Form 10-Q
May 01, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10 – Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2013.

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES
EXCHANGE ACT OF 1934 For the transition period from _____ to _____.

Commission File Number 0-16587

Summit Financial Group, Inc.
(Exact name of registrant as specified in its charter)

West Virginia 55-0672148
(State or other jurisdiction (IRS Employer
of
incorporation or Identification No.)
organization)

300 North Main Street
Moorefield, West Virginia 26836
(Address of principal executive (Zip Code)
offices)

(304) 530-1000
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Sections 13 or 15(d) of the Securities and Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if

Edgar Filing: SUMMIT FINANCIAL GROUP INC - Form 10-Q

any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of “large accelerated filer”, “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer’s classes of Common Stock as of the latest practicable date.

Common Stock, \$2.50 par value
7,437,472 shares outstanding as of April 30, 2013

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

NOTE 1. BASIS OF PRESENTATION

We, Summit Financial Group, Inc. and subsidiaries, prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States of America for interim financial information and with instructions to Form 10-Q and Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for annual year end financial statements. In our opinion, all adjustments considered necessary for a fair presentation have been included and are of a normal recurring nature.

The presentation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

The results of operations for the quarter ended March 31, 2013 are not necessarily indicative of the results to be expected for the full year. The consolidated financial statements and notes included herein should be read in conjunction with our 2012 audited financial statements and Annual Report on Form 10-K. Certain accounts in the consolidated financial statements for December 31, 2012 and March 31, 2012, as previously presented, have been reclassified to conform to current year classifications.

NOTE 2. SIGNIFICANT NEW AUTHORITATIVE ACCOUNTING GUIDANCE

ASU No. 2013-02, Comprehensive Income (Topic 220) – Reporting Amounts Reclassified Out of Accumulated Other Comprehensive Income amended authoritative guidance related to the reporting of reclassifications out of other comprehensive earnings. The new guidance sets requirements for presentation for significant items reclassified to net earnings during the period presented. The new guidance was effective for annual and interim periods beginning on January 1, 2013 and did not have an effect on our financial statements.

NOTE 3. FAIR VALUE MEASUREMENTS

ASC Topic 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC Topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value.

Level 1: Quoted prices (unadjusted) or identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

10

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

Accordingly, securities available-for-sale are recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record other assets at fair value on a nonrecurring basis, such as loans held for sale, and impaired loans held for investment. These nonrecurring fair value adjustments typically involve application of lower of cost or market accounting or write-downs of individual assets.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value.

Available-for-Sale Securities: Investment securities available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities issued by government sponsored entities, municipal bonds and corporate debt securities.

Loans Held for Sale: Loans held for sale are carried at the lower of cost or market value. The fair value of loans held for sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, we classify loans subject to nonrecurring fair value adjustments as Level 2.

Loans: We do not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the original contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment in accordance with ASC Topic 310, Accounting by Creditors for Impairment of a Loan. The fair value of impaired loans is estimated using one of several methods, including collateral value, liquidation value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At March 31, 2013, substantially all of the total impaired loans were evaluated based on the fair value of the collateral. In accordance with ASC Topic 310, impaired loans where an allowance is established based on the fair value of collateral requires classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, we record the impaired loan as nonrecurring Level 2. When a current appraised value is not available and there is no observable market price, we record the impaired loan as nonrecurring Level 3.

When a collateral-dependent loan is identified as impaired, management immediately begins the process of evaluating the estimated fair value of the underlying collateral to determine if a related specific allowance for loan losses or charge-off is necessary. Current appraisals are ordered once a loan is deemed impaired if the existing appraisal is more than twelve months old, or more frequently if there is known deterioration in value. For recently identified impaired loans, a current appraisal may not be available at the financial statement date. Until the current appraisal is obtained, the original appraised value is discounted, as appropriate, to compensate for the estimated depreciation in the value of the loan's underlying collateral since the date of the original appraisal. Such discounts are generally estimated based upon management's knowledge of sales of similar collateral within the applicable market area and its knowledge of other real estate market-related data as well as general economic trends. When a new appraisal is received (which generally are received within 3 months of a loan being identified as impaired), management then re-evaluates the fair value of the collateral and adjusts any specific allocated allowance for loan losses, as appropriate. In addition, management also assigns a discount of 7–10% for the estimated costs to sell the collateral.

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

Other Real Estate Owned (“OREO”): OREO consists of real estate acquired in foreclosure or other settlement of loans. Such assets are carried on the balance sheet at the lower of the investment in the real estate or its fair value less estimated selling costs. The fair value of OREO is determined on a nonrecurring basis generally utilizing current appraisals performed by an independent, licensed appraiser applying an income or market value approach using observable market data (Level 2). Updated appraisals of OREO are generally obtained if the existing appraisal is more than 18 months old or more frequently if there is a known deterioration in value. However, if a current appraisal is not available, the original appraised value is discounted, as appropriate, to compensate for the estimated depreciation in the value of the real estate since the date of its original appraisal. Such discounts are generally estimated based upon management’s knowledge of sales of similar property within the applicable market area and its knowledge of other real estate market-related data as well as general economic trends (Level 3). Upon foreclosure, any fair value adjustment is charged against the allowance for loan losses. Subsequent fair value adjustments are recorded in the period incurred and included in other noninterest income in the consolidated statements of income.

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

There were no assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the period ended March 31, 2013.

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

We may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with U.S. generally accepted accounting principles. These include assets that are measured at the lower of cost or market that were recognized at fair value below cost at the end of the period. Assets measured at fair value on a nonrecurring basis are included in the table below.

Dollars in thousands	Total at March 31, 2013	Fair Value Measurements Using:		
		Level 1	Level 2	Level 3

ASC Topic 825, Financial Instruments, requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The following summarizes the methods and significant assumptions we used in estimating our fair value disclosures for financial instruments.

Cash and cash equivalents: The carrying values of cash and cash equivalents approximate their estimated fair value.

Interest bearing deposits with other banks: The carrying values of interest bearing deposits with other banks approximate their estimated fair values.

Federal funds sold: The carrying values of Federal funds sold approximate their estimated fair values.

Securities: Estimated fair values of securities are based on quoted market prices, where available. If quoted market prices are not available, estimated fair values are based on quoted market prices of comparable securities.

Loans held for sale: The carrying values of loans held for sale approximate their estimated fair values.

Loans: The estimated fair values for loans are computed based on scheduled future cash flows of principal and interest, discounted at interest rates currently offered for loans with similar terms to borrowers of similar credit quality. No prepayments of principal are assumed.

Accrued interest receivable and payable: The carrying values of accrued interest receivable and payable approximate their estimated fair values.

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

Deposits: The estimated fair values of demand deposits (i.e. non-interest bearing checking, NOW, money market and savings accounts) and other variable rate deposits approximate their carrying values. Fair values of fixed maturity deposits are estimated using a discounted cash flow methodology at rates currently offered for deposits with similar remaining maturities. Any intangible value of long-term relationships with depositors is not considered in estimating the fair values disclosed.

Short-term borrowings: The carrying values of short-term borrowings approximate their estimated fair values.

Long-term borrowings: The fair values of long-term borrowings are estimated by discounting scheduled future payments of principal and interest at current rates available on borrowings with similar terms.

Subordinated debentures: The carrying values of subordinated debentures approximate their estimated fair values.

Subordinated debentures owed to unconsolidated subsidiary trusts: The carrying values of subordinated debentures owed to unconsolidated subsidiary trusts approximate their estimated fair values.

Off-balance sheet instruments: The fair values of commitments to extend credit and standby letters of credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit standing of the counter parties. The amounts of fees currently charged on commitments and standby letters of credit are deemed insignificant, and therefore, the estimated fair values and carrying values are not shown below.

