Therefore, these statements should be read in conjunction with the financial statements and notes thereto included in the Company’s 2015 Annual Report on Form 10-K.

Goodwill is reviewed for impairment annually in the fourth quarter and whenever events or changes in business circumstances indicate the carrying value of the goodwill may not be recoverable. In completing the goodwill impairment analysis for 2015, the estimated fair value of all reporting units substantially exceeded carrying value except for our Oil and Natural Gas reporting unit, which exceeded its carrying value by 14 percent. In the first quarter of 2016, the Company considered the impact of continuing weakness in the oil and natural gas markets and concluded that further impairment analysis was not required, however prolonged or deepened weakness could subject assets to impairment in the future.

9. Other Current Liabilities

Components of other current liabilities were (in thousands):

	March 25, December 25,	
	2016	2015
Accrued self-insurance retentions	\$ 6,953	\$ 6,908

Total	\$ 60,884	\$ 75,090

A liability is established for estimated future warranty and service claims that relate to current and prior period sales. The Company estimates warranty costs based on historical claim experience and other factors including evaluating specific product warranty issues. Following is a summary of activity in accrued warranty and service liabilities (in thousands):

Balance, December 25, 2015	\$7,870
Charged to expense	1,655
Margin on parts sales reversed	120
Reductions for claims settled	(1,732)
Balance, March 25, 2016	\$7,913

The Company manages certain self-insured loss exposures through a wholly-owned captive insurance subsidiary established in 2015. At March 25, 2016, cash balances of \$9 million were restricted to funding of the captive's loss reserves. Restricted cash is included within other current assets on the Company's Consolidated Balance Sheet.

10.Fair Value

Assets and liabilities measured at fair value on a recurring basis and fair value measurement level were as follows (in thousands):

	Level	March 25, 2016	December 25, 2015
Assets			
Cash surrender value of life insurance	2	\$ 12,749	\$ 12,856
Forward exchange contracts	2	—	107
Total assets at fair value		\$ 12,749	\$ 12,963
Liabilities			
Contingent consideration	3	\$ 4,081	\$ 9,600
Deferred compensation	2	2,991	2,958
Forward exchange contracts	2	603	—
Total liabilities at fair value		\$ 7,675	\$ 12,558

Contracts insuring the lives of certain employees who are eligible to participate in certain non-qualified pension and deferred compensation plans are held in trust. Cash surrender value of the contracts is based on performance measurement funds that shadow the deferral investment allocations made by participants in certain deferred compensation plans. The deferred compensation liability balances are valued based on amounts allocated by participants to the underlying performance measurement funds.

Contingent consideration liability represents the estimated value (using a probability-weighted expected return approach) of future payments to be made to previous owners of an acquired business based on future revenues.

Long-term notes payable with fixed interest rates have a carrying amount of \$300 million and an estimated fair value of \$330 million as of March 25, 2016 and \$320 million as of December 25, 2015. The fair value of variable rate borrowings approximates carrying value. The Company uses significant other observable inputs to estimate fair value (level 2 of the fair value hierarchy) based on the present value of future cash flows and rates that would be available for issuance of debt with similar terms and remaining maturities.

11.Divestiture in 2015

Net earnings in the first quarter of 2015 included \$30 million of net investment income from the Liquid Finishing businesses sold in the second quarter of 2015. The Liquid Finishing businesses were held as a cost method investment, and prior to the sale, income was recognized on dividends received from post-tax earnings of Liquid Finishing.

12.Recent Accounting Pronouncements

In February 2016, the Financial Accounting Standards Board (FASB) issued a final standard on accounting for leases. The new standard is effective for the Company in fiscal 2019 and requires most leases to be recorded on the balance sheet. The Company is evaluating the effect of the new standard on its consolidated financial statements and related disclosures and accounting systems.

In March 2016, FASB issued a new standard that changes the accounting for share-based payments. The standard is effective for the Company in fiscal 2017 and early adoption is permitted. It simplifies several aspects of accounting for share-based payments, including the accounting for income taxes, forfeitures, and classification in the statement of cash flows. Under the new standard, excess tax benefits on the exercise of stock options currently credited to equity will reduce the current tax provision, potentially creating volatility in the Company's effective tax rate. The Company

is evaluating the effect of the new standard on its consolidated financial statements and related disclosures and is considering whether or not to early adopt.

Key strategies include developing and marketing new products, leveraging products and technologies into additional, growing end-user markets, expanding distribution globally and completing strategic acquisitions that provide additional channel and technologies. The following Management's Discussion and Analysis reviews significant factors affecting the Company's results of operations and financial condition. This discussion should be read in conjunction with the financial statements and the accompanying notes to the financial statements.

