Edgar Filing: EVERSOURCE ENERGY - Form 10-Q

WESTERN MASSACHUSETTS ELECTRIC COMPANY

(a Massachusetts corporation)

0-7624

300 Cadwell Drive
Springfield, Massachusetts 01104
Telephone: (800) 286-5000

04-1961130

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrants were required to file such reports), and (2) have been subject to such filing requirements for the past 90 days.

Yes No

x ..

Indicate by check mark whether the registrants have submitted electronically and posted on its corporate Web sites, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrants were required to submit and post such files).

Yes No

x ..

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

	Large accelerated filer	Accelerated filer	Non-accelerated filer	Smaller reporting company	Emerging growth company
Eversource Energy	x
The Connecticut Light and Power Company	x
NSTAR Electric Company	x
Public Service Company of New Hampshire	x
Western Massachusetts Electric Company	x

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. "

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Exchange Act):

Yes No

Eversource Energy	..	x
The Connecticut Light and Power Company	..	x
NSTAR Electric Company	..	x
Public Service Company of New Hampshire	..	x
Western Massachusetts Electric Company	..	x

Edgar Filing: EVERSOURCE ENERGY - Form 10-Q

Indicate the number of shares outstanding of each of the issuers' classes of common stock, as of the latest practicable date:

Company - Class of Stock	Outstanding as of October 31, 2017
Eversource Energy Common Shares, \$5.00 par value	316,885,808 shares
The Connecticut Light and Power Company Common Stock, \$10.00 par value	6,035,205 shares
NSTAR Electric Company Common Stock, \$1.00 par value	100 shares
Public Service Company of New Hampshire Common Stock, \$1.00 par value	301 shares
Western Massachusetts Electric Company Common Stock, \$25.00 par value	434,653 shares

Eversource Energy holds all of the 6,035,205 shares, 100 shares, 301 shares, and 434,653 shares of the outstanding common stock of The Connecticut Light and Power Company, NSTAR Electric Company, Public Service Company of New Hampshire and Western Massachusetts Electric Company, respectively.

NSTAR Electric Company, Public Service Company of New Hampshire and Western Massachusetts Electric Company each meet the conditions set forth in General Instructions H(1)(a) and (b) of Form 10-Q, and each is therefore filing this Form 10-Q with the reduced disclosure format specified in General Instruction H(2) of Form 10-Q.

Eversource Energy, The Connecticut Light and Power Company, NSTAR Electric Company, Public Service Company of New Hampshire, and Western Massachusetts Electric Company each separately file this combined Form 10-Q. Information contained herein relating to any individual registrant is filed by such registrant on its own behalf. Each registrant makes no representation as to information relating to the other registrants.

GLOSSARY OF TERMS

The following is a glossary of abbreviations and acronyms that are found in this report:

Current or former Eversource Energy companies, segments or investments:

Eversource, ES or the Company	Eversource Energy and subsidiaries
Eversource parent or ES parent	Eversource Energy, a public utility holding company
ES parent and other companies	ES parent and other companies are comprised of Eversource parent, Eversource Service and other subsidiaries, which primarily includes our unregulated businesses, HWP Company, The Rocky River Realty Company (a real estate subsidiary), and the consolidated operations of CYAPC and YAEC
CL&P	The Connecticut Light and Power Company
NSTAR Electric	NSTAR Electric Company
PSNH	Public Service Company of New Hampshire
WMECO	Western Massachusetts Electric Company
NSTAR Gas	NSTAR Gas Company
Yankee Gas	Yankee Gas Services Company
NPT	Northern Pass Transmission LLC
Northern Pass	The HVDC and associated alternating-current transmission line project from Canada into New Hampshire
Eversource Service	Eversource Energy Service Company
Bay State Wind	A project being developed jointly by Eversource and Denmark-based Ørsted (formerly known as DONG Energy) to construct an offshore wind farm off the coast of Massachusetts
CYAPC	Connecticut Yankee Atomic Power Company
MYAPC	Maine Yankee Atomic Power Company
YAEC	Yankee Atomic Electric Company
Yankee Companies	CYAPC, YAEC and MYAPC
Regulated companies	The Eversource Regulated companies are comprised of the electric distribution and transmission businesses of CL&P, NSTAR Electric, PSNH, and WMECO, the natural gas distribution businesses of Yankee Gas and NSTAR Gas, NPT, and the generation activities of PSNH and WMECO
Regulators:	
DEEP	Connecticut Department of Energy and Environmental Protection
DOE	U.S. Department of Energy
DOER	Massachusetts Department of Energy Resources
DPU	Massachusetts Department of Public Utilities
EPA	U.S. Environmental Protection Agency
FERC	Federal Energy Regulatory Commission
ISO-NE	ISO New England, Inc., the New England Independent System Operator
MA DEP	Massachusetts Department of Environmental Protection
NHPUC	New Hampshire Public Utilities Commission
PURA	Connecticut Public Utilities Regulatory Authority
SEC	U.S. Securities and Exchange Commission
SJC	Supreme Judicial Court of Massachusetts

Other Terms and Abbreviations:

Access Northeast	A project being developed jointly by Eversource, Enbridge, Inc. ("Enbridge"), and National Grid plc ("National Grid") through Algonquin Gas Transmission, LLC to bring needed additional natural gas pipeline and storage capacity to New England.
ADIT	Accumulated Deferred Income Taxes
AFUDC	Allowance For Funds Used During Construction
AOCL	Accumulated Other Comprehensive Loss
Aquarion	Aquarion Water Company
ARO	Asset Retirement Obligation
Bcf	Billion cubic feet
C&LM	Conservation and Load Management
CfD	Contract for Differences
Clean Air Project	The construction of a wet flue gas desulphurization system, known as "scrubber technology," to reduce mercury emissions of the Merrimack coal-fired generation station in Bow, New Hampshire
CO ₂	Carbon dioxide
CPSL	Capital Projects Scheduling List
CTA	Competitive Transition Assessment
CWIP	Construction Work in Progress
EDC	Electric distribution company
EPS	Earnings Per Share

Edgar Filing: EVERSOURCE ENERGY - Form 10-Q

ERISA	Employee Retirement Income Security Act of 1974
ESOP	Employee Stock Ownership Plan
ESPP	Employee Share Purchase Plan
Eversource 2016 Form 10-K	The Eversource Energy and Subsidiaries 2016 combined Annual Report on Form 10-K as filed with the SEC
FERC ALJ	FERC Administrative Law Judge
Fitch	Fitch Ratings
FMCC	Federally Mandated Congestion Charge
FTR	Financial Transmission Rights
GAAP	Accounting principles generally accepted in the United States of America
GSC	Generation Service Charge
GSRP	Greater Springfield Reliability Project
GWh	Gigawatt-Hours
HQ	Hydro-Québec, a corporation wholly-owned by the Québec government, including its divisions that produce, transmit and distribute electricity in Québec, Canada
HVDC	High-voltage direct current
Hydro Renewable Energy	Hydro Renewable Energy, Inc., a wholly-owned subsidiary of Hydro-Québec
IPP	Independent Power Producers
ISO-NE Tariff	ISO-NE FERC Transmission, Markets and Services Tariff
kV	Kilovolt
kVa	Kilovolt-ampere
kW	Kilowatt (equal to one thousand watts)
kWh	Kilowatt-Hours (the basic unit of electricity energy equal to one kilowatt of power supplied for one hour)
LBR	Lost Base Revenue
LNG	Liquefied natural gas
LRS	Supplier of last resort service
MMcf	Million cubic feet
MGP	Manufactured Gas Plant
MMBtu	One million British thermal units
Moody's	Moody's Investors Services, Inc.
MW	Megawatt
MWh	Megawatt-Hours
NEEW	New England East-West Solution
NETOs	New England Transmission Owners (including Eversource, National Grid and Avangrid)
NOx	Nitrogen oxides
OCI	Other Comprehensive Income/(Loss)
PAM	Pension and PBOP Rate Adjustment Mechanism
PBOP	Postretirement Benefits Other Than Pension
PBOP Plan	Postretirement Benefits Other Than Pension Plan that provides certain retiree benefits, primarily medical, dental and life insurance
PCRBs	Pollution Control Revenue Bonds
Pension Plan	Single uniform noncontributory defined benefit retirement plan
PPA	Pension Protection Act
RECs	Renewable Energy Certificates
Regulatory ROE	The average cost of capital method for calculating the return on equity related to the distribution and generation business segment excluding the wholesale transmission segment
RNS	Regional Network Service

ROE	Return on Equity
RRB	Rate Reduction Bond or Rate Reduction Certificate
RSUs	Restricted share units
S&P	Standard & Poor's Financial Services LLC
SBC	Systems Benefits Charge
SCRC	Stranded Cost Recovery Charge
SERP	Supplemental Executive Retirement Plans and non-qualified defined benefit retirement plans
SIP	Simplified Incentive Plan
SO ₂	Sulfur dioxide
SS	Standard service
TCAM	Transmission Cost Adjustment Mechanism
TSA	Transmission Service Agreement
UI	The United Illuminating Company

WESTERN MASSACHUSETTS ELECTRIC COMPANY

COMBINED NOTES TO CONDENSED FINANCIAL STATEMENTS (Unaudited)

Refer to the Glossary of Terms included in this combined Quarterly Report on Form 10-Q for abbreviations and acronyms used throughout the combined notes to the unaudited condensed financial statements.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Presentation

Eversource Energy is a public utility holding company primarily engaged, through its wholly-owned regulated utility subsidiaries, in the energy delivery business. Eversource Energy's wholly-owned regulated utility subsidiaries consist of CL&P, NSTAR Electric, PSNH, WMECO, Yankee Gas and NSTAR Gas. Eversource provides energy delivery service to approximately 3.7 million electric and natural gas customers through these six regulated utilities in Connecticut, Massachusetts and New Hampshire.

On June 2, 2017, Eversource announced that it had entered into an agreement to acquire Aquarion from Macquarie Infrastructure Partners for \$1.675 billion, consisting of approximately \$880 million in cash and \$795 million of assumed Aquarion debt. The transaction requires approval from PURA, the DPU, the NHPUC, the Maine PUC, and the Federal Communications Commission, and is also subject to a review under the Hart-Scott-Rodino Act. On June 29, 2017, Eversource and Aquarion filed joint applications with regulatory agencies in Connecticut, Massachusetts, New Hampshire and Maine requesting approval of the transaction. With the exception of Massachusetts, all state and federal regulatory agency approvals have been received and the related review period has expired. The transaction is expected to close by December 31, 2017.

The unaudited condensed consolidated financial statements of Eversource, NSTAR Electric and PSNH include the accounts of each of their respective subsidiaries. Intercompany transactions have been eliminated in consolidation. The accompanying unaudited condensed consolidated financial statements of Eversource, NSTAR Electric and PSNH and the unaudited condensed financial statements of CL&P and WMECO are herein collectively referred to as the "financial statements."

The combined notes to the financial statements have been prepared pursuant to the rules and regulations of the SEC. Certain information and footnote disclosures included in annual financial statements prepared in accordance with GAAP have been omitted pursuant to such rules and regulations. The accompanying financial statements should be read in conjunction with the Combined Notes to Financial Statements included in Item 8, "Financial Statements and Supplementary Data," of the Eversource 2016 Form 10-K, which was filed with the SEC. The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The financial statements contain, in the opinion of management, all adjustments (including normal, recurring adjustments) necessary to present fairly Eversource's, CL&P's, NSTAR Electric's, PSNH's and WMECO's financial position as of September 30, 2017 and December 31, 2016, the results of operations and comprehensive income for the three and nine months ended September 30, 2017 and 2016, and the cash flows for the nine months ended

September 30, 2017 and 2016. The results of operations and comprehensive income for the three and nine months ended September 30, 2017 and 2016 and the cash flows for the nine months ended September 30, 2017 and 2016 are not necessarily indicative of the results expected for a full year.

Eversource consolidates CYAPC and YAEC because CL&P's, NSTAR Electric's, PSNH's and WMECO's combined ownership interest in each of these entities is greater than 50 percent. Intercompany transactions between CL&P, NSTAR Electric, PSNH and WMECO and the CYAPC and YAEC companies have been eliminated in consolidation of the Eversource financial statements.

Eversource's utility subsidiaries' distribution (including generation assets) and transmission businesses are subject to rate-regulation that is based on cost recovery and meets the criteria for application of accounting guidance for entities with rate-regulated operations, which considers the effect of regulation on the differences in the timing of the recognition of certain revenues and expenses from those of other businesses and industries. See Note 2, "Regulatory Accounting," for further information.

Certain reclassifications of prior period data were made in the accompanying financial statements to conform to the current period presentation.

B. Accounting Standards

Accounting Standards Issued but Not Yet Effective: In May 2014, the Financial Accounting Standards Board ("FASB") issued an Accounting Standards Update ("ASU") 2014-09, Revenue from Contracts with Customers, which amends existing revenue recognition guidance and is required to be applied retrospectively (either to each reporting period presented or cumulatively at the date of initial application). The Company will implement the standard in the first quarter of 2018 cumulatively at the date of initial application. Implementation of the ASU is not expected to have a material effect on the financial statements of Eversource, CL&P, NSTAR Electric, PSNH or WMECO.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments - Overall: Recognition and Measurement of Financial Assets and Liabilities, which is required to be implemented in the first quarter of 2018. The ASU will remove the available-for-sale designation for equity securities, whereby changes in fair value are recorded in accumulated other comprehensive income within shareholders' equity, and will require changes in fair value of all equity securities to be recorded in earnings beginning on January 1, 2018, with the unrealized gain or loss on available-for-sale equity securities as of that date reclassified to retained earnings as a cumulative effect of adoption.

The fair value of available-for-sale equity securities subject to this guidance as of September 30, 2017 was approximately \$51 million with an unrealized gain of \$1.7 million. The remaining available-for-sale equity securities included in marketable securities on the balance sheet are held in nuclear decommissioning trusts and are subject to regulatory accounting treatment and will not be impacted by this guidance. Implementation of the ASU for other financial instruments is not expected to have a material impact on the financial statements of Eversource, CL&P, NSTAR Electric, PSNH or WMECO.

In February 2016, the FASB issued ASU 2016-02, Leases, which changes existing lease accounting guidance and is required to be applied in the first quarter of 2019, with earlier application permitted. The ASU lease criteria are required to be applied to leases and lease renewals entered into effective January 1, 2019, and leases entered into before that date are required to be recognized and measured using a modified retrospective approach. The Company is reviewing the requirements of ASU 2016-02, including balance sheet recognition of leases previously deemed to be operating leases, and expects to implement the ASU in the first quarter of 2019.

In March 2017, the FASB issued ASU 2017-07, Compensation – Retirement Benefits: Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost, required to be implemented in the first quarter of 2018. The ASU requires separate presentation of service cost from other components of net pension and PBOP costs, with the other components presented as non-operating income and not subject to capitalization. The ASU is required to be applied retrospectively for the separate presentation in the income statement of service costs and other components and prospectively in the balance sheet for the capitalization of only the service cost component. The implementation of the ASU will not have an impact on the net income of Eversource, CL&P, NSTAR Electric, PSNH or WMECO.

C. Provision for Uncollectible Accounts

Eversource, including CL&P, NSTAR Electric, PSNH and WMECO, presents its receivables at estimated net realizable value by maintaining a provision for uncollectible accounts. This provision is determined based upon a variety of judgments and factors, including the application of an estimated uncollectible percentage to each receivable aging category. The estimate is based upon historical collection and write-off experience and management's assessment of collectability from customers. Management continuously assesses the collectability of receivables and adjusts collectability estimates based on actual experience. Receivable balances are written off against the provision for uncollectible accounts when the customer accounts are terminated and these balances are deemed to be uncollectible.

The PURA allows CL&P and Yankee Gas to accelerate the recovery of accounts receivable balances attributable to qualified customers under financial or medical duress (uncollectible hardship accounts receivable) outstanding for greater than 180 days and 90 days, respectively. The DPU allows WMECO and NSTAR Gas also to recover in rates amounts associated with certain uncollectible hardship accounts receivable. Certain of NSTAR Electric's uncollectible hardship accounts receivable are expected to be recovered in future rates, similar to WMECO and NSTAR Gas. These uncollectible customer account balances are included in Regulatory Assets or Other Long-Term Assets on the balance sheets.

The total provision for uncollectible accounts and for uncollectible hardship accounts, which is included in the total provision, is included in Receivables, Net on the balance sheets, and was as follows:

(Millions of Dollars)	Total Provision for Uncollectible Accounts		Uncollectible Hardship	
	As of	As of	As of	As of
	September 30, 2017	December 31, 2016	September 30, 2017	December 31, 2016
Eversource	\$196.8	\$ 200.6	\$126.3	\$ 119.9
CL&P	77.6	86.4	64.6	67.7
NSTAR Electric	55.7	54.8	32.3	26.2
PSNH	10.6	9.9	—	—
WMECO	17.0	15.5	11.3	9.9

D. Fair Value Measurements

Fair value measurement guidance is applied to derivative contracts that are not elected or designated as "normal purchases" or "normal sales" ("normal") and to the marketable securities held in trusts. Fair value measurement guidance is also applied to valuations of the investments used to calculate the funded status of pension and PBOP plans, the nonrecurring fair value measurements of nonfinancial assets such as goodwill and AROs, and the estimated fair value of preferred stock and long-term debt.

Fair Value Hierarchy: In measuring fair value, Eversource uses observable market data when available in order to minimize the use of unobservable inputs. Inputs used in fair value measurements are categorized into three fair value hierarchy levels for disclosure purposes. The entire fair value measurement is categorized based on the lowest level of input that is significant to the fair value measurement. Eversource evaluates the classification of assets and liabilities measured at fair value on a quarterly basis, and Eversource's policy is to recognize transfers between levels of the fair value hierarchy as of the end of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 - Inputs are quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations in which all significant inputs are observable.

Level 3 - Quoted market prices are not available. Fair value is derived from valuation techniques in which one or more significant inputs or assumptions are unobservable. Where possible, valuation techniques incorporate observable market inputs that can be validated to external sources such as industry exchanges, including prices of energy and energy-related products.