The carrying values and estimated fair values of our financial instruments are summarized below:

Equity securities	77	77
	\$ 275,522	\$ 283,054

The proceeds from sales, calls and maturities of available for sale securities, including principal payments received on mortgage-backed obligations, and the related gross gains and losses realized, for the three months ended March 31, 2013 are as follows:

Dollars in thousands	Sales	Proceeds from		Gross realized	
		Calls and Maturities	Principal Payments	Gains	Losses
Securities available for sale	\$ 11,893	\$ 808	\$ 15,712	\$ 141	\$ 99

During the three months ended March 31, 2013 and 2012, we recorded other-than-temporary impairment losses on residential mortgage-backed nongovernment sponsored entity securities as follows:

Dollars in thousands	Three Months Ended March 31,	
	2013	2012
Total other-than-temporary impairment losses	\$ (91)	\$ (511)
Portion of loss recognized in other comprehensive	37	282

income	
Net impairment losses recognized in earnings	\$ (54) \$ (229)

Activity related to the credit component recognized on debt securities available for sale for which a portion of other-than-temporary impairment was recognized in other comprehensive income for the three months ended March 31, 2013 is as follows:

	Three Months Ended March 31, 2013
Dollars in thousands	Total
Beginning Balance	\$ (2,903)
Additions for the credit component on debt securities in which other-than-temporary impairment was not previously recognized	(54)
Securities sold during the period	-
Ending Balance	\$ (2,957)

At March 31, 2013, our debt securities with other-than-temporary impairment in which only the amount of loss related to credit was recognized in earnings consisted solely of residential mortgage-backed securities issued by nongovernment-sponsored entities. We utilize third party vendors to estimate the portion of loss attributable to credit using a discounted cash flow models. The vendors estimate cash flows of the underlying collateral of each mortgage-backed security using models that incorporate their best estimates of current key assumptions, such as default rates, loss severity and prepayment rates. Assumptions utilized could vary widely from security to security, and are influenced by such factors as underlying loan interest rates, geographical location of underlying borrowers, collateral type and other borrower characteristics. Specific such assumptions utilized by our vendors in their valuation of our other-than-temporarily impaired residential mortgage-backed securities issued by nongovernment-sponsored entities were as follows at March 31, 2013:

	Weighted Average	Minimum	Range Maximum
Constant voluntary prepayment rates	14.0 %	14.0	% 14.0%
Constant default rates	5.6 %	5.6	% 5.6%
Loss severities	40.0 %	40.0	% 40.0%

Our vendors performing these valuations also analyze the structure of each mortgage-backed instrument in order to determine how the estimated cash flows of the underlying collateral will be distributed to each security issued from the structure. Expected principal and interest cash flows on the impaired debt securities are discounted predominantly using unobservable discount rates which the vendors assume that market participants would utilize in pricing the specific security. Based on the discounted expected cash flows derived from our vendor's models, we expect to recover the remaining unrealized losses on residential mortgage-backed securities issued by nongovernment sponsored entities.

Provided below is a summary of securities available for sale which were in an unrealized loss position at March 31, 2013 and December 31, 2012, including debt securities for which a portion of other-than-temporary impairment has been recognized in other comprehensive income.

We held 61 available for sale securities, including debt securities with other-than-temporary impairment in which a portion of the impairment remains in other comprehensive income, having an unrealized loss at March 31, 2013. We do not intend to sell these securities, and it is more likely than not that we will not be required to sell these securities before recovery of their amortized cost bases. We believe that this decline in value is primarily attributable to the lack of market liquidity and to changes in market interest rates and not due to credit quality. Accordingly, no additional other-than-temporary impairment charge to earnings is warranted at this time.

NOTE 6. LOANS

Loans are generally stated at the amount of unpaid principal, reduced by unearned discount and allowance for loan losses. Interest on loans is accrued daily on the outstanding balances. Loan origination fees and certain direct loan origination costs are deferred and amortized as adjustments of the related loan yield over its contractual life. We categorize residential real estate loans in excess of \$600,000 as jumbo loans.

Generally, loans are placed on nonaccrual status when principal or interest is greater than 90 days past due based upon the loan's contractual terms. Interest is accrued daily on impaired loans unless the loan is placed on nonaccrual status. Impaired loans are placed on nonaccrual status when the payments of principal and interest are in default for a period of 90 days, unless the loan is both well-secured and in the process of collection. Interest on nonaccrual loans is recognized primarily using the cost-recovery method. Loans may be returned to accrual status when repayment is reasonably assured and there has been demonstrated performance under the terms of the loan or, if applicable, the terms of the restructured loans.

Commercial-related loans or portions thereof (which are risk-rated) are charged off to the allowance for loan losses when the loss has been confirmed. This determination is made on a case by case basis considering many factors, including the prioritization of our claim in bankruptcy, expectations of the workout/restructuring of the loan and valuation of the borrower's equity. We deem a loss confirmed when a loan or a portion of a loan is classified "loss" in accordance with bank regulatory classification guidelines, which state, "Assets classified loss are considered uncollectible and of such little value that their continuance as bankable assets is not warranted".

20

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

Consumer-related loans are generally charged off to the allowance for loan losses upon reaching specified stages of delinquency, in accordance with the Federal Financial Institutions Examination Council policy. For example, credit card loans are charged off by the end of the month in which the account becomes 180 days past due or within 60 days from receiving notification about a specified event (e.g., bankruptcy of the borrower), which ever is earlier. Residential mortgage loans are generally charged off to net realizable value no later than when the account becomes 180 days past due. Other consumer loans, if collateralized, are generally charged off to net realizable value at 120 days past due.

Loans are summarized as follows:

	December		
Dollars in thousands	March 31, 2013	31, 2012	March 31, 2012

Impaired loans: Impaired loans include the following:

§ Loans which we risk-rate (consisting of loan relationships having aggregate balances in excess of \$2.0 million, or loans exceeding \$500,000 and exhibiting credit weakness) through our normal loan review procedures and which, based on current information and events, it is probable that we will be unable to collect all amounts due in accordance with the original contractual terms of the loan agreement. Risk-rated loans with insignificant delays or insignificant short falls in the amount of payments expected to be collected are not considered to be impaired.

§ Loans that have been modified in a troubled debt restructuring.

23

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

Both commercial and consumer loans are deemed impaired upon being contractually modified in a troubled debt restructuring. Troubled debt restructurings typically result from our loss mitigation activities and occur when we grant a concession to a borrower who is experiencing financial difficulty in order to minimize our economic loss and to avoid foreclosure or repossession of collateral. Once restructured in a troubled debt restructuring, a loan is generally considered impaired until its maturity, regardless of whether the borrower performs under the modified terms. Although such a loan may be returned to accrual status if the criteria set forth in our accounting policy are met, the loan would continue to be evaluated for an asset-specific allowance for loan losses and we would continue to report the loan in the impaired loan table below.

The table below sets forth information about our impaired loans.

A modification of a loan is considered a troubled debt restructuring (“TDR”) when a borrower is experiencing financial difficulty and the modification constitutes a concession that we would not otherwise consider. This may include a transfer of real estate or other assets from the borrower, a modification of loan terms, or a combination of both. A loan continues to qualify as a TDR until a consistent payment history or a significant change in the borrower’s financial condition and loan terms has occurred. Included in impaired loans are TDRs of \$52.5 million and \$56.7 million at March 31, 2013 and December 31, 2012, respectively, with no commitments to lend additional funds under these restructurings at either balance sheet date.

The following table presents by class the TDRs that were restructured during the three months ended March 31, 2013 and 2012. Generally, the modifications were extensions of term, modifying the payment terms from principal and interest to interest only for an extended period, or reduction in interest rate. All TDRs are evaluated individually for allowance for loan loss purposes.

We categorize loans into risk categories based on relevant information about the ability of borrowers to service their debt such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. We analyze loans individually by classifying the loans as to credit risk. We internally grade all commercial loans at the time of loan origination. In addition, we perform an annual loan review on all non-homogenous commercial loan relationships with an aggregate exposure of \$2 million, at which time these loans are re-graded. We use the following definitions for our risk grades:

Pass: Loans graded as Pass are loans to borrowers of acceptable credit quality and risk. They are higher quality loans that do not fit any of the other categories described below.

28

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

OLEM (Special Mention): Commercial loans categorized as OLEM are potentially weak. The credit risk may be relatively minor yet represent a risk given certain specific circumstances. If the potential weaknesses are not monitored or mitigated, the asset may weaken or inadequately protect our position in the future.

Substandard: Commercial loans categorized as Substandard are inadequately protected by the borrower's ability to repay, equity, and/or the collateral pledged to secure the loan. These loans have identified weaknesses that could hinder normal repayment or collection of the debt. These loans are characterized by the distinct possibility that we will sustain some loss if the identified weaknesses are not mitigated.

Doubtful: Commercial loans categorized as Doubtful have all the weaknesses inherent in those loans classified as Substandard, with the added elements that the full collection of the loan is improbable and the possibility of loss is high.

Loss: Loans classified as loss are considered to be non-collectible and of such little value that their continuance as a bankable asset is not warranted. This does not mean that the loan has absolutely no recovery value, but rather it is neither practical nor desirable to defer writing off the loan, even though partial recovery may be obtained in the future.

The following table presents the recorded investment in construction and development, commercial, and commercial real estate loans which are generally evaluated based upon the internal risk ratings defined above.

Loan commitments: ASC Topic 815, Derivatives and Hedging, requires that commitments to make mortgage loans should be accounted for as derivatives if the loans are to be held for sale, because the commitment represents a written option and accordingly is recorded at the fair value of the option liability.

NOTE 7. ALLOWANCE FOR LOAN LOSSES

An analysis of the allowance for loan losses for the three month periods ended March 30, 2013 and 2012, and for the year ended December 31, 2012 is as follows:

Net carrying amount	\$ -	\$ 1,850	\$ 1,850	\$ -	\$ 1,900	\$ 1,900

We recorded amortization expense of approximately \$88,000 for the three months ended March 31, 2013 relative to our other intangible assets. Annual amortization is expected to be approximately \$351,000 in 2013, \$251,000 in 2014,

and \$200,000 for each of the years ending 2015 through 2017.

