to below 0.75% and maintain charge-offs as a percentage of average loans/leases of under 0.25% annually;

Maintain reliance on wholesale funding at less than 15% of total assets;

Grow noninterest bearing deposits to more than 30% of total assets;

Continue to focus on generating gains on sales of government guaranteed portions of loans and swap fee income to more than \$4 million annually; and

Grow wealth management segment net income by 10% annually.

The following table shows the evaluation of the Company's long-term financial goals.

Goal	Key Metric (1)	Target (2)	For the Year Ending	
			December 31, 2017	December 31, 2016
Balance sheet efficiency	Gross loans and leases to total assets	73% - 78%	74%	73%

Table of Contents

STRATEGIC DEVELOPMENTS

The Company took the following actions to support our corporate strategy and the long-term financial goals shown above.

Organic loan and lease growth for the year was 15.2%. This exceeded the Company's target organic growth rate of 10-12%. A portion of this growth was in the C&I category. As of December 31, 2017, this segment of the portfolio accounted for 38% of total loans and leases. The Company has also grown CRE loans, with that segment now representing 44% of the portfolio as of December 31, 2017. The strong organic loan and lease growth has continued to help move the loan and lease to total asset ratio upward to 74%, from 73% in the prior year and 69% two years ago. The Company has reached the targeted loan and lease to total asset ratio in the range of 73% - 78%. Going forward, the Company will strive to maintain the ratio in this range.

The Company intends to continue to participate in a prudent manner as an acquirer in the consolidation taking place in our markets to further boost ROAA and improve the Company's efficiency ratio. In the fourth quarter of 2017, the Company acquired Guaranty Bank, headquartered in Cedar Rapids, Iowa. See Note 2 of the Consolidated Financial Statements for additional details.

The Company continues to focus on reducing the NPAs to total assets ratio. The ratio of NPAs to total assets decreased slightly from 0.82% at December 31, 2016 to 0.81% at December 31, 2017. The Company remains committed to improving asset quality in 2018.

Management continues to focus on reducing the Company's reliance on wholesale funding. The restructuring executed in 2016 (as described in Notes 10 and 11 of the Consolidated Financial Statements) further reduced the Company's reliance on long-term wholesale funding. These prepayments, along with the addition of CSB and Guaranty Bank, which have very strong core funding bases with minimal wholesale borrowings, assisted in lowering the Company's reliance on wholesale funding as a percentage of assets down to 10% as of December 31, 2017. Management will focus on growing core deposits as a means for funding loan and lease growth and maintaining a reliance on wholesale funding at less than 15% of total assets.

Correspondent banking continues to be a core line of business for the Company. The Company is competitively positioned with experienced staff, software systems and processes to continue growing in the three states currently served – Iowa, Illinois and Wisconsin. The Company acts as the correspondent bank for 187 downstream banks with total noninterest bearing deposits of \$260.9 million and total interest bearing deposits of \$236.5 million as of December 31, 2017. This line of business provides a strong source of noninterest bearing and interest bearing deposits, fee income, high-quality loan participations and bank stock loans.

SBA and USDA lending is a specialty lending area on which the Company has focused. Once these loans are originated, the government-guaranteed portion of the loan can be sold to the secondary market for premiums. The

Company aims to continue to make this a more consistent source of noninterest income.

As a result of the historically low interest rate environment, the Company is focused on executing interest rate swaps on select commercial loans. The interest rate swaps allow the commercial borrowers to pay a fixed interest rate while the Company receives a variable interest rate as well as an upfront fee dependent on the pricing. Management believes that these swaps help position the Company more favorably for rising rate environments. The Company will continue to review opportunities to execute these swaps at all of its subsidiary banks, as the circumstances are appropriate for the borrower and the Company.

Wealth management is another core line of business for the Company and includes a full range of products, including trust services, brokerage and investment advisory services, asset management, estate planning and financial planning. As of December 31, 2017 the Company had \$2.6 billion of total financial assets in trust (and related) accounts and \$971 million of total financial assets in brokerage (and related) accounts. Continued growth in assets under management will help to drive trust and investment advisory fees. The Company offers trust and investment advisory services to the correspondent banks that it serves. As management focuses on growing fee income, expanding market share will continue to be a primary strategy.

Table of Contents

GAAP TO NON-GAAP RECONCILIATIONS

The following table presents certain non-GAAP financial measures related to the “TCE/TA ratio”, “core net income”, “core net income attributable to QCR Holdings, Inc. common stockholders”, “core EPS”, “core ROAA”, “NIM (TEY)” and “efficiency ratio”. In compliance with applicable rules of the SEC, all non-GAAP measures are reconciled to the most directly comparable GAAP measure, as follows:

TCE/TA ratio (non-GAAP) is reconciled to stockholders’ equity and total assets

Core net income, core net income attributable to QCR Holdings, Inc. common stockholders, core EPS and core ROAA (all non-GAAP measures) are reconciled to net income

NIM (TEY) (non-GAAP) is reconciled to NIM

Efficiency ratio (non-GAAP) is reconciled to noninterest expense, net interest income and noninterest income

The TCE/TA non-GAAP ratio has been a focus for investors and management believes that this ratio may assist investors in analyzing the Company’s capital position without regard to the effects of intangible assets.

The table below also includes several “core” non-GAAP measurements of financial performance. The Company's management believes that these measures are important to investors as they exclude non-recurring income and expense items; therefore, they provide a better comparison for analysis and may provide a better indicator of future results.

NIM (TEY) is a financial measure that the Company’s management utilizes to take into account the tax benefit associated with certain loans and securities. It is standard industry practice to measure net interest margin using tax-equivalent measures.

The efficiency ratio is a ratio that management utilizes to compare the Company to peers. Both are also standard in the banking industry and widely utilized by investors.

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not audited. Although these non-GAAP financial measures are frequently used by investors to evaluate a company, they have limitations as analytical tools and should not be considered in isolation, or as a substitute for analyses of results as reported under GAAP.

GAAP TO NON-GAAP RECONCILIATIONS	As of December 31, 2017	December 31, 2016

Table of Contents

NET INTEREST INCOME AND MARGIN (TAX EQUIVALENT BASIS) (Non-GAAP)

Net interest income, on a tax equivalent basis, grew \$24.7 million, or 25%, in 2017. Net interest income improved due to several factors:

The acquisition of CSB, whose strong net interest margin has significantly contributed to the Company's results; Organic loan and lease growth was strong throughout the year. Average gross loans/leases grew 28% in 2017 (including the acquisition of Guaranty Bank); and

The Company's strategy to grow the Company's portfolio of tax exempt municipal securities. This has contributed to the 24 basis point increase in the investment securities yield in 2017.

A comparison of yields, spreads and margins from 2016 to 2017 shows the following (on a tax equivalent basis):

The average yield on interest-earning assets increased 17 basis points from 4.20% to 4.37%.

The average cost of interest-bearing liabilities increased 16 basis points from 0.65% to 0.81%.

The net interest spread improved 1 basis point from 3.55% to 3.56%.

The NIM improved 3 basis points from 3.75% to 3.78%.

Net interest income, on a tax equivalent basis, grew \$19.4 million, or 24%, in 2016 compared to 2015. Net interest income improved due to several factors:

The acquisition of CSB resulted in an additional \$10.2 million for the period ending December 31, 2016;

The Company's strategy to redeploy funds from the taxable securities portfolio into higher yielding loans and leases; Organic loan and lease growth was strong throughout the year. Average gross loans/leases grew 19.6% in 2016 (including the acquisition of CSB); and

Continued balance sheet restructuring, as further described in Notes 10 and 11 to the Consolidated Financial Statements.

A comparison of yields, spreads and margins from 2015 to 2016 shows the following (on a tax equivalent basis):

The average yield on interest-earning assets increased 26 basis points from 3.94% to 4.20%.

The average cost of interest-bearing liabilities decreased 16 basis points from 0.81% to 0.65%.

The net interest spread improved 42 basis points from 3.13% to 3.55%.

The NIM improved 38 basis points from 3.37% to 3.75%.

The Company's management closely monitors and manages NIM. From a profitability standpoint, an important challenge for the Company's subsidiary banks and leasing company is the improvement of their net interest margins. Management continually addresses this issue with pricing and other balance sheet management strategies.

The improvement in NIM in 2017 and 2016 was partially the result of the acquisition of CSB. CSB's margin will fluctuate based on the amortization and accretion of purchase accounting adjustments, most notably the discount on the acquired loan portfolio. This benefit can fluctuate based on prepayments of both PCI and performing loans. As loans prepay, the associated discount/premium is accelerated.