Determination of Fair Value: The valuation techniques and inputs used in Eversource's fair value measurements are described in Note 4, "Derivative Instruments," Note 5, "Marketable Securities," and Note 10, "Fair Value of Financial Instruments," to the financial statements.

E. Other Income, Net

Items included within Other Income, Net on the statements of income primarily consist of income/(loss) related to equity method investments, investment income/(loss), interest income and AFUDC related to equity funds. For the three and nine months ended September 30, 2017, Eversource had equity in earnings of \$5.1 million and \$23.0 million, respectively, related to its equity method investments. For the three and nine months ended September 30, 2016 Eversource had equity in earnings of \$0.9 million and losses of \$2.0 million, respectively, related to its equity method investments. Investment income/(loss) primarily relates to debt and equity securities held in trust. For further information, see Note 5, "Marketable Securities," to the financial statements.

F. Other Taxes

Gross receipts taxes levied by the state of Connecticut are collected by CL&P and Yankee Gas from their respective customers. These gross receipts taxes are shown separately with collections in Operating Revenues and with payments in Taxes Other Than Income Taxes on the statements of income as follows:

(Millions of Dollars)	For the Three Months Ended		For the Nine Months Ended	
	September 30,		September 30,	
	2017	2016	2017	2016
Eversource	\$ 40.3	\$ 45.1	\$ 118.2	\$ 124.8
CL&P	37.8	42.6	103.5	112.2

As agents for state and local governments, Eversource's companies that serve customers in Connecticut and Massachusetts collect certain sales taxes that are recorded on a net basis with no impact on the statements of income.

G. Supplemental Cash Flow Information

Non-cash investing activities include plant additions included in Accounts Payable as follows:

(Millions of Dollars)	As of	As of
	September 30, 2017	September 30, 2016
Eversource	\$ 307.7	\$ 203.6
CL&P	113.4	64.5
NSTAR Electric	55.4	39.4
PSNH	39.6	31.0
WMECO	37.1	17.6

2. REGULATORY ACCOUNTING

Eversource's Regulated companies are subject to rate regulation that is based on cost recovery and meets the criteria for application of accounting guidance for rate-regulated operations, which considers the effect of regulation on the timing of the recognition of certain revenues and expenses. The Regulated companies' financial statements reflect the effects of the rate-making process. The rates charged to the customers of Eversource's Regulated companies are designed to collect each company's costs to provide service, including a return on investment.

Management believes it is probable that each of the Regulated companies will recover its respective investments in long-lived assets, including regulatory assets. If management were to determine that it could no longer apply the accounting guidance applicable to rate-regulated enterprises to any of the Regulated companies' operations, or if management could not conclude it is probable that costs would be recovered from customers in future rates, the costs would be charged to net income in the period in which the determination is made.

Regulatory Assets: The components of regulatory assets were as follows:

Eversource (Millions of Dollars)	As of September 30, 2017	As of December 31, 2016
Benefit Costs	\$ 1,793.8	\$ 1,817.8
Derivative Liabilities	385.1	423.3
Income Taxes, Net	652.7	644.5
Storm Restoration Costs	330.1	385.3
Goodwill-related	449.0	464.4
Regulatory Tracker Mechanisms	470.7	576.6
Asset Retirement Obligations	104.8	99.3
Other Regulatory Assets	65.8	115.1
Total Regulatory Assets	4,252.0	4,526.3
Less: Current Portion	746.1	887.6
Total Long-Term Regulatory Assets	\$ 3,505.9	\$ 3,638.7

(Millions of Dollars)	As of September 30, 2017				As of December 31, 2016			
	CL&P	NSTAR Electric	PSNH	WMECO	CL&P	NSTAR Electric	PSNH	WMECO
Benefit Costs	\$415.8	\$436.7	\$183.2	\$ 84.8	\$429.3	\$438.6	\$184.2	\$ 86.7
Derivative Liabilities	381.6	2.4	—	—	420.5	2.8	—	—
Income Taxes, Net	441.1	92.4	22.3	30.5	437.0	89.7	24.2	30.8
Storm Restoration Costs	195.7	112.4	9.2	12.8	239.8	112.5	17.1	15.9
Goodwill-related	—	385.5	—	—	—	398.7	—	—
Regulatory Tracker Mechanisms	87.9	201.1	108.0	44.4	123.9	257.3	104.5	46.7
Asset Retirement Obligations	35.1	33.9	16.8	4.5	33.2	31.9	16.2	4.2
Other Regulatory Assets	30.0	15.5	17.6	5.4	43.4	15.6	16.5	7.1
Total Regulatory Assets	1,587.2	1,279.9	357.1	182.4	1,727.1	1,347.1	362.7	191.4
Less: Current Portion	275.0	230.6	112.5	60.6	335.5	289.4	117.2	64.1
Total Long-Term Regulatory Assets	\$1,312.2	\$1,049.3	\$244.6	\$ 121.8	\$1,391.6	\$1,057.7	\$245.5	\$ 127.3

Regulatory Costs in Other Long-Term Assets: Eversource's Regulated companies had \$108.7 million (including \$3.9 million for CL&P, \$42.3 million for NSTAR Electric, \$18.5 million for PSNH, and \$25.7 million for WMECO) and \$86.3 million (including \$5.9 million for CL&P, \$35.0 million for NSTAR Electric, \$8.2 million for PSNH, and \$20.1 million for WMECO) of additional regulatory costs as of September 30, 2017 and December 31, 2016, respectively, that were included in Other Long-Term Assets on the balance sheets. These amounts represent incurred costs for which recovery has not yet been specifically approved by the applicable regulatory agency. However, based on regulatory policies or past precedent on similar costs, management believes it is probable that these costs will ultimately be approved and recovered from customers in rates.

Regulatory Liabilities: The components of regulatory liabilities were as follows:

Eversource (Millions of Dollars)	As of September 30, 2017	As of December 31, 2016
Cost of Removal	\$ 470.3	\$ 459.7
Benefit Costs	125.5	136.2
Regulatory Tracker Mechanisms	175.8	145.3
AFUDC - Transmission	65.4	65.8
Other Regulatory Liabilities	33.4	42.1
Total Regulatory Liabilities	870.4	849.1

Edgar Filing: EVERSOURCE ENERGY - Form 10-Q

Less: Current Portion	170.2				146.8			
Total Long-Term Regulatory Liabilities	\$ 700.2				\$ 702.3			
	As of September 30, 2017				As of December 31, 2016			
(Millions of Dollars)	CL&P	NSTAR Electric	PSNH	WMECO	CL&P	NSTAR Electric	PSNH	WMECO
Cost of Removal	\$40.5	\$ 278.8	\$ 40.5	\$ 11.7	\$38.8	\$ 271.6	\$ 44.1	\$ 8.6
Benefit Costs	—	106.0	—	—	—	113.1	—	—

4. DERIVATIVE INSTRUMENTS

The Regulated companies purchase and procure energy and energy-related products, which are subject to price volatility, for their customers. The costs associated with supplying energy to customers are recoverable from customers in future rates. The Regulated companies manage the risks associated with the price volatility of energy and energy-related products through the use of derivative and non-derivative contracts.

Many of the derivative contracts meet the definition of, and are designated as, normal and qualify for accrual accounting under the applicable accounting guidance. The costs and benefits of derivative contracts that meet the definition of normal are recognized in Operating Expenses or Operating Revenues on the statements of income, as applicable, as electricity or natural gas is delivered.

Derivative contracts that are not designated as normal are recorded at fair value as current or long-term Derivative Assets or Derivative Liabilities on the balance sheets. For the Regulated companies, regulatory assets or regulatory liabilities are recorded to offset the fair values of derivatives, as contract settlement amounts are recovered from, or refunded to, customers in their respective energy supply rates.

The gross fair values of derivative assets and liabilities with the same counterparty are offset and reported as net Derivative Assets or Derivative Liabilities, with current and long-term portions, on the balance sheets. The following table presents the gross fair values of contracts, categorized by risk type, and the net amounts recorded as current or long-term derivative assets or liabilities:

(Millions of Dollars)	As of September 30, 2017			As of December 31, 2016		
	Commodity Supply and Price Risk Management	Netting (1)	Net Amount Recorded as a Derivative	Commodity Supply and Price Risk Management	Netting (1)	Net Amount Recorded as a Derivative
Current Derivative Assets:

NSTAR Electric	(0.1)	—	(0.1)	(0.9)	—	(0.9)

(1) Amounts represent derivative assets and liabilities that Eversource elected to record net on the balance sheets. These amounts are subject to master netting agreements or similar agreements for which the right of offset exists.

For further information on the fair value of derivative contracts, see Note 1D, "Summary of Significant Accounting Policies - Fair Value Measurements," to the financial statements.

Derivative Contracts at Fair Value with Offsetting Regulatory Amounts

Commodity Supply and Price Risk Management: As required by regulation, CL&P, along with UI, has capacity-related contracts with generation facilities. CL&P has a sharing agreement with UI, with 80 percent of the costs or benefits of each contract borne by or allocated to CL&P and 20 percent borne by or allocated to UI. The combined capacity of these contracts is 787 MW. The capacity contracts extend through 2026 and obligate both CL&P and UI to make or receive payments on a monthly basis to or from the generation facilities based on the difference between a set capacity price and the capacity market price received in the ISO-NE capacity markets. In addition, CL&P has a contract to purchase 0.1 million MWh of energy per year through 2020.

NSTAR Electric has a renewable energy contract to purchase 0.1 million MWh of energy per year through 2018 and a capacity-related contract to purchase up to 35 MW per year through 2019.

As of September 30, 2017 and December 31, 2016, Eversource had New York Mercantile Exchange ("NYMEX") financial contracts for natural gas futures in order to reduce variability associated with the purchase price of approximately 10.4 million and 9.2 million MMBtu of natural gas, respectively.

For the three months ended September 30, 2017 and 2016, there were gains of \$0.6 million and losses of \$53.4 million, respectively, deferred as regulatory costs, which reflect the change in fair value associated with Eversource's derivative contracts. For the nine months ended September 30, 2017 and 2016, these losses were \$30.3 million and \$127.8 million, respectively.

Fair Value Measurements of Derivative Instruments

Derivative contracts classified as Level 2 in the fair value hierarchy relate to the financial contracts for natural gas futures. Prices are obtained from broker quotes and are based on actual market activity. The contracts are valued using NYMEX natural gas prices. Valuations of these contracts also incorporate discount rates using the yield curve approach.

The fair value of derivative contracts classified as Level 3 utilizes significant unobservable inputs. The fair value is modeled using income techniques, such as discounted cash flow valuations adjusted for assumptions relating to exit price. Significant observable inputs for valuations of these contracts include energy and energy-related product prices in future years for which quoted prices in an active market exist. Fair value measurements categorized in Level 3 of the fair value hierarchy are prepared by individuals with expertise in valuation techniques, pricing of energy and energy-related products, and accounting requirements. The future power and capacity prices for periods that are not quoted in an active market or established at auction are based on available market data and are escalated based on estimates of inflation in order to address the full term of the contract.

Valuations of derivative contracts using a discounted cash flow methodology include assumptions regarding the timing and likelihood of scheduled payments and also reflect non-performance risk, including credit, using the default probability approach based on the counterparty's credit rating for assets and the Company's credit rating for liabilities.

Valuations incorporate estimates of premiums or discounts that would be required by a market participant to arrive at an exit price, using historical market transactions adjusted for the terms of the contract.

The following is a summary of Eversource's, including CL&P's and NSTAR Electric's, Level 3 derivative contracts and the range of the significant unobservable inputs utilized in the valuations over the duration of the contracts:

	As of September 30, 2017			As of December 31, 2016		
	Range		Period Covered	Range		Period Covered
Capacity Prices:						
CL&P	\$5.00 —8.70	per kW-Month	2021 - 2026	\$5.50 —8.70	per kW-Month	2020 - 2026
Forward Reserve:						
CL&P	\$1.00 —2.00	per kW-Month	2017 - 2024	\$1.40 —2.00	per kW-Month	2017 - 2024
REC Prices:						
NSTAR Electric	\$15.75 —22.00	per REC	2017 - 2018	\$24.00 —29.00	per REC	2017 - 2018

Exit price premiums of 1 percent through 18 percent are also applied on these contracts and reflect the uncertainty and illiquidity premiums that would be required based on the most recent market activity available for similar type contracts.

Significant increases or decreases in future energy or capacity prices in isolation would decrease or increase, respectively, the fair value of the derivative liability. Any increases in risk premiums would increase the fair value of the derivative liability. Changes in these fair values are recorded as a regulatory asset or liability and do not impact net income.

Valuations using significant unobservable inputs: The following table presents changes in the Level 3 category of derivative assets and derivative liabilities measured at fair value on a recurring basis. The derivative assets and liabilities are presented on a net basis.

5. MARKETABLE SECURITIES

Eversource maintains trusts that hold marketable securities to fund certain non-qualified executive benefits. These trusts are not subject to regulatory oversight by state or federal agencies. CYAPC and YAEC maintain legally restricted trusts, each of which holds marketable securities, to fund the spent nuclear fuel removal obligations of their nuclear fuel storage facilities.

Trading Securities: Eversource has elected to record certain equity securities as trading securities, with the changes in fair values recorded in Other Income, Net on the statements of income. As of December 31, 2016, these securities were classified as Level 1 in the fair value hierarchy and totaled \$9.6 million. These securities were sold during the first quarter of 2017 and were no longer held as of September 30, 2017. For the three and nine months ended September 30, 2016, net gains on these securities of \$0.1 million and \$0.6 million, respectively, were recorded in Other Income, Net on the statements of income. Dividend income is recorded in Other Income, Net when dividends are declared.

Available-for-Sale Securities: The following is a summary of available-for-sale securities, which are recorded at fair value and are included in current and long-term Marketable Securities on the balance sheets.

Eversource (Millions of Dollars)	As of September 30, 2017				As of December 31, 2016			
	Amortized Cost	Pre-Tax Unrealized Gains	Pre-Tax Unrealized Losses	Fair Value	Amortized Cost	Pre-Tax Unrealized Gains	Pre-Tax Unrealized Losses	Fair Value
Debt Securities	\$286.5	\$ 5.5	\$ (0.5)	\$291.5	\$296.2	\$ 1.1	\$ (2.1)	\$295.2
Equity Securities	210.7	81.5	—	292.2	203.3	62.3	(1.2)	264.4

Eversource's debt and equity securities include CYAPC's and YAEC's marketable securities held in nuclear decommissioning trusts in the amounts of \$489.1 million and \$466.7 million as of September 30, 2017 and December 31, 2016, respectively. Unrealized gains and losses for these nuclear decommissioning trusts are recorded in Marketable Securities with the corresponding offset to Other Long-Term Liabilities on the balance sheets, with no impact on the statements of income.

Unrealized Losses and Other-than-Temporary Impairment: There have been no significant unrealized losses, other-than-temporary impairments or credit losses for the three and nine months ended September 30, 2017 and 2016. Factors considered in determining whether a credit loss exists include the duration and severity of the impairment, adverse conditions specifically affecting the issuer, and the payment history, ratings and rating changes of the security. For asset-backed debt securities, underlying collateral and expected future cash flows are also evaluated.

Realized Gains and Losses: Realized gains and losses on available-for-sale securities are recorded in Other Income, Net for Eversource's non-qualified benefit trust and are offset in Other Long-Term Liabilities for CYAPC and YAEC. Eversource utilizes the specific identification basis method for the Eversource non-qualified benefit trust, and the average cost basis method for the CYAPC and YAEC nuclear decommissioning trusts to compute the realized gains and losses on the sale of available-for-sale securities.

Contractual Maturities: As of September 30, 2017, the contractual maturities of available-for-sale debt securities were as follows:

Eversource (Millions of Dollars)	Amortized Cost	Fair Value
Less than one year ⁽¹⁾	\$ 40.2	\$40.2
One to five years	56.7	57.6
Six to ten years	52.6	54.1

Edgar Filing: EVERSOURCE ENERGY - Form 10-Q

Greater than ten years	137.0	139.6
Total Debt Securities	\$ 286.5	\$291.5

(1) Amounts in the Less than one year category include securities in the CYAPC and YAEC nuclear decommissioning trusts, which are restricted and are classified in long-term Marketable Securities on the balance sheets.

Fair Value Measurements: The following table presents the marketable securities recorded at fair value on a recurring basis by the level in which they are classified within the fair value hierarchy:

Eversource (Millions of Dollars)	As of September 30, 2017	As of December 31, 2016
Level 1:		
Mutual Funds and Equities	\$ 292.2	\$ 274.0
Money Market Funds	21.8	54.8
Total Level 1	\$ 314.0	\$ 328.8
Level 2:		
U.S. Government Issued Debt Securities (Agency and Treasury)	\$ 69.0	\$ 63.0
Corporate Debt Securities	56.1	41.1
Asset-Backed Debt Securities	20.4	18.5
Municipal Bonds	113.6	107.5
Other Fixed Income Securities	10.6	10.3
Total Level 2	\$ 269.7	\$ 240.4
Total Marketable Securities	\$ 583.7	\$ 569.2

U.S. government issued debt securities are valued using market approaches that incorporate transactions for the same or similar bonds and adjustments for yields and maturity dates. Corporate debt securities are valued using a market approach, utilizing recent trades of the same or similar instrument and also incorporating yield curves, credit spreads and specific bond terms and conditions. Asset-backed debt securities include collateralized mortgage obligations, commercial mortgage backed securities, and securities collateralized by auto loans, credit card loans or receivables. Asset-backed debt securities are valued using recent trades of similar instruments, prepayment assumptions, yield curves, issuance and maturity dates, and tranche information. Municipal bonds are valued using a market approach that incorporates reported trades and benchmark yields. Other fixed income securities are valued using pricing models, quoted prices of securities with similar characteristics, and discounted cash flows.

