

DEERE & CO
Form 10-Q
February 28, 2019

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended January 27, 2019

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from ____ to ____

Commission file no: 1-4121

DEERE & COMPANY

(Exact name of registrant as specified in its charter)

Delaware 36-2382580
(State of incorporation) (IRS employer identification no.)

One John Deere Place

Moline, Illinois 61265

Edgar Filing: DEERE & CO - Form 10-Q

(Address of principal executive offices)

Telephone Number: (309) 765-8000

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer
Non-accelerated filer		Smaller reporting company
		Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

At January 27, 2019, 318,493,477 shares of common stock, \$1 par value, of the registrant were outstanding.

PART I. FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS

DEERE & COMPANY

STATEMENT OF CONSOLIDATED INCOME

For the Three Months Ended January 27, 2019 and January 28, 2018

(In millions of dollars and shares except per share amounts) Unaudited

	2019	2018
Net Sales and Revenues		
Net sales	\$ 6,940.9	\$ 5,973.9
Finance and interest income	814.9	722.9

Condensed Notes to Interim Consolidated Financial Statements (Unaudited)

(1) Organization and Consolidation

The information in the notes and related commentary are presented in a format which includes data grouped as follows:

Equipment Operations – Includes the Company's agriculture and turf operations and construction and forestry operations with financial services reflected on the equity basis.

Financial Services – Includes primarily the Company's financing operations.

Consolidated – Represents the consolidation of the equipment operations and financial services. References to "Deere & Company" or "the Company" refer to the entire enterprise.

The Company uses a 52/53 week fiscal year with quarters ending on the last Sunday in the reporting period. The first quarter ends for fiscal year 2019 and 2018 were January 27, 2019 and January 28, 2018, respectively. Both periods contained 13 weeks.

Variable Interest Entities

The Company consolidates certain Variable Interest Entities (VIEs) related to retail note securitizations (see Note 12).

The Company also has an interest in a joint venture that manufactures construction equipment in Brazil for local and overseas markets. The joint venture is a VIE; however, the Company is not the primary beneficiary. Therefore, the entity's financial results are not fully consolidated in the Company's consolidated financial statements, but are included on an equity basis. The maximum exposure to losses at January 27, 2019 and October 28, 2018 in millions of dollars follows:

	January 27, 2019	October 28, 2018
Receivables from unconsolidated affiliates	\$ 2	\$ 2
Loan guarantee	25	25
Total	\$ 27	\$ 27

(2) Summary of Significant Accounting Policies and Cash Flow Information

The interim consolidated financial statements of Deere & Company have been prepared by the Company, without audit, pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the U.S. have been condensed or omitted as permitted by such rules and regulations. All adjustments, consisting of normal recurring adjustments, have been included. Management believes that the disclosures are adequate to present fairly the financial position, results of operations, and cash flows at the dates and for the periods presented. It is suggested that these interim consolidated financial statements be read in

conjunction with the consolidated financial statements and the notes thereto appearing in the Company's latest annual report on Form 10-K. Results for interim periods are not necessarily indicative of those to be expected for the fiscal year.

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the reported amounts and related disclosures. Actual results could differ from those estimates.

Cash Flow Information

All cash flows from the changes in trade accounts and notes receivable are classified as operating activities in the statement of consolidated cash flows as these receivables arise from sales to the Company's customers. Cash flows from financing receivables that are related to sales to the Company's customers are also included in operating activities. The remaining financing receivables are related to the financing of equipment sold by independent dealers and are included in investing activities.

The Company had the following non-cash operating and investing activities that were not included in the statement of consolidated cash flows. The Company transferred inventory to equipment on operating leases of approximately \$106 million and \$139 million in the first three months of 2019 and 2018, respectively.

The Company also had accounts payable related to purchases of property and equipment of approximately \$33 million and \$27 million at January 27, 2019 and January 28, 2018, respectively.

The Company's equipment operations held restricted cash of \$10 million, \$7 million, \$7 million, and \$6 million at January 27, 2019, October 28, 2018, January 28, 2018, and October 29, 2017, respectively. The equipment operation's restricted cash relates to miscellaneous operational activities. The Company's financial services operations held restricted cash of \$87 million, \$104 million, \$120 million, and \$126 million at January 27, 2019, October 28, 2018, January 28, 2018, and October 29, 2017, respectively. The financial services operations' restricted cash primarily relates to securitization of financing receivables (see Note 12). The restricted cash is recorded in other assets in the consolidated balance sheet.

(3) New Accounting Standards

New Accounting Standards Adopted

In the first quarter of 2019, the Company adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers (Topic 606), which supersedes the revenue recognition requirements in Accounting Standards Codification (ASC) 605, Revenue Recognition. The ASU was adopted using a modified retrospective approach to all incomplete contracts as of the adoption date. The ASU is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. A five step model is used to determine the amount and timing of revenue recognized. The ASU also requires expanded disclosures to include disaggregated revenue by geographic regions and major product lines.

The ASU required that a gross asset and liability rather than a net liability be recorded for the value of estimated service parts returns and the related refund liability. The gross asset is recorded in other assets for the inventory value of estimated parts returns and the gross liability is recorded in accounts payable and accrued expenses for the estimated dealer refund. The table below reflects the change for the estimated parts returns in the affected lines on the consolidated balance sheet in millions of dollars.

	October 28, 2018	Cumulative Effect from Adoption	October 29, 2018
Assets			
Other assets	\$ 1,718	\$ 110	\$ 1,828
Liabilities			
Accounts payable and accrued expenses	\$ 10,111	\$ 110	\$ 10,221

There were no significant changes affecting the timing of revenue recognition from the adoption. The Company's updated revenue policies and additional disclosures are included in Note 4.

In the first quarter of 2019, the Company adopted ASU No. 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities, which amends ASC 825-10, Financial Instruments – Overall. This ASU changed the treatment for available for sale equity investments by recognizing unrealized fair value changes directly in net income and no longer in other comprehensive income (OCI). The cumulative effect of adoption resulted in an \$8 million after-tax reclassification from OCI to retained earnings.

In the first quarter of 2019, the Company adopted ASU No. 2016-18, Restricted Cash, which amends ASC 230, Statement of Cash Flows. The ASU requires that restricted cash be included with cash and cash equivalents in the statement of cash flows. The ASU was adopted using a retrospective transition approach resulting in an update to the 2018 consolidated and supplemental consolidating statement of cash flows (see Note 2). The ASU did not have a material effect on the Company's consolidated financial statements.

In the first quarter of 2019, the Company early adopted ASU No. 2017-12, Targeted Improvements to Accounting for Hedging Activities, which amends ASC 815, Derivatives and Hedging. The purpose of this ASU is to better align a company's risk management activities and financial reporting for hedging relationships, simplify the hedge accounting requirements, and improve the disclosures of hedging arrangements. The adoption did not have a material effect on the Company's consolidated financial statements (see Note 17). The Company continues to evaluate potential additional hedge accounting relationships provided by the new standard to further improve risk management.

The Company also adopted the following standards in the first quarter of 2019, none of which had a material effect on the Company's consolidated financial statements:

Accounting Standards Updates

- 2016-15 Classification of Certain Cash Receipts and Cash Payments, which amends ASC 230, Statement of Cash Flows
- 2016-16 Intra-Entity Transfers of Assets Other Than Inventory, which amends ASC 740, Income Taxes
- 2017-01 Clarifying the Definition of a Business, which amends ASC 805, Business Combinations
- 2017-09 Scope of Modification Accounting, which amends ASC 718, Compensation - Stock Compensation
- 2018-13 Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement, which amends ASC 820, Fair Value Measurement
- 2018-14 Disclosure Framework - Changes to the Disclosure Requirements for Defined Benefit Plans, which amends ASC 715-20, Compensation - Retirement Benefits - Defined Benefit Plans - General
- 2018-16 Inclusion of the Secured Overnight Financing Rate (SOFR) Overnight Index Swap (OIS) Rate as a Benchmark Interest Rate for Hedge Accounting Purposes, which amends ASC 815, Derivatives and Hedging

New Accounting Standards to be Adopted

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842), which supersedes ASC 840, Leases. The ASU's primary change is the requirement for lessee entities to recognize a lease liability for payments and a right of use asset during the term of operating lease arrangements. The ASU does not significantly change the lessee's recognition, measurement, and presentation of expenses and cash flows from the previous accounting standard. Lessors' accounting under the ASC is largely unchanged from the previous accounting standard. In July 2018, the FASB issued ASU No. 2018-10, Codification Improvements to Topic 842, Leases and ASU No. 2018-11, Leases: Targeted Improvements. Both ASUs amend ASC 842, Leases. The provisions impacting the Company in these ASUs are an option that will not require earlier periods to be restated at the adoption date and an option for lessors, if certain criteria are met, to avoid separating the lease and nonlease components (such as preventative maintenance services) in an agreement. In December 2018, the FASB issued ASU No. 2018-20, Narrow-Scope Improvements for Lessors. This ASU provides an election for lessors to exclude sales and related taxes from consideration in the contract, requires lessors to exclude from revenue and expense lessor costs paid directly to a third party by lessees, and clarifies lessors' accounting for variable payments related to both lease and nonlease components. The effective date will be the first quarter of fiscal year 2020 with early adoption permitted. The Company is evaluating the potential effects on the consolidated financial statements and plans to adopt the ASU using the modified-retrospective approach that will not require earlier periods to be restated.

In June 2016, the FASB issued ASU No. 2016-13, Measurement of Credit Losses on Financial Instruments, which establishes ASC 326, Financial Instruments - Credit Losses. The ASU revises the measurement of credit losses for financial assets measured at amortized cost from an incurred loss methodology to an expected loss methodology. The ASU affects trade receivables, debt securities, net investment in leases, and most other financial assets that represent a right to receive cash. Additional disclosures about significant estimates and credit quality are also required. In November 2018, the FASB issued ASU No. 2018-19, Codification Improvements to Topic 326, Financial Instruments - Credit Losses. This ASU clarifies that receivables from operating leases are accounted for using the lease guidance and not as financial instruments. The effective date will be the first quarter of fiscal year 2021, with early adoption

permitted beginning in fiscal year 2020. The ASU will be adopted using a modified-retrospective approach. The Company is evaluating the potential effects on the consolidated financial statements.

In March 2017, the FASB issued ASU No. 2017-08, Premium Amortization on Purchased Callable Debt Securities, which amends ASC 310-20, Receivables – Nonrefundable Fees and Other Costs. This ASU reduces the amortization period for certain callable debt securities held at a premium to the earliest call date. The treatment of securities held at a discount is unchanged. The effective date is the first quarter of fiscal year 2020. The adoption will not have a material effect on the Company’s consolidated financial statements.

In June 2018, the FASB issued ASU No. 2018-07, Improvements to Nonemployee Share-Based Payment Accounting, which amends ASC 718, Compensation – Stock Compensation. The ASU requires that most of the guidance related to stock compensation granted to employees be followed for non-employees, including

the measurement date, valuation approach, and performance conditions. The expense is recognized in the same period as though cash were paid for the good or service. The effective date is the first quarter of fiscal year 2020, with early adoption permitted, including in interim periods. The ASU will be adopted using a modified-retrospective transition approach. The adoption will not have a material effect on the consolidated financial statements.

In August 2018, the FASB issued ASU No. 2018-15, Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract, which amends ASC 350-40, Intangibles – Goodwill and Other – Internal-Use Software. This ASU requires customers in a hosting arrangement that is a service contract to evaluate the implementation costs of the hosting arrangement using the guidance to develop internal-use software. The project development stage determines the implementation costs that are capitalized or expensed. Capitalized implementation costs are amortized over the term of the service arrangement and are presented in the same income statement line item as the service contract costs. The effective date will be the first quarter of fiscal year 2021, with early adoption permitted. The Company will adopt the ASU on a prospective basis. The Company is evaluating the potential effects on the Company's consolidated financial statements.

(4) Revenue Recognition

Sales of equipment and service parts. Sales of equipment and service parts are recognized when each of the following criteria are met: (1) the Company and an independent customer approve a contract with commercial substance, (2) the sales price is determinable and collectability of the payments are probable based on the terms outlined in the contract, and (3) control of the goods has transferred to the customer. Transfer of control generally occurs for equipment and service parts when the good is delivered as specified in the contract and the risks and rewards of ownership are transferred. In the U.S. and most international locations, this transfer occurs primarily when goods are shipped. In Canada and some other international locations, certain goods are shipped to dealers on a consignment basis under which the risks and rewards of ownership are not transferred to the dealer at the time the goods are shipped. Accordingly, in these locations, sales are not recorded until a retail customer has purchased the goods. Generally, no right of return exists on sales of equipment.