The Company continues to place an emphasis on shifting its balance sheet mix. With a stated goal of maintaining loans/leases as a percentage of assets in a range of 73%-78%, the Company funded its loan/lease growth with a mixture of core deposits and cash from the investment securities portfolio. Cash from called securities and the targeted sales of securities was redeployed into the loan portfolio, resulting in a significant increase in yield, while minimizing any extension of duration. Additionally, the Company recognized net gains on these sales due to the previous rate environment. As rates rise, the Company should also have less market volatility in the investment securities portfolio, as this becomes a smaller portion of the balance sheet.

Table of Contents

There still exists some higher cost legacy borrowings and the Company continues to monitor and evaluate both prepayment and debt restructuring opportunities as executing on such a strategy could potentially increase NIM at a much quicker pace than holding the debt until maturity.

The Company's average balances, interest income/expense, and rates earned/paid on major balance sheet categories are presented in the following table:

	Years Ended December 31,								
	2017			2016			2015

Total change in net interest income	\$24,742	\$(1,773)	\$26,515	\$19,361	\$5,233	\$14,128

The column "Inc/(Dec) from Prior Year" is segmented into the changes attributable to variations in volume and the (1) changes attributable to changes in interest rates. The variations attributable to simultaneous volume and rate changes have been proportionately allocated to rate and volume.

(2) Interest earned and yields on nontaxable investment securities and loans are determined on a tax equivalent basis using a 35% tax rate in each year presented.

(3) Loan/lease fees are not material and are included in interest income from loans/leases receivable in accordance with accounting and regulatory guidance.

The Company's operating results are also impacted by various sources of noninterest income, including trust department fees, investment advisory and management fees, deposit service fees, gains from the sales of residential real estate loans and government guaranteed loans, earnings on BOLI, and other income. Offsetting these items, the Company incurs noninterest expenses, which include salaries and employee benefits, occupancy and equipment expense, professional and data processing fees, FDIC and other insurance expense, loan/lease expense, and other administrative expenses.

The Company's operating results are also affected by economic and competitive conditions, particularly changes in interest rates, income tax rates, government policies, and actions of regulatory authorities.

Table of Contents

CRITICAL ACCOUNTING POLICIES

The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America. The financial information contained within these statements is, to a significant extent, financial information that is based on approximate measures of the financial effects of transactions and events that have already occurred.

ALLOWANCE FOR LOAN AND LEASE LOSSES

Based on its consideration of accounting policies that involve the most complex and subjective decisions and assessments, management has identified its most critical accounting policy to be that related to the allowance.

The Company's allowance methodology incorporates a variety of risk considerations, both quantitative and qualitative, in establishing an allowance that management believes is appropriate at each reporting date. Quantitative factors include the Company's historical loss experience, delinquency and charge-off trends, collateral values, governmental guarantees, payment status, changes in nonperforming loans/leases, and other factors. Quantitative factors also incorporate known information about individual loans/leases, including borrowers' sensitivity to interest rate movements.

Qualitative factors include the general economic environment in the Company's markets, including economic conditions both locally and nationally, and in particular, the economic health of certain industries. Size and complexity of individual credits in relation to loan/lease structure, existing loan/lease policies and pace of portfolio growth are other qualitative factors that are considered in the methodology. As the Company adds new products and increases the complexity of its loan/lease portfolio, it enhances its methodology accordingly.

Management may report a materially different amount for the provision in the statement of operations to change the allowance if its assessment of the above factors were different. The discussion regarding the Company's allowance should be read in conjunction with the Company's financial statements and the accompanying notes presented elsewhere in this Form 10-K, as well as the portion of this MD&A section entitled "Financial Condition – Allowance for Estimated Losses on Loans/Leases."

Although management believes the level of the allowance as of December 31, 2017 was adequate to absorb losses inherent in the loan/lease portfolio, a decline in local economic conditions, or other factors, could result in increasing losses that cannot be reasonably predicted at this time.

Table of Contents

RESULTS OF OPERATIONS FOR THE YEARS ENDED DECEMBER 31, 2017, 2016, and 2015

INTEREST INCOME

For 2017, interest income grew \$29.0 million, or 27%. In total, the Company's average interest-earning assets increased \$636.5 million, or 24%, year-over-year. Average loans/leases grew 28%, while average securities grew 10%. The acquisition of CSB occurred in the third quarter of 2016, therefore 2017 was the first full year that CSB was included in the Company's financial results. The acquisition of Guaranty Bank in the fourth quarter of 2017 contributed to the increase in interest income and average interest-earning assets.

For 2016, interest income grew \$16.5 million, or 18%. In total, the Company's average interest-earning assets increased \$272.1 million, or 11%, year-over-year. Average loans/leases grew 20%, while average securities declined 11%. This shift was part of the Company's strategy to shift the mix of earning assets from lower yielding securities to higher yielding loans/leases. The acquisition of CSB also contributed to the increase in interest income and average interest-earning assets.

Additionally, the Company continued to diversify its securities portfolio, including increasing its portfolio of tax exempt municipal securities. The large majority of these are privately placed debt issuances by municipalities located in the Midwest and require a thorough underwriting process before investment. Execution of this strategy has led to increased interest income on a tax equivalent basis over the past several years. Management understands that this strategy has extended the duration of its securities portfolio and continually evaluates the combined benefit of increased interest income and reduced effective income tax rate and the impact on interest rate risk.

The Company intends to continue to grow quality loans and leases as well as diversify the securities portfolio to maximize yield while minimizing credit and interest rate risk.

INTEREST EXPENSE

Comparing 2017 to 2016, interest expense increased \$7.5 million, or 63%, year-over-year. Average interest-bearing liabilities increased 32% in 2017. The acquisition of CSB occurred in the third quarter of 2016, therefore 2017 was the first full year that CSB was included in the Company's financial results which contributed to the increase in interest expense and average interest-bearing liabilities. Guaranty Bank, acquired in the fourth quarter of 2017, also contributed to the increase in interest expense and average interest-bearing liabilities. The Company's cost of funds increased because the Company has rate sensitive deposits that have repriced with the increase in certain market rates.

Comparing 2016 to 2015, interest expense declined \$1.8 million, or 13%, year-over-year. Average interest-bearing liabilities increased 9% in 2016. The Company was successful in continuing to manage down its cost of funds through continued growth in noninterest bearing deposit accounts (average noninterest bearing balances grew 11% in 2016, primarily due to successful growth in the correspondent banking area) and continued shift of funding from high-cost borrowings to deposits and/or low-cost borrowings. Average interest bearing deposits increased 26%, while average borrowings decreased 37% during 2016.

The Company's management intends to continue to shift the mix of funding from wholesale funds to core deposits, including noninterest-bearing deposits. Continuing this trend is expected to strengthen the Company's franchise value, reduce funding costs, and increase fee income opportunities through deposit service charges.

Table of Contents

PROVISION FOR LOAN/LEASE LOSSES

The provision is established based on a number of factors, including the Company's historical loss experience, delinquencies and charge-off trends, the local and national economy and the risk associated with the loans/leases in the portfolio as described in more detail in the "Critical Accounting Policies" section.

The Company's provision totaled \$8.5 million for 2017, an increase of \$992 thousand from 2016. Notably, CSB incurred \$2.8 million of provision expense for the full year. As acquired loans renew, the discount associated with those loans is accreted and the Company must re-establish a loan loss reserve. When comparing 2016 to 2015, the Company's provision increased by \$607 thousand. In 2016, CSB incurred \$1.5 million of provision expense for the partial year since acquisition.

The Company had an allowance of 1.16% of total gross loans/leases at December 31, 2017, compared to 1.28% of total gross loans/leases at December 31, 2016, and compared to 1.45% of total gross loans/leases at December 31, 2015.

The Company's allowance to total NPLs was 184.28% at December 31, 2017, which was up from 144.85% at December 31, 2016, and down from 223.33% at December 31, 2015.

The fluctuations in these ratios were the result of the acquisitions of CSB and Guaranty Bank. In accordance with GAAP for acquisition accounting, acquired loans must be recorded at fair value; therefore, no accreted allowance was associated with these loans. As acquired loans renew, the discount associated with those loans is eliminated and the Company must establish an allowance.

Table of Contents

NONINTEREST INCOME. The following tables set forth the various categories of noninterest income for the years ended December 31, 2017, 2016, and 2015.

	Years Ended		\$ Change	% Change	
	December 31, 2017	December 31, 2016

Total noninterest income	\$31,036,875	\$24,363,321	\$6,673,554	27.4	%

In recent years, the Company has been successful in expanding its wealth management customer base. Trust department fees continue to be a significant contributor to noninterest income and, due to favorable market conditions, coupled with strong growth in assets under management, trust department fees increased 17% in the current year. Comparatively, trust fee income increased 1% when comparing 2016 to 2015. Income is generated primarily from fees charged based on assets under administration for corporate and personal trusts and for custodial services. The majority of the trust department fees are determined based on the value of the investments within the fully managed trusts. Additionally, the Company recently started offering trust operations services to correspondent banks.

