Item 5. Other Events

See attached Press Release (3 pages) and Financial Information Release (12 pages), both dated August 27, 2002, related to the fiscal 2003 first quarter ended July 28, 2002.

Forward Looking Information. This Report contains statements that may be

Edgar Filing: CULP INC - Form 8-K/A

deemed "forward-looking statements" within the meaning of the federal securities laws, including the Private Securities Litigation Reform Act of 1995. Such statements are inherently subject to risks and uncertainties. Forward-looking statements are statements that include projections, expectations or beliefs about future events or results or otherwise are not statements of historical fact. Such statements are often characterized by qualifying words such as "expect," "believe," "estimate," "plan" and "project" and their derivatives. Factors that could influence the matters discussed in such statements include the level of housing starts and sales of existing homes, consumer confidence, trends in disposable income, and general economic conditions. Decreases in these economic indicators could have a negative effect on the company's business and prospects. Likewise, increases in interest rates, particularly home mortgage rates, and increases in consumer debt or the general rate of inflation, could affect the company adversely. Because of the significant percentage of the company's sales derived from international shipments, strengthening of the U. S. dollar against other currencies could make the company's products less competitive on the basis of price in markets outside the United States. Additionally, economic and political instability in international areas could affect the demand for the company's products. Finally, unanticipated delays or costs in executing restructuring actions could cause the cumulative effect of restructuring actions to fail to meet the objectives set forth by management.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

FOR IMMEDIATE RELEASE

CULP, INC. REPORTS FIRST QUARTER FISCAL 2003 RESULTS

ANNOUNCES NEW RESTRUCTURING INITIATIVES
EXPECTED TO RESULT IN OVER \$12 MILLION IN ANNUAL SAVINGS

Edgar Filing: CULP INC - Form 8-K/A

HIGH POINT, N. C. (August 27, 2002) -- Culp, Inc. (NYSE: CFI) today reported financial and operating results for the first quarter of fiscal 2003. The company also announced that it is undertaking additional restructuring initiatives that are expected to lower manufacturing costs, increase asset utilization and enhance manufacturing competitiveness in its Culp Decorative Fabrics division.

For the three months ended July 28, 2002, Culp reported net sales of \$85.9 million compared with \$86.5 million for the same period a year ago. Excluding the cumulative effect of accounting change, net income for the first quarter of fiscal 2003 was \$915,000, or \$0.08 per share diluted, compared with a year-earlier loss of \$1.1 million, or \$0.10 per share diluted, excluding restructuring and related charges and goodwill amortization. Including the cumulative effect of accounting change, the company reported a net loss for the first quarter of fiscal 2003 of \$23.2 million, or \$2.04 per share diluted.

As a result of the adoption of a new accounting standard, "Goodwill and Other Intangible Assets," the company recorded a non-cash goodwill impairment charge, net of income taxes, of \$24.2 million, or \$2.12 per share diluted, in the first quarter related to the goodwill associated with its Culp Decorative Fabrics division. The charge, recorded as "cumulative effect of accounting change," has no effect on operating income or cash flow from operations and does not affect the company's compliance with the terms of its lending agreements.

Robert G. Culp, III, chief executive officer of Culp, Inc., commented, "The results for the first quarter of 2003 demonstrate the value of the actions Culp has taken to increase sales, lower manufacturing costs, improve productivity, and achieve a more profitable sales mix across all divisions. Excluding the effect of the wet printed flock business that we exited in April 2002, we reported a 3% increase in sales compared with the year-earlier period. Our considerable progress is primarily attributed to solid margin gains in each of the upholstery fabrics divisions, especially from Culp Decorative Fabrics. In addition, our ability to provide attractive fabrics that our customers demand, and meet the delivery terms that today's market requires, has contributed to the positive results.

"During the first quarter we generated \$5.4 million in cash from operations, allowing us to reduce our funded debt by \$12.0 million and further strengthen our balance sheet. At the end of the quarter we had \$25.1 million in cash and cash investments, a significant improvement over \$549,000 at the close of the first quarter a year ago. Having a solid financial foundation continues to be a high priority for Culp.