In select instances, equipment is transferred to a customer or a financial institution with an obligation to repurchase the equipment for a specified amount, which is exercisable at the customer's option. When the equipment is expected to be repurchased, those arrangements are accounted for as leases. When the operating lease criteria are met, no sale is recorded at the time of the equipment transfer and the difference between sale price and the specified repurchase amount is recognized as revenue on a straight-line basis until the customer's option expires. When this equipment is not expected to be repurchased, a sale is recorded with a return obligation.

Under the terms of sales agreements with dealers, interest-free periods are determined based on the type of equipment sold and the time of year of the sale. These periods range from one to twelve months for most equipment. Interest-free periods may not be extended. Interest is primarily charged to dealers on outstanding balances, from the earlier of the date when goods are sold to retail customers by the dealer or the expiration of certain interest-free periods granted at the time of the sale to the dealer, until payment is received by the Company. Interest charged may not be forgiven and the past due interest rates exceed market rates. Dealers cannot cancel purchases after the equipment is shipped and are responsible for payment even if the equipment is not sold to retail customers. If the interest-free or below market interest rate period exceeds one year, the Company adjusts the expected sales revenue for the effects of the time value of money using a current market interest rate. The revenue related to the financing component is recognized in finance and interest income using the interest method. The Company elected to not adjust the sales price to account for a financing component if the expected interest-free or below market period is one year or less.

Service parts and certain attachments returns are estimable and accrued at the time a sale is recognized. The estimated parts returns are recorded in other assets for the inventory value of estimated part returns, adjusted for restocking fees. The estimated dealer refund liability, adjusted for restocking fees, is recorded in accounts payable and accrued expenses. The estimated returns are based on historical return rates, current dealer inventory levels, and current economic conditions.

Sales incentives. In certain markets, the Company provides sales incentives to dealers. These incentives may be based on a dealer's purchase volume, or on retail sales incentive programs for allowances and financing programs that will be due when the dealer sells the equipment to a retail customer. At the time of the sale to a dealer, the Company records an estimated cost of these programs as a reduction to the sales price. The

estimated cost is based on historical data, field inventory levels, and retail sales volumes. The final cost of these programs is determined at the end of the measurement period for volume based incentives or when the dealer sells the equipment to a retail customer. Actual cost differences from the original cost estimate are recognized in net sales.

Product warranties. For most equipment and parts sales, the Company provides a standard warranty to provide assurance that the equipment will function as intended for a specified period. At the time a sale is recognized, the estimated future warranty costs are recorded. The Company generally determines its total warranty liability by applying historical warranty claims rate experience to the estimated amount of equipment that has been sold and is still under warranty based on dealer inventories and retail sales. The historical claims rate is primarily determined by a review of five-year claims costs with consideration of current quality developments. The Company also offers extended warranty arrangements for purchase at the customer's option. The premiums for extended warranties are recognized in other income in the statement of consolidated income primarily in proportion to the costs expected to be incurred over the contract period. The unamortized extended warranty premiums (deferred revenue) are recorded in accounts payable and accrued expenses in the consolidated balance sheet.

Remanufactured components and parts. The Company remanufactures used engines and components (cores) that are sold to dealers and end customers for maintenance and repair parts. Revenue for remanufactured components is recognized using the same criteria as other parts sales. When a remanufactured part is sold, the Company collects a deposit that is repaid if the customer returns a core that meets certain specifications within a defined time period. The deposit received from the customer is recognized as a liability in accounts payable and accrued expenses and the used component that is expected to be returned is recognized in other assets in the consolidated balance sheet. When a customer returns a core, the deposit is repaid, the liability reversed, and the returned core is recorded in inventory to be remanufactured and sold to another customer. If a core is not returned within the required time as estimated, the deposit is recognized as revenue in net sales, and the estimated core return is recorded as an expense in cost of sales in the statement of consolidated income.

Precision guidance, telematics, and other information enabled solutions. Certain equipment is sold with precision guidance, telematics, and other information gathering and analyzing capabilities. The solutions require hardware, software, and include an obligation to provide telematic services for a specific period of time. These solutions are generally bundled with the sale of the equipment and can also be purchased or renewed separately. The revenue related to the hardware and embedded software is generally recognized at the time of the equipment sale and recorded in net sales in the consolidated statement of income. The revenue for the future services is generally deferred and recognized over the service period. The deferred revenue is recorded as a contract liability in accounts payable and accrued expenses in the consolidated balance sheet and is recognized in other income with the associated expenses recognized in other operating expenses in the statement of consolidated income.

Allowance for credit losses. The Company also records an allowance for credit losses related to the receivables from sales (trade receivables and certain financing receivables) in selling, administrative and general expenses. The allowance represents an estimate of the losses inherent in the receivable portfolio. The allowance is based on many quantitative and qualitative factors. The adequacy of the allowance is reviewed quarterly.

Sales and transaction taxes. The Company collects and remits taxes assessed by different governmental authorities that are both imposed on and concurrent with revenue producing transactions between the Company and its customers. These taxes include sales, use, value-added, and some excise taxes. The Company elected to exclude these taxes from the determination of sales price (excluded from revenues).

Shipping and handling costs. Shipping and handling costs related to the sales of the Company's equipment after a customer obtains control of the equipment are accrued at the time of the sale in cost of sales.

Contract costs. The Company elected to recognize the incremental costs of obtaining a contract as an expense when incurred because the asset's amortization period would be one year or less.

Edgar Filing: DEERE & CO - Form 10-Q

In the first quarter of 2019, the Company's revenue by primary geographical market, major product line, and timing of revenue recognition in millions of dollars follow:

	Agriculture and Turf	Construction and Forestry	Financial Services	Total
Primary geographical markets:				
United States	\$ 2,628	\$ 1,163	\$ 575	\$ 4,366
Canada	172	248	157	577
Western Europe	848	337	20	1,205

Asia, Africa, Australia, New Zealand, and Middle East	453	263	30	746
Total	\$ 4,797	\$ 2,332	\$ 855	\$ 7,984
Major product lines:				
Large Agriculture	\$ 2,167			\$ 2,167
Small Agriculture	1,808			1,808
Turf	506			506
Construction		\$ 1,009		1,009
Compact Construction		265		265
Road Building		598		598
Forestry		352		352
Financial Products	20	6	\$ 855	881
Other	296	102		398
Total	\$ 4,797	\$ 2,332	\$ 855	\$ 7,984
Timing of revenue recognition:				
Revenue recognized at a point in time	\$ 4,755	\$ 2,313		\$ 7,068
Revenue recognized over time	42	19	\$ 855	916
Total	\$ 4,797	\$ 2,332	\$ 855	\$ 7,984

Following is a description of the Company's major product lines:

Large Agriculture – Includes net sales of tractors with more than approximately 200 horsepower and associated attachments, combines, cotton pickers, cotton strippers, self-propelled forage harvesters and related attachments, and sugarcane harvesters, harvesting front-end equipment, sugarcane loaders and pull behind scrapers, tillage, seeding, and application equipment, including sprayers, nutrient management and soil preparation machinery, and related service parts.

Small Agriculture – Includes net sales of medium and utility tractors with less than approximately 200 horsepower, hay and forage equipment, balers, mowers, and related service parts.

Turf – Includes net sales of turf and utility equipment, including riding lawn equipment and walk-behind mowers, golf course equipment, utility vehicles, and commercial mowing equipment, along with a broad line of associated implements, other outdoor power products, and related service parts.

Construction – Includes net sales of a broad range of machines used in construction, earthmoving, and material handling, including backhoe loaders, crawler dozers and loaders, four-wheel-drive loaders, excavators, motor graders, articulated dump trucks, related attachments, and related service parts.

Compact Construction – Includes net sales of smaller construction equipment, including compact excavators, compact track loaders, compact wheel loaders, skid steers, landscape loaders, related attachments, and related service parts.

Road Building – Includes net sales of equipment used in road building and renovation, including milling machines, recyclers, slipform pavers, surface miners, asphalt pavers, compactors, tandem and static rollers mobile crushers and screens, mobile and stationary asphalt plants, related attachments, and related service parts.

Forestry – Includes net sales of equipment used in timber harvesting, including log skidders, feller bunchers, log loaders, log forwarders, log harvesters, and related logging attachments, and related service parts.

Financial Products – Includes finance and interest income primarily from retail notes related to sales of John Deere equipment to end customers, wholesale financing to dealers of John Deere equipment, and revolving charge accounts; lease income from retail leases of John Deere equipment; and revenue from extended warranties.

Other – Includes sales of certain components to other equipment manufacturers, revenue earned over time from precision guidance, telematics, and other information enabled solutions, revenue from service performed at Company owned dealerships and service centers, gains on disposition of property and businesses, trademark licensing revenue, and other miscellaneous revenue items.

The Company invoices in advance of recognizing the sale of certain products and the revenue for certain services. These items are primarily for premiums for extended warranties, advance payments for future equipment sales, and subscription and service revenue related to precision guidance and telematic services. These advanced customer payments are presented as deferred revenue, a contract liability, in accounts payable and accrued expenses in the consolidated balance sheet. The deferred revenue received, but not recognized in revenue, including extended warranty premiums also shown in Note 15, was \$956 million and \$915 million at January 27, 2019 and October 28, 2018, respectively. The contract liability is reduced as the revenue is recognized. During the three months ended January 27, 2019, \$156 million of revenue was recognized from deferred revenue that was recorded as a contract liability at the beginning of 2019.

The Company entered into contracts with customers to deliver equipment and services that have not been recognized at January 27, 2019 because the equipment or services have not been provided. These contracts primarily relate to extended warranty and certain precision guidance and telematic services. The amount of unsatisfied performance obligations for contracts with an original duration greater than one year is \$759 million at January 27, 2019. The estimated revenue to be recognized by fiscal year follows in millions of dollars: remainder of 2019 - \$240, 2020 - \$223, 2021 - \$145, 2022 - \$84, 2023 - \$45, and later years - \$22. As permitted, the Company elected only to disclose unsatisfied performance obligations with an original contract duration greater than one year. The contracts with an expected duration of one year or less are generally for sales to dealers and end customers for equipment, service parts, repair services, and certain telematics services.

(5) Other Comprehensive Income Items

The after-tax changes in accumulated other comprehensive income (loss) in millions of dollars follow:

	Retirement Benefits Adjustment	Cumulative Translation Adjustment	Unrealized Gain (Loss) on Derivatives	Unrealized Gain (Loss) on Securities Debt	Total Accumulated Other Comprehensive Income (Loss)
Balance October 29, 2017	\$ (3,580)	\$ (999)	\$ 5	\$ 10	\$ (4,564)

Unrealized holding gain (loss)	10	(2)	8
Net unrealized gain (loss) on debt securities	10	(2)	8
Retirement benefits adjustment:			
Pensions			
Net actuarial gain (loss)	1		1
Reclassification through amortization of actuarial (gain) loss and prior service (credit) cost to other operating expenses: *			
Actuarial (gain) loss	35	(8)	27
Prior service (credit) cost	3	(1)	2
OPEB			
Reclassification through amortization of actuarial (gain) loss and prior service (credit) cost to other operating expenses: *			
Actuarial (gain) loss	5	(1)	4
Prior service (credit) cost	(18)	4	(14)
Net unrealized gain (loss) on retirement benefits adjustment	26	(6)	20
Total other comprehensive income (loss)	\$ (136)	\$ (6)	\$ (142)

* These accumulated other comprehensive income amounts are included in net periodic pension and OPEB costs. See Note 8 for additional detail.