6. SHORT-TERM AND LONG-TERM DEBT

Commercial Paper Programs and Credit Agreements: Eversource parent has a \$1.45 billion commercial paper program allowing Eversource parent to issue commercial paper as a form of short-term debt. As of September 30, 2017 and December 31, 2016, Eversource parent had \$917.0 million and approximately \$1.0 billion, respectively, in short-term borrowings outstanding under the Eversource parent commercial paper program, leaving \$533.0 million and \$428.0 million of available borrowing capacity as of September 30, 2017 and December 31, 2016, respectively. The weighted-average interest rate on these borrowings as of September 30, 2017 and December 31, 2016 was 1.34 percent and 0.88 percent, respectively. As of September 30, 2017, there were intercompany loans from Eversource parent of \$202.3 million to PSNH and \$96.9 million to WMECO. As of December 31, 2016, there were intercompany loans from Eversource parent of \$80.1 million to CL&P, \$160.9 million to PSNH and \$51.0 million to WMECO. Eversource parent, CL&P, PSNH, WMECO, NSTAR Gas and Yankee Gas are parties to a five-year \$1.45 billion revolving credit facility. The revolving credit facility terminates on September 4, 2021. The revolving credit facility serves to backstop Eversource parent's \$1.45 billion commercial paper program. There were no borrowings outstanding on the revolving credit facility as of September 30, 2017 and December 31, 2016.

Except as described below, amounts outstanding under the commercial paper programs are included in Notes Payable for Eversource and NSTAR Electric and are classified in current liabilities on the balance sheets as all borrowings are outstanding for no more than 364 days at one time. Intercompany loans from Eversource parent to CL&P, PSNH and WMECO are included in Notes Payable to Eversource Parent and are classified in current liabilities on their respective balance sheets. Intercompany loans from Eversource parent to CL&P, PSNH and WMECO are eliminated in

consolidation on Eversource's balance sheets.

As a result of the October 2017 Eversource parent long-term debt issuances, the net proceeds of which were used to repay short-term borrowings outstanding under the Eversource parent commercial paper program, \$898.8 million of short-term debt was reclassified to Long-Term Debt as of September 30, 2017.

NSTAR Electric has a \$450 million commercial paper program allowing NSTAR Electric to issue commercial paper as a form of short-term debt. As of September 30, 2017, NSTAR Electric had no short-term borrowings outstanding and as of December 31, 2016, NSTAR Electric had \$126.5 million in short-term borrowings outstanding under its commercial paper program, leaving \$450.0 million and \$323.5 million of available borrowing capacity as of September 30, 2017 and December 31, 2016, respectively. The weighted-average interest rate on these borrowings as of December 31, 2016 was 0.71 percent. NSTAR Electric is a party to a five-year \$450 million revolving credit facility. The revolving credit facility terminates on September 4, 2021. The revolving credit facility serves to backstop NSTAR Electric's \$450 million commercial paper program. There were no borrowings outstanding on the revolving credit facility as of September 30, 2017 and December 31, 2016.

Long-Term Debt Issuances: In March 2017, Eversource parent issued \$300 million of 2.75 percent Series K Senior Notes due to mature in 2022. The proceeds, net of issuance costs, were used to repay short-term borrowings under the Eversource parent commercial paper program.

In March 2017, CL&P issued \$300 million of 3.20 percent 2017 Series A First and Refunding Mortgage Bonds due to mature in 2027. The proceeds, net of issuance costs, were used to repay short-term borrowings.

In May 2017, NSTAR Electric issued \$350 million of 3.20 percent Debentures due to mature in 2027. The proceeds, net of issuance costs, were used to repay short-term borrowings and fund capital expenditures and working capital.

In August 2017, CL&P issued \$225 million of 4.30 percent 2014 Series A First and Refunding Mortgage Bonds due to mature in 2044. These bonds are part of the same series of CL&P's existing 4.30 percent bonds that were initially issued in 2014. The aggregate outstanding principal amount for these bonds is now \$475 million. The proceeds, net of issuance costs, were used to refinance short-term debt and fund capital expenditures and working capital.

In September 2017, Yankee Gas issued \$75 million of 3.02 percent Series N First Mortgage Bonds due to mature in 2027. The proceeds, net of issuance costs, were used to repay short-term borrowings.

In October 2017, Eversource parent issued \$450 million 2.75 percent Series K Senior Notes due to mature in 2022. These senior notes are part of the same series of Eversource parent's existing 2.75 percent Series K Senior Notes that were initially issued in March 2017. The aggregate outstanding principal amount for the Series K Senior Notes is now \$750 million. In addition, Eversource parent issued \$450 million of 2.90 percent 2017 Series L Senior Notes due to mature in 2024. The proceeds, net of issuance costs, were used to repay short-term borrowings.

In October 2017, NSTAR Electric issued \$350 million of 3.20 percent Debentures due to mature in 2027. The debentures are part of the same series of NSTAR Electric's existing 3.20 percent Debentures that were initially issued in May 2017. The aggregate outstanding principal amount for the 3.20 percent Debentures is now \$700 million. The proceeds, net of issuance costs, will be used to redeem long-term debt due to mature on November 15, 2017. As the debt issuance refinanced short-term debt, the amount was reclassified to Long-Term Debt on Eversource's and NSTAR Electric's balance sheets.

Long-Term Debt Repayments: In March 2017, CL&P repaid at maturity the \$150 million 5.375 percent 2007 Series A First and Refunding Mortgage Bonds.

In September 2017, CL&P repaid at maturity \$100 million of 5.75 percent 2007 Series C First Mortgage Bonds and PSNH repaid at maturity \$70 million of 6.15 percent 2007 Series N First Mortgage Bonds.

In October 2017, NSTAR Gas repaid at maturity \$25 million of 7.04 percent Series M First Mortgage Bonds.

Long-Term Debt Issuance Authorizations: On January 4, 2017, PURA approved CL&P's request for authorization to issue up to \$1.325 billion in long-term debt through December 31, 2020. On March 30, 2017, the DPU approved NSTAR Electric's request for authorization to issue up to \$700 million in long-term debt through December 31, 2018.

7. PENSION BENEFITS AND POSTRETIREMENT BENEFITS OTHER THAN PENSIONS

Eversource Service sponsors a defined benefit retirement plan ("Pension Plan") that covers eligible participants. In addition to the Pension Plan, Eversource maintains non-qualified defined benefit retirement plans sponsored by Eversource Service ("SERP Plans"), which provide benefits in excess of Internal Revenue Code limitations to eligible participants. Eversource Service also sponsors a defined benefit postretirement plan that provides life insurance and a health reimbursement arrangement created for the purpose of reimbursing retirees and dependents for health insurance premiums and certain medical expenses, to eligible participants that meet certain age and service eligibility requirements ("PBOP Plan").

In August 2016, the Company amended its PBOP Plan, which standardized separate benefit structures that existed within the plan and made other benefit changes. The remeasurement resulted in a prior service credit of \$5.3 million and \$16.1 million for the three and nine months ended September 30, 2017, respectively, which was reflected as a

reduction to net periodic benefit expense for PBOP benefits. The majority of this amount will be deferred for future refund to customers.

The components of net periodic benefit expense for the Pension, SERP and PBOP Plans are shown below. The net periodic benefit expense and the intercompany allocations, less the capitalized portions of pension, SERP and PBOP amounts, are included in Operations and Maintenance expense on the statements of income. Capitalized amounts relate to employees working on capital projects and are included in Property, Plant and Equipment, Net on the balance sheets. Pension, SERP and PBOP expense reflected in the statements of cash flows for CL&P, NSTAR Electric, PSNH and WMECO does not include the intercompany allocations or the corresponding capitalized portion, as these amounts are cash settled on a short-term basis.

8. COMMITMENTS AND CONTINGENCIES

A. Environmental Matters

Eversource, CL&P, NSTAR Electric, PSNH and WMECO are subject to environmental laws and regulations intended to mitigate or remove the effect of past operations and improve or maintain the quality of the environment. These laws and regulations require the removal or the remedy of the effect on the environment of the disposal or release of certain specified hazardous substances at current and former operating sites. Eversource, CL&P, NSTAR Electric, PSNH and WMECO have an active environmental auditing and training program and each believes it is substantially in compliance with all enacted laws and regulations.

The number of environmental sites and related reserves for which remediation or long-term monitoring, preliminary site work or site assessment is being performed are as follows:

	As of September 30, 2017	As of December 31, 2016	As of September 30, 2017	As of December 31, 2016
	Number of Sites	Reserve (in millions)	Number of Sites	Reserve (in millions)
Eversource	58	\$ 57.7	61	\$ 65.8
CL&P	14	4.9	14	4.9
NSTAR Electric	10	2.0	13	3.2

PSNH	11	5.7	11	5.3
WMECO	4	0.8	4	0.6

Included in the Eversource number of sites and reserve amounts above are former MGP sites that were operated several decades ago and manufactured gas from coal and other processes, which resulted in certain by-products remaining in the environment that may pose a potential risk to human health and the environment, for which Eversource may have potential liability. The reserve balances related to these former MGP sites were \$51.9 million and \$59.0 million as of September 30, 2017 and December 31, 2016, respectively, and related primarily to the natural gas business segment. The reduction in the reserve balance at the MGP sites in the first quarter of 2017 was primarily due to a change in cost estimates at one site where actual contamination was less than originally estimated.

These reserve estimates are subjective in nature as they take into consideration several different remediation options at each specific site. The reliability and precision of these estimates can be affected by several factors, including new information concerning either the level of contamination at the site, the extent of Eversource's, CL&P's, NSTAR Electric's, PSNH's, and WMECO's responsibility for remediation or the extent of remediation required, recently enacted laws and regulations, or changes in cost estimates due to certain economic factors. It is possible that new information or future developments could require a reassessment of the potential exposure to related environmental matters. As this information becomes available, management will continue to assess the potential exposure and adjust the reserves accordingly.

B. Guarantees and Indemnifications

In the normal course of business, Eversource parent provides credit assurances on behalf of its subsidiaries, including CL&P, NSTAR Electric, PSNH and WMECO, in the form of guarantees.

Eversource parent issued a guaranty on behalf of its subsidiary, NPT, under which, beginning at the time the Northern Pass Transmission line goes into commercial operation, Eversource parent will guarantee the financial obligations of NPT under the TSA with HQ in an amount not to exceed \$25 million. Eversource parent's obligations under the guaranty expire upon the full, final and indefeasible payment of the guaranteed obligations. Eversource parent has also entered into a guaranty on behalf of NPT under which Eversource parent will guarantee NPT's obligations under a facility with a financial institution pursuant to which NPT may request letters of credit in an aggregate amount of up to approximately \$14 million.

Eversource parent has also guaranteed certain indemnification and other obligations as a result of the sales of former unregulated subsidiaries and the termination of an unregulated business, with maximum exposures either not specified or not material.

Management does not anticipate a material impact to net income or cash flows as a result of these various guarantees and indemnifications.

The following table summarizes Eversource parent's exposure to guarantees and indemnifications of its subsidiaries to external parties, as of September 30, 2017:

Company	Description	Maximum Exposure (in millions)	Expiration Dates
On behalf of subsidiaries:			
Eversource Gas Transmission LLC	Access Northeast Project Capital Contributions Guaranty ⁽¹⁾	\$ 185.1	2021
Various	Surety Bonds ⁽²⁾	40.1	2017 - 2018
Eversource Service and Rocky River Realty Company	Lease Payments for Vehicles and Real Estate	8.2	2019 - 2024

Eversource parent issued a declining balance guaranty on behalf of its subsidiary, Eversource Gas Transmission LLC, to guarantee the payment of the subsidiary's capital contributions for its investment in the Access Northeast project. The guaranty decreases as capital contributions are made. The guaranty will expire upon the earlier of the full performance of the guaranteed obligations or December 31, 2021.

Surety bond expiration dates reflect termination dates, the majority of which will be renewed or extended. Certain surety bonds contain credit ratings triggers that would require Eversource parent to post collateral in the event that the unsecured debt credit ratings of Eversource parent are downgraded.

C. Spent Nuclear Fuel Obligations - Yankee Companies

CL&P, NSTAR Electric, PSNH and WMECO have plant closure and fuel storage cost obligations to the Yankee Companies, which have each completed the physical decommissioning of their respective nuclear facilities and are now engaged in the long-term storage of their spent fuel. The Yankee Companies collect these costs through wholesale, FERC-approved rates charged under power purchase agreements with several New England utilities, including CL&P, NSTAR Electric, PSNH and WMECO. These companies in turn recover these costs from their customers through state regulatory commission-approved retail rates. The Yankee Companies have collected or are currently collecting amounts that management believes are adequate to recover the remaining plant closure and fuel

storage cost estimates for the respective plants. Management believes CL&P, NSTAR Electric and WMECO will recover their shares of these obligations from their customers. PSNH has recovered its total share of these costs from its customers.

Spent Nuclear Fuel Litigation:

The Yankee Companies have filed complaints against the DOE in the Court of Federal Claims seeking monetary damages resulting from the DOE's failure to provide for a permanent facility to store spent nuclear fuel pursuant to the terms of the 1983 spent fuel and high level waste disposal contracts between the Yankee Companies and the DOE.

The court had previously awarded the Yankee Companies damages for Phase I, II, and III of litigation resulting from the DOE's failure to meet its contractual obligations. These Phases covered damages incurred in the years 1998 through 2012, and the awarded damages have been received by the Yankee Companies with certain amounts of the damages refunded to their customers.

DOE Phase IV Damages - On May 22, 2017, each of the Yankee Companies filed subsequent lawsuits against the DOE in the Court of Federal Claims seeking damages totaling approximately \$100 million for CYAPC, YAEC and MYAPC, covering the years from 2013 to 2016 ("DOE Phase IV"). The DOE Phase IV trial is expected to begin in 2018.

For further discussion, see Part I, Item 3, "Legal Proceedings - Yankee Companies v. U.S. Department of Energy" of our 2016 Form 10-K.

D. FERC ROE Complaints

Four separate complaints have been filed at the FERC by combinations of New England state attorneys general, state regulatory commissions, consumer advocates, consumer groups, municipal parties and other parties (collectively the "Complainants"). In each of the first three complaints, the Complainants challenged the NETOs' base ROE of 11.14 percent that had been utilized since 2005 and sought an order to reduce it prospectively from the date of the final FERC order and for the separate 15-month complaint periods. In the fourth complaint, filed April 29, 2016, the Complainants challenged the NETOs' base ROE of 10.57 percent and the maximum ROE for transmission incentive ("incentive cap") of 11.74 percent, asserting that these ROEs were unjust and unreasonable.

In response to appeals of the FERC decision in the first complaint filed by the NETOs and the Complainants, the U.S. Court of Appeals for the D.C. Circuit (the "Court") issued a decision on April 14, 2017 vacating and remanding the FERC's decision. The Court found that the FERC failed to make an explicit finding that the 11.14 percent base ROE was unjust and unreasonable, as required under Section 206 of the Federal Power Act, before it set a new base ROE. The Court also found that the FERC did not provide a rational connection between the record evidence and its decision to select the midpoint of the upper half of the zone of reasonableness for the new base ROE.

On May 26, 2017, the Chief Administrative Law Judge ("ALJ") issued an order that the fourth complaint will continue to trial in December 2017 with an ALJ initial decision expected in March of 2018.

A summary of the four separate complaints and the base ROEs pertinent to those complaints are as follows:

Complaint	15-Month Time Period of Complaint (Beginning as of Complaint Filing Date)	Original Base ROE Authorized by FERC at Time of Complaint Filing Date ⁽¹⁾	Base ROE Subsequently Authorized by FERC for First Complaint Period and also Effective from October 16, 2014 through April 14, 2017 ⁽¹⁾	Reserve (Pre-Tax and Excluding Interest) as of September 30, 2017 (in millions)	FERC ALJ Recommendation of Base ROE on Second and Third Complaints (Issued March 22, 2016)
First	10/1/2011 - 12/31/2012	11.14%	10.57%	\$—	⁽²⁾ N/A
Second	12/27/2012 - 3/26/2014	11.14%	N/A	39.1	⁽³⁾ 9.59%
Third	7/31/2014 - 10/30/2015	11.14%	10.57%	—	10.90%
Fourth	4/29/2016 - 7/28/2017	10.57%	10.57%	—	N/A

⁽¹⁾ The billed ROE (base plus incentives) between October 1, 2011 and October 15, 2014 was within a range of 11.14 percent to 13.1 percent. On October 16, 2014, the FERC set the incentive cap at 11.74 percent for the first complaint period and also effective from October 16, 2014 through April 14, 2017, the date on which the Court vacated this FERC order.

⁽²⁾ CL&P, NSTAR Electric, PSNH and WMECO have refunded all amounts associated with the first complaint period, totaling \$38.9 million (pre-tax and excluding interest) at Eversource (consisting of \$22.4 million at CL&P, \$8.4 million at NSTAR Electric, \$2.8 million at PSNH, and \$5.3 million at WMECO), reflecting both the base ROE and incentive cap prescribed by the FERC order.

⁽³⁾ The reserve represents the difference between the ROEs billed during the second complaint period and a 10.57 percent base ROE and 11.74 percent incentive cap. The reserve consisted of \$21.4 million for CL&P, \$8.5 million for NSTAR Electric, \$3.1 million for PSNH, and \$6.1 million for WMECO as of September 30, 2017.

On June 5, 2017, the NETOs, including Eversource, submitted a filing to the FERC to reinstate the base ROE of 11.14 percent with an associated ROE incentive cap of 13.5 percent effective June 8, 2017, as these were the last ROEs lawfully in effect for transmission billing purposes prior to the FERC order vacated by the Court on April 14, 2017. On October 6, 2017, the FERC did not accept the NETOs filing, temporarily leaving in place the ROEs (10.57 percent base ROE with an 11.74 percent incentive cap ROE) set in the first complaint proceeding until the FERC addresses the Court's decision.

On October 5, 2017 the NETOs filed a series of motions, requesting that the FERC dismiss the four complaint proceedings. Alternatively, if the FERC does not dismiss the proceedings, the NETOs requested that the FERC consolidate all four complaint proceedings for expeditious resolution and/or stay the trial in the fourth complaint proceeding and resolve it based on the standards set in the April 14, 2017 Court decision.