Management has placed a stronger emphasis on growing its investment advisory and management services. Part of this initiative has been to restructure the Company's Wealth Management Division to allow for more efficient delivery of products and services through selective additions of talent as well as leverage of and collaboration among existing resources (including the aforementioned trust department). Similar to trust department fees, fees from these services are largely determined based on the value of the investments managed. And, similar to the trust department, the Company has had some success in expanding its customer base. Due to this growth and favorable market conditions in 2017, investment advisory and management fees increased 29% in 2017. Comparatively, investment advisory and management fees increased 1% in 2016. The acquisition of CSB also contributed to this increase, as it had an established investment advisory and management services department at acquisition.

Table of Contents

Deposit service fees expanded 33% in 2017 and 17% in 2016. The increases in both years were the result of the addition of CSB. Additionally, the Company continues its emphasis on shifting the mix of deposits from brokered and retail time deposits to non-maturity demand deposits across all its markets. With this shift in mix, the Company has increased the number of demand deposit accounts, which tend to be lower in interest cost and higher in service fees. The Company plans to continue this shift in mix and to further focus on growing deposit service fees.

Gains on sales of residential real estate loans decreased 5% in 2017, while increasing 34% in 2016. Overall, with the continued low interest rate environment, refinancing activity has slowed, as many of the Company's existing and prospective customers have already executed a refinancing. Therefore, this area has become a much smaller contributor to overall noninterest income.

The Company's gains on the sale of government-guaranteed portions of loans for 2017 decreased 63%, while increasing 142% in the prior year. Given the nature of these gains, large fluctuations can happen from quarter-to-quarter and year-to-year. As one of its core strategies, the Company continues to leverage its expertise by taking advantage of programs offered by the SBA and the USDA. The Company's portfolio of government-guaranteed loans has grown as a direct result of the Company's strong expertise in SBA and USDA lending. In some cases, it is more beneficial for the Company to sell the government-guaranteed portion on the secondary market for a premium rather than retain the loans in the Company's portfolio. Sales activity for government-guaranteed portions of loans tends to fluctuate depending on the demand for loans that fit the criteria for the government guarantee. Further, the size of the transactions can vary and, as the gain is determined as a percentage of the guaranteed amount, the resulting gain on sale can vary. Lastly, a strategy for improved pricing is packaging loans together for sale. From time to time, the Company may execute on this strategy, which may delay the gains on sales of some loans to achieve better pricing.

As a result of the continued low interest rate environment, the Company was able to execute numerous interest rate swaps on select commercial loans over the past two years. The interest rate swaps allow the commercial borrowers to pay a fixed interest rate while the Company receives a variable interest rate as well as an upfront fee dependent upon the pricing. Management believes that these swaps help position the Company more favorably for rising rate environments. Management will continue to review opportunities to execute these swaps at all of its subsidiary banks, as the circumstances are appropriate for the borrower and the Company. Swap fee income totaled \$3.1 million in 2017, compared to \$1.7 million in 2016 and \$1.7 million in 2015. Future levels of swap fee income are dependent upon prevailing interest rates.

Securities losses (net) were \$88 thousand for the current year, compared to securities gains (net) of \$4.6 million for the prior year and \$799 thousand in 2015. In 2016, the Company took advantage of market opportunities by selling approximately \$130.2 million of investments that were low-yielding. Proceeds were then used to purchase higher-yielding tax-exempt municipal bonds and to fund loan and lease growth. Additionally, in the third quarter of 2016, the Company sold an equity investment and recognized a gain of \$4.0 million, which was then used to reduce wholesale borrowings and further de-lever the balance sheet.

Earnings on BOLI increased 2% in 2017 and 1% in 2016. There were no purchases of BOLI in 2016 or 2017. Yields on BOLI (based on a simple average and excluding the impact of the federal income tax exemption) were 3.05% for 2017, 3.09% for 2016, and 3.23% for 2015. Notably, a small portion of the Company's BOLI is variable rate whereby the returns are determined by the performance of the equity market. Management intends to continue to review its BOLI investments to be consistent with policy and regulatory limits in conjunction with the rest of its earning assets in an effort to maximize returns while minimizing risk.

Debit card fees are the interchange fees paid on certain debit card customer transactions. Debit card fees increased 62% in 2017, compared to 46% in the prior year. The primary reason for the increase in both years was the addition of CSB, which has a large retail customer base and therefore generates significant interchange revenue. These fees can vary based on customer debit card usage, so fluctuations from period to period may occur. As an opportunity to maximize fees, the Company offers a deposit product with a modestly higher interest rate that incentivizes debit card activity.

Table of Contents

Correspondent banking fees decreased 13% in 2017 and decreased 12% in the prior year. As interest rates rise, the correspondent bank deposit accounts receive a higher earnings credit, which then reduces the direct fees that the Company receives. Management will continue to evaluate earnings credit rates and the resulting impact on deposit balances and fees while balancing the ability to grow market share. Correspondent banking continues to be a core strategy for the Company, as this line of business provides a high level of noninterest bearing deposits that can be used to fund loan growth as well as a steady source of fee income. The Company now serves approximately 187 banks in Iowa, Illinois and Wisconsin.

Other noninterest income increased 12% in 2017, while decreasing 7% in 2016. The primary reason for the increase was rental income due to the acquisition of Guaranty Bank. Rental income totaled \$176 thousand in 2017 as compared to no rental income in 2016.

Table of Contents

NONINTEREST EXPENSES. The following tables set forth the various categories of noninterest expenses for the years ended December 31, 2017, 2016, and 2015.

	Years Ended

Total noninterest expense	\$81,485,912	\$73,192,022	\$8,293,890	11.3	%
---------------------------	--------------	--------------	-------------	------	---

Management places strong emphasis on overall cost containment and is committed to improving the Company's general efficiency.

Salaries and employee benefits, which is the largest component of noninterest expense, increased 20% and 8% in 2017 and 2016, respectively. This increase was primarily related to the acquisition of CSB late in the third quarter of 2016 and the acquisition of Guaranty Bank in the fourth quarter of 2017.

Occupancy and equipment expense increased 30% in 2017 and increased 19% in 2016. These increases were largely due to the addition of CSB late in 2016 and the acquisition of Guaranty Bank in the fourth quarter of 2017.

Table of Contents

Professional and data processing fees increased 51% in 2017 and increased 29% in 2016. This increased expense was mostly due to the additions of Guaranty Bank and CSB. Legal expense was elevated due to a legal matter at RBT where two employees have been charged with wrongdoing in connection with an SBA loan application. The Company anticipates these legal expenses will continue until the court proceedings are completed, which the Company expects to be sometime in late 2018. Neither RB&T, nor the Company, have been charged in the case. Generally, professional and data processing fees can fluctuate depending on certain one-time project costs. Management will continue to focus on minimizing such one-time costs and driving recurring costs down through contract negotiation or managed reduction in activity where costs are determined on a usage basis.

Acquisition costs totaled \$1.1 million and \$1.4 million for 2017 and 2016, respectively. These costs were comprised primarily of legal, accounting and investment banking costs related to the acquisitions described in Note 2 to the Consolidated Financial Statements.

Post-acquisition compensation, transition and integration costs totaled \$4.3 million and \$1.0 million for 2017 and 2016, respectively. These costs were comprised primarily of personnel costs, IT integration, and conversion costs related to the acquisitions described in Note 2 to the Consolidated Financial Statements.

FDIC and other insurance expense increased 8% in 2017 and decreased 6% in 2016. The increase in expense was due to the acquisition of CSB, partially offset by a decrease in the assessment rate designated by the FDIC.

Loan/lease expense increased 76% in 2017 and decreased 25% in 2016. The Company incurred elevated levels of expense during 2017 for certain existing NPLs in connection with the work-out of these loans. Generally, loan/lease expense has a direct relationship with the level of NPLs; however, it may deviate depending upon the individual NPLs.

Net cost of operations of other real estate includes gains/losses on the sale of OREO, write-downs of OREO and all income/expenses associated with OREO. Net costs of operations totaled \$2 thousand for 2017 and \$591 thousand for 2016. Occupancy rates for one of the OREO properties managed by the Company have improved over the past year, increasing cash flow from the property and reducing net operating costs.

Advertising and marketing expense increased 23% in 2017 and increased 12% in 2016. The increase in expense was due to the additions of CSB and Guaranty Bank.

Bank service charges, a large portion of which include indirect costs incurred to provide services to QCBT's correspondent banking customer portfolio, increased over the past two years (5% in 2017 and 14% in 2016). The increases were due, in large part, to the success QCBT has had in growing its correspondent banking customer portfolio. As transaction volumes continue to increase and the number of correspondent banking clients increases, the associated expenses will also increase.