	Before Tax Amount	Tax (Expense) Credit	After Tax Amount
Three Months Ended January 28, 2018			
Cumulative translation adjustment	\$ 225	\$ (1)	\$ 224
Unrealized gain (loss) on derivatives:			
Unrealized hedging gain (loss)	8	(3)	5
Net unrealized gain (loss) on derivatives	8	(3)	5
Retirement benefits adjustment:			
Pensions			
Net actuarial gain (loss)	7	(2)	5
Reclassification through amortization of actuarial (gain) loss and prior service (credit) cost to other operating expenses: *			
Actuarial (gain) loss	61	(20)	41
Prior service (credit) cost	3	(1)	2
OPEB			
Reclassification through amortization of actuarial (gain) loss and prior service (credit) cost to other operating expenses: *			
Actuarial (gain) loss	16	(5)	11
Prior service (credit) cost	(19)	6	(13)
Net unrealized gain (loss) on retirement benefits adjustment	68	(22)	46
Total other comprehensive income (loss)	\$ 301	\$ (26)	\$ 275

* These accumulated other comprehensive income amounts are included in net periodic pension and OPEB costs. See Note 8 for additional detail.

In the first quarter of 2019 and 2018, the noncontrolling interests' comprehensive income was \$1.1 million and \$.5 million, respectively, which consisted of net income of \$1.1 million and \$.4 million and cumulative translation adjustments of none and \$.1 million, respectively.

(6) Dividends Declared and Paid

Dividends declared and paid on a per share basis were as follows:

	Three Months Ended	
	January 27 2019	January 28 2018
Dividends declared	\$.76	\$.60
Dividends paid	\$.69	\$.60

(7) Earnings Per Share

A reconciliation of basic and diluted net income (loss) per share attributable to Deere & Company follows in millions, except per share amounts:

	Three Months Ended	
	January 27 2019	January 28 2018
Net income (loss) attributable to Deere & Company	\$ 498.5	\$ (535.1)
Less income allocable to participating securities	.1	
Income (loss) allocable to common stock	\$ 498.4	\$ (535.1)
Average shares outstanding	318.5	322.8
Basic per share	\$ 1.56	\$ (1.66)
Average shares outstanding	318.5	322.8
Effect of dilutive share-based compensation	4.2	
Total potential shares outstanding	322.7	322.8
Diluted per share	\$ 1.54	\$ (1.66)

During the first quarter of 2019 and 2018, .6 million shares and 5.3 million shares, respectively, were excluded from the computation because the incremental shares would have been antidilutive.

(8) Pension and Other Postretirement Benefits

The Company has several defined benefit pension plans and postretirement benefit (OPEB) plans, primarily health care and life insurance plans, covering its U.S. employees and employees in certain foreign countries.

The worldwide components of net periodic pension cost consisted of the following in millions of dollars:

	Three Months Ended	
	January 27 2019	January 28 2018
Service cost	\$ 66	\$ 72
Interest cost	111	98
Expected return on plan assets	(200)	(194)
Amortization of actuarial loss	35	61
Amortization of prior service cost	3	3
Net cost	\$ 15	\$ 40

The worldwide components of net periodic OPEB cost consisted of the following in millions of dollars:

	Three Months Ended	
	January 27 2019	January 28 2018
Service cost	\$ 10	\$ 11
Interest cost	54	48
Expected return on plan assets	(9)	(5)
Amortization of actuarial loss	5	16
Amortization of prior service credit	(18)	(19)
Net cost	\$ 42	\$ 51

The components of net periodic pension and OPEB costs excluding the service cost component are included in the line item other operating expenses in the statement of consolidated income.

During the first three months of 2019, the Company contributed approximately \$17 million to its pension plans and \$36 million to its OPEB plans. The Company presently anticipates contributing an additional \$52 million to its pension plans and \$105 million to its OPEB plans during the remainder of fiscal year 2019. These contributions primarily include direct benefit payments from Company funds.

(9) Income Taxes

In 2019, the Company is subject to additional provisions of the U.S. tax reform legislation enacted in December 2017 (tax reform). Tax reform reduced the corporate income tax rate and transitioned from a worldwide corporate tax

system to a modified territorial corporate tax system. The Company's 2019 U.S. corporate income tax rate is 21 percent and was approximately 23.3 percent for 2018. The provisions of tax reform affecting the Company in 2019 include a tax on global intangible low-taxed income (GILTI), a tax determined by base erosion and anti-abuse tax benefits (BEAT) for certain payments between a U.S. corporation and foreign subsidiaries, a limitation on the deductibility of certain executive compensation, a deduction for foreign derived intangible income (FDII), and interest expense limitations. Based on the current interpretations of tax reform legislation and related regulations, along with the Company's 2019 forecasts, the Company does not expect the combined effect of these provisions to be significant for the 2019 provision for income taxes.

In the first quarter of 2018, the Company recorded a discrete tax expense related to the remeasurement of the Company's net deferred tax assets to the new corporate income tax rate of \$715 million and the deemed earnings repatriation tax (repatriation tax) of \$262 million. The full year 2018 discrete tax expense for the remeasurement of the net deferred tax assets was \$414 million and the repatriation tax was \$290 million. The full year repatriation tax included an accrual of approximately \$63 million for foreign withholding taxes on earnings of subsidiaries outside the U.S. that were previously expected to be indefinitely reinvested. The final repatriation tax amount will be determined later in 2019 based on completing the 2018 income tax filings and the interpretation of recently issued regulations. Based on current law, the Company expects to pay the repatriation tax in 2019 with an expected U.S. income tax overpayment.

The Company's unrecognized tax benefits at January 27, 2019 were \$290 million, compared to \$279 million at October 28, 2018. The liability at January 27, 2019, October 28, 2018, and January 28, 2018 consisted of approximately \$143 million, \$128 million, and \$149 million, respectively, which would affect the effective tax rate if the tax benefits were recognized. The remaining liability was related to tax positions for which there are offsetting tax receivables, or the uncertainty was only related to timing. The Company expects that any reasonably possible change in the amounts of unrecognized tax benefits in the next 12 months would not be significant.

(10) Segment Reporting

Worldwide net sales and revenues, operating profit, and identifiable assets by segment in millions of dollars follow:

	Three Months Ended		
	January		
	27	January 28	%
	2019	2018	Change
Net sales and revenues:			
Agriculture and turf	\$ 4,681	\$ 4,243	+10
Construction and forestry	2,260	1,731	+31
Total net sales	6,941	5,974	+16
Financial services	855	776	+10
Other revenues	188	163	+15
Total net sales and revenues	\$ 7,984	\$ 6,913	+15
Operating profit: *			
Agriculture and turf	\$ 348	\$ 387	-10
Construction and forestry	229	32	+616
Financial services	192	217	-12
Total operating profit	769	636	+21
Reconciling items **	(87)	(113)	-23
Income taxes	(184)	(1,058)	-83
Net income (loss) attributable to Deere & Company	\$ 498	\$ (535)	
Intersegment sales and revenues:			
Agriculture and turf net sales	\$ 9	\$ 9	
Construction and forestry net sales	1		
Financial services	72	63	+14
Equipment operations outside the U.S. and Canada:			
Net sales	\$ 2,818	\$ 2,509	+12
Operating profit	176	146	+21

Edgar Filing: DEERE & CO - Form 10-Q

	January 27 2019	October 28 2018	
Identifiable assets:			
Agriculture and turf	\$ 11,060	\$ 10,161	+9
Construction and forestry	10,003	9,855	+2
Financial services	44,630	45,720	-2
Corporate	4,225	4,372	-3
Total assets	\$ 69,918	\$ 70,108	

* Operating profit is income from continuing operations before corporate expenses, certain external interest expense, certain foreign exchange gains and losses, and income taxes. Operating profit of the financial services segment includes the effect of interest expense and foreign exchange gains and losses.

** Reconciling items are primarily corporate expenses, certain external interest expense, certain foreign exchange gains and losses, pension and postretirement benefit costs excluding the service cost component, and net income attributable to noncontrolling interests.

(11) Financing Receivables

Past due balances of financing receivables still accruing finance income represent the total balance held (principal plus accrued interest) with any payment amounts 30 days or more past the contractual payment due date. Non-performing financing receivables represent loans for which the Company has ceased accruing finance income. Beginning in the first quarter of 2019, the Company ceased accruing finance income when these receivables are generally 90 days delinquent. Previously, finance income ceased accruing when the receivables were 120 days delinquent. This change in estimate was made on a prospective basis and did not have a significant effect on the Company's consolidated financial statements. Management's methodology to determine the collectability of delinquent accounts was not affected by the change.

Generally, when receivables are 120 days delinquent the estimated uncollectible amount, after charging the dealer's withholding account, if any, is written off to the allowance for credit losses. Finance income for non-performing receivables is recognized on a cash basis. Accrual of finance income is generally resumed when the receivable becomes contractually current and collections are reasonably assured.

An age analysis of past due financing receivables that are still accruing interest and non-performing financing receivables in millions of dollars follows:

	January 27, 2019		90 Days or Greater	Total
	30-59 Day Past Due	60-89 Days Past Due	Past Due	Past Due

Financing receivables:				
End of period balance	\$ 20,789	\$ 2,652	\$ 5,078	\$ 28,519
Balance individually evaluated **	\$ 101	\$ 2	\$ 16	\$ 119

* Individual allowances were not significant.

** Remainder is collectively evaluated.

Financing receivables are considered impaired when it is probable the Company will be unable to collect all amounts due according to the contractual terms. Receivables reviewed for impairment generally include those that are either past due, or have provided bankruptcy notification, or require significant collection efforts. Receivables that are impaired are generally classified as non-performing.

An analysis of the impaired financing receivables in millions of dollars follows:

	Recorded Investment	Unpaid Principal Balance	Specific Allowance	Average Recorded Investment
January 27, 2019*				
Receivables with specific allowance **	\$ 30	\$ 30	\$ 12	\$ 30
Receivables without a specific allowance **	36	34		36

* Finance income recognized was not material.

** Primarily retail notes.

*** Primarily retail notes and wholesale receivables.

A troubled debt restructuring is generally the modification of debt in which a creditor grants a concession it would not otherwise consider to a debtor that is experiencing financial difficulties. These modifications may include a reduction of the stated interest rate, an extension of the maturity dates, a reduction of the face amount or maturity amount of the debt, or a reduction of accrued interest. During the first three months of 2019, the Company identified 70 financing receivable contracts, primarily retail notes, as troubled debt restructurings with aggregate balances of \$2 million pre-modification and \$2 million post-modification. During the first three months of 2018, there were 102 financing receivable contracts, primarily retail notes, identified as troubled debt restructurings with aggregate balances of \$6 million pre-modification and \$5 million post-modification. During these same periods, there were no significant troubled debt restructurings that subsequently defaulted and were written off. At January 27, 2019, the Company had commitments to lend approximately \$13 million to borrowers whose accounts were modified in troubled debt

restructurings.

21

(12) Securitization of Financing Receivables

The Company, as a part of its overall funding strategy, periodically transfers certain financing receivables (retail notes) into variable interest entities (VIEs) that are special purpose entities (SPEs), or non-VIE banking operations, as part of its asset-backed securities programs (securitizations). The structure of these transactions is such that the transfer of the retail notes did not meet the accounting criteria for sales of receivables, and is, therefore, accounted for as a secured borrowing. SPEs utilized in securitizations of retail notes differ from other entities included in the Company's consolidated statements because the assets they hold are legally isolated. Use of the assets held by the SPEs or the non-VIEs is restricted by terms of the documents governing the securitization transactions.

In these securitizations, the retail notes are transferred to certain SPEs or to non-VIE banking operations, which in turn issue debt to investors. The debt securities issued to the third party investors resulted in secured borrowings, which are recorded as "Short-term securitization borrowings" on the balance sheet. The securitized retail notes are recorded as "Financing receivables securitized – net" on the balance sheet. The total restricted assets on the consolidated balance sheet related to these securitizations include the financing receivables securitized less an allowance for credit losses, and other assets primarily representing restricted cash. Restricted cash results from contractual requirements in securitized borrowing arrangements and serves as a credit enhancement. The restricted cash is used to satisfy payment deficiencies, if any, in the required payments on secured borrowings. The balance of restricted cash is contractually stipulated and is either a fixed amount as determined by the initial balance of the financing receivables securitized or a fixed percentage of the outstanding balance of the securitized financing receivables. The restriction is removed either after all secured borrowing payments are made or proportionally as these receivables are collected and borrowing obligations reduced. For those securitizations in which retail notes are transferred into SPEs, the SPEs supporting the secured borrowings are consolidated unless the Company does not have both the power to direct the activities that most significantly impact the SPEs' economic performance and the obligation to absorb losses or the right to receive benefits that could potentially be significant to the SPEs. No additional support to these SPEs beyond what was previously contractually required has been provided during the reporting periods.