"We have made significant progress over the past year due to the success of our restructuring strategy and increased focus on achieving higher productivity from our current asset configuration," Culp continued. "As a result of this progress, we have now identified additional opportunities for improvement within the Culp Decorative Fabrics division that we believe will further enhance our competitive position. Our goal is to eliminate the least efficient and higher cost elements of this division's manufacturing base and realize greater utilization of its most productive assets. This restructuring plan principally involves consolidation of the company's weaving, finishing, yarn-making and distribution operations by closing our facility in Chattanooga, Tennessee and integrating these functions into other plants. In addition to reducing our overall production costs, another key part of the restructuring plan will be a substantial reduction in the complexity of our doobby upholstery product line. As a result, we expect to realize annual savings of \$12.0 to \$15.0 million while maintaining the necessary capacity to meet anticipated levels of demand for the foreseeable future. The implementation of these initiatives will begin immediately and is expected to

Edgar Filing: CULP INC - Form 8-K/A

be completed in the third quarter of fiscal 2003."

Culp noted, "The restructuring plan involves very difficult personnel decisions. We recognize the dedication and contributions of the associates employed at the Chattanooga facility, and we regret the impact of these consolidation initiatives on our associates and the community."

The company expects the restructuring actions to result in a charge of approximately \$15.0 million, or \$9.1 million on an after tax basis, or \$0.78 per share. Approximately \$4.3 million of the pre-tax amount is expected to be non-cash items. The majority of the charges will be incurred in the second fiscal quarter ending October 27, 2002, with approximately \$750,000 incurred in the second half of the fiscal year. Management will take steps to minimize disruptions in production as assets are being moved and reconfigured, but it is anticipated that the various restructuring actions will impact operating earnings (before restructuring charges) during the second quarter by \$500,000 to \$900,000, or \$0.03 to \$0.05 per share. The company expects, however, that these short-term transition costs will be recovered during the second half of the current fiscal year. Management believes that the long-term gains resulting from this restructuring will outweigh any short-term costs and the restructuring and related charges.

Looking ahead, Culp concluded, "Although we remain confident in our ability to execute and compete effectively in this environment, we have seen a moderate slowdown in sales throughout the home furnishings industry beginning in mid-July, particularly in furniture. Overall consumer spending patterns have been hesitant in this uncertain economy, and, as a result, we expect our domestic sales for the second fiscal quarter will be flat to slightly below sales for the same period last year. However, we remain optimistic that we will see more favorable trends in our business in the second half of the year, and expect that our domestic sales for 2003 as a whole will increase over the prior year. Additionally, we believe we will meet our objective to achieve year-over-year improvement in quarterly net income, excluding the impact of restructuring charges. We also expect to continue to make meaningful progress in returning Culp's profit margins to their historical highs and to continue generating free cash flow."

Culp, Inc. is one of the world's largest marketers of upholstery fabrics for furniture and mattress fabrics for bedding. The company's fabrics are used principally in the production of residential and commercial furniture and bedding products.

This release contains statements that may be deemed "forward-looking statements" within the meaning of the federal securities laws, including the Private Securities Litigation Reform Act of 1995. Such statements are inherently subject to risks and uncertainties. Forward-looking statements are statements that include projections, expectations or beliefs about future events or results or otherwise are not statements of historical fact. Such statements are often characterized by qualifying words such as "expect," "believe," "estimate," "plan" and "project" and their derivatives. Factors that could influence the matters discussed in such statements include the level of housing starts and sales of existing homes, consumer confidence, trends in disposable income and general economic conditions. Decreases in these economic indicators could have a negative effect on the company's business and prospects. Likewise, increases in interest rates, particularly home mortgage rates, and increases in consumer debt or the general rate of inflation, could affect the company adversely. Because of the significant percentage of the company's sales derived from international shipments, strengthening of the U.S. dollar against other currencies could make the company's products less competitive on the basis of price in markets outside