In 2016, the Company incurred \$4.6 million in losses on debt extinguishment (net), while in 2015, the Company incurred \$7.2 million of losses on debt extinguishment (net). These losses relate to the prepayment of certain FHLB advances and wholesale structured repurchase agreements. Additionally, the Company recognized gains on extinguishment related to the repurchase of junior subordinated debentures that were acquired at a discount through auction.

Correspondent banking expense increased 8% in 2017 and 7% in 2016. These are direct costs incurred to provide services to QCBT's correspondent banking customer portfolio, including safekeeping and cash management services. The increases in both years were due, in large part, to the success QCBT has had in growing its correspondent banking customer portfolio.

Core deposit intangible amortization expense increased 126% in 2017 and 122% in 2016. Increases were due to the acquisition of Guaranty Bank and CSB.

Other noninterest expense increased 18% in 2017 and 4% in 2016. Included in other noninterest expense are items such as subscriptions, sales and use tax and expenses related to wealth management. A portion of this increase is also related to the additions of CSB and Guaranty Bank.

Table of Contents**INCOME TAX EXPENSE**

The provision for income taxes was \$4.9 million for 2017, or an effective tax rate of 12.2%, compared to \$8.9 million for 2016, or an effective tax rate of 24.3%, and compared to \$3.7 million for 2015, or an effective tax rate of 17.8%. The effective tax rate for 2017 was significantly impacted by a \$2.9 million income tax benefit for the re-valuation of deferred taxes at the lower federal income tax rate as a result of the Tax Act. See Note 13 to the Consolidated Financial Statements for additional information regarding the impact of Tax Act on deferred tax assets and income tax.

Refer to the reconciliation of the expected income tax rate to the effective tax rate that is included in Note 13 to the Consolidated Financial Statements for additional details.

FINANCIAL CONDITION, AS OF THE YEARS ENDED DECEMBER 31, 2017 AND 2016**OVERVIEW**

Following is a table that represents the major categories of the Company's balance sheet.

	As of December 31,			
	2017		2016	
	<i>(dollars in thousands)</i>			
	Amount	%	Amount	%
Cash, federal funds sold, and interest-bearing deposits	\$161,684	4 %	\$156,776	5 %
Securities	652,382	16 %	574,022	17 %
Net loans/leases	2,930,130	74 %	2,374,730	72 %
Other assets	238,469	6 %	196,416	6 %
Total assets	\$3,982,665	100 %	\$3,301,944	100 %
Total deposits	\$3,266,655	82 %	\$2,669,261	81 %
Total borrowings	309,480	8 %	290,952	9 %
Other liabilities	53,243	1 %	55,690	2 %
Total stockholders' equity	353,287	9 %	286,041	8 %
Total liabilities and stockholders' equity	\$3,982,665	100 %	\$3,301,944	100 %

In 2017, total assets grew \$680.7 million, or 21%. This included \$259.6 million in assets acquired and new goodwill of \$15.2 million as part of the Guaranty Bank acquisition (further described in Note 2 to the Consolidated Financial Statements). The Company organically grew its net loan/lease portfolio \$362.9 million, which was primarily funded by deposit growth. Deposits grew \$384.9 million, or 14% during 2017, excluding the \$212.5 million of deposits acquired. Borrowings decreased \$2.5 million, or 1% during 2017, excluding the \$21.1 million of borrowings acquired.

In 2016, total assets grew \$708.7 million, or 27%. This included \$581.7 million in assets acquired and new goodwill of \$9.9 million as part of the CSB acquisition (further described in Note 2 to the Consolidated Financial Statements). The Company organically grew its net loan/lease portfolio \$183.8 million, which was partly funded by cash from the securities portfolio, as it decreased \$105.7 million, or 18%, excluding the \$102.6 million of securities acquired in 2016. Deposits grew \$302.3 million, or 16% during 2016, excluding the \$486.3 million of deposits acquired. Borrowings decreased \$153.2 million, or 34% during 2016, mostly due the balance sheet restructuring activities that took place throughout 2016, the details of which are in Notes 10 and 11 to the Consolidated Financial Statements.

INVESTMENT SECURITIES

The composition of the Company's securities portfolio is managed to meet liquidity needs while prioritizing the impact on interest rate risk and maximizing return, while minimizing credit risk. The Company has further diversified the portfolio by decreasing U.S government sponsored agency securities, while increasing residential mortgage-backed and related securities and tax-exempt municipal securities. Of the latter, the large majority are privately placed tax-exempt debt issuances by municipalities located in the Midwest (with some in or near the Company's existing markets) and require a thorough underwriting process before investment.

Table of Contents

Following is a breakdown of the Company's securities portfolio by type as of December 31, 2017, 2016, and 2015.

	2017		2016		2015	
	Amount	%	Amount	%	Amount	%
	<i>(dollars in thousands)</i>					
U.S. govt. sponsored agency securities	\$38,097	6 %	\$46,084	8 %	\$213,537	37 %
Municipal securities	445,049	68 %	374,463	65 %	280,203	49 %
Residential mortgage-backed and related securities	163,301	25 %	147,702	26 %	80,670	14 %
Other securities	5,935	1 %	5,773	1 %	2,699	0 %
	\$652,382	100 %	\$574,022	100 %	\$577,109	100 %
As a % of total assets	16.38	%	17.38	%	22.25	%
Net unrealized losses as a % of amortized cost	(0.18))%	(0.87))%	(0.03))%
Duration (in years)	7.0		6.0		6.2	
Yield on investment securities (tax equivalent)	3.80	%	3.56	%	3.07	%

Management monitors the level of unrealized gains/losses including performing quarterly reviews of individual securities for evidence of OTTI. Management identified no OTTI in 2017, 2016 or 2015.

In 2017, the duration of the securities portfolio increased due, in large part, to the continued shift in mix. Duration was extended from the strong growth in longer term fixed rate municipal securities.

In 2016, the duration of the securities portfolio stayed relatively flat. Duration was extended from the strong growth in longer term fixed rate municipal securities, but was partially offset by the duration shortening of agency and mortgage-backed securities portfolios resulting from targeted sales of longer duration investments and as the remaining agency portfolio rolled closer to maturities or call dates.

The Company has not invested in non-agency commercial or residential mortgage-backed securities or pooled trust preferred securities. Additionally, the Company has not invested in the types of securities subject to the Volcker Rule (a provision of the Dodd-Frank Act).

See Note 3 to the Consolidated Financial Statements for additional information regarding the Company's investment securities.

LOANS/LEASES

The Company's organic loan/lease portfolio grew \$366.5 million, or 15%, during 2017. The remaining growth in the loan/lease portfolio was related to the acquisition of Guaranty Bank (further described in Note 2 to the Consolidated Financial Statements). Notably, C&I loans increased \$306.9 million, or 37% and CRE loans grew \$210.0 million, or 19%.

The Company's organic loan/lease portfolio grew \$188.4 million, or 11%, during 2016. The remaining growth in the loan/lease portfolio was related to the acquisition of CSB (further described in Note 2 to the Consolidated Financial Statements). Notably, C&I loans increased \$179.5 million, or 28% and CRE loans grew \$369.1 million, or 51%. CSB's loan portfolio was heavily reliant on high-quality CRE, with that category representing 63% of their total loan portfolio as of December 31, 2016. This reliance increased the Company's overall reliance on CRE.

Table of Contents

The mix of loan/lease types within the Company's loan/lease portfolio is presented in the following table.

	As of December 31,									
	2017		2016		2015		2014		2013	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
	<i>(dollars in thousands)</i>									
C&I loans	\$1,134,516	38 %	\$827,637	34 %	\$648,160	36 %	\$523,927	32 %	\$431,688	30 %
CRE loans	1,303,492	44 %	1,093,459	46 %	724,369	41 %	702,140	43 %	671,753	46 %
Direct financing leases	141,448	5 %	165,419	7 %	173,656	10 %	166,032	10 %	128,902	9 %
Residential real estate loans	258,646	9 %	229,233	10 %	170,433	9 %	158,633	10 %	147,356	10 %
Installment and other consumer loans	118,611	4 %	81,666	3 %	73,669	4 %	72,607	5 %	76,034	5 %
Total loans/leases	\$2,956,713	100%	\$2,397,414	100%	\$1,790,287	100%	\$1,623,339	100%	\$1,455,733	100%
Plus deferred loan/lease origination costs, net of fees	7,773		8,073		7,736		6,664		4,547	
Less allowance	(34,356)		(30,757)		(26,141)		(23,074)		(21,448)	
Net loans/leases	\$2,930,130		\$2,374,730		\$1,771,882		\$1,606,929		\$1,438,832	

Historically, the Company structures most residential real estate loans to conform to the underwriting requirements of Freddie Mac and Fannie Mae to allow the subsidiary banks to resell the loans on the secondary market to avoid the interest rate risk associated with longer term fixed rate loans and recognizing noninterest income from the gain on sale. Loans originated for this purpose were classified as held for sale and are included in the residential real estate loans in the table above. Historically, the subsidiary banks structure most loans that will not conform to those underwriting requirements as adjustable rate mortgages that mature or adjust in one to five years, and then retain these loans in their portfolios. The Company holds a limited amount of 15-year fixed rate residential real estate loans originated in prior years that met certain credit guidelines. In addition, the Company has not originated any subprime, Alt-A, no documentation, or stated income residential real estate loans throughout its history.