In certain securitizations, the Company consolidates the SPEs since it has both the power to direct the activities that most significantly impact the SPEs' economic performance through its role as servicer of all the receivables held by the SPEs and the obligation through variable interests in the SPEs to absorb losses or receive benefits that could potentially be significant to the SPEs. The restricted assets (retail notes securitized, allowance for credit losses, and other assets) of the consolidated SPEs totaled \$2,137 million, \$2,593 million, and \$2,128 million at January 27, 2019, October 28, 2018, and January 28, 2018, respectively. The liabilities (short-term securitization borrowings and accrued interest) of these SPEs totaled \$2,092 million, \$2,520 million, and \$2,092 million at January 27, 2019, October 28, 2018, and January 28, 2018, respectively. The credit holders of these SPEs do not have legal recourse to the Company's general credit.

In certain securitizations, the Company transfers retail notes to non-VIE banking operations, which are not consolidated since the Company does not have a controlling interest in the entities. The Company's carrying values and interests related to the securitizations with the unconsolidated non-VIEs were restricted assets (retail notes securitized, allowance for credit losses, and other assets) of \$790 million, \$504 million, and \$809 million at January 27, 2019, October 28, 2018, and January 28, 2018, respectively. The liabilities (short-term securitization borrowings and accrued interest) were \$743 million, \$475 million, and \$774 million at January 27, 2019, October 28, 2018, and January 28, 2018, respectively.

In certain securitizations, the Company transfers retail notes into bank-sponsored, multi-seller, commercial paper conduits, which are SPEs that are not consolidated. The Company does not service a significant portion of the conduits' receivables, and therefore, does not have the power to direct the activities that most significantly impact the conduits' economic performance. These conduits provide a funding source to the Company (as well as other transferors

into the conduit) as they fund the retail notes through the issuance of commercial paper. The Company's carrying values and variable interest related to these conduits were restricted assets (retail notes securitized, allowance for credit losses, and other assets) of \$1,745 million, \$1,033 million, and \$1,653 million at January 27, 2019, October 28, 2018, and January 28, 2018, respectively. The liabilities (short-term securitization borrowings and accrued interest) related to these conduits were \$1,632 million, \$965 million, and \$1,565 million at January 27, 2019, October 28, 2018, and January 28, 2018, respectively.

The Company's carrying amount of the liabilities to the unconsolidated conduits, compared to the maximum exposure to loss related to these conduits, which would only be incurred in the event of a complete loss on the restricted assets, was as follows in millions of dollars:

	January 27, 2019
Carrying value of liabilities	\$ 1,632
Maximum exposure to loss	1,745

The total assets of unconsolidated VIEs related to securitizations were approximately \$38 billion at January 27, 2019.

The components of consolidated restricted assets related to secured borrowings in securitization transactions follow in millions of dollars:

	January 27 2019	October 28 2018	January 28 2018
Financing receivables securitized (retail notes)	\$ 4,573	\$ 4,032	\$ 4,487
Allowance for credit losses	(10)	(10)	(13)
Other assets	109	108	116
Total restricted securitized assets	\$ 4,672	\$ 4,130	\$ 4,590

The components of consolidated secured borrowings and other liabilities related to securitizations follow in millions of dollars:

	January 27 2019	October 28 2018	January 28 2018
Short-term securitization borrowings	\$ 4,464	\$ 3,957	\$ 4,428
Accrued interest on borrowings	3	3	3
Total liabilities related to restricted securitized assets	\$ 4,467	\$ 3,960	\$ 4,431

The secured borrowings related to these restricted securitized retail notes are obligations that are payable as the retail notes are liquidated. Repayment of the secured borrowings depends primarily on cash flows generated by the restricted assets. Due to the Company's short-term credit rating, cash collections from these restricted assets are not required to be placed into a segregated collection account until immediately prior to the time payment is required to the secured creditors. At January 27, 2019, the maximum remaining term of all securitized retail notes was approximately seven years.

(13) Inventories

Edgar Filing: DEERE & CO - Form 10-Q

Most inventories owned by Deere & Company and its U.S. equipment subsidiaries and certain foreign equipment subsidiaries are valued at cost on the “last-in, first-out” (LIFO) method. If all of the Company’s inventories had been valued on a “first-in, first-out” (FIFO) method, estimated inventories by major classification in millions of dollars would have been as follows:

	January 27 2019	October 28 2018	January 28 2018
Raw materials and supplies	\$ 2,506	\$ 2,233	\$ 2,191
Work-in-process	1,026	776	924
Finished goods and parts	5,693	4,777	4,980
Total FIFO value	9,225	7,786	8,095
Less adjustment to LIFO value	1,823	1,637	1,481
Inventories	\$ 7,402	\$ 6,149	\$ 6,614

(14) Goodwill and Other Intangible Assets-Net

The changes in amounts of goodwill by operating segments were as follows in millions of dollars:

	Agriculture and Turf	Construction and Forestry	Total
Goodwill at October 29, 2017	\$ 521	\$ 512	\$ 1,033
Acquisitions		2,062	2,062
Divestitures		(10)	(10)
Translation adjustments	9	18	27
Goodwill at January 28, 2018	\$ 530	\$ 2,582	\$ 3,112
Goodwill at October 28, 2018	\$ 583	\$ 2,518	\$ 3,101
Translation adjustments and other	2	(55)	(53)
Goodwill at January 27, 2019	\$ 585	\$ 2,463	\$ 3,048

There were no accumulated impairment losses in the reported periods.

The components of other intangible assets were as follows in millions of dollars:

	Useful Lives * (Years)	January 27 2019	October 28 2018	January 28 2018
Amortized intangible assets:				
Customer lists and relationships	16	\$ 538	\$ 542	\$ 587
Technology, patents, trademarks, and other	18	1,054	1,080	1,050
Total at cost		1,592	1,622	1,637
Less accumulated amortization **		207	183	100
Total		1,385	1,439	1,537
Unamortized intangible assets:				
In-process research and development		123	123	123
Other intangible assets – net		\$ 1,508	\$ 1,562	\$ 1,660
* Weighted-averages				

** Accumulated amortization at January 27, 2019, October 28, 2018, and January 28, 2018 for customer lists and relationships totaled \$54 million, \$46 million, and \$21 million and technology, patents, trademarks, and other totaled \$153 million, \$137 million, and \$79 million, respectively.

The amortization of other intangible assets in the first quarter of 2019 and 2018 was \$27 million and \$13 million, respectively. The estimated amortization expense for the next five years is as follows in millions of dollars: remainder of 2019 – \$108, 2020 – \$102, 2021 – \$99, 2022 – \$99, and 2023 – \$96.

(15) Commitments and Contingencies

The Company generally determines its total warranty liability by applying historical claims rate experience to the estimated amount of equipment that has been sold and is still under warranty based on dealer inventories and retail sales. The historical claims rate is primarily determined by a review of five-year claims costs and current quality developments.

The premiums for extended warranties are primarily recognized in income in proportion to the costs expected to be incurred over the contract period. These unamortized extended warranty premiums (deferred revenue) included in the following table totaled \$514 million and \$471 million at January 27, 2019 and January 28, 2018, respectively.

24

A reconciliation of the changes in the warranty liability and unearned premiums in millions of dollars follows:

	Three Months Ended	
	January 27 2019	January 28 2018
Beginning of period balance	\$ 1,652	\$ 1,468
Payments	(228)	(216)
Amortization of premiums received	(54)	(56)
Accruals for warranties	253	193
Premiums received	65	61
Acquisitions		80
Foreign exchange	(1)	20
End of period balance	\$ 1,687	\$ 1,550

At January 27, 2019, the Company had approximately \$336 million of guarantees issued primarily to banks outside the U.S. and Canada related to third-party receivables for the retail financing of John Deere and Wirtgen equipment. The Company may recover a portion of any required payments incurred under these agreements from repossession of the equipment collateralizing the receivables. At January 27, 2019, the Company had accrued losses of approximately \$14 million under these agreements. The maximum remaining term of the receivables guaranteed at January 27, 2019 was approximately seven years.

At January 27, 2019, the Company had commitments of approximately \$377 million for the construction and acquisition of property and equipment. Also, at January 27, 2019, the Company had restricted assets of \$94 million, primarily as collateral for borrowings and restricted other assets. See Note 12 for additional restricted assets associated with borrowings related to securitizations.

The Company also had other miscellaneous contingent liabilities totaling approximately \$165 million at January 27, 2019. The accrued liability for these contingencies was approximately \$15 million at January 27, 2019.

The Company is subject to various unresolved legal actions which arise in the normal course of its business, the most prevalent of which relate to product liability (including asbestos-related liability), retail credit, employment, patent, and trademark matters. The Company believes the reasonably possible range of losses for these unresolved legal actions would not have a material effect on its consolidated financial statements.

(16) Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. To determine fair value, the Company uses various methods including market and income approaches. The Company utilizes valuation models and techniques that maximize the use of observable inputs. The models are industry-standard models that consider various assumptions including time values and yield curves as well as other economic measures. These valuation techniques are consistently applied.

Level 1 measurements consist of quoted prices in active markets for identical assets or liabilities. Level 2 measurements include significant other observable inputs such as quoted prices for similar assets or liabilities in active markets; identical assets or liabilities in inactive markets; observable inputs such as interest rates and yield curves; and other market-corroborated inputs. Level 3 measurements include significant unobservable inputs.

The fair values of financial instruments that do not approximate the carrying values in millions of dollars follow:

	January 27, 2019		October 28, 2018		January 28, 2018	
	Carrying Value	Fair Value *	Carrying Value	Fair Value *	Carrying Value	Fair Value *
Financing receivables – net:						
Equipment operations	\$ 102	\$ 99	\$ 93	\$ 91	\$ 52	\$ 51
Financial services	25,048	24,900	26,961	26,722	23,803	23,597
Total	\$ 25,150	\$ 24,999	\$ 27,054	\$ 26,813	\$ 23,855	\$ 23,648
Financing receivables securitized – net:						
Equipment operations	\$ 67	\$ 65	\$ 76	\$ 73	\$ 125	\$ 125
Financial services	4,496	4,454	3,946	3,895	4,349	4,303
Total	\$ 4,563	\$ 4,519	\$ 4,022	\$ 3,968	\$ 4,474	\$ 4,428
Short-term securitization borrowings:						
Equipment operations	\$ 67	\$ 67	\$ 75	\$ 75	\$ 126	\$ 126
Financial services	4,397	4,391	3,882	3,870	4,302	4,293
Total	\$ 4,464	\$ 4,458	\$ 3,957	\$ 3,945	\$ 4,428	\$ 4,419
Long-term borrowings due within one year:						
Equipment operations	\$ 928	\$ 937	\$ 970	\$ 979	\$ 289	\$ 289
Financial services	5,198	5,186	5,427	5,411	6,124	6,127
Total	\$ 6,126	\$ 6,123	\$ 6,397	\$ 6,390	\$ 6,413	\$ 6,416
Long-term borrowings:						
Equipment operations	\$ 4,712	\$ 4,989	\$ 4,714	\$ 4,948	\$ 5,573	\$ 6,076
Financial services	23,143	23,217	22,523	22,590	20,849	21,023
Total	\$ 27,855	\$ 28,206	\$ 27,237	\$ 27,538	\$ 26,422	\$ 27,099

* Fair value measurements above were Level 3 for all financing receivables, Level 3 for equipment operations short-term securitization borrowings, and Level 2 for all other borrowings.

Fair values of the financing receivables that were issued long-term were based on the discounted values of their related cash flows at interest rates currently being offered by the Company for similar financing receivables. The fair values of the remaining financing receivables approximated the carrying amounts.

Fair values of long-term borrowings and short-term securitization borrowings were based on current market quotes for identical or similar borrowings and credit risk, or on the discounted values of their related cash flows at current market interest rates. Certain long-term borrowings have been swapped to current variable interest rates. The carrying values of these long-term borrowings included adjustments related to fair value hedges.