- (4) Excludes \$1.0 million (660,000 or \$0.06 per share diluted, after taxes) of Culp Decorative Fabrics (CDF) and Culp Yarn (CYN) restructuring related charges from the cost of sales total
- (5) Excludes \$350,000 (\$230,000 or \$0.02 per share diluted, after taxes) of goodwill amortization
- (6) Excludes CDF and CYN restructuring charges of \$1.3 million (\$860,000 or \$0.08 per share diluted, after taxes)

CULP, INC. FINANCIAL INFORMATION RELEASE
FINANCIAL NARRATIVE
for the three months ended July 28, 2002 and July 29, 2001

OVERVIEW

GENERAL - For the first quarter, net sales decreased .7% to \$85.9 million; and the company reported net income, excluding the cumulative effect of accounting change, of \$915,000, or \$0.08 per share diluted versus a net loss of \$1.1 million, or \$0.10 per share diluted in the first quarter of fiscal 2002, excluding restructuring and related charges, and goodwill amortization. The earnings improvement is attributable to gross profit dollar and margin gains in each of the divisions within the upholstery fabric segment, particularly in the Culp Decorative Fabrics division, along with reductions in SG&A, interest and other expenses. The company reported further improvement in its balance sheet by reducing funded debt by \$12.0 million during the quarter and ending the quarter with \$25.1 million in cash and cash investments.

ADOPTION OF SFAS No. 142 - As of April 29, 2002, Culp adopted SFAS No. 142, "Goodwill and Other Intangible Assets." SFAS No. 142 represents a substantial change in how goodwill is accounted for. SFAS No. 142 requires that goodwill no longer be amortized and that goodwill be tested for impairment by comparing the reporting unit's carrying value to its fair value as of April 29, 2002. SFAS No. 142 requires that any goodwill impairment loss recognized as a result of initial application be reported as of the first quarter of fiscal 2003 as a change in accounting principle, and that the income per share effects of the accounting change be separately disclosed.

Edgar Filing: CULP INC - Form 8-K/A

For initial application of SFAS No. 142, an independent business valuation specialist was engaged to assist the company in the determination of the fair market value of Culp Decorative Fabrics because of the significance of the goodwill associated with the division and due to its operating performance for fiscal 2001 and 2002. Although operating results improved during the second half of fiscal 2002, they have been significantly below the division's historical level of profitability. As a result of the adoption of SFAS No. 142, the company recorded a non-operating, non-cash goodwill impairment charge of \$37.6 million (\$24.1 million net of taxes of \$13.5 million), or \$2.12 per share diluted, related to the goodwill associated with the Culp Decorative Fabrics division.

PROFORMA CONSOLIDATED STATEMENTS OF INCOME (LOSS) -- The company has included, within this financial information release, proforma income statements which reconcile the reported income statements with proforma results. See PROFORMA CONSOLIDATED STATEMENTS OF INCOME (LOSS) on page 7 of this financial information release.

FISCAL 2003 RESTRUCTURING INITIATIVE IN CULP DECORATIVE FABRICS DIVISION -- As a result of successful restructuring and productivity enhancement initiatives during the past year, the company has identified a significant opportunity for further restructuring within its Culp Decorative Fabrics ("CDF") division that is expected to:

- substantially lower manufacturing costs;
- dramatically simplify its doobby upholstery fabric product line;
- significantly increase asset utilization; and
- enhance the division's manufacturing competitiveness

While the company's recent profit improvement actions have resulted in substantial gains in productivity and margins at certain CDF locations, the division's gross profit margins still have significant room for improvement, and are below management's targeted levels. The progress made at certain CDF plants over the past year, however, has allowed for higher production outputs at these locations while using the same asset base. In addition, management has focused attention within this division to materially reduce manufacturing complexity by: (1) simplifying raw material components; (2) eliminating low volume finished goods SKUs; and (3) configuring manufacturing for greater flexibility. The progress to date has resulted in the identification of additional opportunities to eliminate the least efficient and higher cost elements of the division's manufacturing base and to make higher use of the division's most productive assets. Based upon these considerations, management has approved a plan to significantly simplify doobby upholstery fabric offerings and consolidate the operations of the division's Chattanooga, Tennessee facility into other CDF plants, mainly the weaving plant in Pageland, South Carolina and the finishing plant in Burlington, North Carolina. The restructuring is expected to reduce annual expenses by \$12 million to \$15 million when fully implemented, while still maintaining capacity within the division's manufacturing assets to meet anticipated levels of demand for the foreseeable future. The benefit of the cost savings is expected to be partially realized beginning in the third quarter of fiscal 2003, with most or all of the benefit being experienced by the fourth quarter.