At this time, the Company cannot reasonably estimate a range of gain or loss for the complaint proceedings. The April 14, 2017 Court decision did not provide a reasonable basis for a change to the reserve balance of \$39.1 million (pre-tax, excluding interest) for the second complaint period, and the Company has not changed its reserve or recognized ROEs for any of the complaint periods.

Management cannot at this time predict the ultimate effect of the Court decision or future FERC action on any of the complaint periods or the estimated impacts on the financial position, results of operations or cash flows of Eversource, CL&P, NSTAR Electric, PSNH or WMECO.

The average impact of a 10 basis point change to the base ROE for each of the 15-month complaint periods would affect Eversource's after-tax earnings by approximately \$3 million.

E. Eversource and NSTAR Electric Boston Harbor Civil Action

On July 15, 2016, the United States Attorney on behalf of the United States Army Corps of Engineers filed a civil action in the United States District Court for the District of Massachusetts under provisions of the Rivers and Harbors Act of 1899 and the Clean Water Act against NSTAR Electric, Harbor Electric Energy Company, a wholly-owned subsidiary of NSTAR Electric ("HEEC"), and the Massachusetts Water Resources Authority (together with NSTAR Electric and HEEC, the "Defendants"). The action alleged that the Defendants failed to comply with certain permitting requirements related to the placement of the HEEC-owned electric distribution cable beneath Boston Harbor. The action sought an order to compel HEEC to comply with cable depth requirements in the United States Army Corps of Engineers' permit or alternatively to remove the electric distribution cable and cease unauthorized work in U.S. waterways. The action also sought civil penalties and other costs.

After substantial negotiations, the parties reached a settlement whereby HEEC will install a new 115kV distribution cable across Boston Harbor to Deer Island, utilizing a different route, and will remove portions of the existing cable. Upon the installation and completion of the new cable and the removal of the portions of the existing cable, all issues surrounding the current permit from the United States Army Corps of Engineers are expected to be resolved, and such litigation is expected to be dismissed with prejudice.

In 2017, as a result of the settlement, NSTAR Electric expensed \$4.9 million (pre-tax) of previously incurred capitalized costs associated with engineering work performed on the existing cable that will no longer be used. In addition, NSTAR Electric agreed to provide a rate base credit of \$17.5 million to the Massachusetts Water Resources Authority for the new cable. This negotiated credit will result in the initial \$17.5 million of construction costs on the new cable to be expensed as incurred. Construction of the new cable is expected to be completed in 2019.

9. PSNH GENERATION ASSET SALE

On June 10, 2015, Eversource and PSNH entered into the 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement (the "Agreement") with the New Hampshire Office of Energy and Planning, certain members of the NHPUC staff, the Office of Consumer Advocate, two State Senators, and several other parties. Under the terms of the Agreement, PSNH agreed to divest its generation assets, subject to NHPUC approval. The Agreement provided for a resolution of issues pertaining to PSNH's generation assets in pending regulatory proceedings before the NHPUC. The Agreement provided for the Clean Air Project prudence proceeding to be resolved and all remaining Clean Air Project costs to be included in rates effective January 1, 2016. As part of the Agreement, PSNH agreed to forego recovery of \$25 million of the equity return related to the Clean Air Project.

On July 1, 2016, the NHPUC approved the Agreement in an order that, among other things, instructed PSNH to begin the process of divesting its generation assets. The NHPUC selected an auction adviser to assist with the divestiture, and the final plan and auction process were approved by the NHPUC in November 2016.

As of September 30, 2017, PSNH's generation assets were as follows:

(Millions of Dollars)

Gross Plant	\$1,184.1
Accumulated Depreciation (573.3)	
Net Plant	610.8
Fuel	92.9
Materials and Supplies	44.0
Emission Allowances	19.4
Total Generation Assets	\$767.1

On October 11, 2017, PSNH entered into two Purchase and Sale Agreements ("Agreements") to sell its thermal and hydroelectric generation assets to private investors at purchase prices of \$175 million and \$83 million, respectively, subject to adjustments as set forth in each Agreement.

On October 12, 2017, PSNH filed an application with the NHPUC requesting approval of the Agreements. We expect to receive approvals from the NHPUC and other necessary regulatory agencies by late December 2017 or early 2018, with the transactions to be completed shortly thereafter. The Company will classify these assets as held for sale upon NHPUC approval of the sale.

Upon completion, full recovery of PSNH's generation assets will occur through a combination of cash flows during the remaining operating period, sales proceeds, and recovery of stranded costs via bonds that will be secured by a non-bypassable charge or through recoveries in future rates billed to PSNH's customers.

10. FAIR VALUE OF FINANCIAL INSTRUMENTS

The following methods and assumptions were used to estimate the fair value of each of the following financial instruments:

Preferred Stock and Long-Term Debt: The fair value of CL&P's and NSTAR Electric's preferred stock is based upon pricing models that incorporate interest rates and other market factors, valuations or trades of similar securities and cash flow projections. The fair value of long-term debt securities is based upon pricing models that incorporate quoted market prices for those issues or similar issues adjusted for market conditions, credit ratings of the respective companies and treasury benchmark yields. The fair values provided in the tables below are classified as Level 2 within the fair value hierarchy. Carrying amounts and estimated fair values are as follows:

	As of September 30, 2017		As of December 31, 2016	
Eversource (Millions of Dollars)	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Preferred Stock Not Subject to Mandatory Redemption	\$ 155.6	\$ 160.3	\$ 155.6	\$ 158.3
Long-Term Debt	11,425.9	11,968.1	9,603.2	9,980.5

	CL&P		NSTAR Electric		PSNH		WMECO	
(Millions of Dollars)	Carrying Amount	Fair Value	Carrying Amount	Fair Value	Carrying Amount	Fair Value	Carrying Amount	Fair Value
As of September 30, 2017:								
Preferred Stock Not Subject to Mandatory Redemption	\$ 116.2	\$ 115.9	\$ 43.0	\$ 44.4	\$ —	\$ —	\$ —	\$ —
Long-Term Debt	3,058.9	3,388.8	2,426.2	2,598.1	1,002.6	1,047.0	566.2	603.7
As of December 31, 2016:								
Preferred Stock Not Subject to Mandatory Redemption	\$ 116.2	\$ 114.7	\$ 43.0	\$ 43.6	\$ —	\$ —	\$ —	\$ —
Long-Term Debt	2,766.0	3,049.6	2,078.1	2,201.6	1,072.1	1,109.7	566.5	589.0

Derivative Instruments and Marketable Securities: Derivative instruments and investments in marketable securities are carried at fair value. For further information, see Note 4, "Derivative Instruments," and Note 5, "Marketable Securities," to the financial statements.

See Note 1D, "Summary of Significant Accounting Policies - Fair Value Measurements," for the fair value measurement policy and the fair value hierarchy.

11. ACCUMULATED OTHER COMPREHENSIVE INCOME/(LOSS)

The changes in accumulated other comprehensive income/(loss) by component, net of tax, is as follows:

	For the Nine Months Ended September 30, 2017			For the Nine Months Ended September 30, 2016		
	Qualified Cash Flow	Unrealized Gains	Defined	Qualified Cash Flow	Unrealized Gains/(Losses)	Defined
Eversource (Millions of Dollars)	Hedging on Marketable Securities		Total	Hedging on Marketable Securities		Total

Edgar Filing: EVERSOURCE ENERGY - Form 10-Q

			Benefit Plans				Benefit Plans		
Balance as of Beginning of Period	\$(8.2)	\$ 0.4	\$(57.5)	\$(65.3)	\$(10.3)	\$ (1.9))	\$(54.6)	\$(66.8)
OCI Before Reclassifications	—	0.7	(3.5)	(2.8)	—	2.3		(5.3)	(3.0)
Amounts Reclassified from AOCL	1.6	—	2.9	4.5	1.6	—		2.6	4.2
Net OCI	1.6	0.7	(0.6)	1.7	1.6	2.3		(2.7)	1.2
Balance as of End of Period	\$(6.6)	\$ 1.1	\$(58.1)	\$(63.6)	\$(8.7)	\$ 0.4		\$(57.3)	\$(65.6)

Eversource's qualified cash flow hedging instruments represent interest rate swap agreements on debt issuances that were settled in prior years. The settlement amount was recorded in AOCL and is being amortized into Net Income over the term of the underlying debt instrument. CL&P, PSNH and WMECO continue to amortize interest rate swaps settled in prior years from AOCL into Interest Expense over the remaining life of the associated long-term debt. Such interest rate swaps are not material to their respective financial statements.

Defined benefit plan OCI amounts before reclassifications relate to actuarial gains and losses and prior service costs that arose during the year and were recognized in AOCL. The unamortized actuarial gains and losses and prior service costs on the defined benefit plans are amortized from AOCL into Operations and Maintenance expense over the average future employee service period, and are reflected in amounts reclassified from AOCL. For further information, see Note 7, "Pension Benefits and Postretirement Benefits Other Than Pensions."

12. COMMON SHARES

The following table sets forth the Eversource parent common shares and the shares of common stock of CL&P, NSTAR Electric, PSNH and WMECO that were authorized and issued, as well as the respective per share par values:

	Par Value	Authorized as of September 30, 2017 and		Issued as of	
		December 31, 2016	September 30, 2017	December 31, 2016	September 30, 2017
Eversource	\$5	380,000,000	333,878,402	333,878,402	
CL&P	\$10	24,500,000	6,035,205	6,035,205	
NSTAR Electric	\$1	100,000,000	100	100	
PSNH	\$1	100,000,000	301	301	
WMECO	\$25	1,072,471	434,653	434,653	

As of both September 30, 2017 and December 31, 2016, there were 16,992,594 Eversource common shares held as treasury shares. As of both September 30, 2017 and December 31, 2016, Eversource common shares outstanding were 316,885,808.

13. COMMON SHAREHOLDERS' EQUITY AND NONCONTROLLING INTERESTS

Dividends on the preferred stock of CL&P and NSTAR Electric totaled \$1.9 million for both of the three months ended September 30, 2017 and 2016, and \$5.6 million for both of the nine months ended September 30, 2017 and 2016. These dividends were presented as Net Income Attributable to Noncontrolling Interests on the Eversource statements of income. Noncontrolling Interest – Preferred Stock of Subsidiaries on the Eversource balance sheets totaled \$155.6 million as of September 30, 2017 and December 31, 2016. On the Eversource balance sheets, Common Shareholders' Equity was fully attributable to the parent and Noncontrolling Interest – Preferred Stock of Subsidiaries was fully attributable to the noncontrolling interest.

14. EARNINGS PER SHARE

Basic EPS is computed based upon the weighted average number of common shares outstanding during each period.

Diluted EPS is computed on the basis of the weighted average number of common shares outstanding plus the potential dilutive effect of certain share-based compensation awards as if they were converted into common shares.

The dilutive effect of unvested RSU and performance share awards is calculated using the treasury stock method.

RSU and performance share awards are included in basic weighted average common shares outstanding as of the date that all necessary vesting conditions have been satisfied. For the three and nine months ended September 30, 2017 and 2016, there were no antidilutive share awards excluded from the computation of diluted EPS.

The following table sets forth the components of basic and diluted EPS:

	For the Three Months Ended		For the Nine Months Ended	
	September 30, 2017	September 30, 2016	September 30, 2017	September 30, 2016
Eversource (Millions of Dollars, except share information)				
Net Income Attributable to Common Shareholders	\$260.4	\$ 265.3	\$750.6	\$ 713.1
Weighted Average Common Shares Outstanding:				
Basic	317,393,029	317,787,836	317,415,348	318,696,823

Dilutive Effect	556,367,789,243	591,194,814,786
Diluted	317,949,396,577,079	318,007,342,511,609
Basic and Diluted EPS	\$0.82 \$ 0.83	\$2.36 \$ 2.24

15. SEGMENT INFORMATION

Presentation: Eversource is organized among the Electric Distribution, Electric Transmission and Natural Gas Distribution reportable segments and Other based on a combination of factors, including the characteristics of each segments' services, the sources of operating revenues and expenses and the regulatory environment in which each segment operates. These reportable segments represent substantially all of Eversource's total consolidated revenues.

Revenues from the sale of electricity and natural gas primarily are derived from residential, commercial and industrial customers and are not dependent on any single customer. The Electric Distribution reportable segment includes the generation activities of NSTAR Electric, PSNH and WMECO.

The remainder of Eversource's operations is presented as Other in the tables below and primarily consists of 1) the equity in earnings of Eversource parent from its subsidiaries and intercompany interest income, both of which are eliminated in consolidation, and interest expense related to the debt of Eversource parent, 2) the revenues and expenses of Eversource Service, most of which are eliminated in consolidation, 3) the operations of CYAPC and YAEC, and 4) the results of other unregulated subsidiaries, which are not part of its core business. In addition, Other in the tables below includes Eversource parent's equity ownership interests in certain natural gas pipeline projects owned by Enbridge, Inc., the Bay State Wind project, a renewable energy investment fund, and two companies that transmit hydroelectricity imported from the Hydro-Quebec system in Canada. In the ordinary course of business, Yankee Gas and NSTAR Gas purchase natural gas transmission services from the Enbridge, Inc. natural gas pipeline projects described above. These affiliate transaction costs total approximately \$62.5 million annually and are classified as Purchased Power, Fuel and Transmission on the Eversource statements of income.

Edgar Filing: EVERSOURCE ENERGY - Form 10-Q

Cash flows used for investments in plant included in the segment information below are cash capital expenditures that do not include amounts incurred but not paid, cost of removal, AFUDC related to equity funds, and the capitalized portions of pension expense.

Eversource's reportable segments are determined based upon the level at which Eversource's chief operating decision maker assesses performance and makes decisions about the allocation of company resources. Each of Eversource's subsidiaries, including CL&P, NSTAR Electric, PSNH and WMECO, has one reportable segment. Eversource's operating segments and reporting units are consistent with its reportable business segments.

Eversource's segment information is as follows:

Eversource (Millions of Dollars)	For the Three Months Ended September 30, 2017					Eliminations	Total
	Electric Distribution	Natural Gas Distribution	Electric Transmission	Other			
Operating Revenues	\$1,547.1	\$ 109.2	\$ 328.5	\$ 224.2	\$ (220.5)		\$1,988.5
Depreciation and Amortization	(159.6)	(15.2)	(52.6)	(9.5)	0.6		(236.3)
Other Operating Expenses	(1,088.7)	(95.5)	(95.5)	(190.0)	220.1		(1,249.6)
Operating Income/(Loss)	\$298.8	\$ (1.5)	\$ 180.4	\$ 24.7	\$ 0.2		\$502.6
Interest Expense	\$(51.3)	\$(10.8)	\$(29.2)	\$(21.8)	\$ 4.4		\$(108.7)
Other Income, Net	7.7	0.3	8.5	267.5	(262.8)		21.2
Net Income/(Loss) Attributable to Common Shareholders	157.4	(6.2)	99.0	268.4	(258.2)		260.4

Eversource (Millions of Dollars)	For the Nine Months Ended September 30, 2017					Eliminations	Total
	Electric Distribution	Natural Gas Distribution	Electric Transmission	Other			
Operating Revenues	\$4,224.2	\$ 698.8	\$ 970.0	\$ 677.5	\$ (714.0)		\$5,856.5

EVSOURCE ENERGY AND SUBSIDIARIES

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with our unaudited condensed consolidated financial statements and related combined notes included in this combined Quarterly Report on Form 10-Q, the combined quarterly reports on Form 10-Q for the quarters ended March 31, 2017 and June 30, 2017, as well as the Eversource 2016 Form 10-K. References in this combined Quarterly Report on Form 10-Q to "Eversource," the "Company," "we," "us," and "our" refer to Eversource Energy and its consolidated subsidiaries. All per-share amounts are reported on a diluted basis. The unaudited condensed consolidated financial statements of Eversource, NSTAR Electric and PSNH and the unaudited condensed financial statements of CL&P and WMECO are herein collectively referred to as the "financial statements."

Refer to the Glossary of Terms included in this combined Quarterly Report on Form 10-Q for abbreviations and acronyms used throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations.

The only common equity securities that are publicly traded are common shares of Eversource. The earnings and EPS of each business discussed below do not represent a direct legal interest in the assets and liabilities of such business but rather represent a direct interest in our assets and liabilities as a whole. EPS by business is a financial measure not recognized under GAAP calculated by dividing the Net Income Attributable to Common Shareholders of each business by the weighted average diluted Eversource common shares outstanding for the period. We use this non-GAAP financial measure to evaluate and provide details of earnings results by business. We believe that the non-GAAP presentation is a meaningful representative of our financial performance and provides additional and useful information to readers of this report in analyzing historical and future performance by business. This non-GAAP financial measure should not be considered as an alternative to reported Net Income Attributable to Common Shareholders or EPS determined in accordance with GAAP as an indicator of operating performance.

From time to time, we make statements concerning our expectations, beliefs, plans, objectives, goals, strategies, assumptions of future events, future financial performance or growth and other statements that are not historical facts. These statements are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. You can generally identify our forward-looking statements through the use of words or phrases such as "estimate," "expect," "anticipate," "intend," "plan," "project," "believe," "forecast," "should," "could," and other similar expressions. Forward-looking statements are based on the current expectations, estimates, assumptions or projections of management and are not guarantees of future performance. These expectations, estimates, assumptions or projections may vary materially from actual results. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, the following important factors that could cause our actual results to differ materially from those contained in our forward-looking statements, including, but not limited to:

- cyber breaches, acts of war or terrorism, or grid disturbances,
- actions or inaction of local, state and federal regulatory, public policy and taxing bodies,
- changes in business conditions, which could include disruptive technology related to our current or future business model,
- changes in economic conditions, including impact on interest rates, tax policies, and customer demand and payment ability,
- fluctuations in weather patterns,
- changes in laws, regulations or regulatory policy,
- changes in levels or timing of capital expenditures,
- disruptions in the capital markets or other events that make our access to necessary capital more difficult or costly,

- developments in legal or public policy doctrines,
- technological developments,
- changes in accounting standards and financial reporting regulations,
- actions of rating agencies, and
- other presently unknown or unforeseen factors.