Assets and liabilities measured at fair value on a recurring basis in millions of dollars follow:

	January 27 2019*	October 28 2018*	January 28 2018*
Marketable securities			
Equity fund ****	\$ 51	\$ 46	\$ 52
Fixed income fund			14
U.S. government debt securities	120	111	75
Municipal debt securities	51	46	41
Corporate debt securities	141	140	137

Mortgage-backed securities **	146	137	125
Total marketable securities	524	490	462
Other assets			
Derivatives:			
Interest rate contracts	76	80	94
Foreign exchange contracts	59	83	31
Cross-currency interest rate contracts	3	5	8
Total assets ***	\$ 662	\$ 658	\$ 595
Accounts payable and accrued expenses			
Derivatives:			
Interest rate contracts	\$ 232	\$ 350	\$ 248
Foreign exchange contracts	64	49	124
Cross-currency interest rate contracts	2		2
Total liabilities	\$ 298	\$ 399	\$ 374

* All measurements above were Level 2 measurements except for Level 1 measurements of the equity fund of \$51 million, \$46 million, and \$52 million at January 27, 2019, October 28, 2018, and January 28, 2018, respectively; the fixed income fund of \$14 million at January 28, 2018; and U.S. government debt securities of \$44 million, \$44 million, and \$43 million at January 27, 2019, October 28, 2018, and January 28, 2018, respectively. In addition, \$6 million, \$8 million, and \$15 million of the international debt securities were Level 3 measurements at January 27, 2019, October 28, 2018, and January 28, 2018, respectively.

** Primarily issued by U.S. government sponsored enterprises.

*** Excluded from this table were the Company's cash equivalents, which were carried at cost that approximates fair value. The cash equivalents consist primarily of money market funds and time deposits.

****Beginning in the first quarter of fiscal year 2019, unrealized fair value changes are recognized directly in net income (see Note 3).

The contractual maturities of debt securities at January 27, 2019 in millions of dollars are shown below. Actual maturities may differ from those scheduled as a result of prepayments by the issuers. Because of the potential for prepayment on mortgage-backed securities, they are not categorized by contractual maturity.

	Amortized Cost	Fair Value
Due in one year or less	\$ 32	\$ 32
Due after one through five years	112	111
Due after five through 10 years	101	101
Due after 10 years	84	83
Mortgage-backed securities	150	146
Debt securities	\$ 479	\$ 473

27

Fair value, recurring Level 3 measurements from available-for-sale marketable securities in millions of dollars follow:

	Three Months Ended	
	January 27 2019	January 28 2018
Beginning of period balance	\$ 8	\$ 17
Principal payments	(3)	(2)
Other	1	
End of period balance	\$ 6	\$ 15

There were no fair value, nonrecurring measurements from impairments in the reported periods. Financing receivables with specific allowances are shown in Note 11. Losses were not significant.

The following is a description of the valuation methodologies the Company uses to measure certain financial instruments on the balance sheet at fair value:

Marketable Securities – The portfolio of investments, except for the Level 3 measurement international debt securities, is primarily valued on a market approach (matrix pricing model) in which all significant inputs are observable or can be derived from or corroborated by observable market data such as interest rates, yield curves, volatilities, credit risk, and prepayment speeds. Funds are primarily valued using the fund’s net asset value, based on the fair value of the underlying securities. The Level 3 measurement international debt securities are primarily valued using an income approach based on discounted cash flows using yield curves derived from limited, observable market data.

Derivatives – The Company’s derivative financial instruments consist of interest rate swaps and caps, foreign currency futures, forwards and swaps, and cross-currency interest rate swaps. The portfolio is valued based on an income approach (discounted cash flow) using market observable inputs, including swap curves and both forward and spot exchange rates for currencies.

Financing Receivables – Specific reserve impairments are based on the fair value of the collateral, which is measured using a market approach (appraisal values or realizable values). Inputs include a selection of realizable values.

(17) Derivative Instruments

It is the Company’s policy that derivative transactions are executed only to manage exposures arising in the normal course of business and not for the purpose of creating speculative positions or trading. The Company’s financial services operations manage the relationship of the types and amounts of their funding sources to their receivable and lease portfolio in an effort to diminish risk due to interest rate and foreign currency fluctuations, while responding to favorable financing opportunities. The Company also has foreign currency exposures at some of its foreign and domestic operations related to buying, selling, and financing in currencies other than the functional currencies. In addition, the Company has interest rate exposure at certain equipment operations units for below market retail financing programs that are used as sales incentives and are offered for extended periods.

All derivatives are recorded at fair value on the balance sheet. Cash collateral received or paid is not offset against the derivative fair values on the balance sheet. Each derivative is designated as a cash flow hedge, a fair value hedge, or remains undesignated. All designated hedges are formally documented as to the relationship with the hedged item as well as the risk-management strategy. Both at inception and on an ongoing basis the hedging instrument is assessed as

to its effectiveness. If and when a derivative is determined not to be highly effective as a hedge, or the underlying hedged transaction is no longer likely to occur, or the hedge designation is removed, or the derivative is terminated, hedge accounting is discontinued.

Cash Flow Hedges

Certain interest rate and cross-currency interest rate contracts (swaps) were designated as hedges of future cash flows from borrowings. The total notional amounts of the receive-variable/pay-fixed interest rate contracts at January 27, 2019, October 28, 2018, and January 28, 2018 were \$2,800 million, \$3,050 million, and \$1,500 million, respectively. The total notional amount of the cross-currency interest rate contracts at January 28, 2018 was \$22 million. Fair value gains or losses on these cash flow hedges were recorded in OCI and subsequently reclassified into interest expense or other operating expenses (foreign exchange) in the

same periods during which the hedged transactions affected earnings. These amounts offset the effects of interest rate or foreign currency exchange rate changes on the related borrowings. The cash flows from these contracts were recorded in operating activities in the statement of consolidated cash flows.

The amount of gain recorded in OCI at January 27, 2019 that is expected to be reclassified to interest expense or other operating expenses in the next twelve months if interest rates or exchange rates remain unchanged is approximately \$7 million after-tax. These contracts mature in up to 23 months. There were no gains or losses reclassified from OCI to earnings based on the probability that the original forecasted transaction would not occur.

Fair Value Hedges

Certain interest rate contracts (swaps) were designated as fair value hedges of borrowings. The total notional amounts of the receive-fixed/pay-variable interest rate contracts at January 27, 2019, October 28, 2018, and January 28, 2018 were \$8,622 million, \$8,479 million, and \$9,110 million, respectively. The fair value gains or losses on these contracts were generally offset by fair value gains or losses on the hedged items (fixed-rate borrowings) with both items recorded in interest expense.

The amounts recorded in the consolidated balance sheet related to borrowings designated in fair value hedging relationships in millions of dollars follow:

	Carrying Amount of Hedged Item	Cumulative Increase (Decrease) of Fair Value Hedging Adjustments Included in the Carrying Amount Active		
		Relationships	Relationships	Total
		Hedging	Discontinued	
January 27, 2019				
Long-term borrowings due within one year*	\$ 192	\$ 1	\$ (4)	\$ (3)
Long-term borrowings	8,177	(179)	(41)	(220)

* Presented in short-term borrowings

Derivatives not designated as hedging instruments

The Company has certain interest rate contracts (swaps and caps), foreign exchange contracts (futures, forwards, and swaps), and cross-currency interest rate contracts (swaps), which were not formally designated as hedges. These derivatives were held as economic hedges for underlying interest rate or foreign currency exposures, primarily for certain borrowings, purchases or sales of inventory, and below market retail financing programs. The total notional amounts of these interest rate swaps at January 27, 2019, October 28, 2018, and January 28, 2018 were \$8,225 million, \$8,075 million, and \$7,225 million, the foreign exchange contracts were \$6,500 million, \$6,842 million, and \$6,394 million, and the cross-currency interest rate contracts were \$87 million, \$81 million, and \$85 million, respectively. The increase in the total notional amount of interest rate swaps from January 28, 2018 primarily relates to the equipment operations' economic hedge of announced retail financing programs. At January 27, 2019, October 28, 2018, and January 28, 2018, there were also \$32 million, \$66 million, and \$178 million, respectively, of interest

rate caps purchased and the same amounts sold at the same capped interest rate to facilitate borrowings through securitization of retail notes. The fair value gains or losses from the interest rate contracts were recognized currently in interest expense and the gains or losses from foreign exchange contracts in cost of sales or other operating expenses, generally offsetting over time the expenses on the exposures being hedged. The cash flows from these non-designated contracts were recorded in operating activities in the statement of consolidated cash flows.

Fair values of derivative instruments in the condensed consolidated balance sheet in millions of dollars follow:

	January 27 2019	October 28 2018	January 28 2018
Other Assets			
Designated as hedging instruments:			
Interest rate contracts	\$ 47	\$ 29	\$ 39
Cross-currency interest rate contracts			4
Total designated	47	29	43
Not designated as hedging instruments:			
Interest rate contracts	29	51	55
Foreign exchange contracts	59	83	31
Cross-currency interest rate contracts	3	5	4
Total not designated	91	139	90
Total derivative assets	\$ 138	\$ 168	\$ 133
Accounts Payable and Accrued Expenses			
Designated as hedging instruments:			
Interest rate contracts	\$ 205	\$ 321	\$ 223
Total designated	205	321	223
Not designated as hedging instruments:			
Interest rate contracts	27	29	25
Foreign exchange contracts	64	49	124
Cross-currency interest rate contracts	2		2
Total not designated	93	78	151
Total derivative liabilities	\$ 298	\$ 399	\$ 374

The classification and gains (losses) including accrued interest expense related to derivative instruments on the statement of consolidated income consisted of the following in millions of dollars:

	Three Months Ended	
	January 27 2019	January 28 2018
Fair Value Hedges:		
Interest rate contracts - Interest expense	\$ 133	\$ (136)
Cash Flow Hedges:		
Recognized in OCI		
Interest rate contracts - OCI (pretax) *	(9)	8

Reclassified from OCI		
Interest rate contracts - Interest expense *	2	
Not Designated as Hedges:		
Interest rate contracts - Net sales	\$ (10)	
Interest rate contracts - Interest expense *	(8)	\$ 5
Foreign exchange contracts - Cost of sales	(5)	(48)
Foreign exchange contracts - Other operating *	20	(216)
Total not designated	\$ (3)	\$ (259)

* Includes interest and foreign exchange gains (losses) from cross-currency interest rate contracts.

Counterparty Risk and Collateral

Derivative instruments are subject to significant concentrations of credit risk to the banking sector. The Company manages individual counterparty exposure by setting limits that consider the credit rating of the counterparty, the credit default swap spread of the counterparty, and other financial commitments and

exposures between the Company and the counterparty banks. All interest rate derivatives are transacted under International Swaps and Derivatives Association (ISDA) documentation. Some of these agreements include credit support provisions. Each master agreement permits the net settlement of amounts owed in the event of default or termination.

Certain of the Company's derivative agreements contain credit support provisions that may require the Company to post collateral based on the size of the net liability positions and credit ratings. The aggregate fair value of all derivatives with credit-risk-related contingent features that were in a net liability position at January 27, 2019, October 28, 2018, and January 28, 2018, was \$233 million, \$350 million, and \$250 million, respectively. In accordance with the limits established in these agreements, the Company posted \$8 million and \$59 million in cash collateral at January 27, 2019 and October 28, 2018, respectively. No cash collateral was posted at January 28, 2018.

Derivatives are recorded without offsetting for netting arrangements or collateral. The impact on the derivative assets and liabilities related to netting arrangements and any collateral received or paid in millions of dollars follows:

January 27, 2019	Gross Amounts Recognized	Netting Arrangements	Collateral Paid	Net Amount
Assets	\$ 138	\$ (75)		\$ 63
Liabilities	298	(75)	\$ (8)	215

October 28, 2018	Gross Amounts Recognized	Netting Arrangements	Collateral Paid	Net Amount
Assets	\$ 168	\$ (65)		\$ 103
Liabilities	399	(65)	\$ (59)	275

January 28, 2018	Gross Amounts Recognized	Netting Arrangements	Collateral Paid	Net Amount
Assets	\$ 133	\$ (70)		\$ 63
Liabilities	374	(70)		304

(18) Stock Option and Restricted Stock Awards

In December 2018, the Company granted stock options to employees for the purchase of 402 thousand shares of common stock at an exercise price of \$148.14 per share and a binomial lattice model fair value of \$46.96 per share at the grant date. At January 27, 2019, options for 8.6 million shares were outstanding with a weighted-average exercise price of \$90.57 per share. The Company also granted 401 thousand restricted stock units to employees in the first three months of 2019, of which 316 thousand are subject to service based only conditions and 85 thousand are subject to performance/service based conditions. The fair value of the service based only units at the grant date was \$148.14 per unit based on the market price of a share of underlying common stock. The fair value of the performance/service based units at the grant date was \$139.37 per unit based on the market price of a share of underlying common stock excluding dividends. At January 27, 2019, the Company was authorized to grant an additional 8.3 million shares related to stock option and restricted stock awards.