Edgar Filing: QCR HOLDINGS INC - Form 10-K

The following tables set forth the remaining maturities by loan/lease type as of December 31, 2017 and 2016. Maturities are based on contractual dates.

	As of December 31, 2017					
	Due in one year or less	Due after one through 5 years	Due after 5 years	Maturities After One Year		
				Predetermined interest rates	Adjustable interest rates	
	<i>(dollars in thousands)</i>					
C&I loans	\$378,849	\$427,347	\$328,320	\$505,345	\$250,322	
CRE loans	225,712	715,661	362,119	734,844	342,936

Table of Contents

As CRE loans have historically been the Company's largest portfolio segment, management places a strong emphasis on monitoring the composition of the Company's CRE loan portfolio. For example, management tracks the level of owner-occupied CRE loans relative to non owner-occupied loans. Owner-occupied loans are generally considered to have less risk. As of December 31, 2017 and 2016, respectively, approximately 26% and 30% of the CRE loan portfolio was owner-occupied. The decrease in this percentage in 2017 was mostly due to the addition of Guaranty Bank, which had a slightly lower owner-occupied percentage as compared to the legacy charters. Guaranty Bank's percentage of owner-occupied loans was 18% of their CRE portfolio.

Over the past several years, the Company has been successful in shifting the mix of its commercial loan portfolio by adding more C&I loans. C&I loans grew \$306.9 million, or 37% over the past twelve months. A portion of this growth was attributable to the acquisition of Guaranty Bank, which had \$44.7 million of C&I loans at acquisition.

A syndicated loan is a commercial loan provided by a group of lenders and is structured, arranged and administered by one or several commercial or investment banks known as arrangers. The nationally syndicated loans invested in by the Company consist of fully funded, highly liquid term loans for which there is a liquid secondary market. The amount of nationally syndicated loans totaled \$51.2 million and \$46.5 million as of December 31, 2017 and 2016, respectively.

The Company also has several loans that are syndicated to borrowers in our existing markets or purchased from peer banks that we have a relationship with. These loans were immaterial as of December 31, 2017 and 2016.

See Note 4 to the Consolidated Financial Statements for additional information on the Company's loan/lease portfolio.

ALLOWANCE FOR ESTIMATED LOSSES ON LOANS/LEASES

The allowance totaled \$34.4 million at December 31, 2017, which was an increase of \$3.6 million, or 12%, from \$30.8 million at December 31, 2016. Provision totaled \$8.5 million for 2017 and outpaced net charge-offs of \$4.9 million (or 19 basis points of average loans/leases outstanding).

The allowance totaled \$30.8 million at December 31, 2016, which was an increase of \$4.6 million, or 18%, from \$26.1 million at December 31, 2015. Provision totaled \$7.5 million for 2016 and outpaced net charge-offs of \$2.9 million (or 14 basis points of average loans/leases outstanding).

The increase in allowance in both 2017 and 2016 was primarily due to a combination of general allocations related to loan growth, as well as changes in qualitative and quantitative factors. Additionally, a portion of the increase in both years was due to the acquisition of CSB. Although purchase accounting eliminates the allowance at acquisition, as acquired loans refinance and new loans are originated, an allowance must be established.

Table of Contents

The following table summarizes the activity in the allowance.

	Years ended December 31,					
	2017	2016	2015	2014	2013	
	<i>(dollars in thousands)</i>					
Average amount of loans/leases outstanding, before allowance	\$2,611,888	\$2,042,555	\$1,707,523	\$1,540,382	\$1,425,364	
Allowance:						
Balance, beginning of fiscal year	\$30,757	\$26,141	\$23,074	\$21,448	\$19,925	
Charge-offs:

Provision charged to expense	8,470	7,478	6,871	6,807	5,930	
Balance, end of fiscal year	\$34,356	\$30,757	\$26,141	\$23,074	\$21,448	
Net charge-offs to average loans/leases outstanding	0.19	% 0.14	% 0.22	% 0.34	% 0.31	%

The adequacy of the allowance was determined by management based on factors that included the overall composition of the loan/lease portfolio, types of loans/leases, historical loss experience, loan/lease delinquencies, potential substandard and doubtful credits, economic conditions, collateral positions, government guarantees and other factors that, in management's judgment, deserved evaluation. To ensure that an adequate allowance was maintained, provisions were made based on the increase/decrease in loans/leases and a detailed analysis of the loan/lease portfolio. The loan/lease portfolio was reviewed and analyzed quarterly with specific detailed reviews completed on all credits risk-rated less than "fair quality" and carrying aggregate exposure in excess of \$250 thousand. The adequacy of the allowance was monitored by the credit administration staff and reported to management and the board of directors.

The following is a table that reports the historical trends of criticized and classified loan totals as of December 31, 2017, 2016 and 2015.

Internally Assigned Risk Rating *	As of December 31,		
	2017	2016	2015
	<i>(dollars in thousands)</i>		
Special Mention (Rating 6)	\$31,024	\$20,082	\$37,289
Substandard (Rating 7)	43,435	49,035	27,962
Doubtful (Rating 8)	271	-	-
	\$74,730	\$69,117	\$65,251
Criticized Loans **	\$74,730	\$69,117	\$65,251
Classified Loans ***	\$43,706	\$49,035	\$27,962

* Amounts above exclude the government guaranteed portion, if any. The Company assigns internal risk ratings of Pass (Rating 2) for the government guaranteed portion.

** Criticized loans are defined as C&I and CRE loans with internally assigned risk ratings of 6, 7, or 8, regardless of performance.

*** Classified loans are defined as C&I and CRE loans with internally assigned risk ratings of 7 or 8, regardless of performance.

Table of Contents

Criticized loans increased 8% in 2017 and 6% in 2016. Classified loans decreased 11% in 2017 after increasing 75% in 2016.

NPLs (consisting of nonaccrual loans/leases, accruing loans/leases past due 90 days or more, and accruing TDRs) decreased \$2.6 million, or 12%, during 2017. NPLs increased \$9.5 million, or 81%, during 2016. See the table in the following section for further detail on NPLs and NPAs.

In 2017 and 2016, allowance as a percentage of gross loans/leases decreased due to the acquisitions of CSB and Guaranty Bank. In accordance with GAAP for acquisition accounting, acquired loans were recorded at fair value; therefore, there was no allowance associated with these loans at acquisition. Management continues to evaluate the allowance needed on the acquired loans factoring in the net remaining discount (\$8.1 million at December 31, 2017). When factoring this remaining discount into the Company's allowance to total loans and leases calculation, the Company's allowance as a percentage of total loans and leases increases from 1.16% to 1.43%.

The following table summarizes the trend in allowance as a percentage of gross loans/leases and as a percentage of NPLs as of December 31, 2017, 2016, and 2015.

	As of December 31,					
	2017		2016		2015	
Allowance / Gross Loans/Leases	1.16	%	1.28	%	1.45	%
Allowance / NPLs	184.28	%	144.85	%	223.33	%

The following table presents the allowance by type and the percentage of loan/lease type to total loans/leases.

	As of December 31,											
	2017		2016		2015		2014		2013			
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
	<i>(dollars in thousands)</i>											
C&I loans	14,323	38 %	12,545	34 %	10,484	36 %	8,834	32 %	5,649	30 %		
CRE loans	13,963	44 %	11,671	46 %	9,375	41 %	8,353	43 %	10,705	46 %		
Direct financing leases	2,382	5 %	3,112	7 %	3,395	10 %	3,359	10 %	2,517	9 %		
Residential real estate loans	2,466	9 %	2,342	10 %	1,790	9 %	1,526	10 %	1,396	10 %		
Installment and other consumer loans	1,222	4 %	1,087	3 %	1,097	4 %	1,002	5 %	1,181	5 %		
	\$34,356	100 %	\$30,757	100 %	\$26,141	100 %	\$23,074	100 %	\$21,448	100 %		

% - Represents the percentage of the certain type of loan/lease to total loans/leases

Although management believes that the allowance at December 31, 2017 is at a level adequate to absorb probable losses on existing loans/leases, there can be no assurance that such losses will not exceed the estimated amounts or that the Company will not be required to make additional provisions for loan/lease losses in the future. Unpredictable future events could adversely affect cash flows for both commercial and individual borrowers, which could cause the Company to experience increases in problem assets, delinquencies and losses on loans/leases, and require additional increases in the provision. Asset quality is a priority for the Company and its subsidiaries. The ability to grow profitably is in part dependent upon the ability to maintain that quality. The Company continually focuses efforts at its subsidiary banks and its leasing company with the intention to improve the overall quality of the Company's loan/lease portfolio.