The restructuring action will involve the closing of the Chattanooga facility, which contains weaving, finishing, yarn-making and distribution operations. This facility incurred about \$20 million in manufacturing labor and overhead costs during fiscal 2002. Some of the newest equipment located there will be moved to Pageland and other CDF facilities, while other equipment will be sold or retired. As an initial step, the forty most modern weaving looms located in Chattanooga will be moved to Pageland during the company's second quarter, beginning in September. Also during the second quarter, the finishing, yarn-making and distribution operations will be consolidated into other CDF

Edgar Filing: CULP INC - Form 8-K/A

facilities.

As a further part of the restructuring plan, the company will construct a small addition to the Pageland plant to allow for the increased output at the facility. The company also plans to purchase twenty (20) high speed weaving machines to be located at the Pageland facility. Finally, certain jacquard looms located at CDF's other weaving locations will be modified in ways that will allow them to produce some of the doobby products now produced at Chattanooga. This will also aid production during the transition period while equipment is being moved and installed. Weaving operations at the Chattanooga plant will be scaled back over time, beginning in the second quarter, and are expected to be completely terminated by the end of the third quarter.

A key part of the restructuring is a substantial reduction in the complexity of the company's doobby upholstery fabric product line, which is expected to increase the efficiency of operations and greatly simplify the raw material components for this category of fabrics. As part of the changes being announced, the company plans to discontinue approximately 70% of its stock keeping units (SKUs) of doobby fabrics by the end of the second quarter. These discontinued SKUs represented only 10%, or \$4 million, of the doobby product line sales for the twelve months ended July 28, 2002. To minimize the impact on its customers, the company plans to offer one final production run of the discontinued products.

The construction at the Pageland facility and new loom purchases are expected to cost approximately \$4 million, and it is anticipated that these assets will be placed into production by the end of fiscal 2003. The Chattanooga plant currently has approximately 350 employees, and all of those positions will be eliminated in the restructuring initiative. It is anticipated that the current actions will lead to the addition of approximately 50 positions in other CDF plants. Therefore, CDF expects to reduce its overall headcount by 25% with this plan.

Once fully implemented, the restructuring plan is expected to significantly improve gross margins within CDF, while allowing the division the ability to meet foreseeable levels of demand, all on a substantially lower cost base. Management expects that the restructuring actions will reduce CDF's annual fixed manufacturing costs by approximately \$8 million, or 29%, from the \$29 million spent in fiscal 2002. The remaining cost savings of \$4 - 7 million are expected to come from reduced variable production costs, as a result of greater utilization of an asset base that has significantly better efficiency and employs substantially fewer people. By consolidating the best assets from the Chattanooga plant into other CDF locations, in combination with transferring some production to the additional high speed looms that will be added to CDF's asset base, management anticipates that the average speed and the average utilization of the weaving and finishing equipment within the division will be substantially increased.

The actions described above are expected to result in restructuring and related charges of approximately \$15.0 million, which amounts to \$9.1 million on an after-tax basis, or \$0.78 per share. The charges will be incurred mostly in the second quarter ending October 27, 2002, with approximately \$750,000 expected to be incurred in the second half of fiscal 2003. These restructuring charges, of which \$4.3 million are expected to be non-cash items, will principally involve building lease termination costs, severance costs, equipment write-downs, inventory markdowns and equipment relocation costs.

Management will take steps to minimize disruptions in production as the CDF assets are being moved and re-configured, but it is anticipated that the restructuring actions will impact operating earnings (before restructuring charges) during the second quarter by \$500,000 to \$900,000, or \$0.03 to \$0.05 per share. The company expects, however, that these short-term transition costs

Edgar Filing: CULP INC - Form 8-K/A

will be recovered during the third and fourth quarters of this fiscal year. Management believes that the long-term gains resulting from this restructuring will outweigh any short-term costs and the restructuring and related charges.