NOTE 9. DEPOSITS

The following is a summary of interest bearing deposits by type as of March 31, 2013 and 2012 and December 31, 2012:

	March 31,	December	March 31,
Dollars in thousands	2013	31, 2012	2012
Demand deposits, interest bearing	\$ 181,326	\$ 175,706	\$ 172,506
Savings deposits	197,587	193,039	212,402
Time deposits	594,279	557,788	538,315
Total	\$ 973,192	\$ 926,533	\$ 923,223

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

Included in time deposits are deposits acquired through a third party (“brokered deposits”) totaling \$213.6 million, \$190.4 million and \$184.4 million at March 31, 2013, December 31, 2012, and March 31, 2012, respectively.

A summary of the scheduled maturities for all time deposits as of March 31, 2013 is as follows:

Dollars in thousands	
Nine month period ending December 31, 2013	\$ 192,481
Year ending December 31, 2014	120,908
Year ending December 31, 2015	60,050
Year ending December 31, 2016	86,619
Year ending December 31, 2017	34,561
Thereafter	99,660
	\$ 594,279

The following is a summary of the maturity distribution of all certificates of deposit in denominations of \$100,000 or more as of March 31, 2013:

Dollars in thousands	Amount	Percent
Three months or less	\$ 34,012	7.8%
	42,875	9.8%

Three through six months		
Six through twelve months	62,289	14.3%
Over twelve months	297,771	68.1%
Total	\$ 436,947	100.0%

NOTE 10. BORROWED FUNDS

Short-term borrowings: A summary of short-term borrowings is presented below:

	Three Months Ended March 31, 2013	
	Short-term FHLB Advances	Federal Funds Purchased and Lines of Credit
Dollars in thousands		
Balance at March 31	\$ -	\$ 5,960
Average balance outstanding for the period	24,321	3,514
Maximum balance outstanding at any month end during period	45,000	5,960
Weighted average interest rate for the period	0.25 %	0.25%
Weighted average interest rate for balances outstanding at March 31	0.25 %	0.25%

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

	Year Ended December 31, 2012	
	Short-term FHLB	Federal Funds Purchased and Lines
Dollars in thousands	Advances	of Credit
Balance at December 31	\$ 3,000	\$ 958
Average balance outstanding for the year	12,291	957
Maximum balance outstanding at any month end	20,000	958
Weighted average interest rate for the year	0.24 %	0.25%
Weighted average interest rate for balances outstanding at December 31	0.25 %	0.25%

	Three Months Ended March 31, 2012	
	Short-term FHLB	Federal Funds Purchased and Lines
Dollars in thousands	Advances	of Credit
Balance at March 31	\$ 15,000	\$ 956
Average balance outstanding for the period	13,379	956

Maximum balance outstanding at any month end during period	15,000	956	
Weighted average interest rate for the period	0.17	%	0.25%
Weighted average interest rate for balances outstanding at March 31	0.23	%	0.25%

Long-term borrowings: Our long-term borrowings of \$163.6 million, \$203.3 million and \$267.1 million at March 31, 2013, December 31, 2012, and March 31, 2012 respectively, consisted primarily of advances from the Federal Home Loan Bank (“FHLB”) and structured reverse repurchase agreements with two unaffiliated institutions. All FHLB advances are collateralized primarily by similar amounts of residential mortgage loans, certain commercial loans, mortgage backed securities and securities of U. S. Government agencies and corporations.

	Balance at March 31,		Balance at December 31,
Dollars in thousands	2013	2012	2012
Long-term FHLB advances	\$ 82,672	\$ 157,643	\$ 122,693
Long-term reverse repurchase agreements	72,000	100,000	72,000
Term loans	8,916	9,478	8,575
Total	\$ 163,588	\$ 267,121	\$ 203,268

The term loans are secured by the common stock of our subsidiary bank. \$5.4 million bears a variable interest rate of prime minus 50 basis points with a final maturity of 2017, and \$3.5 million bears a fixed rate of 8% with a final maturity of 2023.

Our long term FHLB borrowings and reverse repurchase agreements bear both fixed and variable rates and mature in varying amounts through the year 2019.

The average interest rate paid on long-term borrowings for the three month period ended March 31, 2013 was 3.82% compared to 3.97% for the first three months of 2012.

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

Subordinated debentures: We have subordinated debt totaling \$16.8 million at March 31, 2013, December 31, 2012, and March 31, 2012. The subordinated debt qualifies as Tier 2 capital under Federal Reserve Board guidelines until the debt is within 5 years of its maturity; thereafter the amount qualifying as Tier 2 capital is reduced by 20 percent each year until maturity. During 2009, we issued \$6.8 million in subordinated debt, of which \$5 million was issued to an affiliate of a director of Summit. We also issued \$1.0 million and \$0.8 million to two unrelated parties. These three issuances bear an interest rate of 10 percent per annum, a term of 10 years, and are not prepayable by us within the first five years. During 2008, we issued \$10 million of subordinated debt to an unrelated institution, which bears a variable interest rate of 1 month LIBOR plus 275 basis points and a term of 7.5 years.

Subordinated debentures owed to unconsolidated subsidiary trusts: We have three statutory business trusts that were formed for the purpose of issuing mandatorily redeemable securities (the “capital securities”) for which we are obligated to third party investors and investing the proceeds from the sale of the capital securities in our junior subordinated debentures (the “debentures”). The debentures held by the trusts are their sole assets. Our subordinated debentures totaled \$19.6 million at March 31, 2013, December 31, 2012, and March 31, 2012.

In October 2002, we sponsored SFG Capital Trust I, in March 2004, we sponsored SFG Capital Trust II, and in December 2005, we sponsored SFG Capital Trust III, of which 100% of the common equity of each trust is owned by us. SFG Capital Trust I issued \$3.5 million in capital securities and \$109,000 in common securities and invested the proceeds in \$3.61 million of debentures. SFG Capital Trust II issued \$7.5 million in capital securities and \$232,000 in common securities and invested the proceeds in \$7.73 million of debentures. SFG Capital Trust III issued \$8.0 million in capital securities and \$248,000 in common securities and invested the proceeds in \$8.25 million of debentures. Distributions on the capital securities issued by the trusts are payable quarterly at a variable interest rate equal to 3 month LIBOR plus 345 basis points for SFG Capital Trust I, 3 month LIBOR plus 280 basis points for SFG Capital Trust II, and 3 month LIBOR plus 145 basis points for SFG Capital Trust III, and equals the interest rate earned on the debentures held by the trusts, and is recorded as interest expense by us. The capital securities are subject to mandatory redemption in whole or in part, upon repayment of the debentures. We have entered into agreements which, taken collectively, fully and unconditionally guarantee the capital securities subject to the terms of the guarantee. The debentures of each Capital Trust are redeemable by us quarterly.

The capital securities held by SFG Capital Trust I, SFG Capital Trust II, and SFG Capital Trust III qualify as Tier 1 capital under Federal Reserve Board guidelines. In accordance with these Guidelines, trust preferred securities generally are limited to 25% of Tier 1 capital elements, net of goodwill. The amount of trust preferred securities and certain other elements in excess of the limit can be included in Tier 2 capital.

A summary of the maturities of all long-term borrowings and subordinated debentures for the next five years and thereafter is as follows:

Dollars in thousands	Long-term borrowings	Subordinated debentures owed to unconsolidated subsidiary trusts	
		Subordinated debentures	unconsolidated subsidiary trusts
Year Ending December 31,	2013	\$ 72	\$ -

2014	82,527	-	-
2015	1,909	10,000	-
2016	28,911	-	-
2017	918	-	-
Thereafter	49,251	6,800	19,589
	\$ 163,588	\$ 16,800	\$ 19,589

Summit Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (unaudited)

NOTE 11. STOCK OPTION PLAN

The 2009 Officer Stock Option Plan was adopted by our shareholders in May 2009 and provides for the granting of stock options for up to 350,000 shares of common stock to our key officers. Each option granted under the Plan vests according to a schedule designated at the grant date and has a term of no more than 10 years following the vesting date. Also, the option price per share was not to be less than the fair market value of our common stock on the date of grant. The 2009 Officer Stock Option Plan, which expires in May 2019, replaces the 1998 Officer Stock Option Plan (collectively the “Plans”) that expired in May 2008.

The fair value of our employee stock options granted is estimated at the date of grant using the Black-Scholes option-pricing model. This model requires the input of highly subjective assumptions, changes to which can materially affect the fair value estimate. Additionally, there may be other factors that would otherwise have a significant effect on the value of employee stock options granted but are not considered by the model. Because our employee stock options have characteristics significantly different from those of traded options and because changes in the subjective input assumptions can materially affect the fair value estimate, in management’s opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its employee stock options at the time of grant. There were no options granted during the first three months of 2013 or 2012.