See Note 4 to the Consolidated Financial Statements for additional information on the Company's allowance.

Table of Contents**NONPERFORMING ASSETS**

The table below presents the amounts of NPAs.

	As of December 31,				
	2017	2016	2015	2014	2013
	<i>(dollars in thousands)</i>				
Nonaccrual loans/leases (1) (2)	\$11,441	\$13,919	\$10,648	\$18,588	\$17,878
Accruing loans/leases past due 90 days or more	89	967	3	93	84
TDRs - accruing	7,113	6,347	1,054	1,421	2,523
NPLs	18,643	21,233	11,705	20,102	20,485
OREO	13,558	5,523	7,151	12,768	9,729
Other repossessed assets	80	202	246	155	346
NPAs	\$32,281	\$26,958	\$19,102	\$33,025	\$30,560
NPLs to total loans/leases	0.63	% 0.88	% 0.65	% 1.23	% 1.40
NPAs to total loans/leases plus repossessed property	1.08	% 1.12	% 1.06	% 2.01	% 2.08
NPAs to total assets	0.81	% 0.82	% 0.74	% 1.31	% 1.28

(1) Includes government guaranteed portions of loans, if applicable.

(2) Includes TDRs of \$2.3 million at December 31, 2017, \$2.3 million at December 31, 2016, \$1.5 million at December 31, 2015, \$5.0 million at December 31, 2014, and \$10.9 million at December 31, 2013.

The large majority of the Company's NPAs consists of nonaccrual loans/leases, accruing TDRs and OREO. For nonaccrual loans/leases, management thoroughly reviewed these loans/leases and provided specific allowances as appropriate. OREO is carried at the lower of carrying amount or fair value less costs to sell.

The policy of the Company is to place a loan/lease on nonaccrual status if: (a) payment in full of interest or principal is not expected; or (b) principal or interest has been in default for a period of 90 days or more unless the obligation is both in the process of collection and well secured. A loan/lease is well secured if it is secured by collateral with sufficient market value to repay principal and all accrued interest. A debt is in the process of collection if collection of the debt is proceeding in due course either through legal action, including judgment enforcement procedures, or in appropriate circumstances, through collection efforts not involving legal action which are reasonably expected to result in repayment of the debt or in its restoration to current status.

In 2017, the Company's NPAs increased \$5.3 million, or 20%. OREO increased \$8.0 million primarily due to the addition of one large non owner-occupied CRE relationship.

In 2016, the Company's NPAs increased \$7.9 million, or 41%. Nonaccrual loans increased \$3.3 million as a result of one large credit that was added in the fourth quarter, partially offset by paydowns of nonaccrual loans. Accruing loans/leases past due 90 days or more increased \$964 thousand, mostly due to loans acquired through the purchase of CSB. TDRs increased \$5.3 million due to one large credit that was restructured in the fourth quarter of 2016. OREO decreased \$1.6 million during the year.

The Company's lending/leasing practices remain unchanged and asset quality remains a top priority for management.

Table of Contents**DEPOSITS**

Deposits grew \$597.3 million during 2017 (\$384.8 million of organic growth, excluding the \$212.5 million of deposits acquired through the purchase of Guaranty Bank). For 2016, deposits grew \$788.6 million (\$302.3 million of organic growth, excluding the \$486.3 million of deposits acquired through the purchase of CSB). The table below presents the composition of the Company's deposit portfolio.

	As of December 31,					
	2017		2016		2015	
	Amount	%	Amount	%	Amount	%
	<i>(dollars in thousands)</i>					
Noninterest-bearing demand deposits	\$789,548	24 %	\$797,415	30 %	\$615,292	33 %
Interest-bearing demand deposits	1,855,893	57 %	1,369,226	51 %	886,294	47 %
Time deposits	516,058	16 %	439,169	17 %	309,974	16 %
Brokered deposits*	105,156	3 %	63,451	2 %	69,106	4 %
	\$3,266,655	100 %	\$2,669,261	100 %	\$1,880,666	100 %

*Includes brokered money market balances of \$25.1 million, \$22.0 million and \$16.0 million as of December 31, 2017, 2016 and 2015, respectively.

The Company has been successful in growing its noninterest-bearing deposit portfolio over the past several years, growing average balances 7% in 2017 and 11% in 2016. Year-end balances can fluctuate a great deal due to large customer and correspondent bank activity. Trends have shown that this fluctuation is generally temporary.

Management will continue to focus on growing its noninterest bearing deposit portfolio, including its correspondent banking business at QCBT, as well as shifting the mix from brokered and other higher cost deposits to lower cost core deposits. With the significant success achieved by QCBT in growing its correspondent banking business, QCBT has

developed procedures to proactively monitor this industry concentration of deposits and loans. Other deposit-related industry concentrations and large accounts are monitored by the internal asset liability management committee. See discussion regarding policy limits on bank stock loans in the Lending/Leasing section under Item 1 – Business in Part I of this Form 10-K.

SHORT-TERM BORROWINGS

The subsidiary banks offer overnight repurchase agreements to some of their major customers. Also, the subsidiary banks purchase federal funds for short-term funding needs from the FRB, or from their correspondent banks. The table below presents the composition of the Company’s short-term borrowings.

	As of December 31,		
	2017	2016	2015
	<i>(dollars in thousands)</i>		
Overnight repurchase agreements with customers	\$7,003	\$8,131	\$73,873
Federal funds purchased	6,990	31,840	70,790
	\$13,993	\$39,971	\$144,663

In 2016, the Company shifted overnight customer repurchase agreement funds to insured deposit products which do not require collateral, helping to free up additional liquidity for the Company. This also allowed the Company to further execute on the strategy of rotating out of investment securities into loans and leases.

Regarding the Company’s federal funds purchased, this fluctuates based on the short-term funding needs of the Company’s subsidiary banks. See Note 9 to the Consolidated Financial Statements for additional information on the Company’s short-term borrowings.

Table of Contents**FHLB ADVANCES AND OTHER BORROWINGS**

As a result of their memberships in the FHLB of Des Moines and Chicago, the subsidiary banks have the ability to borrow funds for short-term or long-term purposes under a variety of programs. The subsidiary banks utilize FHLB advances for loan matching as a hedge against the possibility of rising interest rates or when these advances provide a less costly source of funds than customer deposits. For 2017, FHLB advances increased \$54.5 million, or 40%, due to the timing of strong loan and lease growth which temporarily outpaced the Company's deposit growth. The FHLB advance increases were overnight advances. There were no increases in term advances. See Note 10 of the Consolidated Financial Statements for additional details. For 2016, FHLB advances decreased \$13.5 million, or 9%, as several prepayments of advances were included in balance sheet restructurings throughout the year. See Note 10 of the Consolidated Financial Statements for additional details.

	As of December 31,					
	2017		2016		2015	
	<i>(dollars in thousands)</i>					
Amount Due	\$192,000		\$137,500		\$151,000	
Weighted Average Interest Rate at Year-End	1.82	%	1.25	%	1.37	%

Other borrowings consist largely of wholesale structured repurchase agreements which the subsidiary banks utilize as an alternative funding source to FHLB advances and customer deposits. The table below presents the composition of the Company's other borrowings.

	As of December 31,		
	2017	2016	2015
	<i>(dollars in thousands)</i>		
Wholesale structured repurchase agreements	\$35,000	\$45,000	\$110,000
Term notes	31,000	30,000	-
Revolving line of credit	-	5,000	-
	\$66,000	\$80,000	\$110,000

In 2017, other borrowings decreased \$14 million with the paydown of \$5.0 million revolving line of credit and the maturity of \$10.0 million wholesale structured repurchase agreement. In 2016, other borrowings decreased \$30 million.

See Notes 10 and 11 to the Consolidated Financial Statements for additional information regarding FHLB advances, other borrowings and the balance sheet restructurings that occurred in 2015 and 2016.

It is management's intention to continue to reduce its reliance on wholesale funding, including FHLB advances, wholesale structured repurchase agreements, and brokered deposits. Replacement of this funding with core deposits helps to reduce interest expense as the wholesale funding tends to be higher cost. However, the Company may choose to utilize wholesale funding sources to supplement funding needs, as this is a way for the Company to effectively and efficiently manage interest rate risk.

