#### TEVA ANNOUNCES TENTATIVE APPROVAL OF OCTREOTIDE ACETATE INJECTION

**Jerusalem, Israel, March 30, 2005** - Teva Pharmaceutical Industries Ltd. (NASDAQ: TEVA) announced today that the U.S. Food and Drug Administration has granted tentative approval for the Company's Octreotide Acetate Injection, 50 mcg/mL, 100 mcg/mL and 500 mcg/mL in one-mL single-dose vials and 200 mcg/mL and 1000 mcg/mL in 5 mL multi-dose vials. Final approval is subject to the expiration of any applicable exclusivity period enjoyed by another ANDA filer.

Octreotide Acetate Injection is the AP-rated generic equivalent of Novartis Pharmaceuticals' Sandostatin<sup>&reg</sup> Injection. This product is indicated for the treatment of acromegaly, metastatic carcinoid tumors and vasoactive intestinal peptide tumors.

Total annual sales of the brand in single-dose and multi-dose configurations are approximately \$80 million and \$70 million, respectively.

Teva Pharmaceutical Industries Ltd., headquartered in Israel, is among the top 25 pharmaceutical companies and among the largest generic pharmaceutical companies in the world. The company develops, manufactures and markets generic and innovative human pharmaceuticals and active pharmaceutical ingredients. Close to 90% of Teva`s sales are in North America and Europe.

Safe Harbor Statement under the U. S. Private Securities Litigation Reform Act of 1995: This release contains forward-looking statements, which express the beliefs and expectations of management. Such statements are based on management's current beliefs and expectations and involve a number of known and unknown risks and uncertainties that could cause Teva's future results, performance or achievements to differ significantly from the results, performance or achievements expressed or implied by such forward-looking statements. Important factors that could cause or contribute to such differences include Teva's ability to successfully develop and commercialize additional pharmaceutical products, the introduction of competitive generic products, the impact of competition from brand-name companies that sell or license their own generic products under generic trade dress and at generic prices (so called "authorized generics") or seek to delay the introduction of generic products, regulatory changes that may prevent Teva from exploiting exclusivity periods, potential liability for sales of generic products prior to a final court decision, including that relating to the generic version of Neurontin&reg, the effects of competition on Copaxone&reg sales, the impact of pharmaceutical industry regulation and pending legislation that could affect the pharmaceutical industry, the difficulty of predicting U.S. Food and Drug Administration, European Medicines Association and other regulatory authority approvals, the regulatory environment and changes in the health policies and structure of various countries, Teva's ability to successfully identify, consummate and integrate acquisitions, exposure to product liability claims, dependence on patent and other protections for innovative products, significant operations outside the United States that may be adversely affected by terrorism or major hostilities, fluctuations in currency, exchange and interest rates, operating results and other factors that are discussed in Teva's Annual Report on Form 20-F and its other filings with the U.S. Securities and Exchange Commission. Forward-looking statements speak only as of the date on which they are made and the Company undertakes no obligation to update publicly or revise any forward-looking statement, whether as a result of new information, future developments or otherwise.