We recognize compensation expense based on the estimated number of stock awards expected to actually vest, exclusive of the awards expected to be forfeited. During the first three months of 2013 and 2012, our stock compensation expense and related deferred taxes were insignificant.

A summary of activity in our Plans during the first three months of 2013 and 2012 is as follows:

	For the Three Months Ended March 31,			
	2013		2012	
	Options	Weighted-Average Exercise Price	Options	Weighted-Average Exercise Price
Outstanding, January 1	249,700	\$ 18.98	317,180	\$ 18.17
Granted	-	-	-	-
Exercised (12,000)		5.09	-	-
Forfeited (1,750)		19.69	-	-
Expired (38,900)		23.79	(22,800)	5.12
Outstanding, March 31	197,050	\$ 18.87	294,380	\$ 18.17

Other information regarding options outstanding and exercisable at March 31, 2013 is as follows:

Range of exercise price	# of shares	Options Outstanding			Options Exercisable		
		WAEP	Wted. Avg. Remaining Contractual Life (yrs)	Aggregate Intrinsic Value (in thousands)	# of shares	WAEP	Aggregate Intrinsic Value (in thousands)
2.54 - \$6.00	23,550	\$ 5.00	3.61	\$ 49	20,500	\$ 5.36	\$ 35
6.01 - 10.00	28,200	9.14	3.39	3	27,000	9.27	-
10.01 - 17.50	2,300	17.43	0.92	-	2,300	17.43	-
17.51 - 20.00	38,500	17.80	3.75	-	38,500	17.80	-
20.01 - 25.93	104,500	25.04	3.49	-	104,500	25.04	-
	197,050	18.87		\$ 52	192,800	19.20	\$ 35

NOTE 12. COMMITMENTS AND CONTINGENCIES

Off-Balance Sheet Arrangements

We are a party to certain financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of our customers. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the statement of financial position. The contract amounts of these instruments reflect the extent of involvement that we have in this class of financial instruments.

Many of our lending relationships contain both funded and unfunded elements. The funded portion is reflected on our balance sheet. The unfunded portion of these commitments is not recorded on our balance sheet until a draw is made under the loan facility. Since many of the commitments to extend credit may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements.

A summary of the total unfunded, or off-balance sheet, credit extension commitments follows:

March
31,
Dollars in
thousands 2013

Commitments to extend credit:	
Revolving home equity and credit card lines	\$ 47,857
Construction loans	17,339
Other loans	29,274
Standby letters of credit	1,830
Total	\$ 96,300

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. We evaluate each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if we deem necessary upon extension of credit, is based on our credit evaluation. Collateral held varies but may include accounts receivable, inventory, equipment or real estate.

Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party.

Our exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit is represented by the contractual amount of those instruments. We use the same credit policies in making commitments and conditional obligations as we do for on-balance sheet instruments.

NOTE 13. REGULATORY MATTERS

We and our subsidiaries are subject to various regulatory capital requirements administered by the banking regulatory agencies. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we and each of our subsidiaries must meet specific capital guidelines that involve quantitative measures of our and our subsidiaries' assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. We and each of our subsidiaries' capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require us and each of our subsidiaries to maintain minimum amounts and ratios of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier I capital (as defined) to average assets (as defined). We believe, as of March 31, 2013, that we and each of our subsidiaries met all capital adequacy requirements to which they were subject.

The most recent notifications from the banking regulatory agencies categorized us and each of our subsidiaries as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, we and each of our subsidiaries must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table below.

Our actual capital amounts and ratios as well as our subsidiary, Summit Community Bank's ("Summit Community") are presented in the following table.

Dollars in thousands	Actual		Minimum Required Regulatory Capital			To be Well Capitalized under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
As of March 31, 2013							
Total Capital (to risk weighted assets)							
Summit	\$ 140,323	14.1 %	\$ 79,576	8.0 %	\$ 99,470	10.0%

Summit	138,593	14.0 %	79,391	8.0 %	99,238	10.0%	
Summit Community	148,803	15.0 %	79,484	8.0 %	99,354	10.0%	
Tier I Capital (to risk weighted assets)							
Summit	115,221	11.6 %	39,695	4.0 %	59,543	6.0%	
Summit Community	136,231	13.7 %	39,742	4.0 %	59,613	6.0%	
Tier I Capital (to average assets)							
Summit	115,221	8.3 %	55,591	4.0 %	69,489	5.0%	
Summit Community	136,231	9.8 %	55,581	4.0 %	69,476	5.0%	

Summit Financial Group, Inc. (“Summit”) and its bank subsidiary, Summit Community Bank, Inc. (the “Bank”), have entered into informal Memoranda of Understanding (“MOU’s”) with their respective regulatory authorities. A memorandum of understanding is characterized by the regulatory authorities as an informal action that is not published or publicly available and that is used when circumstances warrant a milder form of action than a formal supervisory action, such as a formal written agreement or order.

Under the Summit MOU, Summit has agreed among other things to:

- § Summit suspending all cash dividends on its common stock until further notice. Dividends on all preferred stock, as well as interest payments on subordinated notes underlying Summit’s trust preferred securities, continue to be permissible; and,
- § Summit not incurring any additional debt, other than trade payables, without the prior written consent of the principal banking regulators.

Additional information regarding Summit’s MOU is included in Part I. Item 1A – Risk Factors on our Form 10-K for the year ended December 31, 2012.

On October 25, 2012, the Bank entered into a revised MOU (“Bank MOU”) which replaced the Bank MOU effective September 24, 2009 and subsequently amended on February 1, 2011. In general, the Bank MOU includes provisions substantially similar to those in the prior Bank MOU with the exception that several provisions deemed no longer applicable by the regulatory authorities were removed and a provision relative to reducing the Bank’s levels of classified assets was added.

In summary, we have agreed, among other things, to address the following matters relative to the Bank:

- § maintaining a Board committee which monitors and promotes compliance with the provisions of the Bank MOU;
- § providing the Bank's regulatory authorities with updated reports of criticized assets and/or formal workout plans for all nonperforming borrower relationships with an aggregate outstanding balance exceeding \$1 million;
- § developing and submitting to regulatory authorities a written plan to reduce the Bank's risk exposure in each adversely classified credit relationship in excess of \$1 million and all OREO;
- § establishing procedures to report all loans with balances exceeding \$500,000 that have credit weaknesses or that fall outside of the Bank's policy;
 - § annually reviewing the organizational structure and operations of the Bank's loan department;
 - § maintaining an adequate allowance for loan and lease losses through charges to current operating income;
- § reviewing overall liquidity objectives and developing and submitting to regulatory authorities plans and procedures aimed to improve liquidity and reduce reliance on volatile liabilities;
- § preparing comprehensive budgets and earnings forecasts for the Bank and submitting reports comparing actual performance to the budget plan;
- § maintaining a minimum Tier 1 Leverage Capital ratio of at least 8% and a Total Risk-based Capital ratio of at least 11%;
 - § not paying any cash dividends without the prior written consent of the banking regulators; and,
- § providing quarterly progress reports to the Bank's regulatory authorities detailing steps taken to comply with the Bank MOU.

NOTE 14. SEGMENT INFORMATION

We operate two business segments: community banking and insurance services. These segments are primarily identified by the products or services offered. The community banking segment consists of our full service banks which offer customers traditional banking products and services through various delivery channels. The insurance services segment consists of three insurance agency offices that sell insurance products. The accounting policies discussed throughout the notes to the consolidated financial statements apply to each of our business segments.

Intersegment revenue and expense consists of management fees allocated to the bank and Summit Insurance Services, LLC for all centralized functions that are performed by the parent, including overall direction in the areas of strategic planning, investment portfolio management, asset/liability management, financial reporting and other financial and administrative services. Information for each of our segments is included below:

Summit Financial Group, Inc. and Subsidiaries
 Management's Discussion and Analysis of Financial Condition and
 Results of Operations

INTRODUCTION

The following discussion and analysis focuses on significant changes in our financial condition and results of operations of Summit Financial Group, Inc. ("Company" or "Summit") and our operating segments, Summit Community Bank ("Summit Community"), and Summit Insurance Services, LLC for the periods indicated. See Note 14 of the accompanying consolidated financial statements for our segment information. This discussion and analysis should be read in conjunction with our 2012 audited financial statements and Annual Report on Form 10-K.

The Private Securities Litigation Act of 1995 indicates that the disclosure of forward-looking information is desirable for investors and encourages such disclosure by providing a safe harbor for forward-looking statements by us. Our following discussion and analysis of financial condition and results of operations contains certain forward-looking statements that involve risk and uncertainty. In order to comply with the terms of the safe harbor, we note that a variety of factors could cause our actual results and experience to differ materially from the anticipated results or other expectations expressed in those forward-looking statements.

OVERVIEW

Our primary source of income is net interest income from loans and deposits. Business volumes tend to be influenced by the overall economic factors including market interest rates, business spending, and consumer confidence, as well as competitive conditions within the marketplace.