(19) Acquisitions

In September 2018, the Company acquired PLA, a privately held manufacturer of sprayers, planters, and specialty products for agriculture. PLA is based in Argentina, with manufacturing facilities in Las Rosas, Argentina and Canoas, Brazil. The total cash purchase price before the final adjustment, net of cash acquired of \$1 million, was \$74 million with \$4 million retained by the Company as escrow to secure indemnity obligations. In addition to the cash purchase price, the Company assumed \$30 million of liabilities. The preliminary asset and liability fair values at the acquisition date in millions of dollars follow:

	September 2018
Trade accounts and notes receivable	\$ 3
Other receivables	14
Inventories	19
Property and equipment	1
Goodwill	46
Other intangible assets	20
Other assets	1
Total assets	\$ 104
Short-term borrowings	\$ 8
Accounts payable and accrued expenses	18
Deferred income taxes	4
Total liabilities	\$ 30

The identifiable intangible assets were primarily related to technology, trademarks, and customer relationships, which have a weighted-average amortization period of five years.

The goodwill was the result of future cash flows and related fair values of the entity exceeding the fair value of the identified assets and liabilities, and is not expected to be deducted for tax purposes. The results of PLA were included in the Company's consolidated financial statements in the agriculture and turf segment since the date of acquisition. The pro forma results of operations as if the acquisition had occurred at the beginning of the prior fiscal year would not differ significantly from the reported results.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS

Overview

Organization

The Company's equipment operations generate revenues and cash primarily from the sale of equipment to John Deere dealers and distributors. The equipment operations manufacture and distribute a full line of agricultural equipment; a variety of commercial and consumer equipment; and a broad range of equipment for construction, road building, and forestry. The Company's financial services primarily provide credit services, which mainly finance sales and leases of equipment by John Deere dealers and trade receivables purchased from the equipment operations. In addition, financial services offers extended equipment warranties. The information in the following discussion is presented in a format that includes information grouped as consolidated, equipment operations, and financial services. The Company also views its operations as consisting of two geographic areas, the U.S. and Canada, and outside the U.S. and Canada. The Company's operating segments consist of agriculture and turf, construction and forestry, and financial services.

Trends and Economic Conditions

Industry sales of agricultural machinery in the U.S. and Canada are forecast to be about the same to 5 percent higher, compared to 2018. Industry sales in the European Union (EU)28 member nations are forecast to be about the same in 2019. In South America, industry sales of tractors and combines are projected to be about the same to 5 percent higher from 2018 levels. Asian sales are forecast to be about the same or decrease slightly in 2019. Industry sales of turf and utility equipment in the U.S. and Canada are expected to be about the same to 5 percent higher for 2019. The Company's agriculture and turf segment sales increased 10 percent in the first quarter and are forecast to increase about 4 percent for fiscal year 2019. Construction equipment markets reflect generally positive fundamentals and economic growth worldwide. In forestry, global industry sales are expected to be about 5 to 10 percent higher. The Company's construction and forestry segment sales increased 31 percent in the first quarter, with two additional months of Wirtgen adding 24 percent, and are forecast to increase about 13 percent in 2019, with two additional months of Wirtgen adding 4 percent to the segment's sales. Net income attributable to Deere & Company for the Company's financial services operations is forecast to be approximately \$630 million in 2019.

Items of concern include the uncertainty of the effectiveness of governmental actions in respect to monetary and fiscal policies, the impact of sovereign debt, eurozone and Argentine issues, capital market disruptions, trade agreements, changes in demand and pricing for used equipment, and geopolitical events. Significant fluctuations in foreign currency exchange rates and volatility in the price of many commodities could also impact the Company's results.

The Company's results were negatively impacted by higher costs for raw materials and logistics, as well as concerns over tariffs and trade policies, causing farmers to become more cautious about making major purchases. Sales of construction and forestry machinery continued at a strong pace. Despite uncertainty in some key markets, the Company forecasts strong financial results in 2019. This is due to an expectation that cost pressures should abate as the year progresses, a more flexible cost structure, an expanded global customer base, and leadership in the latest precision technologies. Customers are responding favorably to the advanced features and technology in the new products. The Company believes it is well positioned to achieve its financial goals and on track for delivering solid operating performance and significant value to its customers and investors in the future.

2019 Compared with 2018

Edgar Filing: DEERE & CO - Form 10-Q

The following table provides the net income (loss) attributable to Deere & Company in millions of dollars and diluted earnings per share in dollars:

	Three Months Ended	
	January 27 2019	January 28 2018
Net income (loss) attributable to Deere & Company	\$ 498.5	\$ (535.1)
Diluted earnings per share	1.54	(1.66)

Affecting 2018 net income were discrete charges to the provision for income taxes of \$977 million due to tax reform.

The worldwide net sales and revenues, price realization, and the effect of currency translation for worldwide, U.S. and Canada, and outside U.S. and Canada in millions of dollars follows:

	Three Months Ended		
	January		% Change
	27 2019	January 28 2018	
Worldwide net sales and revenues	\$ 7,984	\$ 6,913	15%
Worldwide equipment operations net sales	6,941	5,974	16%
Price realization			5%
Currency translation (unfavorable)			-3%
Wirtgen - two additional months			7%
U.S. and Canada equipment operations net sales	4,123	3,465	19%
Currency translation (unfavorable)			-1%
Wirtgen - two additional months			2%
Outside U.S. and Canada equipment operations net sales	2,818	2,509	12%
Currency translation (unfavorable)			-6%
Wirtgen - two additional months			14%

The Company's equipment operations operating profit and net income (loss) and financial services operations net income follow in millions of dollars:

	Three Months Ended		
	January		% Change
	27 2019	January 28 2018	
Equipment operations operating profit	\$ 577	\$ 419	38%
Equipment operations net income (loss)	340	(964)	
Financial services net income	154	425	-64%

The discussion on net sales and operating profit are included in the Business Segment Results below. Tax reform resulted in a discrete charge to the equipment operations 2018 provision for income taxes of \$1,239 million and a discrete benefit to the financial services 2018 provision for income taxes of \$262 million.

Business Segment Results

Agriculture and Turf. The agriculture and turf segment results in millions of dollars follow:

Three Months Ended
January 28

	January		
	2019	2018	% Change
Net sales	\$ 4,681	\$ 4,243	10%
Operating profit	348	387	-10%
Operating margin	7.4%	9.1%	

Segment sales for the quarter increased due to higher shipment volumes and price realization, partially offset by the unfavorable effects of currency translation and higher warranty related expenses. Operating profit declined mainly as a result of higher production costs, higher warranty related expenses, a less favorable product mix, and higher research and development expenses, largely offset by price realization and higher shipment volumes.

Construction and Forestry. The construction and forestry segment results in millions of dollars follow:

	Three Months Ended		
	January		
	27	January 28	
	2019	2018	% Change
Net sales	\$ 2,260	\$ 1,731	31%
Operating profit	229	32	616%
Operating margin	10.1%	1.8%	

Segment sales increased for the quarter primarily due to the inclusion of Wirtgen for the full quarter versus one month in the first quarter of 2018. The two additional months accounted for about 24 percent of the increase for the current quarter. Additionally, net sales increased due to price realization and higher shipment volumes, partially offset by the unfavorable effects of currency translation. Wirtgen's operating profit was \$14 million for the quarter compared with an operating loss of \$92 million last year. Excluding Wirtgen, the improvement for the quarter was primarily driven by price realization, partially offset by higher production costs and a less favorable product mix.

Financial Services. The financial services segment revenue, interest expense, and operating profit in millions of dollars, along with the ratio of earnings to fixed charges follow:

	Three Months Ended		
	January		
	27	January 28	
	2019	2018	% Change
Revenue (including intercompany revenue)	\$ 927	\$ 840	10%
Interest expense	287	194	48%
Operating profit	192	217	-12%
Consolidated ratio of earnings to fixed charges	1.68	2.13	-21%

Operating profit decreased due to less favorable financing spreads, partially offset by income from a higher average portfolio. The average balance of receivables and leases financed was 7 percent higher in the first three months of 2019, compared with the same period last year. Interest expense increased 48 percent in the first quarter of 2019 primarily as a result of higher average borrowing rates and higher average borrowings.

The cost of sales to net sales ratio and other significant statement of consolidated income changes not previously discussed follow:

	Three Months Ended		
	January		
	27	January 28	
	2019	2018	% Change
Cost of sales to net sales	78.3%	78.8%	
Research and development expenses	\$ 407	\$ 357	14%

Edgar Filing: DEERE & CO - Form 10-Q

Selling, administrative and general expenses	764	705	8%
Other operating expenses	351	343	2%

The cost of sales ratio improved due to price realization, largely offset by higher production costs, unfavorable product mix, and higher warranty related expenses. Research and development expenses increased primarily as a result of spending to support new, advanced products and the impact of acquisitions. Selling, administrative and general expenses increased primarily as a result of the impact of acquisitions. Other operating expenses increased primarily as a result of the unfavorable effect of currency translation and higher depreciation on operating leases, partially offset by lower pension and postretirement benefit costs excluding the service cost component.

Market Conditions and Outlook

Company equipment sales are projected to increase by about 7 percent for fiscal 2019 compared with 2018. Included in the forecast are Wirtgen results for the full fiscal year of 2019 compared with 10 months in 2018. This adds about 1 percent to the Company's net sales for the current year. The forecast includes a negative foreign currency

translation effect of about 2 percent for the year. Net sales and revenues are projected to increase by about 7 percent for fiscal 2019. Net income attributable to Deere & Company is forecast to be about \$3,600 million.

- **Agriculture and Turf.** The Company's worldwide sales of agriculture and turf equipment are forecast to increase about 4 percent for fiscal year 2019, including a negative currency translation effect of about 2 percent. Industry sales of agricultural equipment in the U.S. and Canada are forecast to be about the same to 5 percent higher, helped by higher demand for large and small equipment. Full year industry sales in the EU28 member nations are forecast to be about the same as a result of drought conditions in key markets. South American industry sales of tractors and combines are projected to be about the same to 5 percent higher benefiting from strength in Brazil. Asian sales are forecast to be about the same to down slightly. Industry sales of turf and utility equipment in the U.S. and Canada are expected to be about the same to 5 percent higher for 2019.
- **Construction and Forestry.** The Company's worldwide sales of construction and forestry equipment are anticipated to increase about 13 percent for 2019, with foreign currency rates having an unfavorable translation effect of about 2 percent. The forecast includes a full year of Wirtgen sales, versus 10 months in fiscal 2018, with the two additional months adding about 4 percent to division sales for the year. The outlook reflects generally positive fundamentals and economic growth worldwide. In forestry, global industry sales are expected to increase 5 to 10 percent mainly as a result of improved demand in EU28 countries and Russia.
- **Financial Services.** Fiscal year 2019 net income attributable to Deere & Company for the financial services operations is expected to be approximately \$630 million. Excluding the 2018 benefit from tax reform, net income is expected to benefit from a higher average portfolio, partially offset by less favorable financing spreads, a higher provision for credit losses, and higher selling, administrative and general expenses.

Safe Harbor Statement

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995: Statements under "Overview," "Market Conditions and Outlook," and other forward-looking statements herein that relate to future events, expectations, and trends involve factors that are subject to change, and risks and uncertainties that could cause actual results to differ materially. Some of these risks and uncertainties could affect particular lines of business, while others could affect all of the Company's businesses.

The Company's agricultural equipment business is subject to a number of uncertainties including the factors that affect farmers' confidence and financial condition. These factors include demand for agricultural products, world grain stocks, weather conditions, soil conditions, harvest yields, prices for commodities and livestock, crop and livestock production expenses, availability of transport for crops, trade restrictions and tariffs, global trade agreements (e.g, the North American Free Trade Agreement), the level of farm product exports (including concerns about genetically modified organisms), the growth and sustainability of non-food uses for some crops (including ethanol and biodiesel production), real estate values, available acreage for farming, the land ownership policies of governments, changes in government farm programs and policies, international reaction to such programs, changes in and effects of crop insurance programs, changes in environmental regulations and their impact on farming practices, animal diseases and their effects on poultry, beef and pork consumption and prices, and crop pests and diseases.