Other risk factors are detailed in our reports filed with the SEC and updated as necessary, and we encourage you to consult such disclosures.

All such factors are difficult to predict and contain uncertainties that may materially affect our actual results, many of which are beyond our control. You should not place undue reliance on the forward-looking statements, as each speaks only as of the date on which such statement is made, and, except as required by federal securities laws, we undertake no obligation to update any forward-looking statement or statements to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time and it is not possible for us to predict all of such factors, nor can we assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. For more information, see Item 1A, Risk Factors, included in this combined Quarterly Report on Form 10-Q and in Eversource's 2016 combined Annual Report on Form 10-K. This combined Quarterly Report on Form 10-Q and Eversource's 2016 combined Annual Report on Form 10-K also describe material contingencies and critical accounting policies in the accompanying Management's Discussion and Analysis of Financial Condition and Results of Operations and Combined Notes to Financial Statements. We encourage you to review these items.

Financial Condition and Business Analysis

Executive Summary

The following items in this executive summary are explained in more detail in this combined Quarterly Report on Form 10-Q:

Results:

We earned \$260.4 million, or \$0.82 per share, in the third quarter of 2017, and \$750.6 million, or \$2.36 per share, in the first nine months of 2017, compared with \$265.3 million, or \$0.83 per share, in the third quarter of 2016, and \$713.1 million, or \$2.24 per share, in the first nine months of 2016.

- Our electric distribution segment, which includes generation, earned \$157.4 million, or \$0.50 per share, in the third quarter of 2017, and \$393.4 million, or \$1.24 per share, in the first nine months of 2017, compared with \$170.1 million, or \$0.53 per share, in the third quarter of 2016, and \$381.3 million, or \$1.20 per share, in the first nine months of 2016.

Our electric transmission segment earned \$99.0 million, or \$0.31 per share, in the third quarter of 2017, and \$289.6 million, or \$0.91 per share, in the first nine months of 2017, compared with \$88.4 million, or \$0.28 per share, in the third quarter of 2016, and \$266.6 million, or \$0.84 per share, in the first nine months of 2016.

Our natural gas distribution segment had a net loss of \$6.2 million, or \$0.02 per share, in the third quarter of 2017, and earnings of \$49.1 million, or \$0.15 per share, in the first nine months of 2017, compared with a net loss of \$7.0 million, or \$0.02 per share, in the third quarter of 2016, and earnings of \$51.9 million, or \$0.16 per share, in the first nine months of 2016.

Eversource parent and other companies earned \$10.2 million in the third quarter of 2017 and \$18.5 million in the first nine months of 2017, compared with \$13.8 million in the third quarter of 2016 and \$13.3 million in the first nine months of 2016.

Liquidity:

Cash flows provided by operating activities totaled \$1.49 billion in the first nine months of 2017, compared with \$1.65 billion in the first nine months of 2016. Investments in property, plant and equipment totaled \$1.64 billion in the first nine months of 2017, compared with \$1.36 billion in the first nine months of 2016. Cash and cash equivalents totaled \$125.8 million as of September 30, 2017, compared with \$30.3 million as of December 31, 2016.

In 2017, we issued \$2.5 billion of new long-term debt, consisting of \$1.2 billion by Eversource parent, \$700 million by NSTAR Electric, \$525 million by CL&P, and \$75 million by Yankee Gas. Proceeds from these new issuances were used primarily to pay short-term borrowings and redeem long-term debt at maturity.

- On September 6, 2017, our Board of Trustees approved a common share dividend payment of \$0.475 per share, which was paid on September 29, 2017 to shareholders of record as of September 19, 2017.

Strategic, Legislative, Regulatory, Policy and Other Items:

On October 6, 2017, the FERC issued an order that did not accept the NETOs June 5, 2017 filing to reinstate the base ROE of 11.14 percent with an associated ROE incentive cap of 13.5 percent. Therefore, the Company will continue to

recognize transmission revenues as billed utilizing a base ROE of 10.57 percent with an incentive cap of 11.74 percent.

On October 12, 2017, PSNH filed an application with the NHPUC requesting approval of the sale of PSNH's thermal and hydroelectric power generation assets in New Hampshire to private investors for a combined purchase price totaling \$258 million.

On October 29, 2017, a storm delivered high winds and rain, causing extensive damage to our electric distribution systems across all three states. We estimate that more than 800,000 of our electric distribution customers were without power during or following the storm. Restoration costs cannot be estimated at this time. As a result of the extent of the damages, we expect the storm restoration costs will be material and will exceed the criteria to be declared a major storm in Connecticut, New Hampshire, and Massachusetts and, as a result, we do not expect the storm to have a material impact on our results of operations.

Overview

Consolidated: Below is a summary of our earnings by business, which also reconciles the non-GAAP financial measure of EPS by business to the most directly comparable GAAP measure of diluted EPS, for the third quarter and the first nine months of 2017 and 2016.

(Millions of Dollars, Except Per-Share Amounts)	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2017		2016		2017		2016	
	Amount	Per Share	Amount	Per Share	Amount	Per Share	Amount	Per Share
Net Income Attributable to Common Shareholders (GAAP)	\$260.4	\$0.82	\$265.3	\$0.83	\$750.6	\$2.36	\$713.1	\$2.24
Regulated Companies	\$250.2	\$0.79	\$251.5	\$0.79	\$732.1	\$2.30	\$699.8	\$2.20
Eversource Parent and Other Companies	10.2	0.03	13.8	0.04	18.5	0.06	13.3	0.04
Net Income Attributable to Common Shareholders (GAAP)	\$260.4	\$0.82	\$265.3	\$0.83	\$750.6	\$2.36	\$713.1	\$2.24

Regulated Companies: Our Regulated companies consist of the electric distribution, electric transmission, and natural gas distribution segments. Generation activities of PSNH and WMECO are included in our electric distribution segment. A summary of our segment earnings and EPS for the third quarter and the first nine months of 2017 and 2016 is as follows:

(Millions of Dollars, Except Per-Share Amounts)	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2017		2016		2017		2016	
	Amount	Per Share	Amount	Per Share	Amount	Per Share	Amount	Per Share
Electric Distribution	\$157.4	\$0.50	\$170.1	\$0.53	\$393.4	\$1.24	\$381.3	\$1.20
Electric Transmission	99.0	0.31	88.4	0.28	289.6	0.91	266.6	0.84
Natural Gas Distribution	(6.2)	(0.02)	(7.0)	(0.02)	49.1	0.15	51.9	0.16
Net Income - Regulated Companies	\$250.2	\$0.79	\$251.5	\$0.79	\$732.1	\$2.30	\$699.8	\$2.20

Our electric distribution segment earnings decreased \$12.7 million in the third quarter of 2017, as compared to the third quarter of 2016, due primarily to lower sales volumes and demand revenues driven by the mild summer weather during the third quarter of 2017, primarily at NSTAR Electric, as well as higher property tax, depreciation and interest expense.

Our electric distribution segment earnings increased \$12.1 million in the first nine months of 2017, as compared to the first nine months of 2016, due primarily to lower operations and maintenance expense, partially offset by lower sales volumes driven by the mild summer weather during the third quarter of 2017, primarily at NSTAR Electric, higher depreciation and interest expense, and lower generation earnings.

Our electric transmission segment earnings increased \$10.6 million and \$23.0 million in the third quarter and first nine months of 2017, respectively, as compared to the third quarter and first nine months of 2016, due primarily to a higher transmission rate base as a result of our continued investment in our transmission infrastructure, partially offset by a lower benefit in the second quarter of 2017 related to the annual billing and cost reconciliation filing with the FERC.

Our natural gas distribution segment results improved \$0.8 million in the third quarter of 2017, as compared to the third quarter of 2016, and earnings decreased \$2.8 million in the first nine months of 2017, as compared to the first nine months of 2016. The decrease in the first nine months of 2017 was due primarily to higher depreciation expense,

higher operations and maintenance expense, and lower demand revenues in Connecticut driven by lower peak usage in 2017, as compared to 2016, as a result of milder winter weather.

Eversource Parent and Other Companies: Eversource parent and other companies earned \$10.2 million in the third quarter of 2017 and \$18.5 million in the first nine months of 2017, compared with \$13.8 million in the third quarter of 2016 and \$13.3 million in the first nine months of 2016. The improved year-to-date results were largely due to increased gains on investments recorded in 2017, partially offset by higher interest expense.

Electric and Natural Gas Sales Volumes: Weather, fluctuations in energy supply costs, conservation measures (including utility-sponsored energy efficiency programs), and economic conditions affect customer energy usage.

Industrial sales volumes are less sensitive to temperature variations than residential and commercial sales volumes.

In our service territories, weather impacts electric sales volumes during the summer and both electric and natural gas sales volumes during the winter; however, natural gas sales volumes are more sensitive to temperature variations than are electric sales volumes. Customer heating or cooling usage may not directly correlate with historical levels or with the level of degree-days that occur.

Fluctuations in retail electric sales volumes at NSTAR Electric and PSNH impact earnings ("Traditional" in the table below). For CL&P and WMECO, fluctuations in retail electric sales volumes do not impact earnings due to their respective regulatory commission approved distribution revenue decoupling mechanisms ("Decoupled" in the table below). These distribution revenues are decoupled from their customer sales volumes, which breaks the relationship between sales volumes and revenues recognized. CL&P and WMECO reconcile their annual base distribution rate recovery amounts to their respective pre-established levels of baseline distribution delivery service revenues of \$1.059 billion and \$132.4 million, respectively. Any difference between the allowed level of distribution revenue and the actual amount incurred during a 12-month period is adjusted through rates in the following period.

Fluctuations in natural gas sales volumes in Connecticut impact earnings ("Traditional" in the table below). In Massachusetts, fluctuations in natural gas sales volumes do not impact earnings due to the DPU-approved natural gas distribution revenue decoupling mechanism approved in the last rate case decision ("Decoupled" in the table below). These distribution revenues are decoupled from their customer sales volumes, which breaks the relationship between sales volumes and revenues recognized.

A summary of our retail electric GWh sales volumes and our firm natural gas MMcf sales volumes, as well as percentage changes, is as follows:

	For the Three Months Ended September 30, 2017 Compared to 2016			For the Nine Months Ended September 30, 2017 Compared to 2016		
	Sales Volumes (GWh)	Percentage	Decrease	Sales Volumes (GWh)	Percentage	Decrease
Electric	2017	2016		2017	2016	
Traditional:						
Residential	2,583	2,910	(11.2)%	7,126	7,407	(3.8)%
Commercial	4,291	4,525	(5.2)%	12,058	12,376	(2.6)%
Industrial	671	696	(3.6)%	1,856	1,948	(4.7)%
Total – Traditional	7,545	8,131	(7.2)%	21,040	21,731	(3.2)%
Decoupled:

Total – Traditional	5,550	5,270	5.3	%	32,233	31,570	2.1	%
Decoupled:								

Decoupled:

Edgar Filing: EVERSOURCE ENERGY - Form 10-Q

Residential	1,244	1,308	(4.9)%	14,593	13,848	5.4	%
Commercial	2,314	2,147	7.8	%	15,072	15,019	0.4	%
Industrial	1,270	990	28.3	%	4,293	4,163	3.1	%
Total – Decoupled	4,828	4,445	8.6	%	33,958	33,030	2.8	%
Special Contracts ⁽¹⁾	1,147	1,208	(5.0)%	3,495	3,507	(0.3)%
Total – Decoupled and Special Contracts	5,975	5,653	5.7	%	37,453	36,537	2.5	%
Total Sales Volumes	11,525	10,923	5.5	%	69,686	68,107	2.3	%

Special contracts are unique to the natural gas distribution customers who take service under such an arrangement ⁽¹⁾ and generally specify the amount of distribution revenue to be paid to Yankee Gas regardless of the customers' usage.

For the third quarter and the first nine months of 2017, retail electric sales volumes at our electric utilities with a traditional rate structure (NSTAR Electric and PSNH) were lower, as compared to the third quarter and first nine months of 2016. Sales volumes were negatively impacted by the mild summer weather in the third quarter of 2017, as compared to the same period in 2016, and lower customer usage driven by the impact of increased customer energy conservation efforts. Cooling degree days for the first nine months of 2017 were 17.8 percent lower in the Boston metropolitan area and 24.8 percent lower in New Hampshire, as compared to the same period in 2016.

On January 28, 2016, Eversource received approval of a three-year energy efficiency plan in Massachusetts, which includes recovery of LBR at NSTAR Electric until it is operating under a decoupled rate structure. NSTAR Electric earns LBR related to reductions in sales volume as a result of successful energy efficiency programs. LBR is recovered from retail customers through current rates. NSTAR Electric recognized LBR of \$18.8 million and \$54.7 million in the third quarter and first nine months of 2017, respectively, compared to \$17.4 million and \$44.1 million in the third quarter and first nine months of 2016, respectively.

Our firm natural gas sales volumes are subject to many of the same influences as our retail electric sales volumes. In addition, they have benefited from customer growth in both of our natural gas distribution companies. Consolidated firm natural gas sales volumes were higher in the first nine months of 2017, as compared to the first nine months of 2016, due primarily to improved economic conditions across our service territories, partially offset by increased customer energy conservation efforts. The first quarter of 2017 mild winter weather was more than offset by colder than normal weather in the second quarter of 2017. Heating degree days for the first nine months of 2017 were 2.2 percent higher in Connecticut, as compared to the same period in 2016.

Major Storm: On October 29, 2017, a storm delivered high winds and rain, causing extensive damage to our electric distribution systems across all three states. We estimate that more than 800,000 of our electric distribution customers were without power during or following the storm. Restoration costs cannot be estimated at this time. As a result of the extent of the damages, we expect the storm restoration costs will be material and will exceed the criteria to be declared a major storm in Connecticut, New Hampshire, and Massachusetts and that each operating company will seek recovery of these costs through its applicable regulatory recovery process. As a result, all qualifying expenses prudently incurred during the storm will be deferred and recovered from customers. We do not expect the storm to have a material impact to the results of operations of CL&P, NSTAR Electric, PSNH or WMECO.

Liquidity

Consolidated: Cash and cash equivalents totaled \$125.8 million as of September 30, 2017, compared with \$30.3 million as of December 31, 2016.

Long-Term Debt Issuances: In August 2017, CL&P issued \$225 million of 4.30 percent 2014 Series A First and Refunding Mortgage Bonds due to mature in 2044. These bonds are part of the same series of CL&P's existing 4.30 percent bonds that were initially issued in 2014. The aggregate outstanding principal amount for these bonds is now \$475 million. The proceeds, net of issuance costs, were used to refinance short-term debt and fund capital expenditures and working capital.

In September 2017, Yankee Gas issued \$75 million of 3.02 percent Series N First Mortgage Bonds due to mature in 2027. The proceeds, net of issuance costs, were used to repay short-term borrowings.

In October 2017, Eversource parent issued \$450 million 2.75 percent Series K Senior Notes due to mature in 2022. These senior notes are part of the same series of Eversource parent's existing 2.75 percent Series K Senior Notes that were initially issued in March 2017. The aggregate outstanding principal amount for the Series K Senior Notes is now \$750 million. In addition, Eversource parent issued \$450 million of 2.90 percent 2017 Series L Senior Notes due to mature in 2024. The proceeds, net of issuance costs, were used to repay short-term borrowings.

In October 2017, NSTAR Electric issued \$350 million of 3.20 percent Debentures due to mature in 2027. The debentures are part of the same series of NSTAR Electric's existing 3.20 percent Debentures that were initially issued in May 2017. The aggregate outstanding principal amount for the 3.20 percent Debentures is now \$700 million. The proceeds, net of issuance costs, will be used to redeem long-term debt due to mature on November 15, 2017.

Long-Term Debt Repayments: In September 2017, CL&P repaid at maturity \$100 million of 5.75 percent 2007 Series C First Mortgage Bonds and PSNH repaid at maturity \$70 million of 6.15 percent 2007 Series N First Mortgage Bonds.

In October 2017, NSTAR Gas repaid at maturity \$25 million of 7.04 percent Series M First Mortgage Bonds.

Commercial Paper Programs and Credit Agreements: Eversource parent has a \$1.45 billion commercial paper program allowing Eversource parent to issue commercial paper as a form of short-term debt. As of September 30, 2017 and December 31, 2016, Eversource parent had \$917.0 million and approximately \$1.0 billion, respectively, in short-term borrowings outstanding under the Eversource parent commercial paper program, leaving \$533.0 million and \$428.0 million of available borrowing capacity as of September 30, 2017 and December 31, 2016, respectively. The weighted-average interest rate on these borrowings as of September 30, 2017 and December 31, 2016 was 1.34 percent and 0.88 percent, respectively. As of September 30, 2017, there were intercompany loans from Eversource parent of \$202.3 million to PSNH, and \$96.9 million to WMECO. As of December 31, 2016, there were intercompany loans from Eversource parent of \$80.1 million to CL&P, \$160.9 million to PSNH and \$51.0 million to WMECO. Eversource parent, CL&P, PSNH, WMECO, NSTAR Gas and Yankee Gas are parties to a five-year \$1.45 billion revolving credit facility. The revolving credit facility terminates on September 4, 2021. The revolving credit facility serves to backstop Eversource parent's \$1.45 billion commercial paper program. There were no borrowings outstanding on the revolving credit facility as of September 30, 2017 and December 31, 2016.

Except as described below, amounts outstanding under the commercial paper programs are included in Notes Payable for Eversource and are classified in current liabilities on the balance sheets as all borrowings are outstanding for no more than 364 days at one time.

As a result of the October 2017 Eversource parent long-term debt issuances, the net proceeds of which were used to repay short-term borrowings outstanding under the Eversource parent commercial paper program, \$898.8 million of short-term debt was reclassified to Long-Term Debt as of September 30, 2017.