Interest earning assets declined by 3.28% for the first three months in 2013 compared to the same period of 2012 while our net interest earnings on a tax equivalent basis decreased 2.99%. Our tax equivalent net interest margin increased 3 basis points. Historically high levels of nonaccrual loans continue to negatively impact our net interest earnings while our reduced cost of interest bearing funds continues to positively impact our net interest earnings.

BUSINESS SEGMENT RESULTS

We are organized and managed along two major business segments, as described in Note 14 of the accompanying consolidated financial statements. The results of each business segment are intended to reflect each segment as if it were a stand alone business. Net income by segment follows:

	Three Months Ended March 31,	
Dollars in thousands	2013	2012
Community banking	\$ 2,177	\$ 2,008
Insurance	46	102
Parent and other	(624)	(606)
Consolidated net income (loss)	\$ 1,599	\$ 1,504

CRITICAL ACCOUNTING POLICIES

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America and follow general practices within the financial services industry. Application of these principles requires us to make estimates, assumptions, and judgments that affect the amounts reported in our financial statements and accompanying notes. These estimates, assumptions, and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions, and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions, and judgments and as such have a greater possibility of producing results that could be materially different than originally reported.

42

Summit Financial Group, Inc. and Subsidiaries
Management's Discussion and Analysis of Financial Condition and
Results of Operations

Our most significant accounting policies are presented in the notes to the consolidated financial statements of our 2012 Annual Report on Form 10-K. These policies, along with the other disclosures presented in the financial statement notes and in this financial review, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined.

Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions, and estimates underlying those amounts, we have identified the determination of the allowance for loan losses, the valuation of goodwill, fair value measurements and deferred tax assets to be the accounting areas that require the most subjective or complex judgments, and as such could be most subject to revision as new information becomes available.

Allowance for Loan Losses: The allowance for loan losses represents our estimate of probable credit losses inherent in the loan portfolio. Determining the amount of the allowance for loan losses is considered a critical accounting estimate because it requires significant judgment and the use of estimates related to the amount and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan portfolio also represents the largest asset type on our consolidated balance sheet. To the extent actual outcomes differ from our estimates, additional provisions for loan losses may be required that would negatively impact earnings in future periods. Note 8 to the consolidated financial statements of our 2012 Annual Report on Form 10-K describes the methodology used to determine the allowance for loan losses and a discussion of the factors driving changes in the amount of the allowance for loan losses is included in the Asset Quality section of the financial review of the 2012 Annual Report on Form 10-K.

Goodwill: Goodwill is subject to an analysis by reporting unit at least annually to determine whether write-downs of the recorded balances are necessary. Initially, an assessment of qualitative factors (Step 0) is performed to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, we determine it is not more likely than not that the fair value of a reporting unit is less than its carrying value, then performing the two-step impairment test is unnecessary. However, if we conclude otherwise, then we are required to perform the first step (Step 1) of the two-step impairment test by calculating the fair value of the reporting unit and comparing the fair value with the carrying amount of the reporting unit. If the fair value is less than the carrying value, an expense may be required on our books to write down the goodwill to the proper carrying value. Step 2 of impairment testing, which is necessary only if the reporting unit does not pass Step 1, compares the implied fair value of the reporting unit goodwill with the carrying amount of the goodwill for the reporting unit. The implied fair value of goodwill is determined in the same manner as goodwill that is recognized in a business combination.

Community Banking – During third quarter 2012, we performed the Step 0 assessment of our goodwill of our community banking reporting unit and determined that it was not more likely than not that the fair value was less than its carrying value. Because we did not experience any significant adverse changes in our banking business or its reporting structure since our last 2-step impairment test at September 30, 2011, we performed the qualitative Step 0 assessments. In performing the qualitative Step 0 assessments, we considered certain events and circumstances such as macroeconomic conditions, industry and market considerations, overall financial performance and cost factors when evaluating whether it is more likely than not that the fair value is less than its carrying amount. No indicators of impairment were noted as of September 30, 2012.

Insurance Services – During third quarter 2012, we performed the Step 0 assessment of our goodwill of our insurance services reporting unit. We considered certain events and circumstances specific to the reporting unit, such as macroeconomic conditions, industry and market considerations, overall financial performance and cost factors when evaluating whether it is more likely than not that the fair value of our insurance services reporting unit is less than its carrying value and deemed it necessary to perform the further 2-step impairment test. We performed an internal valuation utilizing the income approach to determine the fair value of our insurance services reporting unit. This methodology consisted of discounting the expected future cash flows of this unit based upon a forecast of its operations considering long-term key business drivers such as anticipated commission revenue growth. The long term growth rate used in determining the terminal value was estimated at 2%, and a discount rate of 10.5% was applied to the insurance services unit's estimated future cash flows. We did not fail this Step 1 test as of September 30, 2012, therefore Step 2 testing was not necessary.

We cannot assure you that future goodwill impairment tests will not result in a charge to earnings. See Note 11 of the consolidated financial statements of our 2012 Annual Report on Form 10-K for further discussion of our intangible assets, which include goodwill.

Fair Value Measurements: ASC Topic 820 Fair Value Measurements and Disclosures provides a definition of fair value, establishes a framework for measuring fair value, and requires expanded disclosures about fair value measurements. Fair value is the price that could be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Based on the observability of the inputs used in the valuation techniques, we classify our financial assets and liabilities measured and disclosed at fair value in accordance with the three-level hierarchy (e.g., Level 1, Level 2 and Level 3) established under ASC Topic 820. Fair value determination in accordance with this guidance requires that we make a number of significant judgments. In determining the fair value of financial instruments, we use market prices of the same or similar instruments whenever such prices are available. We do not use prices involving distressed sellers in determining fair value. If observable market prices are unavailable or impracticable to obtain, then fair value is estimated using modeling techniques such as discounted cash flow analyses. These modeling techniques incorporate our assessments regarding assumptions that market participants would use in pricing the asset or the liability, including assumptions about the risks inherent in a particular valuation technique and the risk of nonperformance.

Fair value is used on a recurring basis for certain assets and liabilities in which fair value is the primary basis of accounting. Additionally, fair value is used on a non-recurring basis to evaluate assets or liabilities for impairment or for disclosure purposes in accordance with ASC Topic 825 Financial Instruments.

Results of Operations

Deferred Income Tax Assets: At March 31, 2013, we had net deferred tax assets of \$11.7 million. Based on our ability to offset the net deferred tax asset against taxable income in carryback years and expected future taxable income in carryforward years, there was no impairment of the deferred tax asset at March 31, 2013. All available evidence, both positive and negative, was considered to determine whether, based on the weight of that evidence, impairment should be recognized. However, our forecast process includes judgmental and quantitative elements that may be subject to significant change. If our forecast of taxable income within the carryback/carryforward periods available under applicable law is not sufficient to cover the amount of net deferred tax assets, such assets may become impaired.

RESULTS OF OPERATIONS

Earnings Summary

Net income applicable to common shares for the three months ended March 31, 2013 increased to \$1.60 million, or \$0.19 per diluted share as compared to \$1.50 million or \$0.18 per diluted share for the same period of 2012. Earnings for the three months ended March 31, 2013 were positively impacted by lower provisions for loan losses and lower other-than-temporary impairment of securities, and negatively impacted by continued write-downs of foreclosed properties to their estimated fair values. The provision for loan losses was \$1.5 million and \$2.0 million for the three months ended March 31, 2013 and 2012, respectively. Included in earnings for the three months ended March 31, 2013 was \$42,000 in realized securities gains, \$929,000 of charges resulting from the write down of a portion of our foreclosed properties to fair value and \$54,000 in other than temporary impairment charges on securities. Returns on average equity and assets for the first three months of 2013 were 6.55% and 0.52%, respectively, compared with 6.49% and 0.47% for the same period of 2012.

Net Interest Income

Net interest income is the principal component of our earnings and represents the difference between interest and fee income generated from earning assets and the interest expense paid on deposits and borrowed funds. Fluctuations in interest rates as well as changes in the volume and mix of earning assets and interest bearing liabilities can materially impact net interest income.

Our net interest income on a fully tax-equivalent basis totaled \$10.1 million for the three months ended March 31, 2013 compared to \$10.4 million for the same period of 2012, representing a decrease of \$312,000 or 2.99%. While our tax-equivalent earnings on interest earning assets decreased, this decrease was partially offset by a reduction in the volume of interest bearing liabilities and a reduction in the cost of interest bearing liabilities (see Table II). Average interest earning assets decreased 3.28% from \$1.31 billion during the first three months of 2012 to \$1.27 billion for the first three months of 2013. Average interest bearing liabilities declined 4.84% from \$1.24 billion at March 31, 2012 to \$1.18 billion at March 31, 2013, at an average yield for the first three months of 2013 of 1.65% compared to 2.20% for the same period of 2012.