Table of Contents**STOCKHOLDERS' EQUITY**

The table below presents the composition of the Company's stockholders' equity.

	As of December 31,		
	2017	2016	2015
	Amount	Amount	Amount
	<i>(dollars in thousands)</i>		
Common stock	\$13,918	\$13,107	\$11,761
Additional paid in capital	189,078	156,777	123,283
Retained earnings	151,962	118,617	92,966
AOCI	(1,671)	(2,460)	(2,124)
Total stockholders' equity	\$353,287	\$286,041	\$225,886
TCE/TA ratio (non-GAAP)	8.01	% 8.04	% 8.55

*TCE/TA ratio is a non-GAAP measure. Refer to the GAAP to Non-GAAP Reconciliations section of this report for more information.

As of December 31, 2017, 2016 and 2015, no preferred stock was outstanding.

In connection with the acquisition of Guaranty Bank in the fourth quarter of 2017, the Company issued 678,670 shares of its common stock at a price of \$45.50 per share. This issuance significantly increased common stock and additional paid in capital in comparison to the prior year. Refer to Note 2 of the Consolidated Financial Statements for additional information.

In connection with the acquisition of CSB in the third quarter of 2016, the Company sold 1,215,000 shares of its common stock at a price of \$24.75 per share, for net proceeds of \$29.8 million, after deducting expenses. This offering significantly increased common stock and additional paid in capital in comparison to the prior year. Refer to Note 2 of the Consolidated Financial Statements for additional information.

The following table presents the rollforward of stockholders' equity for the years ended December 31, 2017 and 2016, respectively.

	For the Years Ended December 31,	
	2017	2016
	<i>(dollars in thousands)</i>	
Beginning balance	\$286,041	\$225,886
Net income	35,707	27,686
Other comprehensive income (loss), net of tax	1,093	(336)
Common cash dividends declared	(2,665)	(2,036)
Proceeds from issuance of 678,670 shares of common stock, net of costs	30,741	-
Proceeds from issuance of 1,215,000 shares of common stock, net of costs	-	29,829
Other *	2,370	5,012
Ending balance	\$353,287	\$286,041

*Includes mostly common stock issued for options exercised and the employee stock purchase plans, as well as stock-based compensation.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Liquidity measures the ability of the Company to meet maturing obligations and its existing commitments, to withstand fluctuations in deposit levels, to fund its operations, and to provide for customers' credit needs. The Company monitors liquidity risk through contingency planning stress testing on a regular basis. The Company seeks to avoid over concentration of funding sources and to establish and maintain contingent funding facilities that can be drawn upon if normal funding sources become unavailable. One source of liquidity is cash and short-term assets, such as interest-bearing deposits in other banks and federal funds sold, which averaged \$164.0 million during 2017, \$139.5 million during 2016 and \$129.5 million during 2015. The Company's on balance sheet liquidity position can fluctuate based on short-term activity in deposits and loans.

The subsidiary banks have a variety of sources of short-term liquidity available to them, including federal funds purchased from correspondent banks, FHLB advances, structured repos, brokered deposits, lines of credit, borrowing at the Federal Reserve Discount Window, sales of securities available for sale, and loan/lease participations or sales. The Company also generates liquidity from the regular principal payments and prepayments made on its loan/lease portfolio, and on the regular principal payments on its securities portfolio.

At December 31, 2017, the subsidiary banks had 34 lines of credit totaling \$375.0 million, of which \$3.0 million was secured and \$372.0 million was unsecured. At December 31, 2017, the full \$375.0 million was available.

At December 31, 2016, the subsidiary banks had 33 lines of credit totaling \$381.4 million, of which \$34.4 million was secured and \$347.0 million was unsecured. At December 31, 2016, \$361.4 million was available as \$20.0 million was utilized for short-term borrowing needs at QCBT.

The Company has emphasized growing the number and amount of lines of credit in an effort to strengthen this contingent source of liquidity. Additionally, the Company maintains a \$10.0 million secured revolving credit note with a variable interest rate and a maturity of June 30, 2018. At December 31, 2017, the full \$10.0 million was available. See Note 11 to the Consolidated Financial Statements for additional information.

Investing activities used cash of \$410.5 million during 2017 compared to \$169.0 million during 2016, and \$66.1 million during 2015. Proceeds from calls, maturities, pay downs, and sales of securities were \$152.6 million for 2017 compared to \$285.2 million for 2016, and \$308.8 million for 2015. Purchases of securities used cash of \$179.8 million for 2017 compared to \$179.6 million for 2016, and \$232.1 million for 2015. The net increase in loans/leases used cash of \$375.2 million for 2017 compared to \$187.5 million for 2016, and \$172.8 million for 2015. The Company paid net cash of \$3.4 million and \$69.9 million related to the acquisition of Guaranty Bank and CSB, respectively.

Financing activities provided cash of \$382.0 million for 2017 compared to \$154.4 million for 2016, and \$39.5 million for 2015. Net increases in deposits totaled \$385.1 million, \$302.4 million, and \$201.0 million for 2017, 2016, and 2015, respectively. Net short-term borrowings decreased \$39.1 million, \$104.7 million and \$123.7 million in 2017 and 2016 and 2015, respectively. In 2017, 2016, and 2015, respectively, the Company used \$4.1 million, \$104.7 million, and \$120.7 million to prepay select FHLB advances and other borrowings. In 2016, the Company received \$29.8 million of proceeds from the common stock offering of 1.2 million shares of common stock. Short-term FHLB advances increased \$60.9 million, \$20.5 million, and \$47.0 million in 2017, 2016, and 2015, respectively.

Total cash provided by operating activities was \$33.7 million for 2017, compared to \$43.4 million for 2016, and \$30.1 million for 2015.

Throughout its history, the Company has secured additional capital through various resources, including common and preferred stock and the issuance of trust preferred securities.

The Company filed a universal shelf registration statement on Form S-3 with the SEC on October 27, 2016, as amended on January 11, 2017. Declared effective by the SEC on January 31, 2017, the registration statement allows the Company to offer and sell various types of securities, including common stock, preferred stock, debt securities and/or warrants, from time to time up to an aggregate amount of \$100 million. The Company utilized \$30.1 million of its previous \$100 million shelf registration filing through the offer and sale of its common stock in the second quarter of 2016 to help fund the acquisition of CSB (see Note 2 to the Consolidated Financial Statements). This Form S-3 filing replenished the amount available to the previous level of \$100 million. The specific terms and prices of any securities offered pursuant to the registration statement will be determined at the time of any future offering and described in a separate prospectus supplement, which would be filed with the SEC at the time of the particular offering, if any. There were no securities issued under this shelf registration statement during 2017.

Table of Contents

As of December 31, 2017 and 2016, the subsidiary banks remained “well-capitalized” in accordance with regulatory capital requirements administered by the federal banking authorities. See Note 16 to the Consolidated Financial Statements for detail of the capital amounts and ratios for the Company and subsidiary banks.

COMMITMENTS, CONTINGENCIES, CONTRACTUAL OBLIGATIONS, AND OFF-BALANCE SHEET ARRANGEMENTS

In the normal course of business, the subsidiary banks make various commitments and incur certain contingent liabilities that are not presented in the accompanying consolidated financial statements. The commitments and contingent liabilities include various guarantees, commitments to extend credit, and standby letters of credit.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The subsidiary banks evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the banks upon extension of credit, is based upon management's credit evaluation of the counter-party. Collateral held varies but may include accounts receivable, marketable securities, inventory, property, plant and equipment, and income-producing commercial properties.

Standby letters of credit are conditional commitments issued by the subsidiary banks to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements and, generally, have terms of one year, or less. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The banks hold collateral, as described above, supporting those commitments if deemed necessary. In the event the customer does not perform in accordance with the terms of the agreement with the third party, the banks would be required to fund the commitments. The maximum potential amount of future payments the banks could be required to make is represented by the contractual amount. If the commitment is funded, the banks would be entitled to seek recovery from the customer. At December 31, 2017 and 2016, no amounts had been recorded as liabilities for the banks' potential obligations under these guarantees.

As of December 31, 2017 and 2016, commitments to extend credit aggregated \$791,550,060 and \$666,778,085, respectively. As of December 31, 2017 and 2016, standby letters of credit aggregated \$17,283,025 and \$15,697,469, respectively. Management does not expect that all of these commitments will be funded.

Additional information regarding commitments, contingencies, and off-balance sheet arrangements is described in Note 18 to the Consolidated Financial Statements.

Table of Contents

The Company has various financial obligations, including contractual obligations and commitments, which may require future cash payments. The following table presents, as of December 31, 2017, significant fixed and determinable contractual obligations to third parties by payment date. Further discussion of the nature of each obligation is included in the referenced note to the consolidated financial statements.