NSTAR Electric has a \$450 million commercial paper program allowing NSTAR Electric to issue commercial paper as a form of short-term debt. As of September 30, 2017, NSTAR Electric had no short-term borrowings outstanding and as of December 31, 2016, NSTAR Electric had \$126.5 million in short-term borrowings outstanding under its commercial paper program, leaving \$450.0 million and \$323.5 million of available borrowing capacity as of September 30, 2017 and December 31, 2016, respectively. The weighted-average interest rate on these borrowings as of December 31, 2016 was 0.71 percent. NSTAR Electric is a party to a five-year \$450 million revolving credit facility. The revolving credit facility terminates on September 4, 2021. The revolving credit facility serves to backstop NSTAR Electric's \$450 million commercial paper program. There were no borrowings outstanding on the revolving credit facility as of September 30, 2017 and December 31, 2016.

Cash Flows: Cash flows provided by operating activities totaled \$1.49 billion in the first nine months of 2017, compared with \$1.65 billion in the first nine months of 2016. The decrease in operating cash flows was due primarily to the \$200.7 million net unfavorable impact as a result of the change in income tax payments made, or refunds received, in 2017 when compared to 2016. This unfavorable impact was primarily the result of the December 2015 legislation, which extended the accelerated deduction of depreciation from 2015 to 2019. The legislation resulted in a significant refund of approximately \$275 million, which we received in the first quarter of 2016. Additionally, there was an increase of \$76.0 million in Pension and PBOP Plan cash contributions made in the first nine months of 2017, as compared to the same period in 2016. Partially offsetting these unfavorable impacts was the benefit related to the timing of regulatory recoveries and the timing of collections and payments of our working capital items, including accounts receivable and accounts payable.

On September 6, 2017, our Board of Trustees approved a common share dividend payment of \$0.475 per share, which was paid on September 29, 2017 to shareholders of record as of September 19, 2017.

In the first nine months of 2017, CL&P, NSTAR Electric, PSNH, and WMECO paid \$205.2 million, \$186.0 million, \$23.9 million, and \$28.5 million, respectively, in common stock dividends to Eversource parent.

Investments in Property, Plant and Equipment on the statements of cash flows do not include amounts incurred on capital projects but not yet paid, cost of removal, AFUDC related to equity funds, and the capitalized portions of pension expense. In the first nine months of 2017, investments for Eversource, CL&P, NSTAR Electric, PSNH, and WMECO were \$1.64 billion, \$621.9 million, \$358.0 million, \$215.5 million, and \$109.2 million respectively.

Business Development and Capital Expenditures

Aquarion: On June 2, 2017, Eversource announced that it had entered into an agreement to acquire Aquarion from Macquarie Infrastructure Partners for \$1.675 billion, consisting of approximately \$880 million in cash and \$795 million of assumed Aquarion debt. The transaction requires approval from PURA, the DPU, the NHPUC, the Maine PUC, and the Federal Communications Commission, and is also subject to a review under the Hart-Scott-Rodino Act. On June 29, 2017, Eversource and Aquarion filed joint applications with regulatory agencies in Connecticut, Massachusetts, New Hampshire and Maine requesting approval of the transaction. With the exception of Massachusetts, all state and federal regulatory agency approvals have been received and the related review period has expired. The transaction is expected to close by December 31, 2017.

Bay State Wind: Bay State Wind is a proposed offshore wind project being jointly developed by Eversource and Denmark-based Ørsted (formerly known as DONG Energy). Bay State Wind will be located in a 300-square-mile area approximately 15 to 25 miles south of Martha's Vineyard that has the ultimate potential to generate more than 2,000 MW of energy. Both Eversource and Ørsted hold a 50 percent ownership interest in Bay State Wind. In August 2016, Massachusetts passed clean energy legislation that requires EDCs to jointly solicit RFPs and enter into long-term

contracts for offshore wind, creating RFP opportunities for projects like Bay State Wind. On June 29, 2017, the Bureau of Ocean Energy Management ("BOEM") approved the project's Site Assessment Plan ("SAP"), the first BOEM approval of an offshore wind SAP in the U.S.

On June 29, 2017, the Massachusetts RFP was issued, seeking bids for a minimum of 400 MW of offshore wind capacity. The RFP states that bids of up to 800 MW would be considered, provided they demonstrate significant net economic benefits to customers. Bay State Wind submitted a Notice of Intent to Bid on July 26, 2017, and will submit a proposal by the December 20, 2017 due date.

Consolidated Capital Expenditures: Our consolidated capital expenditures, including amounts incurred but not paid, cost of removal, AFUDC, and the capitalized portions of pension expense (all of which are non-cash factors), totaled \$1.69 billion in the first nine months of 2017, compared to \$1.43 billion in the first nine months of 2016. These amounts included \$97.8 million and \$87.1 million in the first nine months of 2017 and 2016, respectively, related to information technology and facilities upgrades and enhancements, primarily at Eversource Service and The Rocky River Realty Company.

Electric Transmission Business:

Our consolidated electric transmission business capital expenditures increased by \$40.9 million in the first nine months of 2017, as compared to the first nine months of 2016. A summary of electric transmission capital expenditures by company is as follows:

(Millions of Dollars)	For the Nine Months Ended September 30,	
	2017	2016
CL&P	\$300.7	\$211.8
NSTAR Electric	108.5	162.6
PSNH	87.4	80.2
WMECO	70.9	75.7
NPT	32.1	28.4
Total Electric Transmission Segment	\$599.6	\$558.7

Northern Pass: Northern Pass is a planned HVDC transmission line from the Québec-New Hampshire border to Franklin, New Hampshire and an associated alternating current radial transmission line between Franklin and Deerfield, New Hampshire. Northern Pass will interconnect at the Québec-New Hampshire border with a planned HQ HVDC transmission line.

On April 13, 2017, the New Hampshire Site Evaluation Committee ("NH SEC") commenced final adjudicative hearings that, on August 31, 2017, were extended and will result in the issuance of a final order by March 31, 2018.

On August 10, 2017, the DOE issued the final Environmental Impact Statement for Northern Pass concluding that the proposed Northern Pass route is the preferred alternative, providing substantial benefits with only minimal impacts. Siting and permitting at both the state and federal levels is well advanced and the DOE is expected to issue the Presidential Permit for Northern Pass during the fourth quarter of 2017. Northern Pass is expected to be placed in service in the second half of 2020.

In August 2016, Massachusetts enacted clean energy legislation that requires EDCs to solicit proposals jointly and enter into long-term contracts for energy, such as hydropower. The RFP was issued on March 31, 2017 and on July 27, 2017, Eversource Energy Transmission Ventures, Inc. and HQ jointly submitted proposals for Northern Pass into the Massachusetts clean energy RFP.

Greater Boston Reliability Solution: In February 2015, ISO-NE selected the Greater Boston and New Hampshire Solution (the "Solution"), proposed by Eversource and National Grid, to satisfy the requirements identified in the Greater Boston study. The Solution consists of a portfolio of electric transmission upgrades covering southern New Hampshire and northern Massachusetts and continuing into the greater Boston metropolitan area, of which 28 are in Eversource's service territory. The NH SEC issued its written order approving the New Hampshire upgrades on October 4, 2016. We are currently pursuing the necessary regulatory and siting application approvals in Massachusetts. To date, we have received approval for two of these projects from the Massachusetts Energy Facilities Siting Board. Construction has also begun on several smaller projects not requiring siting approval. All upgrades are expected to be completed by the end of 2019. We estimate our portion of the investment in the Solution will be approximately \$560 million, of which \$186.3 million has been capitalized through September 30, 2017.

GHCC: The Greater Hartford Central Connecticut ("GHCC") projects, which have been approved by ISO-NE, consist of 27 projects with an expected investment of approximately \$350 million that are expected to be placed in service through 2019. Sixteen projects have been placed in service, and eight projects are in active construction. As of

September 30, 2017, CL&P had capitalized \$192.3 million in costs associated with GHCC.

Seacoast Reliability Project: On April 12, 2016, PSNH filed a siting application with the NH SEC for the Seacoast Reliability Project, a 13-mile, 115kV transmission line within several New Hampshire communities, which proposes to use a combination of overhead, underground and underwater line design to help meet the growing demand for electricity in the Seacoast region. In June 2016, the NH SEC accepted our application as complete. Due to delays with the siting hearings, we now expect the NH SEC decision in mid-2018, and this project is now expected to be completed by the end of 2019. We estimate our investment in this project to be approximately \$84 million, of which, through September 30, 2017, PSNH had capitalized \$19.7 million in costs.

Distribution Business:

A summary of distribution capital expenditures is as follows:

For the Nine Months Ended September 30,

(Millions of Dollars)	CL&P	NSTAR Electric	PSNH	WMECO	Total Electric	Natural Gas	Total Electric and Natural Gas Distribution Segment
2017							
Basic Business	\$161.8	\$110.3	\$52.5	\$16.4	\$341.0	\$51.3	\$392.3
Aging Infrastructure	127.4	49.6	63.9	16.3	257.2	149.6	406.8
Load Growth ⁽¹⁾	41.0	53.2	14.1	(1.5)	106.8	30.6	137.4
Total Distribution	330.2	213.1	130.5	31.2	705.0	231.5	936.5
Generation ⁽²⁾	—	24.6	6.7	20.9	52.2	—	52.2
Total Electric and Natural Gas Distribution Segment	\$330.2	\$237.7	\$137.2	\$52.1	\$757.2	\$231.5	\$988.7
2016							
Basic Business	\$127.0	\$87.7	\$46.8	\$10.7	\$272.2	\$48.9	\$321.1
Aging Infrastructure	97.4	57.8	61.9	17.6	234.7	103.0	337.7
Load Growth ⁽¹⁾	31.9	48.1	11.8	(2.5)	89.3	28.3	117.6
Total Distribution	256.3	193.6	120.5	25.8	596.2	180.2	776.4
Generation	—	—	8.5	—	8.5	—	8.5
Total Electric and Natural Gas Distribution Segment	\$256.3	\$193.6	\$129.0	\$25.8	\$604.7	\$180.2	\$784.9

⁽¹⁾ For the nine months ended September 30, 2017 and September 30, 2016, WMECO had \$11.0 million and \$6.4 million, respectively, of total contributions in aid of construction, which were credits to capital expenditures for those periods.

⁽²⁾ In 2017, NSTAR Electric and WMECO incurred capital expenditures related to the construction of solar generation facilities.

For the electric distribution business, basic business includes meters, tools, vehicles, information technology, transformer replacements, equipment facilities, and the relocation of plant. Aging infrastructure relates to reliability and the replacement of overhead lines, plant substations, underground cable replacement, and equipment failures. Load growth includes requests for new business and capacity additions on distribution lines and substation additions and expansions.

For the natural gas distribution segment, basic business addresses daily operational needs including meters, pipe relocations due to public works projects, vehicles, and tools. Aging infrastructure projects seek to improve the reliability of the system through enhancements related to cast iron and bare steel replacement of main and services, corrosion mediation, and station upgrades. Load growth reflects growth in existing service territories including new developments, installation of services, and expansion.

The natural gas distribution segment's capital spending program increased by \$51.3 million in the first nine months of 2017, as compared to the first nine months of 2016, primarily due to an increased investment in system replacement and reliability, as well as upgrades to our LNG facilities. We expect the LNG facility upgrades to cost approximately

\$200 million and to be placed in service in late 2019.

FERC Regulatory Matters

FERC ROE Complaints: Four separate complaints have been filed at the FERC by combinations of New England state attorneys general, state regulatory commissions, consumer advocates, consumer groups, municipal parties and other parties (collectively the "Complainants"). In each of the first three complaints, the Complainants challenged the NETOs' base ROE of 11.14 percent that had been utilized since 2005 and sought an order to reduce it prospectively from the date of the final FERC order and for the separate 15-month complaint periods. In the fourth complaint, filed April 29, 2016, the Complainants challenged the NETOs' base ROE of 10.57 percent and the maximum ROE for transmission incentive ("incentive cap") of 11.74 percent, asserting that these ROEs were unjust and unreasonable.

In response to appeals of the FERC decision in the first complaint filed by the NETOs and the Complainants, the U.S. Court of Appeals for the D.C. Circuit (the "Court") issued a decision on April 14, 2017 vacating and remanding the FERC's decision. The Court found that the FERC failed to make an explicit finding that the 11.14 percent base ROE was unjust and unreasonable, as required under Section 206 of the Federal Power Act, before it set a new base ROE. The Court also found that the FERC did not provide a rational connection between the record evidence and its decision to select the midpoint of the upper half of the zone of reasonableness for the new base ROE.

On May 26, 2017, the Chief Administrative Law Judge ("ALJ") issued an order that the fourth complaint will continue to trial in December 2017 with an ALJ initial decision expected in March of 2018.

A summary of the four separate complaints and the base ROEs pertinent to those complaints are as follows:

Complaint	15-Month Time Period of Complaint (Beginning as of Complaint Filing Date)	Original Base ROE Authorized by FERC at Time of Complaint Filing Date ⁽¹⁾	Base ROE Subsequently Authorized by FERC for First Complaint Period and also Effective from October 16, 2014 through April 14, 2017 ⁽¹⁾	Reserve (Pre-Tax and Excluding Interest) as of September 30, 2017 (in millions)	FERC ALJ Recommendation of Base ROE on Second and Third Complaints (Issued March 22, 2016)
First	10/1/2011 - 12/31/2012	11.14%	10.57%	\$—	⁽²⁾ N/A
Second	12/27/2012 - 3/26/2014	11.14%	N/A	39.1	⁽³⁾ 9.59%
Third	7/31/2014 - 10/30/2015	11.14%	10.57%	—	10.90%
Fourth	4/29/2016 - 7/28/2017	10.57%	10.57%	—	N/A

⁽¹⁾ The billed ROE (base plus incentives) between October 1, 2011 and October 15, 2014 was within a range of 11.14 percent to 13.1 percent. On October 16, 2014, the FERC set the incentive cap at 11.74 percent for the first complaint period and also effective from October 16, 2014 through April 14, 2017, the date on which the Court vacated this FERC order.

⁽²⁾ CL&P, NSTAR Electric, PSNH and WMECO have refunded all amounts associated with the first complaint period, totaling \$38.9 million (pre-tax and excluding interest) at Eversource (consisting of \$22.4 million at CL&P, \$8.4 million at NSTAR Electric, \$2.8 million at PSNH, and \$5.3 million at WMECO), reflecting both the base ROE and incentive cap prescribed by the FERC order.

⁽³⁾ The reserve represents the difference between the ROEs billed during the second complaint period and a 10.57 percent base ROE and 11.74 percent incentive cap. The reserve consisted of \$21.4 million for CL&P, \$8.5 million for NSTAR Electric, \$3.1 million for PSNH, and \$6.1 million for WMECO as of September 30, 2017.

On June 5, 2017, the NETOs, including Eversource, submitted a filing to the FERC to reinstate the base ROE of 11.14 percent with an associated ROE incentive cap of 13.5 percent effective June 8, 2017, as these were the last ROEs lawfully in effect for transmission billing purposes prior to the FERC order vacated by the Court on April 14, 2017. On October 6, 2017, the FERC did not accept the NETOs filing, temporarily leaving in place the ROEs (10.57 percent base ROE with an 11.74 percent incentive cap ROE) set in the first complaint proceeding until the FERC addresses the Court's decision.

On October 5, 2017 the NETOs filed a series of motions, requesting that the FERC dismiss the four complaint proceedings. Alternatively, if the FERC does not dismiss the proceedings, the NETOs requested that the FERC consolidate all four complaint proceedings for expeditious resolution and/or stay the trial in the fourth complaint proceeding and resolve it based on the standards set in the April 14, 2017 Court decision.

At this time, the Company cannot reasonably estimate a range of gain or loss for the complaint proceedings. The April 14, 2017 Court decision did not provide a reasonable basis for a change to the reserve balance of \$39.1 million (pre-tax, excluding interest) for the second complaint period, and the Company has not changed its reserve or recognized ROEs for any of the complaint periods.

Management cannot at this time predict the ultimate effect of the Court decision or future FERC action on any of the complaint periods or the estimated impacts on the financial position, results of operations or cash flows of Eversource, CL&P, NSTAR Electric, PSNH or WMECO.

The average impact of a 10 basis point change to the base ROE for each of the 15-month complaint periods would affect Eversource's after-tax earnings by approximately \$3 million.

NSTAR Electric and WMECO Merger FERC Filings: On January 13, 2017, Eversource made two filings with FERC related to the proposed merger of WMECO into NSTAR Electric with an anticipated effective date of December 31, 2017. One filing requests FERC approval of the merger, and the other filing requests FERC approval of NSTAR Electric's assumption of WMECO's short-term debt obligations. The FERC approved the merger on March 2, 2017 and will act on the assumption of debt filing by the end of 2017.

Regulatory Developments and Rate Matters

Electric and Natural Gas Base Distribution Rates:

The Regulated companies' distribution rates are set by their respective state regulatory commissions, and their tariffs include mechanisms for periodically adjusting their rates for the recovery of specific incurred costs. Other than as described below, for the first nine months of 2017, changes made to the Regulated companies' rates did not have a material impact on their earnings, financial position, or cash flows. For further information, see "Financial Condition and Business Analysis – Regulatory Developments and Rate Matters" included in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," of the Eversource 2016 Form 10-K.

Connecticut:

On April 20, 2017, PURA approved the joint request of CL&P, the Connecticut Office of Consumer Counsel and the Connecticut Attorney General to amend the deadline to establish new electric distribution rates in the 2012 Connecticut merger settlement agreement from "no later than December 1, 2017" to "no later than July 1, 2018." On October 27, 2017, CL&P filed a letter of intent with PURA to request a rate increase of \$255.8 million, \$45 million and \$36 million effective May 1, 2018, 2019, and 2020, respectively.

