a Principal amount is stated in 1,000 Brazilian Real Units.

b Redemption price at maturity is adjusted for inflation.

c A portion or all of the security purchased on a delayed delivery basis.

## Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-Q

<sup>d</sup> Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States.

Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption

from registration. These securities have been deemed liquid under guidelines approved by the Fund's Board of Trustees. At May 31, 2014, the aggregate value of these

securities was \$30,929,734, representing 2.67% of net assets.

<sup>e</sup> Security was purchased pursuant to Rule 144A under the Securities Act of 1933 and may be sold in transactions exempt from registration only to qualified institutional buyers

or in a public offering registered under the Securities Act of 1933. These securities have been deemed liquid under guidelines approved by the Fund's Board of Trustees. At

May 31, 2014, the aggregate value of these securities was \$120,588,048, representing 10.39% of net assets.

<sup>f</sup> Principal amount is stated in 100 Mexican Peso Units.

<sup>g</sup> Principal amount of security is adjusted for inflation.

<sup>h</sup> Principal amount is stated in 100 Unidad de Inversion Units.

<sup>i</sup> The coupon rate shown represents the rate at period end.

<sup>j</sup> A supranational organization is an entity formed by two or more central governments through international treaties.

# Templeton Global Income Fund

## Notes to Statement of Investments (unaudited)

### 1. ORGANIZATION

Templeton Global Income Fund (Fund) is registered under the Investment Company Act of 1940, as amended, as a closed-end management investment company.

### 2. FINANCIAL INSTRUMENT VALUATION

The Fund's investments in financial instruments are carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Fund calculates the net asset value (NAV) per share at the close of the New York Stock Exchange (NYSE), generally at 4 p.m. Eastern time (NYSE close) on each day the NYSE is open for trading. Under compliance policies and procedures approved by the Fund's Board of Trustees (the Board), the Fund's administrator has responsibility for oversight of valuation, including leading the cross-functional Valuation and Liquidity Oversight Committee (VLOC). The VLOC provides administration and oversight of the Fund's valuation policies and procedures, which are approved annually by the Board. Among other things, these procedures allow the Fund to utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value.

Debt securities generally trade in the over-the-counter (OTC) market rather than on a securities exchange. The Fund's pricing services use multiple valuation techniques to determine fair value. In instances where sufficient market activity exists, the pricing services may utilize a market-based approach through which quotes from market makers are used to determine fair value. In instances where sufficient market activity may not exist or is limited, the pricing services also utilize proprietary valuation models which may consider market characteristics such as benchmark yield curves, credit spreads, estimated default rates, anticipated market interest rate volatility, coupon rates, anticipated timing of principal repayments, underlying collateral, and other unique security features in order to estimate the relevant cash flows, which are then discounted to calculate the fair value. Securities denominated in a foreign currency are converted into their U.S. dollar equivalent at the foreign exchange rate in effect at the close of the NYSE on the date that the values of the foreign debt securities are determined. Investments in open-end mutual funds are valued at the closing net asset value.

Certain derivative financial instruments (derivatives) trade in the OTC market. The Fund's pricing services use various techniques including industry standard option pricing models and proprietary discounted cash flow models to determine the fair value of those instruments. The Fund's net benefit or obligation under the derivative contract, as measured by the fair market value of the contract, is included in net assets. Derivatives listed on an exchange are valued at the official closing price of the day.

The Fund has procedures to determine the fair value of financial instruments for which market prices are not reliable or readily available. Under these procedures, the VLOC convenes on a regular basis to review such financial instruments and considers a number of factors, including significant unobservable valuation inputs, when arriving at fair value. The VLOC primarily employs a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the investment to determine the fair value of the investment. An income-based valuation approach may also be used in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an

---

active market existed. The VLOC employs various methods for calibrating these valuation approaches including a regular review of key inputs and assumptions, transactional back-testing or disposition analysis, and reviews of any related market activity.