Our consolidated net interest margin increased to 3.23% for the three months ended March 31 2013, compared to 3.20% for the same period in 2012. The margin continues to be affected by elevated levels of nonaccruing loans. The present continued low interest rate environment has served to positively impact our net interest margin due to our liability sensitive balance sheet. For the three months ended

Summit Financial Group, Inc. and Subsidiaries
Management's Discussion and Analysis of Financial Condition and
Results of Operations

March 31, 2013 compared to March 31, 2012, the yields on earning assets decreased 50 basis points, while the cost of our interest bearing funds decreased by 55 basis points.

Assuming no significant change in market interest rates, we anticipate a relatively stable net interest margin in the near term as we do not expect interest rates to rise in the near future, we do not expect significant growth in our interest earning assets, nor do we expect our nonperforming asset balances to decline significantly in the near future. We continue to monitor the net interest margin through net interest income simulation to minimize the potential for any significant negative impact. See the “Market Risk Management” section for further discussion of the impact changes in market interest rates could have on us. Further analysis of our yields on interest earning assets and interest bearing liabilities are presented in Tables I and II below.

Net interest earnings		\$ 10,120		\$ 10,432
Net yield on interest earning assets		3.23	%	3.20%

(1) - For purposes of this table, nonaccrual loans are included in average loan balances.

(2) - Interest income on tax-exempt securities and loans has been adjusted assuming an effective tax rate of 34% for all periods presented.

The tax equivalent adjustment resulted in an increase in interest income of \$362,000 and \$414,000 for the periods ended

March 31, 2013
and March 31 2012,
respectively.

Table II - Changes in Interest Margin Attributable to Rate and Volume

Total interest paid on interest bearing liabilities	(838)	(1,130)	(1,968)
Net interest income	\$ 576	\$ (888)	\$ (312)

Noninterest Income

Total noninterest income increased to \$1.78 million for the first three months of 2013, compared to \$1.70 million for the same period of 2012, with writedowns of foreclosed properties to their estimated fair value being the primary negative component. Further detail regarding noninterest income is reflected in the following table.

Table III -
Noninterest Income

Dollars in thousands	For the Quarter Ended March 31,	
	2013	2012
Insurance commissions	\$ 1,184	\$ 1,158
Service fees related to deposit accounts	1,012	1,014
Realized securities gains (losses)	42	1,165
Other-than-temporary impairment of securities	(54)	(229)
Gain (loss) on sale of assets	(40)	(77)
Bank owned life insurance income	238	275
Writedown of foreclosed properties	(929)	(1,912)
Other	326	309
Total	\$ 1,779	\$ 1,703

Other-than-temporary impairment of securities: During the first three months of 2013, we recorded non-cash other-than temporary impairment charges of \$54,000 related to certain residential mortgage-backed securities which we continue to own.

Writedown of foreclosed properties: During the first three months of 2013, we recorded \$929,000 in charges to writedown certain OREO properties to fair value less estimated costs to sell as part of our normal, ongoing re-appraisal process. Continued volatility in the real estate markets could result in further writedowns of these properties in the foreseeable future.

Noninterest Expense

Total noninterest expense increased less than 1% for the three months ended March 31, 2013, as compared to the same period in 2012. Salaries, commissions, and employee benefits increased during the first three months of 2013 compared to the first three months of 2012 primarily as a result of general merit raises. Professional fees, including legal expenses related to complex collection issues relative to our problem assets, and foreclosed properties expense have both decreased due to our lower volume of problem assets and foreclosed properties. Table IV below shows the breakdown of the changes.

Table IV -
Noninterest
Expense

Dollars in thousands	For the Quarter Ended March 31,				2012
	2013	\$	%	Change	
Salaries, commissions, and employee benefits	\$ 4,117	\$ 216	5.5 %		\$ 3,901
Net occupancy expense	456	(23)	-4.8 %		479
Equipment expense	598	4	0.7 %		594
Professional fees	251	(65)	-20.6 %		316
Amortization of intangibles	88	-	0.0 %		88
FDIC premiums	540	18	3.4 %		522
Foreclosed properties expense	279	(83)	-22.9 %		362
Other	1,264	(13)	-1.0 %		1,277
Total	\$ 7,593	\$ 54	0.7 %		\$ 7,539

Credit Experience

While recent economic data points to a stabilizing real estate market, general economic conditions remain weak when compared to pre-2008 levels. As a result, we continue to experience elevated levels of loan delinquencies and nonperforming assets. Although Management anticipates loan delinquencies and nonperforming assets will remain higher than pre-recession levels, we do expect recent trends of improvement to continue.

The provision for loan losses represents charges to earnings necessary to maintain an adequate allowance for probable credit losses inherent in the loan portfolio. Our determination of the appropriate level of the allowance is based on an ongoing analysis of credit quality and loss potential in the loan portfolio, change in the composition and risk characteristics of the loan portfolio, and the anticipated

49

Summit Financial Group, Inc. and Subsidiaries
Management's Discussion and Analysis of Financial Condition and
Results of Operations

influence of national and local economic conditions. The adequacy of the allowance for loan losses is reviewed quarterly and adjustments are made as considered necessary.

We recorded \$1.5 million and \$2.0 million provisions for loan losses for the first three months of 2013 and 2012, respectively. This decline is a result of lower levels of specific reserves, based upon the fair value of collateral method in measuring impairment, necessary on newly identified impaired loans at March 31, 2013 compared to March 31, 2012.

As illustrated in Table V below, our non-performing assets have decreased during the past 12 months.

Table V -
Summary of
Non-Performing
Assets

Dollars in thousands	2013	March 31, 2012	December 31, 2012
Accruing loans past due 90 days or more	\$ -	\$ -	\$ -
Nonaccrual loans			
Commercial	4,763	2,477	5,002
Commercial real estate	1,525	4,282	2,556

Southcentral WV	UCC Business Assets & Residential Subdivision	Feb. 2003, Mar. 2008 & Apr. 2008	May 2011 & Jul. 2011	\$1,220	Collateral value	\$1,594	(2)	\$36	\$-

(1) - Values are based upon recent external appraisal.

(2) - Value is based upon current appraisal on the real estate and most recent estimate on business assets.

Refer to Note 6 of the accompanying consolidated financial statements for information regarding our past due loans, impaired loans, nonaccrual loans, and troubled debt restructurings.

We maintain the allowance for loan losses at a level considered adequate to provide for estimated probable credit losses inherent in the loan portfolio. The allowance is comprised of three distinct reserve components: (1) specific reserves related to loans individually evaluated, (2) quantitative reserves related to loans collectively evaluated, and (3) qualitative reserves related to loans collectively evaluated. A summary of the methodology we employ on a quarterly basis with respect to each of these components in order to evaluate the overall adequacy of our allowance for loan losses is as follows:

51

Summit Financial Group, Inc. and Subsidiaries
Management's Discussion and Analysis of Financial Condition and
Results of Operations

Specific Reserve for Loans Individually Evaluated

First, we identify loan relationships having aggregate balances in excess of \$500,000 and that may also have credit weaknesses. Such loan relationships are identified primarily through our analysis of internal loan evaluations, past due loan reports, and loans adversely classified by regulatory authorities. Each loan so identified is then individually evaluated to determine whether it is impaired – that is, based on current information and events, it is probable that we will be unable to collect all amounts due in accordance with the contractual terms of the underlying loan agreement. Substantially all of our impaired loans are and historically have been collateral dependent, meaning repayment of the loan is expected to be provided solely from the sale of the loan's underlying collateral. For such loans, we measure impairment based on the fair value of the loan's collateral, which is generally determined utilizing current appraisals. A specific reserve is established in an amount equal to the excess, if any, of the recorded investment in each impaired loan over the fair value of its underlying collateral, less estimated costs to sell. Our policy is to re-evaluate the fair value of collateral dependent loans at least every twelve months unless there is a known deterioration in the collateral's value, in which case a new appraisal is obtained.

Quantitative Reserve for Loans Collectively Evaluated

Second, we stratify the loan portfolio into the following ten loan pools: land and land development, construction, commercial, commercial real estate -- owner-occupied, commercial real estate -- non-owner occupied, conventional residential mortgage, jumbo residential mortgage, home equity, consumer, and other. Loans within each pool are then further segmented between (1) loans which were individually evaluated for impairment and not deemed to be impaired, (2) larger-balance loan relationships exceeding \$2 million which are assigned an internal risk rating in conjunction with our normal ongoing loan review procedures and (3) smaller-balance homogenous loans.

Quantitative reserves relative to each loan pool are established as follows: for all loan segments detailed above an allocation equaling 100% of the respective pool's average 12 month historical net loan charge-off rate (determined based upon the most recent twelve quarters) is applied to the aggregate recorded investment in the pool of loans.