Massachusetts:

Eversource and NSTAR Electric Boston Harbor Civil Action: On July 15, 2016, the United States Attorney on behalf of the United States Army Corps of Engineers filed a civil action in the United States District Court for the District of Massachusetts under provisions of the Rivers and Harbors Act of 1899 and the Clean Water Act against NSTAR Electric, Harbor Electric Energy Company, a wholly-owned subsidiary of NSTAR Electric ("HEEC"), and the Massachusetts Water Resources Authority (together with NSTAR Electric and HEEC, the "Defendants"). The action alleged that the Defendants failed to comply with certain permitting requirements related to the placement of the HEEC-owned electric distribution cable beneath Boston Harbor. The action sought an order to compel HEEC to comply with cable depth requirements in the United States Army Corps of Engineers' permit or alternatively to remove the electric distribution cable and cease unauthorized work in U.S. waterways. The action also sought civil penalties and other costs.

After substantial negotiations, the parties reached a settlement whereby HEEC will install a new 115kV distribution cable across Boston Harbor to Deer Island, utilizing a different route, and will remove portions of the existing cable. Upon the installation and completion of the new cable and the removal of the portions of the existing cable, all issues surrounding the current permit from the United States Army Corps of Engineers are expected to be resolved, and such litigation is expected to be dismissed with prejudice.

In 2017, as a result of the settlement, NSTAR Electric expensed \$4.9 million (pre-tax) of previously incurred capitalized costs associated with engineering work performed on the existing cable that will no longer be used. In addition, NSTAR Electric agreed to provide a rate base credit of \$17.5 million to the Massachusetts Water Resources Authority for the new cable. This negotiated credit will result in the initial \$17.5 million of construction costs on the new cable to be expensed as incurred. Construction of the new cable is expected to be completed in 2019.

Massachusetts RFPs: On March 31, 2017, pursuant to a comprehensive energy law enacted in 2016, "An Act to Promote Energy Diversity," (the "Act") the Massachusetts EDCs, including NSTAR Electric and WMECO, and the DOER issued a joint RFP for 9.45 terawatt hours of clean energy per year, such as hydropower, land-based wind or solar. The RFP seeks proposals for long-term contracts of 15 to 20 years to provide the state's electric distribution companies with clean energy generation. The proposal submission due date was July 27, 2017. Contracts will be selected in January 2018, with an expectation to submit executed long-term contracts to the DPU for final approval in April 2018. On July 27, 2017, Eversource Energy Transmission Ventures, Inc. and HQ jointly submitted proposals for Northern Pass into the Massachusetts clean energy RFP. Northern Pass is expected to be placed in service in the second half of 2020.

On June 29, 2017, pursuant to the Act, the Massachusetts EDCs, including NSTAR Electric and WMECO, and the DOER issued a joint RFP for long-term contracts for offshore wind energy projects, seeking bids for a minimum of 400 MW of offshore wind capacity. The Offshore Wind Energy RFP states that bids of up to 800 MW would be considered, provided they demonstrate significant net economic benefits to customers. Bay State Wind submitted a Notice of Intent to Bid on July 26, 2017 and will submit a proposal by the December 20, 2017 due date.

NSTAR Electric and WMECO Rate Case: On January 17, 2017, NSTAR Electric and WMECO jointly filed an application (the "Joint Applicants") with the DPU for approval of a combined \$96 million increase in base distribution rates, effective January 1, 2018. As part of this filing, the Joint Applicants are presenting a grid-wise performance plan, including the implementation of a performance-based rate-making mechanism in conjunction with a grid modernization base commitment of \$400 million in incremental capital investment over a period of five years, commencing January 1, 2018. In addition, the Joint Applicants proposed to streamline and align rate classifications between NSTAR Electric and WMECO, and requested a revenue decoupling rate mechanism for NSTAR Electric.

WMECO has a revenue decoupling mechanism in place. The DPU will also be reviewing the proposed December 31, 2017 merger of NSTAR Electric and WMECO as part of the rate case. A final decision from the DPU is expected in late 2017, with new rates anticipated to be effective January 1, 2018.

New Hampshire:

Generation Divestiture: On June 10, 2015, Eversource and PSNH entered into the 2015 Public Service Company of New Hampshire Restructuring and Rate Stabilization Agreement (the "Agreement") with the New Hampshire Office of Energy and Planning, certain members of the NHPUC staff, the Office of Consumer Advocate, two State Senators, and several other parties. Under the terms of the Agreement, PSNH agreed to divest its generation assets, subject to NHPUC approval. The Agreement provided for a resolution of issues pertaining to PSNH's generation assets in pending regulatory proceedings before the NHPUC. The Agreement provided for the Clean Air Project prudence proceeding to be resolved and all remaining Clean Air Project costs to be included in rates effective January 1, 2016. As part of the Agreement, PSNH agreed to forego recovery of \$25 million of the equity return related to the Clean Air Project.

On July 1, 2016, the NHPUC approved the Agreement in an order that, among other things, instructed PSNH to begin the process of divesting its generation assets. The NHPUC selected an auction adviser to assist with the divestiture, and the final plan and auction process were approved by the NHPUC in November 2016.

On October 11, 2017, PSNH entered into two Purchase and Sale Agreements ("Agreements") to sell its thermal and hydroelectric generation assets to private investors at purchase prices of \$175 million and \$83 million, respectively, subject to adjustments as set forth in each Agreement.

On October 12, 2017, PSNH filed an application with the NHPUC requesting approval of the Agreements. We expect to receive approvals from the NHPUC and other necessary regulatory agencies by late December 2017 or early 2018, with the transactions to be completed shortly thereafter. Upon completion, full recovery of PSNH's generation assets will occur through a combination of cash flows during the remaining operating period, sales proceeds, and recovery of stranded costs via bonds that will be secured by a non-bypassable charge or through recoveries in future rates billed to PSNH's customers.

As of September 30, 2017, PSNH's energy service rate base balance was approximately \$594 million, and the carrying value of PSNH's total generation assets subject to divestiture was approximately \$767 million.

Legislative and Policy Matters

On August 11, 2017, Massachusetts issued final legislation, pursuant to Executive Order 569, which established volumetric limits on multiple greenhouse emission sources to ensure reductions are realized by deadlines established in the Massachusetts Global Warming Solutions Act enacted in 2008. Under this legislation, the initial target date for reduction in greenhouse gas emissions has been established in the year 2020. The legislation is not expected to have a material impact on the financial statements of Eversource, NSTAR Electric or WMECO.

Critical Accounting Policies

The preparation of financial statements in conformity with GAAP requires management to make estimates, assumptions and, at times, difficult, subjective or complex judgments. Changes in these estimates, assumptions and judgments, in and of themselves, could materially impact our financial position, results of operations or cash flows.

Our management communicates to and discusses with the Audit Committee of our Board of Trustees significant matters relating to critical accounting policies. Our critical accounting policies that we believed were the most critical in nature were reported in the Eversource 2016 Form 10-K. There have been no material changes with regard to these critical accounting policies.

Other Matters

Accounting Standards: For information regarding new accounting standards, see Note 1B, "Summary of Significant Accounting Policies –Accounting Standards," to the financial statements.

Contractual Obligations and Commercial Commitments: There have been no material contractual obligations identified and no material changes with regard to the contractual obligations and commercial commitments previously disclosed in the Eversource 2016 Form 10-K.

Web Site: Additional financial information is available through our website at www.eversource.com. We make available through our website a link to the SEC's EDGAR website (<http://www.sec.gov/edgar/searchedgar/companysearch.html>), at which site Eversource's, CL&P's, NSTAR Electric's, PSNH's and WMECO's combined Annual Reports on Form 10-K, combined Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports may be reviewed. Information contained on the Company's website or that can be accessed through the website is not incorporated into and does not constitute a part of this combined Quarterly Report on Form 10-Q.

RESULTS OF OPERATIONS – EVERSOURCE ENERGY AND SUBSIDIARIES

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for Eversource for the three and nine months ended September 30, 2017 and 2016 included in this combined Quarterly Report on Form 10-Q:

(Millions of Dollars)	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2017	2016	Increase/ (Decrease)	Percent	2017	2016	Increase/ (Decrease)	Percent
Operating Revenues	\$1,988.5	\$2,039.7	\$ (51.2)	(2.5)%	\$5,856.5	\$5,862.5	\$ (6.0)	(0.1)%
Operating Expenses:								
Purchased Power, Fuel and Transmission	651.8	665.8	(14.0)	(2.1)	1,955.1	2,001.9	(46.8)	(2.3)
Operations and Maintenance	300.4	324.7	(24.3)	(7.5)	933.4	965.6	(32.2)	(3.3)
Depreciation	194.5	181.3	13.2	7.3	571.2	531.8	39.4	7.4
Amortization of Regulatory Assets, Net	41.8	43.9	(2.1)	(4.8)	58.1	56.2	1.9	3.4

Three Months Ended:

Operating Revenues, which primarily consist of base electric and natural gas distribution revenues and tracked revenues further described below, decreased by \$51.2 million for the three months ended September 30, 2017, as compared to the same period in 2016.

Base electric and natural gas distribution revenues: Base electric distribution segment revenues, excluding LBR, decreased \$21.0 million for the three months ended September 30, 2017, as compared to the same period in 2016, due primarily to a decrease in sales volumes and lower demand revenues driven by the mild summer weather during the third quarter of 2017 at NSTAR Electric and PSNH. LBR increased \$1.5 million for the three months ended September 30, 2017, as compared to the same period in 2016.

Base natural gas distribution revenues remained relatively unchanged for the three months ended September 30, 2017, as compared to the same period in 2016.

Fluctuations in CL&P's, WMECO's and NSTAR Gas' sales volumes do not impact the level of base distribution revenue realized or earnings due to their respective regulatory commission approved revenue decoupling mechanisms. The revenue decoupling mechanisms permit recovery of a base amount of distribution revenues and break the relationship between sales volumes and revenues recognized. Revenue decoupling mechanisms result in the recovery of our approved base distribution revenue requirements.

Tracked distribution revenues: Tracked revenues consist of certain costs that are recovered from customers in rates through regulatory commission-approved cost tracking mechanisms and therefore, have no impact on earnings. Costs recovered through cost tracking mechanisms include energy supply procurement costs and other energy-related costs for our electric and natural gas customers, retail transmission charges, energy efficiency program costs, and restructuring and stranded cost recovery revenues. In addition, certain tracked revenues include incentives earned and carrying charges that are billed in rates to customers. Tracked natural gas distribution segment revenues increased as a result of an increase in natural gas supply costs (\$7.6 million) and an increase in energy efficiency program revenues (\$2.2 million). Tracked electric distribution revenues decreased as a result of a decrease in retail electric transmission charges (\$39.8 million), a decrease in stranded cost recovery revenues (\$16.9 million), a decrease in energy efficiency program revenues (\$13.9 million) and a decrease in pension rate adjustment mechanisms (\$7.1 million). Partially offsetting these decreases were increases in tracked electric distribution revenues related to electric energy supply costs (\$7.3 million), revenues related to renewable energy requirements (\$10.8 million), net metering revenues (\$7.0 million) and federally-mandated congestion charges (\$2.8 million).

Electric transmission revenues: The electric transmission segment revenues increased by \$21.7 million due primarily to the recovery of higher revenue requirements associated with ongoing investments in our transmission infrastructure.

Other: Other revenues decreased due primarily to the sale of Eversource's unregulated telecommunication business on December 31, 2016 (\$5.0 million).

Nine Months Ended:

Operating Revenues decreased by \$6.0 million for the nine months ended September 30, 2017, as compared to the same period in 2016.

Base electric and natural gas distribution revenues: Base electric distribution segment revenues, excluding LBR, decreased \$13.2 million for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to a decrease in sales volumes driven by the mild summer weather during the third quarter of 2017 at NSTAR Electric and PSNH. LBR increased \$10.6 million for the nine months ended September 30, 2017, as compared to the same period in 2016.

Base natural gas distribution revenues remained relatively unchanged for the nine months ended September 30, 2017, as compared to the same period in 2016. The impact of higher firm natural gas sales volumes was offset by lower demand revenues in Connecticut driven by lower peak usage in 2017, as compared to 2016.

Tracked distribution revenues: Tracked natural gas distribution segment revenues increased as a result of an increase in natural gas supply costs (\$57.8 million) and an increase in energy efficiency program revenues (\$17.1 million). Tracked electric distribution revenues decreased as a result of a decrease in electric energy supply costs (\$81.0 million), driven by decreased average retail prices and lower sales volumes, a decrease in retail electric transmission charges (\$45.9 million), a decrease in transition and stranded cost recovery revenues (\$33.1 million), a decrease in pension rate adjustment mechanisms (\$16.2 million), and a decrease in energy efficiency program revenues (\$8.8 million). Partially offsetting these decreases were increases in tracked electric distribution revenues related to federally-mandated congestion charges (\$23.0 million), net metering revenues (\$22.4 million) and revenues related to renewable energy requirements and the sale of PSNH's RECs (\$14.7 million).

Electric transmission revenues: The electric transmission segment revenues increased by \$77.5 million due primarily to the recovery of higher revenue requirements associated with ongoing investments in our transmission infrastructure.

Other: Other revenues decreased due primarily to the sale of Eversource's unregulated telecommunication business on December 31, 2016 (\$15.0 million).

Purchased Power, Fuel and Transmission expense includes costs associated with purchasing electricity and natural gas on behalf of our customers. These energy supply costs are recovered from customers in rates through cost tracking mechanisms, which have no impact on earnings (tracked costs). Total Purchased Power, Fuel and Transmission expense decreased for the three and nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to the following:

(Millions of Dollars)	Three Months	Nine Months
	Ended	Ended
	Increase/(Decrease)	Increase/(Decrease)
Electric Distribution	\$ (0.4)	\$ (109.1)
Natural Gas Distribution	7.0	50.1
Transmission	(20.6)	12.2
Total Purchased Power, Fuel and Transmission	\$ (14.0)	\$ (46.8)

The decrease in purchased power expense at the electric distribution business for the nine months ended September 30, 2017, as compared to the same period in 2016, was driven primarily by lower prices associated with the procurement of energy supply and lower sales volumes. The increase in purchased power expense at the natural gas distribution business for each of the periods presented was due to higher average natural gas prices and higher sales volumes. The decrease in transmission costs for the three months ended September 30, 2017, as compared to the same period in 2016, was primarily the result of a decrease in the retail transmission cost deferral, which reflects the actual costs of transmission service compared to estimated amounts billed to customers. The increase in transmission costs for the nine months ended September 30, 2017, as compared to the same period in 2016, was primarily the result of an increase in costs billed by ISO-NE that support regional grid investment, and Local Network Service charges, which reflect the cost of transmission service provided by Eversource over our local transmission network. This was partially offset by a decrease in the retail transmission cost deferral.

Operations and Maintenance expense includes tracked costs and costs that are part of base electric and natural gas distribution rates with changes impacting earnings (non-tracked costs). Operations and Maintenance expense decreased for the three and nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to the following:

(Millions of Dollars)	Three Months	Nine Months
	Ended	Ended
	Increase/(Decrease)	Increase/(Decrease)
Base Electric Distribution:		
Employee-related expenses, including labor and benefits	\$ (15.0)	\$ (46.2)
Bad debt expense	(2.6)	(15.3)
Shared corporate costs (including computer software depreciation at Eversource Service)	5.4	15.0
Storm restoration costs	(4.0)	3.1
Boston Harbor civil action settlement charge recorded in the second quarter of 2017	—	4.9
Other operations and maintenance	9.1	15.7
Total Base Electric Distribution	(7.1)	(22.8)
Total Base Natural Gas Distribution:		
Shared corporate costs (including computer software depreciation at Eversource Service)	1.2	3.6
Other operations and maintenance	(4.1)	(1.5)
Total Base Natural Gas Distribution	(2.9)	2.1
Total Tracked costs (Electric Distribution, Electric Transmission and Natural Gas Distribution)	(5.5)	7.2

Other and eliminations:

Eversource Parent and Other Companies	(1.1)	0.8	
Eliminations	(7.7)	(19.5)
Total Operations and Maintenance	\$ (24.3)	\$ (32.2)

Depreciation expense increased for the three and nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to higher utility plant in service balances.

Amortization of Regulatory Assets, Net expense includes the deferral of energy supply and energy-related costs included in certain regulatory-approved tracking mechanisms, and the amortization of certain costs. The deferral adjusts expense to match the corresponding revenues. Amortization of Regulatory Assets, Net, decreased for the three months ended September 30, 2017 and increased for the nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to the deferral of energy supply and energy-related costs, which can fluctuate from period to period based on the timing of costs incurred and the related rate changes to recover these costs. Energy supply and energy-related costs at CL&P, NSTAR Electric, PSNH and WMECO, which are the primary drivers in amortization, are recovered from customers in rates and have no impact on earnings.

Energy Efficiency Programs expense decreased for the three and nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to deferral adjustments at CL&P, NSTAR Electric and WMECO, partially offset by deferral adjustments at the natural gas businesses, which reflect the actual costs of energy efficiency programs compared to the estimated amounts billed to customers. The deferral adjusts costs incurred to match energy efficiency revenue billed to customers and the timing of the recovery of energy efficiency costs. The costs for various state policy initiatives are recovered from customers in rates and have no impact on earnings.

Interest Expense increased for the three and nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to higher interest on long-term debt (\$5.8 million and \$15.9 million, respectively) as a result of new debt issuances, and higher interest on short-term debt (\$2.4 million and \$4.8 million, respectively).

Other Income, Net increased for the three and nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to increased gains on investments (\$4.2 million and \$24.9 million, respectively), primarily related to Eversource's investment in a renewable energy fund, market value changes related to the deferred compensation plans (\$2.9 million and \$5.1 million, respectively) and higher AFUDC related to equity funds (\$1.2 million and \$5.0 million, respectively).

Income Tax Expense decreased for the three months ended September 30, 2017, as compared to the same period in 2016, due primarily to lower pre-tax earnings (\$2.4 million) and items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$1.2 million).

Income Tax Expense increased for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to higher pre-tax earnings (\$20.6 million), the absence of a tax credit in 2017 (\$2.4 million), and higher state taxes (\$1.3 million), partially offset by flow-through items and permanent differences (\$4.6 million).