Trading in securities on foreign securities stock exchanges and OTC markets may be completed before the daily close of business on the NYSE. Occasionally, events occur between the time at which trading in a foreign security is completed and the close of the NYSE that might call into question the reliability of the value of a portfolio security held by the Fund. As a result, differences may arise between the value of the Fund's portfolio securities as determined at the foreign market close and the latest indications of value at the close of the NYSE. In order to minimize the potential for these differences, the VLOC monitors price movements following the close of trading in foreign stock markets through a series of country specific market proxies (such as baskets of American Depositary Receipts, futures contracts and exchange traded funds). These price movements are measured against established trigger thresholds for each specific market proxy to assist in determining if an event has occurred that may call into question the reliability of the values of the foreign securities held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services.

Also, when the last day of the reporting period is a non-business day, certain foreign markets may be open on those days that the NYSE is closed, which could result in differences between the value of the Fund's portfolio securities on the last business day and the last calendar day of the reporting period. Any significant security valuation changes due to an open foreign market are adjusted and reflected by the Fund for financial reporting purposes.

### **3. DERIVATIVE FINANCIAL INSTRUMENTS**

The Fund invested in derivatives in order to manage risk or gain exposure to various other investments or markets. Derivatives are financial contracts based on an underlying or notional amount, require no initial investment or an initial net investment that is smaller than would normally be required to have a similar response to changes in market factors, and require or permit net settlement. Derivatives contain various risks including the potential inability of the counterparty to fulfill their obligations under the terms of the contract, the potential for an illiquid secondary market, and/or the potential for market movements.

Derivative counterparty credit risk is managed through a formal evaluation of the creditworthiness of all potential counterparties. The Fund attempts to reduce its exposure to counterparty credit risk on OTC derivatives, whenever possible, by entering into International Swaps and Derivatives Association (ISDA) master agreements with certain counterparties. These agreements contain various provisions, including but not limited to collateral requirements, events of default, or early termination. Termination events applicable to the counterparty include certain deteriorations in the credit quality of the counterparty. Termination events applicable to the Fund include failure of the Fund to maintain certain net asset levels and/or limit the decline in net assets over various periods of time. In the event of default or early termination, the ISDA master agreement gives the non-defaulting party the right to net and close-out all transactions traded, whether or not arising under the ISDA agreement, to one net amount payable by one counterparty to the other. Early termination by the counterparty may result in an immediate payment by the Fund of any net liability owed to that counterparty under the ISDA agreement.

Collateral requirements differ by type of derivative. Collateral terms are contract specific for OTC derivatives. For OTC derivatives traded under an ISDA master agreement, posting of collateral is required by either the fund or the applicable counterparty if the total net exposure of all OTC derivatives with the applicable counterparty exceeds the minimum transfer amount, which typically ranges from \$100,000 to \$250,000, and can vary depending on the counterparty and the type of the agreement. Generally, collateral is determined at the close of fund business each day and any additional collateral required due to changes in derivative values may be delivered by the fund or the counterparty within a few business days. Collateral pledged and/or received by the fund, if any, is held in segregated accounts with the fund's

---

custodian/counterparty broker and can be in the form of cash and/or securities. Unrestricted cash may be invested according to the Fund's investment objectives.

The Fund entered into OTC forward exchange contracts primarily to manage and/or gain exposure to certain foreign currencies. A forward exchange contract is an agreement between the Fund and a counterparty to buy or sell a foreign currency for a specific exchange rate on a future date.

The Fund entered into interest rate swap contracts primarily to manage interest rate risk. An interest rate swap is an agreement between the Fund and a counterparty to exchange cash flows based on the difference between two interest rates, applied to a notional principal amount. These agreements may be privately negotiated in the over-the-counter market ("OTC interest rate swaps") or may be executed on a registered exchange ("centrally cleared interest rate swaps"). For centrally cleared interest rate swaps, required initial margins are pledged by the Fund, and the daily change in fair value is accounted for as a variation margin payable or receivable. Over the term of the contract, contractually required payments to be paid and to be received are accrued daily and recorded as unrealized depreciation and appreciation until the payments are made, at which time they are realized.