Description	Financial Statement Note Reference	Payments Due by Period				
		Total	One Year or Less	2 - 3 Years	4 - 5 Years	After 5 Years
<i>(dollars in thousands)</i>						
Deposits without a stated maturity	N/A	\$2,670,583	\$2,670,583	\$-	\$-	\$-
Certificates of deposit	8	596,072	478,334	104,375	13,296	67
Short-term borrowings	9	13,993	13,993	-	-	-
FHLB advances	10	192,000	190,400	1,600	-	-
Other borrowings	11	66,000	7,750	50,500	7,750	-
Junior subordinated debentures	12	37,486	-	-	-	37,486
Rental commitments	5	1,294	364	615	252	63
Operating contracts	N/A	34,363	11,752	11,424	5,891	5,296
Total contractual cash obligations		\$3,611,791	\$3,373,176	\$168,514	\$27,189	\$42,912

The Company's operating contract obligations represent short and long-term contractual payments for data processing equipment and services, software, and other equipment and professional services.

IMPACT OF INFLATION AND CHANGING PRICES

The Consolidated Financial Statements of the Company and the accompanying notes have been prepared in accordance with U.S. GAAP, which require the measurement of financial position and operating results in terms of historical dollar amounts without considering the changes in the relative purchasing power of money over time due to inflation. The impact of inflation is reflected in the increased cost of the Company's operations. Unlike industrial companies, nearly all of the assets and liabilities of the Company are monetary in nature. As a result, interest rates have a greater impact on the Company's performance than do the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the price of goods and services.

FORWARD LOOKING STATEMENTS

This document (including information incorporated by reference) contains, and future oral and written statements of the Company and its management may contain, forward-looking statements, within the meaning of such term in the Private Securities Litigation Reform Act of 1995, with respect to the financial condition, results of operations, plans, objectives, future performance and business of the Company. Forward-looking statements, which may be based upon beliefs, expectations and assumptions of the Company's management and on information currently available to management, are generally identifiable by the use of words such as "believe," "expect," "anticipate," "bode," "predict," "suggest," "project," "appear," "plan," "intend," "estimate," "may," "will," "would," "could," "should," "likely," or other similar expressions. Additionally, all statements in this document, including forward-looking statements, speak only as of the date they are made, and the Company undertakes no obligation to update any statement in light of new information or future events.

Table of Contents

The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. The factors that could have a material adverse effect on the operations and future prospects of the Company and its subsidiaries are detailed in the "Risk Factors" section included under Item 1A. of Part I of this Form 10-K. In addition to the risk factors described in that section, there are other factors that could have a material adverse effect on the operations and future prospects of the Company and its subsidiaries. These additional factors include, but are not limited to, the following:

The strength of the local and national economy.

Changes in the interest rate environment.

The economic impact of past and any future terrorist attacks, acts of war or threats thereof and the response of the United States to any such threats and attacks.

The impact of cybersecurity risks.

The costs, effects and outcomes of existing or future litigation.

Changes in accounting policies and practices, as may be adopted by state and federal regulatory agencies, the FASB, the SEC or the PCAOB.

Unexpected results of acquisitions (including the acquisition of Guaranty Bank and CSB), which may include failure to realize the anticipated benefits of the acquisition.

The economic impact of exceptional weather occurrences such as tornadoes, floods and blizzards.

The ability of the Company to manage the risks associated with the foregoing as well as anticipated.

These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The Company, like other financial institutions, is subject to direct and indirect market risk. Direct market risk exists from changes in interest rates. The Company's net income is dependent on its net interest income. Net interest income is susceptible to interest rate risk to the degree that interest-bearing liabilities mature or reprice on a different basis than interest-earning assets. When interest-bearing liabilities mature or reprice more quickly than interest-earning assets in a given period, a significant increase in market rates of interest could adversely affect net interest income. Similarly, when interest-earning assets mature or reprice more quickly than interest-bearing liabilities, falling interest rates could result in a decrease in net interest income.

In an attempt to manage the Company's exposure to changes in interest rates, management monitors the Company's interest rate risk. Each subsidiary bank has an asset/liability management committee of the board of directors that meets quarterly to review the bank's interest rate risk position and profitability, and to make or recommend adjustments for consideration by the full board of each bank.

Internal asset/liability management teams consisting of members of the subsidiary banks' management meet weekly to manage the mix of assets and liabilities to maximize earnings and liquidity and minimize interest rate and other risks. Management also reviews the subsidiary banks' securities portfolios, formulates investment strategies, and oversees the timing and implementation of transactions to assure attainment of the board's objectives in the most effective manner. Notwithstanding the Company's interest rate risk management activities, the potential for changing interest rates is an uncertainty that can have an adverse effect on net income.

In adjusting the Company's asset/liability position, the board of directors and management attempt to manage the Company's interest rate risk while maintaining or enhancing net interest margins. At times, depending on the level of general interest rates, the relationship between long-term and short-term interest rates, market conditions and competitive factors, the board of directors and management may decide to increase the Company's interest rate risk position somewhat in order to increase its net interest margin. The Company's results of operations and net portfolio values remain vulnerable to increases in interest rates and to fluctuations in the difference between long-term and short-term interest rates.

One method used to quantify interest rate risk is a short-term earnings at risk summary, which is a detailed and dynamic simulation model used to quantify the estimated exposure of net interest income to sustained interest rate changes. This simulation model captures the impact of changing interest rates on the interest income received and interest expense paid on all interest sensitive assets and liabilities reflected on the Company's consolidated balance sheet. This sensitivity analysis demonstrates net interest income exposure annually over a five-year horizon, assuming no balance sheet growth, no balance sheet mix change, and various interest rate scenarios including no change in rates; 200, 300, 400, and 500 basis point upward shifts; and a 100 basis point downward shift in interest rates, where interest-bearing assets and liabilities reprice at their earliest possible repricing date.

Table of Contents

The model assumes parallel and pro rata shifts in interest rates over a twelve-month period for the 200 basis point upward shift and 100 basis point downward shift. For the 400 basis point upward shift, the model assumes a parallel and pro rata shift in interest rates over a twenty-four month period. For the 500 basis point upward shift, the model assumes a flattening and pro rata shift in interest rates over a twelve-month period where the short-end of the yield curve shifts upward greater than the long-end of the yield curve.

Further, in recent years, the Company added additional interest rate scenarios where interest rates experience a parallel and instantaneous shift (“shock”) upward of 100, 200, 300, and 400 basis points and a parallel and instantaneous shock downward of 100 basis points. The Company will run additional interest rate scenarios on an as-needed basis.

The asset/liability management committees of the subsidiary bank boards of directors have established policy limits of a 10% decline in net interest income for the 200 basis point upward parallel shift and the 100 basis point downward parallel shift. For the 300 basis point upward shock, the established policy limit is a 25% decline in net interest income. The increased policy limit is appropriate as the shock scenario is extreme and unlikely and warrants a higher limit than the more realistic and traditional parallel/pro-rata shift scenarios.

Application of the simulation model analysis for select interest rate scenarios at December 31, 2017, 2016 and 2015 demonstrated the following:

INTEREST RATE SCENARIO	POLICY LIMIT	NET INTEREST INCOME EXPOSURE in YEAR 1						
		As of December 31, 2017		As of December 31, 2016		As of December 31, 2015		
		%	%	%	%	%	%	
100 basis point downward shift	-10.0	%	0.3	%	-1.7	%	-2.1	%
200 basis point upward shift	-10.0	%	-3.7	%	-1.2	%	-2.7	%
300 basis point upward shock	-25.0	%	-8.4	%	-1.4	%	-7.1	%

The simulation is within the board-established policy limits for all three scenarios. Additionally, for all of the various interest rate scenarios modeled and measured by management (as described above), the results at December 31, 2017 were well within established risk tolerances as established by policy or by best practice (if the interest rate scenario didn't have a specific policy limit).

Interest rate risk is considered to be one of the most significant market risks affecting the Company. For that reason, the Company engages the assistance of a national consulting firm and its risk management system to monitor and control the Company's interest rate risk exposure. Other types of market risk, such as foreign currency exchange rate risk and commodity price risk, do not arise in the normal course of the Company's business activities.

Report of Independent Registered Public Accounting Firm

To the Stockholders and the Board of Directors of QCR Holdings, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of QCR Holdings, Inc. and subsidiaries (the Company) as of December 31, 2017 and 2016, the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for each of the three years in the period ended December 31, 2017, and the related notes to the consolidated financial statements (collectively, the financial statements). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2017, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013, and our report dated March 9, 2018 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our

audits provide a reasonable basis for our opinion.

We have served as the Company's auditor since 1993.