Factors affecting the outlook for the Company's turf and utility equipment include consumer confidence, weather conditions, customer profitability, labor supply, consumer borrowing patterns, consumer purchasing preferences, housing starts and supply, infrastructure investment, spending by municipalities and golf courses, and consumable input costs.

Consumer spending patterns, real estate and housing prices, the number of housing starts, interest rates and the levels of public and non-residential construction are important to sales and results of the Company's construction and forestry equipment. Prices for pulp, paper, lumber and structural panels are important to sales of forestry equipment.

All of the Company's businesses and its results are affected by general economic conditions in the global markets and industries in which the company operates; customer confidence in general economic conditions; government spending and taxing; foreign currency exchange rates and their volatility, especially fluctuations in the value of the U.S. dollar; interest rates; inflation and deflation rates; changes in weather patterns; the political and social stability of the global markets in which the company operates; the effects of, or response to, terrorism and security threats; wars and other conflicts; natural disasters; and the spread of major epidemics.

Significant changes in market liquidity conditions, changes in the Company's credit ratings and any failure to comply with financial covenants in credit agreements could impact access to funding and funding costs, which could reduce the Company's earnings and cash flows. Financial market conditions could also negatively impact customer access to capital for purchases of the Company's products and customer confidence and purchase decisions, borrowing and repayment practices, and the number and size of customer loan delinquencies and defaults. A debt crisis, in Europe or elsewhere, could negatively impact currencies, global financial markets, social and political stability, funding sources and costs, asset and obligation values, customers, suppliers, demand for equipment, and company operations and results. The Company's investment management activities could be impaired by changes in the equity, bond and other financial markets, which would negatively affect earnings.

The anticipated withdrawal of the United Kingdom from the European Union and the perceptions as to the impact of the withdrawal may adversely affect business activity, political stability and economic conditions in the United Kingdom, the European Union and elsewhere. The economic conditions and outlook could be further adversely affected by (i) the uncertainty concerning the timing and terms of the exit, (ii) new or modified trading arrangements between the United Kingdom and other countries, (iii) the risk that one or more other European Union countries could come under increasing pressure to leave the European Union, or (iv) the risk that the euro as the single currency of the Eurozone could cease to exist. Any of these developments, or the perception that any of these developments are likely to occur, could affect economic growth or business activity in the United Kingdom or the European Union, and could result in the relocation of businesses, cause business interruptions, lead to economic recession or depression, and impact the stability of the financial markets, availability of credit, currency exchange rates, interest rates, financial institutions, and political, financial and monetary systems. Any of these developments could affect our businesses, liquidity, results of operations and financial position.

Additional factors that could materially affect the Company's operations, access to capital, expenses and results include changes in, uncertainty surrounding and the impact of governmental trade, banking, monetary and fiscal policies, including financial regulatory reform and its effects on the consumer finance industry, derivatives, funding costs and other areas, and governmental programs, policies, tariffs and sanctions in particular jurisdictions or for the benefit of certain industries or sectors; retaliatory actions to such changes in trade, banking, monetary and fiscal policies; actions by central banks; actions by financial and securities regulators; actions by environmental, health and safety regulatory agencies, including those related to engine emissions, carbon and other greenhouse gas emissions, noise and the effects of climate change; changes to GPS radio frequency bands or their permitted uses; changes in labor and immigration regulations; changes to accounting standards; changes in tax rates, estimates, laws and regulations and Company actions related thereto; changes to and compliance with privacy regulations; compliance with U.S. and foreign laws when expanding to new markets and otherwise; and actions by other regulatory bodies.

Other factors that could materially affect results include production, design and technological innovations and difficulties, including capacity and supply constraints and prices; the loss of or challenges to intellectual property rights whether through theft, infringement, counterfeiting or otherwise; the availability and prices of strategically sourced materials, components and whole goods; delays or disruptions in the Company's supply chain or the loss of liquidity by suppliers; disruptions of infrastructures that support communications, operations or distribution; the failure of suppliers or the Company to comply with laws, regulations and Company policy pertaining to employment, human rights, health, safety, the environment, anti-corruption, privacy and data protection and other ethical business practices; events that damage the Company's reputation or brand; significant investigations, claims, lawsuits or other

legal proceedings; start-up of new plants and products; the success of new product initiatives; changes in customer product preferences and sales mix; gaps or limitations in rural broadband coverage, capacity and speed needed to support technology solutions; oil and energy prices, supplies and volatility; the availability and cost of freight; actions of competitors in the various industries in which the Company competes, particularly price discounting; dealer practices especially as to levels of new and used field inventories; changes in demand and pricing for used equipment and resulting impacts on lease residual values; labor relations and contracts; changes in the ability to attract, train and retain qualified personnel; acquisitions and divestitures of businesses; greater than anticipated transaction costs; the integration of new businesses; the failure or delay in closing or realizing anticipated benefits of acquisitions, joint ventures or divestitures; the implementation of organizational changes; the failure to realize anticipated savings or benefits of cost reduction, productivity, or efficiency efforts; difficulties related to the conversion and implementation of enterprise resource planning systems; security breaches, cybersecurity attacks, technology failures and other disruptions to the Company's and suppliers' information technology infrastructure; changes in Company declared dividends and common stock issuances and repurchases; changes in the level and funding of employee retirement benefits; changes in market values of investment assets, compensation, retirement, discount and mortality rates which impact retirement benefit costs; and significant changes in health care costs.

The liquidity and ongoing profitability of John Deere Capital Corporation and other credit subsidiaries depend largely on timely access to capital in order to meet future cash flow requirements, and to fund operations, costs, and purchases of the Company's products. If general economic conditions deteriorate or capital markets become more volatile, funding could be unavailable or insufficient. Additionally, customer confidence levels may result in declines in credit applications and increases in delinquencies and default rates, which could materially impact write-offs and provisions for credit losses.

The Company's outlook is based upon assumptions relating to the factors described above, which are sometimes based upon estimates and data prepared by government agencies. Such estimates and data are often revised. The Company, except as required by law, undertakes no obligation to update or revise its outlook, whether as a result of new developments or otherwise. Further information concerning the Company and its businesses, including factors that could materially affect the Company's financial results, is included in the Company's other filings with the SEC (including, but not limited to, the factors discussed in Item 1A. Risk Factors of the Company's most recent annual report on Form 10-K and quarterly reports on Form 10-Q).

Critical Accounting Policies

See the Company's critical accounting policies discussed in the Management's Discussion and Analysis of the most recent annual report filed on Form 10-K. There have been no material changes to these policies.

CAPITAL RESOURCES AND LIQUIDITY

The discussion of capital resources and liquidity has been organized to review separately, where appropriate, the Company's consolidated totals, equipment operations, and financial services operations.

Consolidated

Negative cash flows from consolidated operating activities in the first three months of 2019 were \$1,651 million. This resulted primarily from a seasonal increase in inventories, a decrease in accounts payable and accrued expenses, and an increase in receivables related to sales, which were partially offset by net income adjusted for non-cash provisions and a change in accrued income taxes payable / receivable. Cash inflows from investing activities were \$969 million in the first three months of this year primarily due to collections of receivables (excluding receivables related to sales) and proceeds from sales of equipment on operating leases exceeding the cost of receivables and equipment on operating leases acquired by \$1,293 million, partially offset by purchases of property and equipment of \$297 million. Positive cash flows from financing activities were \$403 million in the first three months of 2019 primarily due to an increase in borrowings of \$746 million and proceeds from issuance of common stock of \$51 million (resulting from the exercise of stock options), partially offset by dividends paid of \$220 million and repurchases of common stock of \$144 million. Cash, cash equivalents, and restricted cash decreased \$292 million during the first three months of this year.

Negative cash flows from consolidated operating activities in the first three months of 2018 were \$1,296 million. This resulted primarily from a seasonal increase in inventories and a decrease in accounts payable and accrued expenses, which were partially offset by cash inflows from an increase in accrued income taxes payable / receivable, a net loss adjusted for non-cash provisions, and a change in net retirement benefits. Cash outflows from investing activities were \$4,096 million in the first three months of 2018, primarily due to acquisitions of businesses, net of cash acquired, of \$5,130 million and purchases of property and equipment of \$176 million, partially offset by collections of receivables (excluding receivables related to sales) and proceeds from sales of equipment on operating leases exceeding the cost

of receivables and equipment on operating leases acquired by \$1,193 million and proceeds from sales of businesses, net of cash sold, of \$50 million. Negative cash flows from financing activities were \$231 million in the first three months of 2018, primarily due to dividends paid of \$193 million and a decrease in borrowings of \$145 million, partially offset by proceeds from issuance of common stock of \$143 million (resulting from the exercise of stock options). Cash, cash equivalents, and restricted cash decreased \$5,425 million during the first three months of 2018.

The Company has access to most global markets at a reasonable cost and expects to have sufficient sources of global funding and liquidity to meet its funding needs. Sources of liquidity for the Company include cash and cash equivalents, marketable securities, funds from operations, the issuance of commercial paper and term debt, the securitization of retail notes (both public and private markets), and committed and uncommitted bank lines of credit. The Company's commercial paper outstanding at January 27, 2019, October 28, 2018, and January 28, 2018 was \$3,760 million, \$3,857 million, and \$2,830 million, respectively, while the total cash and cash equivalents and marketable securities position was \$4,149 million, \$4,394 million, and \$4,377 million, respectively. The total cash

and cash equivalents and marketable securities held by foreign subsidiaries, was \$2,076 million, \$2,433 million, and \$2,467 million at January 27, 2019, October 28, 2018, and January 28, 2018, respectively.

Lines of Credit. The Company also has access to bank lines of credit with various banks throughout the world. Worldwide lines of credit totaled \$8,352 million at January 27, 2019, \$3,740 million of which were unused. For the purpose of computing unused credit lines, commercial paper and short-term bank borrowings, excluding secured borrowings and the current portion of long-term borrowings, were primarily considered to constitute utilization. Included in the total credit lines at January 27, 2019 were 364-day credit facility agreements of \$1,750 million, expiring in April 2019, and \$750 million, expiring in October 2019. In addition, total credit lines included long-term credit facility agreements of \$2,500 million, expiring in April 2021, and \$2,500 million, expiring in April 2022. These credit agreements require John Deere Capital Corporation (Capital Corporation) to maintain its consolidated ratio of earnings to fixed charges at not less than 1.05 to 1 for each fiscal quarter and the ratio of senior debt, excluding securitization indebtedness, to capital base (total subordinated debt and stockholder's equity excluding accumulated other comprehensive income (loss)) at not more than 11 to 1 at the end of any fiscal quarter. The credit agreements also require the equipment operations to maintain a ratio of total debt to total capital (total debt and stockholders' equity excluding accumulated other comprehensive income (loss)) of 65 percent or less at the end of each fiscal quarter. Under this provision, the Company's excess equity capacity and retained earnings balance free of restriction at January 27, 2019 was \$12,533 million. Alternatively under this provision, the equipment operations had the capacity to incur additional debt of \$23,275 million at January 27, 2019. All of these requirements of the credit agreement have been met during the periods included in the financial statements.

Debt Ratings. To access public debt capital markets, the Company relies on credit rating agencies to assign short-term and long-term credit ratings to the Company's securities as an indicator of credit quality for fixed income investors. A security rating is not a recommendation by the rating agency to buy, sell, or hold Company securities. A credit rating agency may change or withdraw Company ratings based on its assessment of the Company's current and future ability to meet interest and principal repayment obligations. Each agency's rating should be evaluated independently of any other rating. Lower credit ratings generally result in higher borrowing costs, including costs of derivative transactions, and reduced access to debt capital markets. The senior long-term and short-term debt ratings and outlook currently assigned to unsecured Company debt securities by the rating agencies engaged by the Company are as follows:

	Senior Long-Term	Short-Term	Outlook
Fitch Ratings	A	F1	Stable
Moody's Investors Service, Inc.	A2	Prime-1	Stable
Standard & Poor's	A	A-1	Stable

Trade accounts and notes receivable primarily arise from sales of goods to independent dealers. Trade receivables increased \$493 million during the first three months of 2019, primarily due to a seasonal increase. These receivables increased \$813 million, compared to a year ago, primarily due to higher shipment volumes. The ratios of worldwide trade accounts and notes receivable to the last 12 months' net sales were 16 percent at January 27, 2019, compared to 15 percent at October 28, 2018 and 17 percent at January 28, 2018. Agriculture and turf trade receivables increased \$335 million and construction and forestry trade receivables increased \$478 million, compared to a year ago. The percentage of total worldwide trade receivables outstanding for periods exceeding 12 months was 1 percent at January 27, 2019, 2 percent at October 28, 2018, and 2 percent at January 28, 2018.