Qualitative Reserve for Loans Collectively Evaluated

Third, we consider the necessity to adjust our average historical net loan charge-off rates relative to each of the above ten loan pools for potential risk factors that could result in actual losses deviating from prior loss experience. For example, if we observe a significant increase in delinquencies within the conventional mortgage loan pool above historical trends, an additional allocation to the average historical loan charge-off rate is applied. Such qualitative risk factors considered are: (1) levels of and trends in delinquencies and impaired loans, (2) levels of and trends in charge-offs and recoveries, (3) trends in volume and term of loans, (4) effects of any changes in risk selection and underwriting standards, and other changes in lending policies, procedures, and practice, (5) experience, ability, and depth of lending management and other relevant staff, (6) national and local economic trends and conditions, (7) industry conditions, and (8) effects of changes in credit concentrations.

Relationship between Allowance for Loan Losses, Net Charge-offs and Nonperforming Loans

In analyzing the relationship between the allowance for loan losses, net loan charge-offs and nonperforming loans, it is helpful to understand the process of how loans are treated as they deteriorate over time. Reserves for loans are established at origination through the quantitative and qualitative reserve process discussed above.

Charge-offs, if necessary, are typically recognized in a period after the reserves were established. If the previously established reserves exceed that needed to satisfactorily resolve the problem credit, a reduction in the overall level of the reserve could be recognized. In summary, if loan quality deteriorates, the typical credit sequence is periods of reserve building, followed by periods of higher net charge-offs.

Consumer loans are generally charged off to the allowance for loan losses upon reaching specified stages of delinquency, in accordance with the Federal Financial Institutions Examination Council policy. For example, credit card loans are charged off by the end of the month in which the account becomes 180 days past due or within 60 days from receiving notification about a specified event (e.g., bankruptcy of the borrower), whichever is earlier. Residential mortgage loans are generally charged off to net realizable value no later than when the account becomes 180 days past due. Other consumer loans, if collateralized, are generally charged off to net realizable value at 120 days past due.

Commercial-related loans (which are risk-rated) are charged off to the allowance for loan losses when the loss has been confirmed. This determination includes many factors, including the prioritization of our claim in bankruptcy, expectations of the workout/restructuring of the loan and valuation of the borrower's equity.

Substantially all of our nonperforming loans are secured by real estate. The majority of these loans were underwritten in accordance with our loan-to-value policy guidelines which range from 70-85% at the time of origination. The fair values of the underlying collateral value remains in excess of the recorded investment in many of our nonperforming loans, and therefore, no specific reserve allocation is required; as of March 31, 2013, approximately 58% of our impaired loans required no reserves or have been charged down to their fair value.

At March 31, 2013, December 31, 2012, and March 31, 2012, our allowance for loan losses totaled \$17.0 million, or 1.77% of total loans, \$17.9 million, or 1.88% of total loans and \$18.5 million, or 1.89% of total loans, respectively, and is considered adequate to cover our estimate of probable credit losses inherent in our loan portfolio.

At March 31, 2013, December 31, 2012, and March 31, 2012, we had approximately \$54.6 million, \$56.2 million and \$61.6 million, respectively, in other real estate owned which was obtained as the result of foreclosure proceedings. Although foreclosed property is recorded at fair value less estimated costs to sell, the prices ultimately realized upon their sale may or may not result in us recognizing loss.

FINANCIAL CONDITION

Our total assets were \$1.390 billion at March 31, 2013, compared to \$1.387 billion at December 31, 2012, representing a 0.22% increase. Table VIII below serves to illustrate significant changes in our financial position between December 31, 2012 and March 31, 2013.

Table VIII - Summary of Significant Changes in Financial Position

Dollars in thousands	Balance	Increase (Decrease)		Balance
	December 31, 2012	Amount	Percentage	March 31, 2013
Assets				
Securities available for sale	\$281,539	1,515	0.5	% \$283,054
Loans, net of unearned interest	937,168	8,573	0.9	% 945,741
Liabilities				
Deposits	\$1,027,125	\$39,192	3.8	% \$1,066,317
Short-term borrowings	3,958	2,002	50.6	% 5,960
Long-term borrowings	203,268	(39,680)	-19.5	% 163,588
Subordinated debentures	16,800	-	0.0	% 16,800
Subordinated debentures owed to unconsolidated subsidiary trusts	19,589	-	0.0	% 19,589

Loans and securities increased slightly during the first three months of 2013. We have slowed our loan growth due to the current weakened economic conditions in our market areas and limited availability of new capital resources.

Deposits increased approximately \$39.2 million during the first three months of 2013; brokered deposits increased approximately \$23.2 million.

The decrease in long term borrowings is primarily attributable to maturities and repayments of long-term FHLB advances during the first three months of 2013.

Refer to Notes 5, 6, 9, and 10 of the notes to the accompanying consolidated financial statements for additional information with regard to changes in the composition of our securities, loans, deposits and borrowings between March 31, 2013 and December 31, 2012.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity reflects our ability to ensure the availability of adequate funds to meet loan commitments and deposit withdrawals, as well as provide for other transactional requirements. Liquidity is provided primarily by funds invested in cash and due from banks (net of float and reserves), Federal funds sold, non-pledged securities, and available lines of credit with the Federal Home Loan Bank of Pittsburgh (“FHLB”) and Federal Reserve Bank of Richmond, which totaled approximately \$488 million or 35.1% of total consolidated assets at March 31, 2013.

Our liquidity strategy is to fund loan growth with deposits and other borrowed funds while maintaining an adequate level of short- and medium-term investments to meet normal daily loan and deposit

54

Summit Financial Group, Inc. and Subsidiaries
Management’s Discussion and Analysis of Financial Condition and
Results of Operations

activity. As a member of the FHLB, we have access to approximately \$335 million. As of March 31, 2013 and December 31, 2012, these advances totaled approximately \$83 million and \$126 million, respectively. At March 31, 2013, we had additional borrowing capacity of \$252 million through FHLB programs. We have established a line with the Federal Reserve Bank to be used as a contingency liquidity vehicle. The amount available on this line at March 31, 2013 was approximately \$82 million, which is secured by a pledge of our consumer and commercial and industrial loan portfolios. We have a \$6 million unsecured line of credit with a correspondent bank. Also, we classify all of our securities as available for sale to enable us to liquidate them if the need arises.

Liquidity risk represents the risk of loss due to the possibility that funds may not be available to satisfy current or future commitments based on external market issues, customer or creditor perception of financial strength, and events unrelated to Summit such as war, terrorism, or financial institution market specific issues. The Asset/Liability Management Committee (“ALCO”), comprised of members of senior management and certain members of the Board of Directors, oversees our liquidity risk management process. The ALCO develops and recommends policies and limits governing our liquidity to the Board of Directors for approval with the objective of ensuring that we can obtain cost-effective funding to meet current and future obligations, as well as maintain sufficient levels of on-hand liquidity, under both normal and “stressed” circumstances.

One aspect of our liquidity management process is establishing contingency liquidity funding plans under various scenarios in order to prepare for unexpected liquidity shortages or events. The following represents three “stressed” liquidity circumstances and our related contingency plans with respect to each.

Scenario 1 – Summit Community’s capital status becomes less than “well capitalized”. Banks which are less than “well capitalized” in accordance with regulatory capital guidelines are prohibited from issuing new brokered deposits without first obtaining a waiver from the FDIC to do so. In the event Summit Community’s capital status were to fall below well capitalized and was not successful in obtaining the FDIC’s waiver to issue new brokered deposits, Summit Community:

- Would have limited amounts of maturing brokered deposits to replace in the short-term, as we have limited our brokered deposits maturing in any one quarter to no more than \$50 million.
- Presently has \$488 million in available sources of liquid funds which could be drawn upon to fund maturing brokered deposits until Summit Community had restored its capital to well capitalized status.
- Would first seek to restore its capital to well capitalized status through capital contributions from Summit, its parent holding company.
- Would generally have no more than \$100 million in brokered deposits maturing in any one year time frame, which is well within its presently available sources of liquid funds, if in the event Summit does not have the capital resources to restore Summit Community’s capital to well capitalized status. One year would give Summit Community ample time to raise alternative funds either through retail deposits or the sale of assets, and obtain capital resources to restore it to well capitalized status.

Scenario 2 – Summit Community’s credit quality deteriorates such that the FHLB restricts further advances. If in the event that the Bank’s credit quality deteriorated to the point that further advances under its line with the FHLB were restricted, Summit Community:

- Would severely curtail lending and other growth activities until such time as access to this line could be restored, thus eliminating the need for net new advances, and
- Would still have available current liquid funding sources secured by unencumbered loans and securities totaling \$267 million aside from its FHLB line, which would result in a funding source of approximately \$225 million.

Scenario 3 – A competitive financial institution offers a retail deposit program at interest rates significantly above current market rates in the Summit Community’s market areas. If a competitive financial institution offered a retail deposit program at rates well in excess of current market rates in the Summit Community’s market area, the Bank:

- Presently has \$488 million in available sources of liquid funds which could be drawn upon immediately to fund any “net run off” of deposits from this activity.
- Would severely curtail lending and other growth activities so as to preserve the availability of as much contingency funds as possible.
- Would begin offering its own competitive deposit program when deemed prudent so as to restore the retail deposits lost to the competition.