INCOME STATEMENT COMMENTS

NET SALES - Upholstery fabric sales for the first quarter of fiscal 2003 decreased 2.8% to \$59.9 million (see sales by Segment/Division on page 5). Domestic upholstery fabric sales increased \$2.8 million, or 5.5%, to \$53.0 million, while international sales of this category declined \$4.5 million, or 39.2%, due primarily to the exiting of the wet printed flock fabric product line as of April 28, 2002.

Mattress fabric sales for the first quarter of fiscal 2003 increased 4.5% to \$25.9 million. Sales to U.S. bedding manufacturers increased 4.1% while international sales gained 7.3%.

In line with apparent overall furniture and bedding industry trends, domestic sales declined by 3.2% for the month of July after being ahead of the prior year through the first two months of the quarter by 8.8%. It appears that the sales softness, which began in mid July, has continued into August, and the company now believes domestic sales for the second quarter ending October 27, 2002 will be flat to slightly down in comparison with the second quarter of last year. The company believes that domestic sales for fiscal 2003, as a whole, will increase over the fiscal 2002 total of \$328.4 million.

GROSS PROFIT - Gross profit increased \$2.1 million, or 17.7%, compared with the year-earlier period, excluding restructuring and related charges, and increased as a percentage of net sales to 16.1% from 13.6%. This significant improvement reflects gross profit dollar and margin gains in each of the upholstery fabrics divisions, particularly Culp Decorative Fabrics (CDF). The key factors behind these gains were: (1) a more profitable sales mix across the divisions; (2) the elimination of the losses related to the wet printed flock business; and (3) the increasing productivity benefits from the 2001 restructuring actions taken in CDF. The first quarter represented the second consecutive quarter of higher year-over-year gross profit dollars and margins for CDF. The company is optimistic that gross margin in CDF can be improved significantly over the next one to two years. In order to continue the positive margin trend and reach targeted margin levels, the company is focusing its efforts to: (1) improve the profitability of the current sales mix by several gross margin points; (2) substantially improve asset utilization (i.e. the same or more yards produced on a lower asset base); (3) improve manufacturing performance, in terms of productivity and inventory obsolescence, and (4) successfully implement the restructuring plan discussed above.

Partially offsetting these gains, Culp Home Fashions reported slightly lower gross profit dollars and margins, due solely to a supply agreement under which products are sourced in Europe, both because of the higher intrinsic cost of these European goods, and because of the weakening of the U.S. dollar against the euro (since the products purchased under the agreement are priced in euros). The division entered into an agreement with a European supplier last fall as part of the termination of a long-term supply relationship. The agreement provided, among other things, that the company maintain a certain level of weekly purchases through October 31, 2002. Therefore, for the first and second quarters of this year, the company has been required to source products from this supplier that are significantly more expensive than products manufactured at the company's U.S. or Canadian plants in order to meet the agreement's minimum purchase levels. The margin impact of this European sourcing will be substantially completed in the second quarter, which ends October 27, 2002. The company estimates the impact for the second quarter will approximate \$800,000 or \$0.04 per share, after taxes. The company had planned during the last fiscal year for the termination of this supply agreement by initiating a plan to

Edgar Filing: CULP INC - Form 8-K/A

increase capacity in the U.S. and Canadian plants beginning in the first quarter and ending by December 2002. This capacity expansion project accounts for approximately \$4.5 million of the company's fiscal 2003 capital spending plan.

SG&A EXPENSES - SG&A expenses for the first quarter declined \$798,000, or 7.1%, from the prior year, and as a percent of net sales, SG&A expenses declined to 12.2% from 13.0%. SG&A expenses in the first quarter include bad debt expense of \$347,000 compared with \$800,000 in the year-earlier period.