Deere & Company stockholders' equity was \$11,328 million at January 27, 2019, compared with \$11,288 million at October 28, 2018 and \$9,253 million at January 28, 2018. The increase of \$40 million during the first three months of 2019 resulted primarily from net income attributable to Deere & Company of \$498 million, an increase in common stock of \$37 million, and a change in the retirement benefits adjustment of \$20 million, partially offset by dividends

declared of \$243 million, a change in the cumulative translation adjustment of \$161 million, and an increase in treasury stock of \$110 million.

Equipment Operations

The Company's equipment businesses are capital intensive and are subject to seasonal variations in financing requirements for inventories and certain receivables from dealers. The equipment operations sell a significant portion of their trade receivables to financial services. To the extent necessary, funds provided from operations are supplemented by external financing sources.

Cash used for operating activities of the equipment operations, including intercompany cash flows, in the first three months of 2019 was \$1,434 million. This resulted primarily from a seasonal increase in inventories, a decrease in

accounts payable and accrued expenses, and a change in accrued income taxes payable / receivable. Partially offsetting these operating cash outflows were cash inflows from net income adjusted for non-cash provisions and a decrease in trade and financing receivables held by the equipment operations. Cash, cash equivalents, and restricted cash decreased \$521 million in the first three months of 2019.

Cash used for operating activities of the equipment operations, including intercompany cash flows, in the first three months of 2018 was \$982 million. This resulted primarily from a seasonal increase in inventories and a decrease in accounts payable and accrued expenses. Partially offsetting these operating cash outflows were a change in accrued income taxes payable / receivable, a decrease in trade and financing receivables held by the equipment operations, cash inflows from a net loss adjusted for non-cash provisions, and a change in net retirement benefits. Cash, cash equivalents, and restricted cash decreased \$5,550 million in the first three months of 2018, primarily due to the Wirtgen acquisition of \$5,130 million.

Trade receivables held by the equipment operations decreased \$196 million during the first three months and increased \$126 million from a year ago. The equipment operations sell a significant portion of their trade receivables to financial services. See the previous consolidated discussion of trade receivables.

Inventories increased by \$1,253 million during the first three months, primarily due to a seasonal increase. Inventories increased by \$788 million, compared to a year ago, primarily due to higher production volumes based on increased demand, partially offset by the effect of foreign currency translation. Most of these inventories are valued on the last-in, first-out (LIFO) method. The ratios of inventories on a first-in, first-out (FIFO) basis (see Note 13), which approximates current cost, to the last 12 months' cost of sales were 35 percent at January 27, 2019, compared to 30 percent at October 28, 2018 and 39 percent at January 28, 2018.

Total interest-bearing debt of the equipment operations was \$6,273 million at January 27, 2019, compared with \$6,224 million at October 28, 2018 and \$6,557 million at January 28, 2018. The ratios of debt to total capital (total interest-bearing debt and stockholders' equity) were 36 percent, 36 percent, and 41 percent at January 27, 2019, October 28, 2018, and January 28, 2018, respectively.

Property and equipment cash expenditures for the equipment operations in the first three months of 2019 were \$297 million, compared with \$176 million in the same period last year. Capital expenditures for the equipment operations in 2019 are estimated to be approximately \$1,150 million.

Financial Services

The financial services operations rely on their ability to raise substantial amounts of funds to finance their receivable and lease portfolios. Their primary sources of funds for this purpose are a combination of commercial paper, term debt, securitization of retail notes, equity capital, and borrowings from Deere & Company.

During the first three months of 2019, the cash provided by operating and investing activities was used for financing activities. Cash flows provided by operating activities, including intercompany cash flows, were \$972 million in the first three months of 2019. Cash provided by investing activities totaled \$283 million in the first three months of 2019 primarily due to the collection of receivables (excluding trade and wholesale) and proceeds from sales of equipment on operating leases exceeding the cost of receivables and equipment on operating leases acquired by \$1,304 million, partially offset by an increase in trade and wholesale receivables of \$1,021 million. Cash used for financing activities totaled \$1,025 million, resulting primarily from a decrease in borrowings from Deere & Company of \$1,526 million and dividends paid to Deere & Company of \$200 million, partially offset by an increase in external borrowings of \$708 million. Cash, cash equivalents, and restricted cash increased \$229 million in the first three months of 2019.

During the first three months of 2018, the cash provided by operating and investing activities was used for financing activities. Cash flows provided by operating activities, including intercompany cash flows, were \$430 million in the first three months of 2018. Cash provided by investing activities totaled \$393 million in the first three months of 2018 primarily due to the collection of receivables (excluding trade and wholesale) and proceeds from sales of equipment on operating leases exceeding the cost of receivables and equipment on operating leases acquired by \$1,019 million, partially offset by an increase in trade and wholesale receivables of \$602 million. Cash used for financing activities totaled \$723 million, resulting primarily from a decrease in borrowings from Deere & Company of \$388 million, a decrease in external borrowings of \$287 million, and dividends paid to Deere & Company of \$38 million. Cash, cash equivalents, and restricted cash increased \$126 million in the first three months of 2018.

Receivables and leases held by the financial services operations consist of retail notes originated in connection with retail sales of new and used equipment by dealers of John Deere products, retail notes from non-Deere equipment

customers, trade receivables, wholesale notes, revolving charge accounts, credit enhanced international export financing generally involving John Deere products, and financing and operating leases. Total receivables and leases decreased \$784 million during the first quarter of 2019 and increased \$2,515 million in the past 12 months. Acquisition volumes of receivables (excluding trade and wholesale) and leases were 1 percent higher in the first three months of 2019, compared with the same period last year, as volumes of financing leases, retail notes, and revolving charge accounts were higher, while volumes of operating leases were lower. The amount of total trade receivables and wholesale notes increased compared to October 28, 2018 and January 28, 2018. Total receivables and leases administered by the financial services operations, which include receivables administered but not owned, amounted to \$42,201 million at January 27, 2019, compared with \$42,985 million at October 28, 2018 and \$39,690 million at January 28, 2018.

Total external interest-bearing debt of the financial services operations was \$36,783 million at January 27, 2019, compared with \$36,033 million at October 28, 2018 and \$34,037 million at January 28, 2018. Total external borrowings have changed generally corresponding with the level of receivable and lease portfolio, the level of cash and cash equivalents, the change in payables owed to Deere & Company, and the change in investment from Deere & Company. The financial services operations' ratio of interest-bearing debt to stockholder's equity was 7.4 to 1 at January 27, 2019, compared with 7.5 to 1 at October 28, 2018 and 6.8 to 1 at January 28, 2018.

Capital Corporation has a revolving credit agreement to utilize bank conduit facilities to securitize retail notes (see Note 12). During November 2018, the agreement was renewed with a total capacity, or "financing limit," of \$3,500 million of secured financings at any time. After a two-year revolving period, unless the banks and Capital Corporation agree to renew, Capital Corporation would liquidate the secured borrowings over time as payments on the retail notes are collected. At January 27, 2019, \$2,307 million of secured short-term borrowings were outstanding under the agreement.

In the first three months of 2019, the financial services operations issued \$1,245 million and retired \$731 million of retail note securitization borrowings. In addition, during the first three months of 2019, the financial services operations issued \$2,120 million and retired \$1,799 million of long-term borrowings, which were primarily medium-term notes.

Dividends

The Company's Board of Directors at its meeting on February 27, 2019 declared a quarterly dividend of \$.76 per share payable May 1, 2019, to stockholders of record on March 29, 2019.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See the Company's most recent annual report filed on Form 10-K (Part II, Item 7A). There has been no material change in this information.

Item 4. CONTROLS AND PROCEDURES

The Company's principal executive officer and its principal financial officer have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)) were effective as of January 27, 2019, based on the evaluation of these controls

and procedures required by Rule 13a-15(b) or 15d-15(b) of the Exchange Act. During the first quarter, there were no changes that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is subject to various unresolved legal actions which arise in the normal course of its business, the most prevalent of which relate to product liability (including asbestos-related liability), retail credit, employment, patent, and trademark matters. Item 103 of the SEC's Regulation S-K requires disclosure of certain environmental matters when a governmental authority is a party to the proceedings and the proceedings involve potential monetary sanctions that John Deere reasonably believes could exceed \$100,000. The following matters are disclosed solely pursuant to that requirement: (a) on July 6, 2017, after self-reporting to the Iowa Department of Natural Resources, the Company received a Notice of Violation alleging that one Iowa facility location exceeded permitted emission limits; the Company responded and is actively cooperating with the Iowa Department of Natural Resources to revise the permits and resolve the notice; (b) on March 19, 2018, the Secretaria de Estado de Meio Ambiente e Desenvolvimento Sustentável in Minas Gerais, Brazil issued a fine of approximately \$105,000 at current exchange rates against John Deere Equipamentos do Brasil in connection with an oil spill that occurred after an April 2016 roadway accident involving a Company truck; an administrative defense has been filed to cancel the fine; and (c) on October 3, 2018, the Provincia Santa Fe Ministerio de Medio Ambiente issued a Notice of Violation to Industrias John Deere Argentina in connection with alleged groundwater contamination at the site; the Company continues to work with the appropriate authorities to implement corrective actions to remediate the site. The Company believes the reasonably possible range of losses for these unresolved legal actions would not have a material effect on its financial statements.

Item 1A. Risk Factors

See the Company's most recent annual report filed on Form 10-K (Part I, Item 1A). There has been no material change in this information. The risks described in the annual report on Form 10-K, and the "Safe Harbor Statement" in this report, are not the only risks faced by the Company. Additional risks and uncertainties may also materially affect the Company's business, financial condition, or operating results. One should not consider the risk factors to be a complete discussion of risks, uncertainties, and assumptions.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Company's purchases of its common stock during the first quarter of 2019 were as follows:

Period	Total Number of Shares Purchased (2) (thousands)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1) (thousands)	Maximum Number of Shares that May Yet Be Purchased under the Plans or Programs (1) (millions)
Oct 29 to Nov 25				14.3
Nov 26 to Dec 23	499	\$ 148.21	388	14.0
Dec 24 to Jan 27	454	154.14	454	13.5
Total	953		842	

(1)

During the first quarter of 2019, the Company had a share repurchase plan that was announced in December 2013 to purchase up to \$8,000 million of shares of the Company's common stock. The maximum number of shares that may yet be purchased under these plans was based on the end of the first quarter closing share price of \$161.50 per share. At the end of the first quarter of 2019, \$2,184 million of common stock remained to be purchased under the plans.

- (2) In the first quarter of 2019, approximately 111 thousand shares were purchased from plan participants to pay payroll taxes on certain restricted stock awards. The shares were valued at a weighted-average market price of \$147.26.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

Amendments to Bylaws

On February 27, 2019, the Board of Directors of the Company approved certain amendments to the Company's bylaws, effective immediately. The amendments to the bylaws include the following: (i) amendments to provide for mandatory indemnification of directors and officers and procedural changes related to such indemnification; (ii) amendments to clarify that the positions of Chairman and of Chief Executive Officer of the Company need not be held by the same individual; and (iii) amendments adopting gender neutral pronoun designations throughout the bylaws.

The foregoing description of the Company's bylaws is qualified in its entirety by reference to the full text of the amended bylaws, a copy of which is attached hereto as Exhibit 3.2 and incorporated herein by reference.

Item 6. Exhibits

Certain instruments relating to long-term borrowings constituting less than 10% of the registrant's total assets are not filed as exhibits herewith pursuant to Item 601(b)(4)(iii)(A) of Regulation S-K. The registrant will file copies of such instruments upon request of the Commission.