We continuously monitor our liquidity position to ensure that day-to-day as well as anticipated funding needs are met. We are not aware of any trends, commitments, events or uncertainties that have resulted in or are reasonably likely to result in a material change to our liquidity.

One of our continuous goals is maintenance of a strong capital position. Through management of our capital resources, we seek to provide an attractive financial return to our shareholders while retaining sufficient capital to support future growth. Shareholders’ equity at March 31, 2013 totaled \$110.0 million compared to \$108.6 million at December 31, 2012.

Summit and Summit Community have entered into informal Memoranda of Understanding (“MOU’s”) with their respective regulatory authorities. A memorandum of understanding is characterized by the regulatory authorities as an informal action that is not published or publicly available and that is used when circumstances warrant a milder form of action than a formal supervisory action, such as a formal written agreement or order. Among other things, under the MOU’s, Summit’s management team has agreed to:

- The Bank achieving and maintaining a minimum Tier 1 leverage capital ratio of at least 8% and a total risk-based capital ratio of at least 11%;
- The Bank providing 30 days prior notice of any declaration of intent to pay cash dividends to provide the Bank’s regulatory authorities an opportunity to object;
- Summit suspending all cash dividends on its common stock until further notice. Dividends on all preferred stock, as well as interest payments on subordinated notes underlying Summit’s trust preferred securities, continue to be permissible; and,
- Summit not incurring any additional debt, other than trade payables, without the prior written consent of the principal banking regulators.

Summit Financial Group, Inc. and Subsidiaries
Management's Discussion and Analysis of Financial Condition and
Results of Operations

On October 25, 2012, the Bank entered into a revised MOU (“Bank MOU”) which replaced the Bank MOU effective September 24, 2009 and subsequently amended on February 1, 2011. In general, the Bank MOU includes provisions substantially similar to those in the prior Bank MOU with the exception that several provisions deemed no longer applicable by the regulatory authorities were removed and a provision relative to reducing the Bank’s levels of classified assets was added.

In summary, we have agreed, among other things, to address the following matters relative to the Bank:

- maintaining a Board committee which monitors and promotes compliance with the provisions of the Bank MOU;
- providing the Bank’s regulatory authorities with updated reports of criticized assets and/or formal workout plans for all nonperforming borrower relationships with an aggregate outstanding balance exceeding \$1 million;
- developing and submitting to regulatory authorities a written plan to reduce the Bank’s risk exposure in each adversely classified credit relationship in excess of \$1 million and all OREO;
 - establishing procedures to report all loans with balances exceeding \$500,000 that have credit weaknesses or that fall outside of the Bank’s policy;
 - annually reviewing the organizational structure and operations of the Bank’s loan department;
 - maintaining an adequate allowance for loan and lease losses through charges to current operating income;
- reviewing overall liquidity objectives and developing and submitting to regulatory authorities plans and procedures aimed to improve liquidity and reduce reliance on volatile liabilities;
- preparing comprehensive budgets and earnings forecasts for the Bank and submitting reports comparing actual performance to the budget plan;
- maintaining a minimum Tier 1 Leverage Capital ratio of at least 8% and a Total Risk-based Capital ratio of at least 11%;
 - not paying any cash dividends without the prior written consent of the banking regulators; and,
- providing quarterly progress reports to the Bank’s regulatory authorities detailing steps taken to comply with the Bank MOU.

Dividends on Summit’s preferred stock, as well as interest payments on our subordinated debt and junior subordinated debentures underlying our trust preferred securities, continue to be permissible. However, such dividends and interest payments on our preferred stock and trust preferred debt are subject to future review by the regulatory authorities should we continue to experience deterioration in our financial condition.

Management's Discussion and Analysis of Financial Condition and
Results of Operations

Although dividends from Summit Community are the principal source of funds to pay dividends, interest, and principal payments on Summit's preferred stock, subordinated debentures (including those owed to unconsolidated subsidiary trusts), and term borrowings, we currently have sufficient cash on hand to continue to service our subordinated debentures and term borrowings obligations as well as the expected dividend payments on our preferred stock through early 2015. Nevertheless, we can make no assurances that we will continue to have sufficient funds available for Summit's debt service and for distributions to the holders of our preferred stock.

Refer to Note 13 of the notes to the accompanying consolidated financial statements for additional information regarding regulatory restrictions on our capital as well as our subsidiaries' capital.

CONTRACTUAL CASH OBLIGATIONS

During our normal course of business, we incur contractual cash obligations. The following table summarizes our contractual cash obligations at March 31, 2013.

Table IX -
Contractual
Cash
Obligations

	Long Term Debt	Capital Trust Securities	Operating Leases
Dollars in thousands			
2013	\$ 72	\$ -	\$ 190
2014	82,527	-	209
2015	11,909	-	38
2016	28,911	-	-
2017	918	-	-
Thereafter	56,051	19,589	-
Total	\$ 180,388	\$ 19,589	\$ 437

OFF-BALANCE SHEET ARRANGEMENTS

We are involved with some off-balance sheet arrangements that have or are reasonably likely to have an effect on our financial condition, liquidity, or capital. These arrangements at March 31, 2013 are presented in the following table.

MARKET RISK MANAGEMENT

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, exchange rates and equity prices. Interest rate risk is our primary market risk and results from timing differences in the repricing of assets, liabilities and off-balance sheet instruments, changes in relationships between rate indices and the potential exercise of imbedded options. The principal objective of asset/liability management is to minimize interest rate risk and our actions in this regard are taken under the guidance of our Asset/Liability Management Committee ("ALCO"), which is comprised of members of senior management and members of the Board of Directors. The ALCO actively formulates the economic assumptions that we use in our financial planning and budgeting process and establishes policies which control and monitor our sources, uses and prices of funds.

Some amount of interest rate risk is inherent and appropriate to the banking business. Our net income is affected by changes in the absolute level of interest rates. Our interest rate risk position is liability sensitive. The nature of our lending and funding activities tends to drive our interest rate risk position to being liability sensitive. That is, absent any changes in the volumes of our interest earning assets or interest bearing liabilities, liabilities are likely to reprice faster than assets, resulting in a decrease in net income in a rising rate environment. Net income would increase in a falling interest rate environment. Net income is also subject to changes in the shape of the yield curve. In general, a flattening yield curve would result in a decline in our earnings due to the compression of earning asset yields and funding rates, while a steepening would result in increased earnings as margins widen.

Several techniques are available to monitor and control the level of interest rate risk. We primarily use earnings simulations modeling to monitor interest rate risk. The earnings simulation model forecasts the effects on net interest income under a variety of interest rate scenarios that incorporate changes in the absolute level of interest rates and changes in the shape of the yield curve. Each increase or decrease in interest rates is assumed to gradually take place over the next 12 months, and then remain stable, except for the up 400 scenario, which assumes a gradual increase in rates over 24 months. Assumptions used to project yields and rates for new loans and deposits are derived from historical analysis. Securities portfolio maturities and prepayments are reinvested in like instruments. Mortgage loan prepayment assumptions are developed from industry estimates of prepayment speeds. Noncontractual deposit repricings are modeled on historical patterns.

The following table presents the estimated sensitivity of our net interest income to changes in interest rates, as measured by our earnings simulation model as of March 31, 2013. The sensitivity is measured as a percentage change in net interest income given the stated changes in interest rates (gradual change over 12 months, stable thereafter for the down 100 and the up 200 scenarios, and gradual change over 24 months for the up 400 scenario) compared to net interest income with rates unchanged in the same period. The estimated changes set forth below are dependent on the assumptions discussed above and are well within our ALCO policy limit, which is a 10% reduction in net interest income over the ensuing twelve month period.

Management's Discussion and Analysis of Financial Condition and
Results of Operations

Change in Interest Rates (basis points)	Estimated % Change in Net Interest Income Over:	
	0-12 Months	13-24 Months
Down		
100 (1)	0.25 %	7.22%
Up 200		
(1)	-2.15 %	-3.33%
Up 400		
(2)	-0.99 %	-5.29%

(1) assumes a parallel shift in the yield curve
 (2) assumes 400 bp increase over 24 months

CONTROLS AND PROCEDURES

Our management, including the Chief Executive Officer and Chief Financial Officer, has conducted as of March 31, 2013, an evaluation of the effectiveness of disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures as of March 31, 2013 were effective. There were no changes in our internal control over financial reporting that occurred during the quarter ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Summit Financial Group, Inc. and Subsidiaries
Part II. Other Information

Item 1. Legal Proceedings

We are involved in various legal actions arising in the ordinary course of business. In the opinion of management, the outcome of these matters will not have a significant adverse effect on the consolidated financial statements.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2012.