INTEREST EXPENSE (INCOME)- Interest expense for the first quarter declined to \$1.9 million from \$2.1 million due to significantly lower borrowings outstanding, offset somewhat by an increase in the interest rate on the private placement debt. Interest income increased to \$150,000 from \$23,000 due to significantly higher invested cash as compared with the prior year.

OTHER EXPENSE (INCOME), NET - Other expense (income) for the first quarter of fiscal 2003 totaled \$211,000 compared with \$572,000 in the prior year. The decrease was principally due to the adoption of SFAS No. 142, which discontinued the amortization of goodwill. Goodwill amortization during first quarter fiscal 2002 was \$350,000. Also, during first quarter of fiscal 2003 debt issue cost totaling \$113,700 was expensed due to the repayment of \$10.9 million in industrial revenue bonds (IRBs).

INCOME TAXES - Excluding the cumulative effect of accounting change and restructuring and related charges, the effective tax rate for the first quarter of fiscal 2003 was 37.0% compared to 34.0% the prior year.

EBITDA - EBITDA for the first quarter of fiscal 2003 was \$7.4 million compared with \$4.7 million in the prior year. EBITDA includes earnings before interest, income taxes, depreciation, amortization, all restructuring and related charges, certain non-cash charges and cumulative effect of accounting change, as defined by the company's credit agreement.

BALANCE SHEET COMMENTS

CASH AND CASH INVESTMENTS - Cash and cash investments as of July 28, 2002 decreased to \$25.1 million from \$32.0 million at fiscal year end, reflecting cash flow from operations of \$5.4 million, capital expenditures of \$3.1 million, debt repayment of \$12.0 million, stock issuance of \$1.0 million and an increase in accounts payable for capital expenditures of \$1.7 million.

WORKING CAPITAL - Accounts receivable as of July 28, 2002 decreased 33.7% from the year-earlier level, due principally to the decline in international sales with their related longer credit terms, and an increase in the number of customers taking the cash discount for shorter payment terms. Days sales outstanding totaled 34 days at July 28, 2002 compared with 51 a year ago and 36 at last fiscal year end. The aging of accounts receivable was 98.7% current and less than 30 days past due versus 91.9% a year ago. Inventories at the close of the first quarter increased 1.2% from a year ago. Inventory turns for the first quarter were 4.9 versus 5.1 for the year-earlier period. Operating working capital (comprised of accounts receivable, inventory and accounts payable) was \$70.8 million at July 28, 2002, down from \$86.6 million a year ago.

PROPERTY, PLANT AND EQUIPMENT - Capital spending for the first quarter of fiscal 2003 was \$3.1 million. The company's original budget for capital spending for all of fiscal 2003 was \$8.5 million, compared with \$4.7 million in fiscal 2002. As part of the fiscal 2003 restructuring plan in the Culp Decorative Fabric's division (see discussion above), the company increased the budget by \$4.5 million to \$13.0 million. Depreciation for the first quarter of fiscal 2003 totaled \$3.6 million, and is estimated at \$15.0 million for the full fiscal year.

Edgar Filing: CULP INC - Form 8-K/A

INTANGIBLE ASSETS - Goodwill is the company's only intangible asset. As of July 28, 2002, goodwill was \$9.5 million, a decrease of \$37.6 million from last fiscal year end due to the adoption of SFAS No. 142 (see discussion above).

LONG-TERM DEBT - The company reduced funded debt by \$12.0 million from last fiscal year end. Funded debt equals long-term debt plus current maturities. Funded debt was \$96.5 million at July 28, 2002, compared with \$108.5 million at fiscal 2002 year end. The company's funded debt-to-capital ratio was 49.9% at July 28, 2002.

The company entered into a new loan agreement during August 2002 with its principal bank lender that provides, among other things, for: (1) a two year \$34.7 million credit facility, which includes a \$15.0 million revolving credit line and \$19.7 million for letters of credit for the company's industrial revenue bonds (IRB's), (2) lower interest rates based upon a pricing matrix, and (3) improved financial covenants. The agreement specifically allows for the Culp Decorative Fabrics restructuring and related charges (see discussion above). The company was in compliance with all covenants contained in its loan agreements as of July 28, 2002.