#### 4. INCOME TAXES

At May 31, 2014, the cost of investments and net unrealized appreciation (depreciation) for income tax purposes were as follows:

Cost of investments	\$	1,071,201,528
Unrealized appreciation	\$	75,593,699
Unrealized depreciation		(17,808,678 )
Net unrealized appreciation (depreciation)	\$	57,785,021

#### 5. FAIR VALUE MEASUREMENTS

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's financial instruments and are summarized in the following fair value hierarchy:

- Level 1 – quoted prices in active markets for identical financial instruments
- Level 2 – other significant observable inputs (including quoted prices for similar financial instruments, interest rates, prepayment speed, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of financial instruments)

The input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level.

For movements between the levels within the fair value hierarchy, the Fund has adopted a policy of recognizing the transfers as of the date of the underlying event which caused the movement.

A summary of inputs used as of May 31, 2014, in valuing the Fund's assets and liabilities carried at fair value, is as follows:

---

		Level 1		Level 2		Level 3		Total
<b>Assets:</b>								
Investments in Securities:								
Foreign Government and Agency Securities <sup>a</sup>	\$	-	\$	983,230,344		\$ -		983,230,344
Short Term Investments		91,606,226		54,149,979		-		145,756,205
Total Investments in Securities	\$	91,606,226	\$	1,037,380,323		\$ -		1,128,986,549
Other Financial Instruments								
Forward Exchange Contracts	\$	-	\$	14,232,501		\$ -		14,232,501
<b>Liabilities:</b>								
Other Financial Instruments								
Forward Exchange Contracts	\$	-	\$	7,653,248		\$ -		7,653,248
Swap Contracts		-		5,413,611		-		5,413,611
Total Other Financial Instruments	\$	-	\$	13,066,859		\$ -		13,066,859

<sup>a</sup>For detailed categories, see the accompanying Statement of Investments.

## 6. NEW ACCOUNTING PRONOUNCEMENTS

In June 2014, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) No. 2014-11, Transfers and Servicing (Topic 860), Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures. The ASU changes the accounting for certain repurchase agreements and expands disclosure requirements related to repurchase agreements, securities lending, repurchase-to-maturity and similar transactions. The ASU is effective for interim and annual reporting periods beginning after December 15, 2014. Management is currently evaluating the impact, if any, of applying this provision.

## 7. SUBSEQUENT EVENTS

The Fund has evaluated subsequent events through the issuance of the Statement of Investments and determined that no events have occurred that require disclosure.

For additional information on the Fund's significant accounting policies, please refer to the Fund's most recent semiannual or annual shareholder report.

**Item 2. Controls and Procedures.**

(a) Evaluation of Disclosure Controls and Procedures. The Registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Registrant's filings under the Securities Exchange Act of 1934 and the Investment Company Act of 1940 is recorded, processed, summarized and reported within the periods specified in the rules and forms of the Securities and Exchange Commission. Such information is accumulated and communicated to the Registrant's management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. The Registrant's management, including the principal executive officer and the principal financial officer, recognizes that any set of controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Within 90 days prior to the filing date of this Quarterly Schedule of Portfolio Holdings on Form N-Q, the Registrant had carried out an evaluation, under the supervision and with the participation of the Registrant's management, including the Registrant's principal executive officer and the Registrant's principal financial officer, of the effectiveness of the design and operation of the Registrant's disclosure controls and procedures. Based on such evaluation, the Registrant's principal executive officer and principal financial officer concluded that the Registrant's disclosure controls and procedures are effective.

(b) Changes in Internal Controls. There have been no changes in the Registrant's internal controls or in other factors that could materially affect the internal controls over financial reporting subsequent to the date of their evaluation in connection with the preparation of this Quarterly Schedule of Portfolio Holdings on Form N-Q.

**Item 3. Exhibits.**

(a) Certification pursuant to Section 30a-2 under the Investment Company Act of 1940 of Laura F. Ferguson, Chief Executive Officer - Finance and

Administration, and Mark H. Otani, Chief Financial Officer and Chief Accounting Officer.

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