RESULTS OF OPERATIONS – THE CONNECTICUT LIGHT AND POWER COMPANY

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for CL&P for the three and nine months ended September 30, 2017 and 2016 included in this combined Quarterly Report on Form 10-Q:

(Millions of Dollars)	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2017	2016	Increase/ (Decrease)	Percent	2017	2016	Increase/ (Decrease)	Percent
Operating Revenues	\$774.8	\$760.0	\$ 14.8	1.9 %	\$2,173.6	\$2,175.1	\$ (1.5)	(0.1)%
Operating Expenses:								
Purchased Power and Transmission Operations and Maintenance	259.0	253.5	5.5	2.2	711.2	760.6	(49.4)	(6.5)

(a) Percent greater than 100 not shown as it is not meaningful.

Operating Revenues

CL&P's retail sales volumes were as follows:

	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2017	2016	Decrease	Percent	2017	2016	Decrease	Percent
Retail Sales Volumes in GWh	5,644	6,225	(581)	(9.3)%	15,812	16,541	(729)	(4.4)%

Three Months Ended:

CL&P's Operating Revenues, which consist of base distribution revenues and tracked revenues further described below, increased by \$14.8 million for the three months ended September 30, 2017, as compared to the same period in 2016.

Fluctuations in CL&P's sales volumes do not impact the level of base distribution revenue realized or earnings due to the PURA-approved revenue decoupling mechanism. CL&P's revenue decoupling mechanism permits recovery of a base amount of distribution revenues (\$1.059 billion annually) and breaks the relationship between sales volumes and revenues recognized. The revenue decoupling mechanism results in the recovery of approved base distribution revenue requirements.

Fluctuations in the overall level of operating revenues are primarily related to tracked revenues. Tracked revenues consist of certain costs that are recovered from customers in rates through PURA-approved cost tracking mechanisms and therefore, have no impact on earnings. Costs recovered through cost tracking mechanisms include energy supply procurement and other energy-related costs, retail transmission charges, energy efficiency program costs and

restructuring and stranded cost recovery revenues. In addition, certain tracked revenues include incentives earned and carrying charges that are billed in rates to customers. Tracked distribution revenues increased primarily as a result of an increase in energy supply costs (\$27.1 million) driven by increased average retail prices. Partially offsetting this increase was a decrease in stranded cost recovery revenues (\$7.6 million) and a decrease in retail transmission charges (\$7.6 million).

Transmission revenues increased by \$6.3 million due primarily to the recovery of higher revenue requirements associated with ongoing investments in our transmission infrastructure.

Nine Months Ended:

CL&P's Operating Revenues decreased by \$1.5 million for the nine months ended September 30, 2017, as compared to the same period in 2016.

Tracked distribution revenues decreased primarily as a result of a decrease in energy supply costs (\$25.0 million) driven by decreased average retail prices and lower sales volumes. In addition, there was a \$17.8 million decrease in stranded cost recovery revenues. Partially offsetting these decreases was an increase in federally-mandated congestion charges (\$23.0 million).

Transmission revenues increased by \$27.2 million due primarily to higher revenue requirements associated with ongoing investments in our transmission infrastructure.

Purchased Power and Transmission expense includes costs associated with purchasing electricity on behalf of CL&P's customers. These energy supply costs are recovered from customers in rates through PURA-approved cost tracking mechanisms, which have no impact on earnings (tracked costs). Total Purchased Power and Transmission expense increased for the three months ended September 30, 2017, and decreased for the nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to the following:

(Millions of Dollars)	Three Months	Nine Months
	Ended	Ended
	Increase/(Decrease)	Increase/(Decrease)
Purchased Power Costs	\$ 5.7	\$ (68.1)
Transmission Costs	(0.2)	18.7
Total Purchased Power and Transmission	\$ 5.5	\$ (49.4)

Included in purchased power costs are the costs associated with CL&P's GSC, CTA and FMCC tracking mechanisms and deferred energy supply costs. The increase in purchased power costs for the three months ended September 30, 2017, as compared to the same period in 2016, was due primarily to GSC-related purchased power expenses. The GSC recovers energy-related costs incurred as a result of providing electric generation service supply to all customers who have not migrated to third party suppliers. The decrease in purchased power costs for the nine months ended September 30, 2017, as compared to the same period in 2016, was due primarily to a decrease in the price of standard offer supply also associated with the GSC, and lower sales volumes. The increase in transmission costs for the nine months ended September 30, 2017, as compared to the same period in 2016, was primarily the result of an increase in costs billed by ISO-NE that support regional grid investment, and Local Network Service charges, which reflect the cost of transmission service. This was partially offset by a decrease in the retail transmission cost deferral, which reflects the actual costs of transmission service compared to estimated amounts billed to customers.

Operations and Maintenance expense includes tracked costs and costs that are part of base distribution rates with changes impacting earnings (non-tracked costs). Operations and Maintenance expense increased for the three months ended September 30, 2017, as compared to the same period in 2016, driven by a \$0.4 million increase in non-tracked costs, which was primarily attributable to higher shared corporate costs, partially offset by lower employee-related expenses, lower storm restoration costs and lower vegetation management costs. The increase in non-tracked costs was partially offset by a \$0.3 million decrease in tracked costs, which was primarily attributable to lower tracked system resiliency, lower bad debt expense and lower employee-related costs, partially offset by higher transmission expenses.

Operations and Maintenance expense increased for the nine months ended September 30, 2017, as compared to the same period in 2016, driven by a \$6.5 million increase in tracked costs, which was primarily attributable to higher transmission expenses, partially offset by lower tracked bad debt expense. Non-tracked costs decreased \$3.0 million, which was primarily attributable to lower employee-related expenses, lower bad debt expense and lower vegetation management costs, partially offset by higher shared corporate costs, higher storm restoration costs, and higher system resiliency project costs.

Depreciation expense increased for the three and nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to higher utility plant in service balances.

Amortization of Regulatory Assets, Net expense includes the deferral of energy supply and energy-related costs and the amortization of certain costs, which are recovered from customers in rates and have no impact on earnings. The deferral adjusts expense to match the corresponding revenues. The increase for the three and nine months ended September 30, 2017, as compared to the same periods in 2016, was due primarily to the fluctuation of the deferral,

which can fluctuate from period to period based on the timing of costs incurred and related rate changes to recover these costs.

Energy Efficiency Programs expense decreased for the three and nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to the deferral adjustment, which reflects the actual cost of energy efficiency programs compared to the estimated amounts billed to customers and the timing of the recovery of energy efficiency costs. The deferral adjusts costs incurred to match energy efficiency revenue billed to customers. The costs for various state policy initiatives are recovered from customers in rates and have no impact on earnings.

Taxes Other Than Income Taxes expense decreased for the three and nine months ended September 30, 2017, as compared to the same periods in 2016, due primarily to a decrease in gross earnings taxes, partially offset by an increase in property taxes due to higher plant balances. Gross earnings taxes are tracked costs and have no impact on earnings.

Income Tax Expense decreased for the three months ended September 30, 2017, as compared to the same period in 2016, due primarily to the true-up of the return to provision impacts (\$4.7 million) and items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$1.5 million), partially offset by higher pre-tax earnings (\$1.7 million).

Income Tax Expense increased for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to higher pre-tax earnings (\$8.8 million) and higher state taxes (\$2.6 million), partially offset by the true-up of the return to provision impacts (\$4.7 million) and flow-through items and permanent differences (\$2.6 million).

EARNINGS SUMMARY

CL&P's earnings increased \$9.5 million for the three months ended September 30, 2017, as compared to the same period in 2016, due primarily to a lower effective tax rate, an increase in transmission earnings driven by a higher transmission rate base, and higher distribution revenues due in part to a higher rate base for the system resiliency program, partially offset by higher depreciation expense.

CL&P's earnings increased \$21.0 million for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to an increase in transmission earnings driven by a higher transmission rate base, higher distribution revenues due in part to a higher rate base for the system resiliency program, and lower non-tracked operations and maintenance expense. These favorable earnings impacts were partially offset by higher depreciation expense.

LIQUIDITY

Cash totaled \$9.4 million as of September 30, 2017, compared with \$6.6 million as of December 31, 2016.

CL&P had cash flows provided by operating activities of \$623.3 million for the nine months ended September 30, 2017, as compared to \$614.4 million in the same period of 2016. The increase in operating cash flows was due primarily to the favorable impact of the timing of regulatory recoveries and the timing of collections and payments of our working capital items, including accounts receivable and accounts payable. Partially offsetting these favorable impacts were the income tax payments of \$19.8 million made in 2017, compared to the income tax refunds of \$128.5 million received in 2016.

Eversource parent has a \$1.45 billion commercial paper program allowing Eversource parent to issue commercial paper as a form of short-term debt, with intercompany loans to certain subsidiaries, including CL&P. The weighted-average interest rate on the commercial paper borrowings as of September 30, 2017 and December 31, 2016 was 1.34 percent and 0.88 percent, respectively. There were no intercompany loans from Eversource parent to CL&P as of September 30, 2017. As of December 31, 2016, there were intercompany loans from Eversource parent to CL&P of \$80.1 million. Eversource parent, and certain of its subsidiaries, including CL&P, are parties to a five-year \$1.45 billion revolving credit facility. The revolving credit facility terminates on September 4, 2021. The revolving credit facility serves to backstop Eversource parent's \$1.45 billion commercial paper program. There were no borrowings outstanding on the revolving credit facility as of September 30, 2017 and December 31, 2016.

In August 2017, CL&P issued \$225 million of 4.30 percent 2014 Series A First and Refunding Mortgage Bonds due to mature in 2044. These bonds are part of the same series of CL&P's existing 4.30 percent bonds that were initially issued in 2014. The aggregate outstanding principal amount for these bonds is now \$475 million. The proceeds, net of issuance costs, were used to refinance short-term debt and fund capital expenditures and working capital.

In September 2017, CL&P repaid at maturity \$100 million of 5.75 percent 2007 Series C First Mortgage Bonds.

Investments in Property, Plant and Equipment on the statements of cash flows do not include amounts incurred on capital projects but not yet paid, cost of removal, AFUDC related to equity funds, and the capitalized portions of pension expense. CL&P's investments in property, plant and equipment totaled \$621.9 million for the nine months ended September 30, 2017.

RESULTS OF OPERATIONS – NSTAR ELECTRIC COMPANY AND SUBSIDIARY

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for NSTAR Electric for the nine months ended September 30, 2017 and 2016 included in this combined Quarterly Report on Form 10-Q:

(Millions of Dollars)	For the Nine Months Ended September 30,			
	2017	2016	Increase/ (Decrease)	Percent
Operating Revenues	\$1,913.5	\$1,986.0	\$ (72.5)	(3.7)%
Operating Expenses:				
Purchased Power and Transmission	689.8	764.9	(75.1)	(9.8)
Operations and Maintenance	266.2	279.9	(13.7)	(4.9)
Depreciation	167.6	159.2	8.4	5.3
Amortization of Regulatory Assets, Net	17.8	18.3	(0.5)	(2.7)
Energy Efficiency Programs	198.8	212.9	(14.1)	(6.6)
Taxes Other Than Income Taxes	99.0	101.8	(2.8)	(2.8)
Total Operating Expenses	1,439.2	1,537.0	(97.8)	(6.4)
Operating Income	474.3	449.0	25.3	5.6
Interest Expense	70.0	62.2	7.8	12.5
Other Income, Net	8.7	7.6	1.1	14.5
Income Before Income Tax Expense	413.0	394.4	18.6	4.7
Income Tax Expense	161.3	154.5	6.8	4.4
Net Income	\$251.7	\$239.9	\$ 11.8	4.9 %

Operating Revenues

NSTAR Electric's retail sales volumes were as follows:

	For the Nine Months Ended September 30,			
	2017	2016	Decrease	Percent
Retail Sales Volumes in GWh	15,204	15,746	(542)	(3.4)%

NSTAR Electric's Operating Revenues, which consist of base distribution revenues and tracked revenues further described below, decreased by \$72.5 million for the nine months ended September 30, 2017, as compared to the same period in 2016.

Base distribution revenues: Base distribution revenues, excluding LBR, decreased \$11.2 million for the nine months ended September 30, 2017, as compared to the same period in 2016, as a result of lower sales volumes in 2017, as compared to 2016 driven by the mild summer weather during the third quarter of 2017. LBR increased \$10.6 million for the nine months ended September 30, 2017, as compared to the same period in 2016.

Tracked revenues: Tracked revenues consist of certain costs that are recovered from customers in rates through DPU-approved cost tracking mechanisms and therefore, have no impact on earnings. Costs recovered through cost tracking mechanisms include energy supply procurement and other energy-related costs, retail transmission charges, energy efficiency program costs, net metering for distributed generation and transition cost recovery revenues. In addition, certain tracked revenues include incentives earned and carrying charges that are billed in rates to customers. Tracked distribution revenues decreased primarily as a result of a decrease in energy supply costs (\$44.1 million) driven by decreased average retail prices and lower sales volumes, a decrease in retail transmission charges (\$53.9

million), a decrease in the pension rate adjustment mechanism (\$14.7 million), and a decrease in transition cost recovery revenues (\$11.9 million). Partially offsetting these decreases were an increase in net metering revenues (\$20.2 million) and an increase in revenues related to renewable energy requirements (\$23.4 million).

Transmission revenues increased by \$20.6 million due primarily to the recovery of higher revenue requirements associated with ongoing investments in our transmission infrastructure.

Purchased Power and Transmission expense includes costs associated with purchasing electricity on behalf of NSTAR Electric's customers. These energy supply costs are recovered from customers in rates through DPU-approved cost tracking mechanisms, which have no impact on earnings (tracked costs). Total Purchased Power and Transmission expense decreased for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to the following:

(Millions of Dollars)	Decrease
Purchased Power Costs	\$ (42.3)
Transmission Costs	(32.8)
Total Purchased Power and Transmission	\$ (75.1)

Included in purchased power costs are the costs associated with NSTAR Electric's basic service charge and deferred energy supply costs. The basic service charge recovers energy-related costs incurred as a result of providing electric generation service supply to all customers who have not migrated to third party suppliers. The decrease in purchased power costs was due primarily to lower prices associated with the procurement of energy supply and lower sales volumes. The decrease in transmission costs was primarily the result of a decrease in the retail transmission cost deferral, which reflects the actual costs of transmission service compared to estimated amounts billed to customers.

Operations and Maintenance expense includes tracked costs and costs that are part of base distribution rates with changes impacting earnings (non-tracked costs). Operations and Maintenance expense decreased for the nine months ended September 30, 2017, as compared to the same period in 2016, driven by a \$13.0 million decrease in non-tracked costs, which was primarily attributable to lower employee-related expenses, lower bad debt expense and lower storm restoration costs, partially offset by higher shared corporate costs, a \$4.9 million charge recorded in the second quarter of 2017 related to the Boston Harbor civil action settlement, and higher vegetation management costs. Tracked costs decreased \$0.7 million, which was primarily attributable to lower tracked employee-related expenses, partially offset by higher transmission expenses and higher tracked bad debt expense.

Depreciation expense increased for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to higher utility plant in service balances.

Energy Efficiency Programs expense decreased for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to the deferral adjustment, which reflects the actual cost of energy efficiency programs compared to the estimated amounts billed to customers and the timing of the recovery of energy efficiency costs. The deferral adjusts costs incurred to match energy efficiency revenue billed to customers. The costs for various state policy initiatives are recovered from customers in rates and have no impact on earnings.

Taxes Other Than Income Taxes expense decreased for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to a decrease in property tax rates and lower employment-related taxes.

Interest Expense increased for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to new debt issuances.

Income Tax Expense increased for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to higher pre-tax earnings (\$6.9 million), partially offset by items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$0.1 million).

EARNINGS SUMMARY

NSTAR Electric's earnings increased \$11.8 million for the nine months ended September 30, 2017, as compared to the same period in 2016, due primarily to lower operations and maintenance expense and lower property tax expense, partially offset by lower sales volumes driven by the mild summer weather during the third quarter of 2017, and higher interest and depreciation expense.

LIQUIDITY

NSTAR Electric had cash flows provided by operating activities of \$413.0 million for the nine months ended September 30, 2017, as compared to \$564.3 million in the same period of 2016. The decrease in operating cash flows was due primarily to a decrease in regulatory recoveries, which were significantly impacted by the timing of collections of purchased power and transmission costs, an increase of \$56.3 million in Pension and PBOP Plan cash contributions, and the income tax payments of \$23.9 million made in 2017, compared to the income tax refunds of

\$28.1 million received in 2016. Partially offsetting these decreases was a favorable impact related to the timing of collections of accounts receivable.

NSTAR Electric has a \$450 million commercial paper program allowing NSTAR Electric to issue commercial paper as a form of short-term debt. As of September 30, 2017, NSTAR Electric had no short-term borrowings outstanding and as of December 31, 2016, NSTAR Electric had \$126.5 million in short-term borrowings outstanding under its commercial paper program, leaving \$450.0 million and \$323.5 million of available borrowing capacity as of September 30, 2017 and December 31, 2016, respectively. The weighted-average interest rate on these borrowings as of December 31, 2016 was 0.71 percent. NSTAR Electric is a party to a five-year \$450 million revolving credit facility. The revolving credit facility terminates on September 4, 2021. The revolving credit facility serves to backstop NSTAR Electric's \$450 million commercial paper program. There were no borrowings outstanding on the revolving credit facility as of September 30, 2017 and December 31, 2016.

RESULTS OF OPERATIONS – PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE AND SUBSIDIARY

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for PSNH for the nine months ended September 30, 2017 and 2016 included in this combined Quarterly Report on Form 10-Q:

(Millions of Dollars)	For the Nine Months Ended September 30,			
	2017	2016	Increase/ (Decrease)	Percent
Operating Revenues	\$733.6	\$727.8	\$ 5.8	0.8 %
Operating Expenses:				
Purchased Power, Fuel and Transmission	179.3	155.7	23.6	15.2
Operations and Maintenance	191.2	187.2	4.0	2.1
Depreciation	95.3	86.5	8.8	10.2
Amortization of Regulatory (Liabilities)/Assets, Net	(10.7)	14.5	(25.2)	(a)
Energy Efficiency Programs	11.0
