Item 8.01 Other Events

1. The Company has started the separation process of its mined copper ore, identifying high-grade ore vs. low-grade ore. This process is being done on site. The low-grade ore will not be sent to the processing plant.
2. On Saturday, March 29, 2014 the company starting testing the high-grade ore and sent samples to a local lab. Yesterday, the company received initial lab reports from the test samples. The results indicate the Company's high-grade copper ore samples contained 6% copper. The company was only expecting 2.5% - 3.0%.  
  
6% is substantially higher than what was expected.
3. A licensed and permitted laboratory in Nazca, Peru performed this analysis.

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