Consolidated Results

Net sales, net earnings and earnings per share were as follows (in millions except per share amounts and percentages):

	Thirteen Weeks Ended

Results excluding Liquid Finishing investment income and expense provide a more consistent base of comparison to future results. (2) Europe, Middle East and Africa

Sales by geographic area were as follows (in millions):

	Thirteen Weeks Ended	
	March 25, 2016	March 27, 2015
Americas	\$ 173.4	\$ 184.8
EMEA	75.7	68.8
Asia Pacific	55.8	52.9
Consolidated	\$ 304.9	\$ 306.5

Sales decreased 1 percent, though at consistent translation rates they increased 1 percent. Increases of 10 percent in EMEA (13 percent at consistent translation rates) and 6 percent in Asia Pacific (9 percent at consistent translation rates) were largely offset by a 6 percent decrease in the Americas. Incremental sales from operations acquired within the last 12 months totaled \$7 million, contributing 2 percentage points of growth. Organic sales at consistent translation rates decreased 1 percent, with increases of 10 percent in EMEA, 6 percent in Asia Pacific and a decrease of 7 percent in the Americas.

Gross profit margin rates were consistent with the rates in the first quarter of last year. Favorable effects of realized pricing and reduced acquisition related purchase accounting effects offset the impact of lower factory volume and product mix.

Total operating expenses were \$4 million (4 percent) higher than the first quarter last year. The increase included expenses of acquired operations totaling \$3 million. Unallocated corporate expenses increased \$1 million, mostly from increases in stock compensation and pension, partially offset by a decrease in divestiture costs.

The effective income tax rate was 31 percent, up from 22 percent last year. Post-tax dividend income reduced the effective rate in the first quarter of 2015. The effective rate in the first quarter of 2016 benefited from foreign earnings taxed at lower rates than the U.S. rate and the federal R&D credit that was not reinstated in the first quarter of 2015.

Segment Results

Certain measurements of segment operations compared to last year are summarized below:

Industrial

	Thirteen Weeks Ended	
	March 25, 2016	March 27, 2015
Net sales (in millions)		
Americas	\$ 65.1	\$ 67.8
EMEA	44.2	41.0
Asia Pacific	37.8	34.5
Total	\$ 147.1	\$ 143.3
Operating earnings as a percentage of net sales	31 %	30 %

Industrial segment sales increased 3 percent (5 percent at consistent translation rates). A 4 percent decrease in the Americas was more than offset by increases of 8 percent in EMEA (11 percent at consistent translation rates) and 10 percent in Asia Pacific (12 percent at consistent translation rates). Operating margin rates for the Industrial segment were slightly higher than last year due to improved gross margin rates and expense leverage on higher sales volume.

Process

	Thirteen Weeks Ended	
	March 25, 2016	March 27, 2015
Net sales (in millions)		
Americas	\$ 40.0	\$ 42.9
EMEA	13.9	13.9
Asia Pacific	10.4	10.9
Total	\$ 64.3	\$ 67.7
Operating earnings as a percentage of net sales	11 %	16 %

Process segment sales decreased 5 percent (3 percent at consistent translation rates), including decreases of 7 percent in the Americas and 5 percent in Asia Pacific (2 percent at consistent translation rates). Sales in EMEA were flat, and increased 4 percent at consistent translation rates. Operating margin rate decreased compared to last year with improvements in gross margin offset by unfavorable expense leverage.

Contractor

	Thirteen Weeks Ended	
	March 25, 2016	March 27, 2015
Net sales (in millions)		
Americas	\$ 68.3	\$ 74.2

Total	\$ 93.5	\$ 95.5
Operating earnings as a percentage of net sales	18 %	20 %

Table of Contents

Contractor segment sales decreased 2 percent (1 percent at consistent translation rates), with an 8 percent decrease in the Americas partially offset by increases of 26 percent in EMEA (29 percent at consistent translation rates) and 3 percent in Asia Pacific (8 percent at consistent translation rates). Operating margin rate decreased due to unfavorable expense leverage on lower sales volume.

Liquidity and Capital Resources

Net cash provided by operating activities of \$26 million decreased \$22 million from the comparable period of 2015, mostly due to a decrease in net earnings. Net earnings in the first quarter of 2015 included \$30 million of post-tax dividends from the Liquid Finishing businesses that were sold in the second quarter of 2015. In the first quarter of 2016, the Company used proceeds from borrowings under its revolving line of credit to complete acquisitions of two related businesses that were not material to the consolidated financial statements. Other significant uses of cash in the first quarter of 2016 included share repurchases of \$48 million and cash dividends of \$18 million.

At March 25, 2016, cash balances of \$9 million were restricted to funding of certain self-insured loss reserves. Restricted cash is included within other current assets on the Company's Consolidated Balance Sheets.

At March 25, 2016, the Company had various lines of credit totaling \$546 million, of which \$376 million was unused. Internally generated funds and unused financing sources are expected to provide the Company with the flexibility to meet its liquidity needs in 2016.

Outlook

We maintain our outlook for the full year of low to mid single-digit organic constant currency growth for Graco worldwide and expect growth in every region and reportable segment. We expect the Americas to generate mid single-digit growth, and the EMEA and Asia Pacific regions to generate low single-digit growth. There is some risk in our Process segment outlook, reflecting continued headwinds in the oil and natural gas market, however we continue to believe this segment will achieve organic constant currency growth in 2016. While we are mindful of opportunities to reduce discretionary spending, our intent is to press forward with investments in our growth initiatives and we are confident these initiatives will provide a solid long-term return to our shareholders.
